

A  
CTIONARY OF THE BIBLE

COMPRISING ITS  
ANTIQUITIES, BIOGRAPHY, GEOGRAPHY,  
AND NATURAL HISTORY.

EDITED  
BY WILLIAM SMITH, LL.D.,  
CLASSICAL EXAMINER IN THE UNIVERSITY OF LONDON.

IN TWO VOLUMES. — Vol. I.

AARON—JUTTAH.

*SECOND EDITION.*

LONDON:  
JOHN MURRAY, ALBEMARLE STREET;  
WALTON AND MABERLY, UPPER GOWER STREET.

1861.

*The right of Translation is reserved.*

LONDON PRINTED BY W. CLOWES AND SONS, STAMFORD STREET,  
AND CHURCH LANE.

# LIST OF WRITERS,

WITH THE INITIALS AFFIXED TO THEIR ARTICLES.

ALFORD, HENRY, D.D., Dean of Canterbury.	H.A.	HESSEY, JAMES A., D.C.L., Head Master of Merchant Taylors' School, and Hampton Lecturer in 1880.	J.A.H.
BAILEY, HENRY, B.D., Warden of St. Augustine's Coll., Canterbury; late Fellow of St. John's Coll., Cambridge.	H.B.	HOWSON, JOHN S., M.A., Principal of the Collegiate Institution, Liverpool.	J.S.H.
BARRY, ALFRED, M.A., Head Master of the Grammar School, Leeds; late Fellow of Trinity Coll., Cambridge.	A.B.	HUXTABLE, EDGAR, M.A., Subsidiary of Wells; Vice-Principal of Theological College, Wells.	E.H.—c.
BEVAN, WILLIAM L., M.A., Vicar of Hay, Brecknockshire.	W.L.B.	LAYARD, AUSTEN H., D.C.L.,	A.H.L.
BROWN, T. E., M.A., Vice-Principal of King William's Coll., Isle of Man; late Fellow of Oriel Coll., Oxford.	T.E.B.	LEATHES, STANLEY, M.A.,	S.L.
BROWNE, R. W., M.A., Professor of Classical Literature, King's Coll., London, and Prebendary of St. Paul's and Wells.	R.W.B.	MARKS, D. W., Professor of Hebrew in University Coll., London.	D.W.M.
BULLOCK, W. T., M.A., Assistant Secretary of the Society for the Propaga- tion of the Gospel in Foreign Parts.	W.T.B.	MEYRICK, FREDERICK, M.A., One of Her Majesty's Inspectors of Schools; late Fellow of Trinity Coll., Oxford.	F.M.
CLARK, SAMUEL, M.A., Principal of the Training College, Battersea.	S.C.	ORGER, E. R., M.A., Fellow of St. Augustine's Coll., Canterbury.	E.R.O.
CONANT, T. J., D.D., Professor of Sacred Literature, Brooklyn, New York.	T.J.C.	PEROWNE, J. J. S., B.D., Fellow of Corpus Christi Coll., Cambridge; Hebrew Lecturer in King's Coll., London.	J.J.S.P.
COOK, F. C., M.A., Chaplain in Ordinary to the Queen, and Prebendary of St. Paul's.	F.C.C.	PEROWNE, THOS. T., B.D., Fellow of Corpus Christi Coll., Cambridge.	T.T.P.
COTTON, G. E. L., D.D., Lord Bishop of Calcutta.	G.E.L.C.	PHILLOTT, H. W., M.A., Late Student of Christ Church, Oxford; Rector of Stamton-on-Wyre, Herefordshire.	H.W.P.
EVES, J. LEWELYN, M.A., Rector of Christ Church, St. Marylebone; late Fellow of Trin. Coll., Cambridge.	J.L.E.	PLUMPTRE, E. H., M.A., Professor of Pastoral Theology in King's Coll., London; late Fellow of Brasenose Coll., Oxford.	E.H.P.
DRAKE, WILLIAM, M.A., Hebrew Examiner in the University of London; late Fellow of St. John's Coll., Cambridge.	W.D.	POOLE, E. STANLEY, M.R.S.L.,	E.S.P.
ELLICOTT, C. J., B.D., Professor of Divinity, King's Coll., London; late Fellow of St. John's Coll., Cambridge.	C.J.E.	POOLE, R. STUART, M.R.S.L., Of the British Museum.	R.S.P.
ELWIN, WHITWELL, B.A., Rector of Borton, Norfolk.	W.E.	PORTER, J. L., M.A., Author of 'Handbook of the Holy Land.'	J.L.P.
FARRAR, F. W., M.A., Fellow of Trinity Coll., Cambridge.	F.W.F.	PRITCHARD, CHARLES, M.A., Head Master of the Grammar School, Clapham; late Fellow of St. John's Coll., Cambridge.	C.P.
FELTON, C. C., LL.D., Professor of Greek Literature in Harvard Uni- versity, Cambridge, Massachusetts.	C.C.F.	RAWLINSON, GEORGE, M.A., Late Fellow of Exeter Coll., Oxford, and Hampton Lecturer in 1859.	G.R.
FERGUSON, JAMES, F.R.S.,	J.F.	ROSE, H. J., B.D., Late Fellow of St. John's Coll., Cambridge.	H.J.R.
FFOULKES, EDMUND S., M.A., Late Fellow and Tutor of Jesus Coll., Oxford.	E.S.Ff.	SELWYN, WILLIAM, D.D., Margaret Professor of Divinity, Cambridge.	W.S.
GOTCH, F. W., LL.D., Hebrew Examiner in the University of London.	F.W.G.	SMITH, D. T., D.D., Professor of Sacred Literature, Bangor, Massa- chusetts.	D.T.S.
GROVE, GEORGE, Sydenham	G.	SMITH, WILLIAM, LL.D. (Editor), Classical Examiner in the University of London.	
HACKETT, H. B., D.D., Professor of Biblical Literature, Newton, Massa- chusetts.	H.B.H.	STANLEY, ARTHUR P., D.D., Regius Professor of Ecclesiastical History, Oxford, and Canon of Christchurch.	A.P.S.
HAWKINS, ERNEST, B.D., Prebendary of St. Paul's; late Fellow of Exeter Coll., Oxford.	E.H.—s.	STOWE, CALVIN E., D.D., Prof. of Sacred Literature, Andover, Massachusetts.	C.E.S.
LAYMAN, HENRY, M.A., Head Master of Grammar School, Cheltenham; late Fellow of St. John's Coll., Oxford.	H.H.	THOMPSON, J. P., D.D., New York	J.P.T.
HERVEY, LORD ARTHUR C., M.A., Rector of Ickworth with Horrington.	A.C.H.	THOMSON, WILLIAM, D.D., Provost of Queen's College, Oxford, and Preacher at Lincoln's Inn.	W.T.
		VENABLES, EDMUND, M.A.,	E.V.
		WESTCOTT, B. F., M.A., Late Fellow of Trinity Coll., Cambridge.	B.F.W.
		WRIGHT, WILLIAM A., B.A., Trinity Coll., Cambridge.	W.A.W.

## P R E F A C E.

THE present Work is designed to render the same service in the study of the Bible as the Dictionaries of Greek and Roman Antiquities, Biography, and Geography have done in the study of the classical writers of antiquity. Within the last few years Biblical studies have received a fresh impulse ; and the researches of modern scholars, as well as the discoveries of modern travellers, have thrown new and unexpected light upon the history and geography of the East. It has, therefore, been thought that a new Dictionary of the Bible, founded on a fresh examination of the original documents, and embodying the results of the most recent researches and discoveries, would prove a valuable addition to the literature of the country. It has been the aim of the Editor and Contributors to present the information in such a form as to meet the wants not only of theological students, but also of that larger class of persons who, without pursuing theology as a profession, are anxious to study the Bible with the aid of the latest investigations of the best scholars. Accordingly, while the requirements of the learned have always been kept in view, quotations from the ancient languages have been sparingly introduced, and generally in parentheses, so as not to interrupt the continuous perusal of the Work. It is confidently believed that the articles will be found both intelligible and interesting even to those who have no knowledge of the learned languages ; and that such persons will experience no difficulty in reading the book through from beginning to end.

The scope and object of the Work may be briefly defined. It is a Dictionary of the *Bible* and not of *Theology*. It is intended to elucidate the antiquities, biography, geography, and natural history of the Old Testament, New Testament, and Apocrypha ; but not to explain systems of theology, or discuss points of controversial divinity. It

has seemed, however, necessary in a "Dictionary of the Bible" to give a full account of the Book, both as a whole and in its separate parts. Accordingly, articles are inserted not only upon the general subject, such as "Bible," "Apocrypha," and "Canon," and upon the chief ancient versions, as "Septuagint" and "Vulgate;" but also upon each of the separate books. These articles are naturally some of the most important in the Work, and occupy considerable space, as will be seen by referring to "Genesis," "Isaiah," and "Job."

The Editor believes that the Work will be found, upon examination, to be far more complete in the subjects which it professes to treat than any of its predecessors. No other Dictionary has yet attempted to give a complete list of the proper names occurring in the Old and New Testaments, to say nothing of those in the Apocrypha. The present Work is intended to contain *every name*, and, in the case of minor names, references to every passage in the Bible in which each occurs. It is true that many of the names are those of comparatively obscure persons and places; but this is no reason for their omission. On the contrary, it is precisely for such articles that a Dictionary is most needed. An account of the more important persons and places occupies a prominent position in historical and geographical works; but of the less conspicuous names no information can be obtained in ordinary books of reference. Accordingly many names, which have been either entirely omitted or cursorily treated in other Dictionaries, have had considerable space devoted to them, the result being that much curious and sometimes important knowledge has been elicited respecting subjects, of which little or nothing was previously known. Instances may be seen by referring to the articles "Ishmael, son of Nethaniah," "Jareb," "Jedidiah," "Jehosheba."

In the alphabetical arrangement the orthography of the Authorized Version has been invariably followed. Indeed the Work might be described as a Dictionary of the Bible, *according to the Authorized Version*. But at the commencement of each article devoted to a proper name, the corresponding forms in the Hebrew, Greek, and Vulgate are given, together with the variations in the two great manuscripts of the Septuagint, which are often curious and well worthy of notice. All inaccuracies in the Authorized Version are likewise carefully noted.

In the composition and distribution of the articles three points

have been especially kept in view—the insertion of copious references to the ancient writers and to the best modern authorities, as much brevity as was consistent with the proper elucidation of the subjects, and facility of reference. To attain the latter object an explanation is given, even at the risk of some repetition, under every word to which a reader is likely to refer, since it is one of the great drawbacks in the use of a Dictionary to be referred constantly from one heading to another, and frequently not to find at last the information that is wanted.

Many names in the Bible occur also in the classical writers, and are therefore included in the Classical Dictionaries already published. But they have in all cases been written anew for this work, and from a Biblical point of view. No one would expect in a Dictionary of the Bible a complete history of Alexandria or a detailed life of Alexander the Great, simply because they are mentioned in a few passages of the Sacred Writers. Such subjects properly belong to Dictionaries of Classical Geography and Biography, and are only introduced here so far as they throw light upon Jewish history, and the Jewish character and faith. The same remark applies to all similar articles, which, far from being a repetition of those contained in the preceding Dictionaries, are supplementary to them, affording the Biblical information which they did not profess to give. In like manner it would obviously be out of place to present such an account of the plants and animals mentioned in the Scriptures, as would be appropriate in systematic treatises on Botany or Zoology. All that can be reasonably required, or indeed is of any real service, is to identify the plants and animals with known species or varieties, to discuss the difficulties which occur in each subject, and to explain all allusions to it by the aid of modern science.

In a Work written by various persons, each responsible for his own contributions, differences of opinion must naturally occur. Such differences, however, are both fewer and of less importance than might have been expected from the nature of the subject; and in some difficult questions—such, for instance, as that of the “Brethren of our Lord”—the Editor, instead of endeavouring to obtain uniformity, has considered it an advantage to the reader to have the arguments stated from different points of view.

An attempt has been made to ensure, as far as practicable, uniformity of reference to the most important books. In the case

of two works of constant occurrence in the geographical articles, it may be convenient to mention that all references to Dr. Robinson's "Biblical Researches" and to Professor Stanley's "Sinai and Palestine," have been uniformly made to the second edition of the former work (London, 1856, 3 vols.), and to the fourth edition of the latter (London, 1857).

The Editor cannot conclude this brief explanation without expressing his obligations to the Writers of the various articles. Their names are a sufficient guarantee for the value of their contributions; but the warm interest they have taken in the book, and the unwearied pains they have bestowed upon their separate departments, demand from the Editor his grateful thanks. There is, however, one Writer to whom he owes a more special acknowledgment. Mr. George Grove of Sydenham, besides contributing the articles to which his initial is attached, has rendered the Editor important assistance in writing the majority of the articles on the more obscure names, in preparing the lists of these names, in the correction of the proofs, and in the revision of the whole book. The Editor has also to express his obligations to Mr. E. Stanley Poole for the correction of the Arabic words.

An Atlas of Biblical Geography will follow the second volume of the Work, which will be published by the end of next year.

WILLIAM SMITH.

LONDON, *March 15th*, 1860.

# DICTIONARY

OF

## BIBLICAL ANTIQUITIES, BIOGRAPHY, GEOGRAPHY, AND NATURAL HISTORY.

### A

A'AJAR. [ADDAN.]

AA'RON (אַהֲרֹן; *'Aarōn*; *Aaron*), the son of Amram (עֲמֶרָם, *hundred of the Highest*) and Jochebed (יֹכֶבֶד, *whose glory is Jehovah*), and the elder brother of Moses and Miriam (Num. xvi. 59, xxxiii. 39). He was a Levite, and, as the first-born, would naturally be the priest of the household, even before any special appointment by God. Of his early history we know nothing, although, by the way in which he is first mentioned in Ex. iv. 14, as "Aaron the Levite," it would seem, as if he had been already to some extent a leader in his tribe. All that is definitely recorded of him at this time is, that, in the same passage, he is described as one "who could speak well." Judging from the acts of his life, we should suppose him to have been, like many eloquent men, a man of impulsive and comparatively unstable character, leaning almost wholly on his brother; incapable of that endurance of loneliness and temptation, which is an element of real greatness; but at the same time earnest in his devotion to God and man, and therefore capable of sacrifice and of discipline by trial.

His first office was to be the "Prophet," i. e. (according to the proper meaning of the word), the Interpreter and "Mouth" (Ex. iv. 16) of his brother, who was "slow of speech;" and accordingly he was not only the organ of communication with the Israelites and with Pharaoh (Ex. iv. 30, vii. 2), but also the actual instrument of working most of the miracles of the Exodus. (See Ex. vii. 19, &c.) Thus also on the way to Mount Sinai, during the battle with Amalek, Aaron is mentioned with Hur, as staying up the weary hands of Moses, when they were lifted up for the victory of Israel (not in prayer, as is sometimes explained, but) to bear the rod of God (see Ex. xvii. 9). Through all this period, he is only mentioned as dependent upon his brother, and deriving all his authority from him. The contrast between them is even more strongly marked on the arrival at Sinai. Moses at once acts as the mediator (Gal. iii. 19) for the people, to come near to God for them, and to speak His words to them. Aaron only approaches with Nadab, and Abihu, and the seventy elders of Israel, by special command, near enough to see God's glory, but not so as to enter His immediate presence. Left then, on Moses' departure, to guide the people, he is tried

### AARON

for a moment on his own responsibility and he fails, not from any direct unbelief on his own part, but from a weak inability to withstand the demand of the people for visible "gods to go before them." Possibly it seemed to him prudent to make an image of Jehovah, in the well-known form of Egyptian idolatry (Apis or Mnevis), rather than to risk the total alienation of the people to false gods; and his weakness was rewarded by seeing a "feast of the Lord" (Ex. xxxii. 5) degraded to the lowest form of heathenish sensuality, and knowing, from Moses' words and deeds, that the covenant with the Lord was utterly broken. There can hardly be a stronger contrast with this weakness, and the self-convicted shame of his excuse, than the burning indignation of Moses, and his stern decisive measures of vengeance; although beneath these there lay an ardent affection, which went almost to the verge of presumption in prayer for the people (Ex. xxxii. 19-34), and gained forgiveness for Aaron himself (Deut. ix. 20).

It is not a little remarkable, that immediately after this great sin, and almost as though it had not occurred, God's fore-ordained purposes were carried out in Aaron's consecration to the new office of the high-priesthood. Probably the fall and the repentance from it may have made him one "who could have compassion on the ignorant, and them who are out of the way, as being himself also compassed with infirmity." The order of God for the consecration is found in Ex. xxix., and the record of its execution in Lev. viii.; and the delegated character of the Aaronic priesthood is clearly seen by the fact, that, in this its inauguration, the priestly office is borne by Moses, as God's truer representative (see Heb. vii.).

The form of consecration resembled other sacrificial ceremonies in containing, first, a sin-offering, the form of cleansing from sin and reconciliation [SIN-OFFERING]; a burnt-offering, the symbol of entire devotion to God of the nature so purified [BURNT-OFFERING]; and a meat-offering, the thankful acknowledgment and sanctifying of God's natural blessings [MEAT-OFFERING]. It had, however, besides these, the solemn assumption of the sacred robes (the garb of righteousness), the anointing (the symbol of God's grace), and the offering of the ram of consecration, the blood of which was sprinkled on Aaron and his sons, as upon the altar and vessels of the ministry, in order to sanctify them for the service of God. The former ceremonies

represented the blessings and duties of the man, the latter the special consecration of the priest.<sup>a</sup>

The solemnity of the office, and its entire dependence for sanctity on the ordinance of God, were vindicated by the death of Nadab and Abihu, for "offering strange fire" on the altar, and apparently (see Lev. x. 9, 10) for doing so in drunken recklessness. Aaron's checking his sorrow, so as at least to refrain from all outward signs of it, would be a severe trial to an impulsive and weak character, and a proof of his being lifted above himself by the office which he held.

From this time the history of Aaron is almost entirely that of the priesthood, and its chief feature is the great rebellion of Korah and the Levites against his sacerdotal dignity, united with that of Dathan and Abiram and the Reubenites against the temporal authority of Moses [KORAH]. The true vindication of the reality of Aaron's priesthood was, not so much the death of Korah by the fire of the Lord, as the efficacy of his offering of incense to stay the plague, by which he was seen to be accepted as an Intercessor for the people. The blooming of his rod which followed, was a miraculous sign, visible to all, and capable of preservation, of God's choice of him and his house.

The only occasion, on which his individual character is seen, is one of presumption, prompted as before chiefly by another, and, as before, speedily repented of. The murmuring of Aaron and Miriam against Moses clearly proceeded from their trust, the one in his priesthood, the other in her prophetic inspiration, as equal commissions from God (Num. xii. 2). It seems to have vanished at once before the declaration of Moses' exaltation above all prophecy and priesthood, except that of One who was to come; and, if we may judge from the direction of the punishment, to have originated mainly with Miriam. On all other occasions he is spoken of as acting with Moses in the guidance of the people. Leaving as he seems to have done wholly on him, it is not strange that he should have shared his sin at Meribah, and its punishment [MOSSES] (Num. xx. 10-12). As that punishment seems to have purged out from Moses the tendency to self-confidence, which tainted his character, so in Aaron it may have destroyed that idolatry of a stronger mind, into which a weaker one, once conquered, is apt to fall. Aaron's death seems to have followed very speedily. It took place on Mount Hor, after the transference of his robes and office to Eleazar, who alone with Moses was present at his death, and performed his burial (Num. xx. 28). This mount is still called the "Mount of Aaron." [LXX.]

The wife of Aaron was Elisheba (Ex. vi. 23); and the two sons who survived him, Eleazar and Ithamar. The high priesthood descended to the former, and to his descendants until the time of Eli, who, although of the house of Ithamar, received the high priesthood (see Joseph. *Ant.* v. 11, § 5, viii. 1, § 3), and transmitted it to his children; with them it continued till the accession of Solomon, who took it from Abiathar, and restored it to Zadok (of the house of Eleazar), so fulfilling the prophecy of 1 Sam. ii. 30. [A. B.]

N.B. In 1 Chr. xxvii. 17, "Aaron" (אֶהֱרֹן) is counted as one of the "tribes of Israel."

<sup>a</sup> It is noticeable that the ceremonies of the restoration of the leper to his place, as one of God's people, bear a strong resemblance to those of consecration. See Lev. xiv. 10-32.

AB (אב, *father*), an element in the composition of many proper names, of which Abia is a Chaldeic form, the syllable affixed giving the emphatic force of the definite article. Applied to God by Jesus Christ (Mat. xiv. 36), and by St. Paul (Rom. viii. 15; Gal. iv. 6). [R. W. B.]

AB. [MOSSES.]

AB'ACUC, 2 Esdr. i. 40. [HABAKKUK.]

ABAD'DON. [ASMODELUS.]

ABAG'THA (אֲבָגְתָּה; *Abgathu*), one of the seven emichs in the Persian court of Ahasuerus (Esth. i. 10). In the LXX. the names of these emichs are different. The word contains the same root which we find in the Persian names *Beglus* (Esth. i. 10), *Begthos* (Esth. ii. 21), *Begthana* (Esth. vi. 2), and *Bagusa*. Bohlen explains it from the Sanscrit *bagadāta*, "given by fortune," from *bagi*, fortune, the sun.

AB'ANA (אֲבָנָה; *Abana*), one of the "rivers (נהרות) of Damascus" (2 K. v. 12). The *Barada* (Χρυσόπλοας of the Greeks) and the *Araf* are now the chief streams of Damascus, and there can be little doubt that the former of these represents the Abana and the latter the Phazar of the text. As far back as the days of Ptolemy and Strabo the *Barada* was, as it now is, the chief river of the city (Job. iii. 446), flowing through it, and supplying most of its dwellings with water. The *Araf* is further from Damascus, and a native of the place, if speaking of the two together, would certainly, with Nannan, name the *Barada* first (Porter, i. 276). To this may be added the fact that in the Arabic version of the passage—the date of which has been fixed by Rodiger as the 11th cent.—Abana is rendered by

*Barada*, بردی. Further, it seems to have escaped notice that one branch of the *Araf*—if Kiepert's map (in Job. 1856) is to be trusted—now bears the name of *Wady Barbar*. There is however no reference to this in Robinson or Porter.

The *Barada* rises in the Anti-Libanus near *Zabdin*, at about 2½ miles from the city, and 1119 feet above it. In its course it passes the site of the ancient Abia, and receives the waters of *Ain-Fayh*, one of the largest springs in Syria. This was long believed to be the real source of the *Barada*, according to the popular usage of the country, which regards the most copious fountain, not the most distant head, as the origin of a river. We meet with other instances of the same mistake in the case of the Jordan and the Orontes [AIX]; it is to Dr. Robinson that we are indebted for its discovery in the present case (Job. iii. 477). After flowing through Damascus the *Barada* runs across the plain, leaving the remarkable Assyrian ruin *Tell es-Sakhieh* on its left bank, till it loses itself in the lake or marsh *Bahret el-Khilyeh*. Mr. Porter calculates that 14 villages and 150,000 souls are dependent on this important river. For the course of the *Barada* see Porter, vol. i. chap. v. Journ. of S. Lit. N.S. viii., Job. iii. 446, 7. Lightfoot (*Cent. Chor.* iv.) and Gesenius (*Thes.* 116) quote the name קְרַמְיִין as applied in the Lexicon *Arabic* to the Amanus. [G.]

ABA'RIM (Milton accents Ab'arim), the "mount," or "mountains of" (always with

<sup>b</sup> The *Keri*, with the Targum Jonathan and the Syriac version, has *Amamah*. See margin of A. V.

the def. article, הַר הָעֲבָרִים, or הָרִי, τὸ ὄρος τὸ Ἀβαρίμ, or ἐν τῇ πέραν τοῦ Ἰορδάνου, = the mountains of the further parts, or possibly, of the fords), a mountain or range of highlands on the east of the Jordan, in the land of Moab (Deut. xxvii. 49), facing Jericho, and forming the eastern wall of the Jordan valley at that part. Its most elevated spot was "the Mount Nebo," head of "the" Pisgah," from which Moses viewed the Promised Land before his death. There is nothing to prove that the Abaim were a range or tract of any length, unless the Ἱε-Abarin ("heaps of A.") named in Num. xxviii. 44, and which were on the south frontier of Moab, are to be taken as belonging to them. But it must be remembered that a word derived from the same root as Abaim, viz. עֲבַר, is the term commonly applied to the whole of the country on the east of the Jordan.

These mountains are mentioned in Num. xxviii. 12, xxviii. 17, 48, and Deut. xxxiii. 49; also probably in Jer. xiv. 20, where the word is rendered in the A. V. "passages."

In the absence of research on the E. of the Jordan and of the Dead Sea, the topography of those regions must remain to a great degree obscure. [G.]

**ABDA** (עֲבָדָא; Ἀβδῶν; Ἀβδ). 1. Father of Adoniram (1 K. iv. 6). 2. Son of Shammua (Neh. xi. 17), called Obadiah in 1 Chr. ix. 16.

**AB'DEEL** (עֲבְדֵאל; Ἀβδελ), father of Shechemah (Jer. xxxvi. 26).

**AB'DI** (עֲבָדִי; Ἀβαί; Ἀβδ), name of three men. 1. (1 Chr. vi. 14). 2. (2 Chr. xiv. 12). 3. (Ezr. x. 26).

**ABDIAS**, 2 Es. fr. i. 39. [OBADIAH.]

**AB'DIEL** (עֲבְדִיאל; Ἀβδιήλ; Ἀβδιήλ), son of Guni (1 Chr. v. 15).

**AB'DON** (עֲבְדֹן; Ἀβδὸν; Ἀβδῶν). 1. A judge of Israel (Judg. xii. 13, 15), perhaps the same person as Bedan in 1 Sam. xii. 11. 2. Son of Shashak (1 Chr. viii. 23). 3. First-born son of Jehiel, son of Gibeon (1 Chr. viii. 30, ix. 35, 36). 4. Son of Meiah, a contemporary of Josiah (2 Chr. xxxiv. 20), called Achibor in 2 K. xxii. 12.

**AB'DON** (עֲבְדֹן; Ἀβδὸν, Ἀββῶν, Παβῶθ), a city in the tribe of Asher, given to the Gershonites (Josh. xxi. 30; 1 Chr. vi. 74). No place of this name appears in the list of the towns of Asher (Josh. xix. 24-31); but instead we find (28) עֲבֹן, "Hebron," which is the same word, with the change frequent in Hebrew of 7 for 7. Indeed many MSS. have Ablon in Josh. xix. 28 (Ges. 380; Winer, s. v.); but, on the other hand, all the ancient versions retain the R, except the Vatican LXX, which has Ἐαβῶν (Alex. Ἀχράν). [G.]

**ABED'NEGO** (עֲבֶר-נֶגוֹ; Ἀβδευαγῶ; Ἀβδευαγῶ), i. e. *servant of Nego*, perhaps the same as Nebo, which was the Chaldaean name of the planet Mercury, worshipped as the scribe and interpreter of the gods (Gesens). Abednego was the Chaldaean name

given to Azariah, one of the three friends of Daniel, miraculously saved from the burning fiery furnace (Dan. iii.). [AZARIAH, No. 10.] [R. W. B.]

**ABEL** (אֶבֶל = <sup>b</sup> meadow, according to Gesenius, who derives it from a root signifying moisture like that of grass: see, however, the arguments in favour of a different meaning of Lengerke, *Kenan*, i. 358, and Hengstenberg, *Pent.* ii. 319); the name of several places in Palestine:—

1. **A'BEL-BETH-MA'ACHA** (בֵּית מַעֲכָה, א), a town of some importance (πόλις καὶ μητροπολις, "a city and a mother in Israel" 2 Sam. xv. 19), in the extreme N. of Palestine; named with Dan, Cinneroth, Kedesh; and as such falling an early prey to the invading kings of Syria (1 K. xv. 20) and Assyria (2 K. xv. 29). In the parallel passage, 2 Chr. xvi. 4, the name is changed to Abel Main, מַיִם אֶ = "Abel on the waters." Here Sheba was overtaken and besieged by Joab (2 Sam. xv. 14, 15); and the city was saved by the exercise on the part of one of its inhabitants of that sagacity for which it was proverbial (18). In verses 14 and 18 it is simply Abel, and in 14 is apparently distinguished from Beth-maacha. If the derivation of Gesenius be the correct one, the situation of Abel was probably in the *Ard el-Huleh*, the marshy meadow country which drains into the Sea of Meom, whether at *Abil* (Holmson, iii. 372), or more to the south (Stanley, *S. and P.* 390 *note*). Eusebius and Jerome place it between Paneas and Danuscaus; but this has not been identified.

2. **A'BEL-MIZRAIM** (Μιζραΐμ, מִצְרַיִם א), according to the etymology of the text, the mourning of Egypt, πένθος Αἰγύπτου (this meaning, however, requires a different pointing, אֶבֶל for אֶבֶל); the name given by the Canaanites to the floor of Atad, at which Joseph, his brothers, and the Egyptians made their mourning for Jacob (Gen. l. 11). It was beyond (עֲבֵר) — on the east of the Jordan, though placed by Jerome at Beth-Hogla (now *Ab-Hajla*), near the river, on its west bank. [ATAH.]

3. **A'BEL-SHITTIM** (with the article הַשִּׁטִּים א), "the meadow of the acacias," in the "plains" (עֲרֵבָת = the deserts) of Moab; on the low level of the Jordan valley, as contradistinguished from the cultivated "fields" on the upper level of the table-land. Here—their last resting-place before crossing the Jordan—Israel "pitched from Beth-jeshimoth unto A. Shittim," Num. xxiii. 49. The place is most frequently mentioned by its shorter name of Shittim. [SHITTIM.] In the days of Josephus it was still known as Abila,—the town encompassed in palms, (σπουρὸν οὖν πόλις ἐστὶν Ἀβίλη, φοινικόφυτον δ' ἐστὶ τὸ χωρίον, *Ant.* iv. 8, § 1), 60 stadia from the river (v. 1, § 1). The town and the palms have disappeared; but the acacia-groves, denoted by the name Shittim, still remain, "marking with a line of verdure the upper terraces of the Jordan valley" (Stanley, *S. and P.* 298).

4. **A'BEL-MEHO'LAH** (Μεωλάη, מְחֹלָה א),

<sup>a</sup> The *Am* is here rendered by *il*. The *il* in the well-known Hebron represents *Ch*. Elsewhere (as Gaza, Gomorrah) *Am* is rendered by *G* in the Auth. Version.

<sup>b</sup> It is in favour of Gesenius' interpretation that the Chaldee Targum always renders Abel by *Mishai*, which

in later Hebrew lost its special significance, and was used for a level spot or plain generally.

<sup>c</sup> It was amongst these palms, according to Josephus, that Deuteronomy was delivered by Moses. See the passage above cited.

"meadow of the dance"), named with Beth-shean (Scythopolis) and Joknean (1 K. iv. 12), and therefore in the N. part of the Jordan valley (Eus. *ἐν τῇ ἀβλῶνι*). To "the border (the 'lip' or 'brink') of Abel-meholah," and to Beth-shittah (the 'house of the acacia'), both places being evidently down in the Jordan valley, the routed Belouin host fled from Gilead (Judg. vii. 22). Here Elisha was found at his plough by Elijah returning up the valley from Horeb (1 K. xix. 16-19). In Jerome's time the name had dwindled to 'Abelmea.

5. A'BEL-GERA-MIM (אֲבֵל גֵּרָמִים), in the A. V. rendered "the plain of the vineyards," a place eastward of Jordan, beyond Arcoi; named as the point to which Jephthah's pursuit of the Beue-Ammon extended (Judg. xi. 33). A *κῶμη ἀμπελοφόρος* "Abel" is mentioned by Eusebius at 6 (Jerome, 7) miles beyond Philadelphia (Rabbah); and another, *οἰνοφόρος καλουμένη*, more to the N. 12 miles E. from Gadara, below the Hieromax. Rufus bearing the name of Abila are still found in the same position (Nitter, *Syria*, 1058). There were at least three places with the name of Arcoi on the further side of the Jordan. [ARCOI.]

6. "THE GREAT 'ABEL,' in the field of Joshua the Bethshemite" (1 Sam. vi. 18). By comparison with 14 and 15, it would seem that אֲבֵל has been here exchanged for אֶבֶן, and that for אֶבֶן should be read אֲבֵן = stone. So the LXX. and the Chaldee Targum. Our translators, by the insertion of "stone of," take a middle course. See, however, Leunger (358) and Herchermer (1 Sam. vi. 18), who hold by Abel as being the name subsequently given to the spot in reference to the "mourning" (אֲבֵלָה) there, ver. 19. In this case compare Gen. 1. 11. [G.]

A'BEL, in Hebr. HEBEL (הֶבֶל; אֲבֵל; Abel; i. e. *breath, vapour, transitoriness*, probably so called from the shortness of his life), the second son of Adam, murdered by his brother Cain (Gen. iv. 1-16). Jehovah showed respect for Abel's offering, but not for that of Cain, because, according to the Epistle to the Hebrews (xi. 4), Abel "by faith offered a more excellent sacrifice than Cain." The expression "sin," i. e. a sin-offering "lieth at the door" (Gen. iv. 7), seems to imply that the need of sacrifices of blood to obtain forgiveness was already revealed. On account of Abel's faith, St. Augustine makes Abel the type of the new regenerate man; Cain that of the natural man (*de Civ. Dei*, xv. 1). St. Chrysostom observes that Abel offered the *best* of his flock—Cain that which was most readily procured (*Hom. in Gen.* xviii. 5). Jesus Christ spoke of him as the first martyr (Matt. xxiii. 35); so did the early church subsequently. For Christian traditions see Iren. v. 67; Chrysost. *Hom. in Gen.* xix.; Cedren. *Hist.* 8. For those of the Rabbins and Mahommedans, Eisenmenger, *Entdeckt. Jud.* i. 462, 832; Hottinger, *Hist. Or.* 24; Ersch & Gruber, *Encyklop.* s. v.; and the *Kur-ân* V. The place of his murder and his grave are pointed out near Damascus (Pococke, b. ii. 168); and the neighbouring peasants tell a curious tradition respecting his burial (Stanley, *S. & P.* p. 413).

The Oriental Gnosticism of the Sabæans made Abel an innuante Aeon, and the Gnostic or Manichean sect of the Abellæ in North Africa in the time of Augustine (*de Haeres.* 86, 87), so called

themselves from a tradition that Abel, though married, lived in continence. In order to avoid perpetuating original sin, they followed his example, but in order to keep up their sect, each married pair adopted a male and female child, who in their turn vowed to marry under the same conditions. [R. W. B.]

A'BEZ (אֲבֵז, in pause אֲבֵז; 'Pebez; Abes), a town in the possession of Issachar, named between Kishion and Remeth, in Josh. xiv. 20, only. Gesenius mentions as a possible derivation of the name, that the Chaldee for tin is אֲבֵזָה. Possibly, however, the word is a corruption of אֲבֵזָה, Thebez, now *Tibbis*, a town situated not far from Engannum and Shunem (both towns of Issachar), and which otherwise has entirely escaped mention in the list in Joshua. [G.]

A'BI (אֲבִי; 'Abou; Abi), mother of king Hezekiah (2 K. xviii. 2). The name is written Abijah (אֲבִיָּה) in 2 Chr. xxix. 1. Her father's name was Zechariah. He was perhaps the Zechariah mentioned by Isaiah (viii. 2). [R. W. B.]

ABI'A, ABI'AH, or ABI'JAH (אֲבִיָּה — אֲבִיָּה; 'Abid; Abi). 1. Son of Becher, the son of Benjamin (1 Chr. vii. 8). 2. Wife of Hezion (1 Chr. ii. 24). 3. Second son of Samuel, whom together with his eldest son Joel he made judges in Beersheba (1 Sam. viii. 2; 1 Chr. vi. 28). The corruptness of their administration was the reason alleged by the Israelites for their demanding a king. 4. Mother of king Hezekiah. [ABI.]

For other persons of this name see ABIAJI.

[R. W. B.]

ABI-AL'BON. [ABIEL.]

ABI'ASAPH, otherwise written EBI'ASAPH (אֲבִיָּאֶסָף; Ex. vi. 24, and אֲבִיָּאֶסָף, 1 Chr. vi. 8, 22, iv. 19; 'Abidasp, 'Abidasp, 'Abidasp; Abiasaph; according to Simonis, "*caput patrem absolutè Denis*," with reference to the death of Korah, as related in Num. xvi.; but according to Furst and Gesenius, *father of gathering*, i. e. *the gatherer*; compare אֲבִיָּאֶסָף, Asaph, 1 Chr. vi. 39).

He was the head of one of the families of the Korhites (a house of the Kohathites), but his precise genealogy is somewhat uncertain. In Ex. vi. 24, he appears at first sight to be represented as one of the sons of Korah, and as the brother of Assir and Elkanaah. But in 1 Chr. vi. he appears as the son of Elkanaah, the son of Assir, the son of Korah. The natural inference from this would be that in Ex. vi. 24 the expression "the sons of Korah" merely means the families into which the house of the Korhites was subdivided. But if so, the verse in Exodus must be a later insertion than the time of Moses, as in Moses' lifetime the great-grandson of Korah could not have been the head of a family. And it is remarkable that the verse is quite out of its place, and appears improperly to separate ver. 25 and ver. 23, which both relate to the house of Aaron. If, however, this inference is not correct, then the Abiasaph of 1 Chr. vi. is a different person from the Abiasaph of Ex. vi., viz. his great-nephew. But this does not seem probable. It appears from 1 Chr. ix. 19, that that branch of the descendants of Abiasaph of which Shallum was chief were potters, "keepers of the gates of the tabernacle;" and from ver. 31 that

Mattithiah, "the first-born of Shallum the Korahite had the set office over the things that were made in the pans," apparently in the time of David. From Neh. xii. 25 we learn that Abisaph's family was not extinct in the days of Nehemiah; for the family of Meshullam (which is the same as Shallum), with Tahmon and Akkub, still filled the office of porters, "keeping the ward at the threshold of the gate." Other remarkable descendants of Abisaph, according to the text of 1 Chr. vi. 33-37, were Samuel the prophet and Elkanah his father (1 Sam. i. 1), and Heman the singer; but Ebisaph seems to be improperly inserted in ver. 37.\* The possessions of those Kohathites who were not descended from Aaron, consisting of ten cities, lay in the tribe of Ephraim, the half-tribe of Manasseh, and the tribe of Dan (Josh. xxi. 20-26; 1 Chr. vi. 61). The family of Elkanah the Kohathite resided in Mount Ephraim (1 Sam. i. 1). [A. C. H.]

**ABIATHAR** (אַבִּיָּאֲתָר; *Abiathar*; but the version of Sanctes Pagninus has *Ebiathar*, according to the Hebrew points. In Mark ii. 26, it is *'Abiathar*. According to Symonds, the name means "(eius) pater superstes naturalis, montis sil. matris," but according to Fürst and Gesenius, *father of excellence, or abundance*). Abiathar was that one of all the sons of Ahimelech the high priest who escaped the slaughter inflicted upon his father's house by Saul, at the instigation of Doeg the Edomite (see title to Ps. lii. and the psalm itself), in revenge for his having inquired of the Lord for David, and given him the shew-bread to eat, and the sword of Goliath the Philistine, as is related in 1 Sam. xxi. We are there told that when Doeg slew in Nob on that day fourscore and five persons that did wear a linen ephod, "one of the sons of Ahimelech the son of Ahitab, named Abiathar, escaped and fled after David;" and it is added in xviii. 6, that when he did so "he came down with an ephod in his hand," and was thus enabled to inquire of the Lord for David (1 Sam. xxi. 9, xxv. 7; 2 Sam. ii. 1, v. 19, &c.). The fact of David having been the unwilling cause of the death of all Abiathar's kindred, coupled with his gratitude to his father Ahimelech for his kindness to him, made him a firm and steadfast friend to Abiathar all his life. Abiathar on his part was firmly attached to David. He adhered to him in his wanderings while pursued by Saul; he was with him while he reigned in Hebron (2 Sam. ii. 1-3), the city of the house of Aaron (Josh. xvi. 10-13); he carried the ark before him when David brought it up to Jerusalem (1 Chr. xv. 11; 1 K. ii. 26)† he continued faithful to him in Absalom's rebellion (2 Sam. xv. 24, 29, 35, 36, xvii. 15-17, xiv. 11); and "was afflicted in all wherein David was afflicted." He was also one of David's chief counsellors (1 Chr. xxvii. 34). When, however, Adonijah set himself up for David's successor on the throne in opposition to Solomon, Abiathar, either persuaded by Joab, or in rivalry to Zadok, or under some influence which cannot now be discovered, sided with him, and was one of his chief partisans, while Zadok was on Solomon's side. For this Abiathar was banished to his native village, Anathoth, in the tribe of Benjamin (Josh. xxi. 18), and narrowly escaped with his life, which was

spared by Solomon only on the strength of his long and faithful service to David his father. He was no longer permitted to perform the functions or enjoy the prerogatives of the high-priesthood. For we are distinctly told that "Solomon thrust out Abiathar from being priest to the Lord;" and that "Zadok the priest did the king put in the room of Abiathar" (1 K. ii. 27, 35). So that it is difficult to understand the assertion in 1 K. iv. 4, that in Solomon's reign "Zadok and Abiathar were the priests;" and still more difficult in connexion with ver. 2, which tells us that "Azariah the son of Zadok" was "the priest;" a declaration confirmed by 1 Chr. vi. 10. It is probable that Abiathar did not long survive David. He is not mentioned again, and he must have been far advanced in years at Solomon's accession to the throne.

There are one or two other difficulties connected with Abiathar, to which a brief reference must be made before we conclude this article. (1.) In 2 Sam. vii. 17, and in the duplicate passage 1 Chr. xviii. 16, and in 1 Chr. xxix. 3, 6, 31, we have *Ahimelech* substituted for *Abiathar*, and *Ahimelech* the son of *Abiathar*, instead of *Abiathar* the son of *Ahimelech*. Whereas in 2 Sam. xx. 25, and in every other passage in the O. T., we are uniformly told that it was Abiathar who was priest with Zadok in David's reign, and that he was the son of Ahimelech, and that Ahimelech was the son of Ahitab. The difficulty is increased by finding Abiathar spoken of as the high-priest in whose time David ate the shew-bread, in Mark ii. 26. (See Alford, *ad loc.*) However, the evidence in favour of David's friend being *Abiathar* the son of *Ahimelech* preponderates so strongly, and the impossibility of any rational reconciliation is so clear, that one can only suppose, with Procopius of Gaza, that the error was a clerical one originally, and was propagated from one passage to another. The mention of *Abiathar* by our Lord, in Mark ii. 26, might perhaps be accounted for, if Abiathar was the person who persuaded his father to allow David to have the bread, and if, as is probable, the leaves were Abiathar's (Lev. xxiv. 9), and given by him with his own hand to David. It may also be remarked that our Lord doubtless spoke of Abiathar as אֲבִיָּאֲתָר, "the priest," the designation applied to Ahimelech throughout 1 Sam. xx., and equally applicable to Abiathar. The expression ἀρχιερεὺς is the Greek translation of our Lord's words.

(2.) Another difficulty concerning Abiathar is to determine his position relatively to Zadok, and to account for the double high-priesthood, and for the advancement of the line of Ithamar over that of Eleazar. A theory has been invented that Abiathar was David's, and Zadok Saul's high-priest, but it seems to rest on no solid ground. The facts of the case are these:—Ahimelech, the son of Ahitab, the son of Phinehas, the son of Eli, was high-priest in the reign of Saul. On his death his son Abiathar became high-priest. The first mention of Zadok is in 1 Chr. xii. 28, where he is described as "a young man mighty of valour," and is said to have joined David while he reigned in Hebron, in company with Jehoiada, "the leader of the Aarontes." From this time we read, both in the books of Samuel and Chronicles, of "Zadok and Abiathar the priests," Zadok being always named first. And yet we are told that Solomon on his accession put Zadok in the room of Abiathar. Perhaps the true state of the case was, that Abiathar was the first,

\* See *The Genealogies of our Lord and Saviour Jesus Christ*, by Lord Arthur Hervey, p. 210, and p. 214, note.

and Zadok the second priest; but that from the superior strength of the house of Eleazar (of which Zadok was head), which enabled it to furnish 16 out of the 24 courses (1 Chr. xxiv.), Zadok acquired considerable influence with David; and that thus, added to his being the heir of the elder line, and perhaps also to some of the passages being written after the line of Zadok were established in the high-priesthood, led to the precedence given him over Abiathar. We have already suggested the possibility of jealousy of Zadok being one of the motives which inclined Abiathar to join Adonijah's faction. It is most remarkable how, first, Saul's cruel slaughter of the priests at Nob, and then the political error of the wise Abiathar, led to the fulfilment of God's denunciation against the house of Eli, as the writer of 1 K. ii. 27 leads us to observe when he says that "Solomon thrust out Abiathar from being priest unto the Lord, that he might fulfil the word of the Lord which He spake concerning the house of Eli in Shiloh." See also Joseph. *Ant.* viii. 1, §§3, 4.

ABIB. [MONTHS.]

ABUDAH and ABUDA (אַבִּידָה; 'Abēidā; *Abida*), a son of Midian (Gen. xxv. 4; 1 Chr. i. 33). [E. S. P.]

ABIDAN (אַבִּידָן; 'Abēdān; *Abidan*), chief of the tribe of Benjamin at the time of the Exodus (Num. i. 11, n. 22, vii. 60, 65, x. 24).

ABIEL (אַבְיֵל; 'Abēlā; *Abiel*). 1. The father of Kish, and consequently grandfather of Saul (1 Sam. ix. 1), as well as of Abner, Saul's commander-in-chief (1 Sam. xiv. 51). In the genealogy in 1 Chr. vii. 33, ix. 39, Ner is made the father of Kish, and the name of Abiel is omitted, but the correct genealogy according to Samuel is:—

Ann L

Kish	Ner
Saul	Abner

2. One of David's 30 "mighty men" (1 Chr. xi. 32); called in 2 Sam. xviii. 31, Ali-Abdon, a name which has the same meaning. [R. W. B.]

ABIEZER (אַבִּיעֶזֶר; 'Abē'ezēr; *Abiezer*), *father of help*; 'Abē'ezēr, יֵעֶזֶר; *familia Ezer, domus Abie* (i).

1. Eldest son of Gilead, and descendant of Machi and Manasseh, and apparently at one time the leading family of the tribe (Josh. xvii. 2; Num. xvi. 30, where the name is given in the contracted form of אֶיעֶזֶר, *Jezzer*). In the genealogies of

Chronicles, Abiezer is, in the present state of the text, said to have sprung from the sister of Gilead (1 Chr. vi. 18). Originally, therefore, the family was with the rest of the house of Gilead on the east of Jordan; but when first met with in the history, some part at least of it had crossed the Jordan and established itself at Ophrah, a place which, though not yet identified, must have been on the hills which overlook from the south the wide plain of Eschraelon, the field of so many of the battles of Palestine (Stanley, 246-7; Judg. vi. 31). Here, when the fortunes of his family were at the lowest—"my 'thousand' is 'the poor one' in Manasseh" (vi. 15)—was born the great Judge Gideon, destined to raise his own house to almost royal dignity (Stanley, 229), and to achieve for his country one of the most signal deliverances recorded in their whole

history. [GIDFON; OPHRAH.] The name occurs, in addition to the passages above quoted, in Judg. vi. 34, viii. 2; and in an adjectival form (אַבְיָהָרִי, "the Abiezrite") in Judg. vi. 11, 24, viii. 32.

2. One of David's "mighty men" (2 Sam. xxiii. 27; 1 Chr. xi. 28, xxvii. 12). [G.]

ABIGAIL (אַבִּיגַיִל, or אַבְיגַיִל; 'Abigāyā; *Abigail*).

1. The beautiful wife of Nabal, a wealthy owner of goats and sheep in Carmel. When David's messengers were slighted by Nabal, Abigail took the blame upon herself, supplied David and his followers with provisions, and succeeded in appeasing his anger. Ten days after this Nabal died, and David sent for Abigail and made her his wife (1 Sam. xxi. 14, seq.). By her he had a son, called Chileab in 2 Sam. iii. 3; but Daniel, in 1 Chr. iii. 1. For Daniel Thénius proposes to read בְּרִיָּה, suggested to him by the LXX. *Δαλιούτα* (Thén. *Euc. Handb.* *ad loc.*).

2. A sister of David, married to Jether the Ishmaelite, and mother, by him, of Anasa (1 Chr. ii. 17). In 2 Sam. xvi. 2, she is described as the daughter of Nabal, sister to Zeruiah, Joab's mother, and as marrying Ishun (another form of Jether) an *Ismaelite*.

The statement in Samuel that the mother of Anasa was an *Ismaelite* is doubtless a transcription error. There could be no reason for recording this circumstance; but the circumstance of David's sister marrying a heathen Ishmaelite deserved mention (Thénus, *Euc. Handb.* *Sam.* i. c.). [R. W. B.]

ABIHAI'IL (אַבִּיהַיִּיל; 'Abigāyālā; *Abihail*).

1. Father of Zaniel, chief of the Levitical family of Merari, a contemporary of Moses (Num. iii. 35).

2. Wife of Abishur (1 Chr. ii. 29).

3. Son of Huri, of the tribe of Gad (1 Chr. v. 14).

4. Wife of Rehobeam. She is called the daughter, i. e. a descendant of Ehab, the elder brother of David. In 2 Chr. xi. 18, her name is written with ה instead of ח, and in the LXX. 'Αββαία. 5. Father of Esther and uncle of Mordecai (Esth. ii. 15, iv. 29).

The names of No. 2 and 4 are written in some MSS. אַבְיַהַיִּיל ('Abigāyālā, 1 Chr. ii. 29; 'Abigāyālā, 2 Chr. xi. 18), which Gesenius conjectures to be a corruption of אֲבִי חַיִּל, but which Simons

derives from a root אָחַל, and interprets "father of light, or splendour." [R. W. B.]

ABIHU (אַבִּיהוּ; 'Abēhū; *Abih*), the second son (Num. iii. 2) of Aaron by Elisheba (Ex. vi. 23),

who with his father and his elder brother, Nadab and 70 elders of Israel accompanied Moses to the summit of Sinai (Ex. xxv. 1). Being together with Nadab guilty of offering strange fire (Lev. x. 1) to the Lord, i. e. not the holy fire which burnt continually upon the altar of burnt-offering (Lev. vi. 9, 12); they were both consumed by fire from heaven, and Aaron and his surviving sons were forbidden to mourn for them. [R. W. B.]

ABIHUD (אַבִּיהוּד; 'Abēhūd; *Abihud*), son of Bela and grandson of Benjamin (1 Chr. viii. 3).

ABIJAH or ABIJAM. 1. אֲבִיָּהָה, אֲבִיָּהָה, *will of Jehorah*; 'Abāhā, 'Abōhā, LXX; 'Abias, Joseph; *Abiann*, *Abir*), the son and successor of Rehobeam on the throne of Judah (1 K.

xiv. 31; 2 Chr. xii. 16). He is called *Abijah* in Chronicles, *Abiyah* in Kings; the latter name being probably an error in the MSS., since the LXX. have nothing corresponding to it, and their form, *Ἀβιάβ*, seems taken from *Abijahu*, which occurs 2 Chr. xiii. 20, 21. Indeed Gesenius says that some MSS. read *Abijah* in 1 K. xiv. 31. The supposition, therefore, of Lightfoot (*Harv. O. T.*, p. 209, Putnam's edition), that the writer in Kings, who takes a much worse view of Abijah's character than we find in Chronicles, altered the last syllable to avoid introducing the holy JAH into the name of a bad man, is unnecessary. But it is not fanciful or absurd, for changes of the kind were not unusual; for example, after the Samaritan schism, the Jews altered the name of Shechem into Sychar (*Drumke*), as we have it in John iv. 5; and Hosea (ix. 15) changes Bethel, *house of God*, into Bethaven, *house of vanity*. (See Stanley, *S. & P.* p. 222.)

From the first book of Kings we learn that Abijah endeavoured to recover the kingdom of the Ten Tribes, and made war on Jeroboam. No details are given, but we are also informed that he walked in all the sins of Jeroboam (idolatry and its attendant immoralties, 1 K. xiv. 23, 24), and that his heart "was not perfect before God, as the heart of David his father." In the second book of Chronicles his war against Jeroboam is more minutely described, and he makes a speech to the men of Israel, reproaching them for breaking their allegiance to the house of David, for worshipping the golden calves, and substituting unauthorized priests for the sons of Aaron and the Levites. He was successful in battle against Jeroboam, and took the cities of Bethel, Jerimoth, and Ephraim, with their dependent villages. It is also said that his army consisted of 100,000 men, and Jeroboam's of 800,000, of whom 500,000 fell in the action; but Kennicott (*The Hebrew Text of the Old Testament considered*, p. 532) shows that our MSS. are frequently incorrect as to numbers, and gives reasons for reducing these to 40,000, 80,000, and 50,000, as we actually find in the Vulgate printed at Venice in 1486 and in the old Latin version of Josephus; while there is perhaps some reason to think that the smaller numbers were in his original Greek text also. Nothing is said by the writer in Chronicles of the sins of Abijah, but we are told that after his victory he "waxed mighty, and married fourteen wives," whence we may well infer that he was elated with prosperity, and like his grandfather Solomon fell during the last two years of his life into wickedness, as described in Kings. Both records inform us that he reigned three years. His mother was called either Maachah or Michaiah, which are mere variations of the same name, and in some places (1 K. xv. 2; 2 Chr. xi. 20) she is said to be the daughter of Absalom or Abshalom (again the same name); in one (2 Chr. xiii. 2) of Uriel of Gilead. But it is so common for the word **בַּת**, *daughter*, to be used in the sense of *granddaughter* or *descendant*, that we need not hesitate to assume that Uriel married Absalom's daughter, and that thus Maachah was daughter of Uriel and granddaughter of Absalom. Abijah therefore was descended from David, both on his father's and mother's side. According to Ewald's chronology the date of Abijah's accession was B.C. 968; Clinton places it in B.C. 959. The 18th year of Jeroboam coincides with the 1st and 2nd of Abijah.

2. The second son of Samuel, called ABIAH in our version (*Ἀβιάδ*, LXX.). [ABIA, ABIAH, No. 3.]

3. The son of Jeroboam I. king of Israel, in whom alone, of all the house of Jeroboam, was found "some good thing toward the Lord God of Israel," and who was therefore the only one of his family who was suffered to go down to the grave in peace. He died in his childhood, just after Jeroboam's wife had been sent in disguise to seek help for him in his sickness from the prophet Ahijah, who gave her the above answer. (1 K. xiv.)

4. A descendant of Eleazar, who gave his name to the eighth of the twenty-four *courses* into which the priests were divided by David (1 Chr. xxv. 10; 2 Chr. viii. 14). To the course of Abijah or Abia belonged Zacharias the father of John the Baptist (Luke i. 5).

5. A contemporary of Nehemiah (Neh. v. 7). [G. E. L. C.]

ABTJAM. [ABIAH, No. 1.]

A'BIŁA. [ABILENE.]

ABILENE (*Ἀβιληνή*, Luke iii. 1), a tetrarchy of which Abila was the capital. This Abila must not be confounded with Abila in Pemma, and other Syrian cities of the same name, but was situated on the eastern slope of Antilibanus, in a district fertilised by the river Euphrates. It is distinctly associated with Lebanon by Josephus (*Ant.* viii. 6, §10, xix. 5, §1, xx. 7, §1; *B. J.* ii. 11, §5). Its name probably arose from the green luxuriance of its situation, "Abel" perhaps denoting "a grassy meadow." [See p. 3, b.] The name, thus derived, is quite sufficient to account for the traditions of the death of Abel, which are associated with the spot, and which are localised by the tomb called *Abel Hadit*, on a height above the ruins of the city. The position of the city is very clearly designated by the itineraries as 18 miles from Damascus, and 38 (or 32) miles from Belpolis or Baulbee (*Hon. Ant. and Tab. Pent.*).

It is impossible to fix the limits of the Abilene, which is mentioned by St. Luke as the tetrarchy of Lysanias. [LYSANIAS.] Like other districts of the East, it doubtless underwent many changes both of masters and of extent, before it was finally absorbed in the province of Syria. Josephus associates this neighbourhood with the name of Ly-anias both before and after the time referred to by the evangelist. For the later notices see the passages just cited. We there find "Abila of Lysanias," and "the tetrarchy of Lysanias," distinctly mentioned in the reigns of Claudius and Caligula. We find also the phrase *Ἀβίλα Λυσανίου* in Ptolemy (v. 15, §22). The natural conclusion appears to be that this was the Lysanias of St. Luke. It is true that a chieftain bearing the same name is mentioned by Josephus in the time of Antony and Cleopatra, as ruling in the same neighbourhood (*Ant.* xiv. 3, §3, xv. 4, §1; *B. J.* i. 13, §1; also Dion Cass. xlv. 32); and from the close connexion of this man's father with Lebanon and Damascus (*Ant.* xiii. 16, §3, xv. 7, §1; *B. J.* i. 9, §2) it is probable that Abilene was part of his territory, and that the Lysanias of St. Luke was the son or grandson of the former. Even if we assume (as many writers too readily assume) that the tetrarch mentioned in the time of Claudius and Caligula is to be identified, not with the Lysanias of St. Luke, but with the earlier Lysanias (never called tetrarch and never positively connected with Abila) in the times of Antony and Cleopatra, there is no difficulty in believing that a prince bearing this name ruled

over a tetrarchy having Abila for its capital, in the 15th year of Tiberius. See Wieseler, *Chronologisch-gesch. Synopse der vier Evangelien*, pp. 171-183.)

The site of the chief city of Abilene has been undoubtedly identified where the Itineraries place it; and its remains have been described of late years by many travellers. It stood in a remarkable gorge called the *Sâk Wady Barabâ*, where the river breaks down through the mountain towards the plain of Damascus. Among the remains the inscriptions are most to our purpose. One containing the words *Αυσαίου Τετράρχου* is cited by Pococke, but has not been seen by any subsequent traveller. Two Latin inscriptions on the face of a rock above a fragment of Roman road (first noticed in the *Quarterly Review* for 1822, No. 52) were first published by Letronne (*Journal des Savans*, 1827), and afterwards by Orelli (*Inscr. Lat.* 4997, 4998). One relates to some repairs of the road at the expense of the *Abilens*; the other associates the 16th Legion with the place. (See Hogg, in the *Trans. of the Royal Geog. Soc.* for 1851; Porter, in the *Journal of Sacred Literature* for July, 1853, and especially his *Damascus*, i. 261-273; and Robinson, *Later Lib. Res.* 478-481.) [J. S. H.]

**ABIMAEI** (אַבִּימַאֵי; Ἀβιμαῖ; *Abimaei*), a descendant of Joktan (Gen. x. 28; 1 Chr. i. 22), and probably the progenitor of an Arab tribe. Bochart (*Phaleg*, ii. 24) conjectures that his name is preserved in that of *Mâli*, a place in Arabia Aromatica, mentioned by Theophrastus (*Hist. Plant.* ix. 4), and thinks that the *Mahlae* are the same as Ptolemy's *Mantae* (vi. 7, §151), and that they were a people of the Minæans (for whom see *ARABIA*). The name in Arabic would probably be written *أبو مائل*. [E. S. P.]

**ABIMELECH** (אַבִּימֶלֶךְ; *father of the king*, or *father-king*; Ἀβιμέλεχ; *Abimelech*), the name of several Philistine kings. It is supposed by many to have been a common title of their kings, like that of Pharaoh among the Egyptians, and that of Caesar and Augustus among the Romans. The name *Father of the king*, or *Father king*, corresponds to *Padaisah* (Father king), the title of the Persian kings, and *Málth* (Father, pater), the title of the Khans of Bucharia (Gesen, *Thes.*). An argument to the same effect is drawn from the title of Ps. xxiv., in which the name of Abimelech is given to the king, who is called Achish in 1 Sam. xvi. 11; but perhaps we ought not to attribute much historical value to the inscription of the Psalm.

1. A Philistine, king of Gerar (Gen. xx. xvi.), who, exercising the right claimed by Eastern princes, of collecting all the beautiful women of their dominions into their harem (Gen. xii. 15; Esth. ii. 3), sent for and took Sarah. A similar account is given of Abraham's conduct on this occasion, to that of his behavior towards Pharaoh [*ABRAHAM*].

2. Another king of Gerar in the time of Isaac, of whom a similar narrative is recorded in relation to Rebekah (Gen. xxvi. 1, seq.).

3. Son of the judge Gideon by his Shechemite concubine (Judg. viii. 31). After his father's death he murdered all his brethren, 70 in number, with the exception of Jotham the youngest, who concealed

himself; and he then persuaded the Shechemites, through the influence of his mother's brethren, to elect him king. It is evident from this narrative that Shechem now became an independent state, and threw off the yoke of the conquering Israelites (Ewald, *Gesch.* ii. 444). When Jotham heard that Abimelech was made king, he addressed to the Shechemites his fable of the trees choosing a king (Judg. ix. 1, seq. cf. Joseph. *Ant.* v. 7, §2), which may be compared with the well-known fable of Menenius Agrippa (Liv. ii. 32). After he had reigned three years, the citizens of Shechem rebelled. He was absent at the time, but he returned and quelled the insurrection. Shortly after he stormed and took Thebez, but was struck on the head by a woman with the fragment of a mill-stone (comp. 2 Sam. xi. 21); and lest he should be said to have died by a woman, he had his armour-bearer slay him. Thus God avenged the murder of his brethren, and fulfilled the curse of Jotham.

4. Son of Abiathar, the high-priest in the time of David (1 Chr. xviii. 16), called Abimelech in 2 Sam. viii. 16 [*ABIMELECH*]. [R. W. B.]

**ABIN'ADAB** (אַבִּינָדָב; Ἀβινάδab; *Abinadab*). 1. A Levite, a native of Kirjathjearim, in whose house the ark remained 20 years (1 Sam. vii. 1, 2; 1 Chr. vii. 7). 2. Second son of Jesse, who followed Saul to his war against the Philistines (1 Sam. xvi. 8, xvii. 13). 3. A son of Saul, who was slain with his brothers at the fatal battle on Mount Gilboa (2 Sam. xxi. 2). 4. Father of one of the 12 chief officers of Solomon (1 K. iv. 7). [R. W. B.]

**ABIN'OAM** (אַבִּינוֹעַם; Ἀβινωῆμ; *Abinonim*), the father of Baak (Judg. iv. 6, 12; v. 1, 12). [R. W. B.]

**ABIRAM** (אַבִּירָם; Ἀβερῶν; *Abiron*).

1. A Benjamite, son of Ehah, who with Dathan and On, men of the same tribe, and Korah a Levite, organized a conspiracy against Moses and Aaron (Num. xvi.). [For details, see *KORAH*]. 2. Eldest son of Hiel, the Bethelite, who died when his father laid the foundations of Jericho (1 K. xvi. 34), and thus accomplished the first part of the curse of Joshua (Josh. vi. 26). [R. W. B.]

**ABISHAG** (אַבִּישָׁג; Ἀβισάγ; *Abisai*), a beautiful Shunammite, taken into David's harem to comfort him in his extreme old age (1 K. i. 1-4). After David's death Adonijah induced Bathsheba, the queen-mother, to ask Solomon to give him Abishag in marriage; but this impudent petition cost Adonijah his life (1 K. ii. 13, seq.). [*ADONIJAH*]. [R. W. B.]

**ABISHAI** (אַבִּישַׁי; Ἀβισαί and Ἀβισαί;

*Abisai*), son of David's sister Zeruiah, and brother of Joab. He was one of David's chief officers. The services which he rendered to David were numerous, and his zeal and devotion conspicuous. He accompanied him on his perilous visit to the camp of Saul (1 Sam. xxvi. 5). He was eager to punish the insolence of Shimei (2 Sam. xvi. 9). He fled with him from Absalom, and commanded a third part of the royal army (2 Sam. xvii. 2). He rescued him from Ishbi-benob, the giant, in the war with the Philistines (2 Sam. xxi. 16, 17). Lastly, according to 1 Chr. xviii. 12, David's slaughter of 18,000 Edomites (or Syrians, 1 Sam. viii. 13) is due to Abishai. [R. W. B.]

## ABISHALOM (אַבִּישָׁלוֹם; Ἀβессαλῶμ;

*Abessalom*), father of Maachah, who was the wife of Rehoboam, and mother of Abijah (1 K. xv. 2, 10). He is called Absalom (אַבְשָׁלוֹם) in 2 Chr. xi. 20, 21.

This person must be David's son (see LXX., 2 Sam. xiv. 27). The daughter of Absalom was doubtless called Maachah after her grandmother (2 Sam. iii. 3).

ABISHUA (אַבִּישׁוּא; Ἀβισού; *Abisue*.

According to Simons, *pater salus*; i. q. *Σωσιπαιρος*, and *Σάπατρος*. According to Finist, *father or lord of happiness*. *Pater salus*, (Gesen.). 1. Son of Bela, of the tribe of Benjamin (1 Chr. vii. 4). 2. Son of Phinehas, the son of Eleazar, and the father of Bakkî, in the genealogy of the high-priests (1 Chr. vi. 4, 5, 50, 51; Ezr. vii. 4, 5). According to Josephus (*Ant.* vii. 1, §3) he executed the office of high-priest after his father Phinehas, and was succeeded by Eli; his descendants, till Zadok, falling into the rank of private persons (*Ἰδωτεύσαντες*). His name is corrupted into *Ἰωσάπτος*. Nothing is known of him. [A. C. H.]

ABISHUR (אַבִּישׁוּר; Ἀβισούρ; *Abisur*,

son of Shammai (1 Chr. ii. 28).

ABITAL (אַבִּיטָל; Ἀβιτάλ; *Abital*), one of

David's wives (2 Sam. iii. 4; 1 Chr. iii. 3).

ABITUB (אַבִּיטוּב; Ἀβιτούλ; *Abitub*), son of

Shadrach by Hushai (1 Chr. vii. 11).

## ABLUTION. [PURIFICATION.]

ABNER (אַבְנֵר; Ἀβνέρ, *father of light*;

*Abenrûp*; *Abner*), son of Neri, who was the brother of Nish (1 Chr. ix. 36), the father of Saul. Abner, therefore, was Saul's first cousin, and was made by him commander-in-chief of his army (1 Sam. xiv. 51). He was the person who conducted David into Saul's presence after the death of Goliath (xv. 57); and afterwards accompanied his master when he sought David's life at Hachilah (xxvi. 3-14). From this time we hear no more of him till after the death of Saul, when he rises into importance as the mainstay of his family. It would seem that, immediately after the disastrous battle of Mount Gilboa, David was proclaimed king of Judah in Hebron, the old capital of that tribe, but that the rest of the country was altogether in the hands of the Philistines, and that five years passed before any native prince ventured to oppose his claims to their power. During that time the Israelites were gradually recovering their territory, and at length Abner proclaimed the weak and unfortunate Ishbosheth, Saul's son, as king of Israel in Mahanaim, beyond Jordan—at first no doubt as a place of security against the Philistines, though all serious apprehension of danger from them must have soon passed away—and Ishbosheth was generally recognized except by Judah. This view of the order of events is necessary to reconcile 2 Sam. ii. 10, where Ishbosheth is said to have reigned over Israel for two years, with ver. 11, in which we read that David was king of Judah for seven; and it is confirmed by vers. 5, 6, 7, in which David's message of thanks to the men of Jabesh-gilead for burying Saul and his sons implies that no prince of Saul's house had as yet claimed the throne, but that David hoped that the title would be soon acknowledged by all Israel; while the exhortation "to be valiant" pro-

bly refers to the struggle with the Philistines, who placed the only apparent impediment in the way of his recognition. War soon broke out between the two rival kings, and a "very sore battle" was fought at Gibeon between the men of Israel under Abner, and the men of Judah under Joab, son of Zeruiah, David's sister (1 Chr. ii. 16). When the army of Ishbosheth was defeated, Joab's youngest brother Asahel, who is said to have been "as light of foot as a wild roe," pursued Abner, and in spite of warning refused to leave him, so that Abner in self defence was forced to kill him. After this the war continued, success inclining more and more to the side of David, till at last the impudence of Ishbosheth deprived him of the counsels and generalship of the hero, who was in truth the only support of his tottering throne. Abner had married Rizpah, Saul's concubine, and this, according to the views of Oriental courts, might be so interpreted as to imply a design upon the throne. Thus we read of a certain Armais, who, while left vicar of Egypt in the absence of the king his brother, "used violence to the queen and concubines, and put on the diadem, and set up to oppose his brother" (Manetho, quoted by Joseph. c. *Agypt.* i. 15). Cf. also 2 Sam. xvi. 21, xv. 3, 1 K. ii. 13-25, and the case of the Pseudo-Smerdis, Herod. iii. 68. [ABISALOM; ADONJAH.] lightly or wrongly, Ishbosheth so understood it, though Abner might seem to have given sufficient proof of his loyalty, and he even ventured to reproach him with it. Abner, incensed at his ingratitude, after an indignant reply, opened negotiations with David, by whom he was most favourably received at Hebron. He then undertook to procure his recognition throughout Israel; but after leaving his court for the purpose was enticed back by Joab, and treacherously murdered by him and his brother Abishai, at the gate of the city, partly no doubt, as Joab showed afterwards in the case of AMASA, from fear lest so distinguished a convert to their cause should gain too high a place in David's favour (Joseph. *Ant.* vii. 1, §5), but ostensibly in retaliation for the death of Asahel. For this there was indeed some pretext, inasmuch as it was thought dishonourable even in battle to kill a more striking like Asahel, and Joab and Abishai were in this case the *revengers of blood* (Num. xxxv. 19), but it is also plain that Abner only killed the youth to save his own life. This murder caused the greatest sorrow and indignation to David; but as the assassins were too powerful to be punished, he contented himself with showing every public token of respect to Abner's memory, by following the bier and pointing forth a simple dirge over the slain, which is thus translated by Ewald (*Dichter des alten Bundes*, i. p. 99):—

As a villain dies, ought Abner to die?  
Thy hands, not fettered;  
Thy feet, not bound with chains;  
As one falls before the malicious, fellest thou!

—i. e. "Thou didst not fall as a prisoner taken in battle, with hands and feet fettered, but by secret assassination, such as a villain meets at the hand of villains" (2 Sam. iii. 33, 34). See also Lowth, *Lectures on Hebrew Poetry*, xxi. [G. E. L. C.]

## ABOMINATION OF DESOLATION (τὸ

ἄβδλυμα τῆς ἐρημώσεως, Matt. xxiv. 15), mentioned by our Saviour as a sign of the approaching destruction of Jerusalem, with reference to Dan. ix. 27, xi. 31, xii. 11. The Hebrew words in these passages are respectively, מְשָׁכִים מְשָׁכִים, מְשָׁכִים מְשָׁכִים.

**הרשע**, and **הרשע יארשע**: the LXX. translate the first word uniformly *βδελυγμα*, and the second *ἐρημώσεως* (iv. 27) and *ἐρημώσεως* (xi. 31, xii. 11); many MSS. however have *ἡφανισμένον* in xi. 31. The meaning of the first of these words is clear: **יארשע** expresses any religious impurity, and in the plural number especially *idols*. *Smilas* defines *βδελυγμα* as used by the Jews *πάν εἰδωλον καὶ πάν ἐκτύπωμα ἀνθρώπου*. It is important to observe that the expression is not used of idolatry in the abstract, but of idolatry adopted by the Jews themselves (2 K. xxi. 2-7, xxiii. 13). Hence we must look for the fulfilment of the prophecy in some act of apostasy on *their* part; and so the Jews themselves appear to have understood it, according to the traditional feeling referred to by Josephus (*B. J.* iv. 6, §1), that the temple would be destroyed *ἐὰν χεῖρες οἰκείαι προμύνησιν τὸ τέμενος*. With regard to the second word **הרשע**, which has been variously translated of *desolation*, of the *desolator*, that *astonisheth* (Marginal transl. xi. 31, iii. 11), it is a participle used substantively and placed in immediate apposition with the previous noun, qualifying it with an adjective sense *astounding*, *horrible* (Giesen. s. v. **הרשע**), and thus the whole expression signifies a *horrible abomination*. What the object referred to was, is a matter of doubt; it should be observed, however, that in the passages in Daniel the setting up of the abomination was to be consequent upon the cessation of the sacrifice. The Jews considered the prophecy as fulfilled in the profanation of the Temple under Antiochus Epiphanes, when the Israelites themselves erected an idolatrous altar (*βωμός*, Joseph. *Ant.* xii. 5, §4) upon the sacred altar, and offered sacrifice thereon: this altar is described as *βδελυγμα τῆς ἐρημώσεως* (1 Macc. i. 54, vi. 7). The prophecy however referred ultimately (as Josephus himself perceived, *Ant.* x. 11, §7) to the destruction of Jerusalem by the Romans, and consequently the *βδελυγμα* must describe some occurrence connected with that event. But it is not easy to find one which meets all the requirements of the case: the introduction of the Roman standards into the Temple would not be a *βδελυγμα*, properly speaking, unless it could be shown that the Jews themselves participated in the worship of them; moreover, this event, as well as several others which have been proposed, such as the erection of the statue of Hadrian, fail in regard to the time of their occurrence, being *subsequent* to the destruction of the city. It appears most probable that the profanities of the Zealots constituted the abomination, which was the sign of impending ruin. (Joseph. *B. J.* iv. 3, §7.) [W. L. B.]

**A'BRAM** (**אַבְרָם**, *father of a multitude*;

**אַבְרָהָם**; *Abraham*: originally **ABRAM**, **אַבְרָם**, *father of elevation*; "**אַבְרָם**; *Abram*), the son of Terah, and brother of Nahor and Haran; and the progenitor, not only of the Hebrew nation, but of several cognate tribes. His history is recorded to us with much detail in Scripture, as the very type of a true patriarchal life; a life, that is, in which all authority is *paternal*, derived ultimately from God the Father of all, and religion, imperfect as yet in revelation and ritual, is based entirely on that same Fatherly relation of God to man. The natural tendency of such a religion is to the worship of

tutelary gods of the family or of the tribe; traces of such a tendency on the part of the patriarchs are found in the Scriptural History itself; and the declaration of God to Moses (in Ex. vi. 3) plainly teaches that the full sense of the unity and eternity of Jehovah was not yet unfolded to them. But yet the revelation of the Lord, as the "Almighty God" (Gen. xvin. 1, xxviii. 3, xxxv. 11), and "the Judge of all the earth" (Gen. xxi. 25), the knowledge of His intercourse with kings of other tribes (Gen. xx. 3-7), and His judgment on Sodom and Gomorrah (to say nothing of the promise which extended to "all nations") must have raised the patriarchal religion far above this narrow idea of God, and given it the germs, at least, of future exaltation. The character of Abraham is that which is formed by such a religion, and by the influence of a normal pastoral life; free, simple, and manly; full of hospitality and family affection; truthful to all such as were bound to him by their ties, though not intimated with Eastern craft to those considered as aliens; ready for war, but not a professed warrior or one who lived by plunder; free and childlike in religion, and gradually educated by God's hand to a continually deepening sense of its all-absorbing claims. It stands remarkably contrasted with those of Isaac and Jacob.

The Scriptural history of Abraham is mainly limited, as usual, to the evolution of the Great Covenant in his life; it is the history of the man himself rather than of the external events of his life; and, except in one or two instances (Gen. xii. 10-20, xiv. 1, xxi. 22-31) it does not refer to his relation with the rest of the world. To them he may only have appeared as a chief of the harder Chaldean race, disdaining the settled life of the more luxurious Canaanites, and fit to be led by plunder as a protector against the marauders of the North (see Gen. xiv. 21-23). Nor is it unlikely, though we have no historical evidence of it, that his passage into Canaan may have been a sign or a cause of a greater migration from Haran, and that he may have been looked upon (e. g. by Abimelech, Gen. xvi. 22-32) as one, who from his position as well as his high character, would be able to guide such a migration for evil or for good (Ewald, *Gesch.* i. pp. 409-415).

The traditions, which Josephus adds to the Scriptural narrative, are merely such as, after his manner and in accordance with the aim of his writings, exalt the knowledge and wisdom of Abraham, making him the teacher of monotheism to the Chaldeans, and of astronomy and mathematics to the Egyptians. He quotes however Nicolaus of Damascus,\* as ascribing to him the conquest and government of Damascus on his way to Canaan, and stating that the tradition of his habitation was still preserved there (Joseph. *Ant.* i. c. 7, §2; see Gen. xv. 2).

The Arab traditions are partly ante-Mohammedan, relating mainly to the Kaaba (or sacred house) of Mecca, which Abraham and his son "Ismael" are said to have rebuilt for the fourth time over the sacred black stone. But, in great measure, they are taken from the Koran, which has itself borrowed from the O. T. and from the Rabbinical traditions. Of the latter the most remarkable is the

Nicolaus was a contemporary and favourite of Herod the Great and Augustus. The quotation is probably from an Universal History, said to have contained 114 books.

story of his having destroyed the idols (see Jud. v. 6-8), which Terah not only worshipped (as declared in Josh. xxiv. 2), but also manufactured, and having been cast by Nimrod into a fiery furnace, which turned into a pleasant meadow. The legend is generally traced to the word *Ur* (𐎢𐎺𐎠), Abraham's birth-place, which has also the sense of "light" or "fire."<sup>b</sup> But the name of Abraham appears to be commonly remembered in tradition through a very large portion of Asia, and the title "el-Khalil," "the Friend" (of God) (see 2 Chr. xx. 7; Is. xli. 8; Jam. ii. 23) is that by which he is usually spoken of by the Arabs.

The Scriptural history of Abraham is divided into various periods, by the various and progressive revelations of God, which he received—

(I.) With his father Terah, his wife Sarai, and nephew Lot, Abram left Ur, for Haran (Charran), in obedience to a call of God (alluded to in Acts vii. 2-4). Haran, apparently the eldest brother—since Nahor, and probably also Abram, married his daughter—was dead already; and Nahor remained behind (Gen. xi. 31). In Haran Terah died; and Abram, now the head of the family, received a second call, and with it the promise. His promise was two-fold, containing both a temporal and spiritual blessing, the one of which was the type and earnest of the other. The temporal promise was, that he should become a great and prosperous nation, the spiritual, that in him "should all families of the earth be blessed" (Gen. xii. 2).

Abram appears to have entered Canaan, as Jacob afterwards did, along the valley of the Jabbok; for he crossed at once into the rich plain of Moreh, near Shechem, and under Ebal and Gerizim. There, in one of the most fertile spots of the land, he received the first distinct promise of his future inheritance (Gen. xii. 7), and built his first altar to God. "The Canaanite" (it is noticed) "was then in the land," and probably would view the strangers of the warlike north with no friendly eyes. Accordingly Abram made his second resting-place in the strong mountain country, the key of the various passes, between Bethel and Ai. There he would dwell securely, till famine drove him into the richer and more cultivated land of Egypt.

That his history is no ideal or heroic legend, is very clearly shown, not merely by the record of his deceit as to Sarai, practised in Egypt and repeated afterwards, but much more by the clear description of its utter failure, and the humiliating position in which it placed him in comparison with Pharaoh, and still more with Abimelech. That he should have felt afraid of such a civilized and imposing power, as Egypt even at that time evidently was, is consistent enough with the Arab nature as it is now: that he should have sought to guard himself by deceit, especially of that kind, which is true in word and false in effect, is unfortunately not at all incompatible with a generally religious character;

but that such a story should have been framed in an ideal description of a saint or hero is inconceivable.

The period of his stay in Egypt is not recorded, but it is from this time that his wealth and power appear to have begun (Gen. xiii. 2). If the dominion of the Hyksos in Memphis is to be referred to this epoch, as seems not improbable [Evers], then, since they were akin to the Hebrews, it is not impossible that Abram may have taken part in their war of conquest, and so have had another recommendation to the favour of Pharaoh.

On his return, the very fact of this growing wealth and importance caused the separation of Lot and his portion of the tribe from Abram. Lot's departure to the rich country of Sodom implied a wish to quit the nomadic life, and settle at once; Abram, on the contrary, was content still to "dwell in tents" and wait for the promised time (Heb. xi. 9). Probably till now he had looked on Lot as his heir, and his separation from him was a Providential preparation for the future. From this time he took up his third resting-place at Mamre, or Hebron, the future capital of Judah, situated in the direct line of communication with Egypt, and opening down to the wilderness and pasture land of Beersheba. This very position, so different from the mountain-fastness of Ai, marks the change in the numbers and powers of his tribe.

The history of his attack on Chedorlaomer which follows, gives us a specimen of the view which would be taken of him by the external world. By the way in which it speaks of him as "Abram the Hebrew,"<sup>c</sup> it would seem to be an older document, a fragment of Canaanitish history (as Ewald calls it), preserved and sanctioned by Moses. The invasion was clearly another northern immigration or foray, for the chiefs or kings were of Shinar (Babylonia), Elam (Assyria?), Elam (Persia), &c.; that it was not the first, is evident from the vassalage of the kings of the cities of the plain; and it extended (see Gen. xiv. 5-7) far to the south over a wide tract of country. Abram appears here as the head of a small confederacy of chiefs, powerful enough to venture on a long pursuit to the head of the valley of the Jordan, to attack with success a huge force, and not only to rescue Lot, but to roll back for a time the stream of northern immigration. His high position is seen in the gratitude of the people, and the dignity with which he refuses the character of a hireling; that it did not elate him above measure, is evident from his reverence to Melchizedek, in whom he recognized one whose call was equal and consecrated rank superior to his own [MELCHIZEDEK].

(II.) The second period of Abram's life is marked by the fresh revelation, which, without further unfolding the spiritual promise, completes the temporal one, already in course of fulfilment. It first announced to him, that a child of his own should inherit the promise, and that his seed should be as the

<sup>b</sup> "Israh" (in Gen. xi. 29) is generally supposed to be the same person as Sarai. That Abram calls her his "sister" is not conclusive against it; for see xiv. 11, where Lot is called his "brother."

<sup>c</sup> It is expressly stated in the Acts (vii. 4) that Abram quitted Haran after his father's death. This is supposed to be inconsistent with the statements that Terah was 70 years old at the birth of Abram (Gen. xi. 26); that he died at the age of 205 (Gen. xi. 32); and that Abram was 75 years old when he left Haran: hence it would seem to follow that Abram migrated from Haran in his father's lifetime. Various expla-

nations have been given of this difficulty; the most probable is, that the statement in Gen. xi. 26, that Terah was 70 years old when he begot his three children, applies only to the oldest, Haran, and that the births of his two younger children belonged to a subsequent period [CUNEOLOGICAL].

<sup>d</sup> Ὁ ἡραρὴς, LXX. If this sense of the word be taken, it strengthens the supposition noticed. In any case the name is that applied to the Isaacites by foreigners, or used by them of themselves only in speaking to foreigners. see HIRAN w.

"stars of heaven." This promise, unlike the other, appeared at his age contrary to nature, and therefore it is on this occasion that his faith is specially noted, as accepted and "counted for righteousness." Accordingly, he now passed into a new position, for not only is a fuller revelation given as to the captivity of his seed in Egypt, the time of their deliverance, and their conquest of the land, "when the iniquity of the Amorites was full," but after his solemn burnt-offering the visible appearance of God in fire is vouchsafed to him as a sign, and he enters into covenant with the Lord (Gen. xv. 18). This covenant, like the earlier one with Noah (Gen. ix. 9-17) is one of free promise from God, faith only in that promise being required from man.

The immediate consequence was the taking of Hagar, Sarai's maid, to be a concubine of Abram (as a means for the fulfilment of the promise of seed), and the conception of Ishmael.

(III.) For fourteen years after, no more is recorded of Abram, who seems during all that period to have dwelt at Mamre. After that time, in Abram's 99th year, the last step in the revelation of the promise is made, by the declaration that it should be given to a son of Sarai; and at the same time the temporal and spiritual elements are distinguished; Ishmael can share only the one, Isaac is to enjoy the other. The covenant, which before was only for temporal inheritance (Gen. xv. 18), is now made "everlasting," and sealed by circumcision. This new state is marked by the change of Abram's name to "Abraham," and Sarai's to "Sarah," and it was one of far greater acquaintance and intercourse with God. For, immediately after, we read of the Lord's appearance to Abraham in human form, attended by two angels, the ministers of His wrath against Sodom, of His announcement of the coming judgment to Abraham, and acceptance of his intercession for the condemned cities.<sup>1</sup> The whole record stands alone in Scripture for the simple and familiar intercourse of God with him, contrasting strongly with the vaguer and more awful descriptions of previous appearances (see e. g. xv. 12), and of those of later times (Gen. xxviii. 17, xxiii. 30; Ex. iii. 6, &c.). And, corresponding with this, there is a perfect absence of all fear on Abraham's part, and a cordial and reverent joy, which, more than anything else, reveals the time past when "the voice of the Lord God was heard, walking in the garden in the cool of the day."

Strangely unworthy of this exalted position as the "Friend" and intercessor with God, is the reputation of the falsehood as to Sarah in the land of

the Philistines (Gen. xx.). It was the first time he had come in contact with that tribe or collection of tribes, which stretched along the coast almost to the borders of Egypt; a race apparently of lords ruling over a conquered population, and another example of that series of immigrations which appear to have taken place at this time. It seems, from Abraham's excuse for his deceit on this occasion, as if there had been the idea in his mind, that all arms may be used against unbelievers, who, it is assumed, have no "fear of God," or sense of right. If so, the rebuke of Abimelech, by its dignity and its clear recognition of a God of justice, must have put him to manifest shame, and taught him that others also were servants of the Lord.

This period again, like that of the sojourn in Egypt, was one of growth in power and wealth, as the respect of Abimelech and his alarm for the future, so natural in the chief of a race of conquering invaders, very clearly shows. Abram's settlement at Hevseba, on the borders of the desert, near the Amalekite plunderers, shows both that he needed room, and was able to protect himself and his flocks.

The birth of Isaac crowns his happiness, and fulfils the first great promise of God: and the expulsion of Ishmael, painful as it was to him, and vindictive as it seems to have been on Sarah's part, was yet a step in the education which was to teach him to give up all for the one great object. The symbolical meaning of the act (drawn out in Gal. iv. 21-31) could not have been wholly unfelt by the patriarch himself, so far as it involved the sense of the spiritual nature of the promise, and carried out the fore-ordained will of God.

(IV.) Again for a long period (25 years, Joseph. *Ant.* i. 13, §2) the history is silent: then comes the final trial and perfection of his faith in the command to offer up the child of his affections and of God's promise. The trial lay, first in the preciousness of the sacrifice, and the perplexity in which the command involved the fulfilment of the promise; secondly, in the strangeness of the command to violate the human life, of which the sacredness had been enforced by God's special command (Gen. ix. 5, 6), as well as by the feelings of a father. To these trials he rose superior by faith, that "God was able to raise Isaac even from the dead" (Heb. xi. 19), probably through the same faith, to which our Lord refers, that God had promised to be the "God of Isaac" (Gen. xvii. 19), and that He was not "a God of the dead, but of the living."<sup>2</sup>

It is remarkable, that, in the blessing given to him now, the original spiritual promise is repeated for the first time since his earliest call, and in the

<sup>1</sup> The original name שָׂרָה is uncertain in derivation and meaning. Gesenius renders it "nobility," from the same root as "Sarah"; Ewald by "quarrelsome" (from the root שָׂרָה, in sense of "to fight"). The name Sarah, שָׂרָה, is certainly "princess."

<sup>2</sup> Tradition still points out the supposed site of this appearance of the Lord to Abraham. About a mile from Hebron is a beautiful and massive oak, which still bears Abraham's name. The residence of the patriarch was called "the oaks of Mamre," erroneously translated in A. V. "the plain" of Mamre (Gen. xiii. 18, xviii. 1); but it is doubtful whether this is the exact spot, since the tradition in the time of Josephus (*B. J.* iv. 9, §7) was attached to a terebinth. This tree no longer remains, but there is no doubt that it stood within the ancient enclosure, which is

still called "Abraham's House." A fair was held beneath it in the time of Constantine; and it remained to the time of Theodosius. (Robinson, ii. 81, ed. 1856; Stanley, *S.* & *P.* 143.)

<sup>3</sup> The scene of the sacrifice is, according to our present text, and to Josephus, the land of "Moriah," or מֹרְיָה, chosen by Jechorah, Ges. (comp. the name "Jehovah-Jireh"). The Samaritan Pentateuch has "Moreh," מֹרְהָ; the LXX. render the word here by ἡν ἐψηλῶν, the phrase used for what is undoubtedly "Moreh" in xii. 6, whereas in 2 Chr. iii. they render "Moriah" by Ἱερουσόλα; they therefore probably read "Moreh" also. The fact of the three days' journey from Beersheba suits Moriah better (see Stanley's *S.* & *P.* p. 251), other considerations seem in favour of Moriah.

same words then used. But the promise that "in his seed all nations should be blessed" would be now understood very differently, and felt to be far above the temporal promise, in which, perhaps, at first it seemed to be absorbed. It can hardly be wrong to refer pre-eminently to this epoch the declaration, that Abraham "saw the day of Christ and was glad" (John viii. 56).

The history of Abraham is now all but over, though his life was prolonged for nearly 50 years. The only other incidents are the death and burial of Sarah, the marriage of Isaac with Rebekah, and that of Abraham with Keturah.

The death of Sarah took place at Kirjath Arba, i.e., Hebron, so that Abraham must have returned from Beersheba to his old and more peaceful home. In the history of her burial, the most notable points are the respect paid to the power and character of Abraham, as a mighty prince, and the exceeding modesty and courtesy of his demeanour. It is sufficiently striking that the only inheritance of his family in the land of promise should be a tomb. The sepulchral cave of Machpelah is now said to be concealed under the Mosque of Hebron (see Stanley, *S. & P.* p. 101).

... of Isaac, so far as Abraham is concerned, marks his utter refusal to ally his son with the polluted and condemned blood of the Canaanites.

The marriage with Keturah is the strangest and most unexpected event recorded in his life, Abraham having long ago been spoken of as an old man; but his youth having been restored before the birth of Isaac must have remained to him, and Isaac's marriage having taken his son comparatively away, may have induced him to seek a wife to be the support of his old age. Keturah held a lower rank than Sarah, and her children were sent away, lest they should dispute the inheritance of Isaac, Abraham having learnt to do voluntarily in their case what had been forced upon him in the case of Ishmael.

Abraham died at the age of 175 years, and his ... Isaac, and the outcast Ishmael, united to lay him in the cave of Machpelah by the side of Sarah.

His descendants were (1) the Israelites; (2) a branch of the Arab tribes through Ishmael; (3) the "children of the East," of whom the Midianites were the chief; (4) perhaps (as cognate tribes), the nations of Ammon and Moab (see these names); and through their various branches his name is known all over Asia. [A. B.]

#### A'BRAM. [ABRAHAM.]

ABRO'NAIL (עברנה, from עבר, to cross over), one of the halting-places of the Israelites in the desert, immediately preceding Ezion-geber, and therefore, looking to the root, the name may possibly retain the trace of a ford across the head of the Elanitic Gulf. In the A. V. it is given as Ebronah (Εβρωνά; Hebronah) (Num. xxviii. 34, 35). [EBRONAH.] [G.]

ABRO'NAS (Αβρωνάς), a torrent (χελμαῖος), apparently near Cilicia: if so, it may possibly be the *Nahr Abram*, or *Abrahim*, the ancient Adonis, which rises in the Lebanon at *Afska*, and falls into the sea at *Jebel* (Byblos). It has however been conjectured (Movers, *Bonner Zeits.* xiii. 38) that the word is a corruption of עבר הַיַּרְדֵּן = beyond the river (Euphrates), which has just before been mentioned; a corruption not more inconceivable

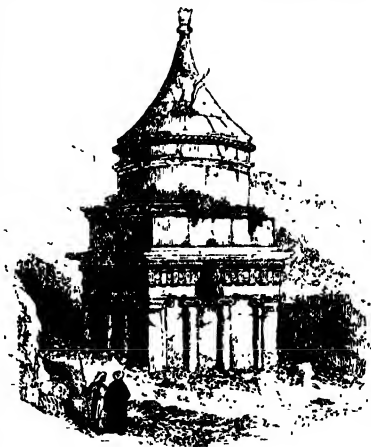

than many which actually exist in the LXX. The A. V. has ARRONAI (Jud. ii. 24). [G.]

#### ABSALOM (אַבְשָׁלוֹם, father of peace; Αβσα-

σαλῶμ; *Abshalom*), third son of David by Maachah, daughter of Talmi king of Geshur, a Syrian district adjoining the N.E. frontier of the Holy Land near the Lake of Merom. He is scarcely mentioned till after David had committed the great crime which by its consequences embittered his old age, and then appears as the instrument by whom was fulfilled God's threat against the sinful king, that "evil should be raised up against him out of his own house, and that his neighbour should lie with his wives in the sight of the sun." In the latter part of David's reign, polygamy bore its ordinary fruits. Not only is his sin in the case of Bathsheba traceable to it, since it naturally suggests the unlimited indulgence of the passions, but it also brought about the punishment of that sin, by raising up jealousies and conflicting claims between the sons of different mothers, each apparently living with a separate house and establishment (2 Sam. xii. 8, xiv. 24; cf. 1 K. vii. 8, &c.). Absalom had a sister Tamar, who was violated by her half-brother Amnon, David's eldest son by Ahinoam, the Jezreelitess. The king, though indignant at so great a crime, would not punish Amnon because he was his first-born, as we learn from the words καὶ οὐκ ἐλύτῃς τὸ πνεῦμα Ἀμνὸν τοῦ υἱοῦ αὐτοῦ, ὅτι ἡγάπα αὐτόν, ὅτι πρωτοτόκος αὐτοῦ ἦν, which are found in the LXX. (1 Sam. xvi. 21), though wanting in the Hebrew. The natural avenger of such an outrage would be Tamar's full brother Absalom, just as the sons of Jacob took bloody vengeance for their sister Dinah (Gen. xxxiv.). He brooded over the wrong for two years, and then invited all the princes to a sheep-shearing feast at his estate in Baal-hazor, possibly an old Canaanitish sanctuary (as we infer from the prefix Baal), on the borders of Ephraim and Benjamin. Here he ordered his servants to murder Amnon, and then fled for safety to his father-in-law's court at Geshur, where he remained for three years. David was overwhelmed by this accumulation of family sorrows, thus completed by separation from his favourite son, whom he thought it impossible to pardon or recall. But he was brought back by an intiter of Joab, who sent a woman of Tekoah (afterwards known as the birthplace of the prophet Amos) to entreat the king's interference in a supposititious case similar to Absalom's. Having persuaded David to prevent the avenger of blood from pursuing a young man who, she said, had slain his brother, she adroitly applied his assent to the recall of Absalom, and urged him, as he had thus yielded the general principle, to "fetch home his banished." David did so, but would not see Absalom for two more years, though he allowed him to live in Jerusalem. At last wearied with delay, perceiving that his triumph was only half complete, and that his exclusion from court interfered with the ambitious schemes which he was forming, fancying too that sufficient exactions were not made in his favour, the impetuous young man sent his servants to burn a field of corn near his own, belonging to Joab, thus doing as Samson had done (Judg. xv. 4). Thereupon Joab, probably dreading some further outrage from his violence, brought him to his father, from whom he received the kiss of reconciliation. Absalom now began at once to prepare for rebellion, urged to it partly by his own restless wickedness, partly by per-

lays by the fear lest Bathsheba's child should supplant him in the succession, to which he would feel himself entitled as of royal birth on his mother's side as well as his father's, and as being now David's eldest surviving son, since we may infer that the second son Chieleah was dead, from no mention being made of him after 2 Sam. iii. 3. It is harder to account for his temporary success, and the imminent danger which held so powerful a government as his father's. The son with Bathsheba had probably weakened David's moral and religious hold upon the people; and as he grew older he may have become less attentive to individual complaints, and that personal administration of justice which was one of an eastern king's chief duties. For Absalom tried to supplant his father by courting popularity, standing in the gate, conversing with every sinner, lamenting the difficulty which he would find in getting a hearing, "putting forth his hand and kissing any man who came nigh to do him obeisance." He also maintained a splendid retinue (xv. 1), and was admired for his personal beauty and the luxuriant growth of his hair, on grounds similar to those which had made Saul acceptable (1 Sam. x. 23). It is probable too that the great tribe of Judah had taken some offence at David's government, perhaps from finding themselves completely merged in one united Israel; and that they hoped secretly for pre-eminence under the less wise and liberal rule of his son. Thus Absalom selects Hebron, the old capital of Judah (now supplanted by Jerusalem), as the scene of the outbreak; Amasai his chief captain, and Ahitophel of Gilead his principal counsellor, are both of Judah, and after the rebellion was crushed, we see signs of ill-feeling between Judah and the other tribes (xiv. 41). But whatever the causes may have been, Absalom raised the standard of revolt at Hebron after forty years, as we now read in 2 Sam. xv. 7, which it seems better to consider a false reading for *four* (the number actually given by Josephus), than to interpret of the fortieth year of David's reign (see Gerlach, *in loco*, and Ewald, *Geschichte*, iii. p. 217). The revolt was at first completely successful; David fled from his capital over the Jordan to Mahanaim in Gilead, where Jacob had seen the "Two Hosts," of the angelic vision, and where Abner had rallied the Israelites round Saul's dynasty in the person of the unfortunate Ishbosheth. Absalom occupied Jerusalem, and by the advice of Ahitophel, who saw that for such an unnatural rebellion war to the knife was the best security, took possession of David's harem, in which he had left ten concubines. This was considered to imply a formal assumption of all his father's royal rights (cf. the conduct of Adonijah, 1 K. ii. 13 ff., and of Smerdis the Magian, Herod. iii. 68), and was also a fulfilment of Nathan's prophecy (2 Sam. xii. 11). But David had left friends who watched over his interests. The vicious counsels of Ahitophel were afterwards rejected through the crafty advice of Hushai, who persuaded himself into Absalom's confidence to work his ruin, and Ahitophel himself, seeing his ambitious hopes frustrated, and another preferred by the man for whose sake he had turned traitor, went home to Gilead and committed suicide. At last, after being solemnly anointed king at Jerusalem (xix. 10), and lingering there far longer than was expedient, Absalom crossed the Jordan to attack his father, who by this time had rallied round him a considerable force, whereas had Ahitophel's advice been followed, he would probably have been crushed

at once. A decisive battle was fought in Gilead, in the wood of Ephraim, so called, according to Gerlach (*Comm. in loco*), from the great defeat of the Ephraimites (Judg. xii. 4), or perhaps from the connexion of Ephraim with the trans-Jordanic half-tribe of Manasseh (Stanley, *S. and P.*, p. 323). Here Absalom's forces were totally defeated, and as he himself was escaping, his long hair was entangled in the branches of a terebinth, where he was left hanging while the mule on which he was riding ran away from under him. Here he was despatched by Joab in spite of the prohibition of David, who, loving him to the last, had desired that his life might be spared, and when he heard of his death lamented over him in the pathetic words, *O my son Absalom! would God I had died for thee! O Absalom, my son, my son!* He was buried in a great pit in the forest, and the conquerors threw stones over his grave, an old proof of bitter hostility (Josh. vii. 26). The sacred historian contrasts this dishonoured burial with the tomb which Absalom had raised in the *Kno's dale* (comp. Gen. xiv. 17) for the three sons whom he had lost (comp. 2 Sam. xiv. 18, with xiv. 27), and where he probably had intended that his own remains should be laid. Josephus (*Ant.* vii. 10, § 3) mentions the pillar of Absalom as situate 2 stadia from Jerusalem. An existing monument in the valley of Jehoshaphat just outside Jerusalem bears the name of the Tomb of Absalom; but the Ionic pillars which surround its base show that it belongs to a much later period, even if it be a tomb at all. [G. E. L. C.]

The so-called Tomb of Absalom

ABSALOM (Ἀβσαλώμος; *Absohm, Absolum*), the father of Mattathias (1 Mac. xi. 70) and Jonathan (1 Mac. xiii. 11). [B. F. W.]

AC'CAD (אֲכַד; *Archad; Achad*), one of the cities in the land of Shinar—the others being Babel, Erech, and Calneh—which were the beginning of Nimrod's kingdom (Gen. x. 10). A great many conjectures have been formed as to its identification:—1. Following the reading of the oldest version (the LXX.), the river Argades, mentioned by Aelian as in the Persian part of Sittacene beyond the Tigris, has been put forward (Rochut,

*Plat.* iv. 17). But this is too far east. 2. Saecda, a town stated by Ptolemy to have stood at the junction of the Lycus (Great Zab) with the Tigris, below Nimech (Lecele, in Winer). 3. A district "north of Babylon" called 'Ακκήτη (Kubel, *Genesis*, 108). 4. And perhaps in the absence of any remains of the name this has the greatest show of evidence in its favour, Nisibis, a city on the *Khabor* river, still retaining its name (*Nisibis*), and situated at the N.E. part of Mesopotamia, about 150 miles east of *Orfi*, and midway between it and Nimech. We have the testimony of Jerome (*Onomasticon*, *Archeol.*), that it was the belief of the Jews of his day (*Hebraei dicunt*) that Nisibis was Accad; a belief continued by the renderers of the Targums of Jerusalem and Pseudo-jonathan (נִי־בִי־בִי), and of Ephraem Syrus; and also by the fact that the ancient name of Nisibis was Accr (Rossmüller, ii. 29), which is the word given in the early Peshito version (ܐܥܪ), and also occurring in three MSS. of the *Onomasticon* of Jerome. (See the note to "Achad" in the edition of Jerome, Ven. 1767, vol. iii. 127.)

The theory deduced by Rawlinson from the latest Assyrian researches, is, that "Akkad" was the name of the "great primitive Hamite race who inhabited Babylonia from the earliest time," who originated the arts and sciences, and whose language was "the great parent stock from which the trunk stream of the Semitic tongues sprang." "In the inscriptions of Sargon the name of Akkad is applied to the Armenian mountains instead of the vernacular title of Ararat." (Rawlinson, in Herodotus, i. 319, note.) The name of the city is believed to have been discovered in the inscriptions under the form *Kinzi Akkad* (*ibid.* 447). [G.]

### ACCARON. [EKRON.]

ACCHO (ἄχχω, *hot sand* (?); Ἀκχω, Ἀκχ, Strabo; the PROTEGENTS of the Maccabees and N. T.), now called *Accho*, or more usually by Europeans, *Saint Jean d'Acree*, the most important sea-port town on the Syrian coast, about 30 miles S. of Tyre. It was situated on a slightly projecting headland, at the northern extremity of that spacious bay—the only inlet of any importance along the whole sea-board of Palestine—which is formed by the bold promontory of Carmel on the opposite side. This bay, though spacious (the distance from Accho to Carmel being about 8 miles), is shallow and exposed, and hence Accho itself does not at all times offer safe harbourage; on the opposite side of the bay, however, the roadstead of *Haifa*, immediately under Carmel, supplies this deficiency. Inland the hills, which from Tyre southwards press close upon the sea-shore, gradually recede, leaving in the immediate neighbourhood of Accho a plain of remarkable fertility about 6 miles broad, and watered by the small river *Belus* (*Nahr Nemán*), which discharges itself into the sea close under the walls of the town: to the S.E. the still receding heights afford access to the interior in the direction of Sephoris. Accho, thus favourably placed in command of the approaches from the north, both by sea and land, has been justly termed the "key of Palestine."

In the division of Canaan among the tribes, Accho fell to the lot of Asher, but was never wrested from its original inhabitants (*Judg.* i. 31); and hence it is reckoned among the cities of

Phœnicia (Strab. ii. 1:44; *Plin.* v. 17; *Ptol.* v. 15). No further mention is made of it in the O. T. history, nor does it appear to have risen to much importance until after the dismemberment of the Macedonian empire, when its proximity to the frontier of Syria made it an object of frequent contention. Along with the rest of Phœnicia it fell to the lot of Egypt, and was named Ptolemais, after one of the Ptolemies, probably Soter, who could not have failed to see its importance to his dominions in a military point of view. In the wars that ensued between Syria and Egypt, it was taken by Antiochus the Great (*Ptol.* v. 62), and attached to his kingdom. When the Maccabees established themselves in Judaea, it became the base of operations against them. Simon drove his enemies back within its walls, but did not take it (1 Mac. v. 22). Subsequently, when Alexander Balas set up his claim to the Syrian throne, he could offer no more tempting bait to secure the co-operation of Jonathan than the possession of Ptolemais and its district (1 Mac. x. 39). On the decay of the Syrian power it was one of the few cities of Judaea which established its independence. Alexander Jannæus attacked it without success. Cleopatra, whom he had summoned to his assistance, took it, and transferred it, with her daughter Selene, to the Syrian monarchy: under her rule it was besieged and taken by Tigranes (*Joseph. Ant.* xiii. 12. §2, 13. §2, 16. §1). Ultimately it passed into the hands of the Romans, who constructed a military road along the coast, from Berytus to Sephoris, passing through it, and elevated it to the rank of a colony, with the title *Colonia Claudia Caesariensis* (*Plin.* v. 17). The only notice of it in the N. T. is in connexion with St. Paul's passage from Tyre to Caesarea (*Acts* xxi. 7). Few remains of antiquity are to be found in the modern town: the original name has alone survived all the changes to which the place has been exposed. [W. L. B.]

ACCOS (Ἀκκῶς; *Jacob*), father of John and grandfather of Eupolemus the ambassador from Judas Maccabæus to Rome (1 Macc. viii. 17).

### ACCOZ. [KOZ.]

ACEI/DAMA (Ἀκελδამά; *Lachm.* (B) Ἀκελδამάχ; *Pacekkanu*); *χωρίον αἱματος*, "the field of blood;" (*Chald.* ܐܚܝܐ ܕܥܝܢܐ), the name given by the Jews of Jerusalem to a "held" (*χωρίον*) near Jerusalem purchased by Judas with the money which he received for the betrayal of Christ, and so called from his violent death therein (*Acts* i. 19). This is at variance with the account of St. Matthew (xxvii. 8), according to which the "field of blood" (*ἀγρὸς αἱματος*) was purchased by the Priests with the 30 pieces of silver after they had been cast down by Judas, as a burial-place for strangers, the locality being well known at the time as "the field of the Potter,"<sup>a</sup> (τὸν ἀγρὸν τοῦ κεραμέως). See *Allord's* notes to *Acts* i. 19. And accordingly ecclesiastical tradition appears from the earliest times to have pointed out two distinct (though not unvarying) spots as referred to in the two accounts. In Jerome's time (*Onom. Acheldama*) the "agr sanguinis" was shown "ad australem plagam montis Sion." *Acuil-*

<sup>a</sup> The prophecy referred to by St. Matthew, Zechariah (not Jeremiah) xi. 12, 13, does not in the press of state of the Heb. text agree with the quotation of the Evangelist. The Syrian Vers. omits the name altogether.

<sup>b</sup> Eusebius, from whom Jerome translated, has here

lus (p. 4) saw the "huge fig-tree where Judas hanged himself," certainly in a different place from that of the "small field (Aceldama) where the bodies of pilgrims were buried" (p. 5). Sæwulf (p. 12) was shown Aceldama "next" to Gethsemane, "at the foot of Olivet, near the sepulchres of Simeon and Joseph" (Jacob and Zacharias). In the "Citez de Jherusalem" (Rob. ii. 560) the place of the suicide of Judas was shown as a stone arch, apparently inside the city, and giving its name to a street. Sir John Maundeville (175) found the "elder-tree" of Judas "fast by" the "image of Absalom;" but the Aceldama "on the other side of Mount Sion towards the south." Maundrell's account (p. 468-9) agrees with this, and so does the large map of Schultz, on which both sites are marked. The Aceldama still retains its ancient position, but the tree of Judas has been transferred to the "Hill of Evil Counsel" (Stanley, *S. and P.* 105, 186; and Barclay's *Map*, 1857, and "*City*," &c., 75, 208).

The "field of blood" is now shown on the steep southern face of the valley or ravine of Hinnom, near its eastern end, on a narrow plateau (Salzmunn, *Ethel*, p. 22), more than half way up the hillside. Its modern name is *Hak el-edmum*. It is separated by no enclosure; a few venerable olive-trees (see Salzmunn's photograph, "*Champ du sang*") occupy part of it, and the rest is covered by a ruined square edifice—half built, half excavated—which, perhaps originally a church (Pauli, in Ritter, *Pal.* p. 464), was in Maundrell's time (p. 468) in use as a channel-house, and which the latest conjectures (Schultz, Williams, and Barclay, 207) propose to identify with the tomb of Ananias (Joseph. *H. J.* v. 12, § 2). It was believed in the middle ages that the soil of this place had the power of very rapidly consuming bodies buried in it (Sandys, 187), and in consequence either of this or of the sanctity of the spot, great quantities of the earth were taken away; amongst others by the Pisan Crusaders in 1218 for their *Campo Santo* at Pisa, and by the Empress Helena for that at Rome (Rob. i. 355; Raumer, 270). Besides the channel-house above mentioned, there are several large hollows in the ground in this immediate neighbourhood which may have been caused by such excavations. The formation of the hill is cretaceous, and it is well known that chalk is always favourable to the rapid decay of animal matter. The assertion (Krafft, 193; Ritter, *Pal.* 463) that a pottery still exists near this spot does not seem to be borne out by other testimony. [G.]

**ACHAIA** (**Ἀχαΐα**) signifies in the N. T. a Roman province, which included the whole of the Peloponnesus and the greater part of Hellas proper with the adjacent islands. This province with that of Macedonia comprehended the whole of Greece: hence Achaia and Macedonia are frequently mentioned together in the N. T. to indicate all Greece (Acts xviii. 12, xiv. 21; Rom. xv. 26, xvi. 25; 1 Cor. xvi. 15; 2 Cor. ii. 1, ix. 2; xi. 10; 1 Thess. i. 7, 8). A narrow slip of country upon the northern coast of Peloponnesus was originally called Achaia, the cities of which were confederated in an ancient League, which was renewed in B.C. 280 for the purpose of resisting the Macedonians. This League subsequently included several of the other Grecian states, and became the most powerful political body in Greece; and hence it was natural for

the Romans to apply the name of Achaia to the Peloponnesus and the south of Greece, when they took Corinth and destroyed the League in B.C. 146. (**Καλοῦσι δὲ οὐκ Ἑλλάδος ἀλλ' Ἀχαΐας ἡγεμόνα οἱ Ῥωμαῖοι, διότι ἐχειρώσαντο Ἑλληνας δι' Ἀχαιῶν τότε τοῦ Ἑλληνικοῦ προσηγήκων**, Paus. vii. 16, § 10.) Whether the Roman province of Achaia was established immediately after the conquest of the League, or not till a later period, need not be discussed here (see *Dict. of Geogr.* i. p. 17). In the division of the provinces by Augustus between the emperor and the senate in B.C. 27, Achaia was one of the provinces assigned to the senate, and was governed by a proconsul (Strab. xvii. p. 810; Dion. Cass. liii. 12). Tiberius in the second year of his reign (A.D. 16) took it away from the senate, and made it an imperial province governed by a procurator (Tac. *Ann.* i. 76); but Claudius restored it to the senate (Suet. *Clau.* 25). This was its condition when Paul was brought before Gallio, who is therefore (Acts xvii. 12) correctly called the "proconsul" (**ἀνθύπατος**) of Achaia, which is translated in the A. V. "deputy" of Achaia.

**ACHAÏCUS** (**Ἀχαιεύς**), name of a Christian (1 Cor. xvi. 17, subscription No. 25).

**A'CHAN** (**אֶחָאן**, *troubler*; written **עֶכֶר** in 1 Ch. ii. 7; **Ἀχαν** or **Ἀχαρ**; *Achan* or *Achar*), an Israelite of the tribe of Judah, who, when Jericho and all that it contained were accused and devoted to destruction, secreted a portion of the spoil in his tent. For this sin Jehovah punished Israel by their defeat in their attack upon Ai. When Achan confessed his guilt, and the body was discovered, he was stoned to death with his whole family by the people in a valley situated between Ai and Jericho, and their remains, together with his property, were burnt. From this event the valley received the name of Achar (*i. e.* *trouble*) [**ΑΧΙΟΝ**]. From the similarity of the name Achan to Achar, Joshua said to Achan, "Why hast thou troubled us? The Lord shall trouble thee this day" (Josh. vii.). In order to account for the terrible vengeance executed upon the family of Achan, it is quite unnecessary to resort to the hypothesis that they were accomplices in his act of military insubordination. The sanguinary severity of Oriental nations, from which the Jewish people were by no means free, has in all ages involved the children in the punishment of the father. [R. W. B.]

**ACHIBOR** (**עֶכְבֹר**; **Ἀχοβόρ**; *Achobor*). 1. Father of Baal-hanan, king of Edom (Gen. xxxvi. 38; 1 Chr. i. 49). 2. Son of Micaiel, a contemporary of Josiah (2 K. xxii. 12, 14; Jer. xxi. 22, xxxvi. 12), called Abdon in 2 K. xxii. 12.

**ACHICHACHUS** (**Ἀχιχάχος** (**Ἀχίχαρος**), *i. e.* **אֲחִיחָחִי** — Postumus; *Achicharus*), Tob. i. 21, &c.

**A'CHIM** (**Ἀχὲμ**, Matt. i. 14), son of Sadoc, and father of Eliud, in our Lord's genealogy; the fifth in succession before Joseph the husband of Mary. The Hebrew form of the name would be **יָכִין**, Jachia (Gen. xvi. 10; 1 Chr. xxiv. 17), which in the latter place the LXX. render **Ἀχμ** or **Ἀχελμ**. It is a short form of Jehochin, the Lord will establish. The name, perhaps, indicates him as successor to Jehochin's throne, and expresses his parents' faith that God would, in due time, estab-

**ἐν Βαπεύσει**. This may be a clerical error, or it may add another to the many instances existing of the change of a traditional site to meet circumstances.

*lish* the kingdom of David, according to the promise in Is. ix. 7 (6 in the Heb. Bih.) and elsewhere. [A. C. H.]

**A'CHIOR** (Ἀχιάωρ, *i. e.* Ἀχιάωρ, *the brother of light*; comp. Num. xxiv. 27; *Achior*: confounded with Ἀχιζαρος, Tob. xi. 17), a general of the Ammonites in the army of Holofernes, who is afterwards represented as becoming a proselyte to Judaism (Jud. v. vii. xiii. xiv.). [B. F. W.]

**A'OHISH** (Ἀχίσις; Ἀγχις, Ἀγχιούς; *Achis*), a Philistine king at Gath, son of Maach, who in the title to the 34th Psalm is called Abimelech (possibly corrupted from אכיש מלך). David twice found a refuge with him when he fled from Saul. On the first occasion, being recognised by the servants of Achish as one celebrated for his victories over the Philistines, he was alarmed for his safety, and feigned madness (1 Sam. xxi. 10-13). [DAVID.] From Achish he fled to the cave of Adullam. 2ndly. David fled to Achish with 600 men (1 Sam. xxvi. 23), and remained at Gath a year and four months.

Whether the Achish, to whom Shimei went in disobedience to the commands of Solomon (1 K. ii. 40), be the same person is uncertain. [R. W. B.]

**ACH'METHA.** [ECBATANA.]

**A'CHOR, VALLEY OF** (נַחַל עֲחֹר; Ἐμακοχώρ; *Achor*) = "valley of trouble," according to the etymology of the text; the spot at which Achan, the "troubler of Israel," was stoned (Josh. vii. 24, 26). On the N. boundary of Judah (av. 7; also Isa. lvi. 10; Hos. ii. 15). It was known in the time of Jerome (*Onom. s. v.*), who describes it as north of Jericho; but this is at variance with the course of the boundary in Joshua (heir's Joshua, 131). [G.]

**ACH'SAH** (עַכְסָה; Ἀσχα; *Acha*), daughter of Caleb, the son of Jephunneh, the Kenezite. Her father promised her in marriage to whoever should take Debir, the ancient name of which (according to the analogy of Kirjath-Aiba, the ancient name of Hebron) was Kirjath-Sepher (or as in Josh. xv. 49, Kirjath-Saim), the city of the book. Othniel, her father's younger brother, took the city, and accordingly received the hand of Achsah as his reward. Caleb, at his daughter's request, added to her dowry the upper and lower springs, which she had pleaded for as peculiarly suitable to her inheritance in a south country (Josh. xv. 15-19. See Stanley's *S. & P.* p. 161). [GULLOTH.] The story is repeated in Judges. i. 11-15. Achsah is mentioned again, as being the daughter of Caleb, in 1 Chr. ii. 49. But there is much confusion in the genealogy of Caleb there given. [CALEB.] [A. C. H.]

**ACH'SHAPH** (Ἀχίσαφ; Ἀσίφ, *Kaisaf* and *Kedaf*; *Achaph*, *Auf*), a city within the territory of Asher, named between Betan and Alam-mobach (Josh. xix. 25); originally the seat of a Canaanite king (xi. 1, xii. 20). It is possibly the modern *Kesaf*, thus bearing which name were found by Robinson (iii. 55) on the N.W. edge of the *Hilch*. But more probably the name has survived in *Chaufa*, a town which, from its situation, must always have been too important to have escaped mention in the history, as it otherwise would have done. If this suggestion is correct, the LXX. rendering, *Kedaf*, exhibits the name in the process of change from the ancient to the modern form. [G.]

**ACH'ZIB** (Ἀχίζιβ; Κεζιβ, Ἀχίζιβ; *Achzib*).

1. A city of Judah, in the Shefelah, named with Keilah and Marcsah (Josh. xv. 44, Micah i. 14). The latter passage contains a play on the name: "the houses of Achzib (Ἀχίζιβ) shall be a lie (Ἀχίζιβ)." It is probably the same with CHIZIB and CHIOZEBAB, which see.

2. A town belonging to Asher (Josh. xiv. 29), from which the Canaanites were not expelled (Judge. i. 31); afterwards Ecclipta (Jos. B. J. i. 13; §1, Ἐκδιππων). Josephus also (*Ant.* v. 1, §22) gives the name as Ἀρχή . . . ἡ καὶ Ἀκτιπύων. Here was the *Casale Hubert* of the Crusaders (Schulz; Ritter, *Pal.* 782); and it is now es-Zib, on the sea-shore at the mouth of the *Nahr Heradul*, 2 h. 20 m. N. of Akka (Robinson, in. 628; and comp. Mammoth. 427). After the return from Babylon Achzib was considered by the Jews as the northernmost limit of the Holy Land. See the quotations from the Gemara in Ireland (541). [G.]

**ACTIOH** (Ἀκτιόν, probably an error for Ἀχίτῶβ; *Achitob*, *i. e.* Ἀχίτῶβ, *kind brother*). Jud. viii. 1; comp. 2 Esdr. i. 1. [B. F. W.]

**ACRABAT'FINE.** [ARABAT'FINE.]

**ACTS OF THE APOSTLES** (πράξεις ἀποστόλων, *Acta Apostolorum*), a second treatise (δεύτερος λόγος) by the author of the third Gospel, traditionally known as *Lucas* or *Luke* (which see). The identity of the writer of both books is strongly shown by their great similarity in style and idiom, and the usage of particular words and compound forms. The theories which assign the book to other authors, or divide it among several, will not stand the test of searching inquiry. They will be found enumerated in Davidson's *Introd.* to the N. T. vol. ii., and Alford's *prolegomena* to vol. ii. of his edition of the Greek Testament. It must be confessed to be, at first sight, somewhat surprising that notices of the author are so entirely wanting, not only in the book itself, but also, generally, in the Epistles of St. Paul, whom he must have accompanied for some years on his travels. But our surprise is removed when we notice the habit of the Apostle with regard to mentioning his companions to have been very various and uncertain, and remember that no Epistles were, strictly speaking, written by him while our writer was in his company, before his Roman imprisonment; for he does not seem to have joined him at Corinth (Acts xviii.), where the two Epp. to the Thess. were written, nor to have been with him at Ephesus, ch. xix. whence, perhaps, the Ep. to the Gal. was written; nor again to have wintered with him at Corinth, ch. xx. 3, at the time of his writing the Ep. to the Rom. and, perhaps, that to the Gal.

The book commences with an inscription to one Theophilus, who, from bearing the appellation *κράτιστος*, was probably a man of birth and station. But its design must not be supposed to be limited to the edification of Theophilus, whose name is perceived only, as was customary then as now, by way of dedication. The readers were evidently intended to be the members of the Christian Church, whether Jews or Gentiles; for its contents are such as are of the utmost consequence to the whole church. They are *The fulfilment of the promise of the Father by the descent of the Holy Spirit, and the results of that outpouring, by the dispersion of the Gospel among Jews and Gen-*

titles. Under these leading heads all the personal and subordinate details may be ranged. Immediately after the Ascension, St. Peter, the first of the Twelve, designated by our Lord as the Rock on whom the Church was to be built, the holder of the keys of the kingdom, becomes the prime actor under God in the founding of the Church. He is the centre of the first great group of sayings and doings. The opening of the door to Jews (ch. ii.) and Gentiles (ch. x.) is his office, and by him, in good time, is accomplished. But none of the existing twelve Apostles were, humanly speaking, fitted to preach the Gospel to the cultivated Gentile world. To be by divine grace the spiritual conqueror of Asia and Europe, God raised up another instrument, from among the mis-educate and zealous Pharisees. The preparation of Saul of Tarsus for the work to be done, the progress, in his hand, of that work, his journeyings, preachings, and perils, his stripes and imprisonments, his testifying in Jerusalem and being brought to testify in Rome,—these are the subjects of the latter half of the book, of which the great central figure is the Apostle Paul.

Any view which attributes to the writer as his chief design some collateral purpose which is served by the book as it stands, or, indeed, any purpose beyond that of writing a faithful history of such facts as seemed important in the spread of the Gospel, is now generally, and very properly, treated as erroneous. Such a view has become celebrated in modern times, as held by Baur;—that the purpose of the writer was to compare the two great Apostles, to show that St. Paul did not depart from the principles which regulated St. Peter, and to exalt him at every opportunity by comparison with St. Peter. The reader need hardly be reminded how little any such purpose is borne out by the contents of the book itself; nay, how naturally they would follow their present sequence, without any such thought having been in the writer's mind. Doubtless many ends are answered and many results brought out by the book as its narrative proceeds: as e. g. the rejection of the Gospel by the Jewish people everywhere, and its gradual transference to the Gentiles; and others which might be easily gathered up, and made by ingenious hypothesizers, such as Baur, to appear as if the writer were bent on each one in its turn, as the chief object of his work.

As to the time when, and place at which the book was written, we are left to gather them entirely from indirect notices. It seems most probable that the place of writing was Rome, and the time about two years from the date of St. Paul's arrival there, as related in ch. xviii., *sub fin.* Had any considerable alteration in the Apostle's circumstances taken place before the publication, there can be no reason why it should not have been noticed. And on other accounts also this time was by far the most likely for the publication of the book. The arrival in Rome was an important period in the Apostle's life: the quiet which succeeded it seemed to promise no immediate determination of his cause. A large amount of historic material had been collected in Judæa, and during the various missionary journeys; or, taking another and not less probable view, Nero was beginning to undergo that change for the worse which disgraced the latter portion of his reign: none could tell how soon the whole outward repose of Roman society might be shaken, and the tacit toleration which

the Christians enjoyed be exchanged for bitter persecution. If such terrors were imminent, there would surely be in the Roman Church prophets and teachers who might tell them of the storm which was gathering, and warn them, that the records lying ready for publication must be given to the faithful before its outbreak or event.

Such *à priori* considerations would, it is true, weigh but little against presumptive evidence furnished by the book itself; but arrayed, as they are, in aid of such evidence, they carry some weight, when we find that the time naturally and fairly indicated in the book itself for its publication is that one of all others when we should conceive that publication most likely.

This would give us for the publication the year 63 A.D., according to the most probable assignment of the date of the arrival of St. Paul at Rome.

The genuineness of the Acts of the Apostles has ever been recognised in the Church. It is mentioned by Eusebius (*H. E.* vi. 25) among the *βυολογούμεναι θείαι γραφαί*. It is first directly quoted in the epistle of the churches of Lyons and Vienne to those of Asia and Phrygia (A.D. 177); then repeatedly and expressly by Irenæus, Clement of Alexandria, Tertullian, and so onwards. It was rejected by the Marcionites (cent. ii.) and Manichæans (cent. iv.) as contradicting some of their notions. In modern Germany, Baur and some others have attempted to throw discredit on it, and fix its publication in the 2nd century, mainly by assuming the hypothesis impugned above, that it is an apology for St. Paul. But the view has found no favour, and would, ere this, have been forgotten, had it not been for the ability and subtlety of its chief supporter.

The text of the Acts of the Apostles is very full of various readings; more so than any other book of the N. T. To this several reasons may have contributed. In the many backward references to Gospel history, and the many anticipations of statements and expressions occurring in the Epistles, temptations abounded for a collector to try his hand at assimilating, and, as he thought, reconciling, the various accounts. In places where ecclesiastical order or usage was in question, insertions or omissions were made to suit the habits and views of the Church in aftertimes. Where the narrative simply related facts, any act or word apparently unworthy of the apostolic agent was modified for the sake of decorum. Where St. Paul repeats to different audiences, or the writer himself narrates, the details of his miraculous conversion, the one passage was pieced from the other, so as to produce verbal avoidance. There are in this book an unusual number of those remarkable interpolations of considerable length, which are found in the Codex Bezae (D) and its cognates. A critic of some eminence, Bornemann, believes that the text of the Acts originally contained them all, and has been abbreviated by correctors; and he has published an edition in which they are inserted in full. But, while some of them bear an appearance of genuineness (as e. g. that in ch. xii. 10, where, after *ἐξελθόντες*, is added *κατέβησαν τοὺς ἐπὶ τὰ θάμους, καὶ*) the greater part are unmeaning and absurd (e. g. that in ch. xvi. 39, where we read after *ἐξελεῖν, — εἰπόντες*, *ἠγορήσαμεν τὰ καθ' ὑμᾶς ὅτι ἐστὲ ἄνδρες δικαιοί: καὶ ἐξαγαγόντες παρεκάλεισαν αὐτοὺς λέγοντες* *Ἐκ τῆς πόλεως ταύτης ἐξέλθατε μήποτε πάλιν συνιρράψαι: ἥμιν ἐπικράζοντες καθ' ὑμῶν*).

The most remarkable exegetical works and monographs on the Acts, besides commentaries on the whole N. T. are Baumgarten, *Apostelgeschichte, oder der Entwicklungsgang der Kirche von Jerusalem bis Rom*, Halle, 1852; Lekebusch, *Die Composition und Entstehung der Apostelgeschichte von Neuem untersucht*, Gotha, 1854.

The former of these works is a very complete treatise on the Christian-historical development of the Church as related in the book: the latter is of more value as a critical examination of the various theories as to its composition and authorship.

Valuable running historical comments on the Acts are also found in Neander's *Pflanzung u. Leitung der Christlichen Kirche durch die Apostel*, ed. 4. Hamburg, 1847; Conybeare and Howson's *Life and Epistles of St. Paul*, 2nd ed. Lond. 1856. Professed commentaries have been published by Mr. Humphry, Lond. 1847, and Professor Hackett, Boston, U. S. 1852. [H. A.]

AD'ADAH (עֲדָה; Ἀδὰδ; *Adada*), one of the cities in the extreme south of Judah named with Dimonah and Kelesh (Josh. xv. 22). It is not mentioned in the *Onomasticon* of Eusebius, nor has any trace of it been yet discovered.

AD'AH (עֲדָה, *ornament, beauty*; Ἀδὰ; *Adā*).

1. The first of the two wives of Lamech, fifth in descent from Cain, by whom were born to him Jabal and Jubal (Gen. iv. 19).

2. A Hittite, daughter of Elon, one (probably the first) of the three wives of Esau, mother of his first-born son Eliphaz, and so the ancestress of six (or seven) of the tribes of the Edomites (Gen. xxxvi. 2, 10 ff. 15 ff.). In Gen. xxxi. 31 she is called ΒΑΣΙΛΙΑΡΗ. [F. W. G.]

ADAPAH (עֲדָה; Ἀδαΐ, Ἐδεΐδ; *Hadaia*), name of six men. 1. Maternal grandfather of king Josiah (2 K. xvi. 1). 2. (1 Chr. vi. 41). 3. (1 Chr. viii. 21). 4. (1 Chr. ix. 12; Neh. xi. 12). 5. (Ezr. x. 29). 6. (Ezr. x. 39; Neh. xi. 5). Written עֲדָה in 2 Chr. xxiii. 1.

ADA'LIA (אֲדָלְיָה; *Baped*; *Adalia*), a son of Haman (Esth. iv. 8).

AD'AM (אָדָם; Ἀδάμ; *Adam*), the name which is given in Scripture to the first man. The term apparently has reference to the ground from which he was formed, which is called *Adamah* (אֲדָמָה, Gen. ii. 7). The idea of *redness of colour* seems to be inherent in either word. (Cf. אָדָם, Lam. iv. 7; אָדָם *red*, אֲדָם *Edom*,

Gen. xxv. 30; אָדָם, *a ruby*; אֲדָם, *colore*

*fusus praelatus fuit, rubrum tinxit*, &c.) The generic term *Adam, man*, becomes, in the case of the first man, a denominative. Supposing the Hebrew language to represent accurately the primary ideas connected with the formation of man, it would seem that the appellation bestowed by God was given to keep alive in Adam the memory of his earthly and mortal nature; whereas the name by which he preferred to designate himself was *Ish* (יִשׁ, *a man of substance or worth*, Gen. ii. 23). The creation of man was the work of the sixth day. His formation was the ultimate object of the Creator. It was with reference to him that

all things were designed. He was to be the "roof and crown" of the whole fabric of the world. In the first nine chapters of Genesis there appear to be three distinct histories relating more or less to the life of Adam. The first extends from Gen. i. 1 to ii. 3, the second from ii. 4 to iv. 26, the third from v. 1 to the end of ix. The word at the commencement of the two latter narratives, which is rendered there and elsewhere *generations*, may also be rendered *history*. The style of the second of these records differs very considerably from that of the first. In the first the Deity is designated by the word *Elohim*; in the second He is generally spoken of as *Jehovah Elohim*. The object of the first of these narratives is to record the creation; that of the second to give an account of paradise, the original sin of man and the immediate posterity of Adam; the third contains mainly the history of Noah, referring it would seem to Adam and his descendants, principally in relation to that patriarch.

The Mosiac accounts furnish us with very few materials from which to form any adequate conception of the first man. He is said to have been created in the image and likeness of God, and this is commonly interpreted to mean some super-excellent and divine condition which was lost at the Fall: apparently however without sufficient reason, as the continuance of this condition is implied in the time of Noah, subsequent to the flood (Gen. ix. 6), and is asserted as a fact by St. James (iii. 9), and by St. Paul (1 Cor. xi. 7). It more probably points to the Divine pattern and archetype after which man's intelligent nature was fashioned; reason, understanding, imagination, volition, &c. being attributes of God; and man alone of the animals of the earth being possessed of a spiritual nature which resembled God's nature. Man in short was a spirit, created to reflect God's righteousness and truth and love, and capable of holding direct intercourse and communion with Him. As long as his will moved in harmony with God's will, he fulfilled the purpose of his Creator. When he refused submission to God, he broke the law of his existence and fell, introducing confusion and disorder into the economy of his nature. As much as this we may learn from what St. Paul says of "the new man being renewed in knowledge after the image of Him that created him" (Col. iii. 10), the restoration to such a condition being the very work of the Holy Spirit of God. The name *Adam* was not confined to the father of the human race, but like *homo* was applicable to *woman* as well as *man*, so that we find it said in Gen. v. 1, 2, "This is the book of the 'history' of Adam in the day that God created 'Adam,' in the likeness of God made He him, male and female created He them, and called *their* name Adam in the day when they were created."

The man Adam was placed in a garden which the Lord God had planted "eastward in Eden," for the purpose of dressing it and keeping it. It is of course hopeless to attempt to identify the situation of Eden with that of any district familiar to modern geography. There seems good ground for supposing it to have been an actual locality. It was probably near the source of a river which subsequently divided into four streams; these are mentioned by name: Pison is supposed by some to be the Indus, Gihon is taken for the Nile, Hiddekel is called by the LXX. here, and at Dan. x. 4, Tigris, and the fourth is Euphrates; but how they should have been originally united is unintelligible. Adam was permitted to eat of the fruit of every tree in the garden but one, which was

called the "tree of the knowledge of good and evil." What this was, it is also impossible to say. Its name would seem to indicate that it had the power of bestowing the consciousness of the difference between good and evil; in the ignorance of which man's innocence and happiness consisted. The prohibition to taste the fruit of this tree was enforced by the menace of death. There was also another tree which was called "the tree of life." Some suppose it to have acted as a kind of medicine, and that by the continual use of it our first parents, not created immortal, were preserved from death. (Abp. Whately.) While Adam was in the garden of Eden the beasts of the field and the fowls of the air were brought to him to be named, and whatsoever he called every living creature that was the name thereof. Thus the power of fitly designating objects of sense was possessed by the first man, a faculty which is generally considered as indicating mature and extensive intellectual resources. Upon the failure of a companion suitable for Adam among the creatures thus brought to him to be named, the Lord God caused a deep sleep to fall upon him, and took one of his ribs from him, which He fashioned into a woman and brought her to the man. Prof. S. Lee supposed the narrative of the creation of Eve to have been revealed to Adam in his deep sleep (Lee's *Job*, *Introd.*, p. 16). This is agreeable with the analogy of similar passages, as Acts x. 10, xi. 5, xii. 17. At this time they are both described as being naked without the consciousness of shame.

Such is the Scripture account of Adam prior to the Fall: there is no narrative of any condition superhuman, or contrary to the ordinary laws of humanity. The first man is a true man, with the powers of a man and the innocence of a child. He is moreover spoken of by St. Paul as being "the figure, *τύπος*, of Him that was to come," the second Adam, (Christ Jesus (Rom. v. 14). His human excellence therefore cannot have been superior to that of the Son of Mary, who was Himself the Pattern and Perfect Man. By the subtlety of the serpent, the woman who was given to be with Adam, was beguiled into a violation of the one command which had been imposed upon them. She took of the fruit of the forbidden tree and gave it to her husband. The propriety of its name was immediately shown in the results which followed; self-consciousness was the first fruits of sin; their eyes were opened and they knew that they were naked. The subsequent conduct of Adam would seem to militate against the notion that he was in himself the perfection of moral excellence. His cowardly attempt to "den himself" by the inculpation of his helpless wife bears no marks of a high moral nature even though fallen; it was conduct unworthy of his sons, and such as many of them would have scorned to adopt. Though the cause of Adam's rebellion of necessity fell upon him, yet the very prohibition to eat of the tree of life after his transgression, was probably a manifestation of Divine mercy, because the greatest malediction of all would have been to have the gift of indestructible life superadded to a state of wretchedness and sin. When moreover we find in Prov. iii. 18, that wisdom is declared to be a tree of life to them that lay hold upon her, and in Rev. ii. 7, xii. 2, 14, that the same expression is applied to the grace of Christ, we are led to conclude that this was merely a temporary prohibition imposed till the Gospel dispensation should be brought in. Upon this supposition the condition of Christians now is as favourable as that of Adam before the Fall, and

their spiritual state the same, with the single exception of the consciousness of sin and the knowledge of good and evil.

Till a recent period it has been generally believed that the Scriptural narrative supposes the whole human race to have sprung from one pair. It is maintained that the O. T. assumes it in the reason assigned for the name which Adam gave his wife after the Fall, viz. Eve, or Chavvah, *i. e.* a *living* woman, "because she was the mother of all living;" and that St. Paul assumes it in his sermon at Athens when he declares that God hath made of *one* blood *all* nations of men; and in the Epistle to the Romans and first Epistle to the Corinthians, when he opposes Christ as the representative of redeemed humanity to Adam as the representative of natural, fallen and sinful humanity. But the full consideration of this important subject will come more appropriately under the article MAN.

In the middle ages discussions were raised as to the period which Adam remained in Paradise in a sinless state. To these Dante refers in the *Paradiso*, xvi. 139-142—

"Nel monte, che si leva più dall' onda,  
Fu' io, con vita pur d'è discesa,  
Dalla prima ora a quella ch'è seconda,  
Come il Sol muta quadra, all' ora seconda."

Dante therefore did not suppose Adam to have been *more* than seven hours in the earthly paradise. Adam is stated to have lived 930 years: so it would seem that the death which resulted from his sin was the spiritual death of alienation from God. "In the *day* that thou eatest thereof thou shalt surely die:" and accordingly we find that this spiritual death began to work immediately. The sons of Adam mentioned in Scripture are Cain, Abel and Seth: it is implied however that he had others. [S. L.]

AD'AM (אָדָם — *earth*; *Admah*), a city on the Jordan "beside (בְּצֵדָה) Zathnan," in the time of Joshua (Josh. iii. 16). It is not elsewhere mentioned, nor is there any reference to it in Josephus. The LXX. (both MSS.) has *ἔως μέρους Καριαβί-απλη*, a curious variation, in which it has been suggested (Stanley, *S. & P. App.* §80, note) that a trace of Adam appears in *απλη*, D being changed to R according to the frequent custom of the LXX.

Note.—The A. V. here follows the *Aeri*, which, for אָדָם = "by Adam," the reading in the Hebrew text or Chetib, has אָדָם = "from Adam," an alteration which is a questionable improvement (Keil, 51). The accurate rendering of the text is "rose up upon a heap, very far off, by Adam, the city that is beside Zathnan" (Stanley, *S. & P.* 304 note). [G.]

AD'AMAH (אָדָמָה; *Admah*), one of the "fenced cities" of Naphtali, named between Chinnereth and ha-Banah (Josh. xix. 36). It was probably situated to the N.W. of the Sea of Galilee, but no trace of it has yet been discovered.

ADAMANT, a name given to stones of excessive hardness, as, for instance, to the diamond. It is used twice in the A. V. to render the Hebr. *Shāmīr* (שָׁמִיר, root שָׁמַר, *rigid, horrid*), viz. in Ez. iii. 9, and Zech. vii. 12. In the former

Can the place have derived its name from the "fat ground" (הָאֲדָמָה) which was in this very neighbourhood—"between Succoth and Zarthan" (1 K. vii. 46)?

passage it is used metaphorically of the firmness with which God's servant should be endowed to resist his enemies; in the latter, of the hardness of man's heart in resisting the truth. *Shāmīr* occurs a third time in Jer. xvii. 1, where it is rendered "diamond" in A. V. The Vulgate in all these passages has *Adamus*. The LXX. in Ez. iii. 9, and Zech. vii. 12, have omitted to render the Hebrew word at all, and the whole passage in Jer. xvii. 1 is omitted in the Vatican MS. of the LXX.; but the Complut. Ed. has *ἐν θυγὶ ἀδαμαντίνῳ*. The word *adamant* occurs once in the Apocrypha in Ecclesi. vii. 16, "He has separated his light from the darkness with an adamant," i. e. by an adamantine wall—impassable, irresistible, unmovable.

Gesenius is disposed to connect *Shāmīr* with the Greek *σμίρις*, *σμίρις*, emery powder for polishing—the debris of *σμιρῆτης λίθος* (LXX., Job xii. 7); but Dioscorides (v. 166) says, *σμίρις λίθος ἐστίν, ὃ τὰς ψήφους αἱ δακτυλιογυλῶφαι σμῆχουσι*. Bochart also supposes *σμίρις* to have been a hard stone used in cutting and polishing other stones, and not a powder (*Hieroz.* p. ii. lib. vi. c. 11, p. 842).

**ADAMI** (אָדָמִי; *Appé; Adami*), a place on the border of Naphtali, named after Allon bez-zaimanum (Josh. xix. 33). By same it is taken in connexion with the next name, *hau-Nekeb*, but see Reland, 545. In the post-biblical times Adami bore the name of Damun.

**ADAR** (אָדָר; *Appé; Adarā; Adar*), a place on the south boundary of Palestine and of Judah (Josh. xv. 34) which in the parallel list is called HAZAR-ADAR.

**ADAR.** [MONRUS.]

**ADASA** (Ἀδασά, LXX.; τὰ Ἀδασά, Jos.; *Adasa; Adasa*), a place in Judaea, a day's journey from Gaza, and 30 stadia from Bethhoron (Jos. Ant. xii. 10, §5). Here Judas Maccabaeus encamped before the battle in which Nicanor was killed, Nicanor having pitched at Bethhoron (1 Macc. vii. 40, 45). In the Onomasticon it is mentioned as near Gophna.

**ADBEEL** (אָדבֶּעֶל; *Nabdehēl; Adbeel; Ἀδβέηλος*, Joseph., "perhaps a *miracle* of God," from

أَدَب, *miracle*," Gesen. s. v.), a son of Ishmael (Gen. xxv. 13; 1 Chr. ii. 29), and probably the progenitor of an Arab tribe. No satisfactory identification of this name with that of any people or place mentioned by the Greek geographers, or by the Arabs themselves, has yet been discovered. The latter have lost most of the names of Ishmael's descendants between that patriarch and 'Adnan (who is said to be of the 21st generation before Mohammad), and this could scarcely have been the case if tribes, or places named after them, existed in the times of Arabian historians or relations of traditions: it is therefore unlikely that these names are to be recovered from the works of native authors. But some they have taken, and apparently corrupted, from the Bible; and among these is Adbeel, written (in the *Mir'at ez-Zeidan*) اذبل.

[E. S. P.]

**ADIDAN** (אָדִידָן; *Hēdan*, LXX.; *Aadap*, Apoc. Esch.; *Adon*, Vulg.), one of the places from which some of the captivity returned with Zerubbabel to Judaea who could not show their pedigree as Israelites (Ezr. ii. 59). In the parallel lists of

Nehemiah (vii. 61) and Esdras the name is ADDON and AALAR. [G.]

**ADDAR** (אָדָר; *Adar; Addar*), son of Bela (1 Chr. viii. 3), called ARD in Num. xxvi. 40.

**ADDER**, a venomous serpent. The word occurs five times in the text of the A. V. (see *infra*) of the O. T. and three in the margin as synonymous with *cockatrice*, viz. Is. xi. 8, xiv. 29, lxx. 5. It represents four different Hebrew words, *'Acsháb*, *Pethan*, *Tiphoni*, and *Shephiphon*.

*'Acsháb* (עֲכָשָׁב), occurs only in Ps. cxi. 3, and seems to be a compound of עָכַב, *retrosum se flexit*, and עָקַב, *insidiatu est*, words which express the action of a serpent lurking in ambush and coiling himself up to strike. The LXX. render the word by *ἀσπίς*, and are followed by St. Paul in quoting the passage at Rom. iii. 13, and by the Vulgate.

*Pethan* (תִּפְתָּן) is expressed by *adder* in Ps. lvi. 4, v. 13, but elsewhere by *asp*. It is derived from an unused root תִּפַּח, *calidus fui*, and perhaps is related to תִּפַּח, *contorsit*. From Dent. xxxii. 33 and Job xx. 14, 16, it would seem to have been a poisonous snake. It was also deaf (שָׁמֵן), not hearing the voice of the charmer, from which we infer that the art of charming serpents by music was known in David's days. Gesenius connects the word with the Chaldee תִּפַּח, תִּפְתָּן, and with the Syr. ܦܬܢ, but not with ܦܬܢܐ, *draco*.

*Tiphoni* (תִּפְתָּן) is translated *adder* only in Prov. xxii. 32, where the LXX. have *κερστῆς*. In the three passages of Isaiah quoted above, and in Jer. vii. 17, it is rendered *cockatrice*. The root is ܦܬܢ, of which Gesenius gives two meanings, *protesti* and *subulat*, which are equally applicable to a serpent; the former to the way in which it strikes its prey, the latter to the sound it utters. *Tiphoni* is probably the serpent called by the Greeks *βασιλίσκος*, and by the Latins *regulus*. The passage of Jeremiah above quoted implies its fierce nature, and the translation of it by the LXX. (*ὄφεις θανατοῦντας*) its deadly poison. From Is. lxx. 5, we gather that the animal was oviparous; from xiv. 29, that it was not identical with *שָׁמֵן*; and from xi. 8 that it was subterranean in habit.

*Shephiphon* (שִׁפְפִּיפּוֹן, derived from שִׁפַּץ, *serpsit*) occurs only in Gen. xlix. 17, where it is used by Jacob to characterize the tribe of Dan. Its habit of lurking in the road, and biting at the horses' heels, identifies it with the Coluber Cerastes of Linnaeus, a small and very venomous snake found in Egypt, and fully described and figured by Bruce in his Abyssinian travels (vol. v. pp. 200-212, Ed. Germ.). The LXX. render it *ὄφης ἐφ' ὁδοῦ ἐγκαθήμενος ἐπὶ τριβῶν*, probably connecting the word with ܦܬܢ. See Gesen. *Thes.* p. 1381. [W. D.]

**ADDI** (אָדִידָן, Luke iii. 28), son of Cosam, and father of Melchī, in our Lord's genealogy; the third above Salathiel. The etymology and Hebrew form of the name are doubtful, as it does not occur in the LXX., but it probably represents the Hebrew עָדִי, *an ornament*, and is a short form of Adiel, or

Adaiab. The latter name in 1 Chr. vi. 41 (26 in Heb. Bib.) is rendered in the Septuagint Ἀδαί, which is very close to Adli. [A. C. II.]

AD'DON. [ADDAN.]

A'DER, accurately EDER (עֲדֵר; \*Eder; Heder, name of a man (1 Chr. viii. 15).

AD'IDA (Ἀδιδα; \*Joseph. Ἀδιδά; Adhis, Adliak), a town on an eminence (Ant. xiii. 6, §4) overlooking the low country of Judah (A. 49 τῇ Σεφίλας), fortified by Simon Maccabaens in his wars with Tryphon (1 Macc. xii. 38, xiii. 13). Alexander was here defeated by Aretas (Ant. xiii. 15, §2); and Vespasian used it as one of his outposts in the siege of Jerusalem (B. J. iv. 9, § 1). Probably identical with HADID and ADITHAIM (which see). [G.]

A'DIEL (עֲדִיֵּאל; \*Ιεδιήλ, Ἀδιήλ, Ὀδιήλ; Adiel), name of three men. 1. (1 Chr. iv. 36). 2. (1 Chr. ix. 12). 3. (1 Chr. xxvii. 25).

A'DIN (עֲדִין; \*Ἀδιν, Ἀδιν, Ἡδιν, Ἡδιν; Adin, Adin), name of a man (Ezr. ii. 15, viii. 6; Neh. vii. 20, x. 16).

AD'INA (עֲדִינָא; \*Ἀδινά; Adina), name of a man (1 Chr. xi. 42).

AD'INO, THE EZNITE, 2 Sam. xxiii. 8. See JASHOBEAM.

ADITHA'IM (with the article, הָעֲדִיתַיִם, a town belonging to Judah, lying in the low country (Shefelah), and named, between Shalum and Hag-Gedemh, in Josh. xv. 36 only. It is entirely omitted by the LXX. At a later time the name appears to have been changed to Hadid" (Chadid) and Adila. For the dual termination, comp. the two names occurring in the same verse; also Eglaim, Horonaim, etc. [G.]

ADJURATION. [ENORCISM.]

AD'LAI (עֲדַלַי; Ἀδλ; Adli), name of a man (1 Chr. xxvii. 29).

AD'MAH (אֲדָמָה; Ἀδμά; Aduma), one of the "cities of the plain," always coupled with Zebaim (Gen. x. 19; xiv. 2, 8; Dent. xxi. 23; Hos. xi. 8). It had a king of its own.

AD'MATHA (אֲדָמָתָה; Admatha), one of the seven princes of Persia (Esth. i. 14).

AD'NA (עֲדָנָה; Ἐδνέ; Edna), name of a man (Ezr. x. 30).

AD'NAH (עֲדָנָה; Ἐδνα, Ἐδνας; Ednas), name of two men. 1. (1 Chr. xii. 20). 2. (2 Chr. xvii. 14).

ADONI-BE'ZEK (אֲדֹנִי־בֶזֶק, lord of Bezek; Ἀδωνιβεζεκ; Adonibezec), king of Bezek, a city of the Canaanites. [BEZEK.] This chieftain was vanquished by the tribe of Judah (Judg. i. 3-7), who cut off his thumbs and great toes, and brought him prisoner to Jerusalem, where he died. He confessed that he had inflicted the same cruelty upon 70 petty kings whom he had conquered. [R. W. B.]

ADONI'KAM. [ADONIJAH, No. 3.]

ADONI'JAH (אֲדֹנִיָּהוּ, my Lord is Jehovah; Ἀδωνίας; Adonius). 1. The fourth son of David by Hagith, born at Hebron, while his father was king of Judah (2 Sam. iii. 4). After the death of his three brothers, Amnon, Chileab, and Absalom, he became eldest son; and when his father's strength was visibly declining, put forward his pretensions to the crown, by equipping himself in royal state, with chariots and horsemen, and fifty men to run before him, in imitation of Absalom (2 Sam. xv. 1), whom he also resembled in personal beauty, and apparently also in character, as indeed Josephus says (Ant. vii. 14, §4). For this reason he was plainly unfit to be king, and David promised Bathsheba that her son Solomon should inherit the crown (1 K. i. 30), for there was no absolute claim of primogeniture in these Eastern monarchies. Solomon's cause was espoused by the best of David's counsellors, the illustrious prophet Nathan; Zadok, the descendant of Eleazar, and representative of the elder line of priesthood; Benaiah, the captain of the king's bodyguard; together with Shimei and Rei, whom Ewald (Geschichte, iii. 246) conjectures to be David's two surviving brothers, comparing 1 Chr. ii. 13, and identifying שְׁמַעִי with שְׁמֹעָה (Shammai in our version), and רֵעִי with רֵרִי (our Rehobai). From 1 K. ii. 8, it is unlikely that the Shimei of 2 Sam. xvi. 5 could have actively espoused Solomon's cause. On the side of Adonijah, who when he made his attempt on the kingdom was about 35 years old (2 Sam. v. 5), were Abiathur, the representative of Eli's, i. e. the junior line of the priesthood (descended from Ithamar, Aaron's fourth son), and Joab, the famous commander of David's army; the latter of whom, always audacious and self-willed, probably expected to find more congenial elements in Adonijah's court than in Solomon's. His name and influence secured a large number of followers, among the captains of the royal army belonging to the tribe of Judah (comp. 1 K. i. 9 and 25); and these, together with all the princes except Solomon, were entertained by Adonijah at a great sacrificial feast held "by the stone Zohaleth, which is by En-rogel." The meaning of the stone Zohaleth is very doubtful, being translated *rock of the watch tower* in the Chaldee; *great rock*, Syr. and Arab.; and explained "*rock of the stream of water*" by R. Kimchi. En-rogel is mentioned in Josh. xv. 7, as a spring on the border of Judah and Benjamin, S. of Jerusalem, and may be the same as that afterwards called the Well of Job or Jeab (Ain Ayub). It is explained *spring of the fuller* by the Chaldee Paraphrast, perhaps because he treads his clothes with his feet (רָגַל, see Gesen. s. v.); but comp. Dent. xi. 10, where "watering with the feet" refers to machines trodden with the foot, and such possibly the spring of Rogel supplied. [ENROGEL.] A meeting for a religious purpose would be held near a spring, just as in later times sites for προσευχαί were chosen by the waterside (Acts xvi. 13).

Nathan and Bathsheba, now thoroughly alarmed, apprised David of these proceedings, who immediately gave orders that Solomon should be conducted on the royal mule in solemn procession to Gihon, a spring on the W. of Jerusalem (2 Chr. xxxii. 30). [GIHON.] Here he was anointed and proclaimed king by Zadok, and joyfully recognized by the people. This decisive measure struck terror into the opposite party, and Adonijah fled to sanctuary, but was

\* If so, it is an instance of Ain changing to Cheth (see Ges. 436).

pardoned by Solomon on condition that he should "show himself a worthy man," with the threat that "if wickedness were found in him he should die" (1. 52).

The death of David quickly followed on these events; and Adonijah begged Bathsheba, who as "king's mother" would now have special dignity and influence [ASA], to procure Solomon's consent to his marriage with Abishag, who had been the wife of David in his old age (1 K. i. 3). This was regarded as equivalent to a flesh attempt on the throne [ABSAIOM; ABNEH]; and therefore Solomon ordered him to be put to death by Benaiah, in accordance with the terms of his previous pardon. Far from looking upon this as "the most flagrant act of despotism since Boaz massacred the priests at Saul's command" (Newman, *Hebrew Monarchy*, ch. iv.), we must consider that the clemency of Solomon in sparing Adonijah, till he thus again revealed a treasonable purpose, stands in remarkable contrast with the almost universal practice of Eastern sovereigns. Any one of these, situated like Solomon, would probably have secured his throne by putting all his brothers to death, whereas we have no reason to think that any of David's sons suffered except the open pretender Adonijah, though all seem to have opposed Solomon's claims; and if his execution be thought an act of severity, we must remember that we cannot expect to find the principles of the Gospel acted upon a thousand years before Christ came, and that it is hard for us, in this nineteenth century, altogether to realize the position of an Oriental king in that remote age.

2. A Levite in the reign of Jehoshaphat (2 Chr. xvi. 8).

3. One of the Jewish chiefs in the time of Nehemiah (i. 16). He is called Adonikam (אֲדוֹנִיקָם; *Adonikam*) in Ezr. ii. 13. Comp. Ezr. viii. 13; Neh. vii. 18. [G. E. L. C.]

ADONIRAM (אֲדוֹנִירָם, 1 K. iv. 6; by an unusual contraction ADORAM, אֲדוֹרָם, 2 Sam. xx. 24, and 1 K. 12, 18; also HADORAM, הָדוֹרָם, 2 Chr. x. 18; *Adoniram*; *Adoram*). Chief receiver of the tribute during the reigns of David (2 Sam. xv. 24), Solomon (1 K. iv. 6) and Rehoboam (1 K. xii. 18). This last monarch sent him to collect the tribute from the rebellious Israelites, by whom he was stoned to death. [R. W. B.]

ADONI-ZE'DEK (אֲדוֹנִיזֶדֶק, *lord of justice*; *Adonizede*), the Amorite king of Jerusalem who organized a league with four other Amorite princes against Joshua. The confederate kings having laid siege to Gibeon, Joshua marched to the relief of his new allies and put the besiegers to flight. The five kings took refuge in a cave at Makkedah, whence they were taken and slain, their bodies hung on trees and then buried in the place of their concealment (Josh. x. 1-27). [Joshua.] [R. W. B.]

ADOPTION (*υιοθεσία*), an expression metaphorically used by St. Paul in reference to the present and prospective privileges of Christians (Rom. viii. 15, 23; Gal. iv. 5; Eph. i. 5). He probably alludes to the Roman custom of adoption, by which a person, not having children of his own, might adopt as his son one born of other parents. It was a formal act, effected either by the process named *adrogatio*, when the person to be adopted was in-

dependent of his parent, or by *adptio*, specifically so called, when in the power of his parent. (See *Dict. of Gr. and Rom. Ant.* at ADOPATIO.) The effect of it was that the adopted child was entitled to the name and *sacra privata* of his new father, and ranked as his heir-at-law: while the father on his part was entitled to the property of the son, and exercised towards him all the rights and privileges of a father. In short the relationship was to all intents and purposes the same as existed between a natural father and son. The selection of a person to be adopted implied a decided preference and love on the part of the adopter: and St. Paul aptly transfers the well known feelings and customs connected with the act to illustrate the position of the Christianized Jew or Gentile. The Jews themselves were unacquainted with the process of adoption: indeed it would have been inconsistent with the regulations of the Mosaic law affecting the inheritance of property: the instances occasionally adduced as referring to the custom (Gen. xv. 3, xvi. 2, xxv. 5-9) are evidently not cases of adoption proper. [W. L. B.]

ADORA or ADOR. [ADORATM.]

ADORATM (אֲדוֹרָתִים; *Adorai*; *Aduram*),

a fortified city built by Rehoboam (2 Chr. xi. 9), in Judah (Jos. *Ant.* viii. 10, § 1), apparently in or near the *Shefelah*, since, although omitted from the lists in Josh. xv. it is by Josephus (*Ant.* xii. 9, § 1, 15, § 4; *B. J.* i. 2, § 6, i. 8, § 4) almost uniformly coupled with Marashah, which was certainly situated there. For the dual termination compare Adithaim, Gederothaim, etc. By Josephus it is given as *Adorapa*, *Adōpeos*; and in *Ant.* xiii. 6, § 5, he calls it a "city of Idumaea," under which name were included, in the later times of Jewish history, the southern parts of Judaea itself (Rehob, 48; Robinson, ii. 69). Adoraim is probably the same place with *Adorapa* (1 Mac. xiii. 20), unless that be Dor, on the sea-coast below Carmel. Robinson identifies it with *Dura*, a "large village" on a rising ground west of Hebron (ii. 215). [G.]

ADOTAM. [ADONIRAM.]

ADORATION. The acts and postures by which the Hebrews expressed adoration, bear a great similarity to those still in use among Oriental nations. To rise up and suddenly prostrate the body, was the most simple method; but generally speaking, the prostration was conducted in a more formal manner, the person falling upon the knee and then gradually inclining the body, until the forehead touched the ground. The various expressions in Hebrew referring to this custom appear to have their specific meaning: thus נָפַל (נָפַל, LXX.) describes the sudden fall; כָּרַע (כָּרַע, LXX.) bending the knee; קָרַד (קָרַד, LXX.) the inclination of the head and body; and lastly שָׁחוּ (שָׁחוּ, LXX.) complete prostration: the term סָכַד (Is. xlv. 15, 17, 19, xlv. 6) was introduced at a late period as appropriate to the worship paid to idols by the Babylonians and other eastern nations (Dan. iii. 5, 6). Such prostration was usual in the worship

\* Even without this statement of Josephus, it is plain that "Judah and Benjamin," in 2 Chr. xi. 10, is a form of expression for the new kingdom, and that none of the towns named are necessarily in the limits of Benjamin proper.

of Jehovah (Gen. xvii. 3; Ps. xcv. 6); but it was by no means exclusively used for that purpose; it was the formal mode of receiving visitors (Gen. xviii. 2), of doing obeisance to one of superior station (2 Sam. xiv. 1), and of showing respect to equals (1 K. ii. 19). Occasionally it was repeated three times (1 Sam. xx. 41), and even seven times (Gen. xxxiii. 3). It was accompanied by such acts as a kiss (Ex. xviii. 7), laying hold of the knees or feet of the person to whom the adoration was paid (Matt. xxviii. 9), and kissing the ground on which he stood (Ps. lxxii. 9; Mic. vii. 17). Similar adoration was paid to idols (1 K. xix. 18); sometimes however prostration was omitted, and the act consisted simply in kissing the hand to the object of reverence (Job xxi. 27) in the manner practised by the Romans (Plin. xxviii. 5: see *Dict. of Ant. art.* ADORATIO), in kissing the statue itself (Hos. xiii. 2). The same customs prevailed at the time of our Saviour's ministry, as appears not only from the numerous occasions on which they were put in practice towards Himself, but also from the parable of the unmerciful servant (Matt. xviii. 26), and from Cornelius's reverence to St. Peter (Acts x. 25), in which case it was objected to by the Apostle, as implying a higher degree of superiority than he was entitled to, especially as coming from a Roman to whom prostration was not usual. [W. L. B.]

**ADRAMMELECH** (אֲדַרְמֶלֶךְ; Ἀδραμμελεχ; *Adrammelech*). 1. The name of an idol worshipped by the colonists introduced into Samaria from Sennacherib (2 K. xvii. 31). He was worshipped with rites resembling those of Molech, children being burnt in his honour. In Gesenius (*sub voce*) the word is explained to mean *splendour of the king*, being a contraction of אֲדָרְמֶלֶךְ. But Winer, quoting Rehd. *De vet. lingua Pers.* ix. interprets the first part of the word to mean *fire*, and so regards this deity as the Sun-god, in accordance with the astronomical character of the Chaldean and Persian worship. Sir H. Rawlinson also regards Adrammelech as the male power of the sun, and ΑΔΡΑΜΜΕΛΕΧ, who is mentioned with Adrammelech, as a companion-god, as the female power of the sun. (Rawlinson's *Herodotus*, i. p. 611.)

2. Son of the Assyrian king Sennacherib, whom he murdered in conjunction with his brother Sharras in the temple of Nisroch at Nineveh, after the failure of the Assyrian attack on Jerusalem. The paricides escaped into Armenia (2 K. xix. 36; 2 Chr. xxxii. 21; Is. xxxvii. 37). The date of this event was B.C. 700. [G. E. L. C.]

**ADRAMYTITIUM** (occasionally ΑΤΡΑΜΥΤΙΤΙΟΝ; and some cursive MSS. have Ἀτραμυτήνη, instead of Ἀδραμυτήνη in Acts xvii. 2), a seaport in the province of Asia [ASIA], situated in the district anciently called Aeolis, and also Mysia (see Acts xvi. 7). Adramyttium gave, and still gives its name to a deep gulf on this coast, opposite to the opening of which is the island of Lesbos [MYTILENE]. St. Paul was never at Adramyttium, except perhaps during his second missionary journey, on his way from Galatia to Troas (Acts xvi.), and it has no Biblical interest, except as illustrating his voyage from Caesarea in a ship belonging to this place (Acts xxvii. 2). The reason is given in what follows, viz. that the centurion and his prisoners would thus be brought to the coasts of Asia, and therefore some distance on their way towards Rome, to places where some other

ship bound for the west would probably be found. Ships of Adramyttium must have been frequent on this coast, for it was a place of considerable traffic. It lay on the great Roman road between Assos, Troas, and the Hellespont on one side, and Pergamus, Ephesus, and Miletus on the other, and was connected by similar roads with the interior of the country. According to tradition Adramyttium was a settlement of the Lydians in the time of Croesus: it was afterwards an Athenian colony: under the kingdom of Pergamus it became a seaport of some consequence; and in the time of St. Paul Pliny mentions it as a Roman assize-town. The modern *Adramyti* is a poor village, but it is still a place of some trade and shipbuilding. It is described in the travels of Pococke, Turner, and Fellows. It is hardly worth while to notice the mistaken opinion of Grotius, Hammond, and others, that Hadrumetum on the coast of Africa is meant in this passage of the Acts. [J. S. H.]

**A'DRIA**, more properly A'DRIAS (δ' Ἀδρίας). It is important to fix the meaning of this word as used in Acts xvii. 27. The word seems to have been derived from the town of Adria, near the Po; and at first it denoted that part of the gulf of Venice which is in that neighbourhood. Afterwards the signification of the name was extended, so as to embrace the whole of that gulf. Subsequently it obtained a much wider extension, and in the apostolic age denoted that natural division of the Mediterranean, which Humboldt names the Sytic basin (see Acts xxvii. 17), and which had the coasts of Sicily, Italy, Greece, and Africa for its boundaries. This definition is explicitly given by almost a contemporary of St. Paul, the geographer Ptolemy, who also says that Crete is bounded on the west by Adrias. Later writers state that Malta divides the Adriatic sea from the Tyrrhenian sea, and the isthmus of Corinth, the Aegean from the Adriatic. Thus the ship in which Josephus started for Italy about the time of St. Paul's voyage, founded in Adrias (*Life*, 3), and there he was picked up by a ship from Cyrene and taken to Puteoli (see Acts xxvii. 13). It is through ignorance of these facts, or through the want of attending to them, that writers have drawn an argument from this geographical term in favour of the false view which places the Apostle's shipwreck in the Gulf of Venice. [MELITA.] (*Smith's Voy. and Shipwreck of St. Paul. Diss. on the Island Melita.*) [J. S. H.]

**A'DRIEL** (אֲדַרְיֶל; Ἀδριάλ; *Hadriel*), a son of Bazillai the Moholathite, to whom Saul gave his daughter Merab, although he had previously promised her to David (1 Sam. xvii. 19). His five sons were amongst the seven descendants of Saul whom David surrendered to the Gibeonites (2 Sam. xvi. 9) in satisfaction for the endeavours of Saul to extirpate them, although the Israelites had originally made a league with them (Josh. ix. 15). In 2 Sam. xvi. they are called the sons of Michal; but as Michal had no children (2 Sam. vi. 23), the A. V. in order to surmount the difficulty, erroneously translates אֲדַרְיֶל, "brought up" instead of "bare." This accords with the opinion of the Targum and Jewish authorities. The magik also gives "the sister of Michal" for "Michal." Probably the error is due to some early transcriber. [R. W. B.]

**A'DUEL** (Ἀδουήλ, i. e. אֲדַוְיֶל, 1 Chr. iv. 36

(Ἰεδὶθάλ); ix. 12 (Ἀδὲθαλ), the ornament of God), Tob. i. 1. [B. F. W.]

**ADULLAM**, Αποερ. ΟΔΟΛΛΑΜ, (Ὠδύτη, Ὀδολλὰμ), a city of Judah in the low land of the Shefelah, Josh. xv. 35 (comp. Gen. xxxviii. 1, "Judah uenit dōren," and Micah i. 15, where it is named with Mareshah and Achab); the seat of a Canaanite king (Josh. xii. 15), and evidently a place of great antiquity (Gen. xxxviii. 1, 12, 20). Fortified by Rehoboam (2 Chron. xi. 7), one of the towns re-occupied by the Jews after their return from Babylon (Neh. vi. 30), and still a city ('Ο. πόλις) in the times of the Maccabees (2 Mac. xii. 38).

The site of Adullam has not yet been identified, but from the mention of it in the passages quoted above in proximity with other known towns of the Shefelah, it is likely that it was near *Deir Dubbân*, 5 or 6 miles N. of Eleutheropolis. (By Eusebius and Jerome) and apparently by the LXX. it is confounded with ΕΙΛΩΝ; see that name.) The limestone cliffs of the whole of that locality are pierced with extensive excavations (Robinson, ii. 23, 51-53), some one of which is doubtless the "cave of Adullam," the refuge of David (1 Sam. xxi. 1; 2 Sam. xvi. 13; 1 Chr. xi. 15; Stanley, *S. and P.* 259). Monastic tradition places the cave at *Khûrêitân*, at the south end of the *Wady Urtâ*, between Bethlehem and the Dead Sea (Robinson, i. 481). [G.]

**ADULTERY.** The parties to this crime were a married woman and a man who was not her husband. The toleration of polygamy, needless to say, rendered it nearly impossible to make criminal a similar offence committed by a married man with a woman not his wife. In the patriarchal period the sanctity of marriage is noticeable from the history of Abraham, who fears, not that his wife will be seduced from him, but that he may be killed for her sake, and especially from the scruples ascribed to Pharaoh and Abimelech (Gen. vi. xx.). The woman's punishment was, as commonly among eastern nations, no doubt capital, and probably, as in the case of Tamar's incestuousity, death by fire (xxxviii. 24). The Mosaic penalty was that both the guilty parties should be stoned, and it applied as well to the betrothed as to the married woman, provided she were free (Deut. xxi. 22-24). A bondswoman so offending was to be scourged, and the man was to make a trespass offering (Lev. xix. 20-22).

The system of inheritances, on which the polity of Moses was based, was threatened with confusion by the doubtful offspring caused by this crime, and thus secured popular sympathy on the side of morality until a far advanced stage of corruption was reached. Yet from stoning being made the penalty we may suppose that the exclusion of private revenge was intended. It is probable that, when that territorial basis of polity passed away—as it did after the captivity—and when, owing to Gentile example, the marriage tie became a looser bond of union, public feeling in regard to adultery changed, and the penalty of death was seldom or never inflicted. Thus in the case of the woman brought under our Lord's notice (John viii.), it is likely that no one then thought of stoning her in fact, but there remained the written law ready for the purpose of the enervator. It is likely also that a divorce in which the adulteress lost her dower and rights of maintenance, &c. (Gemaia Chethuboth, esp. vii. 6), was the usual remedy suggested by a wish to avoid scandal and the excitement of commiseration

for crime. The word *παράδερματίζαι* (Matt. i. 19), probably means to bring the case before the local Sanhedrim, which was the usual course, but which Joseph did not propose to take, preferring reputation (Buxtorf, *de Spons. et Divort.* iii. 1-4), because that could be managed privately (*λῆθρα*).

Concerning the famous trial by the waters of jealousy (Num. v. 11-29), it has been questioned whether a husband was in case of certain facts bound to adopt it. The more likely view is, that it was meant as a relief to the vehemence of implacable jealousy to which Orientals appear prone, but which was not consistent with the laxity of the nuptial tie prevalent in the period of the New Testament. The ancient strictness of that tie gave room for a more intense feeling, and in that intensity probably arose this strange custom, which no doubt Moses found prevailing and deeply seated; and which is said to be paralleled by a form of ordeal called the "red water" in Western Africa (Kittó, *Cyclop.* s. r.). The forms of Hebrew justice all tended to limit the application of this test. 1. By prescribing certain facts presumptive of guilt, to be established on oath by two witnesses, or a preponderating but not conclusive testimony to the fact of the woman's adultery. 2. By technical rules of evidence which made proof of those presumptive facts difficult (Sotah, vi. 2-5). 3. By exempting certain large classes of women (all indeed, except a pure Israelite married to a pure Israelite, and some even of them) from the liability. 4. By providing that the trial could only be before the great Sanhedrim (Sotah, i. 4). 5. By investing it with a ceremonial at once humiliating and intimidating, yet which still harmonised with the spirit of the whole ordeal as recorded in Num. v.; but 6. Above all, by the conventional and even mercenary light in which the nuptial contract was latterly regarded.

When adultery ceased to be capital, as no doubt it did, and divorce became a matter of mere convenience, it would be absurd to suppose that this trial was continued. And when adultery became common, as the Jews themselves confess, it would have been impious to expect the miracle which it supposed. If ever the Sanhedrim were driven by force of circumstances to adopt this trial, no doubt every effort was used, nay, was prescribed (Sotah, i. 5, 6) to overawe the culprit and induce confession. Nay, even if she submitted to the trial and was really guilty, some rabbis held that the effect on her might be suspended for years through the merit of some good deed (Sotah, iii. 4-6). Besides, however, the intimidation of the woman, the man was likely to feel the public exposure of his suspicious odious and repulsive. Divorce was a ready and quiet remedy; and the only question was, whether the divorce should carry the dowry, and the property which she had brought; which was decided by the slight or grave character of the suspicions against her (Sotah, vi. 1, Gemaia Chethuboth, vii. 6; Ugel. *Uzor Heb.* c. vii.). If the husband were incapable through derangement, imprisonment, &c., of acting on his own behalf in the matter, the Sanhedrim proceeded in his name as concerned the dowry, but not as concerned the trial by the water of jealousy (Sotah, iv. 6). [H. H.]

**ADUM'MIM**, "THU GOING UP TO" or "OF" (מַעְלָה אֲדֻמִּים; πρόσβασις Ἀδαμμὶν; *ascensus* or *asensus Adummin*) = the "pass of the red;" one of the landmarks of the boundary of Benjamin, a

rising ground or pass "over against Gilgal," and "on the south side of the 'torrent'" (Jos. xv. 7, xviii. 17), which is the position still occupied by the road leading up from Jericho and the Jordan valley to Jerusalem (Rob. i. 558"), on the south face of the gorge of the *Wady Kelt*. Jerome (*Onom. Abomunim*) ascribes the name to the blood shed there by the robbers who infested the pass in his day, as they still (Stanley, 314, 424; Martineau, 481; Stewart) continue to infest it, as they did in the middle ages, when the order of Knights Templars arose out of an association for the guarding of this road, and as they did in the days of our Lord, of whose parable of the Good Samaritan this is the scene. But the name is doubtless of a date and significance far more remote, and is probably derived from some tribe of "red men" of the earliest inhabitants of the country (Stanley, 424, note). The suggestion of Keil that it refers to the "jüdischen Fäule des Felsen" is the conjecture of a man who has never been on the spot, the whole pass being of the whitest limestone. [G.]

**AEDIAS** (*Ἀιδίās; Helias*), 1 Esdr. ix. 27. Probably a corruption of ELIAH.

**ÆGYPT**. [ÆGYPT.]

**ÆNEAS** (*Ἀλνέας; Arneus*), a paralytic at Lydda, healed by St. Peter (Acts ix. 33, 34).

**ÆNON** (*Αἰνών; Ainon*), a place "near to Salim," at which John baptized (John iii. 23). It was evidently west of the Jordan (comp. iii. 22, with 26, and with i. 28), and abounded in water. This is indicated by the name, which is merely a Greek version of the Chaldee ܐܝܢܐ = "springs." Aenon is given in the *Onomasticon* as 8 miles south of Scythopolis, "juxta Salem et Jordanem." Dr. Robinson's most careful search, on his second visit, however, failed to discover any trace of either name or remains in that locality (ii. 533). But a *Salim* has been found by him to the east of and close to *Nābulus*, where there are two very copious springs (ii. 279; iii. 298). This position agrees with the requirements of Gen. xxiii. 18. [SALEM.] In favour of its distance from the Jordan is the consideration that, if close by the river, the Evangelist would hardly have drawn attention to the "much water" there.

The latest writer on Jerusalem, Dr. Barclay (1858), reports the discovery of Aenon at *Wady Farah*, a secluded valley about 5 miles to the N.E. of Jerusalem, running into the great *Wady Fawar* immediately above Jericho. The grounds of this novel identification are the very copious springs and pools in which *W. Farah* abounds, and also the presence of the name *Selam* or *Seleim*, the appellation of another *Wady* close by. But it requires more examination than it has yet received. (Barclay, *City of the Great King*, 558-570.) See the curious speculations of Lightfoot (*Cent. Choring.* 1, 2, 3, 4). [G.]

**ÆRA**. [CHRONOLOGY.]

**ÆTHIOPIA**. [ETHIOPIA.]

**AFFINITY**. [MARRIAGE.]

**ἈΓΓΑΒΑ** (*Ἀγκαβά; Aggab*), 1 Esdr. v. 20. [HAGAB.]

**ἈΓΑΒΟΣ** (*Ἀγαβος*), a Christian prophet in the apostolic age, mentioned in Acts xi. 28 and

\* Robinson's words, "On the south side . . . . above," are the more remarkable, because the identity of the place with the Masleli-Adumim does not seem to have occurred to him.

xxi. 10. The same person must be meant in both places; for not only the name, but the office (*προφήτης*) and residence (*ἀπὸ τῆς Ἰουδαίας*), are the same in both instances. He predicted (Acts xi. 28) that a famine would take place in the reign of Claudius "throughout all the world" (*ἐφ' ὅλην τὴν οἰκουμένην*). This expression may take a narrower or a wider sense, either of which confirms the prediction. As Greek and Roman writers used *ἡ οἰκουμένη* of the Greek and the Roman world, so a Jewish writer could use it naturally of the Jewish world or Palestine. Ancient writers give no account of any universal famine in the reign of Claudius, but they speak of several local famines which were severe in particular countries. Josephus (*Ant.* xx. 2, §6; ib. 5, §2) mentions one which prevailed at that time in Judaea, and swept away many of the inhabitants. Helena, queen of Adiabene, a Jewish proselyte who was then at Jerusalem, imported provisions from Egypt and Cyprus, which she distributed among the people to save them from starvation. This, in all probability, is the famine to which Agabus refers in Acts xi. 28. The chronology admits of this supposition. According to Josephus, the famine which he describes took place when Cuspius Fadus and Tiberius Alexander were procurators; i. e. as Lardner suggests, it may have begun about the close of A.D. 44, and lasted three or four years. Fadus was sent into Judaea on the death of Agrippa, which occurred in August of the year A.D. 44. If we attach the wider sense to *οἰκουμένην*, the prediction may import that a famine should take place throughout the Roman empire during the reign of Claudius (the year is not specified), and not that it should prevail in all parts at the same time. We find mention of three other famines during the reign of Claudius: one in Greece (Euseb. *Chron.* i. 79), and two in Rome (Dion. Cass. ix. 11; Tac. *Ann.* xii. 43).

The name Agabus is variously derived: by Drusius, from אָגַב, a *loot*; by Grotius, from אָגַב, *he looted*: which latter Witius and Wolf also adopt. See the *Curæ Philologicæ* of the latter, vol. ii. p. 1167. Wiener refers to a dissertation by M. Walch, *De Agabo voce*, in his *Dissert. ad Act. Ap.* ii. 131 ff. There is an extended notice of the incidents in which he appears in Baumgarten, *Apostel-geschichte*, i. pp. 270 ff. and ii. pp. 113 f.

**ἈΓΑΓ** (אָגָג, from an Arabic root "to burn," *Go-en*; \**Agady* and *Gagy*; *Agay*), possibly the title of the kings of Amalek, like Pharaoh of Egypt. One king of this name is mentioned in Num. xix. 7, and another in 1 Sam. xv. 8, 9, 20, 32. The latter was the king of the Amalekites, whom Saul spared together with the best of the spoil, although it was the well-known will of Jehovah that the Amalekites should be extirpated (Ex. xvii. 14; Deut. xvi. 17). For this act of disobedience Samuel was commissioned to declare to Saul his rejection, and he himself sent for Agag and cut him in pieces. [SAMUEL.]

Haman is called the AGAGITE in Esther (*בוגגאים*, iii. 1, 10, viii. 3, 5). The Jews consider Haman a descendant of Agag, the Amalekite, and hence account for the hatred with which he pursued their race (Joseph. *Ant.* xi. 6, §5; Targ. Esth.). [R. W. B.]

**AGAGITE**. [AGAG.]

**ἈΓΑΡ**. [HAGAR.]

**AGARENES** (*ὁ τοῦ Ἀγαρ; filii Agar*), Bar. iii. 23. [HAGAR.]

**AGATE**, a precious stone. The word occurs in the A. V. twice as the representative of the Heb. *Kaddak*, and twice as that of *Shebâ*. The derivation of *Kaddak* (כֶּדֶק) from כָּדַר, *ignem excessit, scintillavit*, implies the bright and sparkling character of the stone. From Is. lv. 12 we might infer that it was partially transparent, and from Ez. xxvii. 16, that it was imported from Syria to Tyre. In the former passage the LXX. render it *iaspis*, and the Vulgate *inspis*; but in the latter both versions keep the Hebrew word. Gesenius supposes it to be the ruby or carbuncle. *Shebâ* (שֶׁבַע) occurs in Ex. xxvii. 19 and xxxiv. 12. It is rendered by the LXX. ἀχάτης, and in the Vulg. *achates*, and may perhaps be the agate, though there is nothing in the meaning of the word to indicate the origin. It is usually derived from שָׁבַה, *captivum fecit*, but may possibly be connected with the proper name, שֶׁבַע, from whence the merchants brought all precious stones to the markets of Tyre (Comp. Braun, *de Vest. Sac. Inst. Heb.* ii. 15). The agate was the second stone on the third row of the breastplate of the High-priest. It is a semiprecious uncrystallised variety of quartz, found in parallel or concentric layers of various colours, and presenting different tints in the same specimen. [W. D.]

**AGE, OLD.** In early stages of civilization, when experience is the only source of practical knowledge, old age has its special value, and consequently its special honours. The Spartans, the Athenians, and the Romans were particular in showing respect to the aged, and the Egyptians had a regulation which has its exact parallel in the Bible (Lev. ii. 80; Lev. xix. 32). Under a patriarchal form of government such a feeling was still more deeply implanted. A further motive was superadded in the case of the Jew, who was taught to consider old age as a reward for piety, and a signal token of God's favour. For these reasons the aged occupied a prominent place in the social and political system of the Jews. In *private* life they were looked up to as the depositaries of knowledge (Job xv. 10): the young were ordered to rise up in their presence (Lev. xix. 32): they allowed them to give their opinion first (Job xxiii. 4): they were taught to regard grey hairs as a "crown of glory" and as the "beauty of old men" (Prov. xvi. 31, xv. 29). The attainment of old age was regarded as a special blessing (Job v. 26), not only on account of the prolonged enjoyment of life to the individual, but also because it indicated peaceful and prosperous times (Zech. viii. 4; 1 Mac. xiv. 9; Is. lxx. 20). In *public* affairs age carried weight with it, especially in the infancy of the state: it formed under Moses the main qualification of those who acted as the representatives of the people in all matters of difficulty and deliberation. The old men or Elders thus became a class, and the title gradually ceased to convey the notion of age, and was used in an official sense, like *Patres*, *Senatores*, and other similar terms. [Elders.] Still it would be but natural that such an office was generally held by men of advanced age (1 K. xii. 8). [W. L. B.]

**AG'EE** (אָגֵי; \**Asa*, \**Agod*; *Aje*), name of a man (2 Sam. xxiii. 11).

**AGGE'US** (Ἀγχαῖος; *Aggeus*). [HAGGAI.]

**AGRI'OLTURE.** This, though prominent in the Scriptural narrative concerning Adam, Cain,

and Noah, was little cared for by the patriarchs; more so, however, by Isaac and Jacob than by Abraham (Gen. xxvi. 12, xxvii. 7), in whose time, probably, if we except the lower Jordan valley (xiii. 10), there was little regular culture in Canaan. Thus Gedar and Shechem seem to have been cities where pastoral wealth predominated. The herdsmen strove with Isaac about his wells; about his crop there was no contention (xx. 14, xxiv. 28). In Joshua's time, as shown by the story of the 'Eshcol' (Numb. xiii. 23-4), Canaan was found in a much more advanced agricultural state than Jacob had left it in (Dent. viii. 8), resulting probably from the severe experience of famines, and the example of Egypt, to which its people were thus led. The pastoral life was the means of keeping the sacred race, whilst yet a family, distinct from mixture and locally unattached, especially whilst in Egypt. When, grown into a nation, they conquered their future seats, agriculture supplied a similar check on the foreign intercourse and speedily demoralisation, especially as regards idolatry, which commerce would have caused. Thus agriculture became the basis of the Mosaic commonwealth (Michaels, xxvii.-xli.). It tended to check also the freebooting and nomad life, and made a numerous offspring profitable, as it was already honourable by natural sentiment and by law. Thus, too, it indirectly discouraged slavery, or, where it existed, made the slave somewhat like a son, though it made the son also somewhat of a slave. Taken in connexion with the inalienable character of inheritances, it gave each man and each family a stake in the soil and nurtured a hardy patriotism. "The Rud is Mine" (Lev. xxv. 23) was a dictum which made agriculture likewise the basis of the theocratic relation. Thus every family fit its own life with intense keenness, and had its divine tenure which it was to guard from alienation. The prohibition of culture in the sabbatical year formed, under this aspect, a kind of rent reserved by the Divine Owner. Landmarks were deemed sacred (Dent. xix. 14), and the inalienability of the heritage was ensured by its reversion to the owner in the year of jubilee; so that only so many years of occupancy could be sold (Lev. xxv. 8-16, 23-35). The prophet Isaiah (v. 8) denounces the contempt of such restrictions by wealthy grandees who sought to "add field to field," erasing families and depopulating districts.

A change in the climate of Palestine, caused by increase of population and the clearance of trees, must have taken place before the period of the N. T. A further change caused by the decrease of skilled agricultural labour, e.g. in irrigation and terrace-making, has since ensued. Not only this, but the great variety of elevation and local character in so small a compass of country necessitates a partial and guarded application of general remarks (Robinson, i. 507, 553, 554, iii. 595; Stanley, *S. & P.* 119, 124-6). Yet wherever industry is secure, the soil still asserts its old fertility. The *Haurân* (Peraen) is as fertile as Damascus, and its bread enjoys the highest reputation. The black and fat, but light, soil about Gaza is said to hold so much moisture as to be very fertile with little rain. Here, as in the neighbourhood of *Bejrût*, is a vast olive-ground, and the very sand of the shore is said to be fertile if watered. The Israelites probably found in Canaan a fair proportion of woodland, which their necessities, owing to the discouragement of commerce,

must have led them to reduce (Josh. xvii. 18). But even in early times timber seems to have been far less used for building material than among western nations; the Israelites were not skilful hewers, and imported both the timber and the workmen (1 K. v. 6, 8). No store of wood-fuel seems to have been kept; ovens were heated with such things as dung and hay (Ez. iv. 12, 15; Mal. iv. 13); and, in any case of scarcity on an emergency, some, as we should think, unusual source of supply is constantly mentioned for the wood (1 Sam. vi. 14; 2 Sam. xiv. 23; 1 K. xix. 21; comp. Gen. xii. 3, 6, 7). All this indicates a non-abundance of timber.

Its plenty of water from natural sources made Canaan a contrast to rainless Egypt (Deut. viii. 7, 10-12). Nor was the peculiar Egyptian method alluded to in Deut. xi. 10 unknown, though less prevalent in Palestine. That peculiarity seems to have consisted in making in the fields square shallow beds, like our salt-pans, surrounded by a raised border of earth to keep in the water, which was then turned from one square to another by pushing aside the mud to open one and close the next with the foot. A very similar method is apparently described by Robinson as used, especially for garden vegetables, in Palestine. There irrigation (including under the term all appliances for making the water available) was as essential as drainage in our region; and for this the large extent of rocky surface, easily excavated for cisterns and ditches, was most useful. Even the plain of Jericho is watered not by canals from the Jordan, since the river lies below the land, but by hills converging from the mountains. In these features of the country lay its expansive resources to meet the wants of a multiplying population. The lightness of agricultural labour in the plains set free an abundance of hands for the task of tanning and watering; and the result gave the highest stimulus to industry.

The cereal crops of constant mention are wheat and barley, and more rarely rye and millet (?). Of the two former, together with the vine, olive, and fig, the use of irrigation, the plough and the harrow, mention is found in the book of Job (xxi. 40; xv. 33; xxiv. 6; xxix. 9; xxxiv. 10). Two kinds of vetchin (the black variety called "hitches," Is. xxxiii. 27), and such potted plants as beans and lentiles, may be named among the staple produce. To these, later writers add a great variety of garden plants, *e.g.*, kidney-beans, peas, lettuce, endive, leek, garlic, onion, melon, cucumber, cabbage, &c. (*Mishna, Celam.* l. 1, 2). The produce which formed Jacob's present was of such kinds as would keep, and had kept during the famine (Gen. xliii. 11).

The Jewish calendar, as fixed by the three great festivals, turned on the seasons of green, ripe, and fully-gathered produce. Hence, if the season was backward, or, owing to the imperfections of a non-astronomical reckoning, seemed to be so, a month was intercalated. This rule system was fondly retained long after mental progress and foreign intercourse placed a correct calendar within their power; so that notice of a *Ve'adar*, *i.e.*, second or intercalated Adar, on account of the lamb being not yet of paschal size, and the barley not forward enough for the *Abib* (green sheaf), was sent to the Jews of Babylon and Egypt (*Ugol. de Re Rust.* v. 22) early in the season.

The year ordinarily consisting of 12 months was divided into 6 agricultural periods as follows (*Tosaphota Tannith*, ch. 1):—

## AGRICULTURE

## I. SOWING TIME.

Tisri, latter half	$\left. \begin{array}{l} \text{beginning about} \\ \text{autumnal} \\ \text{equinox} \end{array} \right\}$	Early rain due.
Marchesvan .. .. .		
Kisleu, former half .. .. .		

## II. HARVEST TIME.

Kisleu, latter half.  
Tebeth.  
Shebeth, former half.

## III. COLD SEASON.

Shebeth, latter half .. .. .	$\left. \begin{array}{l} \text{beginning about} \\ \text{vernal equinox.} \\ \text{Barley green,} \\ \text{Passover.} \end{array} \right\}$	Latter rain due.
Adar .. .. .		
[Ve'adar] .. .. .		
Nisan, former half .. .. .		

## IV. HARVEST TIME.

Nisan, latter half .. .. .	$\left. \begin{array}{l} \text{beginning about} \\ \text{autumnal equinox.} \end{array} \right\}$	Early rain due.
Iyar.		
Sivan, former half .. .. .	$\left. \begin{array}{l} \text{Wheat ripe.} \\ \text{Pentecost.} \end{array} \right\}$	
Sivan, latter half		

## V. SUMMER.

Tammuz.  
Ab, former half.

## VI. SULTRY SEASON.

Ab, latter half.  
Ebul.  
Tishri, former half .. .. . Ingathering of fruits.

Thus the 6 months from mid Tisri to mid Nisan were mainly occupied with the process of cultivation, and the rest with the gathering of the fruits. Rain was commonly expected soon after the autumnal equinox or mid Tisri; and if by the first of Kisleu none had fallen, a fast was proclaimed (*Mishna, Tannith*, ch. 1). The common scriptural expressions of the "early" and the "latter rain" (Deut. xi. 14; Jer. v. 24; Hos. vi. 3; Zech. x. 1; Jam. v. 7) are scarcely confirmed by modern experience, the season of rains being unbroken (Robinson, i. 41, 429; in. 96), though perhaps the fall is more strongly marked at the beginning and the end of it. The consternation caused by the failure of the former rain is depicted in Joel ii. 1; and that prophet seems to promise that and the latter rain together "in the first month," *i.e.* Nisan (ii. 23). The ancient Hebrews had little notion of green or root-crops grown for fodder, nor was the long summer drought suitable for them. Barley supplied food both to man and beast, and the plant, called in Ez. iv. 9, "Millet," *דָּחַן*, *holcus dochin*, Linn. (Gesenius), was grazed while green, and its ripe grain made into bread. In the later period of more advanced irrigation the *תלתן*, "Fennigreek," occurs, also the *שֶׁמֶח*, a clover, apparently, given cut (*Peah*, v. 5). Mowing (*קָצַר*, Am. vi. 1; Ps. lxxii. 6) and hay-making were familiar processes, but the latter had no express word, *הַצִּיר* standing both for grass and hay, a token of a hot climate, where the grass may become hay as it stands.

The produce of the land, besides fruit from trees, was technically distinguished as *תְּבוּאָה*, including apparently all cereal plants, *קְשִׁיּוֹת* (*quicquid in silicis nascitur*, Buxt. *Lex.*), nearly equivalent to the Latin *legumen*, and *זְרַעוֹנִים* or *זְרַעוֹנֵי נִיחָה*, *semina hortensis* (since the former word alone was used also generically for all seed, including all else which was liable to tithe, for which purpose the

distinction seems to have existed. The plough probably was like the Egyptian, and the process of ploughing mostly very light, like that called *scarification* by the Romans ("Syria tenui sulco arat," Plin. xviii. 47), one yoke of oxen mostly sufficing to draw it. Such is still used in Asia Minor, and its parts are shown in the accompanying drawing: *a* is the pole to which the cross beam with yokes, *b*, is attached; *c*, the share; *d*, the handle; *e* represents three modes of aiming the share, and *f* is a goad with a scraper at the other

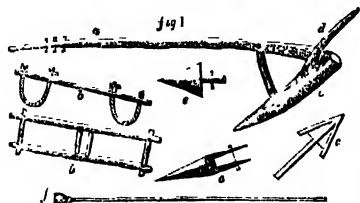

Fig. 1.—Plough, &c. as still used in Asia Minor.—(From Fellows's *Asia Minor*.)

end, probably for cleansing the share. Mountains and steep places were hoed (Is. vii. 5; Maimon. *ad*

*Mishn.* vi. 2; Robinson, iii. 595, 602-3). The breaking up of new land was performed as with the Romans *cerv. novo*. Such new ground and fallows, the use of which latter was familiar to the Jews (Jer. iv. 3; Hos. x. 12), were cleared of stones and of thorns (Is. v. 2; *Gemara Hierosol. ad loc.*) early in the year, sowing or gathering from "among thorns" being a proverb for slovenly husbandry (Job v. 5; Prov. xxiv. 30, 31; Robinson, ii. 127). Virgin land was ploughed a second time. The proper words are פָּתַח, *pre-*

*scindere*, and קָצַר, *offringere*, i. e., *iterate ut frumentum glacie chy cross ploughing*, Vail. *de R. R.* i. 32; both are distinctively used Is. xxviii. 24. Land already tilled was ploughed before the rains, that the moisture might the better penetrate (Maimon. ap. Ugol, *de Re Rust.* v. 11). Rain, however, or irrigation (Is. xxvii. 20) prepared the soil for the sowing, as may be inferred from the prohibition to irrigate till the gleaming was over, lest the poor should suffer (Peah, v. 3); and such sowing often took place *without* previous ploughing, the seed, as in the parable of the sower, being scattered broadcast, and ploughed in *afterwards*, the roots of the late crop being so far decayed as to

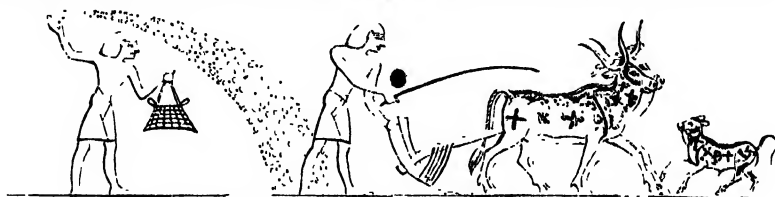

Fig. 2.—Egyptian ploughing and sowing.—(Will. Ross, *Tomb of the Kings*—*Picheu*.)

sow for manure (Fellows, *Asia Minor*, p. 72). The soil was then brushed over with a light harrow, often of thorn bushes. In highly irrigated spots

the seed was trampled in by cattle (Is. xxxii. 20) as in Egypt by goats (Wilkinson, i. p. 39, 2nd Ser.). Sometimes, however, the sowing was by patches only

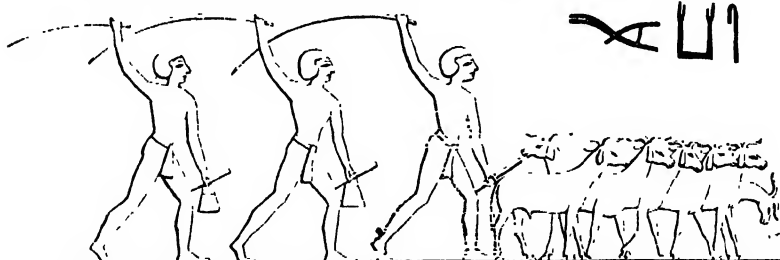

Fig. 3.—Goats treading in the grain, when sown in the field, after the water has subsided.—(Wilkinson, *Tombs*, near the Pyramids.)

in well manured spots, a process called מַנְכֹר, der. מָכַר, *manchus*, from its spotted appearance, as represented in the accompanying drawing by Surenhusius to illustrate the Mishna. Where the soil was

Fig. 4.—Corn growing in patches.—(Surenhusius.)

heavier, the ploughing was best done *chy* ("dum sicut tellure licet," Vng. *Georg.* i. 214; and there, though not generally, the *sarratio* (עָרַר, der. עָרַר, to cleanse), and even the *litatio* of Roman husbandry, performed with *tabulae* affixed to the sides of the share, might be useful. But the more formal routine of heavy western soils must not be made the standard of such a naturally fine tilth as that of Palestine generally. "Sunt enim regionum propria munera, sicut Aegypti et Africae, in quibus agricola post sementem aute messem segetem non attingit . . . in his autem locis ubi desideratur *sarratio*," &c. Columella, ii. 12. During the rains, if not too

heavy, or between their two periods, would be the best time for these operations; thus 70 days before the passover was the time prescribed for sowing for the "wave-sheaf," and, probably, therefore, for that of barley generally. The oxen were urged on by a goad like a spear (Judg. iii. 31). The custom of watching ripening crops and threshing floors against theft, or damage (Robinson, i. 490; ii. 18, 83, 99) is probably ancient. Thus Bona slept on the floor (Ruth iii. 4, 7). Barley ripened a week or two before wheat, and as fine harvest weather was certain (Prov. xvi. 1; 1 Sam. xii. 17; Am. iv. 7), the crop chiefly varied with the quantity of timely rain. The period of harvest must always have differed according to elevation, aspect, &c. (Robinson, i. 430, 551.) The proportion of harvest gathered to seed sown was often vast, a hundred-fold is mentioned, but in such a way as to signify that it was a limit rarely attained (Gen. xvi. 12; Matt. xiii. 8).

The rotation of crops, familiar to the Egyptians (Wilkinson, ii. p. 4), can hardly have been unknown to the Hebrews. Sowing a field with diverse seeds was forbidden (Deut. xxi. 9), and minute directions are given by the rabbis for arranging a seeded surface with great variety, yet avoiding

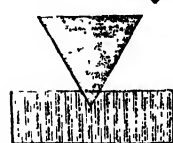

Fig. 7.—Sowing.—(Surenhusius.)

juxtaposition of *heterogenea*. Such arrangements are shown in the annexed drawings. Three fur-

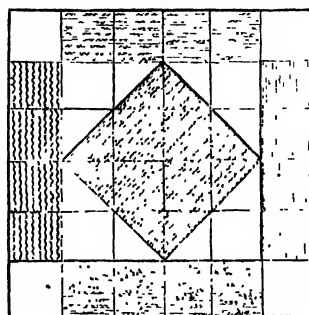

Fig. 8.—Sowing.—(Surenhusius.)

rows' interval was the prescribed margin (Celaum, ii. 6). The blank spaces in fig. 5, *a* and *b*, represent such margins, tapering to save ground. In a vineyard wide spaces were often left between the vines, for whose roots a radius of 4 cubits was allowed, and the rest of the space cropped: so herb-gardens stood in the midst of vineyards (Pesh. v. 5). Fig. 9 shows a corn-field with olives about and amidst it.

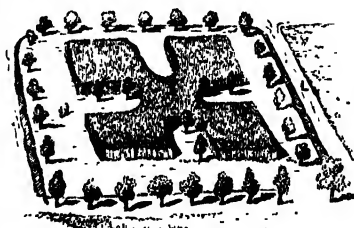

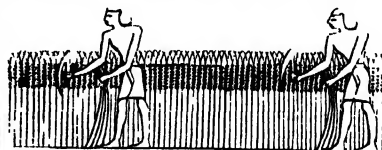

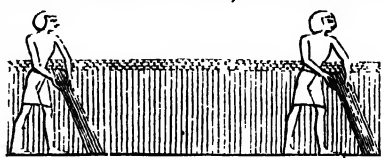

Fig. 9.—(corn-field with Olives.—Surenhusius.)

The wheat, &c., was reaped by the sickle (the word for which is *קַרְקַשׁ* in Deut., and *קַנָּה* in Jer. and Joel), either the ears merely, in the "Piconian" method (Varr. *de Re Rust.* i. 50), or stalk and all, or it was pulled by the roots (Pesh. v. 10). It

Fig. 10.—Reaping wheat.—(Wilkinson, *Tombes of the Ku-gi—Thebes.*)

was bound in sheaves—a process prominent in Scripture, and described by a peculiar word, *עָמַד*—or

Fig. 11.—Pulling up the corn by the roots.—(Wilkinson, *ad supra.*)

heaped, לקובעות, in the form of a helmet, לכומסאות of a turban (of which, however, see another explanation, Buxt. *Lex.* s. v. פנימסות), or לחררה of a cake. The sheaves or heaps were

Fig. 12 - Reaping (Sargonian.)

cast (Am. ii. 13) to the floor—a circular spot of hard ground, probably, as now, from 50 to 80 or 100 feet in diameter. Such floors were probably permanent, and became well known spots (Gen. i. 10, 11; 2 Sam. xiv. 16, 18). On these the oxen, &c., fo. bidden to be muzzled (Deut. xiv. 4), tramped out

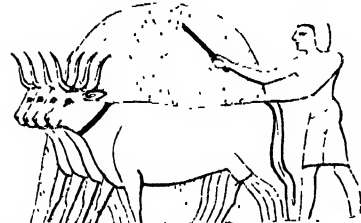

Fig. 13 - Threshing-floor. The oxen driven round the heap; contriv. to the threshing-stone. (Wilkinson, *Thales*.)

the grain, as we find represented in the Egyptian monuments. At a later time the Jews used a threshing sledge called *Monef* (Is. xl. 15; 2 Sam. xiv. 22; 1 Chr. xxi. 27), probably resembling the *novef*, still employed in Egypt (Wilkinson, ii. p. 190) a sledge with three rollers ridged with iron, which, aided by the driver's weight, crushed out, often injuring the grain, as well as cut out the straw, which thus became fit for fodder. It appears to have been similar to the Roman *tribulum* and the *plouffellus* *Poenicum* (Nour. de R. i. 52). Lighter grains were beaten out with a stick (Is. xxviii. 27).

Bailey was sometimes soaked and then parched before treading out, which got rid of the pellicle of the grain. See further the *Antiquitates Triticæ*, Ughelli, vol. 29.

Fig. 14 - Threshing Instrument. (From Fellows's *Isis Mosaic*.)

The use of animal manure is proved frequent by such recurring expressions as "dung on the face of the earth, field," &c. (Is. lxxviii. 10; 2 K. ix. 37; Jer. vii. 2, &c.). A tabinu limits the quantity to three heaps of ten half-eas, or about 380 gallons, to each סאה ( $\frac{1}{3}$  of ephah of grain, Gesen.), and wishes the quantity in each heap, rather than their number, to be increased if the field be large (Schevith, cap. iii. 2). Nor was the great usefulness of sheep to the soil unrecognized (ibid. 4), though, owing to the general distinctness of the pastoral life, there was less scope for it. Vegetable ashes, burnt stubble, &c. were also used.

The "shovel" and "fan" (מזר and מורה), Is. xxx. 24, but their precise difference is very doubtful indicate the process of winnowing—a conspicuous part of ancient husbandry (Is. xxxv. 5; Job xxi. 18; Is. xlvii. 13), and important owing to the slovenly threshing. Evening was the favourite time (Ruth iii. 2) when there was mostly a breeze. The מורה (מורה, to scatter) = πρῶτον? (Matt. iii. 12; Hom. *Iliad*. xviii. 588), was perhaps a broad shovel which threw the grain up against the wind; while the מזר (akin to מר?) may have been a fork (still used in Palestine for the same purpose), or a broad basket in which it was tossed. The heap of produce rendered in rent was sometimes customarily so huge as to cover the כרת (Bava Metzia, iv. 2). This favours the latter view. So the πρῶτον was a corn-measure in Cyprus, and the δίσκρον =  $\frac{1}{2}$  a μέδωρες (Lubell and Scott, *Lex.* s. v. πρῶτον). The last process was the shaking in a sieve, כבקה, cribrium, to separate dirt and refuse (Am. ix. 9).

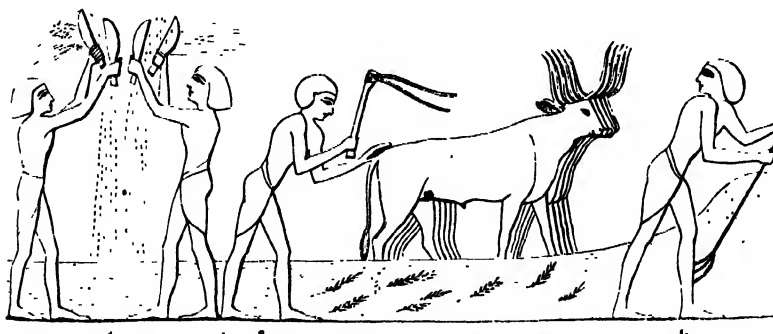

Fig. 15 - Treating out the grain by oxen, and winnowing. 1. Raking up the ears to the centre. 2. The driver 3. Winnowing with wooden shovels. (Wilkinson, *Thales*.)

Fields and floors were not commonly enclosed; vineyards mostly were, with a tower and other buildings (Num. xvii. 24; Ps. lxxx. 13; Is. v. 5; Matt. xvi. 33; comp. Jud. vi. 11). Ranks of mud from ditches were also used.

With regard to occupancy, a tenant might pay a fixed moneyed rent ('Ant. viii. 11)—in which case he was called **שוכר** (*shuker*)—which was compellable to keep the ground in good order; or a stipulated share of the fruits (2 Sam. ix. 10; Matt. xxi. 34), often a half or a third; but local custom was the only rule; in this case he was called **מקבל**, and was more protected, the owner sharing the loss of a short or spoil crop; so, in case of locusts, blight, &c., the year's rent was to be abated; or he might receive such share as a salary—an inferior position—when the term which described him was **חוכר**. It was forbidden to sow flax during a short occupancy (hence leases for terms of years would seem to have been common), lest the soil should be unduly exhausted (comp. *Georg.* i. 77). A prisoner might eat any quantity of corn or grapes, but not reap or carry off fruit (Deut. xxiii. 21-25; Matt. xii. 1).

The rights of the owner to be left, and of glean-  
ing (**COUENER**; **GLEANING**), formed the poor man's claim on the soil for support. For his benefit, too, a sheaf forgotten in carrying to the floor was to be left; so also with regard to the vineyard and the olive-grove (Lev. xix. 9, 10; Deut. xxiv. 19). Besides there seems a probability that every third year a second tithe, besides the priests', was paid for the poor (Deut. xiv. 28, xxvi. 12; Am. iv. 4; Tob. i. 7; Joseph. *Ant.* iv. 8). On this doubtful point of the poor man's tithe (**מעשר עני**) see a learned note by Surenhousius, ad Peah. viii. 2. These rights, in case two poor men were partners in occupancy, might be conveyed by each to the other for half the field, and thus retained between them (Maimon. ad Peah. v. 5). Sometimes a charitable owner declared his ground common, when its fruits, as those of the sabbatical year, went to the poor. For three years the fruit of newly-planted trees was deemed unencumbered and forbidden; in the 4th it was holy, as first-fruits; in the 5th it might be ordinarily eaten (*Mishna Ailah, passim*). For the various classical analogies, see *Dict. of Gr. and Rom. Antiq.* s. v. [H. H.]

### AGRIPPA. [HERON.]

A'GUR (**אָגוּר**, from **אָנַר**, to collect), an unknown Israelite sage, the author of the sayings contained in Prov. xxx. He is called the son of Jakoh, and addressed his advice to Daniel and Ucal. Jerome and Raschi consider this a symbolical name of Solomon himself. But this is inconsistent with the designation **בְּנֵי יַקֹּחַ**, son of Jakoh, since Solomon is described in the same book as **בְּנֵי דָוִד**, son of David. [R. W. B.]

A'HAB (**אֲחָאָב**; *Axāab*; *Achab*), son of Omri, seventh king of the separate kingdom of Israel, and second of his dynasty. The great lesson which we learn from his life is the depth of wickedness into which a weak man may fall, even though not devoid of good feelings and amiable impulses, when he abandons himself to the guidance of another person, resolute, unscrupulous, and depraved. The cause of his ruin was his marriage with Jezebel, daughter of Ethbaal, or Eithobal, king

of Tyre, who had been priest of Astarte, but had usurped the throne of his brother Phœlax (compare Joseph. *Ant.* viii. 13, 2, with *c. Apion.* i. 18). If she resembles the Lady Macbeth of our great dramatist, Ahab has hardly Macbeth's energy and determination, though he was probably by nature a better man. We have a comparatively full account of Ahab's reign, because it was distinguished by the ministry of the great prophet Elijah, who was brought into direct collision with Jezebel, when she ventured to introduce into Israel the impure worship of Baal and her father's goddess Astarte. In obedience to her wishes, Ahab caused a temple to be built to Baal in Samaria itself, and an oak-wood grove to be consecrated to Astarte. With a fixed determination to extirpate the true religion, Jezebel hunted down and put to death God's prophets, some of whom were concealed in caves by Obadiah, the governor of Ahab's house; while the Phœnician rites were carried on with such splendour, that we read of 450 prophets of Baal, and 400 of Asherah. (See 1 K. xviii. 19, where our version follows the LXX. in erroneously substituting "the groves" for the proper name Asherah, as again in 2 K. xxi. 7, xxi. 6.) [ASHURHUI.] How the worship of God was restored, and the idolatrous priests slain, in consequence of "a sore famine in Samaria," will be more properly related under the article ELIJAH. But heathenism and persecution were not the only crimes into which Jezebel led her yielding husband. One of his chief tastes was for splendid architecture, which he showed by building an ivory house and several cities, and also by ordering the restoration and fortification of Jericho, which seems to have belonged to Israel, and not to Judah, as it is said to have been rebuilt in the days of Ahab, rather than in those of the contemporary king of Judah, Jehoshaphat (1 K. xvi. 34). But the place in which he chiefly indulged this passion was the beautiful city of Jezreel (now *Zerin*), in the plain of Esdraelon, which he adorned with a palace and park for his own residence, though Samaria remained the capital of his kingdom, Jezreel standing in the same relation to it as the Versailles of the old French monarchy to Paris (Stanley, *S. & P.* 244). Desiring to add to his pleasure-grounds there the vineyard of his neighbour Naboth, he proposed to buy it or give land in exchange for it; and when this was refused by Naboth, in accordance with the Mosaic law, on the ground that the vineyard was "the inheritance of his fathers" (Lev. xxv. 23), a false accusation of blasphemy was brought against him, and not only was he himself stoned to death, but his sons also, as we learn from 2 K. ix. 26. Elijah, already the great vindicator of religion, now appeared as the asserter of morality, and declared that the entire extirpation of Ahab's house was the penalty appointed for his long course of wickedness, now crowned by this atrocious crime. The execution, however, of this sentence was delayed in consequence of Ahab's deep repentance. The remaining part of the first book of Kings is occupied by an account of the Syrian wars, which originally seems to have been contained in the last two chapters. It is much more natural to place the 20th chapter after the 21st, and so bring the whole history of these wars together, than to interrupt the narrative by interposing the story of Naboth between the 20th and 22nd, especially as the beginning of the 22nd seems to follow naturally from the end of the 20th. And this arrangement is actually found in the LXX. and confirmed by the narrative of Josephus.

We read of three campaigns which Ahab undertook against Benhadad II. king of Damascus, two defensive and one offensive. In the first, Benhadad laid siege to Samaria, and Ahab, encouraged by the patriotic counsels of God's prophets, who, next to the true religion, valued most deeply the independence of His chosen people, made a sudden attack on him whilst in the plenitude of arrogant confidence he was languishing in his tent with his 32 vassal kings. The Syrians were totally routed, and fled to Damascus.

Next year Benhadad, believing that his failure was owing to some peculiar power which the God of Israel exercised over the hills, invaded Israel by way of Aphek, on the E. of Jordan (Stauley, *S. & P. App.* §6). Yet Ahab's victory was so complete that Benhadad himself fell into his hands; but was released (contrary to the will of God as announced by a prophet) on condition of restoring all the cities of Israel which he held, and making "streets" for Ahab in Damascus; that is, admitting into his capital permanent Hebrew commissioners, in an independent position, with special dwellings for them and their retinues, to watch over the commercial and political interests of Ahab and his subjects. This was apparently in retaliation for a similar privilege exacted by Benhadad's predecessor from Omri in respect to Samaria. After this great success Ahab enjoyed peace for three years, and it is difficult to account exactly for the third outbreak of hostilities, which in Kings is laudably attributed to an attack made by Ahab on Ramoth in Gilead on the east of Jordan, in conjunction with Jeho-shaphat king of Judah, which town he claimed as belonging to Israel. But if Ramoth was one of the cities which Benhadad agreed to restore, why did Ahab wait for three years to enforce the fulfilment of the treaty? From this difficulty, and the extreme lateness shown by Benhadad against Ahab personally (1 K. xvii. 31), it seems probable that this was not the case (or at all events that the Syrians did not so understand the treaty), but that Ahab, now strengthened by Jeho-shaphat, who must have felt keenly the paramount importance of crippling the power of Syria, originated the war by assaulting Ramoth without any immediate provocation. In any case, God's blessing did not rest on the expedition, and Ahab was told by the prophet Mennah that it would fail, and that the prophets who advised it were hurrying him to his ruin. For giving this warning Micajah was imprisoned; but Ahab was so far roused by it as to take the precaution of disguising himself, so as not to offer a conspicuous mark to the archers of Benhadad. But he was slain by a "certain man who drew a bow at a venture," and though staid up in his chariot for a time, yet he died towards evening, and his army dispersed. When he was brought to be buried in Samaria, the dogs licked up his blood as a servant was washing his chariot; a partial fulfilment of Elijah's prediction (1 K. xvi. 19), which was more literally accomplished in the case of his son (2 K. ix. 26). Josephus, however, substitutes Jezreel for Samaria in the former passage (*Ant.* viii. 15, 6). The date of Ahab's accession is 919 B.C.; of his death, B.C. 897.

2. A lying prophet, who deceived the captive Israelites in Babylon, and was burnt to death by Nebuchadnezzar, Jer. xix. 21. [G. E. L. C.]

**AHAR'HEL** (אַהֲרֵל; ἀρελφός Ἠραχάβ; *Aharhel*), name of a man (1 Chr. iv. 8).

**AHILAS'AI** (אִילָאָסַי; *Ahuzi*), a man called JAH-ZERAH (יהֲזֵרָח) in 1 Chr. iv. 12. Gesenius conjectures that we should read Ahaziah (אֲחַזְיָה) in both passages.

**AIIASBAI** (אַיִסְבַּאי; Ἀισβαί; *Aisbai*), name of a man (2 Sam. xiii. 34).

**AHASUERUS** (אַחַשְׁוֵרֶשׁ; Ἀσασούρος, LXX., but Ἀσούρος, Tob. xiv. 15, A. V.; *Assuerus*, Vulg.), the name of one Median and two Persian kings mentioned in the Old Testament. It may be desirable to prefix to this article a chronological table of the Medo-Persian kings from Cyaxares to Artaxerxes Longimanus, according to their ordinary classical names. The Scriptural names conjectured to correspond to them in this article and ARFAXLERUS are added in italics.

1. Cyaxares, king of Media, son of Phriartēs, grandson of Deioceus and conqueror of Nineveh, began to reign B.C. 634. *Ahasuerus*.
2. Astyages his son, last king of Media, B.C. 594. *Darius the Mede*.
3. Cyrus, son of his daughter Mandane and Cambyses, a Persian noble, first king of Persia, 559. *Cyrus*.
4. Cambyses his son, 529. *Ahasuerus*.
5. A Magian usurper, who personates Smerdis, the younger son of Cyrus, 521. *Artaxerxes*.
6. Darius Hystaspis, raised to the throne on the overthrow of the Magi, 521. *Darius*.
7. Xerxes, his son, 485. *Ahasuerus*.
8. Artaxerxes Longimanus (Macrocheir), his son, 465-495. *Artaxerxes*.

The name Ahasuerus or Achashverosh is the same as the Sanscrit *Ashatru*, a king, which appears as *Ashershé* in the arrow-headed inscriptions of Persepolis, and to this in its Hebrew form **שֵׁר** prosthetic is prefixed (see Gibbs' Gesenius **שֵׁר**). This name in one of its Greek forms is *Xerxes*, explained by Herod. (vi. 98) to mean *ἀφής*, a signification sufficiently near that of *king*.

1. In Dan. iv. 1, Ahasuerus is said to be the father of Darius the Mede. Now it is almost certain that Cyaxares is a form of Ahasuerus, given into Axares with the prefix Cy- or Kai-, common to the Median dynasty of kings (Malcolm's *Persia*, ch. iii.), with which may be compared Kai Khosroo, the Persian name of Cyrus. The son of this Cyaxares was Astyages, and it is no improbable conjecture that Darius the Mede was Astyages, set over Babylon as viceroy by his grandson Cyrus, and allowed to live there in royal state. (See Rawlinson's *Herodotus*, vol. i. Essay iii. §11.) [DARIUS.] This first Ahasuerus, then, is Cyaxares, the conqueror of Nineveh. And in accordance with this view, we read in Tobit, xiv. 15, that Nineveh was taken by Nabuchodonosor and Assuerus, i. e. Cyaxares.

2. In Ezra iv. 6, the enemies of the Jews, after the death of Cyrus, desirous to frustrate the building of Jerusalem, send accusations against them to Ahasuerus king of Persia. This must be Cambyses. For we read (v. 5) that their opposition continued from the time of Cyrus to that of Darius, and Ahasuerus and Artaxerxes, i. e. Cambyses and the Pseudo-smerdis, are mentioned as reigning between them. [ARTAXERXES.] Xenophon (Cyr. viii.) calls the brother of Cambyses Tanyoxares, i. e. the younger Oxares, whence we infer that the elder Oxares or Axares, or Ahasuerus, was Cambyses. His constant wars probably prevented him from interfering in the

concerns of the Jews. He was plainly called after his grandfather, who was not of royal race, and therefore it is very likely that he also assumed the kingly name or title of Ahares or Cyaxares which had been borne by his most illustrious ancestor.

3. The third is the Ahasuerus of the book of Esther. It is needless to give more than the heads of the well-known story. Having divorced his queen Vashti for refusing to appear in public at a banquet, he married four years afterwards the Jewish Esther, cousin and ward of Mordecai. Five years after this, Haman, one of his counsellors, having been slighted by Mordecai, prevailed upon him to order the destruction of all the Jews in the empire. But before the day appointed for the massacre, Esther and Mordecai overthrew the influence which Haman had exercised, and so completely changed his feelings in the matter, that they induced him to put Haman to death, and to give the Jews the right of self-defence. This they used so vigorously, that they killed several thousands of their opponents. Now from the extent assigned to the Persian empire (Esth. i. 1), "from India even unto Ethiopia," it is proved that Darius Hystaspis is the earliest possible king to whom this history can apply, and it is hardly worth while to consider the claims of any after Artaxerxes Longimanus. But Ahasuerus cannot be identical with Darius, whose wives were the daughters of Cyrus and Dames, and who in name and character equally differs from that foolish tyrant. Neither can he be Artaxerxes Longimanus, although as Artaxerxes is a compound of Xerxes, there is less difficulty here as to the name. But in the first place the character of Artaxerxes, as given by Plutarch and by Diodorus (vi. 71), is also very unlike that of Ahasuerus. Besides this, in Ezra vii. 1-7, 11-26, Artaxerxes, in the seventh year of his reign, issues a decree very favourable to the Jews, and it is unlikely therefore that in the twelfth (Esth. iii. 7) Haman could speak to him of them as if he knew nothing about them, and persuade him to sentence them to an indiscriminate massacre. We are therefore reduced to the belief that Ahasuerus is Xerxes (the names being, as we have seen, identical); and this conclusion is fortified by the resemblance of character, and by certain chronological indications. Xerxes scourged the sea, and put to death the engineers of his bridge, because their work was injured by a storm, so Ahasuerus repudiated his queen Vashti because she would not violate the decorum of her sex, and ordered the massacre of the whole Jewish people to gratify the malice of Haman. In the third year of the reign of Xerxes was held an assembly to arrange the Grecian war (Herod. vii. 7 ff.). In the third year of Ahasuerus was held a great feast and assembly in Shushan the palace (Esth. i. 3). In the seventh year of his reign Xerxes returned defeated from Greece, and consoled himself by the pleasures of the harem (Herod. ix. 108). In the seventh year of his reign "fair young virgins were sought" for Ahasuerus, and he replaced Vashti by marrying Esther. The tribute he "laid upon the land and upon the isles of the sea" (Esth. x. 1) may well have been the result of the expenditure and ruin of the Grecian expedition. Throughout the book of Esther in the LXX, Ἀραξέρξης is written for Ahasuerus, but on this no argument of any weight can be founded. [G. E. L. G.]

AHA'VA (אֲחָוָה; ὁ Ἐὐλ, ὁ Ἀουέ; *Ahura*), a place (Ezr. viii. 15), or a river (יְהוֹנָדָה) (iii. 25), on the banks of which Ezra collected the second

expedition which returned with him from Babylon to Jerusalem. Various have been the conjectures as to its locality: e. g. Adaha (Leclerc and Mallet); Abeli or Aveh (Havermick, see Winer); the Great Zab (Rosenmüller, *Bib. Geogr.*). But the latest researches are in favour of its being the modern *Idi*, on the Euphrates, due east of Damascus, the name of which is known to have been in the post-biblical times *Ihi*, or *Ihi da-kin* (Talm. יְהִיא דְקִין), "the spring of bitumen." See Rawlinson's *Herodotus*, i. 316, note.

In the apocryphal *Esther* the name is given Θερδᾶς. Josephus (*Ant.* xi. 5, § 2) merely says εἰς τὸ πέραν τοῦ Εὐφράτου. [G.]

AHIAZ (אֲחִיָּז, *possessor*: Ἀχάδς, Joseph.; Ἀχάδης; *Achaz*), eleventh king of Judah, son of Jotham, ascended the throne in the 20th year of his age, according to 2 K. xvi. 2. But this must be a transcriber's error for the 24th, which number is found in one Hebrew MS., the LXX., the Peshito, and Arabic version of 2 Chr. xxviii. 1; for otherwise, his son Hezekiah was born when he was eleven years old (so Clinton, *Fasts Hall*, vol. i. p. 318). At the time of his accession, Rezin king of Damascus and Pekah king of Israel had recently formed a league against Judah, and they proceeded to lay siege to Jerusalem, intending to place on the throne Ben Tabeal, who was not a prince of the royal family of Judah, but probably a Syrian noble. Upon this the great Prophet Isaiah, full of zeal for God and patriotic loyalty to the house of David, listened to give advice and encouragement to Ahaz, and it was probably owing to the spirit of energy and religious devotion which he poured into his counsels, that the allies failed in their attack on Jerusalem. Thus much, together with anticipations of danger from the Assyrians, and a general picture of weakness and unfaithfulness both in the king and the people, we find in the famous prophecies of the 7th, 8th, and 9th chapters of Isaiah, in which he seeks to animate and support them by the promise of the Messiah. From 2 K. xvi. and 2 Chr. xxviii. we learn that the allies took a vast number of captives, who, however, were restored in virtue of the remonstrances of the prophet Obed; and that they also inflicted a most severe injury on Judah by the capture of Elath, a flourishing port on the Red Sea, in which, after expelling the Jews, they re-established the Edomites (according to the true reading of 2 K. xvi. 6, אֲדוֹמִים for אֲרָמִים), who

attacked and wasted the E. part of Judah, while the Philistines invaded the W. and S. The weak-minded and helpless Ahaz sought deliverance from these numerous troubles by appealing to Tiglath-pileser king of Assyria, who freed him from his most formidable enemies by invading Syria, taking Damascus, killing Rezin, and depriving Israel of its Northern and Transjordanic districts. But Ahaz had to purchase this help at a costly price: he became tributary to Tiglath-pileser, sent him all the treasures of the Temple and his own palace, and even appeared before him in Damascus as a vassal. He also ventured to seek for safety in heathen ceremonies; making his son pass through the fire to Moloch, consulting wizards and necromancers (Is. viii. 19), sacrificing to the Syrian gods, introducing a foreign altar from Damascus, and probably the worship of the heavenly bodies from Assyria and Babylon, as he would seem to have set up the horns of the sun mentioned in 2 K. xxi. 11 (cf. Tac. Ann.

xii, 13); and "the altars on the top (or roof) of the upper chamber of Ahaz" (2 K. xvi, 12) were connected with the adoration of the stars. We see another and blundersome result of this course with an astronomical people in the "Judicial of Ahaz," Is. xxxviii, 8. He died after a reign of 16 years, lasting B.C. 740-724. [G. E. L. C.]

**AHAZIAH** (אֲחִזְיָהוּ, *Ahaziah*, *sustains*; Ὀχοΐας; *Ochōzias*). 1. Son of Ahab and Jezebel, and eighth king of Israel. After the battle of Ramoth in Gilead [AHAB] the Syrians had the command of the country along the east of Jordan, and they cut off all communication between the Ismaelites and Moabites, so that the vassal king of Moab refused his yearly tribute of 100,000 lambs and 100,000 rams with their wool (comp. Is. xvi, 1). Before Ahaziah could take measures for enforcing his claim, he was seriously injured by a fall through a lattice in his palace at Samaria. In his health he had worshipped his mother's gods, and now he sent to inquire of the uncle of Baalzebub in the Phoenician city of Ekron whether he should recover his health. But Elijah, who now for the last time exercised the prophetic office, rebuked him for this impiety, and announced to him his approaching death. He reigned two years (B.C. 895, 895). The only other recorded transaction of his reign, his endeavour to join the king of Judah in trading to Ophir, is more fully related under JEKOSIAHAH (1 K. xvi, 50 ff.; 2 K. i; 2 Chr. xv, 35 ff.).

2. Fifth king of Judah, son of Jehoram and Athaliah, daughter of Ahab, and therefore nephew of the preceding Ahaziah. He is called Azariah, 2 Chr. xxii, 6, probably by a copyist's error, and Jehoahaz, 2 Chr. xxi, 17. Ewald (*Geschichte des Volkes Israel*, ii, p. 525) thinks that his name was changed to Ahaziah on his accession, but the LXX. read Ὀχοΐας for Jehoahaz, and with this agree the Peschito, Chaldei, and Arab. So too while in 2 K. viii, 26 we read that he was 22 years old at his accession, we find in 2 Chr. xxii, 2 that his age at that time was 42. The former number is certainly right, as in 2 Chr. xvi, 5, 20, we see that his father Jehoram was 40 when he died, which would make him younger than his own son, so that a transcriber must have confounded ככ (22) and כס (42). Ahaziah was an idolater, "walking in all the ways of the house of Ahab," and he allied himself with his uncle Jehoram king of Israel, brother and successor of the preceding Ahaziah, against Hazael, the new king of Syria. The two kings were, however, defeated at Ramoth, where Jehoram was so severely wounded that he retired to his mother's palace at Jezreel to be healed. The union between the uncle and nephew was so close that there was great danger lest heathenism should entirely overshadow both the Hebrew kingdoms, but this was prevented by the great revolution carried out in Israel by Jehu under the guidance of Elisha, which involved the house of David in calamities only less severe than those which exterminated the house of Omri. It broke out while Ahaziah was visiting his uncle at Jezreel. As Jehu approached the town, Jehoram and Ahaziah went out to meet him, either from not suspecting his designs, or to prevent them. The former was shot through the heart by Jehu, Ahaziah was pursued as far as the pass of Gur, near the city of Belem, and there mortally wounded. He died when he reached Megiddo. But in 2 Chr. xxii, 9, it is

said that he was found hidden in Samaria after the death of Jehoram, brought to Jehu, and killed by his orders. Attempts to reconcile these accounts may be found in Pole's *Synopsis*, in Lightfoot's *Harmon. of Old Test.* (in loc.), and in Davidson's *Text of the Old Testament*, part ii, book ii, ch. xiv. Ahaziah reigned one year, B.C. 884, called the 12th of Jehoram king of Israel, 2 K. viii, 25, the 11th, 2 K. ix, 29. His father therefore must have died before the 11th of Jehoram was concluded (Clinton, *Festi Hall.*, i, p. 324). [G. E. L. C.]

**AH'BAN** (אֲחָבָן; Ἀχαβάς; *Ahobban*), name of a man (1 Chr. ii, 29).

**AH'ER** (אֲחֵר; Ἀδρ; *Aher*), name of a man (1 Chr. vii, 12).

**A'HI** (אֲחִי, connected by LXX. and Vulg. with אֲחִי, *brother*, and hence translated in LXX. by ἀδελφός, and in Vulg. by fratres, in 1 Chr. v, 15; but in 1 Chr. vi, 34, we find Ἀχίρ, and *Ahi*; Gesen. thinks it a contraction of Ahijah, אֲחִיָּהוּ), name of two men (1 Chr. v, 15; vii, 34).

**AHI'AH.** [AHIAH.]

**AHI'AM** (אֲחִיָּאָם, for אֲחִיָּאָם; Gesen.; Ἀμυράν; *Aham*), son of Shinar the Hauranite (or of Sagar, 1 Chr. xi, 35), one of David's 30 mighty men (2 Sam. xxi, 33).

**AHI'AN** (אֲחִיָּאָן; Ἀτμ; *Ahin*), name of a man (1 Chr. vii, 19).

**AHI'ZER** (אֲחִיזֶר; Ἀχιζερ; *Ahizer*).

1. Son of Ammishaddai, hereditary chieftain of the tribe of Dan under the administration of Moses (Num. i, 12, ii, 25, vii, 66).

2. The Benjamite chief of a body of archers at the time of David (1 Chr. xii, 3). [R. W. B.]

**AHI'THUD** (אֲחִיטוּד; Ἀχίτω; *Ahitul*). 1. The son of Shelomi, and prince of the tribe of Asher, selected to assist Joshua and Eleazar in the division of the Promised Land (Num. xxiv, 27).

2. (אֲחִיטוּד; Ἰαχίχό; *Ahitul*), chieftain of the tribe of Benjamin (1 Chr. viii, 7). [R. W. B.]

**AHI'JAH**, or **AHI'AH** (אֲחִיָּהוּ and אֲחִיָּה; Ἀχιά; *Achias*). 1. Son of Ahitub, Ichabod's brother, the son of Phinehas, the son of Eli (1 Sam. xiv, 3, 18). He is described as being the Lord's priest in Shiloh, wearing an ephod. And it appears that the ark of God was under his care, and that he inquired of the Lord by means of it and the ephod (comp. 1 Chr. xiii, 3). There is, however, great difficulty in reconciling the statement in 1 Sam. xiv, 18, concerning the ark being used for inquiring by Ahijah at Saul's bidding, and the statement that they inquired not at the ark in the days of Saul, if we understand the latter expression in the strictest sense. This difficulty seems to have led to the reading in the Vatican copy of the LXX., of τὸ ἐφωδῶν, in 1 Sam. xiv, 18, instead of τὸν ἐφωδόν, or rather perhaps of אֲחִיָּה, instead of אֲחִיָּה, in the Hebrew codex from which that version was made. Others avoid the difficulty by interpreting אֲחִיָּה to mean a chest for carrying about

the ephod in. But all difficulty will disappear if we apply the expression only to all the latter years of the reign of Saul, when we know that the priestly establishment was at Nob, and not at Kirjath-jearim, or Beke of Judah, where the ark was. But the narrative in 1 Sam. xiv. is entirely favourable to the mention of the ark. For it appears that Saul was at the time in Gibeath of Benjamin, and Gibeath of Benjamin seems to have been the place where the house of Ahinadab was situated (2 Sam. vi. 3), being probably the Benjamite quarter of Kirjath-jearim, which lay on the very borders of Judah and Benjamin. (See Josh. xviii. 14, 28.) Whether it was the encroachments of the Philistines, or an incipient schism between the tribes of Benjamin and Judah, or any other cause, which led to the disuse of the ark during the latter years of Saul's reign, is difficult to say. But probably the last time that Ahijah inquired of the Lord before the ark was on the occasion related 1 Sam. xiv. 36, when Saul married his victory over the Philistines by his rash oath, which nearly cost Jonathan his life. For we then read that when Saul proposed a night-pursuit of the Philistines, the priest, Ahijah, said, Let us draw near hither unto God, for the purpose, namely, of asking counsel of God. But God returned no answer, in consequence, as it seems, of Saul's rash curse. If, as is commonly thought, and as seems most likely, Ahijah is the same person as Ahimelech the son of Ahitub, this failure to obtain an answer from the priest, followed as it was by a rising of the people to save Jonathan out of Saul's hands, may have led to an estrangement between the king and the high-priest, and predisposed him to suspect Ahimelech's loyalty, and to take that terrible revenge upon him for his favour to David. Such changes of name as Ahimelech and Ahijah are not uncommon. (See *Genealogies*, p. 115-118.) However it is not impossible that, as Gesenius supposes, Ahimelech may have been brother to Ahijah.

2. Son of Bela (1 Chr. vii. 7).

3. Son of Jehuaneel (1 Chr. ii. 25).

4. One of David's mighty men, a Pelouite (1 Chr. xi. 36).

5. A Levite in David's reign who was over the treasures of the house of God, and over the treasures of the dedicated things (1 Chr. xxvi. 20).

6. One of Solomon's princes, brother of Elihoreph, and son of Shisha (1 K. iv. 3).

7. A prophet of Shiloh (1 K. xiv. 2), hence called the Shilonite (xi. 29) in the days of Solomon and of Jeroboam king of Israel, of whom we have two remarkable prophecies extant: the one in 1 K. vi. 31-39, addressed to Jeroboam, announcing the rending of the ten tribes from Solomon, in punishment of his idolatries, and the transfer of the kingdom to Jeroboam: a prophecy which, though delivered privately, became known to Solomon, and excited his wrath against Jeroboam, who fled for his life into Egypt, to Shishak, and remained there till Solomon's death. The other prophecy, in 1 K. xiv. 6-16, was delivered in the prophet's extreme old age to Jeroboam's wife, in which he foretold the death of Ahijah, the king's son, who was sick, and to inquire concerning whom the queen was come in disguise, and then went on to denounce the destruction of Jeroboam's house on account of the images which

he had set up, and to foretell the captivity of Israel "beyond the river" Euphrates. These prophecies give us a high idea of the faithfulness and boldness of Ahimaa, and of the eminent rank which he attained as a prophet. Jeroboam's speech concerning him (1 K. xiv. 2, 3) shows the estimation in which he held his truth and prophetic powers. In 2 Chr. ix. 29 reference is made to a record of the events of Solomon's reign contained in the "prophecy of Ahijah the Shilonite." If there were a larger work of Ahijah's, the passage in 1 K. xi. is doubtless an extract from it.

8. Father of Baasha, king of Israel, the contemporary of Aza, king of Judah. He was of the tribe of Issachar (1 K. xv. 27, 33). [A. C. H.]

ΑΗΪΚΑΜ (Ἀχικὰμ; 'Achikam; *Ahican*), a son of Shaphan the scribe, an influential officer at the court of Josiah (2 K. xxi. 12), and of Jehoiakim his son (Jer. xvi. 21). When Shaphan brought the book of the law to Josiah, which Hilkiah the high priest had found in the temple, Ahikam was sent by the king, together with four other delegates, to consult Huldah the prophetess on the subject. In the reign of Jehoiakim, when the priests and prophets arranged Jeremiah before the princes of Judah on account of his bold denunciations of the national sins, Ahikam successfully used his influence to protect the prophet. His son Gedaliah was made governor of Judah by Nebuchadnezzar, the Chaldean king, and to his charge Jeremiah was entrusted when released from prison (Jer. xxxix. 14, xl. 5). [R. W. B.]

ΑΗΪΛΟΥΔ (Ἀχίλουδ; 'Achiloud; *Achimelech*; *Ahilud*), father of Jehoshaphat (2 Sam. viii. 16, xx. 24; 1 K. iv. 3; 1 Chr. xviii. 15).

ΑΗΪΜΑΑΖ (Ἀχίμας; 'Achimas; *Ahimas*).

1. Father of Saul's wife, Ahinoam (1 Sam. xiv. 50).

2. Son of Zadok, the priest in David's reign. When David fled from Jerusalem on account of Absalom's rebellion, Zadok and Abiathar, accompanied by their sons, Ahimaz and Jonathan, and the Levites, carried the ark of God forth, intending to accompany the king. But at his bidding they returned to the city, as did likewise Hushai the Archite. It was then arranged that Hushai should feign himself to be a friend of Absalom, and should tell Zadok and Abiathar whatever intelligence he could obtain in the palace. They, on their parts, were to forward the intelligence through Ahimaz and Jonathan. Accordingly Jonathan and Ahimaz stayed outside the walls of the city at En-Rogel, on the road towards the plain. A message soon came to them from Zadok and Abiathar through the maid-servant, to say that Ahithophel had counselled an immediate attack against David and his followers, and that, consequently, the king must cross the Jordan without the least delay. They started at once on their errand, but not without being suspected, for a lad seeing the wench speak to them, and seeing them immediately run off quickly—and Ahimaz, we know, was a practised runner—went and told Absalom, who ordered a hot pursuit. In the mean time, however, they had got as far as Bahurim, the very place where Shimei cursed David (2 Sam. xvi. 5), to the house of a steadfast partizan of David's. Here the woman of the house effectually hid them in a well in the court-yard, and covered the well's mouth with ground or bruised corn. Absalom's servants coming up

\* Where we have the further error of *Ahimelech* for *Ahimelech*.

searched for them in vain; and as soon as they were gone, and returned on the road to Jerusalem, Ahimaa and Jonathan hastened to David, and told him Abithophel's counsel, and David with his whole company crossed the Jordan that very night. Abithophel was so mortified at seeing the failure of his scheme, through the unwise delay in executing it, that he went home and hanged himself. This signal service rendered to David, at the hazard of his life, by Ahimaa, must have tended to ingratiate him with the king. We have a proof how highly he was esteemed by him, as well as an honourable testimony to his character, in the saying of David recorded 2 Sam. xviii. 27. For when the watchman announced the approach of a messenger, and added, that his running was like the running of Ahimaa, the son of Zadok, the king said, "He is a good man, and cometh with good tidings."

same transaction gives specimen of the manners of the times, and a singular instance of oriental or Jewish craft in Ahimaa. For we learn, first, that Ahimaa was a possessed runner—and a very swift one too—which one would hardly have expected in the son of the high-priest. It belongs, however, to a simple state of society that bodily powers of any kind should be highly valued, and exercised by the possessor of them in the most natural way. Ahimaa was probably naturally swift, and so became famous for his running (2 Sam. xviii. 27). So we are told of Asahel, Joab's brother, that "he was as light of foot as a wild doe" (2 Sam. ii. 18). And that quick running was not deemed inconsistent with the utmost dignity and gravity of character appears from what we read of Elijah the Tishbite, that "he girded up his loins and ran before Ahab (who was in his chariot) to the entrance of Jezreel" (1 K. xix. 26). The kings of Israel had running footmen to precede them when they went in their chariots (2 Sam. xv. 1; 1 K. i. 5), and then guards were called רָצִיץ, runners. It appears by 2 Chr. xxx. 6, 10, that in Hezekiah's reign there was an establishment of running messengers, who were also called רָצִיץ. The same name is given to the Persian posts in Esth. iii. 13, viii. 14; though it appears from the latter passage that in the time of Xerxes the service was performed with mules and camels. The Greek name, borrowed from the Persian, was ἄγγελος. As regards Ahimaa's craftiness we read that, when Absalom was killed by Joab and his armour-bearers, Ahimaa was very ingenuitous with Joab to be employed as the messenger to run and carry the tidings to David. The politic Joab, well knowing the king's fond partiality for Absalom, and that the news of his death would be anything but good news to him, and, apparently, having a friendly feeling towards Ahimaa, would not allow him to be the bearer of such tidings, but employed Cush instead. But after Cush had started, Ahimaa was so urgent with Joab to be allowed to run too that at length he extorted his consent. Taking a shorter or an easier way by the plain he managed to outstrip Cush before he got in sight of the watch-tower, and, arriving first, he reported to the king the good news of the victory, suppressing his knowledge of Absalom's death, and leaving to Cush the task of announcing it. He had thus the merit of bringing good tidings without the alloy of the disaster of the death of the king's son. This is

he last we hear of Ahimaa, for the Ahimaa of 1 K. iv. 15, who was Solomon's captain in Naphtali, was certainly a different person. There is no evidence, beyond the assertion of Josephus, that he ever filled the office of high-priest; and Josephus may have concluded that he did, merely because, in the genealogy of the high-priests (1 Chr. vi. 8, 9), he intervenes between Zadok and Azariah. Judging only from 1 K. iv. 2, compared with 1 Chr. vi. 10, we should conclude that Ahimaa died before his father Zadok, and that Zadok was succeeded by his grandson Azariah. Josephus's statement that Zadok was the first high-priest of Solomon's temple, seeing the temple was not finished till the eleventh year of his reign, is a highly improbable one in itself. The statement of the Seder Olam, which makes Ahimaa high-priest in Rehoboam's reign, is still more so. It is safer, therefore, to follow the indications of the Scripture narrative, though somewhat obscured by the apparently

el passages, 1 K. iv. 4, and 1 Chr. vi. 9, 10, and conclude that Ahimaa died before he attained the high-priesthood, leaving as his heir his son Azariah.

3. Solomon's officer in Naphtali, charged with providing victuals for the king and his household for one month in the year. He was probably of the tribe of Naphtali, and was the king's son-in-law, having married his daughter Basmath (1 K. iv. 7, 15). [A. C. H.]

AHUMAN (אֲחִימָן; Ἀχιμάν; Achiman).

1. One of the three giant Anakim who inhabited Mount Hebron (Num. xiii. 22, 33), slain by Caleb and the spies. The whole race were cut off by Joshua (Josh. xi. 21), and the three brothers were slain by the tribe of Judah (Judg. i. 10).

2. 1 Chr. ix. 17.

[R. W. B.]

AHIMELECH (אֲחִימֶלֶךְ; Ἀχιμέλεχ and Ἀβιμέλεχ; Achimelech). 1. Son of Ahitub (1 Sam. xvi. 12), and high-priest at Nob in the days of Saul. He gave David the show-bread to eat, and the sword of Goliath; and for so doing was, upon the accusation of Doeg the Edomite, put to death with his whole house by Saul's order. Eighty-five priests wearing an ephod were thus cruelly slaughtered; Abiathar alone escaped. [ABATHAR.] The LXX. read *three hundred and five men*, thus affording another instance of the frequent clerical errors in transcribing numbers, of which Ezer. ii. compared with Neh. vii. is a remarkable example. The interchange of אֲחִימֶלֶךְ, or אֲחִימָן, with אֲבִימֶלֶךְ, is very common. For the question of Ahimelech's identity with Ahijah, see AHIAH. \*For the singular confusion between Ahimelech and Abiathar in the 1st book of Chronicles, see ABATHAR.

2. One of David's companions while he was persecuted by Saul, a Hittite; called in the LXX. *Abimelech*; which is perhaps the right reading, after the analogy of Ahimelech, king of Ge' in (1 Sam. xxi. 6).

6). In the title of Ps. xxxiv. אֲחִימָן seems to be a corrupt reading for אֲבִימָן, אֲבִימֶלֶךְ. See 1 Sam. xxi. 13 (12, in A. V.). [A. C. H.]

AHIMOTH (אֲחִימוֹת; Ἀχιμόθ; Achimoth),

a Levite of the house of the Kohites, of the family of the Kohathites, apparently in the time of David (1 Chr. vi. 25). In ver. 35, for *Ahimoth* we find

*Makath* (מַכַּתְּ), *Madd*, as in Luke iii. 26. For a correction of these genealogies, see *Genealogies of our Lord and Saviour Jesus Christ*, p. 214, note. [A. C. H.]

**AHIN'ADAB** (אֲחִינָדָב; 'Αχιναδάβ; *Ahinadab*), son of Iddo, one of Solomon's twelve commissaries who supplied provisions for the royal household. The district entrusted to Ahinadab was that of Mahanaim, situated on the east of the Jordan (1 K. i. 14). [R. W. B.]

**AHIN'OAM** (אֲחִינוֹאִם; *brother of grace*; 'Αχινάμ; *Achinam*), a woman of Jezreel, whose masculine name may be compared with that of Abigail, *father of joy*. It was not uncommon to give women names compounded with בֵּן (*father*) and אָח (brother). Ahinoam was married to David during his wandering life (1 Sam. xxv. 43), lived with him and his other wife Abigail at the court of Achish (xxvii. 3), was taken prisoner with her by the Amalekites when they plundered Ziklag (xxx. 5), but was rescued by David (18). She is again mentioned as living with him when he was king of Judah in Hebron (2 Sam. ii. 2); and was the mother of his eldest son Amnon (iii. 2). [G. E. L. C.]

**AHIO** (אִיּוֹ; *oi adelphoi autou*; *Ahio*; 2 Sam. vi. 3, 4; *frater ejus*, 1 Chr. xiii. 7). 1. Son of Abinadab, who accompanied the ark when it was brought out of his father's house (2 Sam. vi. 3, 4; 1 Chr. xiii. 7). 2. (1 Chr. viii. 14). 3. (1 Chr. viii. 31, ix. 37).

**AHIRA** (אֲחִירָא; 'Αχίρ; *Ahiru*), chief of the tribe of Naphtali when Moses took the census in the year after the Exodus (Num. i. 15, ii. 29, vii. 78, 83, x. 27). [R. W. B.]

**AHIRAM** (אֲחִירָאִם; 'Αχίραμ; *Ahiram*), son of Benjamin (Num. xxvi. 38), called Eli in Gen. xlii. 21.

**AHIS'AMACH** (אֲחִישָׁמַח; 'Αχισαμάχ; *Achisamach*), name of a man (Ex. xxxi. 6, xxxv. 34, xxxviii. 23).

**AHISAPHAR** (אֲחִישָׁפָר; 'Αχισαφ; *Ahisaphar*), name of a man (1 Chr. vii. 10).

**AHISAPHAR** (אֲחִישָׁפָר; 'Αχισαφ; *Ahisaph*), the controller of Solomon's household (1 K. iv. 6).

**AHITHOPHEL** (אֲחִיטוֹפֶל; 'Αχίτοφελ; *Joseph*, 'Αχίτοφελος; *Achitophel*), a native of Giloh, in the hill country of Judah (Josh. xv. 51), and privy councillor of David, whose wisdom was so highly esteemed, that his advice had the authority of a divine oracle, though his name had an exactly opposite signification (2 Sam. xvi. 24). He was the grandfather of Bathsheba (comp. 2 Sam. x. 3 with xxiii. 34). She is called daughter of Ammiel in 1 Chr. iii. 5; but אֲחִיטוֹפֶל is only the anagram of אֲחִינָדָב. Absalom immediately he had revolted sent for him, and when David heard that Ahithophel had joined the conspiracy, he prayed Jehovah to turn his counsel to foolishness (sv. 31), alluding possibly to the signification of his name. David's grief at the treachery of his confidential friend found ex-

pression in the Messianic prophecies (Ps. xli. 9; lv. 12-14).

In order to show to the people that the breach between Absalom and his father was irreparable, Ahithophel persuaded him to take possession of the royal harem (2 Sam. xvi. 21). David, in order to counteract his counsel, sent Hushai to Absalom. Ahithophel had recommended an immediate pursuit of David; but Hushai advised delay, his object being to send intelligence to David, and to give him time to collect his forces for a decisive engagement. When Ahithophel saw that Hushai's advice prevailed, he despaired of success, and returning to his own home "put his household in order and hung himself" (xvii. 1-23). (See *Joseph. Ant.* vii. 9, § 8; Niemeyer, *Charakt.* iv. 454; Ewald, *Geschicht.* ii. 652.) [R. W. B.]

**AHITUB** (אֲחִיטוּב; 'Αχίτωβ; *Achitub*).

1. Father of Ahimelech, or Ahijah, the son of Phineas, and the elder brother of Ichabod (1 Sam. xiv. 3, xvii. 9, 11), and therefore of the house of Eli and the family of Ithamar. There is no record of his high-priesthood, which, if he ever was high-priest, must have coincided with the early days of Samuel's judgeship.

2. Son of Amariah, and father of Zadok the high-priest (1 Chr. vi. 7, 8; 2 Sam. xiii. 17), of the house of Eleazar. From 1 Chr. ix. 11, where the genealogy of Azariah, the head of one of the priestly families that returned from Babylon with Zerubbabel, is traced, through Zadok, to "Ahitub, the ruler of the house of God," it appears tolerably certain that Ahitub was high-priest. And so the LXX. version unequivocally renders it υἱοῦ 'Αχίτωβ ἡγουμένου οἴκου τοῦ Θεοῦ. The expression ἡγούμενου is applied to Azariah the high-priest in Hezekiah's reign in 2 Chr. xxxi. 13. The passage is repeated in Neh. xi. 11, but the LXX. have spoilt the sense by rendering ἡγούμενου as ἡγούμενος, as if it were ἡγῶν. If the line is correctly given in these two passages Ahitub was not the father, but the grandfather of Zadok, his father being Measath. But in 1 Chr. vi. 8, and in *Ezr.* vii. 2, Ahitub is represented as Zadok's father. This uncertainty makes it difficult to determine the exact time of Ahitub's high-priesthood. If he was father to Zadok he must have been high-priest with Ahimelech. But if he was grandfather, his age would have coincided exactly with the other Ahitub, the son of Phineas. Certainly a singular coincidence.

3. The genealogy of the high-priests in 1 Chr. vi. 11, 12, introduces another AHITUB, son of another Amariah, and father of another Zadok. At p. 287 of the *Genealogies* will be found reasons for believing that the second Ahitub and Zadok are spurious. [A. C. H.]

**AHITAB** (אֲחִיטָב; Δαλάβ; *Achalab*), a city of Asher from which the Canaanites were not driven out (*Judg.* i. 31). Its omission from the list of the towns of Asher, in Josh. xix., has led to the suggestion (Bertheau on *Judg.*) that the name is but a corruption of Achishaph; but this appears extravagant. It is more probable that Achab reappears in later history as Gush Chaleb, גּוּשׁ חֲלֵב, or Giscala (Richard, 813, 817), a place lately identified by Robinson under the abbreviated name of *el-Jush*, near *Safet*, in the hilly country to the N.W. of the Sea of Galilee (*Rob.* ii. 446, iii. 73).

Gush Chaleb was in Rabbinical times famous for its oil (see the citations in Beland, 817), and the old olive-trees still remain in the neighbourhood (Rob. ii. 72). From it came the famous John, son of Levi, the leader in the siege of Jerusalem (Jos. 1*st*. §10; B. J. ii. 21, §1), and it had a legendary celebrity as the birthplace of the parents of no less a person than the Apostle Paul (Jerome, quoted by Beland, 813). [G.]

ΑΗΛΑΪ (Ἀήλαι; *Δαδαι*, *Αχαϊδ*; *Oholai*, *Oholi*). 1. Name of a woman (1 Chr. ii. 31). 2. Name of a man (1 Chr. xi. 41).

ΑΗΟΛΗ (Ἀήλη, probably another form of Ἀήλαι; *Αχιδ*; *Alor*), son of Bela, the son of Benjamin (1 Chr. vii. 41). The patronymic Aholite (Ἀήλη) is found in 2 Sam. xxiii. 9, 28; 1 Chr. vi. 12, 29; xxviii. 1.

ΑΗΟΗΨΤΕ. [Ἀοηψ.]

ΑΗΟΛΑΗ (Ἀήλαι; *Οοαδ*; *Oolia*), a hailot, used by Ezekiel as the symbol of Samaria (Ez. xiii. 4, 5, 36, 44).

ΑΗΟΛΛΑΒ (Ἀήλλαι; *Ἑλιδ*; *Ooliah*), a Druite of great skill as a weaver and embroiderer, whom Moses appointed with Bezaleel to erect the tabernacle (Ex. xxxv. 30-35).

ΑΗΟΛΙΒΑΗ (Ἀήλιβ; *Οολιβδ*; *Oolibat*), a hailot, used by Ezekiel as the symbol of Judah (Ez. xiii. 4, 11, 22, 36, 44).

ΑΗΟΛΙΒΑΪΜΑΗ (Ἀήλιβ; *Οολιβεμδ*; *Oolibama*), one (probably the second) of the three wives of Esau. She was the daughter of ΑΑΑΗ, a descendant of Saur the Horite (Gen. xxvi. 2, 25). It is doubtful through this connexion of Esau with the original inhabitants of Mount Seir that we are to trace the subsequent occupation of that territory by him and his descendants, and it is remarkable that each of his three sons by this wife is himself the head of a tribe, whilst all the tribes of the Edomites sprung from his other two wives are founded by his grandsons (Gen. xxxvi. 15-19). In the earlier narrative (Gen. xxvi. 34) Aholibamah is called Judith, daughter of Beeri, the Hittite. The explanation of the change in the name of the woman seems to be that her proper personal name was Judith, and that Aholibamah was the name which she received as the wife of Esau and foundress of three tribes of his descendants; she is therefore in the narrative called by the first name, whilst in the genealogical table of the Edomites she appears under the second. This explanation is confirmed by the recurrence of the name Aholibamah in the concluding list of the genealogical table (Gen. xxxvi. 40-43) which, with Hengstenberg (*Die Authentie d. Pent.* ii. 279; Eng. transl. ii. 228), Tuch (*Kommt. ab d. Gen.* 49.3), Knobel (*Genes.* p. 258), and others, we must regard as a list of names of places and not of persons, as indeed is expressly said at the close of it: "These are the chiefs (heads of tribes) of Esau, according to their settlements in the land of their possession." The district which received the name of Esau's wife, or perhaps rather from which she received her married name, was no doubt (as the name itself indicates) situated in the heights of the mountains of Edom, probably therefore in the neighbourhood of

Mount Hor and Petra, though Knobel places it south of Petra, having been misled by Buechhardt's name *Hesma*, which however, according to Robinson (ii. 155), is "a sandy tract with mountains around it . . . but not itself a mountain, as reported by Buechhardt." It seems not unlikely that the three tribes descended from Aholibamah, or at least two of them, possessed this district, since there are enumerated only eleven districts, whereas the number of tribes is thirteen, exclusive of that of Korah, whose name occurs twice, and which we may further conjecture emigrated (in part at least) from the district of Aholibamah, and became associated with the tribes descended from Eliphaz, Esau's first-born son.

It is to be observed that each of the wives of Esau is mentioned by a different name in the genealogical table from that which occurs in the history. This is noticed under BASHMAH. With respect to the name and race of the father of Aholibamah, see ΑΑΑΗ and ΒΕΕΡΙ. [F. W. G.]

ΑΗΥΜΑΙ (Ἀήμαι; *Αχμαϊ*; *Ahamai*), name of a man (1 Chr. iv. 2).

ΑΗΥΖΖΑΤΗ (Ἀήζαθ; *Οχοζαθ*; *Ochozath*), one of the friends of the Philistine king Abimelech who accompanied him at his interview with Isaac (Gen. xxvi. 26). In LXX. he is called *δ πυμδαγωγος αὐτοῦ* = *pronubus*, or bride-man, and his name is inserted in xvi. 23. St. Jerome renders the word "a company of friends," as does also the Targum.

For the termination "-ath" to Philistine names comp. Gath, Goliath, Timnath. [R. W. B.]

ΑΪ (Ψ = heap of ruins, Ges.). 1. (always with the def. article, Ὠΐ (see Gen. xii. 8, in A. V.), *Gal*, ἡ *Gal*, *Αΐα*, *Αΐ*; Jos. *Αΐα*; *Ha*), a royal city (comp. Josh. vii. 23, 29; x. 1; xii. 9) of Canaan, already existing in the time of Abraham (Gen. xii. 8) [HA], and lying east of Bethel (comp. Josh. xii. 9), and "beside Bethaven" (Josh. vi. 2; viii. 9). It was the second city taken by Israel after their passage of the Jordan, and was "utterly destroyed" (Josh. vii. 3, 4, 5; viii. 1, 2, 3, 10, 11, 12, 14, 16, 17, 18, 20, 21, 23, 24, 25, 26, 28, 29; ix. 3; x. 1, 2; xii. 9). (See Stanley, *S. and P.* 202.) However, if Aith be ΑΪ—and from its mention with Migron and Michmas, it is at least probable that it was so—the name was still attached to the locality at the time of Sennacherib's march on Jerusalem (Is. x. 28). [ΑΙΤΗ.] At any rate, the "men of Bethel and ΑΪ," to the number of two hundred and twenty-three, returned from the captivity with Zerubbabel (Ez. ii. 28; Neh. vii. 32, "one hundred and twenty-three" only); and when the Benjamites again took possession of their towns, "Michmas, ΑΪ, and Bethel, with their 'daughters,'" are among the places named (Neh. xi. 31). [ΑΪΑ.]

Eusebius remarks (*Onom.* *Αγγαί*) that though Bethel remained, ΑΪ was a *τόπος ἐρημος. αὐτὸς λόγος δεικνύσκει*: but even that cannot now be said, and no attempt has yet succeeded in fixing the site of the city which Joshua doomed to be a "heap and a desolation for ever." Stanley (*S. and P.* 202) places it at the head of the *Wady Harith*; Williams and Van de Velde (*S. and P.* 204, note) apparently at the same spot as Robinson (i. 44, 575; and Kiepert's map, 1856), north of *Mikhmas*, and between it and *Deir Duwan*. For Kraft's identifi-

fiction with *Kirbat el-Haiyeh*, see Rob. iii. 288. It is the opinion of some that the words Avim (אֵיִם) in Josh. xviii. 23, and Gaza (גִּזָּא) in 1 Chr. vii. 28, are corruptions of Ai. [AVIM; AZZAH.]

2. (אֵי; *Fat* and *Kaf*; *Ilai*), a city of the Ammonites, apparently attached to Heshbon (Jer. xlix. 3). [i.]

AI'ATH (אֵיֶּת; *eis tēn pōlun 'Agyal*; *Aiath*), a place named by Isaiah (x. 28) in connexion with Migron and Michmash. Probably the same as Ai. [Ai; AIJA.]

AI'JA (אֵיֶּי; *Ihai*), like Ainth, probably a variation of the name Ai. The name is mentioned with Michmash and Bethel (Neh. xi. 31). [Ai.]

AIJALON (אֵיֶּלֶן; "place of deer" or gazelles," Gesen. p. 46; Stanley, 208, *note*; *Αἰάλων* and *Αἰάδα*; *Ajalon*). 1. A city of the Kohathites (Josh. xvi. 24; 1 Chr. vi. 69), originally allotted to the tribe of Dan (Josh. xiv. 42; A. V. "Ajalon"), which tribe, however, was unable to dispossess the Amorites of the place (Judg. i. 35). Ajalon was one of the towns fortified by Rehobam (2 Chr. xi. 10) during his conflicts with the new kingdom of Ephraim (1 K. xiv. 30), and the last we hear of it is as being in the hands of the Philistines (2 Chr. xxviii. 18; A. V. "Ajalon").

Being on the very frontier of the two kingdoms, we can understand how Ajalon should be spoken of sometimes (1 Chr. vi. 69, comp. with 66) as in Ephraim,<sup>b</sup> and sometimes (2 Chr. xi. 10; 1 Sam. xiv. 31) as in Judah and Benjamin.

The name is most familiar to us from its mention in the celebrated speech of Joshua during his pursuit of the Canaanites (Josh. x. 12, "valley (עֶמֶק) of 'Ajalon"; see Stanley, 210). There is no doubt that the town has been discovered by Dr. Robinson in the modern *Talô*, a little to the N. of the Juda road, about 14 miles out of Jerusalem. It stands on the side of a long hill which forms the southern boundary of a fine valley of corn-fields, which valley now bears the name of the *Merj Ibn Omair*, but which there seems no reason for doubting was the valley of Ajalon which witnessed the defeat of the Canaanites (Rob. ii. 253, iii. 145).

2. A place in Zebulun, mentioned as the burial-place of Elon (אֵילֹן),<sup>d</sup> one of the Judges (Judg. xii. 12). [i.]

AIJELETH SHAIAR, more correctly AYELETH HAS-SHACHAR (אֵילֶת הַשָּׁחַר, *the hind of the morning dawn*), found once only in the Bible, in connexion with Ps. xxii., of which it forms part of the introductory verse or title. This term has been variously interpreted. Rashi, Kirachi and Aben-Ezra attest that it was taken for the name of a musical instrument. Many of the modern versions have adopted this interpretation; and it also seems to have been that of the translators from

whom we have the *Authorized Version*, although they have left the term itself untranslated. Some critics speak of this instrument as a "flute;" and J. D. Michaels, Mendelssohn, Knapp, and others, render the Hebrew words by "morning flute." Michaels admits the difficulty of describing the instrument thus named, but he conjectures that it might mean a "shute" to be played on at the tune of the "morning" sacrifice. No account is rendered, however, by Michaels, or by those critics who adopt his view, of the etymological voucher for this translation. Mendelssohn quotes from the *Shilte Haggeborin* a very fanciful description of the "Ayeleth Has-shachar" (see Prolegomena to Mendelssohn's Psalms); but he does not approve it: he rather seeks to justify his own translation by connecting the name of the "flute" with אֵילֶת הַבָּיִם, *Ayeleth Ababin* (Prov. v. 19), and by endeavouring to make it appear that the instrument derived its appellation from the sweetness of its tones.

The Chaldee Paraphrast, a very ancient authority, renders אֵילֶת הַשָּׁחַר, "the power of the continual morning sacrifice,"<sup>b</sup> implying that this term conveyed to the chief musician a direction respecting the time when the 22nd psalm was to be chanted. In adopting such a translation, אֵילֶת must be received as synonymous with אֵילֶת (*strength, force*) in the 20th ver. (A. V. 19th ver.) of the same psalm.

According to a third opinion, the "hind of the morning" expresses allegorically the argument of the 22nd psalm. That this was by no means an uncommon view is evident from the commentaries of Rashi and Kimchi; for the latter regards the "Hind of the Morning" as an allegorical appellation of the house of Judah, whose captivity in Babylon is, agreeably to his exegesis, the general burden of the psalm. Tholuck, who imagines the 22nd Psalm to treat primarily of David, and of the Messiah secondarily, makes David allude to himself under the figure of "the hind of the morning." He speaks of himself as of a hind pursued even from the first dawn of the morning (Tholuck on the Ps. *in loco*).

The weight of authority predominates, however, in favour of the interpretation which assigns to אֵילֶת הַשָּׁחַר the sole purpose of describing to the musician the melody to which the psalm was to be played, and which does not in any way connect "Ayeleth Has-shachar" with the arguments of the psalm itself. To Aben Ezra this interpretation evidently owes its origin, and his view has been received by the majority of grammarians and lexicographers, as well as by those commentators whose object has been to arrive at a grammatical exposition of the text. Amongst the number, Buxtorf, Bochart, Gesenius, Rosenmüller, and M. Sachs (in Zunz's Bible), deserve especial mention. According to the opinion then of this trustworthy band of scholars, אֵילֶת הַשָּׁחַר described a lyrical composition no longer extant; but in the age of David, and during the existence of the Temple of

<sup>a</sup> The part of the country in which Ajalon was situated—the western slopes of the main central tableland leading down to the plain of Sharon—must, if the derivation of the names of its towns is to be trusted, have abounded in animals. Besides Ajalon (deer), here lay Shaulbin (foxes or jackals), and not far off the valley of Zeboun (hyaenas). See Stanley, 162, *note*.

<sup>b</sup> Perhaps this may suggest an explanation of the allusion to the "house of Joseph" in the difficult passage, Judg. i. 34, 35.

<sup>c</sup> *Ἰάδα*, in Epiphanius; see Reland, 553.

<sup>d</sup> It will be observed that the two words differ only in their vowel-points.

Solomon, when the Psalms were chaunted for public and private service, it was so well known as to convey readily to the director of the sacred music what it was useful for him to know. That this was not an unusual method of describing a melody may be satisfactorily proved from a variety of analogous instances. Ample evidence is found in the Talmud (Jerusch. Berach.) that the expression "hind of the morning" was used figuratively for "the rising sun;" and a similar use of the Arabic "*Gizalath*" may be adduced. (See Rosenmüller's *Scholar*, *in loco*, and Fürst's *Concordance*.) Aben Ezra is censured by Bochart (*Hierozicon*, book iii. ch. 17) for describing the poem

הוא אֵילַת הַשָּׁחַר  
פִּיט נִעְשָׂה עַל דֶּרֶךְ דָּבָר, חֶשֶׁק כְּמוֹ אֵילַת  
(אֲהָבִים), a term considered too profane to be employed in reference to a composition used for public worship. But if for the obnoxious epithet "amorous" the word "elegant" be substituted (and the expression used by the rabbi will readily admit of this change in the translation), the objection is removed.

Calmet understands אֵילַת הַשָּׁחַר to mean a "band of music;" and he accordingly translates the introductory verse, "A Psalm of David, addressed to the music-master who presides over the Band called the Morning Hind." [D. W. M.]

AIN (עַיִן), an eye, and also, in the simple but vivid imagery of the East, a spring or natural burst of living water, always contrasted with the well or tank of artificial formation, and which latter is designated by the words Be'er (בְּאֵר), Bor (בּוֹר and בֹּרֶר). Ain still retains its ancient and

double meaning in Arabic, عَيْن. Such living springs abound in Palestine even more than in other mountainous districts, and, apart from their natural value in a hot climate, form one of the most remarkable features of the country. Professor Stanley (*S. and P.* 147, 509) has called attention to the accurate and persistent use of the word in the original text of the Bible, and has well expressed the inconvenience arising from the confusion in the A. V. of words and things so radically distinct as *lun* and *be'er*. "The importance of distinguishing between the two is illustrated by Ex. xv. 27, in which the word *Ainath* (translated 'wells') is used for the springs of fresh water at Elhm, although the rocky soil of that place excludes the supposition of dug wells."

*Ain* oftenest occurs in combination with other words, forming the names of definite localities: these will be found under En, as En-gedi, En-gannim, &c. It occurs alone in two cases:—

1. (with the def. article, הָעַיִן.) One of the landmarks on the eastern boundary of Palestine as

described by Moses (Num. xxxiv. 11), and apparently mentioned, if the rendering of the A. V. is accurate, to define the position of Riblah, viz. "on the east side of 'the spring'" (LXX., ἐπὶ πηγῆς). By Jerome, in the Vulgate, it is rendered *contra fontem Daphnem*, meaning the spring which rose in the celebrated grove of Daphne dedicated to Apollo and Diana at Antioch.\* But Riblah having been lately, with much probability, identified (Rob. iii. 542-6; Porter, ii. 335) with a place of the same name on the N.E. slopes of the Hermon range, "the spring" of the text must in the present state of our knowledge be taken to be 'Ain el-'Azy, the main source of the Orontes, a spring remarkable, even among the springs of Palestine, for its force and magnitude. The objections to this identification are the distance from Riblah—about 9 miles; and the direction—nearer N.E. than E. (See Rob. iii. 531; Porter, ii. 335-6, 358). [RIBLAH; HAMATH.]

2. One of the southernmost cities of Judah (Josh. xv. 32), afterwards allotted to Simeon (Josh. xix. 7; 1 Chr. iv. 32 b) and given to the priests (Josh. xxi. 16). In the list of priests' cities in 1 Chr. vi. Ashan (עֲשָׁן) takes the place of Ain.

In Neh. xi. 29, Ain is joined to the name which in the other passages usually follows it, and appears as Enrimmon. So the LXX., in the two earliest of the passages in Joshua, give the name as Ἐρεμμόθ and Ἐρεμμών. (See Rob. ii. 204.) [i.]

A'JAH (אֵיָה; 'Aîé; Aja). 1. Son of Zibeen (Gen. xxvii. 21; 1 Chr. i. 40). [AJAH.] 2. Father of Izabab, a concubine of Saul (2 Sam. ix. 7, xxi. 8, 10, 11).

A'JALON (Josh. x. 12, xiv. 42; 2 Chr. xxviii. 18). The same place as AJALON (1) which see. The Hebrew being the same in both, there is no reason for the inconsistency in the spelling of the name in the A. V. [G.]

A'KAN (עֲקָן; 'Ioukám; Acan), a descendant of Esau (Gen. xxxvi. 27), called JAKAN in 1 Chr. i. 42. [BENI-JAAKAN.]

AK'KUB (עֲקֻב; 'Akóub and 'Akóúm; Akoub), name of four men. 1. (1 Chr. iii. 24). 2. (1 Chr. ix. 17; Ezr. ii. 42; Neh. vii. 45, xi. 19, xii. 25). 3. (Ezr. ii. 45). 4. (Neh. viii. 7).

AKRAB'IM, "THE ASCENT OF," and "THE GOING UP TO;" also "ΜΑΛΛΗ-ΑΚΡΑΒΙΜ" (מַעְלֵה עֲקָרִיבִים = "the scorpion-pass;" ἀνάβασις 'Ακράβειν; *Ascensus scorpionum*). A pass between the south end of the Dead Sea and Zin, forming one of the landmarks on the south boundary at once of Judah (Josh. xv. 3) and of the Holy Land (Num. xxxiv. 4). Also the north (?) boundary of the Amorites (Judg. i. 36).

Judas Maccabaeus had here a great victory over

the Daphne near Pannias had also the name of Riblah.

b There is a curious expression in this verse which has not yet been explained. After enumerating the "cities" (עָרֵי) of Simeon, the text proceeds, "and their villages" (חָצְרֵי) were Etam, Ain . . . five cities" (עָרֵי). Considering the strict distinction so generally observed in the use of these two words, the above is at least worthy of note. [HAZON.]

\* That this, and not the spring lately identified at Daphn, near the source of the Jordan at Tel el-Kady (Rob. iii. 393; Ritter, *Jordan*, 215), is the Daphne referred to in the Vulgate, is clear from the quotations from Jerome given in Reiland (*Pal.*, cap. xxv. p. 120). In the Targums of Jonathan and Jerusalem, Riblah is rendered by Daphne, and Ain by 'Invatha (עִינוּוָתָה). Schwarz (29) would place Ain at 'En-al-Malcha" (doubtless 'Ain-Mellahah): to be consistent with which, he is driven to assume that

the Edomites (1 Macc. v. 3), "Arabattine," which see; Jos. *Ant.* vii. 8, § 1).

De Sauley (i. 77) would identify it with the long and steep pass of the *Wady es-Zureirah*. Scorpions he certainly found there in plenty, but this wady is too much to the north to have been Akrahim, as the boundary went from thence to Zin and Kadesh-barnea, which wherever situated were certainly many miles further south. Robinson's conjecture is, that it is the line of cliffs which cross the Ghor at right angles, 11 miles south of the Dead Sea, and form the ascent of separation between the Ghor and the Arabah (ii. 120). But this would be a descent and not an ascent to those who were entering the Holy Land from the south. Perhaps the most tenable supposition is that Akrahim is the steep pass *es-Sufah*, by which the final step is made from the desert to the level of the actual land of Palestine. As to the name, scorpions abound in the whole of this district.

This place must not be confounded with Acrabattene, north of Jerusalem; which see. [G.]

**ALABASTER** (ἀλάβαστρος; *alabastrum*), a word occurring in Matt. xxvi. 7, Mark xiv. 3, and Luke vii. 37, and signifying an alabaster box to contain precious ointment or spikenard. It is

Alabaster Vessels.—From the British Museum.—The inscription on the centre vessel denotes the quantity it holds.

however properly the name of the substance of which the box was formed, and hence in 2 K. xxi. 13, the LXX. use δ ἀλάβαστρος for the Heb. נִחְיָץ, *patina*, *lecythus*, *ampulla*. Horaei (*ib.* iv. 12) uses *onyx* in the same way, "Nardi parvus onyx elinet cadum." Alabaster is a calcareous spar, resembling marble, but softer and more easily worked, and therefore very suitable for being wrought into boxes. Pliny (*lib.* iii. 20) represents it as peculiarly proper for this purpose (xiii. 2), "Vas unguentarium, quod ex alabastrite lapide ad unguenta corruptione exanaria excavare solent." The expression *broke the box*, in Mark xiv. 3, implies only the removal of the seal upon the mouth of the box, by which seal the perfume was prevented from evaporating. [W. D.]

<sup>a</sup> The Alex. MS. in this place reads *Ioudaia* for *Ioudaia*, and Ewald (*Gesch.* iv. 91, 358) endeavours to show therefrom that the Arabattine there mentioned was that between Samaria and Judaea, in support of his opinion that a large part of Southern Palestine was then in possession of the Edomites. But this reading does not agree with the context, and

**AL'AMETH** (אַלְמֶת; 'Ελημεθ; *Almath*).

1. Son of Becher (1 Chr. vii. 8). 2. Son of Jehoadah (1 Chr. viii. 36), called Jnah in 1 Chr. ix. 42.

**ALAM'MELECH** (אַלְמֶלֶךְ = "king's oak;"

Ελμελέχ; *Almelch*), a place within the limits of Asher, named between Achsaph and Anah (Josh. xiv. 26, only). It has not yet been identified; but Schwarz (191) suggests a connexion with the *Nahr el-Melch*, which falls into the Kishon near Haifa. [G.]

**AL'AMOTH** (אַלְמוֹת; Ps. xvi., title; 1 Chr.

xv. 20), a word of exceedingly doubtful meaning, and with respect to which various conjectures prevail. Some critics are of opinion that it is a kind of lute brought originally from Elam (Persia); others regard it as an instrument on which young girls (אַלְמוֹת) used to play (comp. the old English instrument "the Virginal"): whilst some again consider the word to denote a species of lyre, with a *soudine* (mute) attached to it for the purpose of softening or deadening the sound, and that on this account it was called אַלְמוֹת, from אָלַם, *to conceal*.

Lafage speaks of אַלְמוֹת as "chant supérieur ou chant à l'octave." Some German commentators, having discovered that the lays of the mediæval minstrels were charmed to a melody called "die Jungfrauenweise," have transferred that notion to the Psalms; and Tholuck, for instance, translates אַלְמוֹת by the above German term. According to this notion אַלְמוֹת would not be a musical instrument, but a melody. (See Mendelssohn's *Introduction to his Version of the Psalms*; Forkel, *Geschichte der Musik*; Lafage, *His. Gén. de la Musique*; and Gesenius on אָלַם). [D. W. M.]

**AL'CIMUS** (Ἀλκιμος, *alchom*, a Greek name, assumed, according to the prevailing fashion, as representing ἄλκιμος, 'Ελκείμ, *God hath set up*). called also JACIMI (ὁ καὶ Ἰάκιμος all. Ἰωάκιμος, Joseph. *Ant.* xii. 9, 5, i. e. אֶקִי, cf. *Jud.* iv. 6 *cor. lott.*), a Jewish priest (1 Macc. vii. 14), who was attached to the Hellenizing party (2 Macc. xiv. 3) b. On the death of Menelaus he was appointed to the High-Priesthood by the influence of Lysias, though not of the pontifical family (Joseph. l. c.; i. 9; 1 Macc. vii. 14), to the exclusion of Onias, the nephew of Menelaus. When Demetrius Soter obtained the kingdom of Syria he paid court to that monarch, who confirmed him in his office, and through his general Bacchides [ΒΑΚΧΙΔΗΣ] established him at Jerusalem. His cruelty, however, was so great that, in spite of the force left in his command, he was unable to withstand the opposition which he provoked, and he again fled to Demetrius, who immediately took measures for his restoration. The first expedition under Nicanor proved unsuccessful; but upon this Bacchides marched a second time against Jerusalem with a large army,

it is at least certain that Josephus had the text as it now stands.

<sup>b</sup> According to a Jewish tradition (Bereshith R. 65), he was "sister's son of Jose ben Jozer," chief of the Sanhedrim, whom he afterwards put to death.—Raphall, *Hist. of Jews*, i. 215, 308.

rouled Judas, who fell in the battle (161 B.C.) and reinstated Alcimus. After his restoration, Alcimus seems to have attempted to modify the ancient worship, and as he was engaged in pulling down "the wall of the inner court of the sanctuary" (i. e., which separated the court of the Gentiles from it; yet see Gihann, 1 Macc. iv. 54) he was "plagued" (by paralysis), and "died at that time," 160 B.C. (Joseph. *Ant.* xii. 9, 5, xii. 10; 1 Macc. vii. 17, cf. 2 Macc. xiv. xv. Ewald, *Gesch. des Volkes Isr.* iv. 365 ff.) [B. F. W.]

**ALEMA** (ἐν Ἀλέμας; in Alimis), a large and strong city in Gilead in the time of the Maccabees (1 Macc. v. 26). Its name does not occur again, nor have we yet any means of identifying it. [G.]

**ALEMETH** (accurately, Allemeth; Ἀλλέμεθ; Γαλεμέθ; *Almeth*), the form under which Almeth, the name of a city of the priests in Benjamin, appears in 1 Chr. vi. 60 [45]. Under the very similar form of *Almit* or *Almuth*, it has been apparently identified in the present day at about a mile N.E. of *Awata*, the site of Anathoth; first by Schwarz (128) and then by Mr. Finn (Rob. iii. 287). Among the genealogies of Benjamin the name occurs in connexion with Azanaveth, also the name of a town of that tribe (1 Chr. vii. 36, iv. 42; compared with Ezr. ii. 24) [ΛΕΜΟΝ.] In the Targum of Jonathan on 2 Sam. vii. 5, Bahumim is rendered Alennath. [G.]

**ALEXANDER III.**, king of Macedon, surnamed the GREAT (Ἀλέξανδρος, *the helper of men*; *Alexandros*; Arab. *the two-horned*, Goli, *Lex. Arab.* 1896), "the son of Philip" (1 Macc. vi. 2) and Olympias was born at Pella B.C. 356. On his mother's side he claimed descent from Achilles; and the Homeric legends were not without influence upon his life. At an early age he was placed under the care of Aristotle; and while still a youth he turned the fortune of the day at Chaeroneia (338 B.C.). On the murder of Philip (B.C. 336) Alexander put down with resolute energy the disaffection and hostility by which his throne was menaced; and in two years he crossed the Hellespont (B.C. 334) to carry out the plans of his father, and execute the mission of Greece to the civilized world. The battle of the Granicus was followed by the subjugation of western Asia; and in the following year the fate of the East was decided at Issus (B.C. 333). Tyre and Gaza were the only cities in Western Syria which offered Alexander any resistance, and these were reduced and treated with unusual severity (B.C. 332). Egypt next submitted to him; and in B.C. 331 he founded Alexandria, which remains to the present day the most characteristic monument of his life and work. In the same year he finally defeated Darius at Gaugamela; and in B.C. 330 his unhappy rival was murdered by Bessus, satrap of Bactria. The next two years were occupied by Alexander in the consolidation of his Persian conquests, and the reduction of Bactria. In B.C. 327 he crossed the Indus, penetrated to the Hydraspes, and was there forced by the discontent of his army to turn westward. He reached Susa B.C. 325, and proceeded to Babylon B.C. 324, which he chose as the capital of his empire. In the next year he died there (B.C. 323) in the midst of his gigantic plans; and those who inherited his conquests left his designs unachieved and unattempted (cf. Dan. vii. 6, viii. 5, xi. 3).

The famous tradition of the visit of Alexander to Jerusalem during his Phœnician campaign (Joseph. *Ant.* xi. 8, 1 ff.) has been a fruitful source of controversy. The Jews, it is said, had provoked his anger by refusing to transfer their allegiance to him when summoned to do so during the siege of Tyre, and after the reduction of Tyre and Gaza (Joseph. l. c.) he turned towards Jerusalem. Jaddua (Jaddus) the High-Priest (Neh. xii. 11, 22), who had been warned in a dream, how to avert the king's anger, calmly awaited his approach; and when he drew near went out to Sapha (ספא, *he watched*), within sight of the city and temple, clad in his robes of hyacinth and gold, and accompanied by a train of priests and citizens arrayed in white. Alexander was so moved by the solemn spectacle that he did reverence to the holy name inscribed upon the turban of the High-Priest; and when Parmenio expressed surprise, he replied that "he had seen the god whom Jaddua represented in a dream at Dium, encouraging him to cross over into Asia, and promising him success." After this, it is said, that he visited Jerusalem, offered sacrifice there, heard the prophecies of Daniel which foretold his victory, and conferred important privileges upon the Jews, not only in Judæa but in Babylonia and Media, which they enjoyed during the supremacy of his successors. The narrative is repeated in the Talmud (Jonah f. 69; ap. Otho, *Lex. Rab.* s. v. *Alexander*); the High-Priest is there said to have been Simon the Just, in later Jewish writers (Vajikta R. 13; Joseph ben Gorion, ap. Ste. Croix, p. 553), and in the chronicles of Abulfeda (Ste. Croix, p. 555). The event was adapted by the Samaritans to suit their own history, with a corresponding change of places and persons and various embellishments (Abund'iftah, quoted by Ste. Croix, pp. 209-12); and in due time Alexander was enrolled among the proselytes of Judaism. On the other hand no mention of the event occurs in Ariam, Plutarch, Diodorus, or Curtius; and the connexion in which it is placed by Josephus is alike inconsistent with Jewish history (Ewald, *Gesch. d. Volkes Isr.* iv. 124, ff.) and with the narrative of Arrian (iii. 1 ἐβδόμη ἡμέρᾳ ἀπὸ τῆς Γάλης ἐλαύνων ἦκεν ἐς Πηλοῦσιον).

But admitting the incorrectness of the details of the tradition as given by Josephus, there are several points which confirm the truth of the main fact. Justin says that "many kings of the East came to meet Alexander wearing fillets" (lib. xi. 10); and after the capture of Tyre "Alexander himself visited some of the cities which still refused to submit to him" (Curt. iv. 5, 13). Even at a later time, according to Curtius, he executed vengeance personally on the Samaritans for the murder of his governor Andromachus (Curt. iv. 8, 10). Besides this, Jewish soldiers were enlisted in his army (Heath, *ap. Joseph. c. Apion.* i. 22); and Jews formed an important element in the population of the city, which he founded shortly after the supposed visit. Above all, the privileges which he is said to have conferred upon the Jews, including the remission of tribute every sabbatical year, existed in later times, and imply some such relation between the Jews and the great conqueror as Josephus describes. Internal evidence is decidedly in favour of the story even in its picturesque fulness. From policy or conviction Alexander delighted to represent himself as chosen by destiny for the great act which he achieved. The siege of Tyre arose peacefully from

a religious motive. The battle of Issus was preceded by the visit to Gordium; the invasion of Persia by the pilgrimage to the temple of Ammon. And if it be impossible to determine the exact circumstances of the meeting of Alexander and the Jewish envoys, the silence of the classical historians, who notoriously disrespected (*e.g.* the Maccabees) and misrepresented (*Tac. Hist. v. 8*) the fortunes of the Jews, cannot be held to be conclusive against the occurrence of an event which must have appeared to them trivial or unintelligible (*Jahn, Archæol. iii. 300 ff.*; *Ste. Croix, Études critiques, &c., Paris, 1810*; *Thirlwall, Hist. of Greece, vi. 206 f.*; and on the other side *Ant. van Dale, Dissert. super Aristæ, Amstel. 1703, pp. 99 ff.*).

The tradition, whether true or false, presents an aspect of Alexander's character which has been frequently lost sight of by his recent biographers. He was not simply a Greek, nor must he be judged by a Greek standard. The Orientalism, which was a scandal to his followers, was a necessary deduction from his principles, and not the result of caprice or vanity (*comp. Arr. vi. 29*). He approached the idea of a universal monarchy from the side of Greece, but his final object was to establish something higher than the paramount supremacy of one people. His purpose was to combine and equalize, not to annihilate: to weld the East and West in a just union—not to enslave Asia to Greece (*Plut. de Alex. Or. 1, §6*). The time, indeed, was not yet come when this was possible, but if he could not accomplish the great issue, he prepared the way for its accomplishment.

The first and most direct consequence of the policy of Alexander was the weakening of nationalities, the first condition necessary for the dissolution of the old religions. The swift course of his victories, the constant incorporation of foreign elements in his armies, the fierce wars and changing fortunes of his successors, broke down the barriers by which kingdoms had been separated from kingdoms, and opened the road for larger conceptions of life and faith than had hitherto been possible (*cf. Polyb. iii. 59*). The contact of the East and West brought out into practical forms, thoughts and feelings which had been confined to the schools. Paganism was deprived of life as soon as it was transplanted beyond the narrow limits in which it took its shape. The spread of commerce followed the progress of arms; and the Greek language and literature vindicated their claim to be considered the most perfect expression of human thought by becoming practically universal.

The Jews were at once most exposed to the powerful influences thus brought to bear upon the East, and most able to support them. In the arrangement of the Greek conquests, which followed the battle of Ipsus B.C. 301, Judea was made the frontier land of the rival empires of Syria and Egypt, and though it was necessarily subjected to the constant vicissitudes of war, it was able to make advantageous terms with the state to which it owed allegiance from the important advantages which it offered for attack or defence [*ANTIOCH S. ii.-vii.*]. Internally also the people were prepared to withstand the effects of the revolution which the Greek dominion effected. The constitution of Ezra had obtained its full development. A powerful hierarchy had succeeded in substituting the idea of a church for that of a state; and the Jew was

now able to wander over the world and yet remain faithful to the goal of his fathers [THE DISPERSION]. The same constitutional change had strengthened the intellectual and religious position of the people. A rigid "fence" of ritualism protected the course of common life from the license of Greek manners; and the great doctrine of the unity of God, which was now seen to be the divine centre of their system, counteracted the attractions of a philosophic pantheism [*SIMON THE JUST*]. Through a long course of discipline, in which they had been left unguided by prophetic teaching, the Jews had realised the nature of their mission to the world, and were waiting for the means of fulfilling it. The conquest of Alexander furnished them with the occasion and the power. But at the same time the example of Greece fostered personal as well as popular independence. Judaism was speedily divided into sects, analogous to the typical forms of Greek philosophy. But even the rude analysis of the old faith was productive of good. The freedom of Greece was no less instrumental in forming the Jews for their final work than the contemplative spirit of Persia, or the civil organization of Rome; for if the career of Alexander was rapid, its effects were lasting. The city which he chose to bear his name perpetuated in after ages the office which he providentially discharged for Judaism and mankind; and the historian of Christianity must confirm the judgment of Arius, that Alexander, "who was like no other man, could not have been given to the world without the special design of Providence" (*ἐξω τοῦ θελου, Arr. vii. 30*). And Alexander himself appreciated this design better even than his great teacher; for it is said (*Plut. de Alex. Or. 1, §6*) that when Aristotle urged him to treat the Greeks as freemen and the Orientals as slaves, he found the true answer to this counsel in the recognition of his "divine mission to unite and reconcile the world (*καὶ οὗτος ἦεν θεῶν ἀρμοστής καὶ διαλλακτὴς τῶν ὅλων νομίζων*)."

Two tetradrachm. Attic, (about) of 1 young man, king of Thrace.

Obv. Head of Alexander the Great, as a young Jupiter Ammon, to right. Rev. ΒΑΣΙΛΕΥΣ ΑΥΤΟΜΑΧΟΥ. In field, monogram and Σ. Pallas seated to left, holding a Victory.

In the prophetic visions of Daniel the influence of Alexander is necessarily combined with that of his successors.<sup>a</sup> They represented with partial exaggeration the several phases of his character; and to the Jews nationally the policy of the Syrian kings was of greater importance than the original conquest of Asia. But some traits of "the first mighty king" (*Dan. viii. 21, xi. 3*) are given with vigorous distinctness. The emblem by which he is typified (*רֶפֶא, a he-goat, fr. רֶפֶא he leoprd, Ges. Thes. s. v.*) suggests the notions of strength and

<sup>a</sup> The attempt of Bertholdt to apply the description of the third monarchy to that of Alexander has little to recommend it [*DANIEL*].

speed;<sup>b</sup> and the universal extent (Dan. viii. 5, . . . *from the west on the face of the whole earth*), and marvellous rapidity of his conquests (Dan. i. c. *he touched not the ground*) are brought forward as the characteristics of his power, which was directed by the strongest personal impetuosity (Dan. viii. 6, *in the fury of his power*). He ruled with great dominion, and did according to his will (Mt. ii. 3); "and there was none that could deliver . . . out of his hand (viii. 7)." [B. F. W.]

**ALEXANDER BALAS** (Joseph. *Ant.* xiii. 4, §8, Ἀλέξανδρος ὁ Βάλας λεγόμενος; Strab. xiv. p. 751, τὸν Βάλαν Ἀλέξανδρον; Just. xxv. 1, Substanti pro eo Balam quendam . . . et . . . nomen ei Alexandri inditur. Balas possibly represents the Aram. ܠܒܠܐ, *lord*, he likewise assumed the titles ἐπιφανὴς and ἐνερgeticός, 1 Macc. x. 1). He was, according to some, a (natural) son of Antiochus IV. Epiphanes (Strab. xiv. Joseph. *Ant.* viii. 2, 1), but he was more generally regarded as an impostor who falsely assumed the connexion (App. Syr. 67; Justin l. c. cf. Polyb. xxxiii. 16). He claimed the throne of Syria in 152 B.C. in opposition to Demetrius Soter, who had provoked the hostility of the neighbouring kings and alienated the affections of his subjects (Joseph. l. c.). His pretensions were put forward by Hecaleides, formerly treasurer of Antiochus Epiphanes, who obtained the recognition of his title at Rome by scandalous intrigues (Polyb. xxxiii. 14, 16). After landing at Ptolemais (1 Macc. x. 1) Alexander gained the warm support of Jonathan, who was now the leader of the Jews (1 Macc. ix. 73); and though his first efforts were unsuccessful (Just. xxv. 1, 10), in 150 B.C. he completely routed the forces of Demetrius, who himself fell in the retreat (1 Macc. x. 18-50; Joseph. *Ant.* xii. 2, 4; Str. xvi. p. 751). After this Alexander married Cleopatra, the daughter of Ptolemaeus VI. Philometor; and in the arrangement of his kingdom appointed Jonathan governor (μεριδάρχης; 1 Macc. x. 65) of a province (Judea; cf. 1 Macc. xi. 57). But his triumph was of short duration. After obtaining power he gave himself up to a life of indulgence (Liv. *Eph.* 50; cf. Athen. v. 211); and when Demetrius Nicator, the son of Demetrius Soter, landed in Syria in 147 B.C., the new pretender found powerful support (1 Macc. x. 67 ff.). At first Jonathan defeated and slew Apollonius the governor of Coele-Syria, who had joined the party of Demetrius, for which exploit he received fresh favours from Alexander (1 Macc. x. 69-89); but shortly afterwards (B.C. 146) Ptolemy entered Syria with a large force, and after he had placed garrisons in the chief cities on the coast, which received him according to the commands of Alexander, suddenly pronounced himself in favour of Demetrius (1 Macc. xi. 1-11; Joseph. *Ant.* xiii. 4, 5 ff.), alleging, probably with truth, the existence of a conspiracy against his life (Joseph. l. c. cf. Dio. ap. Muller. *Fragment.* ii. 16). Alexander, who had been forced to leave Antioch (Joseph. l. c.), was in Cilicia when he heard of Ptolemy's defection (1 Macc. xi. 14). He hastened to meet him, but was defeated (1 Macc. xi. 15; Just. xxv. 2), and fled to Abre in Arabia (Diod. l. c.), where he was murdered B.C. 146 (Diod. l. c.; 1 Macc. xi.

17 differ as to the manner; and Euseb. *Chron.* viii. i. 349 represents him to have been slain in the battle). The narrative in 1 Macc. and Josephus shows clearly the partiality which the Jews entertained for Alexander "as the first that entreated of true peace with them" (1 Macc. x. 47); and the same feeling was exhibited afterwards in the zeal with which they supported the claims of his son Antiochus. [ANTIOCHUS VI.] [B. F. W.]

T. trinitatis (T. trinitatis talent) of Alexander Balas.

Obv. Bust of King to right. Rev. ΒΑΣΙΛΕΥΣ ΑΛΕΞΑΝΔΡΟΥ. Eagle, upon palm-branch. In field the monogram and symbol of Tyre, date 127P (168 A.D. S. 100, etc.).

**ALEXANDER** (Ἀλέξανδρος), in N. T. 1. Son of Simon the Cyrenian, who was compelled to bear the cross for our Lord (Mark xv. 21). From the manner in which he is there mentioned, together with his brother Rufus, they were probably persons well known in the early Christian church.

2. One of the kindred of Annas the high priest (Acts iv. 6), apparently in some high office, as he is among three who are mentioned by name. Some suppose him identical with Alexander the Alabarch at Alexandria, the brother of Philo Judaeus, mentioned by Josephus (*Ant.* xviii. 8, §1, xiv. 5, §1) in the latter passage as a φίλος ἀρχαῖος of the Emperor Claudius: so that the time is not inconsistent with such an idea.

3. A Jew at Ephesus, whom his countrymen put forward during the tumult raised by Demetrius the silversmith (Acts xix. 33), to plead their cause with the mob, as being unconnected with the attempt to overthrow the worship of Artemis. Or he may have been, as imagined by Calvin and others, a Jewish convert to Christianity, whom the Jews were willing to expose as a victim to the frenzy of the mob.

4. An Ephesian Christian, reproached by St. Paul in 1 Tim. i. 20, as having, together with one Hymeneus, put from him faith and a good conscience, and so made shipwreck concerning the faith. This may be the same with

5. ALEXANDER the coppersmith (ἌΑ. δ χαλκεύς), mentioned by the same apostle, 2 Tim. iv. 14, as having done him many mischiefs. It is quite uncertain where this person resided; but from the caution to Timotheus to beware of him, probably at Ephesus. [H. A.]

**ALEXANDRIA** (ἡ Ἀλεξάνδρεια, 3 Macc. ii. 1; Mod., *El-Fouad*; Ethn., Ἀλεξάνδρεια, 3 Macc. ii. 30, iii. 21; Acts xiii. 24, v. 9), the Hellenic Roman and Christian capital of Egypt, was founded by Alexander the Great B.C. 332, who traced himself the ground-plan of the city which he designed to make the metropolis of his western empire (Plut. *Alex.* 26). The work thus begun was continued after the death of Alexander by the Pto-

<sup>b</sup> There may be also some allusion in the word to the legend of Caranus, the founder of the Argive dynasty in Macedonia, who was guided to victory by "a flock of goats" (Justin, l. 7).

lemies; and the beauty (Athen. i. p. 3) of Alexandria became proverbial. Every natural advantage contributed to its prosperity. The climate and site were singularly healthy (Strab. p. 793). The harbours, formed by the island of Pharos and the headland Lochias, were safe and commodious, alike for commerce and for war; and the Lake Mareotis was an inland haven for the merchandise of Egypt and India (Strab. p. 798). Under the despotism of the later Ptolemies, the trade of Alexandria declined, but its population (300,000 freemen, Diod. xvii. 52; the free population of Attica was about 130,000) and wealth (Strab. p. 798) were enormous. After the victory of Augustus it suffered for its attachment to the cause of Antony (Strab. p. 792); but its importance as one of the chief ports of Rome seemed for it the general favour of the first emperors. In later times the seditious tumults for which the Alexandrians had always been notorious, desolated the city (A.C. 260 B. Gibbon, *Decline and Fall*, c. x.), and religious feuds aggravated the popular distaste (Dionys. Alex. *Ep.* iii. xii.; Euseb. *H. E.*, vi. 41 ff.; vii. 22). Yet even thus, though Alexandria suffered greatly from constant dissensions and the weakness of the Byzantine court, the splendour of "the great city of the West" amazed Amron, its Arab conqueror (A.C. 640; Gibbon, c. li.); and after centuries of Mahometan misrule it promises once again to justify the wisdom of its founder (Strab. xvii. 791-9; *Trag.* ap. Joseph. *Ant.* xiv. 7, 2; *Plut. Alex.* 26; *Ant.* iii. 1; Joseph. *B. J.* iv. 5. Comp. ALEXANDRIA the Great.)

The population of Alexandria was mixed from the first (comp. *Cut.* iv. 8, 5); and this fact formed the groundwork of the Alexandrine character. The three regions into which the city was divided (*Regio Judæorum, Brachionum, Khoutis*) corresponded to the three chief classes of its inhabitants, Jews, Greeks, Egyptians;<sup>a</sup> but in addition to these principal races, representatives of almost every nation were found there (Dion Chrys. *Orat.* xxxi.). According to Josephus, Alexander himself assigned to the Jews a place in his new city; "and they obtained," he adds, "equal privileges with the Macedonians" (*c. Ap.* ii. 4) in consideration "of their services against the Egyptians" (*B. J.* ii. 18, 7). Ptolemy I. imitated the policy of Alexander, and, after the capture of Jerusalem, he removed a considerable number of its citizens to Alexandria. Many others followed of their own accord; and all received the full Macedonian franchise (Joseph. *Ant.* xii. 1. Cf. *c. Ap.* i. 22), as men of known and true fidelity (Joseph. *c. Ap.* ii. 4). Already on a former occasion the Jews had sought a home in the land of their bondage. More than two centuries and a half before the foundation of Alexandria a large body of them had taken refuge in Egypt, after the murder of Gedaliah; but these, after a general apostasy, were carried captive to Babylon by Nebuchadnezzar (2 K. xxi. 26; Jer. xlv.; Joseph. *Ant.* x. 9, 7).

<sup>a</sup> The Alexandrine corn-vessels (Acts xxvii. 6, xxviii. 11) were large (Acts xxviii. 37) and handsome (Luc. *Navig.* p. 668, ed. Renel.); and even Vespasian made a voyage in one (Joseph. *B. J.* vii. 2). They generally sailed direct to Puteoli (*Dicaearchia*, Strab. p. 793); Senec. *Ep.* 77, 1; cf. Suet. *Aug.* 98, Acts xxviii. 13); but, from stress of weather, often sailed under the Asiatic coast (Acts xxvii.; cf. Luc. i. c. p. 670 f.; Smith, *Voyage of St. Paul*, pp. 70 ff.).

The fate of the later colony was far different. The numbers and importance of the Egyptian Jews were rapidly increased under the Ptolemies by fresh immigrations and thriving industry. Philo estimates them in his time at little less than 1,000,000 (*In Flacc.* §6, p. 971); and adds, that two of the five districts of Alexandria were called "Jewish districts;" and that many Jews lived scattered in the remaining three (*id.* §8, p. 973). Julius Caesar (Joseph. *Ant.* xiv. 10, §1) and Augustus confirmed to them the privileges which they had enjoyed before, and they retained them with various interruptions, of which the most important, A.D. 39, is described by Philo (*l. c.*), during the tumults and persecutions of later reigns (Joseph. *c. Ap.* ii. 4; *B. J.* xii. 3, 2). They were represented, at least for some time (from the time of Cleopatra to the reign of Claudius; Jost, *Gesch. d. Judenth.* 353) by their own officer (*ἐθνάρχης*, Strab. ap. Joseph. *Ant.* xiv. 7, 2; *ἀναβάρχης*, Joseph. *Ant.* xviii. 7, 3; 9, 1; xiv. 5, 1; cf. *Rup. ad Juv.* sat. i. 130; *γενάρχης*, Philo, *In Flacc.* §10, p. 975), and Augustus appointed a council (*γενοῦσα* i. e. *Synhedria* Philo *l. c.*) "to superintend the affairs of the Jews," according to their own laws. The establishment of Christianity altered the civil position of the Jews, but they maintained their relative prosperity; and when Alexandria was taken by Amron 40,000 tributary Jews were reckoned among the marvels of the city (Gibbon, *ch.*).

For some time the Jewish Church in Alexandria was in close dependence on that of Jerusalem. Both were subject to the civil power of the first Ptolemies, and both acknowledged the high-priest as their religious head. The persecution of Ptolemy Philopator (217 B.C.) occasioned the first political separation between the two bodies. From that time the Jews of Palestine attached themselves to the fortunes of Syria [ANTIOCHUS the Great]; and the same policy which alienated the Palestinian party gave unity and decision to the Jews of Alexandria. The Septuagint translation which strengthened the barrier of language between Palestine and Egypt, and the temple at Leontopolis (161 B.C.) which subjected the Egyptian Jews to the charge of schism, widened the breach which was thus opened. But the division though marked was not complete. At the beginning of the Christian era the Egyptian Jews still paid the contributions to the temple-service (Raphall, *Hist. of Jews*, ii. 72). Jerusalem, though its name was fashioned to a Greek shape, was still the Holy City, the metropolis not of a country but of a people (*ἱερόπολις*, Philo, *In Flacc.* §7; *Egy. ad Cui.* §36), and the Alexandrians had a synagogue there (Acts vi. 9). The internal administration of the Alexandrine Church was independent of the Sanhedrin at Jerusalem; but respect survived submission.

There were, however, other causes which tended to produce at Alexandria a distinct form of the Jewish character and faith. The religion and philosophy of that restless city produced an effect upon

<sup>b</sup> Polybius (xxxiv. 14; ap. Strab. p. 797) speaks of the population as consisting of "three races (*τρία γένη*), the native Egyptian . . . the *mercenary*, . . . and the Alexandrine . . . of Greek descent." The Jews might receive the title of "mercenaries," from the service which they originally rendered to Alexander (Joseph. *B. J.* ii. 18, 7) and the first Ptolemies (Joseph. *c. Ap.* ii. 4).

the people more powerful than the influence of politics or commerce. Alexander himself symbolised the spirit with which he wished to animate his new capital by founding a temple of Isis side by side with the temples of the Grecoan gods (A.R. iii. 1). The creeds of the East and West were to coexist in friendly union; and in after-times the mixed worship of Serapis (comp. Gibbon, *l. c.* xxviii.; *Dict. of Geogr.* i. p. 98) was characteristic of the Greek kingdom of Egypt (August. *De Civ. Dei*, xviii. 5; *S. maximus Aegyptiorum Deus*). This catholicity of worship was further combined with the spread of universal learning. The same monarchs who favoured the worship of Serapis (Clem. Al. *Protr.* iv. §48) founded and embellished the Museum and Library; and part of the Library was deposited in the Serapeum. The new faith and the new literature led to a common issue; and the Egyptian Jews necessarily imbibed the spirit which prevailed around them.

The Jews were, indeed, peculiarly susceptible of the influences to which they were exposed. They presented from the first a capacity for Eastern or Western development. To the faith and conservatism of the Oriental they united the activity and energy of the Greek. The mere presence of Hellenic culture could not fail to call into play their powers of speculation which were hardly repressed by the traditional legalism of Palestine (comp. Jost, *Gesch. d. Juden th.* pp. 293 ff.); and the unchanging element of divine revelation which they always retained, enabled them to harmonize new thought with old belief. But while the intercourse of the Jew and Greek would have produced the same general consequences in any case, Alexandria was peculiarly adapted to ensure their full effect. The result of the contact of Judaism with the many creeds which were current there must have been speedy and powerful. The earliest Greek fragment of Jewish writing which has been preserved (about 160 B.C.) [ARISTOTELIS] contains large Orphic quotations, which had been already moulded into a Jewish form (comp. Jost, *l. c.* *Gesch. d. Juden th.* 370); and the attempt thus made to connect the most ancient Hellenic traditions with the Law was often repeated afterwards. Nor was this done in the spirit of bold forgery. Orpheus, Musæus, and the Sibyls appeared to stand in some remote period anterior to the corruptions of polytheism, as the witnesses of a primeval revelation and of the teaching of nature, and thus it seemed excusable to attribute to them a knowledge of the Mosiac doctrines. The third book of the Sibyllines (v. B.C. 150) is the most valuable relic of this pseudo-Hellenic literature, and shows how far the conception of Judaism was enlarged to meet the wide views of the religious condition of heathendom which was opened by a more intimate knowledge of Greek thought; though the later Apocalypse of Ezra (Ezra IV.) exhibits a marked reaction towards the extreme exclusiveness of former times.

But the indirect influence of Greek literature and philosophy produced still greater effects upon the Alexandrine Jews than the open conflict and combination of religious dogmas. The literary school of Alexandria was essentially critical and not creative. For the first time men laboured to collect, revise, and classify all the records of the past. Poets trusted to their learning rather than to their imagination. Language became a study; and the legends of early mythology are transformed into philosophic mysteries. The Jews took a vigorous

share in these new studies. The caution against writing, which became a settled law in Palestine, found no favour in Egypt. Numerous authors adapted the history of the Patriarchs, of Moses, and of the Kings to classical models (Euseb. *Præp. l. c.* ix. 17-39. Eupolemus, Artapanus (?), Demetrius, Aristæus, Cleodemus or Malchus, "a prophet.") A poem which bears the name of Phocylides gives in verse various precepts of Leviticus (*Daniel*, sec. *l. c.* *Apocryph.* p. 512 f. Romæ, 1772); and several large fragments of a "tragedy" in which Ezekiel (v. B.C. 110) dramatized the Exodus, have been preserved by Eusebius (*l. c.*), who also quotes numerous passages in heroic verse from the elder Philo and Theodotus. This classicism of style was a symptom and a cause of classicism of thought. The same Aristobulus who gave currency to the Judæo-Orphic verses endeavoured to show that the Pentateuch was the real source of Greek philosophy (Euseb. *Præp. l. c.* viii. 12; Clem. Al. *Strom.* vi. 98).

The proposition thus enunciated was thoroughly congenial to the Alexandrine character; and henceforth it was the chief object of Jewish speculation to trace out the subtle analogies which were supposed to exist between the writings of Moses and the teaching of the schools. The circumstances under which philosophical studies first gained a footing at Alexandria favoured the attempt. For some time the practical sciences reigned supreme; and the issue of the era was scepticism (Maffei, *Hist. de l'École d'Alex.* ii. 162 ff.). Then at length the clean analysis and practical morality of the Peripatetics found ready followers; and in the strength of the reaction men eagerly trusted to those splendid ventures with which Plato taught them to be content till they could gain a surer knowledge (*Phæd.* p. 85). To the Jew this surer knowledge seemed to be already given; and the belief in the existence of a spiritual meaning underlying the letter of Scripture was the great principle on which all his investigations rested. The facts were supposed to be essentially symbolic: the language the veil (or sometimes the mask) which partly disguised from common sight the truths which it enveloped. In this way a twofold object was gained. It became possible to withdraw the Supreme Being (τὸ ὅν, δὲ ὅν) from immediate contact with the material world; and to apply the narratives of the Bible to the phenomena of the soul. It is impossible to determine the process by which these results were embodied; but, as in parallel cases, they seem to have been shaped gradually in the minds of the mass, and not fashioned at once by one great teacher. Even in the LXX. there are traces of an endeavour to interpret the anthropomorphic imagery of the Hebrew text [SEPTUAGINT]; and there can be no doubt that the Commentaries of Aristobulus gave some form and consistency to the allegoric system. In the time of Philo (v. C. 20—A.C. 50) the theological and interpretative systems were evidently fixed even in many of their details, and he appears in both cases only to have collected and expressed the popular opinions of his countrymen.

In each of these great forms of speculation—the theological and the exegetical—Alexandrianism has an important bearing upon the Apostolic writings. But the doctrines which are characteristic of the Alexandrine school were by no means peculiar to it. The same causes which led to the formation of wider views of Judaism in Egypt, acting under

greater restraint, produced corresponding results in Palestine. A doctrine of the Word (*Memra*), and a system of mystical interpretation grew up within the Rabbinic schools, which bear a closer analogy to the language of St. John and to the "allegories" of St. Paul than the speculations of Philo.

But while the importance of this Rabbinic element in connexion with the expression of Apostolic faith, is often overlooked, there can be no doubt that the Alexandrine teaching was more powerful in furthering its reception. Yet even when the function of Alexandrianism with regard to Christianity is thus limited, it is needful to avoid exaggeration. The preparation which it made was indirect and not immediate. Philo's doctrine of the Word (*Logos*) led men to accept the teaching of St. John, but not to anticipate it; just as his method of allegorizing fitted them to enter into the arguments of the Epistle to the Hebrews, though they could not have foreseen their application.

The first thing, indeed, which must strike the reader of Philo in relation to St. John is the similarity of phrase without a similarity of idea. His treatment of the *Logos* is vague and inconsistent. He argues about the term and not about the reality, and seems to delight in the ambiguity which it involves. At one time he represents the *Logos* as the reason of God in which the archetypal ideas of things exist (*λόγος ἐνδιάθετος*), at another time as the Word of God by which he makes himself known to the outward world (*λόγος προφορικός*); but he nowhere realizes the notion of One who is at once Revealer and the Revelation, which is the essence of St. John's teaching. The idea of the active *Logos* is suggested to him by the necessity of withdrawing the Infinite from the finite, God from man, and not by the desire to bring God to man. Not only is it impossible to conceive that Philo could have written as St. John writes, but even to suppose that he could have admitted the possibility of the Incarnation of the *Logos*, or of the personal unity of the *Logos* and the Messiah. But while it is right to state in its full breadth the opposition between the teaching of Philo and St. John, it is impossible not to feel the important office which the mystic theosophy, of which Philo is the representative, fulfilled in preparing for the apprehension of the highest Christian truth. Without any distinct conception of the personality of the *Logos*, the tendency of Philo's writings was to lead men to regard the *Logos*, at least in some of the senses of the term, as a person; and while he maintained with devout earnestness the indivisibility of the divine nature, he described the *Logos* as divine. In this manner, however unconsciously, he prepared the way for the recognition of a two-fold personality in the Godhead, and performed a work without which it may well appear that the language of Christianity would have been unintelligible (comp. Dörner, *Die Lehre von der Person Christi*, i. pp. 23 ff.).

The allegoric method stands in the same relation to the spiritual interpretation of Scripture as the mystic doctrine of the Word to the teaching of St. John. It was a preparation and not an anticipation of it. Unless men had been familiarized in some such way with the existence of an inner meaning in

the Law and the Prophets, it is difficult to understand how an Apollos "mighty in the Scriptures" (Acts xviii. 24-28) could have convinced many, or how the infant Church could have seen almost unremoved the ritual of the Old Covenant swept away, strong in the conscious possession of its spiritual antitypes. But that which is found in Philo in isolated fragments combines in the New Testament to form one great whole. In the former the truth is alluded in casual details, in the latter it is laid down in its broad principles which admit of infinite application; and a comparison of patristic interpretations with those of Philo will show how powerful an influence the Apostolic example exercised in embuing the imagination of later writers. Nor is this all. While Philo regarded that which was positive in Judaism as the mere symbol of abstract truths, in the Epistle to the Hebrews it appears as the shadow of blessings realized (Hebr. x. 11, *γενομένων*) in the presence of a personal Saviour. History in the one case is the enumeration of a riddle; in the other it is the record of a life.

The speculative doctrines which thus worked for

embodied in a form of society which was afterwards transferred to the Christian Church. Numerous bodies of ascetics (*Therapeutae*), especially on the borders of Lake Mareotis, devoted themselves to a life of ceaseless discipline and study. Unlike the Essenes, who present the corresponding phase in Palestinian life, they abjured society and labour, and often forgot, as it is said, the simplest wants of nature in the contemplation of the hidden wisdom of the Scriptures (Philo, *De Vit. Contempl.* throughout). The description which Philo gives of their occupation and character seemed to Eusebius to present so clear an image of Christian virtues that he claimed them as Christians; and there can be no doubt that some of the forms of monasticism were shaped upon the model of the Therapeutae (Euseb. *H. E.* ii. 16).

According to the common legend (Euseb. *I. c.*) St. Mark first "preached the Gospel in Egypt, and founded the first Church in Alexandria." At the beginning of the second century the number of Christians at Alexandria must have been very large, and the great leaders of Gnosticism who arose there (Basilides, Valentinius) exhibit an exaggeration of the tendency of the Church. But the later forms of Alexandrine speculation, the strange varieties of Gnosticism, the progress of the catechetical school, the development of Neo-Platonism, the various phases of the Arian controversy, belong to the history of the Church and to the history of philosophy. To the last Alexandrian fulfilled its mission; and we still owe much to the spirit of its great teachers, which in later ages struggled, not without success, against the sterner systems of the West.

The following works embody what is valuable in the earlier literature on the subject, with copious references to it: Matter, *Histoire de l'École d'Alexandrie*, 2nd edit., Paris, 1840. Dähne, A. F., *Geschichtliche Darstellung der Jüdisch-Alexandrinischen Religions-Philosophie*, Halle, 1834. Gfrörer, A. F., *Philo, und die Jüdisch-Alexandrinische Theosophie*, Stuttgart, 1835. To these may be added, Ewald, H., *Gesch. des Volkes Israel*, Göttingen, 1852, iv. 250 ff., 393 ff. Jost, J. M., *Gesch. des Judenthums*, Leipzig, 1857, i. 344 ff., 388 ff. Neander, A., *History of Christian Church*, vol. i. 66 ff., Eng. Tr. 1847. Prof. Jowett, *Philo and St. Paul*;

\* The closest analogy to the teaching of Philo on the *Logos* occurs in the Epistle to the Hebrews, which is throughout Hellenistic rather than Rabbinic. Compare Heb. iv. 12, with Philo, *Quis rec. dic. haeres*, §26.

*St. Paul's Epistles to the Thessalonians, &c.*, London, 1855, i. 363 ff. And for the later Christian history: Guerike, H. F., *De Scholâ Alcoranica Catechetica*, Halis, 1825.<sup>a</sup> [B. F. W.]

ALL'AH. [ALVAH.]

ALTAN. [ALVAN.]

**ALLIANCES.** On the first establishment of Jews in Palestine, no connexions were formed between them and the surrounding nations. The geographical position of their country—the peculiarity of their institutions—and the prohibitions against intercourse with the Canaanites and other heathen nations, alike tended to promote an exclusive and isolated state. But with the extension of their power under the kings, the Jews were brought more into contact with foreigners, and alliances became essential to the security of their commerce. Solomon concluded two important treaties exclusively for commercial purposes; the first with Hiram, king of Tyre, originally with the view of obtaining materials and workmen for the erection of the Temple, and afterwards for the supply of ship-builders and sailors (1 K. v. 2-12, ix. 27); the second with a Pharaoh, king of Egypt, which was cemented by his marriage with a princess of the royal family; by this he secured a monopoly of the trade in houses and other products of that country (1 K. x. 28, 29). After the division of the kingdom, the alliances were of an offensive and defensive nature; they had their origin partly in the internal disputes of the kingdoms of Judah and Israel, and partly in the position which these countries held relatively to Egypt on the one side, and the great eastern monarchies of Assyria and Babylonia on the other. The sentiment of the historical records at our command makes it probable that the key to many of the events that occurred is to be found in the alliances and counter-alliances formed between these peoples, of which no mention is made. Thus the invasion of Shishak in Rehoboam's reign was not improbably the result of an alliance made with Jeroboam, who had previously found an asylum in Egypt (1 K. xii. 2, xiv. 25). Each of these monarchs sought a connexion with the neighbouring kingdom of Syria, on which side Israel was particularly assailable (1 K. xv. 19); but Aza ultimately succeeded in securing the active co-operation of Benhadad against Baasha (1 K. xv. 16-20). Another policy, induced probably by the encroaching spirit of Syria, led to the formation of an alliance between the two kingdoms under Ahab and Jehoshaphat, which was maintained until the end of Ahab's dynasty: it occasionally extended to commercial operations (2 Chr. xx. 36). The alliance ceased in Jehu's reign: war broke out shortly after between Amaziah and Jeroboam II.: each nation looked for foreign aid, and a coalition was formed between Rezin, king of Syria, and Pekah on the one side, and Ahaz and Tiglath-Pileser, king of Assyria, on the other (2 K. xvi. 5-9). By this means an opening was afforded to the advances of the Assyrian power; and the kingdoms of Israel and Judah, as they were successively attacked, sought the alliance of the Egyptians, who were strongly interested in maintaining the independence of the Jews as a barrier against the encroachments of the Assyrian power. Thus Hoshea made a treaty with So (Sabaco, or Sevechus), and rebelled against

Shalmaneser (2 K. xvii. 4): Hezekiah adopted the same policy in opposition to Sennacherib (Is. xxx. 2); in neither case was the alliance productive of much good: the Israelites were abandoned by So: it appears probable that his successor Sethos, who had offended the military caste, was unable to render Hezekiah any assistance: and it was only when the independence of Egypt itself was threatened, that the Assyrians were defeated by the joint forces of Sethos and Tirhakah, and a temporary relief afforded thereby to Judah (2 K. xix. 9, 36; Herod. ii. 141). The weak condition of Egypt at the beginning of the 26th dynasty left Judah entirely at the mercy of the Assyrians, who under Esarhaddon subdued the country, and by a conciliatory policy secured the adhesion of Manasseh and his successors to his side against Egypt (2 Chr. xxxiii. 11-13). It was apparently as an ally of the Assyrians that Josiah resisted the advance of Necho (2 Chr. xxxv. 20). His defeat, however, and the downfall of the Assyrian empire again changed the policy of the Jews, and made them the subjects of Egypt. Nebuchadnezzar's first expedition against Jerusalem was contemporaneous with and probably in consequence of the expedition of Necho against the Babylonians (2 K. xxiv. 1; Jer. xli. 2); and lastly Zedekiah's rebellion was accompanied with a renewal of the alliance with Egypt (Ez. xvii. 15): a temporary relief appears to have been afforded by the advance of Hophiah (Jer. xxxvii. 11), but it was of no avail to prevent the extinction of Jewish independence.

On the restoration of independence, Judas Maccabæus sought an alliance with the Romans, who were then gaining an ascendancy in the East, as a counterpoise to the neighbouring state of Syria (1 Mac. viii.; Joseph. *Ant.* xii. 10, §6): this alliance was renewed by Jonathan (1 Mac. xii. 1; *Ant.* xii. 5, §8), and by Simon (1 Mac. xv. 17; *Ant.* xii. 7, §3): on the last occasion the independence of the Jews was recognized and formally notified to the neighbouring nations B.C. 140 (1 Mac. xv. 22, 23). Treaties of a friendly nature were at the same period concluded with the Lacedæmonians under an impression that they came of a common stock (1 Mac. xii. 2, xiv. 20; *Ant.* xii. 4, §10, xiii. 5, §8). The Roman alliance was again renewed by Hyrcanus, B.C. 128 (*Ant.* xiii. 9, §2), after his defeat by Antiochus Sidetes, and the losses he had sustained were repaired. This alliance, however, ultimately proved fatal to the independence of the Jews: the rival claims of Hyrcanus and Aristobolus having been referred to Pompey, B.C. 63, he availed himself of the opportunity of placing the country under tribute (*Ant.* xiv. 4, §4). Finally, Herod was raised to the sovereignty by the Roman Senate, acting under the advice of M. Antony (*Ant.* xiv. 14, §5).

The formation of an alliance was attended with various religious rites: a victim was slain and divided into two parts, between which the contracting parties passed involving imprecations of a similar destruction upon him, who should break the terms of the alliance (Gen. xv. 10; cf. Liv. i. 24); hence the expression בְּרִית פָּתַח (= *παράειρεν, foedus iecere*) to make (lit. to cut) a treaty; hence also the use of the term מִלָּה (lit. imprecation) for a covenant. That this custom was maintained to a late period appears from Jer. xxiv. 18-20. Generally speaking, the oath alone is mentioned in the contracting of alliances, either

<sup>a</sup> Alexandria occurs in the Vulgate by an error for No-Ammon [No-Αμμων], Jer. xli. 25; Ez. xxx. 14, 15, 16; Nah. iii. 8.

between nations (Josh. ix. 15) or individuals (Gen. xvi. 28, xxi. 53; 1 Sam. xv. 17; 2 K. xi. 4). The event was celebrated by a feast (Gen. i. c.; Ex. xxiv. 11; 2 Sam. iii. 12, 20). Salt, as symbolical of fidelity, was used on these occasions; it was applied to the sacrifices (Lev. ii. 13), and probably used, as among the Arabs, at hospitable entertainments; hence the expression "covenant of salt" (Numb. xviii. 19; 2 Chr. xiii. 5). Occasionally a pillar or a heap of stones was set up as a memorial of the alliance (Gen. xxii. 52). Presents were also sent by the party soliciting the alliance (1 K. xv. 18; Is. xxx. 5; 1 Macc. xv. 18). The fidelity of the Jews to their engagements was conspicuous at all periods of their history (Josh. ix. 18), and any breach of covenant was visited with very severe punishment (2 Sam. xxi. 1; Ez. xvii. 16). [W. L. B.]

**AL/LON** (אֵלֹן or אֵלֹנָה), a large strong tree of some description, probably an oak (see Ges. Thes. 51, 103; Stanley, App. §76). The word is found in two names in the topography of Palestine.

1. **ALLON**, more accurately **EILON** (אֵילֹן) (אֵילֹן עֵינִים); מואלד: *Eilon*, a place named among the cities of Naphtali (Josh. xiv. 33). Probably the more correct construction is to take it with the following word, i. e. "the oak by Zaananim," or "the oak of the loading of tents," as if deriving its name from some noun like frequenting the spot. Such a tribe were the Kenites, and in connexion with them the place is again named in Judg. iv. 11,<sup>b</sup> with the additional definition of "by Kedesh (Naphthali)." Here, however, the A. V. following the Vulgate, renders the words "the plain of Zaananim." [EILON.] (See Stanley, 340, *note*.)

2. **ALLON-BAC'UTHI** (בְּכוֹת אֵילֹן) = "oak of weeping;" and so *βάλανος πένθους*; *querous fleatus*, the tree under which Rebekah's nurse, Deborah, was buried (Gen. xxxv. 8). Ewald (*Gesch.* iii. 29) believes the "oak of Tabor" (1 Sam. x. 3, A. V. "plain of T.") to be the same as, or the successor of, this tree, "Tabor" being possibly a merely dialectical change from "Deborah," and he would further identify it with the "palm-tree of Deborah" (Judg. iv. 5). See also Stanley, 143, 220. [G.]

**AJMO'DAD** (אֶימוֹדָד; 'Ελωδδδ; *Elnodad*), the first, in order, of the descendants of Joktan (Gen. x. 26; 1 Ch. i. 20), and the progenitor of an Arab tribe. His settlements must be looked for, in common with those of the other descendants of Joktan, in the Arabian peninsula; and his name appears to be preserved in that of Mudād (or El-Mudād, the word being one of those proper names that admit of the article's being prefixed), a famous personage in Arabian history, the reputed father of Ishmael's Arab wife (*Mūdāt ez-Zemdn*, &c.), and the chief of the Joktanite tribe Jurhum (not to be confused with the older, or first, Jurhum), that, coming from the Yemen, settled in the neighbourhood of Mekkeh, and intermarried with the Ishmaelites. The name of Mudād was

peculiar to Jurhum, and borne by several of its chiefs (Caussin de Perceval, *Essai sur l'Hist. des Arabes avant l'Islamisme*, &c., i. 33, *seq.*, 168, and 194, *seq.*). Gesenius (*Lex.* ed. Tregelles, in *loc.*) says, "If there were an ancient error in reading (for אֶלְמוֹדָד), we might compare *Morad*, مراد

or مراد, the name of a tribe living in a mountainous region of Arabia Felix, near Zahid." (For this tribe see Abulfedh *Hist. Aulcistanica*, ed.

Fleischer, p. 190.) Others have suggested مقدر, but the well-known tribes of this stock are of Ishmaelite descent. Bochart (*Phaleg*, li. 16) thinks that Almondal may be traced in the name of the Ἀλλουμαῖοι of Ptolemy (vi. 7, §24), a people of the interior of Arabia Felix, near the sources of the river Lar [ARABIA]. [E. S. P.]

**ALMON** (אֶלְמוֹן; Γάμαλα; *Almon*), a city within the tribe of Benjamin, with "suburbs" given to the priests (Josh. xxi. 18). Its name does not occur in the list of the towns of Benjamin in Josh. xviii. In the parallel list in 1 Chr. vi. it is found as Almemeth—probably a later form, and that by which it would appear to have descended to us. [ALMEMETH.] [G.]

**ALMON-DIBLATHA'IM** (אֶלְמוֹן דִּבְלָתַיִם; Γελαμών Δεβλαθαίμ; *Helmon-diblathaim*), one of the latest stations of the Ismaelites, between Dibon-gad and the mountains of Alavim (Num. xxviii. 46, 47). Dibon-gad is doubtless the present *Dhānā*, just to the north of the Arnon; and there is thus every probability that Almon-diblathaim was identical with Beth-diblathaim, a Moabite city mentioned by Jeremiah (xlviii. 22) in company with both Dibon and Nebo, and that its traces will be discovered on further exploration. [G.]

**ALMOND-TREE; ALMOND** (אֶלְמוֹדָד). In Jer. i. 11, *Shāqāl* signifies the tree, which was so called because it is the first of all trees which buds, and as it were awakes out of sleep, after the winter season (root שָׁקַל, *shāqāl*; Comp. Plin. xvi. 23, s. 42: "floret prima omnium amygdalarum nunc Januario, Martio veld pomum maturat"). The LXX. renders אֶלְמוֹדָד by βακκίαν καρύνην. In Gen. xlii. 11, Num. xvii. 8, אֶלְמוֹדָד signifies the fruit, and the LXX. have *κάρυα* in both places, the Vulg. *amygdala*. In Eccl. xii. 5, אֶלְמוֹדָד is rendered by the LXX. *καὶ ἀνοθήσει τὸ ἀμυγδαλον*, a rendering followed by the Vulg. and A. V., but rejected by Gesenius on the ground that the flower of the almond-tree is pink, not white; and therefore has no reference to the hoariness of old age. Gesenius suggests "spemnit sen fistilit (senex dentibus cenus) amygdalam," vel "fastidium erat amygdala seni."

In Ex. xxv. 33, 34, xxxvii. 19, 20, the Pual participle of the root שָׁקַל occurs, signifying "made

<sup>a</sup> אֵילֹן, *Allon*, is the reading of V. d. Hooght, and of Walton's Polyglott; but most MSS. have as above (Davidson's *Hebr. Text*, 46).

<sup>b</sup> It must be remarked that the Targum Jonathan renders this passage by words meaning "the plain of the swamp" (see Schwarz, 181). This is Ewald's

explanation also (*Gesch.* ii. 492, *note*). For other interpretations see Fürst (*H. W. R.* 91).

<sup>c</sup> The Sam. Version, according to its customary rendering of *Allon*, has here בכיתו בכיתו, "the plain of Bakhth." See this subject more fully examined under *Elac*.

in the form of the almond-flower." "In the candlestick shall be four bowls made like unto almonds, with their knops and flowers." [W. D.]

**ALMS** (Chald. ܐܠܡܝܢ, *almīn*), beneficence towards the poor, from Anglo-Sax. *almesse*, probably, as well as Germ. *almosen*, from *ἀλεμωσώνη*; *almosen*, Vulg. (but see Bosworth, *A. S. Diet.*). The word "almus" is not found in our version of the canonical books of O. T., but it occurs repeatedly in N. T., and in the Apocryphal books of Tobit and Ecclesiasticus. The Heb. ܐܪܬܐ, *righteousness*, the usual equivalent for *almus* in O. T., is rendered by LXX. in Deut. xiv. 13, Dan. iv. 24, and elsewhere, *ἀλεμωσώνη*, whilst some MSS., with Vulg. and Ethiop. Text., read in Matt. vi. 1, *δικαιοσύνη*.

The duty of almsgiving, especially in kind, consisting chiefly in portions to be left designedly from produce of the field, the vineyard, and the oliveyard (Lev. xix. 9, 10, xxv. 22; Deut. xv. 11, xxiv. 19, xxvi. 2-13; Ruth ii. 2), is strictly enjoined by the Law. After his entrance into the land of promise, the Israelite was ordered to present yearly the first-fruits of the land before the Lord, in a manner significant of his own previously destitute condition. Every third year also (Deut. xiv. 28) each proprietor was directed to share the tithes of his produce with "the Levite, the stranger, the fatherless, and the widow." The theological estimate of almsgiving among the Jews is indicated by the following passages: Job xxvi. 17; Prov. x. 2, xi. 4; Eccl. ix. 22; Ps. ex. 9; Acts ix. 36, the case of Dorcas; x. 2, of Cornelius: to which may be added, Tob. iv. 10, 11, xiv. 10, 11; and Eccles. iii. 30, xl. 24. And the Talmudists went so far as to attribute *righteousness* by almsgiving in such passages as Gen. xxiv. 19; Is. lvi. 14; Ps. xvii. 15.

In the women's court of the Temple there were receptacles for voluntary offerings (Mark vii. 41), one of which was devoted to alms for education of poor children of good family. Before the Captivity there is no trace of permission of mendicancy, but it was evidently allowed in later times (Matt. xx. 30; Mark x. 46; Acts iii. 2).

After the Captivity, but at what time it cannot be known certainly, a definite system of almsgiving was introduced, and even enforced under penalties. In every city there were three collectors. The collections were of two kinds; 1. of money for the poor of the city only, made by two collectors, received in a chest or box (קופה) in the synagogue on the Sabbath, and distributed by the three in the evening; 2. for the poor in general, of food and money, collected every day from house to house, received in a dish (מחבתה), and distributed by the three collectors. The two collections obtained the names respectively of "alms of the chest," and "alms of the dish." Special collections and distributions were also made on fast-days.

The Pharisees were zealous in almsgiving, but too ostentatious in their mode of performance, for which our Lord finds fault with them (Matt. vi. 2). But there is no ground for supposing that the expression *μη σαλπίζετε* is more than a mode of denouncing their display, by a figure drawn from the frequent and well-known use of trumpets in religious and other celebrations, Jewish as well as heathen. Winer, *s. v.* Καρπὸν. *Eleem. Jud.* 32. Vittinga, *De Syn.* vol. iii. 1, 13. Elshley, *On Gospels*. Maimonides, *De Jure Pauperis*, vii. 10; ix. 1, 6; x.

(Pridenaux). Jahn, *Arch. Bibl.* iv. 371. (Upham.) Lightfoot, *Horae Hebr.*, on Matt. vi. 2, and *Deacr. Templi*, 19. *Diet. of Antiqs.* s. v. 'Tuba.' [See OFFERINGS; POOR; TITHES; TRUMPETS.]

The duty of relieving the poor was not neglected by the Christians (Matt. vi. 1-4; Luke xiv. 13; Acts xv. 35; Gal. ii. 10). Every Christian was exhorted to lay by on the Sunday in each week some portion of his profits, to be applied to the wants of the needy (Acts xi. 30; Rom. xv. 25-27; 1 Cor. xvi. 1-4). It was also considered a duty specially incumbent on widows to devote themselves to such ministrations (1 Tim. v. 10). [H. W. P.]

**ALMUG** or **ALGUM TREE** (אֶלְמוֹג וְאֶלְמוֹגָן; the former occurring in 1 K. x. 11, 12, and the latter in 2 Chr. ii. 8, ix. 10, 11). From these passages we learn that these trees were brought from Ophir and from Lebanon, and that the timber was used for pillars for the house of the Lord and for the king's house, for terraces or stairs (מַסְמָס), and for harps and psalteries for singers. Most of the Rabbins take the words to signify corals, and in this sense אֶלְמוֹג is used in the Talmud; but there can be little doubt that some kind of wood is meant, and that this Rabbinical meaning is due to similarity of colour between the two substances. Most later writers follow Celsius (*Hierobot.* i. p. 171, *seq.*), who take it to mean the red sandal-wood of China and the Indian Archipelago (*Pterocarpus santalinus* of Linnaeus), of which to this day in India costly utensils are made. The statement in 2 Chr. ii. 8, ascribing the growth of almug-trees to Mount Lebanon, is adverse to this identification; but Gesenius suggests with great probability that this statement is due to the fact of this timber being exported from Tyre, after having been brought thither from the East. The ancient versions afford no certain clue as to what tree is meant. The LXX. in 1 K. i. c. have πελεκητά αὐτὰ ἀπελέκτα, in 2 Chr. i. c. πεύκινα. The Vulgate has *theopha*, from *θύον*, *thula*—an African tree with sweet-smelling wood used for making costly furniture, and variously identified with the cedar, the savin, and the African *arbor vitae*. (See Hom. *Od.* v. 60; Voss, *ad Virg. Georg.* ii. 126.) Some authors take the almug-tree to be a kind of cedar, relying on the passage in 2 Chr.; and Dr. Shaw supposes it to have been the cypress, because the wood of that tree is still used in Italy and elsewhere for violins, harpsichords, and other stringed instruments. Miller (*Hierophyt.* xiii. § 7) supposes a gummy or resinous wood to be meant, but this would be unfit for the uses to which the almug-tree is said to have been applied. Josephus (*Ant.* vii. 7) describes the wood as that of a kind of pine, which he distinguishes from the pine of his own days. [W. D.]

**ALOE** or **LIGN ALOE** (אֶלְיָן or מִלְחָן). a species of odoriferous tree, called by the Greeks ἀγδάλλοχον, and by later writers *ξύλαδον*. The word occurs four times in A. V., viz. Num. xiv. 6; Prov. vi. 17; Ps. xlv. 9; Cant. iv. 14. In the first two passages the LXX. have no direct rendering of the word, as they have confused it with the plur. of *לָחֶן*, *tentorium*; in the third passage they represent it by *στακτή*; and in the fourth by *ἀλάθ*, which is merely the Hebrew word in Greek characters. The *agallochus* is the aloes-wood of later

authors, called also paradise-wood and eagle-wood. It is agreed that there are two sorts of *agallochus*, the one true and very excellent, the other spurious, or at any rate inferior. The former grows in Cochin China, in the kingdom of Siam and in China, is never exported, and is so rare in India as to be worth its weight in gold. Pieces of the wood, resinous, blackish, heavy, and perforated as by worms, are called *'Akumbac*. The people of Siam call the tree itself *Kissina*; the Japanese *Kincoriki*, or scented-tree; and the Chinese *Sûk-hian*. The aroma of the tree is said to arise when it becomes old from the thickening of the oily particles into resin within the trunk. See description and figure of the tree in *Kumphii Herb. Amboinensi*, v. ii. p. 29-40. The inferior sort is called *Garo* in Eastern India, and is the wood of a tree growing in the Moluccas, *Excoecaria Agallocha* of Linnaeus. The native name of this tree is *aghil*, *karyuhil*, or *karyurur*, from which both the Greek and Heb. names would seem to be derived. The Portuguese, the first Europeans who visited India, on account of the similarity of sound, called the *aghil*, eagle-wood, whence we have the French *bois d'aigle*, and the Germ. *Adlerholz*. De Saey suggests a connexion between *אללוח* and the Arabic *هبل هال* or *قائلة*

("quod more Aegyptiorum pronuntiatur *hahula*" = *cardamomum*, Avicenn. *Op. Arab.* v. i. p. 163, 243, 275; but Gesenius demurs to this as too bold.

The aloce-wood is used in the East for perfuming garments and rooms, and is also administered as a cordial in fainting and epileptic fits. The flower of the *Excoecaria* is highly fragrant. See Cels. *Herobot.* v. i. p. 134-170; Dioscorid. i. v. 21; and De Lamarck, *Encycl. Method.* i. 422-429. [W. D.]

**ALLOTH** (אללוח; *Βααλὺθ*; *Baloth*), a place or district, forming with Asher the jurisdiction of the ninth of Solomon's commissariat officers (1 K. iv. 16). It is read by the LXX. and later scholars as Bealoth, though the A. V. treats the *ל* as a prefix. In the former case see *ΒΑΛΙΟΤΗ*. Josephus has *τὴν περὶ Ἀρκὴν παραλίαν*, *Ἀρκή* being the name which he elsewhere gives to Esclippa (Achezb) on the sea-coast in Asher. [G.]

**ALPHAËUS** (Ἀλφαῖος; *Ἰϛ*), the father of the lesser St. James the Apostle (Matt. x. 3; Mark iii. 18; Luke vi. 15; Acts i. 13), and husband of that Mary (called in Mark xv. 40, mother of James the less and of Josias) who, with the mother of Jesus and others, was standing by the cross during the crucifixion (John xix. 25). [MARY.] In this latter place he is called Clopas (not, as in the A. V., Cleophas); a variation arising from the double pronunciation of the letter *π*; and found also in the LXX. rendering of Hebrew names. Winer compares *Ἀργαῖος* from *יִנְי*, *Ἐσθ* from *מִתְנִי*, *פασέκ* from *פִּסְפִּי* (2 Chr. xxx. 1), *Ταβέκ* from *תַּבְכִּי* (Gen. xxii. 24), and says that although no reliable example appears in the LXX. of the harleuing of *π* at the beginning of a word, yet such are found, as in *Κιλικία* from *קִלְקִי*. Whether the fact of this variety existing gives us a further right to identify Alphaeus with the Cleopas of Luke xxiv. 18, can never be satisfactorily determined. If, as commonly, the ellipsis in *Τοῦτος Ἰακώβου* in Luke vi. 15, Acts i. 13, is to be filled up by inserting *Ἀδελφός*, then the apostle St. Jude was another son of Alphaeus. And in Mark ii. 14, Levi (or Matthew)

is also said to have been the son of Alphaeus. Nor can any satisfactory reason be given why we should suppose this to have been a different person, as is usually done. For further particulars, see JAMES THE LESS, and BRETHREN OF JESUS. [H. A.]

**ALTAR** (חֶבֶד; *θυιαστήριον*, *Βωμὸς*; *altare*). (A.) The first altar of which we have any account is that built by Noah when he left the ark (Gen. vii. 20). The Targumists indeed assert that Adam built an altar after he was driven out of the garden of Eden, and that on this Cain and Abel, and afterwards Noah and Abraham, offered sacrifice (Pseudo Jonath. Gen. viii. 20, xxii. 9). According to the tradition the First Man was made upon an altar which God himself had prepared for the purpose, and on the site of this altar were reared both those of the Patriarchs and that in the Temple of Solomon. This tradition, if no other way valuable, at least shows the great importance which the Jews attached to the altar as the central point of their religious worship (Bähr, *Symbol.* ii. 350).

In the early times altars were usually built in certain spots hallowed by religious associations, *e. g.* where God appeared (Gen. xii. 7, xiii. 18, xxvi. 25, xxxv. 1). Generally of course they were erected for the offering of sacrifice; but in some instances they appear to have been only memorial. Such was the altar built by Moses and called Jehovah Nissi, as a sign that the Lord would have war with Amalek from generation to generation (Ex. xvii. 15, 16). Such too was the altar which was built by the Reubenites, Gadites, and half-tribe of Manasseh, "in the borders of Jordan," and which was erected "not for burnt offering nor for sacrifice," but that it might be "a witness" between them and the rest of the tribes (Josh. xxii. 10-29). Altars were most probably originally made of earth. The Law of Moses allowed them to be made either of earth or unhewn stones (Ex. xx. 26); any iron tool would have profaned the altar—but this could only refer to the body of the altar and that part on which the victim was laid, as directions were given to make a casing of shittim-wood overlaid with brass for the altar of burnt offering. (See below.)

In later times they were frequently built on high places, especially in idolatrous worship (Deut. xii. 2; for the pagan notions on this subject, see Tac. Ann. xiii. 57). The altars so erected were themselves sometimes called "high places" (*בָּמוֹת*, 2 K. xxiii. 8; 2 Chr. xiv. 3, &c.). By the Law of Moses all altars were forbidden except those first in the Tabernacle and afterwards in the Temple (Lev. xvii. 8, 9; Deut. xii. 13, &c.). This prohibition, however, was not strictly observed, at least till after the building of the Temple, even by pious Israelites. Thus Gideon built an altar (Judg. vi. 24). So likewise did Samuel (1 Sam. vii. 9, 10), David (2 Sam. xxiv. 25), and Solomon (1 K. iii. 4).

The sanctity attaching to the altar led to its being regarded as a place of refuge or asylum (Ex. xxi. 14; 1 K. i. 50).

(B.) The Law of Moses directed that two altars should be made, the one the Altar of Burnt-offering (called also the Altar *κατ' ἐξοχήν*, see Hävernick in Ez. xliii. 13 ft.) and the other the Altar of Incense.

I. The Altar of Burnt offering (מִזְבֵּחַ הַעֹלָה), called in Malach. i. 7, 12, "the table of the Lord," perhaps also in Ez. xlv. 16. This differed in construction at different times. (1.) In the Tabernacle

(Ex. xxvii. 1 ff. xxxviii. 1 ff.) it was comparatively small and portable. In shape it was square. It was five cubits in length, the same in breadth, and three cubits high. It was made of planks of shittim (or acacia)-wood overlaid with brass. (Josephus says *gold* instead of *brass*, *Ant.* iii. 6, §8).

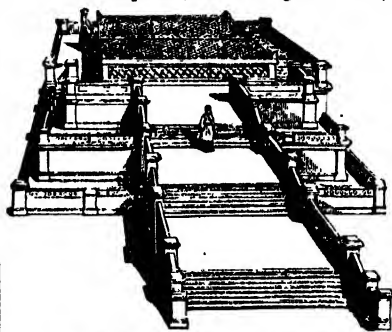

The interior was hollow (לְחֹת, קִבּוּב, Ex. xxvii. 8). But as nothing is said about a covering to the altar on which the victims might be placed, Jarchi is probably correct in supposing that whenever the tabernacle for a time became stationary, the hollow case of the altar was filled up with earth. In support of this view he refers to Ex. xv. 24, where the command is given, "make me an altar of earth," &c., and observes: "Altare terreum est hoc ipsum aeneum altare ejus concavum terra implebatur, cum castra metaentur."

At the four corners were four projections called horns, made, like the altar itself, of shittim-wood overlaid with brass. It is not quite certain how the words in Ex. xxvii. 2, מַמְנוֹ תַּחֲתֵי קַרְנָיו, should be explained. According to Mendelsohn they mean that these horns were of one piece with the altar. So also Knobel (*Comm.* in loc.). And this is probably right. By others they are understood to describe only the projection of the horns from the altar. These probably projected upwards; and to them the victim was bound when about to be sacrificed (Ps. cxviii. 27). On the occasion of the consecration of the priests (Ex. xxix. 12) and the offering of the sin-offering (Lev. iv. 7 ff.) the blood of the victim was sprinkled on the horns of the altar. (See the symbolism explained by Baumgarten, *Commentar zum Pentateuch*, ii. 63.) Round the altar midway between the top and bottom (or, as others suppose, at the top) ran a projecting ledge (פֶּרֶכֶב, A. V. "Compass") on which perhaps the priests stood when they officiated. To the outer edge of this, again, a grating or net-work of brass (מִקְבֵּר מַעֲשֵׂה רֶשֶׁת נְחֹשֶׁת) was affixed, and reached to the bottom of the altar, which thus presented the appearance of being larger below than above.\* Others have supposed this grating to adhere closely to the boards of which the altar was composed, or even to have been substituted for them half-way up from the bottom.

At any rate there can be little doubt that the grating was perpendicular, not horizontal as Jonathan supposes (Tagum on Ex. xxvii. 5). According to him it was intended to catch portions of the sacrifice or coals which fell from the altar, and which might thus be easily replaced. But it seems improbable that a net-work or grating should have been constructed for such a purpose (cf. Joseph. *Ant.* iii. 6, §8). At the four corners of the network were four brassen rings into which were inserted the staves by which the altar was carried. These staves were of the same materials as the altar itself. As the priests were forbidden to ascend the altar by steps (Ex. xx. 26), it has been conjectured that a slope of earth led gradually up to the פֶּרֶכֶב, or ledge from which they officiated. This must have

been either on the north or south side; for on the east was "the place of the ashes" (Lev. i. 16), and on the west at no great distance stood the laver of brass. According to the Jewish tradition it was on the south side. The place of the altar was at "the door of the tabernacle of the tent of the congregation" (Ex. xl. 28). The various utensils for the service of the altar (Ex. xxvii. 3) were: (1.) כִּירֹת, pans to clear away the fat (לִישְׁנוֹ) and ashes with; elsewhere the word is used of the pots in which the flesh of the sacrifices was put to seethe (cf. Zech. xiv. 20, 21, and 2 Chr. xxxv. 13, with 1 Sam. ii. 14). (2.) יָעִים, shovels, Vulg. *forcipes*, Gesen. *palae cineri removendo*. (3.) מִזְרָקוֹת, basins. LXX. *φιαλαί*, vessels in which the blood of the victims was received, and from which it was sprinkled (ר. וִרְקָה). (4.) מַלְלָחֹת, flesh-hooks, LXX. *κρεμάγγει*, by means of which the flesh was removed from the cauldron or pot. (See 1 Sam. ii. 13, 14, where they are described as having three prongs.) (5.) מִחֻחֹת, fire-pans, or perhaps censers. These might either be used for taking coals from the fire on the altar (Lev. xvi. 12); or for burning incense (Num. xvi. 6, 7). There is no reason to give the word a different meaning in Ex. xxv. 38, where our version, following the Vulgate, translates it "snuff-dishes." All these utensils were of brass.

(2.) In Solomon's Temple the altar was considerably larger in its dimensions, as might have been expected from the much greater size of the building in which it was placed. Like the former it was square: but the length and breadth were now twenty cubits, and the height ten (2 Chr. iv. 1). It differed, too, in the material of which it was made, being entirely of brass (1 K. viii. 64; 2 Chr. vii. 7). It had no grating; and instead of a single gradual slope, the ascent to it was probably made by three successive platforms, to each of which it has been supposed that steps led (Surenhus. *Mishn.*, vol. ii. p. 261, as in the figure annexed).

Altar of Burnt Offerings, from Surenhus' *Mishna*.

Against this may be urged the fact that the Law of Moses positively forbade the use of steps (Ex. xx. 26) and the assertion of Josephus that in Herod's temple the ascent was by an inclined plane. On the other hand steps are introduced in the ideal, or symbolical, temple of Ezekiel (xliii. 17), and the prohibition in Ex. xx. has been interpreted as applying to a continuous flight of stairs and not to a broken ascent. But the Biblical account is so brief that we are necessarily unable to determine the

\* Knobel (*in loc.*) is of opinion that the object of the net-work was to protect the altar from being injured by the feet and knees of the officiating priests. פֶּרֶכֶב, he thinks, was merely an ornament by way of finish, at the top of this.

question. Asa, we read, renewed (שִׁחַן) this altar (2 Chr. xv. 8). This may either mean that he repaired it, or more probably perhaps that he reconsecrated it after it had been polluted by idol-worship (*εὐκαιρίαι*, LXX.). Subsequently Abaz had it removed from its place to the north side of the new altar which Urijah the priest had made in accordance with his direction (2 K. xvi. 14). It was "cleansed" by command of Hezekiah (חֶזְקִיָּהוּ, 2 Chr. xxix. 18), and Manasseh, after renouncing his idolatry, either repaired (חֶזֶק, חֶזֶק) or rebuilt it (Keri, וִיבֵן). It may finally have been broken up and the brass carried to Babylon, but this is not mentioned (Jer. lii. 17 ff.). According to the Rabbinical tradition, this altar stood on the very spot on which man was originally created.

(3.) The Altar of Burnt-offering in the second (Zerubbabel's) temple. Of this no description is given in the Bible. We are only told (Ezr. iii. 2) that it was built before the foundations of the Temple were laid. According to Josephus (*Ant.* xi. 4, § 1) it was placed on the same spot on which that of Solomon had originally stood. It was constructed, as we may infer from 1 Macc. iv. 47, of unhewn stones (*ἀγλῶς δλοκλήρους*). Antiochus Epiphanes de-voted it (*ἐξοδόμνησαν βδέλυγμα ἐρημώσεως ἐπὶ το θυσιαστήριον*, 1 Macc. i. 54); and according to Josephus (*Ant.* xii. 5, § 4) removed it altogether. In the restoration by Judas Maccabæus a new altar was built of unhewn stone in conformity with the Mosaic Law (1 Macc. iv. 47).

(4.) The altar erected by Herod, which is thus described by Josephus (*B. J.* v. 5, § 6):—"In front of the Temple stood the altar, 15 cubits in height, and in breadth and length of equal dimensions, viz. 50 cubits: it was built foursquare, with horn-like corners projecting from it; and on the south side a gentle acclivity led up to it. Moreover it was made without any iron tool, neither did iron ever touch it at any time." Rufin. has 40 cubits square instead of 50. The dimensions given in the Mishna are different. It is there said (Middoth, 3, 1) that the altar was at the base 32 cubits square; at the height of a cubit from the ground 30 cubits square; at 5 cubits higher (where was the circuit, סוֹבֵבָה) it was reduced to 28 cubits square, and at the horns still further to 26. A space of a cubit each way was here allowed for the officiating priests to walk, so that 24 cubits square were left for the fire on the altar (הַמִּשְׁכָּח). This description is not very clear. But the Rabbinical and other interpreters consider the altar from the סוֹבֵבָה upwards to have been 28 cubits square, allowing at the top, however, a cubit each way for the horns, and another cubit for the passage of the priests. Others, however (as L'Empereur *in loco*), suppose the ledge on which the priests walked to have been 2 cubits lower than the surface of the altar on which the fire was placed.

The Mishna further states, in accordance with Josephus (see above), and with reference to the law already mentioned (Ex. xx. 25), that the stones of which the altar was made were unhewn; and that twice in the year, viz. at the Feast of the Passover and the Feast of Tabernacles they were white-washed afresh. The way up (בִּבְשָׁ) was on the south side, 32 cubits long and 16 broad, constructed

also of unhewn stones. In connexion with the horn on the south-west was a pipe intended to receive the blood of the victims which was sprinkled on the left side of the altar: the blood was afterwards carried by means of a subterranean passage into the brook Kidron. Under the altar was a cavity into which the drink-offerings passed. It was covered over with a slab of marble, and emptied from time to time. On the north side of the altar were a number of brazen rings, to secure the animals which were brought for sacrifice. Lastly, round the middle of the altar ran a scarlet thread (חוט של כִּיכָרָה) to mark where the blood was to be sprinkled, whether above or below it.

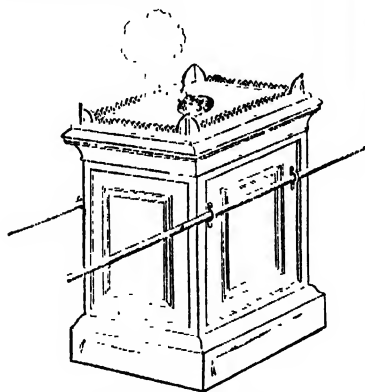

According to Lev. vi. 12, 13, a perpetual fire was to be kept burning on the altar. This, as Bähr (*Symbol.* ii. 350) remarks, was the symbol and token of the perpetual worship of Jehovah. For inasmuch as the whole religion of Israel was concentrated in the sacrifices which were offered, the extinguishing of the fire would have looked like the extinguishing of the religion itself. It was therefore, as he observes, essentially different from the perpetual fire of the Persians (*Curt.* iii. 3; *Amm.* Marc. xxiii. 6; *Hyde, Rel. Vet. Pers.* viii. p. 148), or the fire of Vesta to which it has been compared. These were not sacrificial fires at all, but were symbols of the Deity, or were connected with the belief which regarded fire as one of the primal elements of the world. This fire, according to the Jews, was the same as that which came down from heaven (*πῦρ οὐρανόπερες*) "and consumed upon the altar the burnt-offering and the fat" (Lev. ix. 24). It coughed upon the altar, they say, like a lion; it was bright as the sun; the flame thereof was solid and pure; it consumed things wet and dry alike; and, finally, it emitted no smoke. This was one of the five things existing in the first temple which tradition declares to have been wanting in the second (*Tinct. Joma*, c. i. sub fin. fol. 21, col. b.). The fire which consumed the sacrifices was kindled from this; and besides these there was the fire from which the coals were taken to burn incense with. (See Carpzov. *Apparat. Hist. Crit. Annot.* p. 286.)

II. The Altar of Incense (מִזְבֵּחַ הַקֶּטֶר) and מִקְטֹרֶת, Ex. xxx. 1; *θυσιαστήριον θυμιάματος*, LXX.), called also the golden altar (מִזְבֵּחַ הָהָרֶבֶב, Ex. xxxix. 38; *Num.* iv. 11) to distinguish it from the Altar of Burnt-offering, which was called the brazen altar (Ex. xxxviii. 30). Probably this is meant by the "altar of wood" spoken of Ezek. xli. 22, which is further described as the "table that is before the Lord," precisely the expression used of the altar of incense. (See Delitzsch, *Brief an die Hebr.* p. 678.) The name מִזְבֵּחַ, "altar," was not strictly appropriate, as no sacrifices were offered upon it; but once in the year, on the great day of atonement, the high-priest sprinkled upon the horns of it the blood of the sin-offering (Ex. xxx. 10).

(a.) That in the Tabernacle was made of acacia-wood, overlaid with pure gold. In shape it was square, being a cubit in length and breadth, and 2 cubits in height. Like the Altar of Burnt-offering it had horns at the four corners, which were of one piece with the rest of the altar. (So Rabb. Levi ben Gerson:—"Disimus inde quod non conveniat facere cornua separatim, et altari deinde ap-

ponere, sed quod cornua debeant esse ex corpore altaris" (*Comment. in Leg.* fol. 109, col. 4).

It had also a top or roof (33; *ἑσχαρά*, LXX.), on which the incense was laid and lighted. Many, following the interpretation of the Vulgate *craticulum ejus*, have supposed a kind of grating to be meant; but for this there is no authority. Round the altar was a border or wreath (71; *στεφανὸν χρυσὸν*, LXX.). Josephus says: *ἑστὴν ἑσχαράν χρυσία ὑπὲρ ἀνεστῶσα, ἔχουσα κατὰ γωνίας ἐκαστὴν στέφανον* (*Ant.* iii. 7). "Erat itaque cinctum, ex solido conflatum auro, quod tecto ita adhaerebat, ut in extremitate illud cingeret, et prohiberet, ne quid facile ab altari in terram devolveretur." (*Caipaz. Appu. Hist. Crit. Annot.* p. 273.) Below this were two golden rings which were to be "for places for the staves to bear it withal." The staves were of acacia-wood overlaid with gold. Its appearance may be illustrated by the following figure:—

Supposed form of the Altar of Incense.

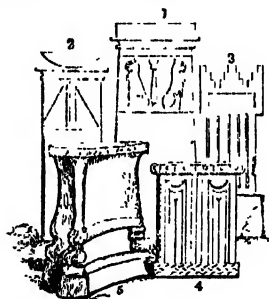

This altar stood in the Holy Place, "before the veil that is by the ark of the testimony" (*Ex.* xxx. 6, xl. 5). Philo too speaks of it as *ἔσω τοῦ προτέρου καταπέτασματος*, and as standing between the candlestick and the table of shew-bread. In apparent contradiction to this, the author of the Epistle to the Hebrews enumerates it among the objects which were within the second veil (*μετὰ τὸ δεύτερον καταπέτασμα*), i. e. in the Holy of Holies. It is true that by *θυμιατήριον* in this passage may be meant "a censer," in accordance with the usage of the LXX., but it is better understood of the Altar of Incense which by Philo and other Hellenists is called *θυμιατήριον*. It is remarkable also that in 1 K. vi. 22, this same altar is said to belong to "the oracle" (*הַמִּזְבֵּחַ אֲשֶׁר לַדְּבִיר*) or most Holy Place. This may perhaps be accounted for by the great typical and symbolical importance attached to this altar, so that it might be considered to belong to the *δευτέρα σκηνή*. (See Bleek on *Heb.* ix. 4, and Deitzsch *in loc.*)

(b.) The Altar in Solomon's Temple was similar (1 K. vii. 48; 1 Chr. xxviii. 18), but was made of cedar overlaid with gold. The altar mentioned in *Is.* vi. 6 is clearly the Altar of Incense, not the Altar of Burnt-offering. From this passage it would seem that heated stones (*רִצְפָה*) were laid

upon the altar, by means of which the incense was kindled. Although it is the heavenly altar which is there described, we may presume that the earthly corresponded to it.

(c.) The Altar of Incense is mentioned as having been removed from the Temple of Zerubbabel by Antiochus Epiphanes (1 Macc. i. 21). Judas Maccabaens restored it, together with the holy vessels, &c. (1 Macc. iv. 49). On the arch of Titus no Altar of Incense appears. But that it existed in the last Temple, and was richly overlaid, we learn from the Mishna (*Hagiga* 3, 8). From the circumstance that the sweet incense was burnt upon it every day, morning and evening (*Ex.* xxx. 7, 8), as well as that the blood of atonement was sprinkled upon it (v. 10), this altar had a special importance attached to it. It is the only altar which appears in the Heavenly Temple (*Is.* vi. 6; *Rev.* viii. 3, 4).

C. Other Altars. (1.) Altars of brick. There seems to be an allusion to such in *Is.* lxx. 3. The words are: *מִקְטָרִים עַל הַלֶּבֶנִים*, "offering incense on the bricks," generally explained as referring to altars made of this material, and probably situated in the "gardens" mentioned just before. Rosenmüller suggests, however, that the allusion is to some Babylonish custom of burning incense on bricks covered over with magic formulæ or cuneiform inscriptions. This is also the view of Gesenius and Maurer.

Various Altars.

- 1, c. Egyptian, from bas relief. (Boswellg.)
- 2 American, found at Nineveh. (Layard.)
- 3 Babylonian, from the Ishtar Gate. (Layard.)
- 4 Assyrian, from Khorsabad. (Layard.)

(2.) An Altar to an Unknown God (*Ἀγνώστου Θεοῦ*, Acts xvii. 22). What altar this was has been the subject of much discussion. St. Paul merely mentions in his speech on the Areopagus that he had himself seen such an altar in Athens. His assertion, as it happens, is confirmed by other writers. Pausanias says (i. §4), *ἐν ταῖς καὶ βασιλεὺς θεῶν τε ἀνομιζομένους ἀγνώστους καὶ ἁρώων καὶ παίδων τῶν Θήσους καὶ Φαλῆρον*. And Philostratus (*Vil. Apollon.* vi. 3), *σωφρονέστερον τὸ περὶ τῶν θεῶν εὐ λέγειν, καὶ τὰτα Ἀθηναίων, οὐ καὶ ἀγνώστους δαυμόνων βασιλῶν ἴδονται*. This, as Winer observes, need not be interpreted as if the several altars were dedicated to a number of *ἀγνώστου θεοῖ*, but rather that *each* altar had the inscription *Ἀγνώστου Θεοῦ*. It is not at all probable that such inscription referred to the God of the Jews, as One whose Name it was unlawful to utter (as Wolf and others have supposed). As to the origin of these altars, Eichhorn suggests that they may

have been built before the art of writing was known (*Βαμολ ἀνώνυμοι*), and subsequently inscribed ἀγν. θεῶ. Neander's view, however, is probably more correct. He quotes Diog. Laertius, who, in his Life of Epimenides, says that in the time of a plague, when they knew not what God to propitiate in order to avert it, he caused black and white sheep to be let loose from the Areopagus, and wherever they lay down, to be offered to the respective divinities (τῶ προσήκοντι θεῷ). ὁθεν, adds Diogenes, ἐτι καὶ πῶν ἐστὶν εὐρεῖν κατὰ τοὺς δῆμους τῶν Ἀθ. βαμολὺς ἀνώνυμους. On which Neander remarks that on this or similar occasions altars might be dedicated to an Unknown God, since they knew not what God was offended and required to be propitiated. [J. J. S. P.]

**AL-TASCHITH** (תַּשְׁחִית, *Al Tashcheth*), found in the introductory verse to the four following Psalms: lvi., lviii., lix., lxxv. Literally rendered, the import of the words is "destroy not;" and hence some Jewish commentators, including Rashi (רש"י) and Kimchi (קמחי), have regarded תַּשְׁחִית as a compendium of the argument treated in the above-mentioned Psalms. Modern expositors, however, have generally adopted the view of Aben-Ezra (Comment. on Psalm lvii.), agreeably to which "Al Tashcheth" is the beginning of some song or poem to the tune of which those psalms were to be chaunted. [D. W. M.]

**ALUSH** (אֲלוּשׁ, Sam. אֲלוּשׁ; *Alous*; *Alus*), one of the stations of the Israelites on their journey to Sinai, the last before Rephlim (Num. xxxiii. 13, 14). No trace of it has yet been found. In the Seder Olam (Kitto, *Cyc. s. v.*) it is stated to have been 8 miles from Rephlim. [i.]

**AL'VAH** (אֶלְוָה; *Γωλδ*; *Aleu*), a duke of Edom (Gen. xxxvi. 40), written Aliah (אֶלְיָה) in 1 Chr. i. 51.

**AL'VAN** (אֶלְוָן; *Γωλδμ*; *Atrun*), a Horite, son of Shobal (Gen. xxvi. 23), written Alian (אֶלְיָן) in 1 Chr. i. 40.

**A'MAD** (אֶמָד; *Ἀμαία*; *Amasad*), an unknown place in Asher between Alammelech and Mishael (Josh. xix. 26 only).

**AMAD'ATHA** (Esth. xvi. 10, 17); and **AMAD'ATHUS** (Esth. xii. 6). [ΗΑΜΜΕΔΑΘΙΑ.]

**A'MAL** (אֶמָל; *Ἀμάλ*; *Amal*), name of a man (1 Chr. vii. 35).

**AM'ALEK** (אֶמָלֶק; *Ἀμαλήκ*; *Amalech*), son of Eliphaz by his concubine Timnah, grandson of Esau, and one of the chieftains ("dukes" A. V.) of Edom (Gen. xxxvi. 12, 16). His mother came of the Horite race, whose territory the descendants of Esau had seized; and, although Amalek himself is represented as of equal rank with the other sons of Eliphaz, yet his posterity appear to have shared the fate of the Horite population, a "remnant" only being mentioned as existing in Edom in the time of Hezekiah, when they were dispersed by a band of the tribe of Simeon (1 Chr. iv. 43). [W. L. B.]

**AMAL'EKITES** (אֶמָלֶקִּי; *Ἀμαληκίται*; *Amalecites*), a nomadic tribe, which occupied the peninsula of Sinai and the wilderness intervening

between the southern hill-ranges of Palestine and the border of Egypt (Num. xiii. 29; 1 Sam. xv. 7, xxvii. 8). Arabian historians represent them as originally dwelling on the shores of the Persian Gulf, whence they were pressed westwards by the growth of the Assyrian empire, and spread over a portion of Arabia at a period antecedent to its occupation by the descendants of Joktan. This account of their origin harmonizes with Gen. xiv. 7, where the "country" ("princes" according to the reading adopted by the LXX.) of the Amalekites is mentioned several generations before the birth of the Edomite Amalek: it throws light on the traces of a permanent occupation of central Palestine in their passage westward, as indicated by the names Amalek and Mount of the Amalekites (Judg. v. 14, xii. 15); and it accounts for the silence of Scripture as to any relationship between the Amalekites on the one hand, and the Edomites or the Israelites on the other. That a mixture of the two former races occurred at a later period, would in this case be the only inference from Gen. xxxvi. 16, though many writers have considered that passage to refer to the origin of the whole nation, explaining Gen. xiv. 7, as a case of *prolepsis*. The physical character of the district, which the Amalekites occupied [ARABIA], necessitated a nomadic life, which they adopted to its fullest extent, taking their families with them even on their military expeditions (Judg. vi. 5). Their wealth consisted in flocks and herds. Mention is made of a "town" (1 Sam. xv. 5), and Josephus gives an exaggerated account of the capture of several towns by Saul (*Ant.* vi. 7, §2); but the towns could have been little more than stations, or nomadic enclosures. The kings or chieftains were perhaps distinguished by the hereditary title Agag (Num. xxiv. 7; 1 Sam. xv. 8). Two important routes led through the Amalekite district, viz., from Palestine to Egypt by the *Isthmus of Suez*, and to southern Asia and Africa by the *Adenitic arm of the Red Sea*. It has been conjectured that the expedition of the four kings (Gen. xiv.) had for its object the opening of the latter route; and it is in connexion with the former that the Amalekites first came in contact with the Israelites, whose progress they attempted to stop, adopting a *guerrilla* style of warfare (Deut. xxv. 18), but were signally defeated at REPHIDIM (Ex. xvii.). In union with the Canaanites they again attacked the Israelites on the borders of Palestine, and defeated them near HORMAH (Num. xiv. 45). Thenceforward we hear of them only as a secondary power, at one time in league with the Moabites (Judg. iii. 13), when they were defeated by Ehud near Jericho; at another time in league with the Midianites (Judg. vi. 3) when they penetrated into the plain of Esdraelon, and were defeated by Gideon. Saul undertook an expedition against them, overrunning their whole district "from Havilah to Shur," and inflicting an immense loss upon them (1 Sam. xv.). Their power was thenceforth broken, and they degenerated into a horde of banditti, whose style of warfare is well expressed in the Hebrew term מְרִידִים (*Gesen. Lex.*) frequently applied to them in the description of their contests with David in the neighbourhood of Ziklag, when their destruction was completed (1 Sam. xxvii., xxx.; comp. Numb. xxiv. 20). [W. L. B.]

**A'MAM** (אֶמָם; *Ἄμμ*; *Amam*), a city in the south of Judah, named with Shema and Moladah (*el-Milāh*) in Josh. xv. 26, only. In the Alex. LXX.

the name is joined to the preceding—*ἀσραμδμ*. Nothing is known of it. [G.]

A'MAN. [HAMAN.]

AMA'NA (אֲמָנָה), apparently a mountain in or near Lebanon,—“from the head of Amara” (Cant. iv. 8). It is commonly assumed that this is the mountain in which the river Abana (2 K. v. 12; Keri, Targum Jonathan, and margin of A. V. “Amara”) has its source, but in the absence of further research in the Lebanon this is mere assumption. The LXX. translate *ἀπὸ ἀρχῆς πηγῶν*. [G.]

AMAR'IAH (אֲמַרְיָה and אֲמַרְיָהוּ; 'Αμαρία and 'Αμαρίας; *Amirius*; whom God promised, Sim., Gesen., i. g. Θεόπραστος). Father of Ahitub, according to 1 Chr. vi. 7, 52, and son of Meraioth, in the line of the high-priests. In Josephus's Hist. (*Ant.* viii. 1, §3) he is transformed into Ἀροφαῖος.

2. The high-priest in the reign of Jehoshaphat (2 Chr. xiv. 11). He was the son of Azariah, and the fifth high-priest who succeeded Zadok (1 Chr. vi. 11). Nothing is known of him beyond his name, but from the way in which Jehoshaphat mentions him he seems to have seconded that pious king in his endeavours to work a reformation in Israel and Judah (see 2 Chr. xvii. xix.). Josephus, who calls him 'Αμαρίαν τὸν ἱερέα, “Amaziah the priest,” unaccountably says of him that he was of the tribe of Judah, as well as Zebadiah, as the text now stands. But if *ἐκατέριος* is struck out this absurd statement will disappear (*Ant.* ix. 1, §1). It is not easy to recognise him in the wonderfully corrupt list of high-priests given in the *Ant.* x. 8, §6. But he seems to be concealed under the strange form ΑΞΙΟΡΑΜΟΣ, Axioramus. The syllable ΑΞ is corrupted from ΑΣ, the termination of the preceding name, Azarias, which has accidentally adhered to the beginning of Amariah, as the final Σ has to the very same name in the text of Nicphorus (ap. *Sold. de Success.* p. 103), producing the form Σαμαρίας. The remaining *ἱεράματος* is not far removed from 'Αμαρίας. The successor of Amariah in the high-priesthood must have been Johoiada. In Josephus *Φιδέας*, which is a corruption of 'Ιωβέας, follows Axioramus. There is not the slightest support in the sacred history for the names *Ahitub* and *Zadok*, who are made to follow *Amariah* in the genealogy, 1 Chr. vi. 11, 12.

3. The head of a Levitical house of the Kohathites in the time of David (1 Chr. xxiii. 19, xxiv. 23).

4. The head of one of the twenty-four courses of priests, which was named after him, in the time of David, of Hezekiah, and of Nehemiah (1 Chr. xiv. 14; 2 Chr. xxxi. 15; Neh. x. 3, xii. 2, 13). In the first passage the name is written אֲמַרְיָה, *Immer*, but it seems to be the same name. Another form of the name is אֲמַרְיָה, *Imri* (1 Chr. ix. 4, 5), a man of Judah, of the sons of Bani. Of the same family we find,

5. Amariah in the time of Ezra (*Ezr.* x. 42; Neh. xi. 4).

6. An ancestor of Zephaniah the prophet (*Zeph.* i. 1). [A. C. II.]

AM'ASA (אֲמָסָא, a burden; 'Αμεσσα; *Amasa*). 1. Son of Ithia or Jether, by Abigail, David's sister (2 Sam. xvii. 25). He joined Absalom

in his rebellion, and was by him appointed commander-in-chief in the place of Joab, by whom he was totally defeated in the forest of Ephraim (2 Sam. xviii. 6). When Joab incurred the displeasure of David for killing Absalom, David forgave the treason of Amasa, recognized him as his nephew, and appointed him Joab's successor (xix. 13). Joab afterwards, when they were both in pursuit of the rebel Sheba, pretended to salute Amasa, and stabbed him with his sword (xx. 10), which he held concealed in his left hand. Whether Amasa be identical with אֲמַשִּׁי who is mentioned among David's commanders (1 Chr. xii. 18), is uncertain (Ewald, *Gesch. Israel*, ii. 544).

2. A prince of Ephraim, son of Hadlai, in the reign of Ahaz (2 Chr. xxviii. 12). [R. W. B.]

AMAS'AI. [AMASA.]

AMAS'HAI (אֲמַשַׁי; 'Αμασία; *Amassai*), name of a man (Neh. xi. 13).

AMAS'TAH (אֲמַסְתָּא; 'Αμαστας; *Amastius*), name of a man (2 Chr. xvii. 16).

A'MATH. [HAMATH.]

AM'ATHIEIS ('Αμαθίας; *Emers*), 1 Esd. ix. 29. [ATHALAI.]

AM'ATHIS (in some copies AMATHAS), “THE LAND OF” (ἡ 'Αμαθίτις χώρα); a district to the north of Palestine, in which Jonathan Maccabaeus met the forces of Demetrius (1 Macc. xii. 25). From the context it is evidently HAMATH. [G.]

AMAZIAH (אֲמַזְיָה, or אֲמַזְיָהוּ, strength of Jehosh; 'Αμεσσας, 'Αμασας; *Amasias*, son of Jonsh, and eighth king of Judah, succeeded to the throne at the age of 25 on the murder of his father, and punished the murderers; sparing, however, their children, in accordance with Deut. xxiv. 16, as the 2nd book of Kings (xiv. 6) expressly informs us, thereby implying that the precept had not been generally observed. In order to restore his kingdom to the greatness of Jehoshaphat's days, he made war on the Edomites, defeated them in the valley of Salt, south of the Dead Sea (the scene of a great victory in David's time, 2 Sam. viii. 13; 1 Chr. xviii. 12; Ps. lx. title), and took their capital, Selah or Petra, to which he gave the name of Jokteel, i. e. *præmium Dei* (Gaenius in voce), which was also borne by one of his own Jewish cities (*Josh.* xv. 38). We read in 2 Chr. xv. 12-14, that the victorious Jews threw 10,000 Edomites from the cliffs, and that Amaziah performed religious ceremonies in honour of the gods of the country; an exception to the general character of his reign (cf. 2 K. xiv. 3, with 2 Chr. xxv. 2). In consequence of this he was overtaken by misfortune. Having already offended the Hebrews of the northern kingdom by sending back, in obedience to a prophet's direction, some mercenary troops whom he had hired from it, he had the foolish arrogance to challenge Joash king of Israel to battle, despising probably a sovereign whose strength had been exhausted by Syrian wars, and who had not yet made himself respected by the great successes recorded in 2 K. xiii. 25. But Judah was completely defeated, and Amaziah himself was taken prisoner, and conveyed by Joash to Jerusalem, which, according to Josephus (*Ant.* ix. 9, 3), opened its gates to the conqueror under a threat that otherwise he would put Amaziah to

death. We do not know the historian's authority for this statement, but it explains the fact that the city was taken apparently without resistance (2 K. xiv. 13). A portion of the wall of Jerusalem on the side towards the Israelitish frontier was broken down, and treasures and hostages were carried off to Samaria. Amaziah lived 15 years after the death of Joash; and in the 29th year of his reign was murdered by conspirators at Lachish, whither he had retired for safety from Jerusalem. The chronicler seems to regard this as a punishment for his idolatry in Elom, though his language is not very clear on the point (2 Chr. xxv. 27); and doubtless it is very probable that the conspiracy was a consequence of the low state to which Judah must have been reduced in the latter part of his reign, after the Edomitish war and humiliation inflicted by Joash king of Israel. His reign lasted from B.C. 837 to 809. (Clinton, *Fasti Hellenici*, i. p. 325.)

2. Priest of the golden calf at Bethel, who endeavored to drive the prophet Amos from Israel into Judah, and complained of him to king Jeroboam II. (Am. vii. 10).

3. A descendant of Simeon (1 Chr. iv. 34).

4. A Levite (1 Chr. vi. 45). [G. E. L. C.]

**AMBASSADOR.** Sometimes מַלְאָךְ and sometimes מַלְאָךְ is thus rendered; and the occurrence of both terms in the parallel clauses of Prov. xiii. 17 seems to show that they approximate to synonyms. The office, like its designation, was not definite nor permanent, but *pro re nata* merely. The precept given Deut. xx. 10, seems to imply some such agency; rather, however, that of a mere nuncio, often bearing a letter (2 K. v. 5, xix. 14) than of a legate empowered to treat. The inviolability of such an officer's person may perhaps be inferred from the only recorded infraction of it being followed with unusual severities towards the vanquished, probably designed as a condign chastisement of that offence (2 Sam. x. 2-5; cf. xii. 26-31). The earliest examples of ambassadors employed occur in the cases of Edom, Moab, and the Amorites (Num. ix. 14, xxi. 21; Judg. xi. 17-19), afterwards in that of the fraudulent Gileonites (Josh. ix. 4, &c.), and in the instances of civil strife mentioned Judg. vi. 12 and xx. 12. (See Cuneus *de Rep. Hebr.* ii. 20, with notes by J. Nicholas. Ugol. iii. 771-4.) They are mentioned more frequently during and after the contact of the great adjacent monarchies of Syria, Babylon, &c. with those of Judah and Israel, e.g. in the invasion of Sennacherib. They were usually men of high rank; as in that case the chief captain, the chief cupbearer, and chief of the eunuchs were deputed, and were met by delegates of similar dignity from Hezekiah (2 K. xviii. 17, 18; see also Is. xxx. 4). Ambassadors are found to have been employed, not only on occasions of hostile challenge or insolent menace (2 K. xiv. 8; 1 K. xx. 2, 6), but of friendly compliment, of request for alliance or other aid, of submissive deprecation, and of curious inquiry (2 K. xiv. 8, xvi. 7, xviii. 14; 2 Chr. xxxii. 31). The dispatch of ambassadors with urgent haste is introduced as a token of national grandeur in the obscure prophecy Is. xviii. 2.

**AMBER,** the A. V. rendering of חֲשִׁמְלִי (Chashmal) which occurs three times in Ezekiel, i. 4, 27, viii. 2, and is rendered by the LXX. by

ἤλεκτρον; *electrum*, Vulg: It is certain from the context of these passages that the bituminous substance which we call amber is not meant. According to Pliny (xxiii. 4. s. 23), the ἤλεκτρον was a metallic substance compounded of four parts gold and one silver. Passow claims this meaning for the word in those passages of Hom. and Hesiod where it occurs, and also in Soph. *Antig.* 1038, where he speaks of τὸν πρὸς Σαρδόνει ἤλεκτρον.

The Heb. חֲשִׁמְלִי is certainly a metal. Its derivation is not so certain. Rochart (*Hieroz.* iii. 876-893, Lips.) thinks that it is compounded of חֶשֶׁת = נְחֹשֶׁת, *brass*, and the Talmudic word מִלָּא = מִלְּלָא, *gold*, so that חֲשִׁמְלִי = חֶשֶׁת + מִלְּלָא, *brass mixed with gold*, χαλκοχρυσόν, or at any rate brass having the splendour and colour of gold, χαλκὸς χρυσοειδής = נְחֹשֶׁת מְצֻחָה, Ezr. viii. 27. Gesenius dissents from this derivation, and prefers to consider חֲשִׁמְלִי = מֶלֶךְ + חֶשֶׁת, the syllabic מֶלֶךְ implying smoothness, as in the words מֶלֶךְ, מִלְּךְ, מַלְדָּסָא, *mulco*, &c. He therefore takes it to mean smooth polished brass, comparing Ez. i. 7, חֶשֶׁת מֶלֶךְ. The Rabbins have a fanciful derivation of the word from מַלְלִית אֵשׁ מַלְלִית, *animulim ignea loquentia*, and assert it to be the name of an angel. [W. D.]

**AMETHYST** (אֶמֶתִּישֵׁט), the name of a precious stone mentioned in Ex. xxviii. 19, xxxix. 12, which the LXX. have translated ἀμέθυστος, and the Vulg. *amethystus*. The Heb. word is a verbal from the root אֶמֶת, *to dream*, and hence it was believed that it caused those who wore it to dream, whilst the Greek name of this stone arose from its supposed ability to protect the wearer of it from drunkenness (Der. A. and μεθύω). Pliny (xxxvii. 9) mentions the opinion that it was so designated because it imitates the colour of wine without reaching it. The amethyst was the third jewel in the third row of the breast-plate of judgment. It is mentioned also in Rev. xxi. 20, as the twelfth of the precious stones with which the foundations of the city wall were garnished. The amethyst is a sub-species of quartz, generally of a violet colour, but those from the East are sometimes deep red. The best amethysts are found in India, Armenia, and Arabia. Pliny calls them *sculpturæ faciles*; and they were very extensively used for rings and seals. See Kalisch on Ex. xxviii. 19. [W. D.]

**A'MI** (אָמִי; 'Hmei; *Ami*), name of one of "Solomon's servants" (Ezr. ii. 57); called Amon (אָמֹן) in Neh. vii. 59. *Ami* is probably a corrupted form of *Amon*.

**AMIT TAI** (אָמִיתַי; 'Amaθi; *Amathi*), father of the prophet Jonah (2 K. xiv. 25; Jon. i. 1).

**AM'MAH**, the hill of (אֶמְמָה; δ βουνός *Amudn*; *collis aque ductus*), a hill 'facing' Giah by the way of the wilderness of Gibeon, named as the point to which Joab's pursuit of Abner after the death of Asahel extended (2 Sam. ii. 24). Josephus (*Ant.* vii. i. §3) τόπος τις, ὃν Ἀμμάταν καλοῦσι (comp. Targ. Jon. אֶמְמָתָא). Both Symmachus (ἀπέναντι), and Theodotion (ὁδραγωγός), agree with the Vulgate in

an allusion to some watercourse here. Can this point to the "excavated fountain," "under the high rock," described as near Gibeon (*El-Jib*) by Robinson (i. 455)? [G.]

**AM'MIDOI**, in some copies **AMMIDOI** (*Ἀμμίδοι* or *Ἀμμιδοί*), named in 1 Esdr. v. 20 among those who came up from Babylon with Zorobabel. The three names P'arra, Chadius, and A. are inserted between Beeroth and Ramah with out any corresponding words in the parallel lists of Ezra or Nehemiah.

**AM'MIEL** (*עַמְיֵאֵל*; *Ἀμμιᾶλ*; *Ammiel*), name of four men. 1. (Num. xiii. 12). 2. (2 Sam. ix. 4, 5, xvii. 27). 3. Father of Bathsheba (1 Chr. iii. 5), called Eliam (*עֲלִיָּאִם*) in 2 Sam. xi. 3. 4. (1 Chr. xxvi. 5).

**AMMI'HUD** (*עַמְיָהוּד*; *Ἐμμιάδης*; *Ammihud*), name of five men. 1. (Num. i. 10, ii. 18, vii. 48, 53, x. 22; 1 Chr. vii. 26). 2. (Num. xxxiv. 20). 3. (Num. xxiv. 28). 4. (2 Sam. xiii. 37). 5. (1 Chr. ix. 4).

**AMMIN'ADAB** (*עַמְיִנְאָדָב*; *Ἀμμιναδάβ*; *Amminadab*; one of the people, i. e. family, of the prince (*familia principis*), Gen. x. 26; *mun* of generosity, First, who ascribes to *עַם* the sense of "homo" as its primitive meaning: the passages, Ps. ex. 3, Cant. vi. 12, margin, seem however rather to suggest the sense *my people is willing*. 1. Son of Ram or Aram, and father of Nahshon, or Naasson (as it is written, Matt. i. 4; Luke iii. 32), who was the prince of the tribe of Judah, at the first numbering of Israel in the second year of the Exodus (Num. i. 7, ii. 3; Ruth iv. 19, 20; 1 Chr. ii. 10). We gather hence that Amminadab died in Egypt before the Exodus, which accords with the mention of him in Ex. vi. 23, where we read that "Aaron took him Elisheba daughter of Amminadab, sister of Nahshon, to wife, and she bare him Nadab and Abihu, Eleazar and Ithamar." This also indicates that Amminadab must have lived in the time of the most grievous oppression of the Israelites in Egypt. He is the fourth generation after Judah the patriarch of his tribe, and one of the ancestors of JESUS CHRIST. Nothing more is recorded of him; but the marriage of his daughter to Aaron may be marked as the earliest instance of alliance between the royal line of Judah and the priestly line of Aaron. And the name of his grandson Nadab may be noted as probably given in honour of Ammi-nadab his grandfather.

2. The chief of the 112 sons of Uzziel, a junior Levitical house of the family of the Kohathites (Ex. vi. 18), in the days of David, whom that king sent for, together with Uriel, Asaiah, Joel, She-maiah, and Eliel, other chief fathers of Levitical houses, and Zadok and Abiathar the priests, to bring the ark of God to Jerusalem (1 Chr. xv. 10-12), to the tent which he had pitched for it. The passage last quoted is instructive as to the mode of naming the houses; for besides the sons of Kohath, 120, at v. 5, we have the sons of Elizaphan, 200, at v. 8, of Hebron, 80, at v. 9, and of Uzziel, 112, at v. 10, all of them Kohathites (Num. iii. 27, 30).

<sup>a</sup> The expression most commonly employed for this nation is "Bene-Ammon;" next in frequency comes "Ammoni" or "Ammonim;" and least often "Ammon." The translators of the Auth. Version have, as usual, neglected these minute differences, and have

3. At 1 Chr. vi. 22 (7, Heb. B.) Izhar, the son of Kohath, and father of Korah, is called Amminadab, and the Vatican LXX. has the same reading. (The Alexandrine has Izhar.) But it is probably only a clerical error. In Cant. vi. 12, it is uncertain whether we ought to read *עַמְיִנְדָב*, *Amminadib*, with the A. V., or *עַמְיִנְדָב*, *my willing people*, as in the margin. If Amminadib is a proper name, it is thought to be either the name of some one famous for his swift chariots, *מְרַבְּבוֹת*, or that there is an allusion to Abinadab, and to the new cart on which they *made to ride* (*יִרְכִּיבוּ*) the ark of God (2 Sam. vi. 3). But this last, though perhaps intended by the LXX. version of Cant., which has *Ἀμμιναδάβ*, is scarcely probable. In vii. 2 (1 A. V.) the LXX. also render *בְּתִינְדָב*, "oh I prince's daughter," by *θυγατὲρ ναδάβ*, and in the Cod. Alex. *θυγατὲρ Ἀμμιναδάβ*. [A. C. H.]

**AMMISHAD'PAI** (*עַמְיִשָּׁדַי*; *Ἀμμισαδὰι*; *Ammisadai*), name of a man (Num. i. 12, ii. 25, vii. 68, 71, x. 25).

**AMMIZ'ABAD** (*עַמְיִזְבָּד*; *Ζαβδάδ*; *Amizabad*), name of a man (1 Chr. xxvii. 6).

**AMMON, AM'MONTITES, CHILDREN OF AMMON** (*עַמּוֹן* (only twice), *עַמּוֹנִי*, *עַמּוֹנִים*; *עַמּוֹן* *בְּנֵי עַמּוֹן*; *Ἀμμὼν*, *Ἀμμωνῖται*, LXX. in Pent.; elsewhere *Ἀμμων*, *ἰσὺ Ἀμμων*; Joseph. *Ἀμμωνῖται*; *Ammon*, Vulg.), a people descended from Ben-Ammi, the son of Lot by his younger daughter (Gen. xix. 38; comp. Ps. lxxxiii. 7, 8), as Moab was by the elder; and dating from the destruction of Sodom.

The near relation between the two peoples indicated in the story of their origin continued throughout their existence: from their earliest mention (Deut. ii.) to their disappearance from the biblical history (Jud. v. 2) the brother-tribes are named together (comp. Judg. x. 10; 2 Chr. xx. 1; Zeph. ii. 8, &c.). Indeed, so close was their union, and so near their identity, that each would appear to be occasionally spoken of under the name of the other. Thus the "land of the children of Ammon" is said to have been given to the "children of Lot," i. e. to both Ammon and Moab (Deut. ii. 19). They are both said to have hired Balaam to curse Israel (Deut. xxiii. 4), whereas the detailed narrative of that event omits all mention of Ammon (Num. xxi. xxi.). In the answer of Jephthah to the king of Ammon the allusions are continually to Moab (Judg. xi. 15, 18, 25), while Chemosh, the peculiar deity of Moab (Num. xxi. 29), is called "thy god" (24). The land from Arnon to Jabbok, which the king of Ammon calls "my land" (13), is elsewhere distinctly stated to have once belonged to a "king of Moab" (Num. xxi. 26).

Unlike Moab the precise position of the territory of the Ammonites is not ascertainable. In the earliest mention of them (Deut. ii. 20) they are said to have destroyed those Kephaim, whom they called the Zamzummin, and to have dwelt in their place, Jabbok being their border<sup>b</sup> (Num. xxi. 24; Deut.

<sup>b</sup> Josephus says in two places (*Ant.* i. 11, §5, and xi. 5, §8), that Moab and Ammon were in Cock-

Nyria.

iii. 16, ii. 37). "Land" or "country" is, however, but rarely ascribed to them, nor is there any reference to those habits and circumstances of civilisation—the "pleautiful fields," the "hay," the "summer-fruits," the "vineyards," the "presses," and the "songs of the grape-treaders"—which so constantly recur in the allusions to Moab (Is. xv. xvi.; Jer. xlvii.); but, on the contrary, we find everywhere traces of the fierce habits of marauders in their incursions—thrusting out the night eyes of whole cities (1 Sam. xi. 2), ripping up the women with child (Am. i. 13), and displaying a very high degree of crafty cruelty (Jer. xli. 6, 7; Jud. vii. 11, 12) to their enemies, as well as a suspicious discountenance to their allies, which on one occasion (2 Sam. x. 1-5) brought all but extermination on the tribe (xii. 31). Nor is the contrast less observable between the one city of Ammon, the fortified hold of Rabbah (2 Sam. xi. 1; Ez. xxv. 5; Am. i. 13), and the "streets," the "house-tops," and the "high-places," of the numerous and busy towns of the rich plains of Moab (Jer. xlviii.; Is. xv. xvi.). Taking the above into account it is hard to avoid the conclusion that, while Moab was the settled and civilised half of the nation of Lot, the Bene-Ammon formed its predatory and Belouin section. A remarkable confirmation of this opinion occurs in the fact that the special deity of the tribe was worshipped, not in a house or on a high place, but in a booth or tent designated by the very word which most keenly expressed to the Israelites the contrast between a nomadic and a settled life (Am. v. 26; Acts vii. 43) [SUCCOOTH]. (See Stanley, App. §89.)

On the west of Jordan they never obtained a footing. Among the confusions of the times of the Judges we find them twice passing over; once with Moab and Amalek seizing Jericho, the "city of palm-trees" (Judg. iii. 13), and a second time "to fight against Judah and Benjamin, and the house of Ephraim;" but they quickly returned to the fiercer pastures of Gilead, leaving but one trace of their presence in the name of Chephar ha-Ammoni, "the hamlet of the Ammonites" (Josh. xviii. 24), situated in the portion of Benjamin somewhere at the head of the passes which lead up from the Jordan-valley, and form the natural access to the table-land of the west country.

The hatred in which the Ammonites were held by Israel, and which possibly was connected with the story of their incestuous origin, is stated to have arisen partly from their opposition, or, rather, their want of assistance (Dent. xxiii. 4), to the Israelites on their approach to Canaan. But it evidently sprang mainly from their share in the affair of Balaam (Dent. xxiii. 4; Neh. xiii. 1). At the period of Israel's first approach to the south of Palestine the feeling towards Ammon is one of regard. The command is then "distress not the Moabites . . . distress not the children of Ammon, nor meddle with them" (Dent. ii. 9, 19; and comp. 37), and it is only from the subsequent transaction that we can account for the fact that Edom, who had also refused passage through his land but had taken no part with Balaam, is punished with the ban of exclusion from the congregation for three generations, while Moab and Ammon is to be kept out for ten generations (Dent. xxiii. 2), a sentence which acquires peculiar significance from its being the same pronounced on "bastards" in the preceding verse, from its collocation amongst those

pronounced in reference to the most loathsome physical deformities, and also from the emphatic recapitulation (ver. 6), "thou shalt not seek their peace or their prosperity all thy days for ever."

But whatever its origin it is certain that the animosity continued in force to the latest date. Subdued by Jephthah (Judg. xi. 33), and scattered with great slaughter by Saul (1 Sam. xi. 11)—and that not once only, for he "vexed" them "whithersoever he turned" (xiv. 47)—they enjoyed under his successor a short respite, probably the result of the connexion of Moab with David (1 Sam. xxii. 3) and David's town, Bethlehem—where the memory of Ruth must have been still fresh. But this was soon brought to a close by the shameful treatment to which their king subjected the friendly messengers of David (2 Sam. x. 1; 1 Chr. xix. 1), and for which he destroyed their city and inflicted on them the severest blows (2 Sam. xii.; 1 Chr. xx.). [RABBAH.]

In the days of Jehoshaphat they made an incursion into Judah with the Moabites and the Maonites,<sup>c</sup> but were signally repulsed, and so many killed that three days were occupied in spoiling the bodies (2 Chr. xx. 1-25). In Uzziah's reign they made incursions and committed atrocities in Gilead (Am. i. 13); Jotham had wars with them, and exacted from them a heavy tribute of "silver (comp. "jewels," 2 Chr. xx. 25), wheat, and barley" (2 Chr. xxvii. 5). In the time of Jeremiah we find them in possession of the cities of Gad from which the Jews had been removed by Tiglath-Pileser (Jer. xlix. 1-6); and other incursions are elsewhere alluded to (Zeph. ii. 8, 9). At the time of the captivity many Jews took refuge among the Ammonites from the Assyrians (Jer. xl. 11), but no better feeling appears to have arisen, and on the return from Babylon, Tobiah the Ammonite and Sanballat a Moabite (of Chorozaim, Jer. xlix.), were foremost among the opponents of Nehemiah's restoration.

Amongst the wives of Solomon's harem are included Ammonite women (1 K. xi. 1), one of whom, Naamah, was the mother of Rehoboam (1 K. xiv. 31; 2 Chr. xii. 13), and henceforward times of the presence of Ammonite women in Judah are not wanting (2 Chr. xxiv. 26; Neh. xiii. 23; Ezr. ix. 1; see Geiger, *Urschrift*, &c. 47, 49, 299).

The last appearances of the Ammonites in the biblical narrative are in the books of Judith (v. vi. vii.) and of the Maccabees (1 Mac. v. 6, 30-43), and it has been already remarked that their chief characteristics—close alliance with Moab, hatred of Israel, and cunning cruelty—are maintained to the end. By Justin Martyr (Dial. Tryph.) they are spoken of as still numerous (*ἔτι πολλοὶ παῖδες*); but notwithstanding this they do not appear again.

The tribe was governed by a king (Judg. xi. 12, &c.; 1 Sam. xii. 12; 2 Sam. x. 1; Jer. xl. 14) and by "princes," *שָׂרִים* (2 Sam. x. 3; 1 Chr. xix. 3). It has been conjectured that Nahab (1 Sam. xi. 1; 2 Sam. x. 2) was the official title of the king as Pharaoh was of the Egyptian monarchs; but this is without any clear foundation.

The divinity of the tribe was Molech, generally named in the O. T. under the altered form of Milcom—"the abomination of the children of Ammon;" and occasionally as Malcham. In more

<sup>c</sup> There can be no doubt that instead of "Ammonites" in 1 Chr. xx. 1, and xxvi. 8, we should read, with the LXX. "Maonites" or "Mehunim." The reasons for this will be given under MAONIM.

than one passage under the word rendered "their king" in the A. V. an allusion is intended to this idol. [MOLECH.]

The Ammonite names preserved in the sacred text are as follow. It is open to inquiry whether these words have reached us in their original form (certainly those in Greek have not), or whether they have been altered in transference to the Hebrew records.

Achior, Ἀχιὼρ, quasi אַחִי אֵוֶר, *brother of light*, Jud. v. 5, &c.

Baal-, בַּעַלִים, *joif d*, Jer. xl. 14.

Hanun, חֲנָנִי, *patiable*, 2 Sam. x. 1, &c.

Molech, מוֹלֵךְ, *king*.

Namuh, נַמְוָה, *pleasant*, 1 K. xiv. 21, &c.

Nachash, נָחָשׁ, *serpent*, 1 Sam. xi. 1, &c.

Shobi, שׁוֹבִי, *return*, 2 Sam. xvii. 27.

Timotheus, Τιμόθεος, 1 Mac. v. 6, &c.

Tobijah, טובִּיָּה, *good*, Neh. ii. 10, &c.

Zelek, זֶלֶק, *scarf*, 2 Sam. xxiii. 37.

The name Zamzumim, applied by the Ammonites to the Ephraim whom they dispossessed, should not be omitted. [G.]

AM'NON (אַמְנוֹן; Ἀμύων; *Ammon*). 1. Eldest son of David by Ahinoam the Jezreelitess, born in Hebron while his father's royalty was only acknowledged in Judah. He dishonoured his half-sister Tamar, and was in consequence murdered by her brother (2 Sam. xiii. 1-29). [ABSALOM.]

2. Son of Shimon (1 Chr. iv. 20). [G. E. L. C.]

AMOK (אִמּוֹק; Ἀμέκ; *Amoc*), name of a man (Neh. xii. 7, 20).

AMON (אֲמוֹן; Ἀμύων), an Egyptian divinity, whose name occurs in that of אֲמוֹן נֹחַ (Nah. iii. 8), or Thebes, also called נֹחַ [No]. It has been supposed that Amon is mentioned in Jer. xvi. 25, but the A. V. is most probably correct in rendering אֲמוֹן כִּנָּה "the multitude of No," as in the parallel passage, Ez. xxx. 15, where the equivalent הִמְוִן is employed. Comp. also Ez. xxx. 4, 10, for the use of the latter word with reference to Egypt. These cases, or at least the two former, seen therefore to be instances of paronymasia (comp. Is. xxx. 7, lxx. 11, 12). The Greeks called this divinity Ἀμμων, whence the Latin Ammon and Hammon; but their writers give the Egyptian pronunciation as Ἀμύων (Herod. ii. 42), Ἀμύον (Plut. *de Isid. et Osir.* 9), or Ἀμύον (Jambl. *de Myst.* viii. 3). The ancient Egyptian name is Amen, which must signify "the hidden," from the verb *amen*, "to enwrap, conceal" (Champollion, *Dictionnaire Egyptien*, p. 197), Copt. ⲙⲏⲟⲩⲛⲓ. This interpretation agrees with that given by Plutarch, on the authority of a supposition of Manetho. (Μαρεθῶς μὲν δὲ Σεβερνύτης τὸ κεκρυμμένον ὀλεται καὶ τὴν κρύβειν οὐκ ταύτης δηλοῦσθαι τῆς φωνῆς, *de Isid. et Osir.* l. c.) Amen was one of the eight gods of the first order, and chief of the triad of Thebes. He was worshipped at that city as Amen-Ra, or "Amen the sun," represented as a man wearing a cap with two

high plumes, and Amen-Ra ka mut-ef, "Amen-Ra, who is both male and female," represented as the generative principle. In the latter form he is accompanied by the figures of trees or other vegetable products, like the "groves" mentioned in the Bible [EUYPT], and is thus connected with Baal. In the Great Oasis, and the famous one named after him, he was worshipped in the form of the ram-headed god Num, and called either Amen, Amen-Ra, or Amen-Num, and thus the Greeks came to suppose him to be always ram-headed, whereas this was the proper characteristic of Num. (Wilkinson, *Modern Egypt and Thebes*, vol. ii. pp. 367, 375). The worship of Amen spread from the Oases along the north coast of Africa, and even penetrated into Greece. The Greeks identified Amen with Zeus, and he was therefore called Zeus Ammon and Jupiter Ammon. [R. S. P.]

A'MON (אֲמוֹן; Ἀμός, Kings; Ἀμύον, Chr.; Joseph. Ἀμύσος; *Amun*). 1. King of Judah, son and successor of Manasseh. The name may mean *skilful in his art, or child* (verbal from אֲמוֹן, *to nurse*). Yet it sounds Egyptian, as if connected with the Theban god, and possibly may have been given by Manasseh to his son in an idolatrous spirit. Following his father's example, Amon devoted himself wholly to the service of false gods, but was killed in a conspiracy after a reign of two years. Probably by insolence or tyranny he had alienated his own servants, and fell a victim to their hostility, for the people avenged him by putting all the conspirators to death, and secured the succession to his son Josiah. To Amon's reign we must refer the terrible picture which the prophet Zephaniah gives of the moral and religious state of Jerusalem: idolatry supported by priests and prophets (i. 4, iii. 4), the poor ruthlessly oppressed (iii. 3), and shameless inderence to evil (iii. 11). According to Clinton (*F. H.* i. p. 328), the date of his accession is B.C. 642; of his death, B.C. 640 (2 K. xxi. 19; 2 Chr. xxxiii. 20).

2. A contemporary of Ahab (1 K. xvii. 26; 2 Chr. xix. 25).

3. See AMI.

[G. E. L. C.]

AM'ORITE, THE AM'ORITES (אֲמֹרִי, אֲמֹרִיָּה (always in the singular), accurately "the Amorite"—the dwellers on the summits—mountaineers; Ἀμορραῖος; *Amorrhæci*, one of the chief nations who possessed the land of Canaan before its conquest by the Israelites.

In the genealogical table of Gen. x. "the Amorite" is given as the fourth son of Canaan, with "Zidon, Heth [Hittite], the Jebusite," &c. The interpretation of the name as "mountaineers" or "highlanders"—due to Simons (see his *Onomasticon*), though commonly ascribed to Ewald—is quite in accordance with the notices of the text, which, except in a few instances, speak of the Amorites as dwelling on the elevated portions of the country. In this respect they are contrasted with the Canaanites, who were the dwellers in the lowlands; and the two thus formed the main broad divisions of the Holy Land. "The Hittite, and the Jebusite, and the Amorite, dwell in the mountain [of Judah and Ephraim], and the Canaanite dwells by the sea [the lowlands of Philistia and Shaon] and by the 'side' of Jordan" [in the valley of the Arabah],—was the report of the first Israelites who entered the country (Num. xiii. 29; and see Josh.

<sup>4</sup> Compare the soubriquet of "Le Balafre."

v. 1, x. 6, xi. 3; Deut. i. 6, 21; "Mountain of the A." 44). This we shall find borne out by other notices. In the very earliest times (Gen. xiv. 7) they are occupying the barren heights west of the Dead Sea, at the place which afterwards bore the name of En-gedi; hills in whose fastnesses, the "rocks of the wild goats," David afterwards took refuge from the pursuit of Saul (1 Sam. xxiii. 29; xxiv. 2). [HAEZEON-TAMAR]. From this point they stretched west to Hebron, where Abram was then dwelling under the "oak-grave" of the three brothers, Aner, Eshcol, and Mamre (Gen. xiv. 13; comp. xiii. 18). From this, their ancient seat, they may have crossed the valley of the Jordan, tempted by the high table-lands on the east, for there we next meet them at the date of the invasion of the country. Sihon, their then king, had taken the rich pasture-land south of the Jabbok, and had driven the Moabites, its former possessors, across the wide chasm of the Arnon (Num. xxi. 26; 13), which thenceforward formed the boundary between the two hostile peoples (Num. xxi. 13). The Israelites apparently approached from the south-east, keeping "on the other side" (that is on the east) of the upper part of the Arnon, which there bends southwards, so as to form the eastern boundary of the country of Moab. Their request to pass through his land to the fords of Jordan was refused by Sihon (Num. xxi. 21; Deut. ii. 26); he "went out" against them (xxi. 23; ii. 32), was killed with his sons and his people (ii. 33), and his land, cattle, and cities taken possession of by Israel (xxi. 24, 25, 31, ii. 34-56). This rich tract, bounded by the Jabbok on the north, the Arnon on the south, Jordan on the west, and "the wilderness" on the east (Judg. xi. 21, 22)—in the words of Josephus "a land lying between three rivers after the manner of an island" (*Ant.* iv. 5, §2)—was, perhaps, in the most special sense the "land of the Amorites" (Num. xxi. 31; Josh. xii. 2, 3, xiii. 9; Judg. xi. 21, 22); but their possessions are distinctly stated to have extended to the very feet of Hebron (Deut. iii. 8, iv. 48), embracing "all Gilead and all Bashan" (iii. 10), with the Jordan valley on the east of the river (iv. 49), and forming together the land of the "two kings of the Amorites," Sihon and Og (Deut. xxxi. 4; Josh. ii. 10, ix. 10, xxiv. 12).

After the passage of the Jordan we again meet with Amorites disputing with Joshua the conquest of the west country. But although the name generally denotes the mountain-tribes of the centre of the country, yet this definition is not always strictly maintained, varying probably with the author of the particular part of the history, and the time at which it was written. Nor ought we to expect that the Israelites could have possessed very accurate knowledge of a set of small tribes whom they were called upon to exterminate—with whom they were forbidden to hold any intercourse—and, moreover, of whose general similarity to each other we have convincing proof in the confusion in question.

Some of these differences are as follows:—Hebron is "Amorite" in Gen. xiii. 18, xiv. 13, though "Hittite" in xliii. and "Canaanite" in Judg. i. 10. The "Hivites" of Gen. xxiv. 2, are "Amorites" in xlviii. 22; and so also in Josh. ix. 7, xi. 19, as compared with 2 Sam. xxi. 12. Jerusalem is "Amorite" in Josh. x. 5, 6, but in xvii.

63, xviii. 28; Judg. i. 21, xix. 11; 2 Sam. v. 6, &c., it is "Jebusite." The "Canaanites" of Num. xiv. 45 (comp. Judg. i. 17), are "Amorites" in Deut. i. 44. Jarmuth, Lachish and Egion were in the low country of the *Shefelah* (Josh. xv. 35, 39), but in Josh. x. 5, 6, they are "Amorites that dwell in the mountains;" and it would appear as if the "Amorites" who forced the Danites into the mountain (Judg. i. 34, 35) must have themselves remained on the plain.

Notwithstanding these few differences, however, from a comparison of the passages previously quoted it appears plain that "Amorite" was a local term, and not the name of a distinct tribe. This is confirmed by the following facts. (1) The wide area over which the name was spread. (2) The want of connexion between those on the east and those on the west of Jordan—which is only once hinted at (Josh. ii. 10). (3) The existence of kings like Sihon and Og, whose territories were separate and independent, but who are yet called "the two kings of the Amorites," a state of things quite at variance with the habits of Semitic tribes. (4) Beyond the three confederates of Abiam, and these two kings, no individual Amorites appear in the history (unless Arannah or Onan the Jebusite be one). (5) There are no traces of any peculiar government, worship, or customs, different from those of the other "nations of Canaan."

One word of the "Amorite" language has survived—the name Senir (not "Shenir" for Mount Hermon (Deut. iii. 9); but may not this be the Canaanite name as opposed to the Phœnician (Sion) on the one side and the Hebrew on the other?

All mountaineers are warlike; and, from the three confederate brothers who at a moment's notice accompanied "Abram the Hebrew" in his pursuit of the five kings, down to those who, not depressed by the slaughter inflicted by Joshua and the terror of the name of Israel, persisted in driving the children of Dan into the mountain, the Amorites fully maintained this character.

After the conquest of Canaan nothing is heard in the Bible of the Amorites, except the occasional mention of their name in the usual formula for designating the early inhabitants of the country. [i.]

**AMOS** (אַמּוֹס, a *burden*; Ἀμός; Ἀμωός), a native of Tekoah in Judah, about six miles S. of Bethlehem, originally a shepherd and dresser of sycomore-trees, was called by God's Spirit to be a prophet, although not trained in any of the regular prophetic schools (i. 1, vii. 14, 15). He travelled from Judah into the northern kingdom of Israel or Ephraim, and there exercised his ministry, apparently not for any long time. His date cannot be later than the 15th year of Uzziah's reign (B.C. 808, according to Clinton, *F. H.*, i. p. 325): for he tells us that he prophesied "in the reigns of Uzziah king of Judah, and Jeroboam the son of Joash king of Israel, two years before the earthquake." This earthquake (also mentioned Zech. xiv. 5) cannot have occurred after the 17th year of Uzziah, since Jeroboam II. died in the 15th of that king's reign, which therefore is the latest year fulfilling the three chronological indications furnished by the prophet himself. But his ministry probably took place at an earlier period of Jeroboam's reign, perhaps about the middle of it, for on the one hand Amos speaks of the conquests of this warlike king as completed (vi. 13, cf. 2 K. xiv. 25), on the other the Assyrians, who towards the end of his

\* The LXX. has here τῶν ἱερὺν υἱῶν

reign were approaching Palestine (Hos. x. 6, xi. 5), do not seem as yet to have caused any alarm in the country. Amos predicts indeed that Israel and other neighbouring nations will be punished by certain wild conquerors from the North (i. 5, v. 27, vi. 14), but does not name them, as if they were still unknown or unheeded. In this prophet's time Israel was at the height of power, wealth, and security, but infected by the crimes to which such a state is liable. The poor were oppressed (viii. 4), the ordinances of religion thought burdensome (viii. 5), and idleness, luxury, and extravagance were general (iii. 15). The source of these evils was idolatry, of course that of the golden calves, not of Baal, since Jehu's dynasty occupied the throne, though it seems probable from 2 K. xiii. 6, which passage must refer to Jeroboam's reign [BRNHADAD III.], that the rites even of Asarte were tolerated in Samaria, though not encouraged. Calf-worship was specially practised at Bethel, where was a principal temple and summer palace for the king (vii. 13; cf. iii. 15), also at Gilgal, Dan, and Beersheba in Judah (iv. 4, v. 5, viii. 14), and was offensively united with the true worship of the Lord (v. 14, 21-23; cf. 2 K. xvii. 33). Amos went to rebuke this at Bethel itself, but was compelled to return to Judah by the high-priest Amaziah, who procured from Jeroboam an order for his expulsion from the northern kingdom. The book of the prophecies of Amos seems divided into four principal portions closely connected together. (1) From i. 1 to ii. 3 he denounces the sins of the nations bordering on Israel and Judah, as a preparation for (2) in which, from ii. 4 to vi. 14, he describes the state of those two kingdoms, especially the former. This is followed by (3) vii. 1-ix. 10, in which, after reflecting on the previous prophecy, he relates his visit to Bethel, and sketches the impending punishment of Israel which he predicted to Amaziah. After this in (4) he rises to a loftier and more evangelical strain, looking forward to the time when the hope of the Messiah's kingdom will be fulfilled, and His people forgiven and established in the enjoyment of God's blessings to all eternity. The chief peculiarity of the style consists in the number of allusions to natural objects and agricultural occupations, as might be expected from the early life of the author. See i. 3, ii. 13, iii. 4, 5, iv. 2, 7, 9, v. 8, 10, vi. 12, vii. 1, ix. 3, 9, 13, 14. The book presupposes a popular acquaintance with the Pentateuch (see Hengstenberg, *Beiträge zur Einleitung ins Alte Testament*, i. p. 83-125), and implies that the ceremonies of religion, except where corrupted by Jeroboam I., were in accordance with the law of Moses. The references to it in the New Testament are two: v. 25, 26, 27 is quoted by St. Stephen in Acts vii. 42, and ix. 11 by St. James in Acts xv. 16. As the book is evidently not a series of detached prophecies, but logically and artistically connected in its several parts, it was probably written by Amos as we now have it after his return to Tekoa from his mission to Bethel. (See Ewald, *Propheten des Alten Bundes*, i. p. 84 ff.) [G. E. L. C.]

**AM'OS** (אָמֹס; 'Amós; Amos), father of the prophet Isaiah (2 K. xix. 2, 20, xx. 1; 2 Chr. xxvi. 22, xxvii. 20, 32; Is. i. 1, ii. 1, xiii. 1, xx. 2.

**AMPHIPOLIS** (Ἀμφίπολις), a city of Macedonia, through which Paul and Silas passed in their way from Philippi to Thessalonica (Acts xvii.

1). It was distant 33 Roman miles from Philippi (*Itin. Anton.* p. 320). It was called Amphipolis, because the river Strymon flowed almost round the town (Thuc. iv. 102). It stood upon an eminence on the left or eastern bank of this river, just below its egress from the lake Cercinitis, and at the distance of about three miles from the sea. It was a colony of the Athenians, and was memorable in the Peloponnesian war for the battle fought under its walls, in which both Brasidas and Cleon were killed (Thuc. v. 6-11). Its site is now occupied by a village called *Noohório*, in Turkish *Jeni-Kent*, or "New-Town."

**AM'PLIAS** (Ἀμπλίας), a Christian at Rome (Rom. xvi. 8).

**AM'RAM** (עֲמֶרָם, 'Ambrám; Amram). 1. A Levite, father of Moses, Aaron, and Miriam (Ex. vi. 18, 20; Num. iii. 19). Hence the patronymic *Amramites* (Num. iii. 27; 1 Chr. xxvi. 23). 2. A contemporary of Ezra (Ezr. x. 34). [H. W. B.]

**AM'RAPHIEL** (אַמְרָפִּיֶּל; 'Amraphál; Amraphel), perhaps a Hamite king of Shinar or Babylonia, who joined the victorious incursion of the Elamite Chedorlamer against the kings of Sodom and Gomorrah and the cities of the plain (Gen. xiv.). The meaning of the name is uncertain; some have connected it with the Sanskrit *anurágha*, "the guardian of the immortals." (Comp. Rawlinson's *Heraklus*, i. 446.) [S. L.]

**AMULETS** were ornaments, gems, scrolls, &c., worn as preservatives against the power of enchantments, and generally inscribed with mystic forms or characters. The "earrings" in Gen. xxxv. 4 (קְנִיָּוִת; *knivót*; *knives*) were obviously connected with idolatrous worship, and were probably amulets taken from the bodies of the slain Shechemites. They are subsequently mentioned among the spoils of Midian (Judg. viii. 24), and perhaps their objectionable character was the reason why Gideon asked for them. Again, in Hos. ii. 13, "decking herself with earrings" is mentioned as one of the signs of the "days of Babel." Hence in Chaldee an earring is called קְרִישָׁא.

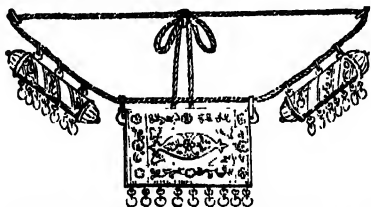

But amulets were more often worn round the neck, like the golden bulls or leather lorum of the Roman boys. Sometimes they were precious stones, supposed to be endowed with peculiar virtues. In the "Mirror of stones" the strangest properties are attributed to the amethyst, Kinocetus, Alectorin, Ceraunium, &c.; and Pliny, talking of succinea, says "Infantibus alligari amuleti ratione protest." (xxxvii. 12, s. 37). They were generally suspended as the centre-piece of a necklace, and among the Egyptians often consisted of the emblems of various deities, or the symbol of truth and justice ("Thmei"). A gem of this kind, formed of sapphires, was worn by the chief judge of Egypt (Diod. i. 48, 75), and a similar one is represented as worn by the youthful deity Harpocrates (Wilkinson, *An. Egypt.* iii. 364). The Arabs hang round their children's necks the figure of an open hand; a custom which, according to Shaw, arises from the *unluckiness* of the number 5. This principle is often found in the use of amulets. Thus the basileisk is constantly engraved on the talismanic scarabaei of Egypt, and according to Jahn (*Arch. Bbl.* §131, Engl. tr.), the שֵׁם הַחַיִּים of Is. iii. 23, were "figures of serpents carried in the

hand" (no one probably worn in the ears) "by Hebrew women." The word is derived from עִנְיָן, sibilavit, and means both "enchancements" (cf. Is. iii. 3), and the magical genus and formulas used to avert them (Gesen. s. v.). It is doubtful whether the LXX. intends *περιθέξια* as a translation of this word; "pro voce *περιθ.* nihil est in textu Hebraico" (Schleusner's *Thesaurus*). For a like reason the phallus was among the sacred emblems of the Vestals (*Dict. of Ant.*, Art. 'Fascinum').

The commonest amulets were sacred words (the tetragrammaton, &c.) or sentences, written in a peculiar manner, or inscribed in some cabalistic figure like the shield of David, called also, Solomon's Seal. Another form of this figure is the pentangle (or pentacle, v. Scott's *Antiquary*), which "consists of three triangles intersected, and made of five lines, which may be so set forth with the body of man as to touch and point out the places where our Saviour was wounded" (Sir Thos. Brown's *Vulgy. Errors*, i. 10). Under this head fall the *ἑφένια γράμματα* (Acts xix. 19), and in later times the Abraxic gems of the Basilidians; and the use of the word "Abacadabba," recommended by the physician Serenus Samonicus as a cure of the hemitritaeus. The same physician prescribes for quartan ague

"Maeoniae Iliados quartum suppone timent."

Charms "consisting of words written on folds of papyrus tightly rolled up and sewed in linen," have been found at Thebes (Wilkinson, *l. c.*), and our English translators possibly intended something of the kind when they rendered the curious phrase (in Is. iii.) בְּתֵי הַנֶּפֶשׁ by "tablets." It was the danger of idolatrous practices arising from a knowledge of this custom that probably induced the sanction of the use of phylacteries (Deut. vi. 8; ix. 18, טוֹמְפוֹת). The modern Arabs use scraps of the Koran (which they call "telesmes" or "alakakirs") in the same way.

Amulet. Modern Egyptian. (From Lane's *Modern Egyptus*.)

A very large class of amulets depended for their value on their being constructed under certain astronomical conditions. Their most general use was to avert ill-luck, &c., especially to nullify the effect of the *ὄφθαλμοὶ βάκκανος*, a belief in which is found among all nations. The Jews were particularly addicted to them, and the only restriction placed by the Rabbis on their use was, that none but *approved* amulets (i. e. such as were *known* to have cured three persons) were to be worn on the Sabbath (Lightfoot's *Hor. Hebr.* in Mat. xxiv. 24). It was thought that they kept off the evil spirits who caused disease. Some animal substances were considered to possess such properties, as we see from Tobit. Pliny (xxviii. 47) mentions a fox's tongue worn on an amulet as a charm against blear eyes, and says (xxx. 15) "Scorbaeorum cornua alligata amuleti naturam obtinent;" perhaps an Egyptian

fancy. In the same way one of the Roman emperors wore a seal-skin as a charm against thunder. Among plants, the white bryony and the Hypericon, or *Fuga Daemonum*, are mentioned as useful (Sir T. Brown, *Vulgy. Errors*, i. 10). He attributes the whole doctrine of amulets to the devil, but still shows out a hint that they may work by "imponderous and invisible emissions").

Amulets are still common. On the Mod. Egyptian "Hegab" see Lane, *Mod. Egypt*, c. 11, and on the African "pieces of medicine," a belief in which constitutes half the religion of the Africans, see Livingstone's *Travels*, p. 285 et *passim*. [TERAPHIM; TALISMAN.] [F. W. F.]

AM'ZI (אֲמָזִי; Ἀμεσία, Ἀμασί; *Anasai, Anasi*), name of two men, both Levites. 1. (1 Chr. vi. 46). 2. (Neh. xi. 12).

A'NAB (אֲנָב; Ἀναβώβ, Ἀνάβ; *Alex. Ἀνάβ*), a town in the mountains of Judah (Josh. xv. 50), named, with Delir and Hebron, as once belonging to the Anakim (Josh. xi. 21). It has retained its ancient name, and lies among the hills about 10 miles S.S.W. of Hebron, close to Shoco and Eshtemoa (Rob. i. 494). The conjecture of Kus, and Jerome (*Onom. Anab, Anab*) is evidently inadmissible. [U.]

AN'AEI, ANAN'AEI (Ἀναήλ, Ἀνανήλ, i. e. אֲנָהֵל, *God hath given*), Tob. i. 1; 21. Cf. Jer. xxxi. 38; Zech. xiv. 10; Neh. iii. 1, xii. 39. [B. F. W.]

A'NAH (אֲנָה; Ἀνά; *Ana*), the son of Zibeon, the son of Seir, the Horite (Gen. xxxvi. 20, 24), and father of Aholibamah, one of the wives of Esau (Gen. xxxvi. 2, 14). We are no doubt thus to understand the text, with Winer, Hengstenberg, Tuch, Knobel, and many others, though the Hebrew reads "Aholibamah, daughter of Anah, daughter of Zibeon (בְּתִיעֶנָּה בְּתִיצְבֶּעֶן);" nor is there any necessity to correct the reading in accordance with the Sam., which has בָּ instead of the second בֶּ; it is better to refer the second בֶּ to Aholibamah instead of to its immediate antecedent Anah: the word is thus used in the wider sense of descendant (here granddaughter), as it is apparently again in this chapter, v. 39. We may further conclude with Hengstenberg (*Pent.* ii. 280; Eng. transl. ii. 229) that the Anah mentioned amongst the sons of Seir in v. 20 in connexion with Zibeon, is the same person as is here referred to, and is therefore the grandson of Seir. The intention of the genealogy plainly is not so much to give the lineal descent of the Seirites as to enumerate those descendants, who, being heads of tribes, came into connexion with the Edomites. It would thus appear that Anah, from whom Esau's wife sprang, was the head of a tribe independent of his father, and ranking on an equality with that tribe. Several difficulties occur in regard to the race and name of Anah. By his descent from Seir he is a Horite (Gen. xxxvi. 20), whilst in v. 2 he is called a Hivite, and again in the narrative (Gen. xvi. 34) he is called Beeri the Hittite. Hengstenberg's explanation of the first of these difficulties is far-fetched; and it is more probable that the word Hivite (הִיטִי) is a mistake of transcribers for Horite (הֹרִי). With regard to the identification

[Anah the Hivite with Beeri the Hittite, see BEERI.] [F. W. G.]

**ANAHARATH** (אַנְחָרָת; 'Avaxapθ), a place within the border of Naphtali, named with Nachon and Rabbith (Jos. xiv. 13). Nothing is yet known of it. [G.]

**ANAN'AH** (עֲנַיָה; 'Anavias, 'Anata; Anur, Anaki), name of a man (Neh. viii. 4, x. 22), called ANANIAS ('Anavias) in 1 Esd. ix. 43.

**ANAK.** [ANAKIM.]

**ANAKIM** (עֲנָקִים; 'Evakim; Enukim), a race of giants (so called either from their stature (*konigcollis*, Gesen.), or their strength (Fürst), (the root עֲנַק being identical with our word neck), descendants of Arba (Josh. xv. 13, xxi. 11), dwelling in the southern part of Canaan, and particularly at Hebron, which from their progenitor received the name of קִרְיַת אֲרָבָה, city of Arba. Besides the general designation Anakim, they are variously called עֲנָקִים, sons of Anak (Num. xiii. 33), אֲנָכִים, descendants of Anak (Num. xiii. 22), and עֲנָקִים, sons of Anakim (Deut. i. 28). These designations serve to show that we must regard Anak as the name of the race rather than that of an individual, and this is confirmed by what is said of Arba, their progenitor, that he "was a great man among the Anakim" (Josh. xv. 15). The race appears to have been divided into three tribes or families, bearing the names Sheshai, Ahiman, and Tahmai. Though the warlike appearance of the Anakim had struck the Israelites with terror in the time of Moses (Num. xiii. 28; Deut. ix. 2), they were nevertheless dispossessed by Joshua, and utterly driven from the land, except a small remnant that found refuge in the Philistine cities, Gaza, Gath, and Ashdod (Josh. xi. 21). Their chief city Hebron became the possession of Caleb, who is said to have driven out from it the three sons of Anak mentioned above, that is the three families or tribes of the Anakim (Josh. xv. 14; Judg. i. 20). After this time they vanish from history. [F. W. G.]

**ANAMIM** (עֲנַמִּים; 'Eveperielim; Anamin), a Mizraite people or tribe, respecting the settlements of which nothing certain is known (Gen. x. 13; 1 Ch. i. 11). Judging from the position of the other Mizraite peoples, as far as it has been determined, this one probably occupied some part of Egypt, or of the adjoining region, of Africa, or possibly of the south-west of Palestine. No name bearing any strong resemblance to Anamin has been pointed out in the geographical lists of the Egyptian monuments, or in classical or modern geography. [R. S. P.]

**ANAMMELECH** (עֲנַמְלֵךְ; 'Anmeleχ; 'Anamelech), one of the idols worshipped by the colonists introduced into Samaria from Sennacherib (2 K. xvii. 31). He was worshipped with rites resembling those of Molech, children being burnt in his honour, and is the companion-god to ADRA-MMELECH. As Adramelech is the male power of the sun, so Anammelech is the female power of the sun (Rawlinson's *Herodotus*, i. p. 611). The etymology of the word is uncertain. Rawlinson connects it with the name *Ananit*. Gesenius derives the name from words meaning *idol* and

*king*, but Keland (*de vet. ling. Pers.* ix.) deduces the first part of it from the Persian word for *grief*. Winer advocates a derivation connecting the idol with the constellation Cepheus, some of the stars in which are called by the Arabs "the shepherd and the sheep." [G. E. L. C.]

**ANAN** (עֲנָן; 'Hndm; Anan), name of a man (Neh. v. 26).

**ANANI** (עֲנָנִי; 'Anan; 'Anani), name of a man, one of the royal line of Judah (1 Chr. iii. 24).

**ANAN'AH** (עֲנַיָה; 'Anavias; Ananah), name of a priest (Neh. iii. 23).

**ANAN'THAI** (עֲנַנְתָּי; 'Ananthai), a place, named between Nob and Hazor, in which the Benjaminites lived after their return from captivity (Neh. xi. 32). The LXX. omits all mention of this and the accompanying names. [G.]

**ANANIAS** (עֲנַנְיָה, or הֲנַנְיָה; 'Anavias).

1. A high-priest in Acts xxiii. 2 ff. xxiv. 1. He was the son of Zebedaeus (Joseph. *Ant.* xx. 5, §2), succeeded Joseph son of Camylus (*Ant.* xx. 1, §3, 5, §2), and preceded Ismael son of Phabi (*Ant.* xv. 8, §§8, 11). He was nominated to the office by Herod king of Chalcis, in A.D. 48 (*Ant.* xx. 5, §2); and in A.D. 52 sent to Rome by the prefect Ummidius Quadratus to answer before the Emperor Claudius a charge of oppression brought by the Samaritans (*Ant.* xx. 6, §2). He appears, however, not to have lost his office, but to have resumed it on his return. This has been doubted: but Wieseler (*Chronol. d. Apostol. Zeitalters*, p. 76, note) has shown that it was so in all probability, seeing that the procurator Cumanus, who went to Rome with him as his adversary, was unsuccessful, and was condemned to banishment. He was deposed from his office shortly before Felix left the province (*Ant.* xx. 8, §8); but still had great power, which he used violently and lawlessly (*Ant.* xx. 9, §2). He was at last assassinated by the Sicarii (*B. J.* ii. 17, §9) at the beginning of the last Jewish war.

2. A disciple at Jerusalem, husband of Sapphira (Acts v. 1 ff.). Having sold his goods for the benefit of the church, he kept back a part of the price, bringing to the apostles the remainder, as if it were the whole, his wife also being privy to the scheme. St. Peter, being enabled by the power of the Spirit to see through the fraud, denounced him as having lied to the Holy Ghost, i. e. having attempted to pass upon the Spirit resident in the apostles an act of deliberate deceit. On hearing this, Ananias fell down and expired. That this incident was no mere physical consequence of St. Peter's severity of tone, as some of the German writers have maintained, distinctly appears by the direct sentence of a similar death pronounced by the same apostle upon his wife Sapphira a few hours after. [SAPPHIRA.] It is of course possible that Ananias's death may have been an act of divine justice overlooked for by the apostle, as there is no mention of such an intended result in his speech: but in the case of the wife, such an idea is out of the question. Niemeyer (*Charakteristik der Bibel*, i. p. 574) has well stated the case as regards the blame which some have endeavoured to cast on St. Peter in this matter, when he says that not man, but God, is thus inadvertently on the apostle's side but the organ and announcer of the divine justice, which was pleased by

this act of deserved severity to protect the morality of the infant church, and strengthen its power for good.

3. A Jewish disciple at Damascus (Acts ix. 10 ff.), of high repute, "a devout man according to the law, having a good report of all the Jews which dwelt there" (Acts xxii. 12). Being ordered by the Lord in a vision, he sought out Saul during the period of blindness and dejection which followed his conversion, and announced to him his future commission as a preacher of the Gospel, conveying to him at the same time, by the laying on of his hands, the restoration of sight, and commanding him to arise, and be baptized, and wash away his sins, calling on the name of the Lord. Tradition makes him to have been afterwards bishop of Damascus, and to have died by martyrdom (*Menolog. Græcorum*, i. p. 79 f.). [H. A.]

ANANIAS ('Ανανίας, name of eight men. 1. (1 Esd. v. 16) (*Αννίς*). 2. (1 Esd. ix. 21). 3. (1 Esd. ix. 29). 4. (1 Esd. ix. 43). [ANANIAH.] 5. (1 Esd. ix. 48). [HAMAN.] 6. "An, the great" (Tob. v. 12, 13). 7. Ancestor of Judith (Jud. viii. 1, Vulg. only). 8. Song of 3 Ch. 59; 1 Macc. ii. 59. [HANANIAH; SHADRACH.]

ANANIEL ('Ανανιήλ; *Ananiel*), forefather of Tobias (Tob. i. 1).

ANATH (אַנַּת; *Δανάχ*, *Anath*), father of Shamgar (Judg. iii. 31, v. 6).

ANATHIEMA (*ἀνάθεμα*, in I.XX., the equivalent for אָנָה, a thing or person devoted: in N. T. generally translated *accursed*. The more usual form is *ἀνάθεμα* (*ἀνατίθημι*), with the sense of an offering suspended in a temple (Luke xxi. 5; 2 Mac. ix. 16): the Alexandrine writers preferred the short penultimate in this and other kindred words (e.g. *ἐπίθεμα*, *σύμβημα*): but occasionally both forms occur in the MSS., as in Jud. xvi. 19; 2 Mac. xiii. 15; Luke xxi. 5; no distinction therefore existed originally in the meanings of the words, as has been supposed by many early writers. The Hebrew אָנָה is derived from a verb signifying primarily to shut up, and hence to (1) consecrate or devote, and (2) exterminate. Any object so devoted to the Lord was irreclaimable: if an inanimate object, it was to be given to the priests (Num. xviii. 14); if a living creature or even a man, it was to be slain (Lev. xxvii. 28, 29); hence the idea of extermination as connected with devoting. Generally speaking a vow of this description was taken only with respect to the idolatrous nations who were marked out for destruction by the special decree of Jehovah, as in Num. xxi. 2; Josh. vi. 17: but occasionally the vow was made indefinitely, and involved the death of the innocent, as is illustrated in the cases of Jephthah's daughter (Judg. xi. 31), and Jonathan (1 Sam. xiv. 24) who was only saved by the interposition of the people. The breach of such a vow on the part of any one directly or indirectly participating in it was punished with death (Josh. vii. 25). In addition to these cases of spontaneous devotion on the part of individuals, the word אָנָה is frequently applied to the extermination of idolatrous nations: in such cases

the idea of a vow appears to be dropped, and the word assumes a purely secondary sense (*ἐξολοθρεῖν*, I.XX.): or, if the original meaning is still to be retained, it may be in the sense of Jehovah (Is. xxxiv. 2) *shutting up*, i. e. *placing under a ban*, and so necessitating the destruction of them, in order to prevent all contact. The extermination being the result of a positive command (Ex. xxii. 20), the idea of a vow is excluded, although doubtless the instances already referred to (Num. xxi. 2; Josh. vi. 17) show how a vow was occasionally superadded to the command. It may be further noticed that the degree to which the work of destruction was carried out, varied. Thus it applied to the destruction of (1) men alone (Deut. xx. 20); (2) men, women, and children (Deut. ii. 34); (3) virgins excepted (Num. xxxi. 17; Judg. xxi. 11); (4) all living creatures (Deut. xx. 16; 1 Sam. x. 3); the spoil in the former cases were reserved for the use of the army (Deut. ii. 35, xx. 14; Josh. xxii. 8), instead of being given over to the priesthood, as was the case in the recorded vow of Joshua (Josh. vi. 19). Occasionally the town itself was utterly destroyed, the site rendered desolate (Josh. vi. 26), and the name Hormah (*Ἀνθήμα*, I.XX.) applied to it (Num. xxi. 3).

We pass on to the Rabbinical sense of אָנָה as referring to *excommunication*, premising that an approximation to that sense is found in Ex. x. 8, where forfeiture of goods is coupled with separation from the congregation. Three degrees of excommunication are enumerated (1) נִדָּי, involving various restrictions in civil and ecclesiastical matters for the space of 30 days: to this it is supposed that the terms ἀφορίζειν (Luke vi. 22) and ἀποσυνάγωγος (John ix. 22) refer. (2) אָנָה, a more public and formal sentence, accompanied with curses, and involving severer restrictions for an indefinite period. (3) חֲכָלָה, rarely, if ever, used—complete and irrevocable excommunication. אָנָה was occasionally used in a generic sense for any of the three (Carpzov. *Appar.* p. 557). Some expositors refer the terms δεικνύειν καὶ ἐκβάλλειν (Luke vi. 22) to the second species, but a comparison of John ix. 22 with 34 shows that ἐκβάλλειν is synonymous with ἀποσυνάγωγον ποιεῖν, and there appears no reason for supposing the latter to be of a severe character.

The word ἀνάθεμα frequently occurs in St. Paul's writing, and many expositors have regarded his use of it as a technical term for judicial excommunication. That the word was so used in the early Church, there can be no doubt (Bingham, *Antiq.* xvi. 2, §16): but an examination of the passages in which it occurs shows that, like the cognate word ἀναθεματίζω (Matt. xxvi. 74; Mark xiv. 71; Acts xxiii. 12, 21), it had acquired a more general sense as expressive either of strong feeling (Rom. ix. 3; cf. Ex. xxxii. 32), or of dislike and condemnation (1 Cor. xii. 3, xvi. 32; Gal. i. 9). [W. L. B.]

AN'ATHOTH (אַנַּתוֹת; *Ἀναθήθ*, *Anathoth*), name of two men. 1. A Benjamite (Chr. vii. 8). 2. (Neh. x. 19).

AN'ATHOTH (אַנַּתוֹת), possibly = "echoes;"

\* There are some variations in the orthography of this name, both in Hebrew and the A. V., which must be noticed. 1. Hebrew: In 1 K. ii. 26, and Jer. xxxix. 9, it is אַנַּתוֹת, and similarly in 2 Sam. xxiii. 27,

הַעֲנָתוֹת. 2. English: Anethothite, 2 Sam. xxiii. 27; Anethothite, 1 Chr. xxvii. 12; Antothite, 1 Chr. xi. 28, xii. 3. "Jeremiah of A." Jer. xxix. 27, should be, "J. the Anathothite."

plur. of **אַנְחֹת**, by which name the place is called in the Talmud *Joma*, 10; '**אַנְחֹת**;<sup>1</sup> *Anathoth*, a city of Benjamin, omitted from the list in Josh. xviii., but a priests' city; with "suburbs" (Josh. xxi. 18; 1 Chr. vi. 60 (45)). Hitherto, to his "fields," Abiathar was banished by Solomon after the failure of his attempt to put Adonijah on the throne (1 K. ii. 26). This was the native place of Abiezer, one of David's 30 captains (2 Sam. xxiii. 27; 1 Chr. xi. 28, xxvii. 12), and of Jehu, another of the mighty men (1 Chr. xii. 3); and here, "of the priests that were in Anathoth," Jeremiah was born (Jer. i. 1; xi. 21, 23; xxiv. 27; xxviii. 7, 8, 9).

The "men" (**אֲנָשִׁים**, not **אֲנָשִׁים**, as in most of the other cases; comp. however, Netophah, Michmash, &c.) of A. returned from the captivity with Zerubbabel (Ezra ii. 23; Neh. vii. 27; 1 Esdr. v. 18a).

Anathoth lay on or near the great road from the north to Jerusalem (Is. x. 30); by Eusebius it is placed at 3 miles from the city (*Onom.*), and by Jerome (*turris Anathoth*) at the same distance *contra septentrionem Jerusalem* (ad Jerem. cap. i.). The traditional site at *Kiriet el-Khazb* does not fulfil these conditions, being 10 miles distant from the city, and nearer W. than N. But the real position has no doubt been discovered by Robinson at *Anāta*, on a broad ridge  $\frac{1}{2}$  hour N.N.E. from Jerusalem. The cultivation of the priests survives in tilled fields of grain, with figs and olives. There are the remains of walls and strong foundations, and the quarries still supply Jerusalem with building stone (Rob. i. 437, 438).

[G.]

## ANCHOR. [SUM.]

ANDREW, ST. (**Ἀνδρέας**; *Andreas*; the name *Andreas* occurs in Greek writers; e.g. *Athen.* vii. p. 312, and xv. p. 673; it is found in Dion Cass. lxxviii. 32, as the name of a Cyrenian Jew, in the reign of Trajan), one among the first called of the Apostles of our Lord (John i. 41; Matt. iv. 18); brother (whether elder or younger is uncertain) of Simon Peter (*ibid.*). He was of Bethsaida, and had been a disciple of John the Baptist. On hearing Jesus a second time designated by him as the Lamb of God, he left his former master, and, in company with another of John's disciples, attached himself to our Lord. By his means his brother Simon was brought to Jesus (John i. 41). The apparent discrepancy in Matt. iv. 18 ff. Mark 16 ff., where the two appear to have been called together, is no real one, St. John relating the first introduction of the brothers to Jesus, the other Evangelists their formal call to follow Him in his ministry. In the catalogue of the Apostles, Andrew appears, in Matt. x. 2, Luke vi. 14, second, next after his brother Peter; but in Mark iii. 16, Acts i. 14, fourth, next after the three, Peter, James, and John, and in company with Philip. And this appears to have been his real place of dignity among the apostles; for in Mark xiii. 3, we find Peter, James, John, and Andrew, inquiring privately of our Lord about His coming; and in John xii. 22, when certain Greeks wished for an interview with Jesus, they applied through Andrew, who consulted Philip, and in company with him made the request known to our Lord. This last circumstance, combined with the Greek character of both their names, may perhaps point to some slight shade of Hellenistic connexion on the part of the two apostles; though it is extremely improbable that any of the Twelve were Hellenists in the proper sense. On

the occasion of the five thousand in the wilderness wanting nourishment, it is Andrew who points out the little lad with the five barley loaves and the two fishes. Scripture relates nothing of him beyond these scattered notices. Except in the catalogue (i. 14), his name does not occur once in the Acts. The traditions about him are various. Eusebius (iii. 1) makes him preach in Scythia; Jerome (Ep. 148, ad Marcellin.) and Theodoret (ad Ps. lxxviii. cxi.), in Achaia (Greece); Nicephorus (ii. 39), in Asia Minor and Thrace. He is said to have been crucified, at Patrae in Achaia, on a *crux decussata* (X); but this is doubted by Lipsius (*de Cruce*, i. 7), and Sagittarius (*de Cruciatibus Martyrum*, viii. 12). Eusebius (*H. E.* iii. 25) speaks of an apocryphal Acts of Andrew; and Epiphanius (*Haer.* xlv. 1) states that the Eucratites accounted it among their principal Scriptures; and (lxiii. 2) he says the same of the Origenians. (See Fabric. *Cod. Apocr.* i. 456 ff., *Menolog. Graecor.* i. 221 f.; P'ision. *Vit. Apostol.* i. p. 82 ff.) [H. A.]

ANDRONICUS (**Ἀνδρόνικος**). 1. An officer left as viceroy (*διαδεχόμενος*, 2 Macc. iv. 31) in Antioch by Antiochus Epiphanes during his absence (B.C. 171). Menelaus availed himself of the opportunity to secure his good offices by offering him some golden vessels which he had taken from the temple. When Onias (ONIAS III.) was certainly assured that the sacrilege had been committed, he sharply reprimanded Menelaus for the crime, having previously taken refuge in the sanctuary of Apollo and Artemis at Daphne. At the instigation of Menelaus, Andronicus induced Onias to leave the sanctuary and immediately put him to death in prison (*παρέκλεισεν*, 2 Macc. iv. 34 ff.). This murder excited general indignation; and on the return of Antiochus, Andronicus was publicly degraded and executed (2 Macc. iv. 30-38). Josephus places the death of Onias before the High-Priesthood of Jason (*Ant.* xii. 5, 1), and omits mention of Andronicus; but there is not sufficient reason to doubt the truthfulness of the narrative, as Wernsdorff has done (*De fide lib. Macc.* pp. 90, f.).

2. Another officer of Antiochus Epiphanes who was left by him on Garizim (*ἐν Γαριζμ*, 2 Macc. v. 23), probably in occupation of the temple there. As the name was common, it seems unreasonable to identify this general with the former one, and so to introduce a contradiction into the history (Wernsdorff, *l. c.*; Ewald, *Gesch. d. Volkes Isr.* iv. 335 n.; comp. Grimm, 2 Macc. iv. 38). [B. F. W.]

ANDRONICUS (**Ἀνδρόνικος**; *Andronicus*), a Christian at Rome, saluted by St. Paul (Rom. xvi. 7), together with Junias. The two are called by him his relations (*συνγενεῖς*) and fellow-captives, and of note among the apostles, using that term probably in the wider sense; and he describes them as having been converted to Christ before himself. According to Hippolytus he was bishop of Pannonia; according to Dorotheus, of Spain. [H. A.]

A'NEM (**אָנֶם**; *אָנֶם*, Alex. *Ανάμ*), a city of Issachar, with "suburbs," belonging to the Gershonites, 1 Chr. vi. 73 (Heb. 58). It is omitted in the lists in Josh. xix. and xxi., and instead of it we find En-gannim. Possibly the one is a contraction of the other, as Kartan of Kirjathaim. [G.]

A'NER (**אָנֶר**; *אָנֶר*, Alex. *Ανέρ*), a city of Manasseh west of Jordan, with "suburbs" given

to the Kohathites (1 Chr. vi. 70 (55)). By comparison with the parallel list in Josh. xvi. 25, it would appear to be a corruption of Tannach (עַנַּח for עַנְנָח).

A'NER (עֲנֵר; *Anan*; *Aner*), one of the three Hebronite chiefs who aided Abraham in the pursuit after the four invading kings (Gen. xiv. 13, 24). [R. W. B.]

ΑΓΓΑΡΙΕΥΟ (Ἀγγαρεύω; *Angario*, Vulg., Matt. v. 41, Mark xv. 21), simply translated "compel" in the A. V., is a word of Persian, or rather of Tatar, origin, signifying to compel to serve as an ἄγγαρος or mounted courier. The words *anharid* or *ampharid*, in Tatar, mean compulsory work without pay. Herodotus (viii. 98) describes the system of the ἄγγαροί. He says that the Persians, in order to make all haste in carrying messages, have relays of men and horses stationed at intervals, who hand the despatch from one to another without interruption either from weather or darkness, in the same way as the Greeks in their λαμπαδοφορία. This horse-post the Persians called ἄγγαρίον. In order to effect the object, license was given to the couriers by the government to press into the service men, horses, and even vessels. Hence the word came to signify "press," and ἄγγαρεία is explained by Σuidas δημοσία καὶ ἀναγκαία δουλεία, and ἄγγαρεύεσθαι, εἰς φορτίαν ἀγεσθαι. Persian supremacy introduced the practice and the name into Palestine; and Lightfoot says the Talmudists used to call any oppressive service אַנגאַרען. Among the proposals made by Demetrius Soter to Jonathan the high-priest, one was μὴ ἄγγαρεύεσθαι τὰ τῶν Ἰουδαίων ὀποῦντα. The system was also adopted by the Romans, and thus the word "angario" came into use in later Latin. Pliny alludes to the practice, "festinationem tabellarii diplomate adjuvi." Sir J. Chardin and other travellers make mention of it. The ἄγγαροι were also called ἀσάνδοι. (Liddell and Scott, and Stephens; and Scheller, *Lex. s. r.*; Xen. *Cyrop.* viii. 6, §§17, 18; Athen. iii. 94, 122; Aesch. *Ag.* 282, *Pers.* 217 (Dind.); Esch. viii. 14; Joseph. *A. J.* xiii. 2, §3; Pliny, *Ep.* x. 14, 121, 122; Lightfoot *On Matt.* v. 41; Chardin, *Travels*, p. 257; *Plut. De Alex. Mag.* p. 326.) [H. W. P.]

ANGELS (מַלְאָכִים; *oi ἄγγελοι*; *an* with the addition of מַלְאָכִים; *oi ἄγγελοι*). In later books the word מַלְאָכִים, *oi ἄγγελοι*, is used as an equivalent term.) By the word "angels" (i. e. "messengers" of God) we ordinarily understand a race of spiritual beings, of a nature exalted far above that of man, although infinitely removed from that of God, whose office is "to do Him service in heaven, and by His appointment to succour and defend men on earth." The object of the present article is threefold: 1st, to refer to any other Scriptural uses of this and similar words; 2ndly, to notice the revelations of the *nature* of these spiritual beings given in Scripture; and 3rdly, to derive from the same source, a brief description of their *office* towards man. It is to be noticed that its scope is purely Biblical, and that, in consequence, it does not enter into any extra-Scriptural speculations on this mysterious subject.

(I.) In the first place, there are many passages in which the expression the "angel of God," "the angel of Jehovah," is certainly used for a manifest

lation of God himself. This is especially the case in the earlier books of the Old Testament, and may be seen at once, by a comparison of Gen. xxii. 11 with 12, and of Ex. iii. 2 with 6, and 14; where He, who is called the "angel of God" in one verse, is called "God," and even "Jehovah" in those which follow, and accepts the worship due to God alone. (Contrast Rev. xix. 10 xxi. 9.) See also Gen. xvi. 7, 13, xxxi. 11, 13, xlviii. 15, 16; Num. xxii. 22, 32, 35, and comp. Is. lvi. 9 with Ex. xxxiii. 14, &c. &c. The same expression (it seems) is used by St. Paul, in speaking to heathens. See Acts xxvii. 23 comp. with xxiii. 11.

It is to be observed also, that, side by side with these expressions, we read of God's being manifested in the form of *man*; as to Abraham at Mamre (Gen. xviii. 2, 22 comp. xix. 1), to Jacob at Peniel (Gen. xxxii. 24, 30), to Joshua at Gilgal (Josh. v. 13, 15), &c. It is hardly to be doubted, that both sets of passages refer to the same kind of manifestation of the Divine Presence.

This being the case, since we know that "no man hath seen God" (the Father) "at any time," and that "the only-begotten Son, which is in the bosom of the Father He hath revealed Him" (John i. 18), the inevitable inference is that by the "Angel of the Lord" in such passages is meant He, who is from the beginning the "Word," i. e. the Manifestor or Revealer of God. These appearances are evidently "foreshadowings of the Incarnation." By these (that is) God the Son manifested Himself from time to time in that human nature, which He united to the Godhead for ever in the Virgin's womb.

This conclusion is corroborated by the fact, that the phrases used are equivalent to the word "Angels," in Scripture, viz. the "sons of God," or even in poetry, the "gods" (Elohim), the "holy ones," &c., are names, which in their full and proper sense are applicable only to the Lord Jesus Christ. As He is "the Son of God," so also is He the "Angel," or "messenger" of the Lord. Accordingly it is to His Incarnation, that all angelic ministration is distinctly referred, as to a central truth, by which alone its nature and meaning can be understood. (See John i. 51, comparing it with Gen. xxviii. 11-17, and especially with v. 13.)

Besides this, which is the highest application of the word "angel," we find the phrase used of any messengers of God, such as the prophets (Is. xlii. 19; Hag. i. 13; Mal. iii. 1), the priests (Mal. ii. 7), and the rulers of the Christian churches (Rev. i. 20); much as, even more remarkably, the word "Elohim" is applied, in Ps. lxxiii. 6, to those who judge in God's name.

These usages of the word are not only interesting in themselves, but will serve to throw light on the nature and the method of the ministration of those, whom we more especially term "the angels."

(II.) In passing on to consider what is revealed in Scripture as to the angelic *nature*, we are led at once to notice, that the Bible deals with this and with kindred subjects exclusively in their practical bearings, only so far (that is) as they conduce to our knowledge of God and of ourselves, and more particularly as they are connected with the one great subject of all Scripture, the Incarnation of the Son of God. Little therefore is said of the nature of angels as distinct from their office.

They are termed "spirits" (as *c. g.* in Heb. i. 14), although this word is applied more commonly, not so much to themselves, as to their power

dwelling in man (*e.g.* 1 Sam. xviii. 10; Matt. viii. 16, &c. &c.). The word is the same as that used of the soul of man, when separate from the body (*e.g.* Matt. xiv. 26; Luke xxiv. 37, 39; 1 Pet. iii. 19); but, since it properly expresses only that super-sensuous and rational element of man's nature, which is in him the image of God (see John iv. 24), and by which he has communion with God (Rom. viii. 16); and since also we are told, that there is a "spiritual body," as well as a "natural (*ψυχικόν*) body" (1 Cor. xv. 44), it does not assert that the angelic nature is incorporeal. The contrary seems expressly implied by the words, in which our Lord declares, that, *after the Resurrection*, men shall be "like the angels" (*ὡς ἄγγελοι*) (Luke xx. 36); because (as is elsewhere said, Phil. iii. 21) their bodies, as well as their spirits, shall have been made entirely like His. It may also be noticed that the glorious appearance, ascribed to the angels in Scripture (as in Dan. x. 6) is the same as that which shone out in our Lord's Transfiguration, and in which St. John saw Him clothed in heaven (Rev. i. 14-16); and moreover, that, whenever angels have been made manifest to man, it has always been in human form (as *e.g.* in Gen. xviii. 19; Luke xxiv. 4; Acts i. 10, &c. &c.). The very fact that the titles "sons of God" (Job i. 6, xxxviii. 7; Dan. iii. 25 comp. with 28\*), and "gods" (Ps. viii. 5; xevii. 7), applied to them, are also given to men (see Luke iii. 38; Ps. lxxxi. 6, and comp. our Lord's application of this last passage in John x. 34-37), points in the same way to a difference only of degree, and an identity of kind, between the human and the angelic nature.

The angels are therefore revealed to us as beings, such as man might be and will be when the power of sin and death is removed, partaking in their measure of the attributes of God, Truth, Purity, and Love, because always beholding His face (Matt. xviii. 10), and therefore being "made like Him" (1 John iii. 2). This, of course, implies finiteness, and therefore (in the strict sense) "imperfection" of nature, and constant progress, both moral and intellectual, through all eternity. Such imperfection, contrasted with the infinity of God, is expressly ascribed to them in Job iv. 18; Matt. xxiv. 36; 1 Pet. i. 12: and it is this, which emphatically points them out to us as creatures, fellow-servants of man, and therefore incapable of usurping the place of gods.

Thus finiteness of nature implies capacity of temptation (see Butler's *Anal.* Part i. c. 5); and accordingly we hear of "fallen angels." Of the nature of their temptation and the circumstances of their fall, we know absolutely nothing. All that is certain is, that they "left their first estate" (*τὴν ἑαυτῶν ἀρχήν*): and that they are now "angels of the devil" (Matt. xxv. 41; Rev. xii. 7, 9), partaking therefore of the falsehood, uncleanness, and hatred, which are his peculiar characteristics (John viii. 44). All that can be conjectured must be based on the analogy of man's own temptation and fall.

On the other hand, the title especially assigned to the angels of God, that of the "holy ones" (see *e.g.* Dan. iv. 13, 23, viii. 13; Matt. xxv. 31), is

precisely the one which is given to those men who are renewed in Christ's image, but which belongs to them in actuality and in perfection only hereafter. (Comp. Heb. ii. 10, v. 9, xii. 23.) Its use evidently implies that the angelic probation is over, and their crown of glory won.

Thus much then is revealed of the angelic nature, as may make it to us an ideal of human goodness (Matt. vi. 10), or beacon of warning as to the tendency of sin. It is obvious to remark, that in such revelation is found a partial satisfaction of that craving for the knowledge of creatures, higher than ourselves, and yet fellow-servants with us of God, which in its diseased form becomes Polytheism.<sup>b</sup> Its full satisfaction is to be sought in the Incarnation alone, and it is to be noticed, that after the Revelation of God in the flesh, the angelic ministrations recorded are indeed fewer, but the reference to the angels are far more frequent—as though the danger of Polytheistic idolatry had, comparatively speaking, passed away.

(III.) The most important subject, and that on which we have the fullest revelation, is the office of the angels.

Of their office in heaven, we have, of course, only vague prophetic glimpses (as in 1 K. xxii. 19; Is. vi. 1-3; Dan. vii. 9, 10; Rev. vi. 11, &c.), which show us nothing but a never-ceasing adoration, proceeding from the vision of God, through the "perfect love, which casteth out fear."

Their office towards man is far more fully described to us. They are represented as being, in the widest sense, agents of God's Providence, natural and supernatural, to the body and to the soul. Thus the operations of nature are spoken of, as under angelic guidance fulfilling the Will of God. Not only is this the case in poetical passages, such as Ps. civ. 4 (commented upon in Heb. i. 7), where the powers of air and fire are referred to them, but in the simplest prose history, as where the pestilences which slew the firstborn (Ex. xii. 23; Heb. xi. 28), the disobedient people in the wilderness (1 Cor. x. 10), the Israelites in the days of David (2 Sam. xiv. 16; 1 Chr. xxi. 16), and the army of Sennacherib (2 K. xix. 35), as also the plague which cut off Herod (Acts xii. 23) are plainly spoken of as the work of the "Angel of the Lord." Nor can the mysterious declarations of the Apocalypse, by far the most numerous of all, be resolved by honest interpretation into mere poetical imagery. (See especially Rev. viii. and ix.) It is evident that angelic agency, like that of man, does not exclude the action of secondary, or (what are called) "natural" causes, or interfere with the directness and universality of the Providence of God. The personifications of poetry, and legends of mythology are obscure witnesses of its truth, which, however, can rest only on the revelations of Scripture itself.

More particularly, however, angels are spoken of as ministers of what is commonly called the "supernatural," or perhaps more correctly, the "spiritual" Providence of God; as agents in the great scheme of the spiritual redemption and sanctification of man, of which the Bible is the record. The representations of them are different in different books of Scripture, in the Old Testament and in the

<sup>a</sup> Gen. vi. 2, is omitted here and below, as being a controverted passage; although many MSS. of the LXX. have of ἄγγελοι instead of οἱ υἱοὶ here.

<sup>b</sup> The moderate subjectivity of German philosophy on this subject (see, *e.g.*, Winer's *Realte.*), of course,

hastens to the conclusion that the belief in angels is a mere consequence of this craving, never (it would seem) so entering into the analogy of God's providence as to suppose it possible that this inward craving should correspond to some outward reality.

New; but the reasons of the differences are to be found in the differences of scope attributable to the books themselves. As different parts of God's Providence are brought out, so also arise different views of His angelic ministers.

In the Book of Job, which deals with "Natural Religion," they are spoken of but vaguely, as surrounding God's throne above, and rejoicing in the completion of His creative work (Job i. 6, ii. 1, xxxviii. 7). No direct and visible appearance to man is even hinted at.

In the Book of Genesis, there is no notice of angelic appearance till after the call of Abraham. Then, as the book is the history of the *chosen family*, so the angels mingle with and watch over its family life, entertained by Abraham and by Lot (Gen. xviii., xix.), guiding Abraham's servant to Pagan-Aram (xxiv. 7, 40), seen by the fugitive Jacob at Bethel (xxviii. 12), and welcoming his return at Mahanaim (xxxii. 1). Their ministry hallows domestic life, in its trials and its blessings alike, and is closer, more familiar, and less awful than in aftertimes. (Contrast Gen. xviii. with Judg. vi. 21, 22, xiii. 16, 22.)

In the subsequent history, that of a *chosen nation*, the angels are represented more as ministers of wrath and mercy, messengers of a King, rather than common children of the One Father. It is, moreover, to be observed, that the records of their appearance belong especially to two periods, that of the Judges, and that of the captivity, which were transition periods in Israelitish history, the former one destitute of direct revelation or prophetic guidance, the latter one of special trial and unusual contact with heathenism. During the lives of Moses and Joshua there is no record of the appearance of created angels, and only obscure reference to angels at all. In the Book of Judges angels appear at once to rebuke idolatry (ii. 1-4), to call Gideon (vi. 11, &c.) and consecrate Samson (xiii. 3, &c.) to the work of deliverance.

The prophetic office begins with Samuel, and immediately angelic guidance is withheld, except when needed by the prophets themselves (1 K. xix. 5; 2 K. vi. 17). During the prophetic and kingly period, angels are spoken of only (as noticed above) as ministers of God in the operations of nature. But in the captivity, when the Jews were in the presence of foreign nations, each claiming its tutelary deity, then to the prophets Daniel and Zechariah, angels are revealed in a fresh light, as watching, not only over Jerusalem, but also over heathen kingdoms, under the Providence, and to work out the designs, of the Lord. (See Zech. viii., and Dan. iv. 13, 23, x. 10, 13, 20, 21, &c.) In the whole period, they, as truly as the prophets and kings themselves, are seen as God's ministers, watching over the *national life* of the subjects of the Great King.

The Incarnation marks a new epoch of angelic ministrations. "The Angel of Jehovah," the Lord of all created angels, having now descended from heaven to earth, it was natural that His servants should continue to do Him service there. Whether to predict and glorify His birth itself (Matt. i. 20; Luke i. ii.) to minister to Him after his temptation and agony (Matt. iv. 11; Luke xxii. 43), or to

declare His resurrection and triumphant ascension (Matt. xxviii. 2; John xx. 12; Acts i. 10, 11)—they seem now to be indeed "ascending and descending on the Son of Man," almost as though transferring to earth the ministrations of heaven. It is clearly seen, that whatever was done by them for men in earlier days, was but typical of and flowing from their service to Him. (See Ps. xci. 11, comp. Matt. iv. 6.)

The New Testament is the history of the *Church of Christ*, every member of which is united to Him. Accordingly, the angels are revealed now, as "ministering spirits" to each *individual* member of Christ for his spiritual guidance and aid (Heb. i. 14). The records of their visible appearance are but unfrequent (Acts v. 19, viii. 26, x. 3, xii. 7, xxvii. 23); but their presence and their aid are referred to familiarly, almost as things of course, ever after the Incarnation. They are spoken of as watching over Christ's little ones<sup>a</sup> (Matt. xviii. 10), as rejoicing over a penitent sinner (Luke xv. 10), as present in the worship of Christians (1 Cor. xi. 10),<sup>d</sup> and (perhaps) bringing their prayers before God (Rev. viii. 3, 4), and as bearing the souls of the redeemed into Paradise (Luke xvi. 22). In one word they are Christ's ministers of grace now, as they shall be of judgment hereafter (Matt. xiii. 39, 41, 49, xvi. 27, xxiv. 31, &c.). By what method they act we cannot know of ourselves, nor are we told, perhaps lest we should worship them, instead of Him, whose servants they are (see Col. ii. 18; Rev. xxii. 9); but of course their agency, like that of human ministers, depends for its efficiency on the aid of the Holy Spirit.

Such is the action of God's angels on earth, as disclosed to us in the various stages of Revelation; that of the evil angels may be better spoken of elsewhere [SATAN]: here it is enough to say that it is the direct opposite of their true original office, but permitted under God's overruling providence to go until the judgment day.

That there are degrees of the angelic nature, fallen and unfallen, and special titles and agencies belonging to each, is clearly declared by St. Paul (Eph. i. 21; Rom. viii. 38), but what their general nature is, it is needless for us to know, and therefore useless to speculate. For what little is known of this special nature see CHERUBIM, SERAPHIM, MICHAEL, GABRIEL. [A. B.]

#### ANGLING. [FISHING.]

AN'AM (אָנָם; *Anán*; *Aniun*), name of a man (1 Chr. vii. 19).

AN'IM (אָנִים; *Aním*), a city in the mountains of Judah, named with Eshtemoah (*Es-Senuach*) and Goshen (Josh. xv. 50). Eusebius and Jerome (Onom. *Anan*, *Anim*) mention a place of this name in Daroma, 9 miles south of Hebron (comp. also *Anai*, s. v. *Anab*). [G.]

ANISE (ἀνιθον, Matt. xxiii. 23; *Anethan*), properly the common dill (*Anethum graveolens*, Linn.), described by the Talmudists as אַנְתּוֹן. The *anise* has its specific name, *ανισον*, and though similar to the dill in properties, is an entirely distinct plant. The dill is an umbelliferous plant,

<sup>a</sup> The notion of special guardian angels, watching over individuals, is consistent with this passage, but not necessarily deduced from it. The belief of it among the early Christians is shown by Acts xii. 15.

<sup>d</sup> The difficulty of the passage has led to its being questioned, but the wording of the original and the usage of the N. T. seem almost decisive on the point.

producing a small flower of a bright brown colour, and a flattened elliptical fruit or seed. Both the plant and the seed were used by the ancients (Plin. ix. 61, xx. 74; Apic. vi. 5) as a condiment, the latter having a warm aromatic flavour resembling that of caraway seed. Its use with us is medicinal, as a cuminate. It is still extensively cultivated in the East. [W. L. B.]

**ANKLET** (*περισκελίδες*, *πέδα περισφόριοι*, Clem. Alex.). This word only occurs in Is. iii. 18, *דִּמְכָּשׁ* (and as a proper name, Josh. xiii. 16); unless such ornaments are included in *תְּכָנִיטִּים*, Num. xxxi. 50, which word etymologically would mean rather an anklet than a bracelet. Indeed, the same word is used in Is. iii. 20 (without the Aleph prosthetic) for the "stepping-chairs worn by Oriental women, fastened to the ankle-band of each leg, so that they were forced to walk elegantly with short steps" (Gesen. s. r.). They were as common as bracelets and anklets, and made of much the same materials; the pleasant jingling and tinkling which they made as they knocked against each other, was no doubt one of the reasons why they were admired (Is. iii. 16, 18, "the bravery of their tinkling ornaments.") To increase this pleasant sound pebbles were sometimes enclosed in them (Calmct. s. v. *Periscelis* and *Bells*). The Arabic name "khalkhal" seems to be ornamentation, and Lane (*Mod. Egypt*. App. A.) quotes from a song, in allusion to the pleasure caused by their sound, "the ringing of thine anklets has deprived me of reason." Hence Mohammed forbade them in public; "let them not make a noise with their feet, that their ornaments which they hide may [thereby] be discovered" (*Koran*, xiv. 31, quoted by Lane); no doubt Tertullian discommends them for similar reasons: "Nescio an eris de periscello in nervum se patitur arctui. . . . Pedes domi figite et plus quam in auro placebunt" (*De cult. femini*, ii. 13).

They were sometimes of great value. Lane speaks of them (although they are getting uncommon) as "made of solid gold or silver" (*Mod. Egypt*. l. c.); but he says that the poorer village children wear them of iron. For their use among the ancient Egyptians see Wilkinson, iii. 374, and among the ancient Greeks and Romans, *Dict. of Ant. Art*. "Periscelis." They do not, we believe, occur in the Nineveh sculptures.

Livingstone writes of the favourite wife of an African chief, "she wore a profusion of iron rings on her ankles, to which were attached little pieces of sheet iron to enable her to make a tinkling as she walked in her mincing African style" (p. 273). On the weight and inconvenience of the copper rings worn by the chiefs themselves, and the odd walk it causes them to adopt, see *id.* p. 276. [F. W. F.]

**AN'NA** (*הַנָּחַל*; *Anna*; *Anna*): the name occurs in Punic as the sister of Dido. 1. The mother of Samuel (1 K. i. 2 ff.). [HANNAH.] 2. The wife of Tobit (Tob. i. 9 ff.). 3. The wife of Haguel (Tob. vii. 2 ff.). 4. A "prophetess" in Jerusalem at the time of our Lord's birth (Luke ii. 36). [B. F. W.]

**AN'NAAS** (*Zardas*; *Anaas*), 1 Ed. v. 23. [SĒNAAH.]

**AN'NAS** (*Annas*, in Josephus *Ἀνανίας*), a Jewish high-priest. He was son of one Seth, and was appointed high-priest in his 37th year (A.D. 7), after the battle of Actium, by Quirinius, the imperial governor of Syria (Joseph. *Ant.* xviii. 2, §1); but was obliged

to give way to Ismael, son of Phabi, by Valerius Gratus, procurator of Judæa, at the beginning of the reign of Tiberius, A.D. 14 (*ib.* xviii. 2, §2). But soon Ismael was succeeded by Eleazar, son of Annas; then followed, after one year, Simon, son of Camithus, and then, after another year (about A.D. 25), Joseph Caiaphas, son-in-law of Annas (John xviii. 13; Joseph. l. c.). He remained till the passover, A.D. 37, and is mentioned in Luke iii. 2, as officiating high-priest, but after Annas, who seems to have retained the title, and somewhat also of the power of that office. Our Lord's first hearing (John xviii. 13) was before Annas, who then sent him bound to Caiaphas. In Acts iv. 6, he is plainly called the high-priest, and Caiaphas merely named with others of his family. It is no easy matter to give an account of the seemingly capricious applications of this title. Winer supposes that Annas retained it from his former enjoyment of the office; but to this idea St. Luke's expressions seem opposed, in which he clearly appears as bearing the high-priest's dignity at the time then present in each case. Wieseler, in his *Chronology*, and more recently in an article in Herzog's *Realencyclopædie*, maintains that the two, Annas and Caiaphas, were together at the head of the Jewish people, the latter as actual high-priest, the former as president of the Sanhedrim (*סנהדרין*); and so also Selden, *De Synedrion et prefecturis juridicis veterum Hebræorum*, ii. 655: except that this latter supposes Caiaphas to have been the second prefect of the Sanhedrim. Some again suppose that Annas held the office of *נָּזִיר*, or substitute of the high-priest, mentioned by the later Talmudists. He lived to old age, having had five sons high-priests (Joseph. *Ant.* xx. 9, §1). [H. A.]

**AN'NAS** (*Ἀνάδ*; *Nuas*), name of a man (1 Esd. ix. 32).

**ANNU'US** (*Ἀννῶος*; *Amin*), 1 Esd. viii. 48; comp. Exr. viii. 19.

**ANOINT** (*מָשַׁח*; *χρίω*; *ungo*). Anointing in Holy Scripture is either I. Material, with oil [OIL], or II. Spiritual, with the Holy Ghost.

I. MATERIAL.—1. *Ordinary*. Anointing the body or head with oil was a common practice with the Jews, as with other Oriental nations (Deut. xxviii. 40; Ruth iii. 3; Mic. vi. 15). Abstinence from it was a sign of mourning (2 Sam. xiv. 2; Dan. x. 3; Matt. vi. 17). Anointing the head with oil or ointment seems also to have been a mark of respect sometimes paid by a host to his guests (Luke vii. 46 and Ps. xxiii. 5), and was the ancient Egyptian custom at feasts. Observe, however, that in Ps. xxiii. the Hebrew is *תָּשַׁח* "thou hast made fat"; LXX., *ἐλάτυνας*; Vulg., *impinguasti*; and in Luke vii. *ἀλείφω* is used as it is in the similar passages (John xi. 2; xii. 3). The word anoint (*ἀλείφω*) also occurs in the sense of preparing a body with spices and unguents for burial (Mark xvi. 1. Also xiv. 8, *μυρίτω*). From the custom of discontinuing the use of oil in times of sorrow or disaster, to be anointed with oil comes to signify metaphorically, to be in the enjoyment of success or prosperity (Ps. xcii. 10; comp. Eccl. ix. 8).

2. *Official*. Anointing with oil was a rite of inauguration into each of the three typical offices of the Jewish commonwealth, whose tenants, as anointed, were types of the Anointed One (*מָשִׁיחַ*,

**χριστὸς.** (a) *Prophets* were occasionally anointed to their office (1 K. ix. 16), and are called messiahs, or anointed, (1 Chr. xvi. 22; Ps. cv. 15). (b) *Priests*, at the first institution of the Levitical priesthood, were all anointed to their offices, the sons of Aaron as well as Aaron himself (Ex. xl. 15; Num. iii. 3); but afterwards, anointing seems not to have been repeated at the consecration of ordinary priests, but to have been especially reserved for the high-priest (Ex. xxix. 29; Lev. xvi. 32); so that "the priest that is anointed" (Lev. iv. 3) is generally thought to mean the high-priest, and is rendered by the LXX.  $\delta \alpha\rho\chi\iota\epsilon\rho\epsilon\upsilon\varsigma$ ,  $\delta$   $\kappa\epsilon\chi\rho\iota\sigma\mu\acute{\epsilon}\nu\omicron\varsigma$  (הַכֹּהֵן הַמְשִׁיחַ). See also vv. 5, 16, and c. vi. 22 (vi. 15, Heb.). (c) *Kings*. The Jews were familiar with the idea of making a king by anointing, before the establishment of their own monarchy (Judg. ix. 8, 15). Anointing was the principal and divinely-appointed ceremony in the inauguration of their own kings (1 Sam. ix. 16, x. 1; 1 K. i. 34, 39); indeed, so pre-eminently did it belong to the kingly office, that "the Lord's anointed" was a common designation of the theocratic king (1 Sam. xii. 3, 5; 2 Sam. i. 14, 16). The rite was sometimes performed more than once. David was thrice anointed to be king: first, privately by Samuel, before the death of Saul, by way of conferring on him a right to the throne (1 Sam. xvi. 1, 13); again over Judah at Hebron (2 Sam. ii. 4), and finally over the whole nation (2 Sam. v. 3). After the separation into two kingdoms, the kings both of Judah and of Israel seem still to have been anointed (2 K. ix. 3, xi. 12). So late as the time of the captivity the king is called "the anointed of the Lord" (Ps. lxxix. 38, 51; Lam. iv. 20). Some persons, however, think, that after David, subsequent kings were not anointed except when, as in the cases of Solomon, Josiah and Jehu, the right of succession was disputed or transferred (Jahn, *Archaeol. Bibl.* §223). Beside Jewish kings, we read that Hazael was to be anointed king of Syria (1 K. xix. 15). Cyrus also is called the Lord's anointed, as having been raised by God to the throne for the special purpose of delivering the Jews out of captivity (Is. xlv. 1). (d) *Inanimate objects* also were anointed with oil in token of their being set apart for religious service. Thus Jacob anointed a pillar at Bethel (Gen. xxxi. 13); and at the introduction of the Mosaic economy, the tabernacle and all its furniture were consecrated by anointing (Ex. xxx. 26-28). The expression "anoint the shield" (Is. xxi. 5) ( $\sigma\tau\epsilon\upsilon\mu\alpha\tau\epsilon$   $\theta\upsilon\epsilon\pi\epsilon\delta\omicron\varsigma$ , LXX.; *urripite clipeum*, Vulg.) refers to the custom of rubbing oil into the hide, which, stretched upon a frame, formed the shield, in order to make it supple and fit for use.

3. *Ecclesiastical*. Anointing with oil in the name of the Lord is prescribed by St. James to be used together with prayer, by the elders of the church, for the recovery of the sick  $\alpha\lambda\epsilon\iota\psi\alpha\upsilon\tau\epsilon\varsigma$  (James v. 14). Analogous to this is the anointing with oil practised by the twelve (Mark ix. 13), and our Lord's anointing the eyes of a blind man with clay made from saliva, in restoring him miraculously to sight ( $\epsilon\pi\epsilon\chi\rho\iota\sigma\epsilon$ , John ix. 6, 11).

II. **SPIRITUAL**.—1. In the O. T. a Deliverer is promised under the title of Messiah, or Anointed (Ps. ii. 2; Dan. ix. 25, 26); and the nature of his anointing is described to be spiritual, with the Holy Ghost (Is. lxi. 1; see Luke iv. 18). As anointing with oil betokened prosperity, and produced a cheer-

ful aspect (Ps. civ. 15), so this spiritual unction is figuratively described as anointing "with the oil of gladness" (Ps. xlv. 7; Heb. i. 9). In the N. T. Jesus of Nazareth is shown to be the Messiah, or Christ, or Anointed of the Old Testament (John i. 41; Acts ix. 22, xvii. 2, 3, xviii. 5, 28); and the historical fact of his being anointed with the Holy Ghost is recorded and asserted (John i. 32, 33; Acts iv. 27, x. 38). 2. *Spiritual anointing* with the Holy Ghost is conferred also upon Christians by God (2 Cor. i. 21), and they are described as having an unction ( $\chi\rho\iota\sigma\mu\alpha$ ) from the Holy One, by which they know all things (1 John ii. 20, 27). To anoint the eyes with eyesalve is used figuratively to denote the process of obtaining spiritual perception (Rev. iii. 18). [T. T. P.]

**ANOS** ( $\alpha\nu\omicron\varsigma$ ; *Junus*), 1 Esd. ix. 34. [YANIAH.]

**ANT** ( $\alpha\mu\eta$ ); an insect twice mentioned in the book of Proverbs (vi. 6, xxx. 25). In both passages its provident habits are referred to, especially its providing its meat in the summer. This has generally been supposed to imply that the store was laid up against winter, and among the ancients this belief was universal. It may suffice to refer to *Sat.* 1, 1, v. 33-38. But observation of the habits of ants does not confirm this belief, and as certainly it does not necessarily follow from the statements of Scripture. (See Kirby and Spence's *Entomology*, p. 313, Ed. 7, London, 1856, where the question is fully discussed.) The particular species of ant referred to by Solomon has not been identified; and we find no mention of ants in modern accounts of Palestine. The LXX. render the word  $\alpha\mu\eta$  by  $\mu\upsilon\pi\alpha\mu\eta$ , in Prov. vi. 6. The derivation of  $\alpha\mu\eta$  is supposed to be from the root  $\mu\alpha\lambda$ , which again is connected with  $\mu\alpha\lambda\lambda$  and  $\mu\alpha\lambda$ , *abscedit vel abscessus est*, and hence perhaps the idea that the ants bite off the end of the grain they gather to prevent its germinating. It seems more reasonable to connect  $\alpha\mu\eta$  with the Arabic root  $\نزل$ , *conscendit praeputans arborem*: so that  $\alpha\mu\eta$  is properly a climber by creeping. See Bochart *Hieroz.* iii. 478. seq. Lips. [W. D.]

**ANTIOCH** ( $\alpha\alpha\tau\iota\omicron\chi\epsilon\lambda\alpha$ ). 1. In SYRIA. The capital of the Greek kings of Syria, and afterwards the residence of the Roman governors of the province which bore the same name. This metropolis was situated where the chain of Lebanon, running northwards, and the chain of Taurus, running eastwards, are brought to an abrupt meeting. Here the Orontes breaks through the mountains; and Antioch was placed at a bend of the river, partly on an island, partly on the level which forms the left bank, and partly on the steep and craggy ascent of Mount Silpius, which rose abruptly on the south. In the immediate neighbourhood was Daphne, the celebrated sanctuary of Apollo (2 Macc. iv. 33); whence the city was sometimes called ANTIOCH BY DAPHNE, to distinguish it from other cities of the same name.

No city, after Jerusalem, is so intimately connected with the history of the apostolic church. Certain points of close association between these two cities, as regards the progress of Christianity, may be noticed in the first place. One of the

seven deacons, or almoners appointed at Jerusalem, was Nicolas, a proselyte of Antioch (Acts vi. 5). The Christians, who were dispersed from Jerusalem at the death of Stephen, preached the gospel at Antioch (ibid. xi. 19). It was from Jerusalem that Agabus and the other prophets, who foretold the famine, came to Antioch (ibid. xi. 27, 28); and Barnabas and Saul were consequently sent on a mission of charity from the latter city to the former (ibid. xi. 30, xii. 25). It was from Jerusalem again that the Judaizers came, who disturbed the church at Antioch (ibid. xv. 1); and it was at Antioch that St. Paul rebuked St. Peter for conduct into which he had been betrayed through the influence of emissaries from Jerusalem (Gal. ii. 11, 12).

The chief interest of Antioch, however, is connected with the progress of Christianity among the heathen. Here the first Gentile church was founded (Acts xi. 20, 21); here the disciples of Jesus Christ were first called Christians (xi. 26); here St. Paul exercised (so far as is distinctly recorded) his first systematic ministerial work (vi. 22-26; see *Ant.* 26-28; also xv. 35 and xviii. 23); hence he started at the beginning of his first missionary journey (xii. 1-3), and thither he returned (xiv. 26). So again after the apostolic council (the decrees of which were specially addressed to the Gentile converts at Antioch, xv. 23), he began and ended his second missionary journey at this place (xv. 36, xviii. 22). This too was the starting point of the third missionary journey (xviii. 23), which was brought to a termination by the imprisonment at Jerusalem and Caesarea. Though St. Paul was never again, so far as we know, at Antioch, it did not cease to be an important centre for Christian progress; but it does not belong to this place to trace its history as a patriarchate, and its connexion with Ignatius, Chrysostom, and other eminent names.

Antioch was founded in the year 300 B.C., by Seleucus Nicator, with circumstances of considerable display, which were afterwards embellished by fable. The situation was well chosen, both for military and commercial purposes. Jews were settled there from the first in large numbers, were governed by their own ethnarch, and allowed to have the same political privileges with the Greeks (Joseph. *Ant.* xii. 3, §1; *c. Ap.* ii. 4). Antioch grew under the successive Seleucid kings, till it became a city of great extent and of remarkable beauty. Some of the most magnificent buildings were on the island. One feature, which seems to have been characteristic of the great Syrian cities, — a vast street with colonnades, intersecting the whole from end to end, — was added by Antiochus Epiphanes. Some lively notices of the Antioch of this period, and of its relation to Jewish history, are supplied by the books of Maccabees. (See especially 1 Macc. iii. 37, xi. 13; 2 Macc. iv. 7-9, v. 21, xi. 36.)

It is the Antioch of the Roman period with which we are concerned in the N. T. By Pompey it had been made a free city, and such it continued till the time of Antoninus Pius. The early Emperors raised there some large and important structures, such as aqueducts, amphitheatres and baths. Herod the Great contributed a road and a colonnade (Joseph. *Ant.* xvi. 5, §3; *B. J.*, i. 21, §11). Here should be mentioned that the citizens of Antioch under the Empire were noted for scurrilous wit and the invention of nicknames. This perhaps was the origin of the name by which the disciples of Jesus Christ are designated, and which

was probably given by Romans to the despised sect, and not by Christians to themselves.

The great authority for all that is known of ancient Antioch is C. O. Muller's *Antiquitates Antiochenae* (Gött. 1839). Modern Antakia is a shrunken and miserable place. Some of the walls, shattered by earthquakes, have a striking appearance on the crags of Mount Silpius. They are described in Chesney's account of the *Euphrates Expedition*, where also is given a view of a gateway which still bears the name of St. Paul. One error, however, should be pointed out, which has found its way into these volumes from Calmet, namely, Jerome's erroneous identification of Antioch with the Riblah of the Old Testament.

Gate of St. Paul, Antakia.

2. ANTIOCH IN PISIDIA (Acts xiii. 14, xiv. 19, 21; 2 Tim. iii. 11). The position of this town is clearly pointed out by Strabo in the following words (xii. p. 577):—"In the district of Phrygia called Paroreia, there is a certain mountain-ridge, stretching from E. to W. On each side there is a large plain below this ridge; and it has two cities in its neighbourhood: Philomelium on the north, and on the other side Antioch, called Antioch near Pisidia. The former lies entirely in the plain; the latter (which has a Roman colony) is on a height." The relations of distance also between Antioch and other towns are known by the Peutingerian table. Its site, however, has only recently been ascertained. It was formerly supposed to be *Ak-sheer*, which is now known to be Philomelium on the north side of the ridge. Even Winer (1847) gives this view, the difficulties of which were seen by Leake, and previously by Mannert. Mr. Arundell, the British chaplain at Smyrna, undertook a journey in 1833 for the express purpose of identifying the Pisidian Antioch, and he was perfectly successful (Arundell's *Asia Minor*, ch. xii., xiii., xiv.). The ruins are very considerable. This discovery was fully confirmed by Mr. Hamilton (*Res. in Asia Minor*, vol. i. ch. 27). Antioch corresponds to *Yalobatch*, which is distant from *Ak-sheer* six hours over the mountains.

This city, like the Syrian Antioch, was founded by Seleucus Nicator. Under the Romans it became a colony, and was also called Caesarea, as we learn from Pliny (v. 24). The former fact is confirmed

by the Latin inscriptions and other features of the coins of the place; the latter by inscriptions discovered on the spot by Mr. Hamilton.

The occasion on which St. Paul visited the city for the first time (Acts xiii. 14) was very interesting and important. His preaching in the synagogue led to the reception of the gospel by a great number of the Gentiles: and this resulted in a violent persecution on the part of the Jews, who first, using the influence of some of the wealthy female residents, drove him from Antioch to Iconium (ib. 50, 51), and subsequently followed him even to Lystra (Acts xiv. 19). St. Paul, on his return from Lystra, revisited Antioch for the purpose of strengthening the minds of the disciples (ib. 21). These events happened when he was on his first missionary journey, in company with Barnabas. He probably visited Antioch again at the beginning of his second journey, when Silas was his associate, and Timotheus, who was a native of this neighbourhood, had just been added to the party. The allusion in 2 Tim. iii. 11 shows that Timotheus was well acquainted with the sufferings which the apostle had undergone during his first visit to the Pisidian Antioch. [PHRYGIA; PISIDIA.] [J. S. H.]

**ANTIOCHUS II.** (*Ἀντίοχος, the withstander*), king of Syria, surnamed the God (*Θεός*), "in the first instance by the Milesians, because he overthrew their tyrant Timarchus" (App. Syr. 65), succeeded his father Antiochus (*Σωτήρ, the Saviour*) in B.C. 261. During the earlier part of his reign he was engaged in a fierce war with Ptolemaeus Philadelphus, king of Egypt (*totis viribus dimicavit*, Hieron. *ad Dan.* xi. 6), in the course of which Parthia and Bactria revolted and became independent kingdoms. At length (B.C. 250) peace was made, and the two monarchs "joined themselves together" (Dan. xi. 6), and Ptolemy ("the king of the south") gave his daughter Berenice in marriage to Antiochus ("the king of the north") who set aside his former wife, Laodice, to receive her. After some time, on the death of Ptolemy (B.C. 247), Antiochus recalled Laodice and her children Seleucus and Antiochus to court. Thus Berenice was "not able to retain her power;" and Laodice, in jealous fear lest she might a second time lose her ascendancy, poisoned Antiochus (him "that supported her," i.e. Berenice), and caused Berenice and her infant son to be put to death, B.C. 246 (Dan. xi. 6; Hieron. *ad Dan.* l. c. App. Syr. 65).

After the death of Antiochus, Ptolemaeus Evergetes, the brother of Berenice ("out of a branch of her root"), who succeeded his father Ptol. Philadelphus, exacted vengeance for his sister's death by an invasion of Syria, in which Laodice was killed, her son Seleucus Callinicus driven for a time from the throne, and the whole country plundered (Dan. xi. 7-9; Hieron. l. c.; hence his surname "*the benefactor*"). The hostilities thus renewed continued for many years; and on the death of Seleucus B.C. 226, after his "return into his own land" (Dan. xi. 9), his sons Alexander (Seleucus) Keraunos, and Antiochus "assembled a great multitude of forces" against Ptol. Philopator the son of Evergetes, and "one of them" (Antiochus) threatened to overthrow the power of Egypt (Dan. xi. 9, 10; Hieron. l. c.). [B. F. W.]

**ANTIOCHUS III.**, surnamed the Great (*μέγας*), succeeded his brother Seleucus Keraunos, who was assassinated after a short reign in B.C. 223. He prosecuted the war against Ptol. Philo-

pator with vigour, and at first with success. In B.C. 218 he drove the Egyptian forces to Sidon, conquered Samaria and Gilead, and wintered at Ptolemais, but was defeated next year at Raphia, near Gaza (B.C. 217), with immense loss, and in consequence made a peace with Ptolemy, in which he ceded to him the disputed provinces of Coele-Syria, Phoenicia and Palestine (Dan. xi. 11, 12; Polyb. v. 40 ff.; 53 ff.). During the next thirteen years Antiochus was engaged in strengthening his position in Asia Minor, and on the frontiers of Parthia, and by his successes gained his surname of the Great. At the end of this time, B.C. 205, Ptolemaeus Philopator died, and left his kingdom to his son Ptol. Epiphanes, who was only five years old. Antiochus availed himself of the opportunity which was offered by the weakness of a minority and the unpopularity of the regent, to unite with Philip III. of Macedon for the purpose of conquering and dividing the Egyptian dominions. The Jews, who had been exasperated by the conduct of Ptol. Philopator both in Palestine and Egypt, openly espoused his cause, under the influence of a short-sighted policy ("the fictions among thy people shall rise," i.e. against Ptolemy: Dan. xi. 14). Antiochus succeeded in occupying the three disputed provinces, but was repulsed to Asia by a war which broke out with Attalus, king of Pergamum; and his ally Philip was himself embroiled with the Romans. In consequence of this diversion Ptolemy, by the aid of Scopas, again made himself master of Jerusalem (Joseph. *Ant.* xii. 3, 3) and recovered the territory which he had lost (Hieron. *ad Dan.* xi. 14). In B.C. 198 Antiochus reappeared in the field and gained a decisive victory "near the sources of the Jordan" (Joseph. *Ant.* xii. 3, 3; Hieron. l. c. ubi *Pancon nunc coulita est*); and afterwards captured Scopas and the remnant of his forces who had taken refuge in Sidon (Dan. xi. 15). The Jews, who had suffered severely during the struggle (Joseph. l. c.), welcomed Antiochus as their deliverer, and "he stood in the glorious land which by his hand was to be consumed" (Dan. xi. 16). His further designs against Egypt were frustrated by the intervention of the Romans; and his daughter Cleopatra (Polyb. xxviii. 17), whom he gave in marriage to Ptol. Epiphanes, with the Phoenician provinces for her dower (Joseph. *Ant.* xii. 4, 1), favoured the interests of her husband rather than those of her father (Dan. xi. 17; Hieron. l. c.). From Egypt Antiochus turned again to Asia Minor, and after various successes in the Aegean crossed over to Greece, and by the advice of Hannibal entered on a war with Rome. His victorious course was checked at Thermopylae (B.C. 191), and after subsequent reverses he was finally defeated at Magnesia in Lydia, B.C. 190.<sup>a</sup> By the peace which was concluded shortly afterwards (B.C. 188) he was forced to cede all his possessions "on the Roman side of M. Taurus," and to pay in successive instalments an enormous sum of money to defray the expenses of the war (15,000 Euboic talents: App. Syr. 38). This last condition led to his ignominious death. In B.C. 187 he attacked a rich temple of Belus in Elymais, and was slain by the people who rose in its defence (Strab. xvi. 744; Just. xxxii. 2). Thus "he stumbled and fell, and was not found" (Dan. xi. 19).

<sup>a</sup> The statement in 1 Mac. viii. 6, that Antiochus was taken prisoner by the Romans, is not supported by any other testimony.

The policy of Antiochus toward the Jews was liberal and conciliatory. He not only assured to them perfect freedom and protection in the exercise of their worship, but according to Josephus (*Ant.* xii. 3, 3), in consideration of their great sufferings and services in his behalf, he made splendid contributions toward the support of the temple ritual, and gave various immunities to the priests and other inhabitants of Jerusalem. At the same time imitating the example of Alexander and Seleucus, and appreciating the influence of their fidelity and unity, he transported two thousand families of Jews from Mesopotamia to Lydia and Phrygia, to repress the tendency to revolt which was manifested in these provinces (*Joseph. Ant.* l. c.).

Two sons of Antiochus occupied the throne after him, Seleucus Philopator, his immediate successor, and Antiochus IV., who gained the kingdom upon the assassination of his brother. [B. F. W.]

Tetradrachm (Attic talent) of Antiochus III.

Obv. Head of king to right. Rev. Α. ΒΑΣΙΛΕΥΣ ΑΝΤΙΟΧΟΥ. In field, mv. Apollo, seated on cithara, to left.

**ANTIOCHUS IV. EPIPHANES** (Ἐπιφάνης, the *Illustratus*, also called Θεός, and in mockery Ἐπιφάνης, the *Frontis*: *Athen.* x. 438; *Polyb.* xxvi. 10) was the youngest son of Antiochus the Great. He was given as a hostage to the Romans (B.C. 188) after his father's defeat at Magnesia. In B.C. 175 he was released by the intervention of his brother Seleucus, who substituted his own son Demetrius in his place. Antiochus was at Athens when Seleucus was assassinated by Heliodorus. He took advantage of his position, and, by the assistance of Eumenes and Attalus, easily expelled Heliodorus who had usurped the crown, and himself "obtained the kingdom by flatteries" (*Dan.* xi. 21; cf. *Liv.* xli. 20), to the exclusion of his nephew Demetrius (*Dan.* viii. 7).

The accession of Antiochus was immediately followed by desperate efforts of the Hellenizing party at Jerusalem to assert their supremacy. Jason (*Jesus*: *Jos. Ant.* xii. 5, 1, see *JASON*), the brother of Onias III., the high priest, persuaded the king to transfer the high priesthood to him, and at the same time bought permission (2 Macc. iv. 9) to carry out his design of habituating the Jews to Greek customs (2 Macc. iv. 7, 20). Three years afterwards Menelaus, of the tribe of Benjamin [*SIMON*], who was commissioned by Jason to carry to Antiochus the price of his office, supplanted Jason by offering the king a larger bribe, and was himself appointed high priest, while Jason was obliged to take refuge among the Ammonites (2 Macc. iv. 23-26). From these circumstances and from the marked honour with which Antiochus was received at Jerusalem very early in his reign (c. B.C. 173; 2 Macc. iv. 22), it appears that he found no difficulty in regaining the border provinces which had been given as the dower of his sister

Cleopatra to Ptol. Epiphanes. But his ambition led him still further, and he undertook four campaigns against Egypt, B.C. 171, 170, 169, 168, with greater success than had attended his predecessor, and the complete conquest of the country was prevented only by the interference of the Romans (*Dan.* xi. 24; 1 Macc. i. 16 ff.; 2 Macc. v. 11 ff.). The course of Antiochus was everywhere marked by the same wild prodigality as had signalised his occupation of the throne (*Dan.* l. c.). The consequent exhaustion of his treasury, and the armed conflicts of the rival high priests whom he had appointed, furnished the occasion for an assault upon Jerusalem on his return from his second Egyptian campaign (B.C. 170), which he had probably planned in conjunction with Ptol. Philometor, who was at that time in his power (*Dan.* xi. 26). The Temple was plundered, a terrible massacre took place, and a Phrygian governor was left with Menelaus in charge of the city (2 Macc. v. 1-22; 1 Macc. i. 20-28). Two years afterwards, at the close of the fourth Egyptian expedition (*Polyb.* xxix. 1, 11; *App. Syr.* 66; cf. *Dan.* xi. 29, 30), Antiochus detached a force under Apollonius to occupy Jerusalem and fortify it, and at this time he availed himself of the assistance of the ancestral enemies of the Jews (1 Macc. iv. 61; v. 3 ff.; *Dan.* xi. 41). The decrees then followed which have rendered his name infamous. The Temple was desecrated, and the observance of the law was forbidden. "On the fifteenth day of [Sisleu] [the Syrians] set up the abomination of desolation (i. e. an idol altar: v. 59) on the altar" (1 Macc. i. 54). Ten days afterwards an

offering was made upon it to Jupiter Olympius. At Jerusalem all opposition appears to have ceased; but Mattathias and his sons organised a resistance ("holpen with a little help," *Dan.* xi. 31), which preserved inviolate the name and faith of Israel. Meanwhile Antiochus turned his arms to the East, towards Parthia (*Tac. Hist.* v. 8) and Armenia (*App. Syr.* 45; *Diod. ap. Muller, Fragm.* ii. p. 10; *Dan.* xi. 40). Hearing not long afterwards of the riches of a temple of Naumes ("the desire of women," *Dan.* xi. 37) in Elymais, hung with the gifts of Alexander, he resolved to plunder it. The attempt was defeated; and though he did not fall like his father in the act of sacrilege, the event hastened his death. He retired to Babylon, and thence to Tabae in Persia, where he died B.C. 164, the victim of superstition, terror, and remorse (*Polyb.* xxxi. 2; *Jo.eph. Ant.* xii. 8, 1 ff.), having first heard of the successes of the Maccabees in restoring the temple-worship at Jerusalem (1 Macc. vi. 1-16; cf. 2 Macc. i. 7-17?). "He came to his end and there was none to help him" (*Dan.* xi. 45). Cf. *App. Syr.* 45; *Liv.* xli. 24-5, xlii. 6, xliii. 19, xliv. 11-13; *Joseph. Ant.* xii. 5, 8.

The reign of Antiochus, thus shortly traced, was the last great crisis in the history of the Jews before the coming of our Lord. The prominence which is given to it in the book of Daniel fitly accords with its typical and representative character (*Dan.* vii. 8, 25, viii. 11 ff.). The conquest of Alexander had introduced the forces of Greek thought and life into the Jewish nation, which was already prepared for their operation [*ALEXANDER*]. For more than a century and a half these forces had acted powerfully both upon the faith and upon the habits of the people; and the time was come when an onward struggle alone could decide whether Judaism was

to be merged in a rationalised Paganism, or to rise not only victorious from the conflict, but more vigorous and more pure. There were many symptoms which betokened the approaching struggle. The position which Judaea occupied on the borders of the conflicting empires of Syria and Egypt, exposed equally to the open miseries of war and the treacherous favours of rival sovereigns, rendered its national condition precarious from the first, though these very circumstances were favourable to the growth of freedom. The terrible crimes by which the wars of "the North and South" were stained, must have alienated the mind of every faithful Jew from his Grecian lords, even if persecution had not been superadded from Egypt first and then from Syria. Politically nothing was left for the people in the reign of Antiochus but independence, or the abandonment of every prophetic hope. Nor was their social position less perilous. The influence of Greek literature, of foreign travel, of extended commerce, had made itself felt in daily life. At Jerusalem the mass of the inhabitants seem to have desired to imitate the exercises of the Greeks; and a Jewish embassy attended the games of Hercules at Tyre (2 Macc. iv. 9-20). Even their religious feelings were yielding; and before the rising of the Maccabees no opposition was offered to the execution of the king's decrees. Upon the first attempt of Jason the "priests had no courage to serve at the altar" (2 Macc. iv. 14; cf. 1 Macc. i. 43); and this not so much from wilful apostasy, as from a disregard to the vital principles involved in the conflict. Thus it was necessary that the final issues of a false Hellenism should be openly seen that it might be discarded for ever by those who cherished the ancient faith of Israel.

 ΘΕΟΥ ΕΠΙΦΑΝΟΥΣ ΝΙΚΗΦΟΡΟΥ. Jupiter seated to left, holding a Victory. In field monogram.

The conduct of Antiochus was in every way suited to accomplish this end; and yet it seems to have been the result of passionate impulse rather than of any well-laid scheme to extirpate a strange creed. At first he imitated the liberal policy of his predecessors; and the occasion for his attacks was furnished by the Jews themselves. Even the motives by which he was finally actuated were personal, or at most only political. Able, energetic (Polyb. xxvii. 17) and liberal to profusion, Antiochus was reckless and unscrupulous in the execution of his plans. He had learnt at Rome to court power and to dread it. Hegained an empire, and he remembered that he had been a hostage. Regardless himself of the gods of his fathers (Dan. xi. 37), he was incapable of appreciating the power of religion in others; and like Nero in later times, he became a type of the enemy of God, not as the Roman emperor by the perpetration of unnatural crimes, but by the disregard of every higher feel-

ing. "He magnified himself above all." The reality whom he recognised was the Roman war-god; and fortresses were his most sacred temples (Dan. xi. 38 ff.; Ewald, *Gesch. des Volkes Isr.* iv. 340). Confronted with such a persecutor the Jews realised the spiritual power of his faith. The evils of heathendom were seen concentrated in a personal shape. The outward forms of worship became invested with something of a sacramental dignity. Common life was purified and ennobled by heroic devotion. An independent nation asserted the integrity of its hopes in the face of Egypt, Syria, and Rome.

[B. F. W.]

**ANTIOCHUS V. EUPTATOR** (*Εὐπάτωρ*, of noble descent), succeeded his father Antiochus IV. B.C. 164, while still a child, under the guardianship of Lysias (App. *Syr.* 46; 1 Macc. iii. 32, f., vi. 17), though Antiochus had assigned this office to Philip his own foster-brother on his death-bed (1 Macc. vi. 14, f. 55; 2 Macc. ix. 29). Shortly after his accession he marched against Jerusalem with a large army, accompanied by Lysias, to relieve the Syrian garrison, which was hard pressed by Judas Maccabaeus (1 Macc. vi. 19 ff.). He repulsed Judas at Bethzacharia, and took Bethsur (Bethzur) after a vigorous resistance (1 Macc. vi. 31-50). But when the Jewish force in the temple was on the point of yielding, Lysias persuaded the king to conclude a hasty peace that he might advance to meet Philip, who had returned from Persia and made himself master of Antioch (1 Macc. vi. 51 ff.; Joseph. *Ant.* xii. 9, 5 f.). Philip was speedily overpowered (Joseph. l. c.); but in the next year (B.C. 162) Antiochus and Lysias fell into the hands of Demetrius Soter, the son of Seleucus Philopator, who caused them to be put to death in revenge for the wrongs which he had himself suffered from Antiochus Epiphanes (1 Macc. vii. 2-4; 2 Macc. xiv. 1, 2; Joseph. *Ant.* xii. 10, 1. Polyb. xxxi. 19).

[B. F. W.]

**ANTIOCHUS VI.** (*Ἀλέξανδρος Αλεξάνδρου τοῦ νόθου*, App. *Syr.* 68; sur-named *Θεός*, Joseph. *Ant.* xii. 7, 1; and *ἐπιφανὴς Διοσυρος* on coins), was the son of Alexander Balas and Cleopatra (App. *Syr.* l. c.). After his father's death (146 B.C.) he remained in Arabia; but though still a child (*παιδίον*, App. l. c., *παιδίων νεώτερον*, 1 Macc. xi. 54), he was soon afterwards brought forward (c. 145 B.C.) as a claimant to the throne of Syria against Demetrius Nicator by Tryphon or Diodotus (1 Macc. xi. 39; App. *Syr.* 68; Strab. xiv. p. 668; xvi. p. 752), who had been an officer of his father. Tryphon succeeded in gaining Antioch (1 Macc. xi. 56); and afterwards the greater part of Syria submitted to the young Antiochus. Jonathan, who was confirmed by him in the high priesthood (1 Macc. xi. 57) and invested with the government of Judaea, contributed greatly to his success [ALEXANDER BALAS], occupying Ascalon and Gaza, and reducing the country as far as Damascus (1 Macc. xi. 60-2). He afterwards defeated the troops of Demetrius at Hazer (1 Macc. xi. 67) near Cadash (v. 73); and repulsed a second attempt which he made to regain Palestine (1 Macc. xii. 24 ff.). Tryphon having now gained the supreme power in the name of Antiochus, no longer concealed his design of usurping the crown. As a first step he took Jonathan by treachery and put him to death, B.C. 143 (1 Macc. xii. 40 ff.); and afterwards murdered the young king, and ascended

the throne (1 Macc. xiii. 31; Joseph. *Ant.* xiii. 5, 6; App. *Syr.* 68. Livy (Epit. 55) says incorrectly *decem annos admodum habens*... [Hod. ap. Müller, *Fragm.* ii. 19. Just. xxxvi. 1.]. [B. F. W.]

Tetradrachm (Attic talent) of Antiochus VI.

Obv.: Head of King, radiate, to right. Rev.: ΒΑΣΙΛΕΥΣ ΑΝΤΙΟΧΟΥ ΕΠΙΦΑΝΟΥΣ ΔΙΟΝΥΣΟΥ. In field, ΤΡΥΦ (Tryphon), and date ΘΞΠ (109 A.D. Seleucid)

**ANTIOCHUS VII. SIDE'TES** (Σιδήτης, of Side, in Pamphylia: not from ΣΨ, a hunter:

[Plut. *Apophth.* p. 34; called also Εδωρεβής, the pious, Joseph. *Ant.* xiii. 8, 2; Euseb. *Chron. Arm.* i. 349), king of Syria, was the second son of Demetrius I. When his brother, Demetrius Nicator, was taken prisoner (c. 141 B.C.) by Mithridates I. (Arsaces VI., 1 Macc. xiv. 1) king of Parthia, he married his wife Cleopatra (App. *Syr.* 68; Just. xxxvi. 1), and obtained possession of the throne (137 B.C.), having expelled the usurper Tryphon (1 Macc. xv. 1 ff.; Strab. xiv. p. 668). At first he made a very advantageous treaty with Simon, who was now "high priest and prince of the Jews," but when he grew independent of his help, he withdrew the concessions which he had made and demanded the surrender of the fortresses which the Jews held, or an equivalent in money (1 Macc. xv. 26 ff.; Joseph. *Ant.* xiii. 7, 3). As Simon was unwilling to yield to his demands, he sent a force under Cendebeaus against him, who occupied a fortified position at Cedron (1 Macc. xv. 41), near Azotus, and harassed the surrounding country. After the defeat of Cendebeaus by the sons of Simon and the destruction of his works (1 Macc. xvi. 1-10), Antiochus, who had returned from the pursuit of Tryphon, undertook an expedition against Judaea in person. He laid siege to Jerusalem, but according to Josephus granted honorable terms to John Hyrcanus (B.C. 133), who had made a vigorous resistance (Joseph. *Ant.* xiii. 8; yet comp. Porphyry, ap. Euseb. *Chron. Arm.* i. 349, *muros urbis demolitur atque electissimos eorum trucidat*). Antiochus next turned his arms against the Parthians, and Hyrcanus accompanied him in the campaign. But after some successes, he was entirely defeated by Phraortes II. (Arsaces VII.), and fell in the battle c. B.C. 127-6 (Joseph. l. c.; Just. xxxvi.; xxxviii. 10; App. *Syr.* 68, *ἔκτειλεν ταύτους*). For the year of his death cf. Niebuhr, *RI. Schrift.* i. 251. f.; Clinton, *F. H.* ii. 332, ff.). [B. F. W.]

**ANTIPAS.** [HEROD.]

**ANTIPATER** ('Αντίπατρος; Antipater), son of Jason, ambassador from the Jews to the Lacedaemonians (1 Macc. xii. 16, xiv. 22).

**ANTIPATRIS** ('Αντίπατρος). Our means of identifying this town are due, partly to the fortu-

nate circumstance that the old Semitic name of the place has lingered among the present Arabic population, and partly to a journey specially undertaken by Dr. Eli Smith, for the purpose of illustrating the night march of the soldiers who conveyed St. Paul from Jerusalem to Caesarea (Act. xxiii. 31). Dr. Robinson was of opinion, when he published his first edition, that the road which the soldiers took on this occasion led from Jerusalem to Caesarea by the pass of *Beth-Horon*, and by Lydda, or Diospolis. This is the route which was followed by Cestius Gallus, as mentioned by Josephus (*B. J.* ii. 19, §1); and it appears to be identical with that given in the Jerusalem Itinerary, according to which Antipatris is 42 miles from Jerusalem, and 26 from Caesarea. Even on this supposition it would have been quite possible for troops leaving Jerusalem on the evening of one day, to reach Caesarea on the next, and to start thence, after a rest, to return to (it is not said that

they arrived at) their quarters at Jerusalem before nightfall. But the difficulty is entirely removed by Dr. Smith's discovery of a much shorter road, leading by Gophna direct to Antipatris. On this route he met the Roman pavement again and again, and indeed says "he does not remember observing anywhere before so extensive remains of a Roman road." (See *Bibliotheca Sacra*, vol. i. pp. 478-498; *Life and Epistles of St. Paul*, vol. ii. pp. 330-334, 2nd ed.)

It may be difficult to fix the precise spot where the ancient city stood, but the Arabic name, *Kefr-Saba*, determines the general situation. Josephus tells us that the old name was Capharsaba (*Καφαρ-σάβα* or *Χαβασάβα*), and that Herod, when he rebuilt the city, changed it to Antipatris, in honour of his father Antipater (*Ant.* xiii. 15, §1, xvi. 5, §2; *B. J.* i. 21, §9). The position of Kefr-Saba is in sufficient harmony with what the Jewish historian says of the position of Antipatris, which he describes as a well-watered and well-wooded plain, near a hilly ridge, and with his notices of a trench dug from thence for military purposes to the sea near Joppa, by one of the Asmonean princes (*Ant.* xiii. 15, §1; *B. J.* i. 4, §7). At a later period he mentions the place again in connexion with a military movement of Vespasian from Caesarea towards Jerusalem (*B. J.* iv. 8, §1). No remains of ancient Antipatris have been found; but the ground has not been fully explored. [J. S. H.]

**ANTONIA**, a fortress, built by Herod on the site of the more ancient Baris, on the N.W. of the Temple, and so named by him after his friend Antonius. [JERUSALEM.] The word nowhere occurs in the Bible.

**ANTOTHJ'IAH** (עֲנֹתִיָּה; 'Αναθόθ' καὶ 'Ιαθί; *Anathothia*), name of a man (1 Chr. viii. 24).

**A'NUB** (עֲנוֹב; 'Ενός; *Anob*), name of a man (1 Chr. iv. 8).

**A'NUS** ('Αννιός; *Banaeus*), a Levite (1 Esd. ix. 48). [BANI.]

**AP'AME** ('Αρδα; *Apeme*), concubine of Harius (1 Esd. iv. 29).

**APE** (ἄπῃ, *K'ph*). An animal of the monkey tribe mentioned in 1 K. x. 22, and in the parallel passage in 2 Chr. ix. 21, among the merchandise

brought by the fleets of Solomon and Hiram once in every three years. The LXX. render the word by *πίθηκος*, which is equivalent to the Latin *Sinia*. The Greeks have the word *κῆβος*, or *κῆπος*, for a long-tailed species of monkey (Arist. *H. A.* ii. 8, 9), and Pliny (viii. 19, s. 28) uses *ceplus*. Both Greeks and Hebrews received the word with the animal from India, for the ape, both in Sansc. and Malabar, is called *Kopi* = swift, active. Hence also the Germ. *Affe*, the Anglosaxon *Ape*, and the Engl. *Ape*, the initial guttural being dropped, just as the Latins got *Amire* from the Sansc. *Kūma*. (See Bopp. *Sansc. Gloss.* p. 65.) The Cephis of Aethiopia are described and figured in I. Ludolfi *Historia Aethiopiae*, i. 10, §52-64. They are represented as tailless animals, climbing rocks, eating worms and ants, and protecting themselves from the attack of lions by casting sand into their eyes. In a mosaic pavement found at Praeneste, and figured in Shaw's *Travels*, p. 423, an ape or monkey is represented, having inscribed near it the word **ΚΗΠΕΝ**. [W. D.]

**APELLES** (Ἀπελλῆς), a Christian saluted by St. Paul in Rom. xvi. 10, and honoured by the designation *δόκιμος ἐν Χριστῷ*. Origen (*in loc.*) suggests that he may have been identical with Apollon; but there seems no ground for supposing it, and we learn from Horace (*Sat.* i. 5, 100) that Apella was a common name among the Jews. Tradition makes him bi-shop of Smyrna, or Hecleia (Fabric. *Lux Evangl.* p. 116). [H. A.]

**APHAR'SATHCHITES, APHARSITES, APHAR'SACITES** (אַפְרַסְאֲחִיטִים, אִפְרַסְיִים, אִפְרַסְיָאִים; Ἀφαρασαθαῖοι, Ἀφαρασαῖοι, Ἀφαρασαῖοι; *Apharsathachitae, Arphasachitae*), the names of certain tribes, colonies from which had settled in Samaria under the Assyrian leader Assnapper (Ezr. iv. 9, v. 6). The first and last are regarded as the same. Where these tribes came is entirely a matter of conjecture: the initial *A* is regarded as *prosthetic*: if this be rejected, the remaining portion of the two first names bears some resemblance (a very distant one, it must be allowed) to *Panaetacae*, or *Panaetiaceni*, significant of *mountain-dwellers*, applied principally to a tribe living on the borders of Media and Persia; while the second has been referred to the Parthasii, and by Gesenius, to the Persae, to which it certainly bears a much greater affinity, especially in the prolonged form of the latter name found in Dan. vi. 29 (פֶּרְסִים). The presence of the proper name of the Persians in Ezr. i. 1, iv. 3, must throw some doubt upon Gesenius' conjecture; but it is very possible that the *local* name of the tribe may have undergone alteration, while the official and general name was correctly given. [W. L. B.]

**A/PHK** (אַפְהַק, from a root signifying tenacity or firmness, Ges.; Ἀφέκ), the name of several places in Palestine.

1. A royal city of the Canaanites, the king of which was killed by Joshua. (Josh. xii. 18). As this is named with Tappuah and other places in the mountains of Judah, it is very probably the same as the *Aphelah* of Josh. xv. 53.

2. A city, apparently in the extreme north of Asher (Josh. xix. 30), from which the Canaanites were not ejected (Judg. i. 31; though here it is *Aphik*, פִּיכִי). This is probably the same place as the *Ai-hek* (Josh. xiii. 4), on the extreme north

"border of the Amorites," and apparently beyond Sidon, and which is identified by Gesenius (*Thez.* 140 a) with the *Aphaca* of classical times, famous for its temple of Venus, and now *Afka* (Kob. iii. 606; Porter, ii. 295-6). *Afka*, however, lies beyond the ridge of Lebanon, on the north-western slopes of the mountain, and consequently much further up than the other towns of Asher which have been identified. On the other hand it is hardly more to the north of the known limits of the tribe, than Kulesh and other places named as in Judah were to the south; and *Aphak* may, like many other sanctuaries, have had a reputation at a very early date, sufficient in the days of Joshua to cause its mention in company with the other northern sanctuary of Baal-gad.

3. (With the article, אֶפְרַיִם), a place at which the Philistines encamped, while the Israelites pitched in Eben-ezer, before the fatal battle in which the sons of Eli were killed and the ark taken (1 Sam. iv. 1). This would be somewhere to the N.W. of, and at no great distance from, Jerusalem.

4. The scene of another encampment of the Philistines, before an encounter not less disastrous than that just named,—the defeat and death of Saul (1 Sam. xxix. 1). By comparison with ver. 11, it seems as if this *Aphak* were not necessarily near Shunem, though on the road thither from the Philistine district. It is possible that it may be the same place as the preceding; and if so, the Philistines were marching to Jezreel by the present road along the "backbone" of the country.

5. A city on the military road from Syria to Israel (1 K. xx. 26). It was walled (30), and was apparently a common spot for engagements with Syria (2 K. xiii. 17; with the article). The use of the word מְשָׁלָה (A. V. "the plain") in 1 K. xx. 25, fixes the situation of A. to have been in the level down-country east of the Jordan [*MISHOR*]; and there, accordingly, it is now found in *Fik*, at the head of the *Wady Fik*, 6 miles east of the Sea of Galilee, the great road between Damascus, *Abulus*, and Jerusalem, still passing (Niepert's map, 1857), with all the permanence of the East, through the village, which is remarkable for the number of inns that it contains (Burckh. 280). By Josephus (viii. 14, §4) the name is given as Ἀφεκά. Eusebius (*Onom.* Ἀφεκά) says that in his time there was, beyond Jordan, a *κώμη μεγάλη* (Jer. castellum grande) called *Aphaca* by (περί) *Ilippas* (Jer. Hippus); but he apparently confounds it with (1). Hippus was one of the towns which formed the Decapolis. *Fik*, or *Feth*, has been visited by Burckhardt, Seetzen, and others (Hütter, *Pal.* 348-353), and is the only one of the places bearing this name that has been identified with certainty. [G.]

**APH'E'KAIH** (אַפְהַקַּי; פֶּאֶקוּדָה; *Aphcau*), a city of Judah, in the mountains (Josh. xv. 53), probably the same as *APHK* (1).

**APH'E'REMA** (Ἀφαίρεμα; Ἀφαιρεμά, Jos.), one of the three "governments" (νόμους) added to Judaea from Samaria (and Galilee, x. 30) by Demetrius Soter, and confirmed by Nicanor (1 Macc. xi. 34) (see Jos. *Ant.* xiii. 4, §9, and Ireland, 178). The word is omitted in the Vulgate. It is probably the same as Ephraim (Ophrah, *Taiyibeh*).

**APHERRA** (Ἀφερρά; *Ewra*), one of the "servants of Solomon" (1 Esd. v. 34).

ΑΡΗΙΑΗ (אַרְיָה; Ἀφέκ; *Aphīā*), name of one of the forefathers of king Saul (1 Sam. ix. 1).

ΑΡΗΙΚ (אַרְיִיק; *Apheo*), a city of Asher from which the Canaanites were not driven out (Judg. i. 31). Probably the same place as ΑΡΗΙΚ (2).

ΑΡΗΙΡΑΗ, the house of (אֶרְיָה, בֵּית), a place mentioned in Mic. i. 10, and supposed by some (Winer, 172) to be identical with Ophrah. But this can hardly be, inasmuch as all the towns named in the context are in the low country to the west of Judah, while Ophrah would appear to lie E. of Bethel [ΟΙΦΡΑΗ]. The LXX. translate the word ἔξ οἴκου κατὰ γέλωτα. [G.]

ΑΡΗΣΕΣ (אַרְשֵׁס; Ἀρσέ; *Aphses*), chief of the 18th of the 24 courses in the service of the temple (1 Chr. xxiv. 15).

# ΑΠΟΚΑΛΥΨΕ. [REVELATION.]

ΑΠΟΚΡΥΦΑ (Βιβλία Ἀποκρυφα). The collection of Books to which this term is popularly applied includes the following. The order given is that in which they stand in the English version.

- I. 1 Esdras.
- II. 2 Esdras.
- III. Tobit.
- IV. Judith.
- V. The rest of the chapters of the Book of Esther, which are found neither in the Hebrew nor in the Chaldee.
- VI. The Wisdom of Solomon.
- VII. The Wisdom of Jesus the Son of Sirach or Ecclesiasticus.
- VIII. Baruch.
- IX. The Song of the Three Holy Children.
- X. The History of Susanna.
- XI. The History of the destruction of Bel and the Dragon.
- XII. The Prayer of Manasseh, king of Judah.
- XIII. 1 Maccabees.
- XIV. 2 Maccabees.

The separate books of this collection are treated of in distinct Articles. Their relation to the canonical books of the Old Testament is discussed under CANON. In the present article it is proposed to consider:—I. The meaning and history of the word. II. The history and character of the collection as a whole in its relation to Jewish literature.

I. The primary meaning of ἀποκρυφος, "hidden, secret" (in which sense it is used in Hellenistic as well as classical Greek, cf. Ecclus. xxiii. 19; Luko viii. 17; Col. ii. 13), seems, towards the close of the 2nd century, to have been associated with the signification "spurious," and ultimately to have settled down into the latter. Tertullian (*de Anim.* c. 2) and Clement of Alexandria (*Strom.* i. 19, 69, iii. 4, 29) apply it to the forged or spurious books which the heretics of their time circulated as authoritative. The first passage referred to from the *Stromata* however may be taken as an instance of the transition stage of the words. The followers of Prodicus, a Gnostic teacher, are said there to boast that they have βέλους ἀποκρύφους of Zoroaster. In Athanasius (*Ep. Fest.* vol. ii. p. 38; *Synopsis Sc. Scrip.* vol. ii. p. 154, ed. Colon. 1686), Augustine (*c. Faust.* xi. 2, *de Civ. Dei.* xv. 23), Jerome (*Ep. ad Laetam*, and *Prol. Gal.*) the word is used uniformly with the bad meaning which had become attached to it. The writers of that period

however do not seem to have seen clearly how the word had acquired this secondary sense; and hence we find conjectural explanations of its etymology. The remark of Athanasius (*Synops. Sc. Scrip.* l. c.) that such books are ἀποκρυφῆς μάλλον ἢ ἀναγνώσεως ἕξια is probably meant rather as a plea upon the word than as giving its derivation. Augustine is more explicit: "Apocryphæ nuncupantur eo quod earum occulta origo non claruit patribus" (*de Civ. Dei.* l. c.). "Apocryphi non quod habendi sunt in aliqua auctoritate secretâ sed quia nullâ testimonio luce declarati, de nescio quo secreto, nescio quorum præsumptione prolati sunt" (*c. Faust.* l. c.). Later conjectures are (1), that given by the translation of the English Bible (ed. 1539, Pref. to Apocr.), "because they were wont to be read not openly and in common, but as it were in secret and apart;" (2) one, resting on a misapprehension of the meaning of a passage in Epiphanius (*de Mens. ac Pond.* c. 4) that the books in question were so called because, not being in the Jewish canon, they were excluded ἀπὸ τῆς κρυπτῆς from the ark in which the true Scriptures were preserved; (3) that the word ἀποκρυφα answers to the Heb. סִּפְרֵי נִסְתָּרִים, libri absconliti, by which the

Later Jews designated those books which, as of doubtful authority or not tending to edification, were not read publicly in the synagogues; (4) that it originates in the κρυπτὰ or secret books of the Greek mystics. Of these it may be enough to say, that (1) is, as regards some of the books now bearing the name, at variance with fact; that (2), as has been said, rests on a mistake; that (3) wants the support of direct evidence of the use of ἀποκρυφα as the translation for the Hebrew word, and that (4), though it approximates to what is probably the true history of the word, is so far only a conjecture. The data for explaining the transition from the neutral to the bad meaning, are to be found, it is believed, in the quotations already given, and in the facts connected with the books to which the epithet was in the first instance applied. The language of Clement implies that it was not altogether disclaimed by those of whose books he uses it. That of Athanasius is in the tone of a man who is convicting his opponent out of their own mouth. Augustine implicitly admits that a "secretâ auctoritas" had been claimed for the writings to which he ascribes merely an "occulta origo." All these facts harmonise with the belief that the use of the word as applied to special books originated in the claim common to nearly all the sects that participated in the Gnostic character, to a secret esoteric knowledge deposited in books, which were made known only to the initiated. It seems not unlikely that there is a reference in Col. ii. 13, to the pretensions of such teachers. The books of our own Apocrypha bear witness both to the feeling and the way in which it worked. The inspiration of the Pseudo-Esdras (2 Esdr. xiv. 40-47) leads him to dictate 204 books, of which the 70 last are to be "delivered only to such as are wise among the people." Assuming the var. lect. of 94 in the Arabic and Ethiopian versions to be the true reading, this indicates the way in which the secret books, in which was the "spring of understanding, the fountain of wisdom, and the stream of knowledge," were set up as of higher value than the twenty-four books acknowledged by the Jewish canon, which were for "the worthy and unworthy alike." It was almost a matter of course that these secret

books should be pseudonymous, ascribed to the great names in Jewish or heathen history that had become associated with the reputation of a mysterious wisdom. So books in the existing Apocrypha bear the names of Solomon, Daniel, Jeremiah, Ezra. Beyond its limits the creation of spurious documents took a yet bolder range, and the list given by Athanasius (*Syn. S. Script.*) shows at once the variety and extent of the mythical literature which was palmed off upon the unwary as at once secret and sacred.

Those whose faith rested on the teaching of the Christian Church, and who looked to the O. T. Scriptures either in the Hebrew, or the LXX. collection, were not slow to perceive that these productions were destitute of all authority. They applied in scorn what had been used as a title of honour. The secret book (*libri secretiores*. *Orig. Comm. in Matt.* ed. Lomm. iv. p. 237) was rejected as *spurious*. The word Apocryphal was degraded to the position from which it has never since risen. So far as books like the Testament of the Twelve Patriarchs and the Assumption of Moses were concerned, the task of discrimination was comparatively easy, but it became more difficult when the question affected the books which were found in the LXX. translation of the Old Testament, and recognised by the Hellenistic Jews; but were not in the Hebrew text or in the Canon acknowledged by the Jews of Palestine. The history of this difficulty, and of the manner in which it affected the reception of particular books, belongs rather to the subject of CANON than to that of the present article, but the following facts may be stated as bearing on the application of the word. (1.) The teachers of the Greek and Latin Churches accustomed to the use of the Septuagint or versions resting on the same basis, were naturally led to quote freely and reverently from all the books which were incorporated in it. In Clement of Alexandria, Origen, Athanasius, e.g. we find citations from the books of the present Apocrypha, as "Scripture," "divine Scripture," "prophecy." They are very far from applying the term *ἀποκρυφός* to these writings. If they are conscious of the difference between them and the other books of the O. T., it is only so far as to lead them (cf. Athan. *Synops. S. Scr. l. c.*) to place the former in the list of *ὁὐ κανονίζόμενα, ἀντιλεγόμενα*, books which were of more use for the ethical instruction of catechumens than for the edification of mature Christians. Augustine in like manner applies the word "Apocrypha" only to the spurious books with false titles which were in circulation among heretics, admitting the others, though with some qualifications, under the title of Canonical (*de doct. Chr.* ii. 8). (2.) Wherever, on the other hand, any teacher came in contact with the feelings that prevailed among the Christians of Palestine, there the influence of the rigorous limitation of the old Hebrew canon is at once conspicuous. This is seen in its bearing on the history of the Canon in the list given by Melito, bishop of Sardis (Euseb. *H. E.* iv. 26), and obtained by him from Palestine. Of its effects on the application of the word, the writings of Cyril of Jerusalem and Jerome give abundant instances. The former (*Catech.* iv. 33) gives the Canonical list of the

22 books of the O. T. Scriptures, and rejects the introduction of all "apocryphal" writings. The latter in his Epistle to Lucía warns the Christian mother in educating her daughter against "omnia apocrypha." The Prologus Galeatus shows that he did not shrink from including under that title, the books which formed part of the Septuagint, and were held in honour in the Alexandrian and Latin Churches. In dealing with the several books he discusses each on its own merits, admiring some, speaking unhesitatingly of the "dreams," "fables" of others. (3.) The teaching of Jerome influenced, though not decidedly, the language of the Western Church. The old spurious heretical writings, the "Apocrypha" of Tertullian and Clement, fell more and more into the back ground, and were almost utterly forgotten. The doubtful books of the Old Testament were used publicly in the service of the Church, quoted frequently with reverence as Scripture, sometimes however with doubts or limitations as to the authority of individual books according to the knowledge or critical discernment of this or that writer (cf. Bp. Cosins's *Scholastic History of the Canon*). During this period the term by which they were commonly described was not apocryphal but "ecclesiastical." So they had been described by Rufinus (*Expos. in Symb. Apost.* p. 26), who practically recognised the distinction drawn by Jerome, though he would not use the more opprobrious epithet of books which were held in honour: "libri qui non canonici sed Ecclesiastici a majoribus appellati sunt" . . . "quae omnia (the contents of these books) legi quidem in Ecclesiis volebant non tamen proferri ad auctoritatem ex his fidei confirmandam. Caeteras vero scripturas apocryphas nominant quas in Ecclesiis legi noluerunt;" and this offered a *mezzo termine* between the language of Jerome and that of Augustine, and as such found favour. (4.) It was reserved for the age of the Reformation to stamp the word Apocrypha with its present signification. The two views which had hitherto existed together, side by side, concerning which the Church had pronounced no authoritative decision, stood out in sharper contrast. The Council of Trent closed the question which had been left open, and deprived its theologians of the liberty they had hitherto enjoyed—extending the Canon of Scripture so as to include all the hitherto doubtful or deuterocanonical books, with the exception of the two books of Esdras and the Prayer of Manasseh, the evidence against which seemed too strong to be resisted (*Sess. IV. de Can. Script.*). In accordance with this decree, the editions of the Vulgate published by authority contained the books which the Council had pronounced canonical, as standing on the same footing as those which had never been questioned, while the three which had been rejected were printed commonly in smaller type and stood after the New Testament. The Reformers of Germany and England on the other hand, influenced in part by the revival of the study of Hebrew and the consequent recognition of the authority of the Hebrew Canon, and subsequently by the reaction against this stretch of authority, maintained the opinion of Jerome and pushed it to its legitimate results. The principle which had been asserted by Carlstadt dogmatically in his "de Canonicis Scrip-

\* The books enumerated by Athanasius, besides writings falsely ascribed to authors of canonical books, as Zephaniah, Habakkuk, Ezekiel, and Daniel, included others which have the names of Enoch, of the

Patriarchs, of Zerubah the father of the Baptist, the Prayer of Joseph, the testament (*Stabien*) and assumption of Moses, Abraham, Eldad and Modad, and Elijah.

turis libellus" (1520) was acted on by Luther. He spoke of individual books among those in question with a freedom as great as that of Jerome, judging each on its own merits, praising Tobit as a "pleasant comedy," and the Prayer of Manasseh as a "good model for penitents," and rejecting the two books of Esdras as containing worthless fables. The example of collecting the doubtful books in a separate group had been set in the Strasburg edition of the Septuagint, 1526. In Luther's complete edition of the German Bible accordingly (1534) the books (Judith, Wisdom, Tobias, Sirach, 1 and 2 Maccabees, Additions to Esther and Daniel, and the Prayer of Manasseh) were grouped together under the general title of "Apocrypha, i. e. Books which are not of like worth with Holy Scripture, yet are good and useful to be read." In the history of the English Church, Wicliff showed himself in this as in other points the forerunner of the Reformation, and applied the term Apocrypha to all but the "twenty-five" Canonical Books of the Old Testament. The judgement of Jerome was formally asserted in the sixth Article. The disputed books were collected and described in the same way in the printed English Bible of 1539 (Cranmer's), and since then there has been no fluctuation as to the application of the word. The books to which the term is ascribed are in popular speech, not merely apocryphal, but the Apocrypha.

II. Whatever questions may be at issue as to the authority of these books, they have in any case an interest of which no controversy can deprive them as connected with the literature, and therefore with the history, of the Jews. They represent the period of transition and decay which followed on the return from Babylon, when the prophets who were then the teachers of the people had passed away and the age of scribes succeeded. Uncertain as may be the dates of individual books, few, if any, can be thrown further back than the commencement of the 3rd century B.C. The latest, the 2nd Book of Esdras, is probably not later than 30 A.C., 2 Esdr. vii. 28 being a subsequent interpolation. The alterations of the Jewish character, the different phases which Judaism presented in Palestine and Alexandria, the good and the evil which were called forth by contact with idolatry in Egypt, and by the struggle against it in Syria, all these present themselves to the reader of the Apocrypha with greater or less distinctness. In the midst of the diversities which we might naturally expect to find in books written by different authors, in different countries, and at considerable intervals of time, it is possible to discern some characteristics which belong to the collection as a whole, and these may be noticed in the following order.

(1.) The absence of the prophetic element. From first to last the books bear testimony to the assertion of Josephus (c. Ap. i. 8), that the *ἐκπύσεως* διαδόχῳ of Prophets had been broken after the close of the O. T. canon. No one speaks because the word of the Lord had come to him. Sometimes there is a direct confession that the gift of prophecy had departed (1 Macc. ix. 27), or the utterance of a hope that it might one day return (ibid. iv. 46, xiv. 41). Sometimes a teacher asserts in words the perpetuity of the gift (Wisd. vii. 27), and shows in the act of asserting it how different the illumination which he had received was from that bestowed on the Prophets of the Canonical Books. When a writer simulates the prophetic character, he repeats with slight modifications the language of the older

prophets as in Baruch, or makes a mere prediction the text of a dissertation as in the Epistle of Jeremy, or plays arbitrarily with combinations of dreams and symbols, as in 2 Esdras. Strange and perplexing as the last named book is, whatever there is in it of genuine feeling indicates a mind not at ease with itself, distracted with its own sufferings and with the problems of the universe, and it is accordingly very far removed from the utterance of a man who speaks as a messenger from God.

(2.) Connected with this is the almost total disappearance of the power which had shown itself in the poetry of the Old Testament. The Song of the Three Children lays claim to the character of a Psalm, and is probably a translation from some liturgical hymn; but with this exception the form of poetry is altogether absent. So far as the writers have come under the influence of Greek cultivation they catch the taste for rhetorical ornament which characterized the literature of Alexandria. Fictitious speeches become almost indispensable additions to the narrative of an historian, and the story of a martyr is not complete unless (as in the later Acta Martyrum of Christian traditions) the sufferer declaims in set terms against the persecutors. (Song of the Three Child., 3-22; 2 Mac. vi. vii.)

(3.) The appearance, as part of the current literature of the time, of works of fiction, resting or purporting to rest on an historical foundation. It is possible that this development of the national genius may have been in part the result of the Captivity. The Jewish exiles brought with them the reputation of excelling in minstrelsy, and were called on to sing the "songs of Zion" (Ps. cxxxvii). The trial of skill between the three young men in 1 Esdr. iii. iv. implies a traditional belief that those who were promoted to places of honour under the Persian kings were conspicuous for gifts of a somewhat similar character. The transition from this to the practice of story-telling was with the Jews, as afterwards with the Arabs, easy and natural enough. The period of the captivity with its strange adventures, and the remoteness of the scenes connected with it, offered a wide and attractive field to the imagination of such narrators. Sometimes, as in Bel and the Dragon, the motive of such stories would be the love of the marvellous mingling itself with the feeling of scorn with which the Jew looked on the idolater. In other cases, as in Tobit and Susanna, the story would gain popularity from its ethical tendencies. The singular variations in the text of the former book indicate at once the extent of its circulation and the liberties taken by successive editors. In the narrative of Judith, again, there is probably something more than the interest attaching to the history of the past. There is indeed too little evidence of the truth of the narrative for us to look on it as history at all, and it takes its place in the region of historical romance, written with a political motive. Under the guise of the old Assyrian enemies of Israel the writer is covertly attacking the Syrian invaders against whom his countrymen were contending, stirring them up by a story of imagined or traditional heroism to follow the example of Judith as she had followed that of Jael (Ewald, *Gesch. Israels*, vol. iv. p. 541). The development of this form of literature is of course compatible with a high degree of excellence, but it is true of it at all times, and was especially true of the literature of the ancient world, that it belongs rather to its later and feebler period. It is a special sign of decay in ho-

nessy and discernment when such writings are passed off and accepted as belonging to actual history.

(4.) The free exercise of the imagination within the domain of history led to the growth of a purely legendary literature. The full development of this was indeed reserved for a yet later period. The books of the Apocrypha occupy a middle place between those of the Old Testament in their simplicity and truthfulness and the wild extravagances of the Talmud. As it is, however, we find in them the germs of some of the fabulous traditions which were influencing the minds of the Jews at the time of Our Lord's ministry, and have since in some instances incorporated themselves more or less with the popular belief of Christendom. So in 2 Mac. i. ii. we meet with the statements that at the time of the Captivity the priests had concealed the sacred fire, and that it was miraculously renewed—that Jeremiah had gone, accompanied by the tabernacle and the ark, "to the mountain where Moses climbed up to see the heritage of God," and had there concealed them in a cave together with the altar of incense. The apparition of the Prophet at the close of the same book (xv. 15), as giving to Judas Maccabaeus the sword with which, as a "gift from God," he was to "wound the adversaries," shows how prominent a place was occupied by Jeremiah in the traditions and hopes of the people, and prepares us to understand the rumours which followed on our Lord's teaching and working that "Jeremias or one of the prophets" had appeared again (Matt. xvi. 14). So again in 2 Esdr. xiii. 40-47 we find the legend of the entire disappearance of the Ten Tribes which, in spite of direct and indirect testimony on the other side, has given occasion even in our own time to so many wild conjectures. In ch. xiv. of the same book we recognise (as has been pointed out already) the tendency to set a higher value on books of an esoteric knowledge than on those in the Hebrew Canon; but it deserves notice that this is also another form of the tradition that Ezra dictated from a supernaturally-inspired memory the Sacred Books which, according to that tradition, had been lost, and that both fables are exaggerations of the part actually taken by him and by "the men of the Great Synagogue" in the work of collecting and arranging them. So also the rhetorical narrative of the Exodus in Wisd. xvi.-xix. indicates the existence of a traditional, half-legendary history side by side with the canonical. It would seem, indeed, as if the life of Moses had appeared with many different embellishments. The form in which that life appears in Josephus; the facts mentioned in St. Stephen's speech and not found in the Pentateuch, the allusions to Jannes and Jambres (2 Tim. iii. 8), to the disputes between Michael and the devil (Jude 9), to the "rock that followed" the Israelites (1 Cor. x. 4), all bear testimony to the wide-spread popularity of this semi-apocryphal history.

(5.) As the most marked characteristic of the collection as a whole and of the period to which it belongs, there is the tendency to pass off supposititious books under the cover of illustrious names. The books of Esdras, the additions to Daniel, the letters of Baruch and Jeremiah, and the Wisdom of Solomon, are obviously of this character. It is difficult perhaps for us to measure in each instance the degree in which the writers of such books were guilty of actual frauds. In a book like the Wisdom of Solomon, for example, the form may have been adopted as a means of gaining attention

by which no one was likely to be deceived, and, as such, it does not go beyond the limits of legitimate personation. The fiction in this case need not diminish our admiration and reverence for the book any more than it would destroy the authority of Ecclesiastes were we to come to the conclusion from internal or other evidence that it belonged to a later age than that of Solomon. The habit, however, of writing books under fictitious names is, as the later Jewish history shows, a very dangerous one. The practice becomes almost a trade. Each such work creates a new demand, to be met in its turn by a fresh supply, and thus the prevalence of an Apocryphal literature becomes a sure sign of want of truthfulness on one side, and want of discernment on the other.

(6.) The absence of honesty and of the power to distinguish truth from falsehood, shows itself in a yet more serious form in the insertion of formal documents purporting to be authentic, but in reality failing altogether to establish any claim to that title. This is obviously the case with the decree of Artaxerxes in Esth. xvi. The letters with which 2 Mac. opens from the Jews at Jerusalem betray their true character by their historical inaccuracy. We can hardly accept as genuine the letter in which the king of the Lacedaemonians (1 Mac. xii. 20, 21) writes to Onias that "the Lacedaemonians and Jews are brethren, and that they are of the stock of Abraham." The letters in 2 Mac. ix. and xi., on the other hand, might be authentic so far as their contents go, but the recklessness with which such documents are inserted as embellishments and make-weights throws doubt in a greater or less degree on all of them.

(7.) The loss of the simplicity and accuracy which characterise the history of the O. T. is shown also in the errors and anachronisms in which these books abound. Thus, to take a few of the most striking instances, Haman is made a Macedonian, and the purpose of his plot is to transfer the kingdom from the Persians to the Macedonians (Esth. xvi. 10); two contradictory statements are given in the same book of the death of Antiochus Epiphanes (2 Mac. i. 15-17, ix. 5-29); Nabuchodonosor is made to dwell at Nineve as the king of the Assyrians (Judith i. 1).

(8.) In their relation to the religious and ethical development of Judaism during the period which these books embrace, we find (1.) the influences of the struggle against idolatry under Antiochus, as shown partly in the revival of the old heroic spirit, and in the record of the deeds which it called forth, as in Maccabees, partly again in the tendency of a narrative like Judith, and the protests against idol-worship in Baruch and Wisdom. (2.) The growing hostility of the Jews towards the Samaritans is shown by the Confession of the Son of Sirach (Ecclus. i. 25, 26). (3.) The teaching of Tobit illustrates the prominence then and afterwards assigned to almsgiving among the duties of a holy life (Tob. iv. 7-11, xii. 9). The classification of the three elements of such a life, prayer, fasting, alms, in xii. 8, illustrates the traditional ethical teaching of the Scribes which was at once recognized and purified from the errors that had been connected with it in the Sermon on the Mount (Matt. vi. 1-18). (4.) The same book indicates also the growing belief in the individual guardianship of angels and the germs of a grotesque demonology, resting in part on the more mysterious phenomena of man's spiritual nature, like the cases of demoniac possession in the Gospels,

but associating itself only too easily with all the frauds and superstitions of vagabond exorcists. (5.) The great Alexandrian book of the collection, the Wisdom of Solomon, breathes, as we might expect, a strain of higher mood; and though there is absolutely no ground for the patristic tradition that it was written by Philo, the conjecture that it might have been was not without a plausibility which might well commend itself to men like Basil and Jerome. The personification of Wisdom as "the unspotted mirror of the power of God and the image of his goodness" (vii. 26) as the universal teacher of all "holy souls" in "all ages" (vii. 27), as guiding and ruling God's people, approaches the teaching of Philo and foreshadows that of St. John as to the manifestation of the Unseen God through the medium of the Logos and the office of that divine Word as the light that lighteth every man. In relation again to the symbolic character of the Temple as "a resemblance of the holy tabernacle" which God "has prepared from the beginning" (ix. 8), the language of this book connects itself at once with that of Philo and with the teaching of St. Paul or Apollos in the Epistle to the Hebrews. But that which is the great characteristic of the book, as of the school from which it emanated, is the writer's apprehension of God's kingdom and the blessings connected with it as eternal, and so, as independent of men's conceptions of time. Thus chs. i. ii. contain the strong protest of a righteous man against the materialism which then in the form of a sensual selfishness, as afterwards in the developed system of the Sadducees, was corrupting the old faith of Israel. Against this he asserts that the "souls of the righteous are in the hands of God" (iii. 1); that the blessings which the popular belief connected with length of days were not to be measured by the duration of years, seeing that "wisdom is the gray hair unto men, and an unspotted life is old age." (6.) In regard to another truth also this book was in advance of the popular belief of the Jews of Palestine. In the midst of its strong protests against idolatry, there is the fullest recognition of God's universal love (xi. 23-26), of the truth that His power is but the instrument of His righteousness (xii. 16), of the difference between those who are the "less to be blamed" as "seeking God and desirous to find Him" (xiii. 6), and the victims of a darker and more debasing idolatry. Here also the unknown writer of the Wisdom of Solomon seems to prepare the way for the higher and wider teaching of the New Testament.

It does not fall within the scope of the present article to speak of the controversies which have arisen within the Church of England, or in Lutheran or Reformed communities abroad, in connexion with the authority and use of these Books. Those disputes raise questions of a very grave interest to the student of Ecclesiastical History. What has been aimed at here is to supply the Biblical student with data which will prepare him to judge fairly and impartially. [E. H. F.]

**APOLLONIA** (*Ἀπολλωνία*), a city of Macedonia, through which Paul and Silas passed in their way from Philippi and Amphipolis to Thessalonica (Acts xvii. 1). It was in the district of Mygdonia (Plin. iv. 10. s. 17), and according to the *Antonine Itinerary* was distant 30 Roman miles from Amphipolis and 37 Roman miles from Thessalonica. This city must not be confounded with the more celebrated Apollonia in Illyria.

**APOLLONIUS** (*Ἀπολλώνιος*) the son of

Thrasaeus governor of Coele-Syria and Phoenice, under **SKLEUCUS IV.** **PHILOPATOR**, B.C. 187 ft., a bitter enemy of the Jews (2 Macc. iv. 4), who urged the king, at the instigation of Simon the commander (*στρατηγός*) of the temple, to plunder the temple at Jerusalem (2 Macc. iii. 5 ft.). The writer of the Declaration on the Macabees, printed among the works of Josephus, relates of Apollonius the circumstances which are commonly referred to his emissary Heliodorus (*De Macc.* 4; cf. 2 Macc. iii. 7 ft.).

2. An officer of Antiochus Epiphanes, governor of Samaria (Joseph. *Ant.* xii. 5, 5; 7, 1), who led out a large force against Judas Maccabaeus, but was defeated and slain B.C. 166 (1 Macc. iii. 10-12; Joseph. *Ant.* xii. 71). He is probably the same person who was chief commissioner of the revenue of Judaea (*ἄρχων φορολογίας*, 1 Macc. i. 29; cf. 2 Macc. v. 24), who spoiled Jerusalem, taking advantage of the Sabbath (2 Macc. v. 24-26), and occupied a fortified position there (B.C. 168) (1 Macc. i. 30 ft.).

3. The son of Menestheus (possibly identical with the former), an envoy commissioned (B.C. 173) by Antiochus Epiphanes to congratulate Ptolemaeus Philometor on his being enthroned (2 Macc. iv. 21). An ambassador of the same name was at the head of the embassy which Antiochus sent to Rome (Liv. xlii. 6).

4. The son of Gennaens (*δ τοῦ Γενναίου*, it seems impossible that this can be *des ceden Apoll. Soin*, Luth.), a Syrian general under Antiochus V. Eupator c. B.C. 163 (2 Macc. xii. 2).

5. **THE DATAN** (*Ἄδος*, Joseph. *Ant.* xiii. 4, § 3, i. e. one of the Dabae or Dani, a people of Segdiana), a governor of Coele-Syria (*ὄν ὄντα ἐπὶ κ. ζ.* 1 Macc. x. 69) under Alexander Balas, who embraced the cause of his rival Demetrius Nicator, and was appointed by him to a chief command (1 Macc. i. c. *κατέστησε*, Vulg. *constituit ducem*). If he were the same as the Apollonius whom Polybius mentions as foster-brother and confidant of Demetrius I. (probably a son of (3) *δυνὸν ὑπαρχόντων ἀδελφῶν, Μελεάγρον καὶ Μενεσθέως*, Polyb. xxii. 21, § 2), his conduct is easily intelligible. Apollonius raised a large force and attacked Jonathan, the ally of Alexander, but was entirely defeated by him (B.C. 147) near Azotus (1 Macc. x. 70 ft.). Josephus (*Ant.* xiii. 4, § 3 f.) represents Apollonius as the general of Alexander at the time of his defeat; but this statement, though it has found advocates (Weizsäcker, *de fide libr. Macc.* p. 135, yet doubtfully), appears to be untenable on internal grounds. Cf. Grimm, 1 Macc. x. 69. [B. F. W.]

**APOLLOPHANES** (*Ἀπολλοφάνης*; *Apollophanes*), a Syrian, killed by Judas Maccabaeus (1 Macc. ii. 5).

**APOLLOS** (*Ἀπολλῶς*, i. e. *Ἀπολλώνιος*, as the Codex Bezae actually gives it, or perhaps *Ἀπολλῶδωρος*), a Jew from Alexandria, eloquent (*λόγιος*, which may also mean *learned*), and mighty in the Scriptures: one instructed in the way of the Lord (Christ) according to the imperfect view of the disciples of John the Baptist (Acts xviii. 25), but on his coming to Ephesus during a temporary absence of St. Paul, A.D. 54, more perfectly taught by Aquila and Priscilla. After this he became a preacher of the gospel, first in Achaia, and then in Corinth (Acts xviii. 27, xix. 1), where he waited that which Paul had planted (1 Cor. iii. 9). When the apostle wrote his first Epistle to the Corinthians, Apollos was with or near him (1 Cor. xvi. 12),

probably at Ephesus in A.D. 57: we hear of him then that he was unwilling at that time to journey to Corinth, but would do so when he should have convenient time. He is mentioned but once more in the N. T., in Tit. iii. 13, where Titus is desired to "bring Zenas the lawyer and Apollos on their way diligently, that nothing may be wanting to them." After this nothing is known of him. Tradition makes him bishop of Caesarea (*Menology. Graec.* ii. b. 17). The exact part which Apollos took in the missionary work of the apostolic age can never be ascertained: and much fruitless conjecture has been spent on the subject. After the entire amity between St. Paul and him which appears in the first Epistle to the Corinthians, it is hardly possible to imagine any important difference in the doctrines which they taught. Certainly we cannot accede to the hypothesis that the *σοφία* against which the apostle so often warns the Corinthians, was a characteristic of the teaching of Apollos. Thus much may safely be granted, that there may have been difference enough in the outward character and expression of the two to attract the lover of eloquence and philosophy rather to Apollos, somewhat perhaps to the disuagement of St. Paul.

Much ingenuity has been spent in Germany in defining the four parties in the church at Corinth, supposed to be indicated 1 Cor. i. 12: and the Apollos party has been variously characterised: see Neander, *Pflanz. u. Leitung*, p. 378 ff. 4th ed.; Conybeare and Howson, *Life and Epistles of St. Paul*, vol. i., p. 526; vol. ii. pp. 6-11, 2nd. ed. Winer refers to Pfizer, *Diss. de Apollone doctore apostol.*, Altorf, 1718: Hopf, *Comm. de Apollone pseudo doctore*, Hag. 1782: and especially to Heymann, in the Saxon *Exegetische Studien*, ii. 213 ff.

[H. A.]

### APOLL'YON. [ΑΣΜΟΔΕΥΣ.]

**APOSTLE** (*ἀπόστολος*, one sent forth), the official name, in the N. T., originally of those Twelve of the disciples whom Jesus chose, to send forth first to preach the gospel, and to be with Him during the course of his ministry on earth. Afterwards it was extended to others who, though not of the number of the Twelve, yet were equal with them in office and dignity. The word also appears to have been used in a non-official sense to designate a much wider circle of Christian messengers and teachers (see 2 Cor. viii. 23; Phil. ii. 25). It is only of those who were officially designated apostles that we treat in this article.

The original qualification of an apostle, as stated by St. Peter, on occasion of electing a successor to the traitor Judas, was, that he should have been personally acquainted with the whole ministerial course of our Lord, from the baptism of John till the day when He was taken up into heaven. He himself describes them as "they that had continued with Him in his temptations" (Luke xxii. 28). By this close personal intercourse with Him, they were peculiarly fitted to give testimony to the facts of redemption: and we gather, from his own words in John xiv. 28, xv. 26, 27, xvi. 13, that an especial bestowal of the Spirit's influence was granted them, by which their memories were quickened, and their power of reproducing that which they had heard from Him increased above the ordinary measure of man. The apostles were from the lower ranks of life, simple and uneducated; some of them were related to Jesus according to the flesh: some had previously been disciples of John

### APOSTLE

the Baptist. Our Lord chose them early in his public career, though it is uncertain precisely at what time. Some of them had certainly partly attached themselves to Him before; but after their call as apostles, they appear to have been continuously with Him, or in his service. They seem to have been all on an equality, both during and after the ministry of Christ on earth. We find one indeed, St. Peter, from fervour of personal character, usually prominent among them, and distinguished by having the first place assigned him in founding the Jewish and Gentile churches [PETER]; but we never find the slightest trace in Scripture of any superiority or primacy being in consequence accorded to him. We also find that he and two others, James and John, the sons of Zebedee, are admitted to the inner privacy of our Lord's acts and sufferings on several occasions (Mark v. 37; Matt. xvii. 1 ff., xxvii. 37); but this is no proof of superiority in rank or office. Early in our Lord's ministry, He sent them out two and two to preach repentance, and perform miracles in his name (Matt. x.; Luke ix.). This their mission was of the nature of a solemn call to the children of Israel, to whom it was confined (Matt. x. 5, 6). There is however in his charge to the apostles on this occasion, not a word of their proclaiming his own mission as the Messiah of the Jewish people: their preaching was at this time strictly of a preparatory kind, resembling that of John the Baptist, the Lord's forerunner.

The Apostles were early warned by their Master of the solemn nature and the danger of their calling (Matt. x. 17), but were not entrusted with any esoteric doctrines, of which indeed his teaching, being eminently and entirely practical, did not admit. They accompanied Him in his journeys of teaching and to the Jewish feasts, saw his wonderful works, heard his discourses addressed to the people (Matt. v. 1 ff., xxiii. 1 ff.; Luke iv. 13 ff.) or those which he held with learned Jews (Matt. xix. 13 ff.; Luke x. 25 ff.), made inquiries of Him on religious matters, sometimes concerning his own sayings, sometimes of a general nature (Matt. viii. 10 ff., xv. 15 ff., xviii. 1 ff.; Luke viii. 9 ff., xii. 41, xvii. 5; John ix. 2 ff., xiv. 5, 22 al.): sometimes they worked miracles (Mark vi. 13; Luke ix. 6), sometimes attempted to do so without success (Matt. xvii. 16). They recognised their Master as the Christ of God (Matt. xvi. 16; Luke ix. 20), and ascribed to Him supernatural power (Luke ix. 54), but in the recognition of the spiritual teaching and mission of Christ, they made very slow progress, held back as they were by weakness of apprehension and by natural prejudices (Matt. xv. 16, xvi. 22, xvii. 20 f.; Luke ix. 54, xxiv. 25; John xvi. 12): they were compelled to ask of Him the explanation of even his simplest parables (Mark viii. 14 ff.; Luke xii. 41 ff.), and openly confessed their weakness of faith (Luke xvii. 5). Even at the removal of our Lord from the earth they were yet weak in their knowledge (Luke xxiv. 21; John xvi. 12), though He had for so long been carefully preparing and instructing them. And when that happened of which He had so often forewarned them,—his apprehension by the chief priests and Pharisees,—they all forsook Him and fled (Matt. xxvi. 56, &c.). They left his burial to one who was not of their number and to the women, and were only convinced of his resurrection on the very plainest proofs furnished by Himself. It was first when this fact became undeniable that light seems to have

entered their minds, and not even then without his own special aid, opening their understandings that they might understand the Scriptures. Even after that, many of them returned to their common occupations (John xxi. 3 ff.), and it required a new direction from the Lord to recall them to their mission and re-unite them in Jerusalem (Acts i. 4). Before the descent of the Holy Spirit on the Church, Peter, at least, seems to have been specially inspired by Him to declare the prophetic sense of Scripture respecting the traitor Judas, and direct his place to be filled up. On the Feast of Pentecost, ten days after our Lord's ascension, the Holy Spirit came down on the assembled church (Acts ii. 1 ff.); and from that time the Apostles became altogether different men, giving witness with power of the life and death and resurrection of Jesus as he had declared they should (Luke xxiv. 48; Acts i. 8. 22, ii. 32, iii. 15, v. 32, xiii. 31). First of all the mother-church at Jerusalem grew up under their hands (Acts iii.-vii.), and their superior dignity and power were universally acknowledged by the rulers and the people (Acts v. 12 ff.). Even the persecution which arose about Stephen, and put the first check on the spread of the Gospel in Judaea, does not seem to have brought peril to the Apostles (Acts viii. 1). Their first mission out of Jerusalem was to Samaria (Acts viii. 5 ff. 14), where the Lord himself had, during his ministry, sown the seed of the Gospel. Here ends, properly speaking (or rather perhaps with the general visitation hinted at in Acts ix. 32), the first period of the Apostles' agency, during which its centre is Jerusalem, and the prominent figure is that of St. Peter. Agreeably to the promise of our Lord to him (Matt. xvi. 18), which we conceive it impossible to understand otherwise than in a personal sense, he among the twelve foundations (Rev. xvi. 14) was the stone on whom the Church was first built; and it was his privilege first to open the doors of the kingdom of heaven to Jews (Acts ii. 14, 42) and to Gentiles (Acts x. 11). The centre of the second period of the apostolic agency is Antioch, where a church soon was built up, consisting of Jews and Gentiles; and the central figure of this and of the subsequent period is St. Paul, a convert not originally belonging to the number of the Twelve, but wonderfully prepared and miraculously won for the high office [PAUL]. This period, whose history (all that we know of it) is related in Acts xi. 19-30, xiii. 1-5, was marked by the united working of Paul and the other apostles, in the co-operation and intercourse of the two churches of Antioch and Jerusalem. From this time the third apostolic period opens, marked by the almost entire disappearance of the Twelve from the sacred narrative, and the exclusive agency of St. Paul, the great apostle of the Gentiles. The whole of the remaining narrative of the Acts is occupied with his missionary journeys; and when we leave him at Rome, all the Gentile churches from Jerusalem round about unto Illyricum owe to him their foundation, and look to him for supervision. Of the missionary agency of the rest of the Twelve, we know absolutely nothing from the sacred narrative. Some notices we have of their personal history, which will be found under their respective names, together with the principal legends, trustworthy or untrustworthy, which have come down to us respecting them. See PETER, JAMES, JOHN especially. As regards the *apostolic office*, it seems to have been pre-eminently that of founding the churches, and upholding them by

supernatural power specially bestowed for that purpose. It ceased, as a matter of course, with its first holders: all continuation of it, from the very conditions of its existence (cf. 1 Cor. ix. 1), being impossible. The *ἐπισκοπος* of the ancient churches co-existed with, and did not in any sense succeed, the Apostles; and when it is claimed for bishops or any church officers that they are their successors, it can be understood only chronologically, and not officially.

The work which contains the fullest account of the agency of the Apostles within the limits of the N. T. history is Neander's treatise, *Gesch. der Pflanzung und Leitung der christlichen Kirche durch die Apostel*, 4th edition, Hamburg, 1847. More ample, but far less interesting, notices may be found in Cave's *Antiq. Apost.*, or *History of the Apostles*, Lond. 1677.

[H. A.]

**APPAIM** (Ἀπῆν; Ἀπφαῖν; *Apphain*), name of a man (1 Chr. ii. 30, 31).

**APPEAL**. The principle of appeal was recognized by the Mosaic law in the establishment of a central court under the presidency of the judge or ruler for the time being, before which all cases too difficult for the local courts were to be tried (Deut. xvii. 8-9). Wiener, indeed, infers from Josephus (*Ant.* iv. 8, § 14, ἀναμετρώσαν, sc. οἱ δικασταί) that this was not a proper court of appeal, the local judges and not the litigants being, according to the above language, the appellants: but these words, taken in connexion with a former passage in the same chapter (ἐφ' ἧς . . . τινὰ ἀλλίαν προφέρει) may be regarded simply in the light of a general direction. According to the above regulation, the appeal lay in the time of the Judges to the judge (1 Judg. iv. 5), and under the monarchy to the king, who appears to have deputed certain persons to inquire into the facts of the case, and record his decision thereon (2 Sam. xv. 3). Jehoshaphat delegated his judicial authority to a court permanently established for the purpose (2 Chr. xix. 8). These courts were re-established by Ezra (Ezr. vii. 25). After the institution of the Sanhedrim the final appeal lay to them, and the various stages through which a case might pass are thus described by the Talmudists—from the local consistory before which the cause was first tried, to the consistory that sat in the neighbouring town: thence to the courts at Jerusalem, commencing in the court of the 23 that sat in the gate of Shushan, proceeding to the court that sat in the gate of Nicanor, and concluding with the great council of the Sanhedrim that sat in the room Gazith (Carpzov. *Appar.* p. 571).

A Roman citizen under the republic had the right of appealing in criminal cases from the decision of a magistrate to the people; and as the emperor succeeded to the power of the people, there was an appeal to him in the last resort. (See *Dict. of Ant. art.* APPELLATIO.)

St. Paul, as a Roman citizen, exercised a right of appeal from the jurisdiction of the local court at Jerusalem to the Emperor (Acts xxv. 11).<sup>\*</sup> But as no decision had been given, there could be no appeal, properly speaking, in his case: the language used (Acts xxv. 9) implies the right on the part of the accused of electing either to be tried by the provincial magistrate, or by the Emperor. Since the procedure in the Jewish courts at that period was of a mixed and undefined character, the Roman and the Jewish authorities co-existing and carrying on the course of justice between them, Paul availed

himself of his undoubted privilege to be tried by the pure Roman law. [W. L. B.]

**APP'PHIA** (**Ἀπφία**, a Greek form of the Latin *Appia*, written **Ἀππία** Acts xxviii. 15), a Christian woman addressed jointly with Philemon and Archippus in Philem. 1, apparently a member of the former's household, seeing that the letter is on a family matter, and that the church that is in her house is mentioned next to these two, and not improbably his wife (Chrys., Theodoret). Nothing more is said or known of her. [H. A.]

**APP'PHUS** (**Ἀπφῆς**; *Apphus*), surname of Jonathan Maccabæus (1 Macc. ii. 5).

**APP'II FOR'UM** (**Ἀππίου φόρον**, Acts xxviii. 15) was a very well known station (as we learn from Hor. *Sat.* i. 5, and Cic. *ad Alt.* ii. 10) on the Appian Way, the great road which led from Rome to the neighbourhood of the Bay of Naples. St. Paul, having landed at Puteoli (ver. 13) on his arrival from Malta, proceeded under the charge of the centurion along the Appian Way towards Rome, and found at Appii Forum a group of Christians, who had gone to meet him. The position of this place is fixed by the ancient Itineraries at 43 miles from Rome (*Itin. Ant.* p. 107; *Itin. Hier.* p. 611). The Jerusalem Itinerary calls it a *mutatio*. Horace describes it as full of taverns and boatmen. This arose from the circumstance that it was at the northern end of a canal which ran parallel with the road, through a considerable part of the Pomptine Marshes. There is no difficulty in identifying the site with some ruins near *Tre Ponti*; and in fact the 43rd milestone is preserved there. The name is probably due to Appius Claudius, who first constructed this part of the road: and from a passage in Suetonius, it would appear that it was connected in some way with his family, even in the time of St. Paul. [THREE TAVERNS.] [J. S. H.]

**APPLE, APPLE-TREE** (**ἄπφῃ**), *Tappuah*. The passages in which this fruit is mentioned are Cant. vii. 8; Prov. xxv. 11, and the same word is used for the tree in Joel i. 12; Cant. ii. 3, 5, viii. 5. The derivation is from **פפף**, *plavit, spiravit*, and implies a fragrance belonging to the fruit as noticed in Cant. vii. 8. The cultivation of these trees probably gave its name to Beth-Tappuah of the mountains of Judah (see Josh. xv. 34, 53; xii. 17), the modern Teflah (Arab. **تنفوح**), where Robinson noticed olive-yards and vineyards, with marks of industry and thrift on every side. "Many of the former terraces," he says, "along the hill-sides are still in use, and the land looks somewhat as it may have done in ancient times" (Robins. ii. 71). Unfortunately he makes no mention of any fruit which might be identified with the **ἄπφῃ** of Scripture.

Referring to the passages above quoted we may gather that the fruit was golden-coloured, fragrant, and sweet, and that the tree was shady and beautiful. "As the apple-tree among the trees of the wood, so is my beloved among the sons."

In all the passages the rendering of the LXX. is **μήλον**. Vulg. *malum*.

It is said that the apple is a fruit little known in Palestine, and that this rendering of **ἄπφῃ** is not consistent with the excellence ascribed both to the fruit and tree by Scripture. Bishop Patrick sup-

poses the word to signify all fruits that breathe a fragrant odour, such as oranges, peaches, citrons, pomegranates, &c.; i. e. he holds the name **ἄπφῃ**

to be generic, not specific. Celsius (*Hierobot.* t. i. v. 255) has laboured to identify this fruit with the *malu Cydonia*, or quinces (see also Ray, *Hist. of Plants*, v. ii. c. iii. p. 1453); but the most general opinion is that the citron-tree (*Citrus medica*) is the **ἄπφῃ**. In the character both of its foliage

and its fruit, it satisfies all the above-quoted passages of Scripture, and it flourishes in Western Asia in company with the orange and the lemon. It is a large and beautiful tree, it is always green, it is very fragrant, gives a deep and refreshing shade, and is laden with golden coloured fruit. In Cant. i. 5, the rendering of the A. V., "*Comfort me with apples*" should be rather "*strew me a couch of citron leaves*," in accordance with the Greek of the LXX., **στοιβάζατέ με ἐν μήλοις**. [W. D.]

**AQ'UILA** (**Ἀκύλας**: Wolf, *Curas*, on Acts xviii. 2, believes it to have been Græcised from the Latin *Aquila*, not to have any Hebrew origin, and to have been adopted as a Latin name, as *Paulus* by *Saul*), a Jew whom St. Paul found at Corinth on his arrival from Athens (Acts xviii. 2). He is there described as **Ποντικὸς τῷ γένει**, from the connexion of which description with the fact that we find more than one Pontius Aquila in the Pontian gens at Rome in the days of the Republic (see Cic. *ad Fam.* x. 33; Suet. *Cæs.* 78; *Dict. of Biogr.* art. *AQUILA* and *PONTIUS*), it has been imagined that he may have been a freedman of a Pontius Aquila, and that his being a Pontian by birth may have been merely an inference from his name. But besides that this is a point on which St. Luke could hardly be ignorant, Aquila, the translator of the O. T. into Greek, was also a native of Pontus. At the time when St. Paul met with Aquila at Corinth, he had fled, with his wife Priscilla, from Rome, in consequence of an order of Claudius commanding all Jews to leave Rome (Suet. *Claud.* 25—"Judeos impulsore Chresto assidue tumultuantes Roma expulit:" see *CLAUDIUS*). He became acquainted with St. Paul, and they abode together, and wrought at their common trade of making the Cilician tent or hair-cloth [PAUL]. On the departure of the Apostle from Corinth, a year and six months after, Priscilla and Aquila accompanied him to Ephesus on his way to Syria. There they remained; and when Apollos came to Ephesus, knowing only the baptism of John, they took him and taught him the way of the Lord more perfectly. At what time they became Christians is uncertain: had Aquila been converted before his first meeting with St. Paul, the word **μαθητής** would hardly have been omitted (see against this view Neander, *Pf. u. Leit.* p. 333 f., and for it Herzog *Encycl.* s.v.). At the time of writing 1 Cor., Aquila and his wife were still in Ephesus (1 Cor. xvi. 19); but in Rom. xvi. 3 ff., we find them again at Rome, and their house a place of assembly for the Christians. They are there described as having endangered their lives for that of the Apostle. In 2 Tim. iv. 19, they are saluted as being with Timotheus, probably at Ephesus. In both these latter places the form *Prisca* and not *Priscilla* is used.

Nothing further is known of either of them. The Menolog. Græcorum gives only a vague tradition that they were beheaded; and the Martyrol. Rom. celebrates both on July 8. [H. A.]

## AR (עַר) and AR OF MOAB (עַר מוֹאָב),

Sam. Vers. אֶרֶץ; "Ar; Ar), one of the chief places of Moab (Is. xv. 1; Num. xxi. 28).<sup>b</sup> From the Onomasticon (*Moab*), and from Jerome's Com. on Is. xv. 1, it appears that in that day the place was known as Areopolis<sup>c</sup> and Rabbath-Moab, "*id est, grandis Moab*" (Reland, 577; Rob. ii. 166, note).<sup>d</sup> The site is still called *Rabba*; it lies about half-way between *Kerek* and the *Wady Mojeb*, 10 or 11 miles from each, the Roman road passing through it. The remains are not so important as might be imagined (Irby, 140; Burckh. 377; De Saulcy, ii. 44-46, and Map 8).

In the books of Moses Ar appears to be used as a representative name for the whole nation of Moab; see Deut. ii. 9, 18, 29; and also Num. xxi. 15, where it is coupled with a word rarely if ever used in the same manner, שְׁבַת, "*the dwelling of Ar*." In Num. xxi. 36 the almost identical words עִיר אֶרֶץ are rendered "a city of Moab," following the Sam. Vers., the LXX., and Vulgate. [G.]

A'RA (אַרָא; 'Apá; *Ara*), name of a man (1 Chr. vii. 38).

A'RAH (אַרָה; Αῖρέμ; Alex., 'Epéβ; *Arab*), a city of Judah in the mountainous district, probably in the neighbourhood of Hebron. It is mentioned only in Josh. xv. 52, and has not yet been identified. [ARBITER.]

ARABAH (עֲרָבָה; Ἀραβα; *Campestris, planities*), Josh. xviii. 18. Although this word appears in the Auth. Vers. in its original shape only in the verse above quoted, yet in the Hebrew text it is of frequent occurrence.

1. If the derivation of Gesenius (*Thes.* 1066) is to be accepted, the fundamental meaning of the term is "burnt up" or "waste," and thence "sterile," and in accordance with this idea it is employed in various poetical parts of Scripture to designate gene-

rally a barren, uninhabitable district,—"a desolation, a dry land, and a desert, a land wherein no man dwelleth, neither doth any son of man pass thereby" (Jer. li. 43; see a striking remark in Martineau, 395; and amongst other passages, Job xiv. 5, xxxix. 6; Is. xxxiii. 9, xxxv. 1).

2. But within this general signification it is plain, from even a casual examination of the topographical records in the earlier books of the Bible, that the word has also a more special and local force. In these cases it is found with the definite article (הָעֲרָבָה, *ha-Arabah*), "*the Arabah*," and is also so mentioned as clearly to refer to some spot or district familiar to the then inhabitants of Palestine. This district—although nowhere expressly so defined in the Bible, and although the peculiar force of the word "*Arabah*" appears to have been disregarded by even the earliest commentators and interpreters of the Sacred Books—has within our own times been identified with the deep-sunken valley or trench which forms the most striking among the many striking natural features of Palestine, and which extends with great uniformity of formation from the slopes of Hermon to the Euxine Gulf of the Red Sea; the most remarkable depression known to exist on the surface of the globe (Humboldt, *Cosmos*, i. 150, ed. Bohn; see also 301). Through the northern portion of this extraordinary fissure the Jordan rushes through the lakes of Huleh and Genesareth down its tortuous course to the deep chasm of the Dead Sea. This portion, about 150 miles in length, is known amongst the Arabs by the

name of el-Ghor (الغور), an appellation which it has borne certainly since the days of Abulfeda.<sup>f</sup> The southern boundary of the Ghor has been fixed by Robinson to be the wall of cliffs which crosses the valley about 10 miles south of the Dead Sea. Down to the foot of these cliffs the Ghor extends; from their summits, southward to the Gulf of Akabah, the valley changes its name, or, it would

<sup>a</sup> According to Gesenius (*Jesaja*, 515), an old, probably Moubite, form of the word עַר, a "city."

<sup>b</sup> Samaritan Codex and Version, "as far as Moab," reading עַר for עַר; and so also LXX. εως Μ.

<sup>c</sup> We have Jerome's testimony that Arcopolis was believed to be quasi 'Apos πόλις, "the city of Arcs" (Mars). This is a good instance of the tendency which is noticed by Trench (*English Past and Present*, 218, 220) as existing in language to tamper with the derivations of words. He gives another example of it in "Hierosolyma," quasi ἱερός, "holy."

<sup>d</sup> Ritter (*Syrien*, 1212, 13) tries hard to make out that Arcopolis and Ar-Moab were not identical, and that the latter was the "city in the midst of the wady" [ΑΒΟΡ]; but he fails to establish his point.

<sup>e</sup> The early commentators and translators seem to have overlooked or neglected the fact, that the Jordan valley and its continuation south of the Dead Sea had a special name attached to them, and to them only. By Josephus the Jordan valley is always called the περὶ νεβόιν; but he applies the same name to the plain of Kedraclon. Jerome, in the *Onomasticon*, states the name by which it was then known was *Aulon*, αὐλὼν (*i. e.* channel); but he preserves no such distinction in the Vulgate, and renders Arabah by *planities, solitudo, campestris, desertum*, by one or all of which he translates indiscriminately Mishor, Bekaa, Midbar, Shefelá, Jeshimon, equally unmindful of the special force attaching to several of these

words. Even the accurate Aquila has failed in this, and uses his favourite ἡ ὁμαλή indiscriminately. The Talmud, if we may trust the single reference given by Reland (365), mentions the Jordan valley under the name Bekaah, a word at that time of no special import. The Samaritan Version and the Targums apparently confound all words for valley, plain, or low country, under the one term Mishor, which was originally confined strictly to the high smooth downs east of Jordan on the upper level [Mishor].

In the LXX. we frequently find the words Ἀραβὰ and Ἀραβῶν; but it is difficult to say whether this has been done intelligently, or whether it is an instance of the favourite habit of these translators of transferring a Hebrew word literally into Greek when they were unable to comprehend its force. (See some curious examples of this—to take one book only—in 2 K. ii. 14, ἀράβας; iii. 4, ἀραβῆ; iv. 39, ἀραβῶν; v. 19 (comp. Gen. xxxv. 16), ἀραβῶν; vi. 8, ἀραβῶν; ix. 13, ἀραβῶν, &c. &c.) In the latter case it is evidence of an equal ignorance to that which has rendered the word by δυσμαί, καὶ δυσμαίαν, and Ἀραβία.

<sup>f</sup> By Abulfeda and Ibn Haukal the word el-Ghor is used to denote the valley from the Lake of Genesareth to the Dead Sea (Ritter, *Sinai*, 1059, 1060). Thus each word was originally applied to the whole extent, and each has been since restricted to a portion only (see Stanley, App. 487). The word *Ghor* is interpreted by Freytag to mean "locus depressior inter montes."

be more accurate to say, retains its old name of Wady el-Arabah (وادي العربية).

Looking to the indications of the Sacred Text there can be no doubt that in the times of the conquest and the monarchy the name "Arabah" was applied to the valley in the entire length of both its southern and northern portions. Thus in Deut. i. 1, probably, and in Deut. ii. 8, certainly (A. V. "plain" in both cases), the allusion is to the southern portion, while the other passages in which the name occurs, point with certainty—now that the identification has been suggested—to the northern portion. In Deut. iii. 17, iv. 49; Josh. iii. 16, xi. 2, xii. 3; and 2 K. xiv. 25, both the Dead Sea and the Sea of Cinneroth (Gennesareth) are named in close connexion with the Arabah. The allusions in Deut. i. 30; Josh. viii. 14, xii. 1, xviii. 18; 2 Sam. ii. 29, iv. 7; 2 K. xxv. 4; Jer. xxxix. 4, lii. 7, become at once intelligible when the meaning of the Arabah is known, however puzzling they may have been to former commentators.\* In Josh. xi. 16 and xii. 8 the Arabah takes its place with "the mountain," "the lowland" plains of Philistia and Esdraelon, "the south" and "the plain" of Coele Syria, as one of the great natural divisions of the conquered country.

3. But further the word is found in the plural and without the article (עֲרֹבוֹת, *Arloth*), always in connexion with either Jericho or Moab, and therefore doubtless denoting the portion of the Arabah near Jericho; in the former case on the west, and in the latter on the east side of the Jordan; the Arboth-Moab being always distinguished from the Sele-Moab—the bare and burnt-up soil of the sunken valley, from the cultivated pasture or corn-field of the downs on the upper level—with all the precision which would naturally follow from the essential difference of the two spots. (See Num. xxii. 1, xxvi. 3, 63, xxx. 12, xxxiii. 48, 49, 50, xxxv. 13; Deut. xxxiv. 1, 8; Josh. i. 13, v. 10, xiii. 32; 2 Sam. xv. 28, xvii. 16; 2 K. xv. 5; Jer. xxxix. 5, lii. 8).

The word Arabah does not appear in the Bible until the book of Numbers. In the allusions to the valley of the Jordan in Gen. xiii. 10, &c. the curious term *Ciccar* is employed. This word and the other words used in reference to the Jordan valley, as well as the peculiarities and topography of that region—in fact of the whole of the Ghor—will be more appropriately considered under the word JORDAN. At present our attention may be confined to the southern division, to that portion of this singular valley which has from the most remote date borne, as it still continues to bear, the name of "Arabah."

A deep interest will always attach to this remarkable district, from the fact that it must have been the scene of a large portion of the wanderings of the children of Israel after their repulse from the south of the Promised Land. Wherever Kadesh and Hormah may hereafter be found to lie, we know with certainty, even in our present state of ignorance, that they must have been at the north of the Arabah; and therefore "the way of the Red Sea," by which they journeyed "from Mount Hor to compass the land of Edom," after the refusal of

the king of Edom to allow them a passage through his country, must have been southwards, down the Arabah towards the head of the Gulf, till, as is nearly certain, they turned up one of the Wadys on the left, and so made their way by the back of the mountain of Seir to the land of Moab on the east of the Dead Sea.

More accurate information will no doubt be obtained before long of the whole of this interesting country, but in the meantime as short a summary as possible is due of what can be collected from the reports of the principal travellers who have visited it.

The direction of the Ghor is nearly due north and south. The Arabah, however, slightly changes its direction to about N.N.E. by S.S.W. (Rob. i. 162, 3). But it preserves the straightness of its course, and the general character of the region is not dissimilar from that of the Ghor (Ritter, *Sinai*, 1132; Irby, 134) except that the soil is more sandy, and that from the absence of the central river and the absolutely desert character of the highland on its western side (owing to which the wadys bring down no fertilising streams in summer, and nothing but raging torrents in winter), there are very few of those lines and "circles" of verdure which form so great a relief to the torrid climate of the Ghor.

The whole length of the Arabah proper, from the cliffs south of the Dead Sea to the head of the Gulf of Akabah, appears to be rather more than 100 miles (Kiepert's Map, Rob. i.). In breadth it varies. North of Petra, that is about 70 miles from the Gulf of Akabah, it is at its widest, being perhaps from 14 to 16 miles across; but it contracts gradually to the south till at the gulf the opening to the sea is but 4, or, according to some travellers, 2 miles wide (Rob. i. 162; Martineau, 392).

The mountains which form the walls of this vast valley or trench are the legitimate successors of those which shut in the Ghor, only in every way grander and more desert-like. On the west are the long horizontal lines of the limestone ranges of the Th, "always faithful to their tabular outline and blanchéd desolation" (Stanley, 7, 84; also MS. Journal; and see Laborde, 262), mounting up from the valley by huge steps with level barren tracts on the top of each (Rob. ii. 125), and crowned by the vast plateau of the "Wilderness of the Wanderings." This western wall ranges in height from 1500 to 1800 feet above the floor of the Arabah (Rob. i. 162), and through it break in the wadys and passes from the desert above—unimportant towards the south, but further north larger and of more permanent character. The chief of these wadys is the W. *el-Jerfeh*, which emerges about 60 miles from Akabah, and leads its waters, when any are flowing, into the W. *el-Jeib* (Rob. ii. 120, 125), and through it to the marshy ground under the cliffs south of the Dead Sea.

Two principal passes occur in this range. First, the very steep and difficult ascent close to the Akabah, by which the road of the Mecca pilgrims between the Akabah and Snez mounts from the valley to the level of the plateau of the Th. It bears apparently no other name than *en-Nakb*, "the Pass" (Rob. i. 175). The second—*es-Sufah*—has a more direct connexion with the Bible history, being probably that at which the Israelites were repulsed by the Canaanites (Deut. i. 44; Num. xiv. 43-45). It is on the road from Petra to Hebron, above *Ain el-Weibeh*, and is not like the former, from the Arabah

\* See the mistakes of Michaelis, Marius, and others, who identified the Arabah with the Bekaa (i.e. the plain of Coele-Syria, the modern *el-Bekaa*), or with the Mishor, the level down country on the east of Jordan (Kell, 205, 226).

to the plateau, but from the plateau itself to a higher level 1000 feet above it. See the descriptions of Robinson (ii. 178), Lindsay (ii. 46), Stanley (85).

The eastern wall is formed by the granite and basaltic (Schubert in Ritter, *Sinai*, 1013) mountains of Edom, which are in every respect a contrast to the range opposite to them. "At the base are low hills of limestone and argillaceous rock like promontories jutting into the sea . . . in some places thickly strewn with blocks of porphyry; then the lofty masses of dark porphyry constituting the body of the mountain; above these sandstone broken into irregular ridges and grotesque groups or cliffs, and further back and higher than all long elevated ridges of limestone without precipices" (Rob. ii. 123, 154; Laborde, 209, 210, 262; Lord Lindsay, ii. 43), rising to a height of 2000 to 2300 feet, and in Mount Hor reaching an elevation of not less than 5000 feet (Ritter, *Sinai*, 1139, 40). Unlike the sterile and desolate ranges of the Tih, these mountains are covered with vegetation, in many parts extensively cultivated and yielding good crops; abounding in "the fatness of the earth" and the "plenty of corn and wine" which were promised to the forefather of the Arab race as a compensation for the loss of his birthright (Rob. ii. 154; Laborde, 203, 263). In these mountains there is a plateau of great elevation, from which again rise the mountains—or rather the downs (Stanley, 87)—of Sherāh. Though this district is now deserted, yet the ruins of towns and villages with which it abounds show that at one time it must have been densely inhabited (Burekh. 435, 436).

The numerous wadis which at once drain and give access to the interior of these mountains are in strong contrast with those on the west, partaking of the fertile character of the mountains from which they descend. In almost all cases they contain streams which, although in the heat of summer small and losing themselves in their own beds, or in the sand of the Arabah, "in a few paces" after they forsake the shadow of their native ravines (Laborde, 141), are yet sufficient to keep alive a certain amount of vegetation, rushes, tamarisks, palms, and even oleanders, lilies, and anemones, while they form the resort of the numerous tribes of the children of Esau, who still "dwell" (Stanley, 87, also MS. Journal; Laborde, 141; Mart. 396) in Mount Seir, which is Edom" (Gen. xxxvi. 8). The most important of these wadis are the *Wady Ulan* (Jetoun of Laborde), and the *Wady Abū Kuseibeh*. The former enters the mountains close above the Akabah and leads by the back of the range to Petra, and thence by Shobek and Tufleih to the country east of the Dead Sea. Traces of a Roman road exist along this route (Laborde, 203; Rob. ii. 161; by it Laborde returned from Petra, and there can be little doubt that it was the route by which the Israelites took their leave of the Arabah when they went to "compass the land of Edom" (Num. xxi. 4). The second, the *W. Abū Kuseibeh*, is the most direct access from the Arabah to Petra, and is that up which Laborde<sup>a</sup> and Stanley appear to have gone to the city. Besides these are *Wady Tubal*, in which the traveller from the south gains

his first glimpse of the red sandstone of Edom, and *W. Ghurundel*, not to be confounded with those of the same name north of Petra and west of Sinai.<sup>1</sup>

To Dr. Robinson is due the credit of having first ascertained the spot which forms at once the southern limit of the Ghor and the northern limit of the Arabah. This boundary is the line of chalk cliffs which sweep across the valley at about 6 miles below the S.W. corner of the Dead Sea. They are from 50 to 150 feet in height; the Ghor ends with the marshy ground at their feet, and level with their tops the Arabah begins (Rob. ii. 116, 118, 120). Thus the cliffs act as a retaining wall or buttress supporting the higher level of the Arabah, and the whole forms what in geological language might be called a "fault" in the floor of the great valley.

Through this wall breaks in the embouchure of the great main drain of the Arabah—the *Wady el-Jeib*—in itself a very large and deep watercourse which collects and transmits to their outlet at this point the torrents which the numerous wadis from both sides of the Arabah pour along it in the winter season (Rob. ii. 118, 120, 125). The furthest point south to which this drainage is known to reach is the *Wady Ghurundel* (Rob. ii. 125), which debouches from the eastern mountains about 40 miles from the Akabah and 60 from the cliffs just spoken of. The *Wady el-Jeib* also forms the most direct road for penetrating into the valley from the north. On its west bank, and crossed by the road from *Wady Musa* (Petra) to Hebron, are the springs of *Ain el-Weibeh*, maintained by Robinson to be Kadesh (Rob. ii. 175; but see Stanley, 93, 95).

Of the substructure of the floor of the Arabah very little is known. In his progress southward along the *Wady el-Jeib*, which is during part of its course over 100 feet in depth, Dr. Robinson (ii. 119) notes that the sides are "of chalky earth or marl," but beyond this there is no information.

The surface is dreary and desolate in the extreme. "A more frightful desert," says Dr. Robinson (ii. 121) "it had hardly been our lot to behold . . . loose gravel and stones everywhere furrowed with the beds of torrents . . . blocks of porphyry brought down\* by the torrents among which the camels picked their way with great difficulty . . . a lone shrub of the ghālah, the almost only trace of vegetation." This was at the ascent from the *Wady el-Jeib* to the floor of the great valley itself. Further south, near Ain el-Weibeh, it is a rolling gravelly desert with round naked hills of considerable elevation (ii. 173). At *Wady Ghurundel* it is "an expanse of shifting sands, broken by innumerable undulations and low hills" (Burekh. 442), and "countersected by a hundred water-courses" (Stanley, 87). The southern portion has a considerable general slope from east to west quite apart from the undulations of the surface (Stanley, 85), a slope which extends as far north as Petra (Schubert, 1097). Nor is the heat less terrible than the desolation, and all travellers, almost without exception, bear testimony to the difficulties of journeying in a region where the sirocco appears to blow almost without intermission (Schub. 1016; Burekh. 444; Mart. 394; Rob. ii. 123).<sup>k</sup>

<sup>a</sup> Hardly recognizable, though doubtless to be recognized, under the *Pabouchebe* of Laborde (144), or the *Abou Ghahebe* of Lindsay.

<sup>k</sup> The various springs occurring both on the east and west sides of the Arabah are enumerated by Robinson (ii. 184).

\* The wind in the Eilat arm of the Red Sea is very violent, constantly blowing down the Arabah from the north. The navigation of these waters is on that account almost proverbially dangerous and difficult. (See the notice of this in the *Edin. Rev.* vol. ciii. 248.)

However, in spite of this heat and desolation, there is a certain amount of vegetation, even in the open Arabah, in the driest parts of the year. Schubert in March found the *Arta* (*Calligonum* com.), the *Anthia variegata*, and the *Coloquinta* (Ritter, 1014), also tamarisk-bushes (*tawfi*) lying thick in a torrent-bed<sup>a</sup> (1016); and on Stanley's road "the shrubs at times had almost the appearance of a jungle," though it is true that they were so thin as to disappear when the "waste of sand" was overlooked from an elevation (85, and see Rob. i. 163, 175).

It is not surprising that after the discovery by Burckhardt in 1812<sup>b</sup> of the prolongation of the Jordan valley in the Arabah, it should have been assumed that this had in former times formed the outlet for the Jordan to the Red Sea.<sup>c</sup> Lately, however, the levels of the Jordan and the Dead Sea have been taken, imperfectly but still with sufficient accuracy<sup>d</sup> to disprove the possibility of such a theory; and in addition there is the universal testimony of the Arabs that at least half of the district drains northward to the Dead Sea—a testimony fully confirmed by all the recorded observations of the conformation of the ground. A series of accurate levels from the Akabah to the Dead Sea, up the Arabah, are necessary before the question can be set at rest, but in the meantime the following may be taken as an approximation to the real state of the case.

1. The waters of the Red Sea and of the Mediterranean are very nearly at one level.<sup>e</sup>

2. The depression of the surface of the Sea of Galilee is 652 feet, and of the Dead Sea 1316 feet, below the level of the Mediterranean, and therefore of the Red Sea. Therefore the waters of the Jordan can never in historical times have flowed into the Gulf of Akabah, even if the formation of the ground between the Dead Sea and the Gulf would admit of it. But,

3. All testimony goes to show that the drainage of the northern portion of the Arabah is towards the Dead Sea, and therefore that the land rises southward from the latter. Also that the south portion drains to the gulf, and therefore that the land rises northward from the gulf to some point between it and the Dead Sea.<sup>f</sup> The watershed is said by the Arabs to be a long ridge of hills running across the valley at 2½ days, or say 40 miles, from the Akabah (Stanley, 85), and it is probable that this is not far wrong. By M. de Berton it is fixed as opposite the entrance to the *Wady Tikh*, apparently the same spot. [G.]

ARABATTINE (ἡ Ἀραβαττίνη, *Acrabattane*), in Idumaea (1 Macc. v. 3). [ACRABBIM; and see the note to that article.] [G.]

ARA'BIA (*ʿArabia*, Gal. i. 17, iv. 25), a country known in the O. T. under two designations:—1. אֶרֶץ אַרָבָא, *the east country* (Gen. xxv. 6); or

perhaps אֶרֶץ אַרָבָא (Gen. x. 30; Num. xxiii. 7; Is. ii. 6); and אֶרֶץ אַרָבָא (Gen. xix. 1); gent. n. אֶרֶץ אַרָבָא, *suns of the East* (Judg. vi. 3, seqq.; 1 K. iv. 30; Job i. 3; Is. xi. 14; Jer. xlix. 28; Ez. xxv. 4). (Translated by the LXX. and in Vulg., and sometimes transcribed (Κεδέμ) by the former.) From these passages it appears that אֶרֶץ אַרָבָא and אֶרֶץ אַרָבָא indicate, primarily, the country east of Palestine, and the tribes descended from Ishmael and from Keturah; and that this original signification may have become gradually extended to Arabia and its inhabitants generally, though without any strict limitation. The third and fourth passages above referred to, as Gesenius remarks (*Lex. ed. Tregelles, in voc.*), relate to Mesopotamia and Babylonia (*comp. ἡ ἀνατολή*, Matt. ii. 1, seqq.). Winer considers Kedem, &c., to signify Arabia and the Arabians generally (*Realwörterbuch, in voc.*); but a comparison of the passages on which his opinion is founded has led us to consider it doubtful. [BENEKEDEM.] 2. עֲרַב (2 Chr. ix. 14) and עֲרַב (Is. xxi. 13; Jer. xxv. 24; Ez. xxvii. 21); gent. n. עֲרַבִּי (Is. xlii. 20; Jer. lii. 2); and עֲרַבִּי (Neh. ii. 19); pl. עֲרַבִּים (2 Chr. xxi. 16, xxii. 1), and עֲרַבִּיָּים (2 Chr. xvii. 11, xxvi. 7). (LXX. *ʿArabia*, &c.; Vulg. *Arabia*, &c.) These seem to have the same geographical reference as the former names to the country and tribes east of the Jordan, and chiefly north of the Arabian peninsula. In the N. T. *ʿArabia* cannot be held to have a more extended signification than the Hebrew equivalents in the O. T. עֲרַב (Ex. xii. 38; Neh. xiii. 3) and עֲרַב (1 K. x. 15; Jer. xxv. 20, l. 37; Ez. xxx. 5), rendered in the A. V. "a mixed multitude" (Ex. xii. 38, here followed by רַב), "the mixed multitude," kings of "Arabia" (so in Vulg., and in Heb. in corresponding passage in 2 Chr. ix. 14), and (in the last two instances) "the mingled people," have been thought to signify the Arabs. The people thus named dwelt in the deserts of Pétia.

By the Arabs, the country is called بِلَادُ الْعَرَب (Bilād El-'Arab), "the country of the Arabs," and حَضْرَةُ الْعَرَب (Jezzeret El-'Arab), "the peninsula of the Arabs," and the people عَرَب (Arab); "Bedawee" in modern Arabic, and أَرَاب (أَرَاب) in the old language, being applied to

<sup>a</sup> The bees whose hum so charmed him (1017) must from his description have been in a side wady, not in the Arabah itself.

<sup>b</sup> See Burckhardt, 441, 442. The sagacity of Ritter had led him earlier than this to infer its existence from the remarks of the ancient Mahometan historians (Rob. ii. 187).

<sup>c</sup> This theory appears to have been first announced by Col. Leake in the preface to Burckhardt's *Travels* (see p. vi.). It was afterwards espoused and dilated on, amongst others, by Lord Lindsay (ii. 23), Dean Milman (*Hist. of Jews*, Allen, 241), and Stephens (*Incidents of Trav.* ii. 41).

<sup>d</sup> These observations will be stated in detail in the

account of the Jordan. Those of Lynch seem on the whole the most reliable: they give as the levels of the Sea of Galilee and the Dead Sea below the Mediterranean respectively 652 and 1816·7 feet.

<sup>e</sup> See the Report of Mr. Robert Stephenson, and of M. Bourdaloue, quoted in Allen's *Dead Sea*.

<sup>f</sup> Schubert's barometrical observations are not very intelligible, but they at least show this: at the end of the 2nd day his halting-place was 495 ft. above the water of the Gulf; 3rd day, 1017 ft.; 4th day, 2180 ft. Then, after leaving Petra, his halting-place (1 in the Arabah) was 97 ft. below the water of the Gulf (Schubert; Ritter, *Sinai*, 1097).

people of the desert, as distinguished from towns-people. They give no satisfactory derivation of the name 'Arab, that from Yaarab being puerile. The Hebrew designation, 'Ereb, has been thought to be from 'Arabah, "a desert," &c., which, with the article, is the name of an extensive district in Arabia Petraea.

*Geographical Divisions.*—Arabia was divided, by the Greeks, into *Arabia Felix* (ἡ εὐδαίμων Ἀραβία), *Arabia Deserta* (ἡ ἔρημος Ἀραβία), (Strab. xvi. 767; Plin. vi. 28, §32; Diod. Sic. ii. 48, seqq.), and *Arabia Petraea* (ἡ Περπαλία Ἀραβία, l't. v. 17, §1). The first two divisions were those of the earlier writers; the third being introduced by Ptolemy. According to this geographer's arrangement, they included, within doubtful limits, 1, the whole peninsula; 2, the Arabian desert north of the former; and, 3, the desert of Petra, and the peninsula of Sinai. It will be more convenient in this article to divide the country, agreeably to the natural divisions and the native nomenclature, into *Arabia Proper*, or *Jezeen* El-'Arab, containing the whole peninsula as far as the limits of the northern deserts; *Northern Arabia*, or El-Bádiyeh, bounded by the peninsula, the Euphrates, Syria, and the desert of Petra, constituting properly Arabia Deserta, or the great desert of Arabia; and *Western Arabia*, the desert of Petra and the peninsula of Sinai, or the country that has been called Arabia Petraea, bounded by Egypt, Palestine, Northern Arabia, and the Red Sea.

*Arabia Proper*, or the Arabian peninsula, consists of high table-land, declining towards the north; its most elevated portions being the chain of mountains running nearly parallel to the Red Sea, and the territory east of the southern part of this chain. The high land is encircled from the 'Akabah to the head of the Persian Gulf by a belt of low littoral country; on the west and south-west the mountains fall abruptly to this low region; on the opposite side of the peninsula the fall is generally gradual. So far as the interior has been explored, it consists of mountainous and desert tracts, relieved by large districts under cultivation, well peopled, watered by wells and streams, and enjoying periodical rains. The watershed, as the conformation of the country indicates, stretches from the high land of the Yemen to the Persian Gulf. From this descend the torrents that irrigate the western provinces, while several considerable streams—there are no navigable rivers—reach the sea in the opposite direction: two of these traverse 'Omán; and another, the principal river of the peninsula, enters the Persian Gulf on the coast of El-Bahrein, and is known to traverse the inland province called Yamáneh. The geological formation is in part volcanic; and the mountains are basalt, schist, granite, as well as limestone, &c.; the volcanic action being especially observable about El-Medeeneh on the north-west, and in the districts bordering the Indian Ocean. The most fertile tracts are those on the south-west and south. The modern Yemen is especially productive, and at the same time, from its mountainous character, picturesque. The settled regions of the interior also appear to be more fertile than is generally believed to be the case; and the deserts afford pasturage after the rains. The principal products of the soil are date-palms, tamarind-trees, vines, fig-trees, tamarisks, acacias, the banana, &c., and a great variety of thorny shrubs, which, with others, afford pasture for the camels; the chief kinds of pulse and cereals (except oats), coffee, spices, drugs, gums and resins, cotton

and sugar. Among the metallic and mineral products are lead, iron, silver (in small quantities), sulphur, the emerald, onyx, &c. The products mentioned in the Bible as coming from Arabia will be found described under their respective heads. They seem to refer, in many instances, to merchandise of Ethiopia and India, carried to Palestine by Arab and other traders. Gold, however, was perhaps found in small quantities in the beds of torrents (comp. Diod. Sic. ii. 93, iii. 45, 47); and the spices, incense, and precious stones, brought from Arabia (1 K. x. 2, 10, 15; 2 Chr. ix. 1, 9, 14; Is. lx. 6; Jer. vi. 20; Ez. xxvii. 22), probably were the products of the southern provinces, still celebrated for spices, frankincense, ambergris, &c., as well as for the onyx and other precious stones. Among the more remarkable of the wild animals of Arabia, besides the usual domestic kinds, and of course the camel and the horse, for both of which it is famous, are the wild ass, the musk-deer, wild goat, wild sheep, several varieties of the antelope, the hare, monkeys (in the south, and especially in the Yemen); the bear, leopard, wolf, jackal, hyaena, fox; the eagle, vulture, several kinds of hawk, the pheasant, red-legged partridge (in the peninsula of Sinai), sand-grouse (throughout the country), the ostrich (abundantly in central Arabia, where it is hunted by Arab tribes); the tortoise, serpents, locusts, &c. Lions were formerly numerous, as the names of places testify. The sperm-whale is found off the coasts bordering the Indian ocean. Greek and Roman writers (Herod., Agatharch. ap. Muller, Strab., Diod. Sic., Q. Curt., Dion. Perieg., Heliod. *Aethiop.* and Plin.) mention most of the Biblical and modern products, and the animals, above enumerated, with some others. (See the *Dictionary of Geography.*)

Arabia Proper may be subdivided into five principal provinces: the Yemen; the districts of Hadramáwt, Mahreh, and 'Omán, on the Indian Ocean and the entrance of the Persian Gulf; El-Bahrein, towards the head of the Gulf just named; the great central country of Nejd and Yamáneh; and the Hijáz and Tiháneh on the Red Sea. The Arabs also have five divisions, according to the opinion most worthy of credit (*Marásid*, ed. Juynboll, *in voc.* Hijáz; comp. Strabo), Tiháneh, the Hijáz, Nejd, El-'Aood (the provinces lying towards the head of the Persian Gulf, including Yamáneh), and the Yemen (including 'Omán and the intervening tracts). They have, however, never agreed either as to the limits or the number of the divisions. It will be necessary to state in some detail the positions of these provinces, in order to the right understanding of the identifications of Biblical with Arab names of places and tribes.

The Yemen embraced originally the most fertile districts of Arabia, and the frankincense and spice country. Its name, signifying "the right hand" (and therefore "south," comp. Matt. xii. 42), is supposed to have given rise to the appellation *εὐδαίμων* (Felix), which the Greeks applied to a much more extensive region. At present, it is bounded by the Hijáz on the north, and Hadramáwt on the east, with the sea-board of the Red Sea and the Indian Ocean; but formerly, as Ptolemy remarks (comp. Sale, *Prelim. Disc.*), it appears to have extended at least so as to include Hadramáwt and Mahreh (Iba-El-Wardee M.S.; Yákoob *Mushtarak*, ed. Wüstenfeld, and *Marásid*, *passim*). In this wider acceptance, it embraced the region of the first settlements of the Joktanites. Its modern limits include, on the north, the district of Khawlán (not, as Niebuhr supposes, two distinct districts), named after Kháw-

lân (*Kâmoos*), the Joktanite (*Marâsid* in voc., and Caussin de Perceval, *Essai sur l'Hist. des Arabes avant l'Islamisme*, i. 113); and that of Nejrân, with the city of that name founded by Nejrân the Joktanite (Caussin, i. 60, and 113, *seqq.*), which is, according to the soundest opinion, the Negra of Aelius Gallus (Strab. xvi. 782; see Jomard, *Études géogr. et hist. sur l'Arabie*, appended to Mengin, *Hist. de l'Égypte*, &c., iii. 385-6).

Hadrâmâwt, on the coast east of the Yemen, is a cultivated tract contiguous to the sandy deserts called El-Ahkâf, which are said to be the original seats of the tribe of 'A'd (Ibn-El-Warlee, and others). It was celebrated for its frankincense, which it still exports (El-Idreesee, ed. Jaubert, i. 54), and formerly it carried on a considerable trade, its principal port being Zafârî, between Mirbât and Râs Sâjir, which is now composed of a series of villages (Fresnel, 4<sup>e</sup> *Lettre, Journ. Asiat.* iii<sup>e</sup> Série, v. 521). To the east of Hadrâmâwt are the districts of Shihir, which exported ambergris (*Marâsid*, in voc.), and Mahreh (so called after a tribe of Kudâ'ah (*Id.* in voc.), and therefore Joktanite), extending from Seyhoot to Karwân (Fresnel, 4<sup>e</sup> *Lettre*, p. 510) 'Omân forms the easternmost corner of the south coast, lying at the entrance of the Persian Gulf. It presents the same natural characteristics as the preceding districts, being partly desert with large fertile tracts. It also contains some considerable lead-mines.

The highest province on the Persian Gulf is El-Bahreyn, between 'Omân and the head of the Gulf, of which the chief town is Hêjer (according to some. the name of the province also) (*Kâmoos, Marâsid*, in voc.). It contains the towns (and districts) of Kuteef and El-Ahsâ (El-Idreesee, i. 371; *Marâsid*, in voc.; *Mushtarak*, in voc. El-Ahsâ), the latter not being a province as has been erroneously supposed. The inhabitants of El-Bahreyn (dwelling on the coast are principally fishermen and pearl-divers. The district of El-Ahsâ abounds in wells, and possesses excellent pastures which are frequented by tribes of other parts.

The great central province of Nejd, and that of Yemâneh, which bounds it on the south, are little known from the accounts of travellers. Nejd signifies "high land," and hence its limits are very doubtfully laid down by the Arabs themselves. It consists of cultivated table-land, with numerous wells, and is celebrated for its pastures; but it is intersected by extensive deserts. Yemâneh appears to be generally very similar to Nejd. On the south lies the great desert called Er-Rûba el-Khâlee, uninhabitable in the summer, but yielding pasturage in the winter after the rains. The camels of the tribes inhabiting Nejd are highly esteemed in Arabia, and the breed of horses is the most famous in the world. In this province are said to be remains of very ancient structures, similar to those east of the Jordan.

The Hijâz, and Tihâneh (or El-Ghôr, the "low land"), are bounded by Nejd, the Yemen, the Red Sea, and the desert of Petra, the northern limit of the Hijâz being Eyleh (El-Makreezee's *Khitat*, in voc. Eyleh). The Hijâz is the holy land of Arabia, its chief cities being Mekkeh and El-Medeeneh; and it was also the first seat of the Ishmaelites in the peninsula. The northern portion is in general sterile and rocky; towards the south it gradually merges into the Yemen, or the district called El-'Aseer, which is but little noticed by either eastern or western geographers (see Jomard, 245, *seqq.*). The province of Tihâneh extends between the mountain-chain of

the Hijâz, and the shore of the Red Sea; and is sometimes divided into Tihâneh of the Hijâz, and Tihâneh of the Yemen. It is a parched, sandy tract, with little rain, and fewer pasturages and cultivated portions than the mountainous country.

Northern Arabia, or the Arabian Desert

(الْبَادِيَة), is divided by the Arabs (who do not consider it as strictly belonging to their country) into Bâdiyet Esh-Shâm, "the Desert of Syria," Bâdiyet El-Jezeerah, "the Desert of Mesopotamia" (not "— of Arabia," as Winer supposes), and Bâdiyet El-'Irâk, "the Desert of El-'Irâk." It is, so far as it is known to us, a high, undulating, parched plain, of which the Euphrates forms the natural boundary from the Persian Gulf to the frontier of Syria, whence it is bounded by the latter country and the desert of Petra on the north-west and west, the peninsula of Arabia forming its southern limit. It has few oases, the water of the wells is generally either blackish or unpotable, and it is visited by the sand-wind called *Samoom*, of which however the terrois have been much exaggerated. The Arabs find pasture for their flocks and herds after the rains, and in the more depressed plains; and the desert generally produces prickly shrubs, &c., on which the camels feed. The inhabitants were known to the ancients as *σκυπταί*, "dwellers in tents," or perhaps so called from their town *αὶ Σκυπταί* (Strab. xvi. 747, 767; Diod. Sic. ii. 24; Amm. Marc. xxiii. 6; *comp.* xiii. 20; Jer. xlix. 31; Ezek. xxxviii. 11); and they extended from Babylonia on the east (*comp.* Num. xliii. 7; 2 Chr. xxi. 16; Is. ii. 6, xlii. 20), to the borders of Egypt on the west (Strab. xvi. 748; Plin. v. 12; Amm. Marc. xiv. 4, xlii. 15). These tribes, principally descended from Ishmael and from Keturah, have always led a wandering and pastoral life. Their predatory habits are several times mentioned in the O. T. (2 Chr. xxi. 16 and 17, xxvi. 7; Job i. 15; Jer. iii. 2). They also conducted a considerable trade of merchandise of Arabia and India from the shores of the Persian Gulf (Ezek. xxvii. 20-24), whence a chain of oases still forms caravan-stations (Burckhardt, *Arabia*, Appendix vi.); and they likewise traded from the western portions of the peninsula. The latter traffic appears to be frequently mentioned in connexion with Ishmaelites, Keturahites, and other Arabian peoples (Gen. xxxvii. 25, 28; 1 K. x. 15, 25; 2 Chr. ix. 14, 24; Is. lx. 6; Jer. vi. 20), and probably consisted of the products of southern Arabia and of the opposite shores of Ethiopia: it seems, however, to have been chiefly in the hands of the inhabitants of Idumaea; but it is difficult to distinguish between the references to the latter people and to the tribes of Northern Arabia in the passages relating to this traffic. That certain of these tribes brought tribute to Jehoshaphat appears from 2 Chr. xvii. 11; and elsewhere there are indications of such tribute (*comp.* passages referred to above).

Western Arabia includes the peninsula of Sinai [SINAI], and the desert of Petra, corresponding generally with the limits of Arabia Petrea. The latter name is probably derived from that of its chief city; not from its stony character. It was in the earliest times inhabited by a people whose genealogy is not mentioned in the Bible, the Horites or Ilorim (Gen. xiv. 6, xxxvi. 20, 21; Deut. ii. 12, 22, xxxvi. 20-22). [HORITES.] Its later inhabitants were in part the same as those of the preceding

division of Arabia, as indeed the boundary of the two countries is arbitrary and unsettled; but it was mostly peopled by descendants of Esau, and was generally known as the land of Edom, or Idumaen [EDOM]; as well as by its older appellation, the desert of Seir, or Mount Seir [SEIR]. The common origin of the Idumaens from Esau and Ishmael is found in the marriage of the former with a daughter of the latter (Gen. xxviii. 9, xxxvi. 3). The Nabathæans succeeded to the Idumaens, and Idumæa is mentioned only as a geographical designation after the time of Josephus. The Nabathæans have always been identified with Nebaioth, son of Ishmael (Gen. xxv. 13; Is. lx. 7), until Quatremère (*Mémoire sur les Nabathéens*) advanced the theory that they were of another race, and a people of Mesopotamia. [NEBAIOTII.] Petra was in the great route of the western caravan-trade of Arabia, and of the merchandise brought up the Eilatitic Gulf. See preceding section, and EDMO, ELATIT, EZIONGEHR, &c.

*Inhabitants.*—The Arabs, like every other ancient nation of any celebrity, have traditions representing their country as originally inhabited by races which became extinct at a very remote period. These were the tribes of 'A d, Thamood, Umeiyim, 'Abed, Tasim, Jeders, 'Emleek (Amalek), Jurhum (the first of this name), and Webári: some omit the fourth and the last two, but add Jásim. The majority of their historians derive these tribes from Shem; but some, from Ham, though not through Cush.<sup>a</sup> Their earliest traditions that have any obvious relation to the Bible refer the origin of the existing nation in the first instance to Kahtán, whom they and most European scholars identify with Joktan; and secondly to Ishmael, whom they assert to have married a descendant of Kahtán, though they only carry up their genealogies to 'Adnán (said to be of the 21st generation before Mohammad). They are silent respecting Cushite settlements in Arabia; but modern research, we think, proves that Cushites were among its early inhabitants. Although Cush in the Bible usually corresponds to Ethiopia, certain passages seem to indicate Cushite peoples in Arabia; and the series of the sons of Cush should, according to recent discoveries, be sought for in order along the southern coast: exclusive of Seba (Meroë), occupying one extreme of their settlements, and Nimrod the other. The great ruins of Ma-rib or Sebá, and of other places in the Yemen and Hadramáwt, are not those of a Semitic people; and further to the east, the existing language of Mahreh, the remnant of that of the inscriptions found on the ancient remains just mentioned, is in so great a degree apparently African, as to be called by some scholars *Cushite*; while the settlements of Kaunah and those of his sons Sheba and Dedan, are probably to be looked for towards the head of the Persian Gulf, bordered on the north by the descendants of Keturah, bearing the same names as the two latter. In Babylonia also? independent proofs of this immigration of Cushites from Ethiopia have, it is thought, been lately obtained. The ancient cities and buildings

of southern Arabia, in their architecture, the inscriptions they contain, and the native traditions respecting them, are of the utmost value in aiding a student of this portion of primeval history. Indeed they are the only important archaic monuments of the country; and they illustrate both its earliest people and its greatest kingdoms. Ma-rib, or Sebá\* (the Mariaba of the Greek geographers), is one of the most interesting of these sites. (See Michanels' *Questions*, No. 94, &c. in Niebuhr's *Arabia*.) It was founded, according to the general agreement of tradition, by 'Abd-ah-Shems Sebá, grandson of Yaarub the Kahtánite (*Mushtarak*, in loc.; Abu-l-Fidh, *Hist. antieisl.* ed. Fleischer, p. 114); and the Dyke of El-'Arim, which was situate near the city, and the rupture of which (A.D. 150-170 according to De Sacy; 120 according to Caussin de Perceval) formed an era in Arabian history, is generally ascribed to Lukmán the Greater, the 'A'dile, who founded the dynasty of the 2nd 'A'd (Ibn-El-Wardee, MS.; Hamza Isphahensis, *ap. Schultens*, pp. 24-5; El-Mes'oodee, cited by De Sacy, *Mém. de l'Acad.*, xlviii. 484 seqq.; and Ibn Khaldoun in Caussin's *Essai*, i. 16). 'A'dites (in conjunction with Cushites) were probably the founders of this and similar structures, and were succeeded by a predominantly Joktanite people, the Biblical Sheba, whose name is preserved in the Arabian Sebá, and in the *Subaei* of the Greeks. It has been argued (Caussin, *Essai*, i. 42 seqq.; Renan, *Langues Sémitiques*, i. 300) that the 'A'dites were the Cushite Sebá; but this hypothesis, which involves the question of the settlements of the eldest son of Cush, and that of the descent of the 'A'dites, rests solely on the existence of Cushite settlements in southern Arabia, and of the name of

Sebá (سَبَا) in the Yemen (by these writers inferentially identified with سَبَد; by the Arabs, unanimously, with Sebá the Kahtánite, or سَبَوِي; the Hebrew *shin* being, in by far the greater number of instances, *sin* in Arabic); and it necessitates the existence of the two Biblical kingdoms of Seba and Sheba in a circumscribed province of southern Arabia, a result which, we think is irreconcilable with a careful comparison of the passages in the Bible bearing on this subject. [CUSH, SEBA, SHEBA.] Neither is there evidence to indicate the identity of 'A'd and the other extinct tribes with any Semitic or Hamitic people: they must, in the present state of knowledge, be classed with the Rephaim and other peoples whose genealogies are not known to us. The only one that can possibly be identified with a Scriptural name is Amalek, whose supposed descent from the grandson of Esau seems inconsistent with Gen. xiv. 7, and Num. xxiv. 20. [AMALEK.]

The several nations that have inhabited the country are divided, by the Arabs, into extinct, and existing tribes; and these are again distinguished as 1. El-'Arab el-'A'ribeh (or — el-'Arbá, or — el-'Aribeh), the Pure or Genuine Arabs; 2. El-'Arab el-Muta'aribeh, and 3. El-'Arab el-Mustaa-

<sup>a</sup> In this section is included the history. The Arab materials for the latter are meagre, and almost purely traditional. The chronology is founded on genealogies, and is too intricate and unsettled for discussion in this article; but it is necessary to observe that "son" should often be read "descendant," and that the Arabs ascribe great length of life to the ancient people.

<sup>b</sup> This enumeration is from a comparison of Arab

authors. Caussin de Perceval has entered into some detail on the subject (*Essai*, i. 11-35), but without satisfactorily reconciling contradictory opinions; and his identifications of these with other tribes are purely hypothetical.

\* Sebá was the city of Ma-rib (*Mushtarak*, in loc.), or the country in the Yemen of which the city was Ma-rib (*Mariáid*, in voc.). See also SHEBA.

ribeh, the Institious, or Naturalized, Arabs. Of many conflicting opinions respecting these races, two only are worthy of note. According to the first of these, El-'Arab el-'A'ribeh denotes the extinct tribes, with whom some conjoin Kahtân; while the other two, as synonymous appellations, belong to the descendants of Ishmael.<sup>a</sup> According to the second, El-'Arab el-'A'ribeh denotes the extinct tribes; El-'Arab el-Muta'arribeh, the unmixed descendants of Kahtân; and El-'Arab el-Mustaarribeh the descendants of Ishmael, by the daughter of Muddil the Joktanite. That the descendants of Joktan occupied the principal portions of the south and south-west of the peninsula, with colonies in the interior, is attested by the Arabs and fully confirmed by historical and philological researches. It is also asserted that they have been gradually absorbed into the Ishmaelite immigrants, though not without leaving strong traces of their former existence. Fresnel, however (1<sup>o</sup> *Lettre*, p. 24), says that they were quite distinct, at least in Mohammed's time, and it is not unlikely that the Ishmaelite element has been exaggerated by Mohammedan influence.

Respecting the Joktanite settlers we have some certain evidence. In Genesis (x. 30) it is said, "and their dwelling was from Mesha, as thou goest unto Sephar, a mount of the east [Kedem]." The position of Mesha is very uncertain; it is most reasonably supposed to be the western limit of the first settlers [MESHA]: Sephar is undoubtedly Dhafûr, or Zafûr, or the Arabs (probably pronounced, in ancient times, without the final vowel, as it is at the present day), a name not uncommon in the peninsula, but especially that of two celebrated towns—one being the seaport on the south coast, near Mirbât; the other, now in ruins, near San'a, and said to be the ancient residence of the Himyerite kings (Es-Sâghâne, MS.; *Mushtarah*, in voc.; *Mardasil*, ib.; El-Idreesi, i. 118). Fresnel (4<sup>o</sup> *Lettre*, p. 516, seqq.) prefers the seaport, as the Himyerite capital, and is followed by Jomard (*Etudes*, p. 367). He informs us that the inhabitants call this town "Isûr." Considering the position of the Joktanite races, this is probably Sephar; it is situate near a thuriferous mountain (*Mardasil*, in voc.), and exports the best frankincense (Niebuhr, p. 148): Zafûr, in the Yemen, however, is also among mountains [SEPHAR]. In the district indicated above are distinct and undoubted traces of the names of the sons of Joktan mentioned in Genesis, such as Hadramâwt for Hazarmaveth, Azâl for Uzal, Sebâ for Sheba, &c. Their remains are found in the existing inhabitants of (at least) its eastern portion, and their records in the numerous Himyerite ruins and inscriptions.

The principal Joktanite kingdom, and the chief state of ancient Arabia, was that of the Yemen, founded (according to the Arabs) by Yaarub, the son (or descendant) of Kahtân (Joktan). Its most ancient capital was probably San'a, formerly called Azâl

(أزال) in the *Mardasil*, in voc. San'a), after Azâl, son of Joktan (Yâkoot). [UZAL.] The other capitals were Ma-rib, or Sebâ, and Zafûr. This was the Biblical kingdom of Sheba. Its rulers, and most of its people, were descendants of Sebâ (= Sheba), whence the classical *Sabaci* (Diod. Sic.

iii. 38, 46). Among its rulers was probably the Queen of Sheba who came to hear the wisdom of Solomon (2 K. x. 2). The Arabs call her Bilkees, a queen of the later Himyerites; and their traditions respecting her are otherwise not worthy of credit. [SHEBA.] The dominant family was apparently that of Himyer, son (or descendant) of Sebâ. A member of this family founded the more modern kingdom of the Himyerites. The testimony of the Bible, and of the classical writers, as well as native tradition, seems to prove that the latter appellation superseded the former only shortly before the Christian era: i. e. after the foundation of the later kingdom. "Himyerite," however, is now very vaguely used.—Himyer, it may be observed, is perhaps

"red" (أحمر, from حمرة, or حمر), and

several places in Arabia whose soil is reddish derive

their names from Aafûr (أعفر), "reddish."

This may identify Himyer (the red man?) with Ophir, respecting whose settlements, and the position of the country called Ophir, the opinion of the learned is widely divided [ΟΦΙΡ]. The similarity of signification with φοινίξ and ερυθρός lends weight to the tradition that the Phœnicians came from the Erythraean Sea (Herod. vii. 89). The maritime nations of the Mediterranean who had an affinity with the Egyptians,—such as the Philistines, and probably the primitive Cretans and Carians—appear to have been an offshoot of an early immigration from southern Arabia, which moved northwards, partly through Egypt [CAPIHTOR]. It is noticeable that the Shepherd-invaders of Egypt are said to have been Phœnicians; but Manetho, who seems to have held this opinion, also tells us that some said they were Arabs (Manetho, ap. Cory. *Anc. Fragments*, 2nd ed., p. 171), and the hieroglyphic name has been supposed to correspond to the common appellation of the Arabs, Shasu, the "camel-riding Shasu" (*Select Papyri*, pl. liii.), an identification entirely in accordance with the Egyptian historian's account of their invasion and polity. In the opposite direction, an early Arab domination of Chaldaea is mentioned by Berosus (Cory, p. 60), as preceding the Assyrian dynasty. All these indications, slight as they are, must be borne in mind in attempting a reconstruction of the history of southern Arabia.—The early kings of the Yemen were at continual feud with the descendants of Kahtân (brother of Himyer) until the fifteenth in descent (according to the majority of native historians) from Himyer united the kingdom. This king was the first Tubbaa, a title also distinctive of his successors, whose dynasty represents the proper kingdom of Himyer, whence the *Homertidae* (Ptol. vi. 7; Plin. vi. 28). Their rule probably extended over the modern Yemen, Hadramâwt, and Mahreh. The fifth Tubbaa, Dhu-l-Adhâr, or Zu-l-Azâr, is supposed (Caussin, i. 73) to be the Il-sarus of Aelius Gallus (B.C. 24). The kingdom of Himyer lasted until A.D. 525, when it fell before an Abyssinian invasion. Already, about the middle of the 4th century, the kings of Axum appear to have become masters of part of the Yemen (Caussin, *Essai*, i. 114; *Zeitschr. d. Deutsch. Morgenländ. Gesellschaft*, vii. 17 seqq., xi. 338 seqq.), adding to their titles the names of places in Arabia belonging to Himyer. After four reigns they were succeeded by Himyerite princes,

<sup>a</sup> El-'Arab el-'A'ribeh is conventionally applied by the lexicographers to all who spoke pure Arabic before its corruption began.

vassals of Persia, the last of whom submitted to Mohammad. Kings of Hadramāwt (the people of Hadramāwt are the classical *Chatramotitæ*, Plin. vi. 28; *comp. Adramitæ*) are also enumerated by the Arabs (Ibn-Khaldoun, *ap.* Caussin, i. 135, *seqq.*) and distinguished from the descendants of Yaarub, an indication, as is remarked by Caussin (*l. c.*), of their separate descent from Hazarmaveth [HAZARMAVEETH]. The Greek geographers mention a fourth people in conjunction with the Sabæi, Homeritæ, and Chatramotitæ,—the *Minæi* (Strab. xvi. 768; Ptol. v. 7 §23; Plin. vi. 32; Diod. Sic. iii. 42) who have not been identified with any Biblical or modern name. Some place them as high as Mekkeh, and derive their name from Minā (the sacred valley N.W. of that city), or from the goddess Manāh, worshipped in the district between Mekkeh and El-Medeeneh. Fresnel, however, places them in the Wādee Do'ān in Hadramāwt, arguing that the Yemen anciently included this tract, that the Minæi were probably the same as the Khabanitæ or Rhamanitæ (Pt. vi. 7, §24; Strabo, xvi. 782), and that 'Paparitaw' was a copyist's error for 'Teaparitaw'.

The other chief Joktanite kingdom was that of the Hijāz, founded by Jurhum, the brother of Yaarub, who left the Yemen and settled in the neighbourhood of Mekkeh. The Arab lists of its kings are inextricably confused; but the name of their leader and that of two of his successors was Mudād (or El-Mudād), who probably represents Almodad [ALMODAD]. Ishmael, according to the Arabs, married a daughter of the first Mudād, whence sprang 'Adnān the ancestor of Mohammad. This kingdom, situate in a less fertile district than the Yemen, and engaged in conflict with aboriginal tribes, never attained the importance of that of the south. It merged, by intermarriage and conquest, into the tribes of Ishmael. (Kutb-od-Deen, *ed.* Winstenfeld, pp. 35, and 39 *seqq.*; *comp.* authorities quoted by Caussin.) Fresnel cites an Arab author who identifies Jurhum with Hadoram [HADORAM].

Although these were the principal Joktanite kingdoms, others were founded beyond the limits of the peninsula. The most celebrated of these were that of El-Heereh in El-Jrak, and that of Ghassān on the confines of Syria; both originated by emigrants after the Flood of El-'Arim. El-Heereh soon became Ishmaelitic; Ghassān long maintained its original stock. Among its rulers were many named El-Hārith. Respecting the presumed identity of some of these with kings called by the Greeks and Romans Aretas, and with the Aretas mentioned by St. Paul (2 Cor. xi. 32), see ARETAS.

The Ishmaelites appear to have entered the peninsula from the north-west. That they have spread over the whole of it (with the exception of one or two districts on the south coast which are said to be still inhabited by unmixt Joktanite peoples), and that the modern nation is predominantly Ishmaelitic, is asserted by the Arabs. They do not, however, carry up their genealogies higher than 'Adnān (as we have already said), and they have lost the names of most of Ishmael's immediate and near descendants. Such as have been identified with existing names will be found under the several articles bearing their names. [See also HAGARENES.] They extended northwards from the Hijāz into the Arabian desert, where they mixed with Keturahites and other Abrahamic peoples; and westwards to Idumæa, where they mixed with Edomites, &c.

The tribes sprung from Ishmael have always been governed by petty chiefs or heads of families (sheykhs and emeers); they have generally followed a patriarchal life, and have not originated kingdoms, though they have in some instances succeeded to those of Joktanites, the principal one of these being that of El-Heereh. With reference to the Ishmaelites generally, we may observe, in continuation of a former remark, that although their first settlements in the Hijāz, and their spreading over a great part of the northern portions of the peninsula, are sufficiently proved, there is doubt as to the wide extension given to them by Arab tradition. Mohammad derived from the Jews whatever tradition he pleased, and silenced any contrary, by the Kur-ān or his own dicta. This religious element, which does not directly affect the tribes of Joktan (whose settlements are otherwise unquestionably identified), has a great influence over those of Ishmael. They therefore cannot be certainly proved to have spread over the peninsula, notwithstanding the almost universal adoption of their language (which is generally acknowledged to have been the Arabic commonly so called), and the concurrent testimony of the Arabs; but from these and other considerations it becomes at the same time highly probable that they now form the predominant element of the Arab nation.

Of the descendants of Keturah the Arabs say little. They appear to have settled chiefly north of the peninsula in Desert Arabia, from Palestine to the Persian Gulf; and the passages in the Bible in which mention is made of Dedan (except those relating to the Cushite Dedan, Gen. x. 7) refer apparently to the tribe sprung from this race (Is. xxi. 13; Jer. xxv. 23; Ez. xxvii. 20), perhaps with an admixture of the Cushite Dedan, who seems to have passed up the western shores of the Persian Gulf. Some traces of Keturahites, indeed, are asserted to exist in the south of the peninsula, where a king of Himyer is said to have been a Midianite (El-Mes'odee, *ap.* Schultens, p. 158-9); and where one dialect is said to be of Midian, and another of Jokshan son of Ketmah (*Moajim*); but these traditions must be ascribed to the Rabbinical influence in Arab history. Native writers are almost wholly silent on this subject; and the dialects mentioned above are not, so far as they are known to us, of the tribes of Keturah. [KETURAH, &c.]

In Northern and Western Arabia are other peoples which, from their geographical position and mode of life, are sometimes classed with the Arabs. Of these are AMALEK, the descendants of ESAU, &c.

*Religion.*—The most ancient idolatry of the Arabs we must conclude to have been fetishism, of which there are striking proofs in the sacred trees and stones of historical times, and in the worship of the heavenly bodies, or Sabæism. With the latter were perhaps connected the temples (or palace-temples) of which there are either remains or traditions in the Himyerite kingdom; such as Beyt Ghumdān in San'ā, and those of Reyḍān, Beynoudh, Ru'eyn, 'Eyeyn, and Rām. To the worship of the heavenly bodies we find allusions in Job (xxi. 26-28) and to the belief in the influence of the stars to give rain (xxxviii. 31), where the Pleiades give rain, and Orion withholds it; and again in Judges (v. 20, 21) where the stars fight against the host of Sisera. The names of the objects of the earlier fetishism, the stone-worship, tree-worship, &c., of various tribes, are too numerous to mention. One, that of Manāh, the goddess worshipped between Mekkeh and El-

Medeenah has been compared with Meni (Is. lxx. 11), which is rendered in the A. V. "number" [MENI]. Magianism, an importation from Chaldaea and Persia, must be reckoned among the religions of the Pagan Arabs; but it never had very numerous followers. Christianity was introduced in southern Arabia towards the close of the 2nd century, and about a century later it had made great progress. It flourished chiefly in the Yemen, where many churches were built (see Philostorg. *Hist. Eccles.* iii.; Sozomen, vi.; Evagr. vi.). It also rapidly advanced in other portions of Arabia, through the kingdom of Heerah and the contiguous countries, Ghassân, and other parts. The persecutions of the Christians, and more particularly of those of Nejran by the Tubbaa Zu-n-Nuwâs, brought about the fall of the Himyerite dynasty by the invasion of the Christian ruler of Abyssinia. Judaism was propagated in Arabia, principally by Karaites, at the captivity, but it was introduced before that time: it became very prevalent in the Yemen, and in the Hijâz, especially at Kheybar and El-Medeenah, where there are said to be still tribes of Jewish extraction. In the period immediately preceding the birth of Mohammad another class had sprung up, who, disbelieving the idolatry of the greater number of their countrymen, and not yet believers in Judaism, or in the corrupt Christianity with which alone they were acquainted, looked to a revival of what they called the "religion of Abraham" (see Sprenger's *Life of Mohammed*, i., Calcutta, 1856). The promulgation of the Mohammadan imposture overthrew paganism, but crushed while it assumed to lead the movement which had been one of the causes of its success, and almost wholly superseded the religions of the Bible in Arabia.

*Language.*—Arabic, the language of Arabia, is the most developed and the richest of the Semitic languages, and the only one of which we have an extensive literature: it is, therefore, of great importance to the study of Hebrew. Of its early phases we know nothing; while we have archaic monuments of the Himyeritic (the ancient language of southern Arabia), though we cannot fix their precise ages. Of the existence of Hebrew and Chaldee (or Aramaic) in the time of Jacob there is evidence in Gen. (xxi. 47); and probably Jacob and Laban understood each other, the one speaking Hebrew and the other Chaldee. It seems also (Judg. vii. 9-15) that Gideon, or Phurah, or both, understood the conversation of the "Midianites, and the Amalekites, and all the children of the east" (עַמְּלֵקִים וְכָל בְּנֵי מִדְיָן).

It is probable, therefore, that in the 14th or 13th cent. B.C. the Semitic languages differed much less than in after times. But it appears from 2 K. xviii. 26, that in the 8th cent. B.C. only the educated classes among the Jews understood Aramaic. With these evidences before us, and making a due distinction between the archaic and the known phases of the Aramaic and the Arabic, we think that the Himyeritic is to be regarded as a sister of the Hebrew, and the Arabic (commonly so called) as a sister of the Hebrew and the Aramaic, or, in its classical phase, as a descendant of a sister of these two, but that

the Himyeritic is mixed with an African language, and that the other dialects of Arabia are in like manner, though in a much less degree, mixed with an African language. The inferred differences between the older and later phases of the Aramaic, and the presumed difference between those of the Arabic, are amply confirmed by comparative philology. The division of the Ishmaelite language into many dialects is to be attributed chiefly to the separation of tribes by uninhabitable tracts of desert, and the subsequent amalgamation of those dialects to the pilgrimage and the annual meetings of 'Okâz, a fair in which literary contests took place, and where it was of the first importance that the contending poets should deliver themselves in a language perfectly intelligible to the mass of the people congregated, in order that it might be *critically* judged by them; for many of the meanest of the Arabs, utterly ignorant of reading and writing, were of the highest of the authorities consulted by the lexicologists when the corruption of the language had commenced, i. e. when the Arabs, as Mohammadans, had begun to spread among foreigners.

Respecting the Himyeritic,\* until lately little was known; but monuments bearing inscriptions in this language have been discovered in the southern parts of the peninsula, principally in Hadramiwt and the Yemen, and some of the inscriptions have been published by Fresnel, Arnaud, Wellsted, and Cruttenden; while Fresnel has found a dialect still spoken in the district of Mahreh and westwards as far as Kishem, that of the neighbourhood of Za'fârî and Mirbât being the purest, and called "Ek-hill;" and this is supposed with reason to be the modern phasis of the old Himyeritic (4<sup>e</sup> *Lettre*). Fresnel's alphabet has been accepted by the learned. The dates found in the inscriptions range from 30 (on the dyke of Ma-rib) to 604 at Hiss Ghorâh, but what era these represent is uncertain.—Ewald (*Ueber die Himyarische Sprache* in Hoefers *Zeitschrift*, i. 295, seqq.) thinks that they are years of the Rapture of the Dyke, while acknowledging their apparent high antiquity; but the difficulty of supposing such inscriptions on a ruined dyke, and the fact that some of them would thus be brought later than the time of Mohammad, make it probable that they belong rather to an earlier era, perhaps that of the Himyerite empire, though what point marks its commencement is not determined. The Himyeritic in its earlier phasis probably represents the first Semitic language spoken in Arabia.

The manners and customs of the Arabs† are of great value in illustrating the Bible; but supposed parallels between the patriarchal life of the Scriptures and the state of the modern Arabs must not be hastily drawn. It should be remembered that this people are in a degraded condition; that they have been influenced by Jewish contact, especially by the adoption by Mohammad, of parts of the ceremonial law, and of rabbinical observances; and that they are not of the race of Israel. They must be regarded, 1st, as Bedawees, or people of the desert, and 2ndly, as settled tribes or townspeople.

The Bedawees acknowledge that their ancient excellence has greatly declined since the time of Mohammad, and there cannot be a doubt that this decline had commenced much earlier. Though

\* By this term is to be understood the ancient language of southern Arabia generally, not that of the Himyerites only.

† The Arabs have impressed their national charac-

teristics on every people whom they have conquered, except the Tatar races. "Arab life" is therefore generally understood in a very wide sense. The modern Egyptians are essentially an Arab people.

each tribe boasts of its unadulterated blood, and pure language, their learned men candidly admit the depreciation of national character. Scriptural customs still found among them must therefore be generally regarded rather as indications of former practices, than as being identical with them. Furthermore, the Bible always draws a strong contrast between the character of the Israelites and that of the descendants of Ishmael, whom the Bedawees mostly represent. Yet they are, by comparison with other nations, an essentially unchangeable people, retaining a primitive, pastoral life, and many customs strikingly illustrating the Bible. They are not as much affected by their religion as might be supposed: many tribes disregard religious observances, and even retain some pagan rites. The Wahluhees, or modern Arab reformers, found great difficulty in suppressing by persuasion, and even by force of arms, such rites; and where they succeeded, the suppression was, in most cases, only temporary. Incest, sacrifices to sacred objects, &c., were among these relics of paganism. (See Burckhardt's *Notes on the Beekun and Wahabys*.) The less changed a tribe, however, the more difficulty is there in obtaining information respecting it: such a one is very jealous of intercourse with strangers even of its own nation. In southern Arabia, for instance, is a tribe which will not allow a guest to stay within its encampments beyond the three days demanded by the laws of hospitality. This exclusion undoubtedly tends to preserve the language from corruption, and the people from foreign influence; but it probably does not improve the national character.

To the settled Arabs, these remarks apply with the difference that the primitive mode of life is in a great degree lost, and the Jewish practices are much more observable; while intermixture with foreigners, especially with Abyssinian and Negro concubines in the Yemen and the Hijaz, has tended to destroy their purity of blood. A Bedawee will scarcely marry out of his tribe, and is not addicted to concubinage; he considers himself, and is, quite distinct from a townsman, in habits, in mode of thought, and in national feeling. Again, a distinction should be made between the people of northern and those of southern Arabia; the former being chiefly of Ishmaelite, the latter of Joktanite, descent, and in other respects than settlement and intermarriage with foreigners, further removed from the patriarchal character.

Regarded in the light we have indicated, Arab manners and customs, whether those of the Bedawees or of the townspeople, afford valuable help to the student of the Bible, and testimony to the truth and vigour of the Scriptural narrative. No one can mix with this people without being constantly and forcibly reminded either of the early patriarchs or of the settled Israelites. We may instance their pastoral life, their hospitality (that most remarkable of desert virtues) [HOSPITALITY], their universal respect for age (comp. Lev. xix. 32), their familiar deference (comp. 2 K. v. 13), their superstitious regard for the beard. On the signet-ring, which is worn on the little finger of the right hand, is usually inscribed a sentence expressive of submission to God, or of his perfection, &c., explaining Ex. xxxix. 30, "the engraving of a signet, Holiness to the Lord," and the saying of our Lord (John iii. 33), "He . . . hath set to his seal that God is true." As a mark of trust, this ring is given to another person (as in Gen. xli. 42). The inkhorn worn in the girdle is also very ancient (Ex. ix. 3, 11), as well as the

veil. (For these and many other illustrations, see Lane's *Modern Egyptians*, *index*.) A man has a right to claim his cousin in marriage, and he relinquishes this right by taking off his shoe, as the kinsman of Ruth did to Boaz (Ruth iv. 7, 8; see Burckhardt's *Notes on the Ledouins and Wahabys*, i. 113).

References in the Bible to the Arabs themselves are still more clearly illustrated by the manners of the modern people, in their predatory expeditions, their mode of warfare, their caravan journeys, &c. To the interpretation of the book of Job, an intimate knowledge of this people and their language and literature is essential; for many of the most obscure passages can only be explained by that knowledge.

The commerce of Arabia especially connected with the Bible has been referred to in the sections on Western and Northern Arabia, and incidentally in mentioning the products of the peninsula. Direct mention of the commerce of the south does not appear to be made in the Bible, but it seems to have passed to Palestine principally through the northern tribes. Passages relating to the fleets of Solomon and to the maritime trade, however, bear on this subject, which is a curious study for the historical inquirer. The Joktanite people of southern Arabia have always been, in contradistinction to the Ishmaelite tribes, addicted to a seafaring life. The latter were caravan-merchants; the former, the chief traders of the Red Sea, carrying their commerce to the shores of India, as well as to the nearer coasts of Africa. Their own writers describe these voyages; since the Christian era especially, as we might expect from the modern character of their literature. (See the curious *Accounts of India and China by Two Mohammedan Travellers of the 9th cent.*, trans. by Renaudot, and amply illustrated in Mr. Lane's notes to his translation of the *Thousand and One Nights*.) The classical writers also make frequent mention of the commerce of southern Arabia. (See the *Dict. of Gr. and Rom. Geography*.) It was evidently carried to Palestine by the two great caravan routes from the head of the Red Sea and from that of the Persian Gulf; the former especially taking with it African produce; the latter, Indian. It should be observed that the wandering propensities of the Arabs, of whatever descent, do not date from the promulgation of El-Islâm. All testimony goes to show that from the earliest ages the peoples of Arabia formed colonies in distant lands, and have not been actuated only by either the desire of conquest or by religious impulse in their foreign expeditions; but rather by restlessness and commercial activity.

The principal European authorities for the history of Arabia, are, Schulzens' *Hist. Imp. Vetus. Jactanidarum*, Hard. Gel. 1786, containing extracts from various Arab authors; and his *Monumenta Vetustiora Arabica*, Lug. Bat. 1740; Eichhorn's *Monumenta Antiquiss. Hist. Arabum*, chiefly extracted from Ibn-Kuteybeh, with his notes, Götting. 1775; Fresnel, *Lettres sur l'Hist. des Arabes avant l'Islamisme*, published in the *Journal Asiatique*, 1838-53; Quatremère, *Mémoire sur les Nubathéens*; Caussin, *Essai sur l'Hist. des Arabes avant l'Islamisme*, Paris, 1847-8; for the geography, Niebuhr's *Description de l'Arabie*, Amst. 1774; Burckhardt's *Travels in Arabia*, Lond. 1839; Wellsted, *Narrative of a Journey to the ruins of Nakeb-al-Hajar*, in *Journ. of R. G. S.*, vii. 20; his copy of inscription, in *Journ. of Asiatic Soc. of Bengal*, iii. 1834; and his *Journal*, London,

1838; 'Crittenden, *Narrative of a Journey from Mokhá to Siná*; Jomari, *Études géogr. et hist.* appended to Meugin, *Hist. de l'Égypte*, vol. iii. Paris, 1839; and for Arabia Petraea and Sinai, Robinson's *Biblical Researches*; Stanley's *Sinai and Palestine*; Tuch's *Essay on the Sinaitic Inscriptions*, in the *Journal of the German Oriental Soc.* xiv. 129 seqq. Strabo, Ptolemy, Diolorus Siculus, Pliny, and the minor geographers, should also be consulted:—for the manners and customs of the Arabs, Burekhardt's *Notes on the Bedouins and Wahoobys*, 8vo. 1831; and for Arab life in its widest sense, Mr. Lane's *Notes on the Thousand and One Nights*, ed. 1838; and his *Modern Egyptians*, ed. 1842.

The most important native works are, with two exceptions, still untranslated, and but few of them are edited. Abu-l-Fidá's *Hist. Antisémite* has been edited and translated by Fleischer, Lips. 1831; and El-Idreesé's *Geography* translated by Jaubert, and published in the *Recueil de Voyages et de Mémoires*, by the Geogr. Soc. of Paris, 1836; of those which have been, or are in course of being, edited, are Yákoob's Homonymous Geographical Dictionary, entitled *El-Mushtarak Wad'an, wa-l-Muf-tarak Sak'an*, ed. Wustenfeld, Got. 1845; the *Marásit el-Ittilá*, probably an abridgment by an unknown hand of his larger geogr. dict. called the *Morjam*, ed. Jinyuboll, Lug. Bat. 1852-4; the *Histoires of Mekkeh*, ed. Wustenfeld, and now publishing by the German Oriental Society; and Ibn-Khaldoun's *Polemonent*, ed. Quatremère, i. Paris, 1858. Of those in MS., besides the indispensable works of the Arab lexicographers, we would especially mention Ibn-Khaldoun's *History of the Arabs*; the *Kharicet el-Ajáb* of Ibn-El-Wardee; the *Mir-át ez-Zemán* of Ibn-El-Józe; the *Murooj eth-Dhahab* of El-Mes'oodée; Yákoob's *Morjam el-Buhán*; the *Kitáb-el-Aqlánc* of El-Isfahánc; and the *Tkd* of El-Kurtubec. [E. S. P.]

**A'RAD** (עָרָד; 'Αρηδ; *Arad*), name of a man (1 Chr. viii. 15).

**A'RAD** (עָרָד; 'Αδέρ, 'Αράδ), a royal city of the Canaanites, named with Hormah and Libnah (Josh. xii. 14). The wilderness of Judah was to "the south of Arad" (Judg. i. 16). It is also undoubtedly named in Num. xxi. 1 (comp. Hormah in ver. 3), and xxxiii. 40, 'the Canaanite king of Arad,' instead of the reading of the A. V., "king Arad the Canaanite." (See the translations of Zunz, De Wette, &c.) It is mentioned in the *Ononisticon* (s. v. 'Αραυα, Aral, 'Αδέρ, Asason Thamar) as a city of the Amorites, near the desert of Kaddes, 4 miles from Malatha (Moladah), and 20 from Hebron. This agrees with the conjecture of Robinson, who identifies it with a hill, *Tell 'Arad*, an hour and a half N.E. by E. from *Milch* (Moladah), and 8 hours from Hebron (Ilob. ii. 101, 201, 202). [G.]

**AR'ADUS** ('Αραδος; *Arados*), included in the list of places to which the decree of Lucius the consul, protecting the Jews under Simon the high priest, was addressed (1 Macc. xv. 23). The same place as ARVAD. [G.]

**A'RAH** (אָרָה; 'Οπέχ, 'Αρες, 'Ηραή, 'Ηρά; *Arce, Area*), name of two men. 1. (1 Chr. vii. 39). 2. (Ezr. ii. 5; Neh. vi. 18; vii. 10), given as *Ares* ('Αρές) in 1 Esd. v. 10.

**A'RAM** (אַרָם, occasionally with the definite article אֶרָם, and once אָרָם; probably from a root

signifying height, and which is also the base of "Ramah" (Gesenius, 151; Stanley, 129), the name by which the Hebrews designated, generally, the country lying to the north-east of Palestine; the great mass of that high table-land which, rising with sudden abruptness from the Jordan and the very margin of the lake of Genesareth, stretches, at an elevation of no less than 2000 feet above the level of the sea, to the banks of the Euphrates itself, contrasting strongly with the low land bordering on the Mediterranean, the "land of Canaan," or the low country (Gen. xxxi. 18, xxxiii. 18, &c.). Throughout the A. V. the word is, with only a very few exceptions, rendered as in the Vulgate and LXX.—**SYRIA**; a name which, it must be remembered, includes far more to our ears than did Aram to the Jews. [SYRIA.]

Its earliest occurrence in the book of Genesis is in the form of *Aram-naharain*, i. e. the "highland of or between the two rivers" (Gen. xxiv. 10, A. V. "Mesopotamia"), but in several succeeding chapters, and in other parts of the Pentateuch, the word is used without any addition, to designate a dweller in *Aram-naharain*—*Laban* or *Bethuel*—"the Aramite" (see Gen. xxv. 20, xxviii. 2, 5, xxxi. 20, 24; also Judg. xii. 10, compared with 8. Deut. xxvi. 5, compared with xxiii. 4, and Ps. lx. title). *Padan*, or accurately *Paddan*, *Aram* (פָּדָן אֲרָם "cultivated highland," from *paddah*, to plough, Ges. 1092; Stanley, 129, note) was another designation for the same region (Gen. xxv. 20, xxviii. 2; comp. Hos. xii. 12, where the word *Sadeh*, עֵדֶן, is, perhaps, equivalent to *Paddan*).

[**SADEH; PADAN ARAM.**] A tribe of Hittites (*Khatté*) bearing the name of *Pateui* is reported to have been met with in the inscriptions of Shalmaneser, B.C. 900-860. They then occupied the valley of the Orontes, and the country eastward as far as the watershed between that river and the Euphrates. The latest explorers do not hesitate to identify this name with *Padan-aram* and *Batanaca* or *Bashan* (Rawlinson's *Herodotus*, i. 463); but if this be correct, the conclusion of the identity of *Palau-aram* and *Mesopotamia* arrived at above from a comparison of the statements of Scripture, must be modified.

Later in the history we meet with a number of small nations or kingdoms forming parts of the general land of Aram:—1. *Aram-Zobah* (2 Sam. x. 6, 8), or simply *Zobah*, צוֹבָה (1 Sam. xiv. 47; 2 Sam. viii. 3; 1 Chr. xviii. xix.) [**ZOBAB**]. 2. *Aram beth-rehob* (2 Sam. x. 6), or *Rehob*, רְחוֹב (x. 8). [**REHOB.**] 3. *Aram-maachah* (1 Chr. xix. 6), or *Maachah only*, מַעֲכָה (2 Sam. x. 6). [**MAACHAH.**] 4. *Geshur*, "in Aram" (2 Sam. xv. 8), usually named in connexion with *Maachah* (Deut. iii. 14; Josh. xiii. 11, 13, &c.). [**GESHUR.**] 5. *Aram-Dammesek* (*Damascus*) (1 Sam. viii. 5, 6; 1 Chr. xviii. 5, 6). The whole of these petty states are spoken of collectively under the name of "Aram" (2 Sam. x. 13), but as *Damascus* increased in importance it gradually absorbed the smaller powers (1 K. xx. 1), and the name of *Aram* was at last applied to it alone (Is. vii. 8; also 1 K. xi. 25, xv. 18, &c.).

It is difficult to believe, from the narrative, that

\* The name *Aram* probably appears also in the Homeric names 'Αράμους (Il. ii. 783) and 'Ερεμβοί (Od. iv. 84). Comp. Strab. xvi. 785; Grote, *Hist. of Greece*, iii. 387.

at the time of David's struggles these "kingdoms" were anything more than petty tribes located round the skirts of the possessions of Gad and Manasseh. Some writers, however (Rosenmüller and Michaelis amongst others), have attempted to show that their territory extended as far as the Euphrates on the one hand and the Mediterranean (at Berytus) on the other, in which case it would have been considerably larger than Palestine itself. This, however, will be best examined under the separate heads, including, in addition to those already noticed, ISH-TOB and HAMATH.

According to the genealogical table in Gen. x., Aram was a son of Shem, and his brethren were Elam, Asshur, and Arphaxad. It will be observed that these names occur in regular order from the east, Aram closing the list on the borders of the "western sea."

In three passages Aram would seem to denote Assyria (2 K. xviii. 26; Is. xxxvi. 11; Jer. xxxv. 11).

In 2 K. xvi. 6, the Syrians are said to have come to Elath (on the Red Sea). The word rendered Syrians is אַרְמִיָּם, *Aromim*, which in the Keri is corrected to *Adomim*, Edomites.

In 2 Chr. xxii. 5, the name is presented in a shortened form as Ram, אֲרָם; comp. Job xxxii. 2.

2. Another Aram is named in Gen. xli. 21, as a son of Kemuel, and descendant of Nahor. From its mention with Uz and Buz it is probably identical with the tribe of Ram, to the "kindred" of which belonged "Elihu, the son of Barachel the Buzite," who was visiting Job in the land of Uz (Job xxxii. 2). It is also worthy of notice that, among the other descendants of Nahor are named Tebach (comp. Tibhath, 1 Chr. xiv. 18), and Muzah; so that the tribe was possibly one of the smaller divisions of Aram described above. [G.]

ARAMITESS (אַרְמִיָּת); i. e. a female inhabitant of Aram (1 Chr. vii. 14). In other passages of the A. V. the ethnic of Aram is rendered Syrian.

AR'AN (אֲרָן; Sam. אֲרָן; *Apd*; *Aran, Aram*), name of a Horite (Gen. xxxvi. 28; 1 Chr. i. 42).

AR'ARAT (אַרְרָט; *Apapdr*; *Ararat*), a mountainous district of Asia mentioned in the Bible in connexion with the following events:—(1.) As the resting-place of the ark after the Deluge (Gen. viii. 4, "upon the mountains of Ararat," A. V.; *super montes Armeniac*, Vulg.); (2.) as the asylum of the sons of Sennacherib (2 K. xix. 37; Is. xxxvii. 38; the LXX. have *els Apperlar* in the latter, and the Vulg. *in terram Armeniorum* in the former passage; A. V. has in both "the land of Armenia"); (3.) as the ally, and probably the neighbour, of Minni and Ashchenaz (Jer. ii. 27). [ARMENIA.] In Gen. xi. 2 we have apparently an indication of its position as eastward of Mesopotamia (מִן־קֶדֶם, "from the east," A. V.), whence Bohlen (*Introd. to Gen.* ii. 139) identifies Ararat with *Aryavarta*, the "holy land" in the north of Hindostan: but the Hebrew is more correctly translated in the margin, as also in Gen. xiii. 11, *eastward* (Gesen. *Thezanus*, p. 805), the writer, as it would seem, describing the position of Mesopotamia in reference to his own country, rather than to Ararat.

The name Ararat was unknown to the geographers of Greece and Rome, as it still is to the Armenians of the present day: but that it was an indigenous and an ancient name for a portion of Armenia,

appears from the statement of Moses of Chorene, who gives Araratia as the designation of the central province, and connects the name with an historical event reputed to have occurred B.C. 1750 (*Hist. Armen.* Whiston, p. 361). Jerome identified it with the plain of the Araxes: it would, however, be more correct to consider the name in its Biblical sense as descriptive generally of the Armenian highlands—the lofty plateau which overlooks the plain of the Araxes on the N., and of Mesopotamia on the S. We shall presently notice the characteristics of this remarkable region, which adapted it to become the cradle of the human race and the central spot whence, after the Deluge, the nations were to radiate to different quarters of the world. It is, however, first necessary to notice briefly the opinions put forth as to the spot where the ark rested, as described in Gen. viii. 4, although all such speculations, from the indefiniteness of the account, cannot lead to any certain result. Berosus the Chaldaean, contemporary with Alexander the Great, fixes the spot on the mountains of *Kurdistan* (πρὸς τὰ ὄρη τῶν Κορδωανῶν, Joseph. *Ant.* i. 3, §6), which form the southern frontier of Armenia. His opinion is followed by the Syriac and Chaldaic versions, which give אֲרָרַט as the equivalent for Ararat in Gen. viii. 4, and in a later age by the Koran. Tradition still points to the *Jebel Judi* as the scene of the event, and maintains the belief, as stated by Berosus, that fragments of the ark exist on its summit. The selection of this range was natural to an inhabitant of the Mesopotamian plain; for it presents an apparently insurmountable barrier on that side, hemming in the valley of the Tigris with abrupt declivities so closely that only during the summer months is any passage afforded between the mountain and river (Ainsworth's *Trevels in track of the Ten Thousand*, p. 154). Josephus also quotes Nicolaus Damascenus to the effect that a mountain named Basis, beyond Minyas, was the spot. This has been identified with *Varaz*, a mountain mentioned by St. Matth. (*Mén. sur l'Arménie*, i. 265) as rising to the N. of *Lake Van*: but the only important mountain in the position indicated is described by recent travellers under the name *Serhan Tugh*, and we are therefore inclined to accept the emendation of Schroeder, who proposes to read *Mdavis*, the indigenous name of *Mount Ararat*, for *Bápis*. That the scene of an event so deeply interesting to mankind had even at that early age been transferred, as was natural, to the loftiest and most imposing mountain in the district, appears from the statement of Josephus (*Ant.* i. 3, §5) that the spot, where Noah left the ark, had received a name descriptive of that event, which he renders *Αροβαρθηρον*, and which seems identical with *Nachdževan*, on the banks of the Araxes. To this neighbourhood all the associations connected with Noah are now assigned by the native Armenians, and their opinion has been so far indorsed by Europeans that they have given the name Ararat exclusively to the mountain which is called *Masis* by the Armenians, *Agri-Dagh*, i. e. *Steep Mountain*, by the Turks, and *Kuh-i-Nuh*, i. e. *Noah's Mountain*, by the Persians. It rises immediately out of the plain of the Araxes, and terminates in two conical peaks, named the Great and Less Ararat, about seven miles distant from each other, the former of which attains an elevation of 17,260 feet above the level of the sea and about 14,000 above the plain of the Araxes, while the latter is lower by 4000 feet. The summit of the higher is covered

with eternal snow for about 3000 feet of perpendicular height. That it is of volcanic origin, is evidenced by the immense masses of lava, cinders, and porphyry with which the middle region is covered: a deep cleft on its northern side has been regarded as the site of its crater, and this cleft was the scene of a terrible catastrophe which occurred July 2, 1840, when the village of *Arguri* and the *Monastery of St. James* were buried beneath the *débris* brought down from the upper heights by a violent earthquake. Clouds of reddish smoke and a strong smell of sulphur, which pervaded the neighbourhood after the earthquake, seem to indicate that the volcanic powers of the mountain are not altogether dormant. The summit of Ararat was long deemed inaccessible, and the Armenians still cling to this belief. It was first ascended in 1829 by Parrot, who approached it from the N.W.: he describes a secondary summit about 400 yards distant from the highest point, and on the gentle depression which connects the two eminences he surmises that the ark rested (*Journey to Ararat*, p. 179). The region immediately below the limits of perpetual snow is barren and unvisited by beast or bird. Wagner (*Reise*, p. 185) describes the silence and solitude that reign there as quite overpowering. *Arguri*, the only village known to have been built on its slopes, was the spot where, according to tradition, Noah planted his vineyard. Lower down, in the plain of Araxes, is *Nachdjevan*, where the patriarch is reputed to have been buried.

Returning to the broader signification we have assigned to the term "the mountains of Ararat," as co-extensive with the Armenian plateau from the base of *Ararat* in the N. to the range of *Kurdistan* in the S., we notice the following characteristics of that region as illustrating the Bible narrative:—(1.) *Its elevation.* It rises as a rocky island out of a sea of plain to a height of from 6000 to 7000 feet above the level of the sea, presenting a surface of extensive plains, whence, as from a fresh base, spring important and lofty mountain-ranges, having a generally parallel direction from E. to W., and connected with each other by transverse ridges of moderate height. (2.) *Its geographical position.* The Armenian plateau stands equidistant from the Euxine and the Caspian seas on the N., and between the Persian Gulf and the Mediterranean on the S. With the first it is connected by the *Acapais*, with the second by the *Araxes*, with the third by the *Tigris* and *Euphrates*, the latter of which also serves as an outlet towards the countries on the Mediterranean coast. These seas were the high roads of primitive colonization, and the plains watered by these rivers were the seats of the most powerful nations of antiquity, the *Assyrians*, the *Babylonians*, the *Medes*, and the *Colchians*. Viewed with reference to the dispersion of the nations, Armenia is the true *ὀμφαλὸς* of the world: and it is a significant fact that at the present day Ararat is the great boundary-stone between the empires of *Russia*, *Turkey*, and *Persia*. (3.) *Its physical formation.* The Armenian plateau is the result of volcanic agencies: the plains as well as the mountains supply evidence of this. Armenia, however, differs materially from other regions of similar geological formation, as, for instance, the neighbouring range of *Caucasus*, inasmuch as it does not rise to a sharp, well-defined central crest, but expands into plains or steppes, separated by a graduated series of subordinate ranges. Wagner (*Reise*, p. 263) attributes this peculiarity to the longer period

during which the volcanic powers were at work, and the room afforded for the expansion of the molten masses into the surrounding districts. The result of this expansion is that Armenia is far more accessible, both from without, and within its own limits, than other districts of similar elevation: the passes, though high, are comparatively easy, and there is no district which is shut out from communication with its neighbours. The fall of the ground in the centre of the plateau is not decided in any direction, as is demonstrated by the early courses of the rivers—the *Araxes*, which flows into the *Caspian*, rising westward of either branch of the *Euphrates*, and taking at first a northerly direction—the *Euphrates*, which flows to the S., rising northward of the *Araxes*, and taking a westerly direction. (4.) The climate is severe. Winter lasts from October to May, and is succeeded by a brief spring and a summer of intense heat. The contrast between the plateau and the adjacent countries is striking: in April, when the *Mesopotamian* plains are scorched with heat, and on the *Euxine* shore the *azalea* and *rhododendron* are in bloom, the *Armenian* plains are still covered with snow; and in the early part of September it freezes keenly at night. (5.) The vegetation is more varied and productive than the climate would lead us to expect. Trees are not found on the plateau itself, but grass grows luxuriantly, and furnishes abundant pasture during the summer months to the flocks of the nomad Kurds. Wheat and barley ripen at far higher altitudes than on the Alps and the Pyrenees: the volcanic nature of the soil, the abundance of water, and the extreme heat of the short summer bring the harvest to maturity with wonderful speed. At *Erz-rüm*, more than 6000 feet above the sea, the crops appear above ground in the middle of June, and are ready for the sickle before the end of August (Wagner, p. 255). The vine ripens at about 5000 feet, while in Europe its limit, even south of the Alps, is about 2650 feet.

The general result of these observations as bearing upon the Biblical narrative would be to show that, while the elevation of the Armenian plateau constituted it the natural resting-place of the ark after the Deluge, its geographical position and its physical character secured an impartial distribution of the families of mankind to the various quarters of the world. The climate furnished a powerful inducement to seek the more tempting regions on all sides of it. At the same time the character of the vegetation was remarkably adapted to the nomad state in which we may conceive the early generations of Noah's descendants to have lived. [W. L. B.]

**ARAUNAH** (אַרְאֻנָּה; *Opd*; *Arcuna*), a Jebusite who sold his threshing-floor on Mount *Moriah* to David as a site for an altar to Jehovah, together with his oxen, for 50 shekels of silver (2 Sam. xxiv. 18-24), or (according to 1 Chr. xxi. 25) for 600 shekels of gold by weight. From the expression (2 Sam. xxiv. 23) "these things did Araunah, the king, give unto the king," it has been inferred that he was one of the royal race of the Jebusites. His name is variously written in various places: אַרְאֻנָּה (2 Sam. xxiv. 16); אֲרֻנָּה (xiv. 18); אֲרֻנָּה (1 Chr. xxi.; 2 Chr. iii.). [ORNAN.] [R. W. B.]

**AR'BA** (אַרְבַּע, *hero of Baal*, so Fürst, for אֲרִיֵּבֶל, like אֲרִיֵּאֵל; *Apbák*: *Arbe*), the progenitor

of the ANAKIM, or sons of Anak, from whom their chief city HEBION received its name of Kirjath Arba (Josh. xiv. 15, xv. 13, xxi. 11). [F. W. G.]

### ARBATHITE, THE (Ἀρβαῖτις; ὁ Γαραβαῖθ);

*Arbathites*, i. e. a native of the Arabah or Ghor. Abilbon the A. was one of David's 30 mighty men (2 Sam. xxiii. 31; 1 Chr. xi. 32).

ARBAT'TIS (ἐν Ἀρβάττοις, Alex. Ἀρβάκ-τοις; *Arbatis*), a district of Palestine named in 1 Macc. v. 23 only. Ewald's conjecture (*Geschichte*, iv. 359 *note*) grounded on the reading of the Peschito Syriac (ܐܪܒܬܝܬ), *Arb Bot*) is that the district N. of the sea of Galilee, part of which is still called *Arb el-Batûth*, is here intended. But it seems at least equally probable that the word is merely a corruption of Ἀκραβατίνη, the province or toparchy which lay between Neapolis and Jericho (Reiland, 192; Joseph. *B. J.* iii. 3, §§4, 5, &c.). [ACRABATENE.] [G.]

ARBE'LA (ἐν Ἀρβήλαις; in *Arbellis*), mentioned in the Bible only in 1 Macc. ix. 2, and there only as defining the situation of Masuloth, a place besieged and taken by Bacchides and Alcimus at the opening of the campaign in which Judas Maccabæus was killed. According to Josephus (*Ant.* xii. 11, §1) this was at Arbela of Galilee, ἐν Ἀρβήλαις πόλει τῆς Γαλιλαίας, a place which he elsewhere states to be near Sephoris, on the lake of Gennesareth, and remarkable for certain impregnable caves, the resort of robbers and insurgents, and the scene of more than one desperate encounter (comp. *Ant.* xiv. 15, §§4, 5; *B. J.* i. 16, §§2, 3; ii. 20, §6; *Vita*, §37). These topographical requirements are fully met by the existing *Irbid*,<sup>a</sup> a site with a few ruins, west of Medjeh, on the south-west side of the Wady Hamâm, in a small plain at the foot<sup>b</sup> of the hill of *Kurîn Hattîn*. The caverns are in the opposite face of the ravine, and bear the name of *Kula'at Ibn Mûran* (Rob. ii. 398; Burckh. 331; Irby, 91).

There seems no reason to doubt the soundness of this identification.<sup>c</sup> The army of Bacchides was on its road from Antioch to the land of Judæa (γῆν Ἰουδα), which they were approaching "by the way that leadeth to Galgala" (Gilgal),<sup>d</sup> that is by the valley of the Jordan in the direct line to which *Irbid* lies.<sup>e</sup> Ewald, however (*Geschichte*, iv. 370, *note*), insists, in opposition to Josephus, that the engagements of this campaign were confined to Judæa proper, a theory which drives him to consider "Galgala" as the *Jisjûlia* north of Gophna. [GILGAL.] But he admits that no trace of an Arbela in that direction has yet come to light.

Arbela may be the Beth-arbel of Hos. x. 14, but there is nothing to ensure it. [G.]

### ARBI'TE, THE (Ἀρβίτη; *de Arbi*). Paarmi

<sup>a</sup> The Arbela of Alexander the Great is called *Irbil* by the Arabic historians (Rob. ii. 399). The change of *l* to *d* is not infrequent. Moreover, the present *Irbid* is undoubtedly mentioned in the Talmuds as Arbel (see Schwarz, 189; Reiland, 358; Rob. iii. 343, *note*).

<sup>b</sup> So Irby (91). Robinson, on the contrary, says that the ruins are on the brow overlooking the chasm of the wady.

<sup>c</sup> First suggested in the *Münich Gel. Anzeige*, Nov. 1836, and eagerly laid hold of by Robinson.

<sup>d</sup> Some MSS. and the important version of the Syriac Peschito read "Gilead;" in which case the

the Arbite was one of David's guard (2 Sam. xxiii. 35). The word, according to Gesenius (145), signifies a native of ARAB. In the parallel list of Chronicles it is given as Ben-Ezbai, by a change in letters not infrequently occurring. [ΕΖΒΑΙ.] The LXX. version, *Ὀύραισερχί*, is very corrupt. (See Kennicott, *Dissert.* on 2 Sam. xxiii. p. 210.) [G.]

### ARIBONA'I (Jud. ii. 24). [ABRONAS.]

ARCHELA'US (Ἀρχελαός; *Archelaus*: in the Talmud, ארכילא), son of Herod the Great, by a Samaitan woman, Malthaké (Joseph. *Ant.* xvii. 1, §3; *B. J.* i. 28, §4), and, with his brother Antipas, brought up at Rome (id. *B. J.* i. 31, §1). At the death of Herod (B.C. 4)† his kingdom was divided between his three sons, Herod Antipas, Archelaus, and Philip. Archelaus received the half, containing Idumæa, Judæa, Samaria, and the cities on the coast, with 600 talents' income (Joseph. *Ant.* xvii. 11, §4). With one party among the Jews he was popular: another complained against him, but in vain, to Augustus (id. *Ant.* xvii. 11, 1). He never properly had the title of king (Βασιλεύς) assigned to him (Matt. ii. 22), but only that of *ἐθνάρχης* (ibid.); so that the former word must be taken as loosely used. In the 10th year of his reign (Joseph. *Ant.* xvii. 13, §2, *Vit.* 1), or the 9th (*B. J.* ii. 7, §3), according to Dion Cass. (xv. 27) in the consulship of M. Aemilius Lepidus and L. Arrius, i. e. A.D. 6, a complaint was preferred by his brothers and his subjects against him on the ground of his tyranny, in consequence of which he was deposed, and banished to Vienna in Gaul (Joseph. *Ant.* xvii. 13, §2; *B. J.* ii. 7, §3), where he is generally said to have died. But Jerome (*Onomast.* s. v. *Bethlehem*) relates that he was shown the sepulchre of Archelaus near that town. If so, he must have returned as a private man to Judæa, and there have died. The parents of our Lord turned aside from fear of him on their way back from Egypt, and went to Nazareth in Galilee, in the domain of his gentler brother Antipas. He seems to have been guilty of great cruelty and oppression. Josephus relates (*Ant.* xvii. 9, §3; *B. J.* ii. 1, 3) that he put to death 3000 Jews in the temple not long after his accession. This cruelty was exercised not only towards Jews, but towards Samaritans also (Joseph. *B. J.* ii. 7, §3). Archelaus wedded illegally (τοῦ πατρὸς παραβάσιν ποιησάμενος, *Ant.* xvii. 13, §2) Glaphyra, the former wife of his brother Alexander, who had had children by her. (There is no reason for saying with Wiener that Archelaus had children by her: he has apparently mistaken Josephus's ἐξ οὗ καὶ τέκνα ἦν αὐτῇ, where οὗ refers to Alexander, not to Archelaus.) [H. A.]

### ARCHERY. [ARMS.]

### AR'CHEVITES (Ἀρχεῖται; Ἀρχαῖοι; *Er-*

Arbela beyond Jordan must be thought of. But it is hardly likely that Josephus would be inaccurate in his topography, at a part of the country which he knew so thoroughly.

<sup>†</sup> The importance of the Wady Hamâm in a military point of view, as commanding the great north road, the Sea of Galilee, and the important springs in the plain of Gennesareth, is not lost sight of by Wilson (*Lands of the Bible*, in Hitter, *Jordan*, 328).

<sup>‡</sup> The death of Herod took place in the same year with the birth of Christ; but this is to be placed four years before the date in general use as the Christian era.

*chusai*, Vulg.), perhaps the inhabitants of ERECH, some of whom had been placed as colonists in Samaria (Ezr. iv. 9).

[W. L. B.]

AR'CHI (אַרְכִי; *Archi*), Josh. xvi. 2. [ARCHITE.]

ARCHIP'PUS (Ἀρχιππος; a Christian teacher in Colossae, called by St. Paul his *συνσπαραίωτης* (Philem. 2). As the epistle, which concerns a private matter, is addressed to him jointly with Philemon and Apphia, and as "the church in their house" is also addressed, it seems necessary to infer that he was a member of Philemon's family. He had received (Col. iv. 17) a *διακονία* in the Lord, and was admonished to take heed to it, that he fulfil it. Jerome, Theodoret, and Occumenius, suppose him to have been overseer of the church at Colossae. Others believe him to have been a teacher at Laodicea (*Const. Apostol.* vii. 46; Theodoret *ad Col.* iv. 17; and recently Wieseler, *Chronol. des apostolischen Zeitalters*, p. 452); but there does not seem to be any ground for the view. There is a legend that he was of the number of the Seventy disciples, and suffered martyrdom at Choune, near Laodicea (*Menolog. Græc.* i. 246). There is a monograph written about him by Dietelmair, *De Archippo*, Altorf, 1751. 4to. [H. A.]

ARCHITE. THE (אַרְכִי, as if from a place named Erech, אֶרֶךְ; δ' *Araxi*; *Arachites*), the usual designation of David's friend Hushai (2 Sam. xv. 32; xvii. 5, 14; 1 Chr. xvii. 33).

The word also appears (somewhat disguised, it is true, in the A. V.) in Josh. xvi. 2, where "the borders of Archi" (i. e. 'the Archite')\* are named as on the boundary of the "children of Joseph," somewhere in the neighbourhood of Bethel. No town of the name of אֶרֶךְ appears in Palestine: is it possible that, as in the case of the Gerizi, the Zemarites and the Jebusites, we have here the last faint trace of one of the original tribes of the country? [G.]

ARCHITECTURE. Although there are many notices, both in the Canonical Scriptures and in the Apocryphal writings, bearing reference to the architecture of other nations besides the Israelites, it is nevertheless obvious that the chief business of a work like the present, under the article of Architecture, is to examine the modes of building in use among the Jews, and to discover, if possible, how far they were influenced, directly or indirectly, by the example or the authority of foreigners. The book of Genesis (iv. 17, 20, 22) appears to divide mankind into great characteristic sections, viz. the "dwellers in tents" and the "dwellers in cities," when it tells us that Cain was the founder of a city; and that among his descendants one, Jabal, was "the father of them that dwell in tents," whilst Tubal-cain was "the instructor of every artificer in brass and iron." It is probable that the workers in metal were for the most part dwellers in towns: and thus the arts of architecture and metallurgy became from the earliest times leading characteristics of the civilized as distinguished from the nomadic tendencies of the human race.

To the race of Shem is attributed (Gen. x. 11, 12, 22, xi. 2-9) the foundation of those cities in the plain of Shinar, Babylon, Nineveh, and others; to

\* Compare Josh. xviii. 16, where "Jebusi" should be translated "the Jebusite," as it has been in xv. 8. See also GERIZIM; ZEMARAIM.

one of which, Resen, the epithet "great" sufficiently marks its importance in the time of the writer, a period at least as early as the 13th cent. B.C., if not very much earlier. (Rawlinson, *Outline of Ass. Hist.* p. 10; Layard, *Nineveh*, ii. 221, 235, 238.) From the same book we learn the account of the earliest recorded building, and of the materials employed in its construction (Gen. xi. 3, 9); and though a doubt rests on the precise site of the tower of Belus, so long identified with the Birs Nimroud (Benjamin of Tudela, p. 100, Bohn; Newton, *On Prop.* x. pp. 155, 156; Vaux, *Nin. and Pers.* pp. 173, 178; Keith, *On Prop.* p. 289), yet the nature of the soil, and the bricks found there in such abundance, though bearing mostly the name of Nebuchadnezzar, agree perfectly with the supposition of a city previously existing on the same or a closely neighbouring site. (Layard, ii. 249, 278, and *Nin. and Bab.* 531; Plin. vii. 56; Ez. iv. 1.)

In the book of Esther (i. 2) mention is made of the palace at Susa, for three months in the spring the residence of the kings of Persia (Esth. iii. 13; Xen. *Cyrop.* viii. 6, § 22); and in the books of Tobit and Judith, of Ecbatana, to which they retired for two months during the heat of summer. (Tob. iii. 7, xiv. 14; Jud. i. 12; Herod. i. 98.)

A branch of the same Syro-Arabian race as the Assyrians, but the children of Ham, was the nation, or at least the dominant caste, of the Egyptians, the style of whose architecture agrees so remarkably with the Assyrian (Layard, ii. 206, et seq.). It is in connexion with Egypt that the Israelites appear first as builders of cities, compelled, in common with other Egyptian captives, to labour at the buildings of the Egyptian monarchs. Pithom and Raames are said to have been built by them. (Ex. i. 11; Wilkinson, ii. 195.)

The Israelites were by occupation shepherds, and by habit dwellers in tents (Gen. xlvii. 3). The "house" built by Jacob at Succoth is probably no exception to this statement (יָבַע, Gesen.). They had therefore originally, speaking properly, no architecture. Even Hebron, a city of higher antiquity than the Egyptian Zoan (Tanis), was called originally from its founder, perhaps a Canaanite of the race of Anak, Kirjath-Arba, the house of Arba (Num. xiii. 22; Josh. xiv. 15). From the time of the occupation of Canaan they became dwellers in towns and in houses of stone, for which the native limestone of Palestine supplied a ready material (Lev. xiv. 34, 45; 1 K. vii. 10; Stanley, *S. and P.* 146, 8); but the towns which they occupied were not all, nor indeed in most cases, built from the first by themselves (Deut. vi. 10; Num. xiii. 19).

The peaceful reign and vast wealth of Solomon gave great impulse to architecture; for besides the Temple and his other great works at and near Jerusalem, he built fortresses and cities in various places, among which the names and sites of Baalath and Tadmor are in all probability represented by the more modern superstructures of Baalbec and Palmyra (1 K. ix. 15, 24). Among the succeeding kings of Israel and of Judah, more than one is recorded as a builder: Asa (1 K. xv. 23), Baasha (xvi. 17), Omri (xvi. 24), Ahab (xvi. 34, xxii. 39), Hezekiah (2 K. xx. 20; 2 Chr. xxxii. 27, 30), Jehoshaphat, and Josiah (2 K. xii. 11, 12, xxii. 6); and, lastly, Jehoiaquin, whose winter palace is mentioned (Jer. xxii. 14, xxxvi. 22; see also Am. iii. 15).

On the return from captivity, the chief care of the rulers was to rebuild the Temple and the walls of Jerusalem in a substantial manner, with stone,

and with timber from Lebanon (Ezr. iii. 8, v. 8; Neh. ii. 8, iii. 1, 32). During the government of Simon Maccabees, the fortress called Baris, and afterwards Antonia, was erected for the defence of the Temple and the city. But the reigns of Herod and of his sons and successors were especially remarkable for the great architectural works in which they delighted. Not only was the Temple restored to a large portion if not to the full degree of its former magnificence, but the fortifications and other public buildings of Jerusalem were enlarged and embellished to an extent previously unknown (Luke xxi. 5; Benj. of Tudela, p. 83, Bohn). [More particular descriptions of these works will be found under JERUSALEM.] Besides these great works, the town of Caesarea was built on the site of an insignificant building called Strato's Tower; Samaria was enlarged, and received the name of Sebaste; the town of Agrippium was built; and Herod carried his love for architecture so far as to adorn with buildings cities even not within his own dominions, Berytus, Damascus, Tripolis, and many other places (Joseph. B. J. i. 21, 1, 11). His son Philip the tetrarch enlarged the old Greek colony of Paneas, giving it the name of Caesarea in honour of Tiberius; whilst his brother Antipas founded the city of Tiberias, and adorned the towns of Sepphoris and Betharamphtha, giving to the latter the name Livias, in honour of the mother of Tiberius (Reland, p. 497).

Of the original splendour of these great works no doubt can be entertained; but of their style and appearance we can only conjecture, though with nearly absolute certainty, that they were formed on Greek and Roman models. Of the style of the earlier buildings of Palestine, we can only form an idea from the analogy of the Egyptian, Assyrian, and Persian monuments now existing, and from the modes of building still adopted in Eastern countries. The connexion of Solomon with Egypt and with Tyre, and the influence of the Captivity, may have in some measure successively affected the style both of the two temples, and of the palatial edifices of Solomon. The enormous stones employed in the Assyrian, Persepolitan, and Egyptian buildings, find a parallel in the substructions of Bealbec, more ancient than the superstructure (Layard, ii. 317, 318), and in the stones of so vast a size which still remain at Jerusalem, relics of the building either of Solomon, or of Herod (Williams, pt. ii. 1). But as it has been observed again and again, scarcely any connected monuments are known to survive in Palestine by which we can form an accurate idea of its buildings, beautiful and renowned as they were throughout the East (Plin. v. 14; Stanley, 183), and even of those which do remain no trustworthy examination has yet been made. It is probable, however, that the reservoirs known under the names of the Pools of Solomon and Hezekiah contain some portions at least of the original fabrics (Stanley, 103, 165).

The domestic architecture of the Jews, so far as it can be understood, is treated under HOUSE. Tools and instruments of building are mentioned by the sacred writers; the plumb-line, Am. vii. 7; the measuring-reel, Ez. xl. 3; the saw, 1 K. vii. 9.

[H. W. P.]

ARD (אַרְדּ; 'Ardā, 'Aḏāp; *Ard, Hered*).

1. Son of Benjamin (Gen. xli. 21). 2. Son of Bela, and grandson of Benjamin (Num. xxvi. 40), written Adlar in 1 Chr. viii. 3. His descendants are called THE ARDITES (אַרְדִּיָּתִי), Num. xxvi. 40.

AR'DATH — "the field called Ardath" — 2 Esdr. ix. 26.

AR'DON (אַרְדּוֹן; 'Ardōn; *Ardon*), name of a man (1 Chr. ii. 18).

ARELI (אַרְעִלִי, Sam. אֲרִיֵּל; *Arēlā; Arelī*), a son of Gad (Gen. xlii. 16; Num. xxvi. 17). His descendants are called THE ARELITES (Num. xxvi. 17).

AREOPAGUS or MARS' HILL (ὁ Ἀρείος πάγος, i. e. the hill of Ares or Mars; *Areopagus*, Vulg.), was a rocky height in Athens, opposite the western end of the Acropolis, from which it is separated only by an elevated valley. It rises gradually from the northern end, and terminates abruptly on the south, over against the Acropolis, at which point it is about fifty or sixty feet above the valley already mentioned. Of the site of the Areopagus, there can be no doubt, both from the description of Pausanias, and from the narrative of Herodotus, who relates that it was a height over against the Acropolis, from which the Persians assailed the latter rock (Paus. i. 28. §5; Herod. viii. 52). According to tradition it was called the hill of Mars (Ares), because this god was brought to trial here before the assembled gods by Neptune (Poseidon), on account of his murdering Halirrhothius, the son of the latter. The spot is memorable, as the place of meeting of the Council of Areopagus (ἡ ἐν Ἀρείῳ πάγῳ βουλή), frequently called the Upper Council (ἡ ἄνω βουλή) to distinguish it from the Council of Five Hundred, which held its sittings in the valley below the hill. It existed as a criminal tribunal before the time of Solon, and was the most ancient and venerable of all the Athenian courts. It consisted of all persons who had held the office of Archon, and who were members of it for life, unless expelled for misconduct. It enjoyed a high reputation, not only in Athens, but throughout Greece. Before the time of Solon the court tried only cases of wilful murder, wounding, poison, and arson; but he gave it extensive powers of a censorial and political nature. The Council is mentioned by Cicero (*ad Fam.* viii. 1; *ad Att.* i. 14, v. 11), and continued to exist even under the Roman emperors. Its meetings were held on the south-eastern summit of the rock. There are still sixteen stone steps cut in the rock, leading up to the hill from the valley of the Agora below; and immediately above the steps is a bench of stones excavated in the rock, forming three sides of a quadrangle, and facing the south. Here the Areopagites sat as judges in the open air (ὁπαλοῖται ἐδιδάκτορο, Pollux, viii. 118). On the eastern and western side is a raised block. These blocks are probably the two rude stones which Pausanias saw there, and which are described by Euripides as assigned, the one to the accuser, the other to the criminal, in the causes which were tried in the court (*Iph. T.* 961). The Areopagus possesses peculiar interest to the Christian, as the spot from which St. Paul delivered his memorable address to the men of Athens (Acts xvii. 22-31). It has been supposed by some commentators that St. Paul was brought before the Council of Areopagus; but there is no trace in the narrative of any judicial proceedings. St. Paul "disputed daily" in the "market" or Agora (xvii. 17), which was situated south of the Areopagus in the valley lying between this hill and those of the Acropolis, the Pnyx and the Museum. Attracting more and

more attention, "certain philosophers of the Epicureans and Stoicks" brought him up from the valley, probably by the stone steps already mentioned, to the Areopagus above, that they might listen to him more conveniently. Here the philosophers probably took their seats on the stone benches usually occupied by the members of the Council, while the multitude stood upon the steps and in the valley below. (For details, see *Dict. of Ant.* p. 126; *Dict. of Geogr.* i. p. 281.)

**ARETAS** (*Ἀρέτας*, *Ἀπέτης*; Arab. *Chorash*), a common appellation of many of the Arabian kings or chiefs. Two are mentioned in the Bible.

1. A contemporary of Antiochus Epiphanes (n.c. 170) and Jason (2 Macc. v. 8). [B. F. W.]

2. In 2 Cor. xi. 32, St. Paul writes, *ἐν Δαμασκῷ ὁ ἐπὶ ἀρχῆς Ἀρέτα τοῦ βασιλέως ἐφρουρεῖ τὴν πόλιν Δαμασκηνῶν πιδῶσαί με*. This Aretas was father-in-law of Herod Antipas. [HEROD.] There is a somewhat difficult chronological question respecting the subordination of Damascus to this Aretas. The city under Augustus and Tiberius was attached to the province of Syria; and we have Damascene coins of both these emperors, and again of Nero and his successors. But we have none of Caligula and Claudius, and the following circumstances make it probable that a change in the rulership of Damascus took place after the death of Tiberius. There had been war for some time between Aretas, king of Arabia Nabatea, whose capital was Petra, and Antipas, on account of the divorce by Antipas of Aretas's daughter at the instance of Herodias, and also on account of some frontier disputes. A battle was fought, and the army of Antipas entirely destroyed (Joseph. *Ant.* xviii. 5, §1). On this, being a favourite with Tiberius, he sent to Rome for help; and Vitellius, governor of Syria, was commissioned to march against Aretas, and to take him dead or alive. While he was on his march (*Ant.* xviii. 5, §1) he heard at Jerusalem of the death of Tiberius (March 16, A.D. 37), and, *πόλεμον ἐκφέρειν οὐκέτ' ὁμοίως δυνάμενος διὰ τὸ εἰς Γάϊον μεταπεπρωκέναι τὰ πράγματα*, abandoned his march, and sent his army into winter-quarters, himself remaining at Antioch. By this change of affairs at Rome a complete reversal took place in the situation of Antipas and his enemy. The former was ere long (A.D. 39) banished to Lyons, and his kingdom given to Agrippa, his foe (*Ant.* xviii. 7), who had been living in habits of intimacy with the new emperor (*Ant.* xviii. 6, §5). It would be natural that Aretas, who had been grossly injured by Antipas, should, by this change of affairs, be received into favour; and the more so, as Vitellius had an old grudge against Antipas, of which Josephus says, *Ant.* xviii. 4, §5, *ἐκρυπτεν ὀργήν, μέχρι δὲ καὶ μετῴθε, Γαῖον τὴν ἀρχὴν παρεμβόλος*. Now in the year 38 Caligula made several changes in the East, granting Ituraea to Soemus, Lesser Armenia and parts of Arabia to Cotys, the territory of Cotys to Rhemetaces, and to Polemon, son of Polemon, his father's government. These facts, coupled with that of no Damascene coins of Caligula or Claudius existing, make it probable that about this time Damascus, which belonged to the predecessor of Aretas (*Ant.* xiii. 5, §2), was granted to him by Caligula. Thus the difficulty would vanish. The other hypotheses, that the ethnarch was only visiting the city (as if he could then have guarded the walls to prevent escape),—that Aretas had seized Damascus on Vitellius giving up the expedition against him (as if a

Roman governor of a province would allow one of its chief cities to be taken from him, merely because he was in uncertainty about the policy of a new emperor), are very improbable. Wieseler, *Chron. des apostolischen Zeitalters*, p. 174, and again in his art. in Herzog's *Encyclopädie*, refers to a coin *βασιλέως Ἀρέτα φιλέλληνας*, but it seems to belong to an earlier Aretas. See Conyb. and Howson, *Life of St. Paul*, ed. 2, vol. i. p. 132, note. See Wieseler, pp. 142 ff., 167 ff., whose view has been adopted in this article; Anger, *de Temporum in Actis Ap. ratione*, p. 173 ff., and Conyb. and Howson, vol. i. p. 99 ff. end. [H. A.]

**AREUS**, a king of the Lacedaemonians, whose letter to the high priest Onias is given in 1 Macc. xii. 20, seq. He is called *Areus* in the A. V. in ver. 20 and in the margin of ver. 7; but in the Greek text he is named *Ὀνιάδης* in ver. 20, and *Δαρείος* in ver. 7: there can be little doubt however that these are corruptions of *Areus*. In Josephus (*Ant.* xii. 4, §10, v. §8) the name is written *Ἀρείος*, and in the Vulgate *Arūs*. There were two Spartan kings of the name of Areus, of whom the first reigned B.C. 309-265, and the second, the grandson of the former, died when a child of eight years old in B.C. 257. There were three high priests of the name of Onias, of whom the first held the office B.C. 323-300. This is the one who must have written the letter to Areus I., probably in some interval between 309 and 300. (Grimm, *zu Macc.* p. 185.) [ONIAS.]

**AR'GOB** (אַרְגֹּב, once with the def. article אֶרְצָאֲרֹגֹב = "the stony," from אָרַג, Ges. *Thes.* 1260; *Ἀργόβ*, *Argob*), a tract of country on the east of the Jordan, in Bashan, in the kingdom of Og, containing 60 "great" and fortified "cities" (עָרִים). Argob was in the portion allotted to the half-tribe of Manasseh, and was taken possession of by Jair, a chief man in that tribe. [JAIR; BASIAN; HAVOTH-JAIR.] It afterwards formed one of Solomon's commissariat districts, under the charge of an officer whose residence was at Ramoth-Gilead (Deut. iii. 4, 13, 14; 1 K. iv. 13). In later times Argob was called Trachonitis, apparently a mere translation of the older name. [TRACHONITIS.] In the Samaritan version it is rendered רִיגֹבָנָה (*Rigobanah*); but in the Targums of Onkelos and Jonathan it is טַרְכוֹנִיָּה (i. e. Trachonitis). Later on we trace it in the Arabic version of Saadiah as مَوْجِب (*Mujeb*, with the same meaning); and it is now apparently identified with the *Lejah*, اللَّجَاة, a very remarkable district

south of Damascus, and east of the Sea of Galilee, which has been visited and described by Burckhardt (111-119), Seetzen, and Porter (vol. ii. specially 240-245). This extraordinary region—about 22 miles from N. to S. by 14 from W. to E. and of a regular, almost oval, shape—has been described as an ocean of basaltic rocks and boulders, tossed about in the wildest confusion, and intermingled with fissures and crevices in every direction. "It is," says Mr. Porter, "wholly composed of black basalt, which appears to have issued from innumerable pores in the earth in a liquid state, and to have flowed out on every side. Before cooling, its surface was violently agitated, and it was afterwards

\* Jonath. טַרְכוֹנָה; Jerus. אַטְרֹכֹנָה.

shattered and rent by internal convulsions. The cup-like cavities from which the liquid mass was extruded are still seen, and likewise the wavy surface a thick liquid assumes which cools while flowing. The rock is filled with little pits and air-bubbles; it is as hard as flint, and emits a sharp metallic sound when struck" (241). "Strange as it may seem, this ungainly and forbidding region is thickly studded with deserted cities and villages, in all of which the dwellings are solidly built and of remote antiquity" (238). The number of these towns visited by one traveller lately returned is 50, and there were many others which he did not go to. A Roman road runs through the district from S. to N. probably between Bosra and Damascus. On the outer boundary of the *Lejah* we situated, amongst others, the towns known in Biblical history as Kenath and Edrei. In the absence of more conclusive evidence on the point, a strong presumption in favour of the identification of the *Lejah* with Argob arises from the peculiar Hebrew word constantly attached to Argob, and in this definite sense apparently to Argob only. This word is **קֶבֶל** (Chebel), literally "a rope" (*σχολινισμα*, *περίμετρον*, *funiculus*), and it designates with charming accuracy the remarkably defined boundary line of the district of the *Lejah*, which is spoken of repeatedly by its latest explorer as "a rocky shore;" "sweeping round in a circle clearly defined as a rocky shore line;" "resembling a Cyclopean wall in ruins" (Porter, ii. 19, 219, 239, &c.). The extraordinary features of this region are rendered still more extraordinary by the contrast which it presents to the surrounding plain of the Haman, a high plateau of waving downs of the richest agricultural soil stretching from the Sea of Galilee to the *Lejah*, and beyond that to the desert, almost literally "without a stone;" and it is not to be wondered at—if the identification proposed above be correct—that this contrast should have struck the Israelites, and that their language, so scrupulous of minute topographical distinctions, should have perpetuated in the words, Mishor, Argob, and Chebel, at once the level downs of Bashan [*MISHOR*], the stony labyrinth which so suddenly intrudes itself on the soil (Argob), and the definite fence or boundary which encloses it [*CHEBEL*]. [G.]

AR'GOB (**אַרְגֹּב**; *τοῦ Ἀργόβ*; *Argob*), a man killed with Pekahiah king of Israel (2 K. xv. 25).

ARIARA'THES (properly Mithridates, Diod. xxi., x., p. 25, ed. Bip.) **ῬΑΡΙΑΡΑΤΗΣ** (*Ἀριαράθης*, *Ἀράθης*, probably signifying "great" or "honourable master," from the roots existing in *aryas* (Sanskrit), "honourable," and *rata* (head), "master;" Smith, *Dict. Biogr.* s. v.), king of Cappadocia B.C. 163–130. He was educated at Rome (Liv. xlii. 19); and his whole policy was directed according to the wishes of the Romans. This subservience cost him his kingdom B.C. 158; but he was shortly afterwards restored by the Romans to a share in the government (App. *Syr.* 47; cf. Polyb. xxii. 20, 23; Polyb. iii. 5); and on the capture of his rival Olophernes by Demetrius Soter, regained the supreme power (Just. xxxv. 1). He fell in B.C. 130, in the war of the Romans against Aristonicus who claimed the kingdom of Pergamum on the death of Attalus III. (Just. xxxvii. 1, 2). Letters were addressed to him from Rome in favour of the Jews (1 Macc. xv. 22), who, in aftertimes, seem to have been numerous in his kingdom (Acts ii. 9; comp. 1 Pet. i. 1). [B. F. W.]

ARID'AI (**אַרִידַי**; *Ἀριδαίος*; *Aridai*), ninth son of Haman (Esth. ix. 9).

ARID'ATHA (**אַרִידָתָא**; *Ἀριδάθα*; *Aridatha*), sixth son of Haman (Esth. ix. 8).

A'RIEH (**אַרְיֵה**; *the lion*; *Apla*; *Arie*), name of a man (2 K. xv. 25).

A'RIEL (**אַרְיֵל**; *lion*, i. e. *hero*, of God, or, *hearth of God*; *Ἀριήλ*; *Ariel*).

1. As the proper name of a man (where the meaning no doubt is the first of those given above) the word occurs in Ezr. viii. 16. This Ariel was one of the "chief men" who under Ezra directed the caravan which he led back from Babylon to Jerusalem.

The word occurs also in reference to two Monibites slain by Beniah, one of David's chief captains (2 Sam. xxiii. 20; 1 Chr. xi. 22). Gesenius and many others agree with our A. V. in regarding the word as an epithet, "two lion-like men of Moab;" but it seems better to look upon it, with Thellus, Winer, Fürst, and others, as a proper name, and translate "two [sons] of Ariel," the word **בְּנֵי**, which might easily have fallen out.

A similar word occurs in Num. xxvi. 17, *Arel* (**אַרְיֵל**) as the name of a Gadite, and head of one of the families of that tribe. Both the LXX. and the Vulg. give Ariel for this word, and Winer without remark treats it as the same name.

2. A designation given by Isaiah to the city of Jerusalem (Is. xxix. 1 (*bis*), 2 (*bis*), 7). Its meaning is obscure. We must understand by it either "Lion of God"—so Gesenius, Ewald, Hävernicks, Fürst, and many others—or, with Umbreit, Knobel, and most of the ancient Jewish expositors, "Hearth of God," tracing the first com-

ponent of the word to the Arabic **أَرِيح**, a fire-place

or hearth (Gesen. *Thes.*; Fürst, *Heb. u. Chald. Handb.* s. v.). This latter meaning is suggested by the use of the word in Ez. xliii. 15, 16, as a synonyme for the altar of burnt-offering, although Havernick (*Commentar üb. Ezech.* p. 699), relying on the passage in Isaiah, insists that even here we must understand Lion of God. The difficulty is increased by the reading of the text in Ezekiel being itself doubtful. On the whole it seems most probable that the words used by the two prophets, if not different in form, are at least different in derivation and meaning, and that as a name given to Jerusalem Ariel means "Lion of God," whilst the word used by Ezekiel means "Hearth of God." [F. W. G.]

ARIMATHIAE'A (*Ἀριμαθαία*, Matt. xxvii. 57; Luke xxiii. 51; John xix. 38), the birthplace, or at least the residence of Joseph, who obtained leave from Pilate to bury our Lord in his "new tomb" at Jerusalem. St. Luke calls this place "a city of Judaea;" but this presents no objection to its identification with the prophet Samuel's birth-place, the Ramah of 1 Sam. i. 1, 19, which is named in the Septuagint Arimathaim (*Ἀριμαθαίμ*), and by Josephus, Armatha (*Ἀρμαθᾶ*, Joseph. *Ant.* v. 10, §2). The Ramathem of the Apocrypha (*Ῥαμαθὲμ*, 1 Macc. xi. 34) is probably the same place. [RAMAH.] [J. S. H.]

A'RIOCH (**אַרְיֹחַ**, probably from **אַרְיֵה**, a lion,

"lion-like," comp. **לִיֹּן**; **Ἀριωχῆς**, LXX., in Dan. only; **Ἀριώχης**, Theodot.; *Arioch*, Vulg.). 1. "King of Ellasar" (Gen. xiv. 1, 9). 2. "The captain of the guard" of Nebuchadnezzar (Dan. ii. 14 ff.). [B. F. W.]

**ARISAI** (**Ἀρίσαι**; **Ρουφαῖος**; *Arisai*), eighth son of Haman (Esth. ix. 9).

**ARISTARCHUS** (**Ἀριστάρχος**; *Aristarchus*), a Thessalonian (Acts xx. 4; xxvii. 2), who accompanied St. Paul on his third missionary journey, (Acts xix. 29, where he is mentioned as having been seized in the tumult at Ephesus together with Gaius, both **συνεκδήμους Παύλου**). We hear of him again as accompanying the Apostle on his return to Asia, Acts xx. 4; and again xxvii. 2, as being with him on his voyage to Rome. We trace him afterwards as St. Paul's **συνταχμάλωτος** in Col. iv. 10, and Philem. 24, both these notices belonging to one and the same time of Col. iv. 7; Philem. 12 ff. After this we altogether lose sight of him. Tradition, says Winer, makes him bishop of Aramea. [H. A.]

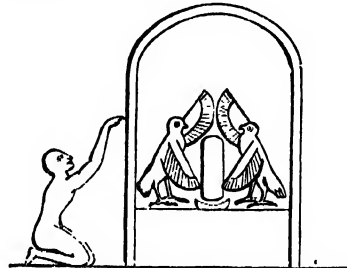

**ARISTOBULUS** (**Ἀριστόβουλος**; *Aristobolus*), Jewish priest (2 Macc. i. 10), who resided in Egypt in the reign of Ptolemaeus VI. Philometor (comp. Grimm, 2 Macc. i. 9). In a letter of Judas Maccabaeus he is addressed (165 B.C.) as the representative of the Egyptian Jews (**Ἀριστοβούλου . . . καὶ τοῖς ἐν Αἰγ. Ἰουδ.** 2 Macc. i. c.), and is further styled "the teacher" (**διδασκαλος**, i. e. counsellor?) of the king. Josephus makes no mention of him; but there can be little doubt that he is identical with the peripatetic philosopher of the name (Clem. Alex. *Str.* v. §98; Euseb. *Præp. Ev.* viii. 9), who dedicated to Ptol. Philometor his allegorical exposition of the Pentateuch (**Βιβλος ἐξηγητικὰς, τοῦ Μουσείως νόμου**, Euseb. *H. E.* vii. 32). Considerable fragments of this work have been preserved by Clement and Eusebius (Euseb. *Præp. Evang.* vii. 13, 14, viii. (8) 9, 10, xiii. 12; in which the Clementine fragments recur); but the authenticity of the quotations has been vigorously contested. It was denied by R. Simon and especially by Hody (*De bibl. text. orig.*, pp. 50 ff. Oxon. 1705) who was answered by Valckenner (*Diatribe de Aristobulo Judæo*, Lugd. Bat. 1806); and Valckenner's arguments are now generally considered conclusive. (Gfrörer, *Philo u. s. w.* ii. pp. 71 ff.; Dachne, *Jud. Alex. Relig.-Philos.* ii. 73 ff.; Ewald, *Gesch. des Volkes Isr.* iv. 294 n.) The object of Aristobulus was to prove that the peripatetic doctrines were based (**ἡρησθαι**) on the Law and the Prophets; and his work has an additional interest as showing that the Jewish doctrines were first brought into contact with the Aristotelian and not with the Platonic philosophy (comp. Matter, *Hist. de l'école d'Alex.* iii. 153 ff.). The fragments which remain are discussed at length in the works quoted above, which contain also a satisfactory explanation of the chronological difficulties of the different accounts of Aristobulus. [B. F. W.]

**ARISTOBULUS** (**Ἀριστόβουλος**), a resident at Rome, some of whose household are greeted in Rom. xvi. 10. It does not appear whether he was a Roman; or whether he believed: from the form of expression, probably not. Or he may have been dead at the time. The *Metology Græcorum*, as usual (iii. p. 17 f.), makes him to have been one of the 70 disciples, and reports that he preached the gospel in Britain. [H. A.]

**ARK, NOAH'S.** [NOAH.]

**ARK OF THE COVENANT** (**אֲרוֹן**).

This, taken generally together with the mercy-seat, was the one piece of the tabernacle's furniture especially invested with sacredness and mystery, and is therefore the first for which precise directions were delivered (Ex. xxx.). The word signifies a mere chest or box, and is (as well as the word **כֶּסֶף**, "ark" of Noah) rendered by the LXX. and New Testament writers by **κιβωτός**. We may remark: I. its material dimensions and fittings; II. its design and object, under which will be included its contents; and III. its history.

Egyptian Ark. (Rosellini, p. 59)

I. It appears to have been an oblong chest of shittim (acacia) wood,  $2\frac{1}{2}$  cubits long, by  $1\frac{1}{2}$  broad and deep. Within and without gold was overlaid on the wood, and on the upper side or lid, which was edged round about with gold, the mercy seat, supporting the cherubim one at each end, and regarded as the symbolical throne of the Divine presence (**CHERUBIM and MERCY SEAT**), was placed. The ark was fitted with rings, one at each of the four corners, and therefore two on each side, and through these were passed staves of the same wood similarly overlaid. By these staves, which always remained in the rings, the Levites of the house of Kohath, to whose office this especially appertained, bore it in its progress. Probably, however, when removed from within the veil, in the most holy place, which was its proper position, or when taken out thence, priests were its bearers (Num. vii. 9, x. 21, iv. 5, 19, 20; 1 K. viii. 3, 6). The ends of the staves were visible without the veil in the holy place of the temple of Solomon, the staves being drawn to the ends, apparently, but not out of the rings. The ark, when transported, was enveloped in the "veil" of the dismantled tabernacle, in the curtain of badgers' skins, and in a blue cloth over all, and was therefore not seen.

II. Its purpose or object was to contain inviolate the Divine autograph of the two tables, that "covenant" from which it derived its title, the idea of which was inseparable from it, and which may be regarded as the *depositum* of the Jewish dispensation. The perpetual safe custody of the material tables no doubt suggested the moral observance of the precepts inscribed. It was also probably a reliquary for the pot of manna and the rod of Aaron. We read in 1 K. viii. 9, that "there was nothing in the ark save the two tables of stone which Moses put there at Horeb." Yet St. Paul, or the author of Heb. ix. 4, asserts that, beside the two tables of stone, the "pot of manna" and "Aaron's rod that budded" were inside the ark, which were

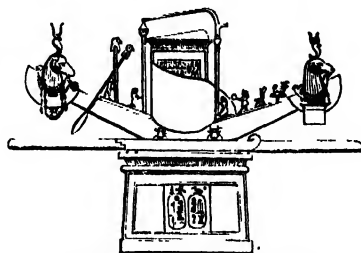

directed to be "laid up" and "kept before the testimony," i.e. before the tables of the law (Ex. xl. 20); and probably, since there is no mention of any other receptacle for them, and some would have been necessary, the statement of 1 K. viii. 9, implies that by Solomon's time these relics had disappeared. The expression *מִצַּד אֲרוֹן*, Deut. xxx. 26, obscurely rendered "in the side of the ark" (A. V.), merely means "beside" it. The words of the A. V. in 1 Chr. xiii. 3, seem to imply an use of the ark for the purpose of an oracle; but this is probably erroneous, and "we sought it not" the meaning; so the LXX. renders it: see Gesenius, *l.c.* s. v. *אֲרוֹן*.

Occupying the most holy spot of the whole sanctuary, it tended to exclude any idol from the centre of worship. And Jeremiah (iii. 16) looks forward to the time when even the ark should be "no more remembered," as the climax of spiritualised religion apparently in Messianic times. It was also the support of the mercy seat, materially symbolising, perhaps, the "covenant" as that on which "mercy" rested. It also furnished a legitimate vent to that longing after a material object for reverential feeling which is common to all religions. It was, however, never seen, save by the high priest, and resembled in this respect the Deity whom it symbolised, whose face none might look upon and live (Winer, *ad loc. note*). That this reverential feeling may have been impaired during its absence among the Philistines, seems probable from the example of Uzzah.

III. The chief facts in the earlier history of the ark (see Josh. iii. and vi.) need not be recited. We may notice, however, a fiction of the Rabbis that there were two arks, one which remained in the shrine, and another which preceded the camp on its march, and that this latter contained the broken tables of the law, as the *omer* the whole ones. In the decline of religion in a later period a superstitious security was attached to its presence in battle. Yet, though this was rebuked by its permitted capture, when captured, its sanctity was vindicated by miracles, as seen in its avenging progress through the Philistine cities. From this period till David's time its abode was frequently shifted. It sojourned among several, probably Levitical, families (1 Sam. vii. 1; 2 Sam. vi. 3, 11; 1 Chr. xiii. 13, xv. 24, 25) in the border villages of Eastern Judah, and did not take its place in the tabernacle, but dwelt in curtains, i.e. in a separate tent pitched for it in Jerusalem by David. Its bringing up by David thither was a national festival, and its presence there seems to have suggested to his piety the erection of a house to receive it. Subsequently that house, when completed, received, in the installation of the ark in its shrine, the signal of its inauguration by the effulgence of Divine glory instantly manifested. Several of the Psalms contain allusions to these events (e.g. xxiv., xlvii., cxxxii.) and Ps. cv. appears to have been composed on the occasion of the first of them.

When idolatry became more shameless in the kingdom of Judah, Manasseh placed a "carved image" in the "house of God," and probably removed the ark to make way for it. This may account for the subsequent statement that it was reinstated by Josiah (2 Chr. xxxiii. 7, xxxv. 3). It was probably taken captive or destroyed by Nebuchadnezzar (2 Esdr. x. 22). Prideaux's argu-

ment that there *must* have been an ark in the second temple is of no weight against express testimony, such as that of Josephus (*B. J.* v. 5, §5) and Tacitus (*Hist.* v. 9, *inanis arcam*), confirmed also by the Rabbins, who state that a sacred stone called by them *שֹׁהֵה אֶבֶן*, "stone of drinking" [STONE], stood in its stead; as well as by the marked silence of those apocryphal books which enumerate the rest of the principal furniture of the sanctuary as present, besides the positive statement of 2 Esdr. as above quoted.

Egyptian Ark. (Wilkinson, *Anc. Egypt*.)

The ritual of the Etruscans, Greeks, Romans, and other ancient nations, included the use of what Clemens Alexandrinus calls *στολα μυστικά* (Protrept. p. 12); but especially that of the Egyptians, in whose religious processions, as represented on monuments, such an ark, surmounted by a pair of winged figures like the cherubim, constantly appears (Wilkinson, *Anc. Egypt*, v. p. 271, 275). The same Clemens (Strom. v. 578) also contains an allusion of a proverbial character to the ark and its rites, which seems to show that they were popularly known, where he says that "only the *māster* (*διδάσκαλος*) may uncover the ark" (*ἀποβρῆς*). In Latin also, the word *arcamum*, connected with *arca* and *arceo*, is the recognised term for a sacred mystery. Illustrations of the same subject occur also Plut. *de Is. et Os.* c. 39; *Ov. Ars Am.* ii. 609, &c.; Euseb. *Praep. Evang.* ii. 3; Catull. lxiv. 260-1; Apul. *Met.* xi. 262. [H. H.]

ARK'ITE, THE *הַקֵּרְיָי*, Sam. Cod. *עֲרֹקִי*; *Ἀρουκαῖος*; *Arucæns*), one of the families of the Canaanites (Gen. x. 17; 1 Chr. i. 15), and from the context evidently located in the north of Phœnicia. Josephus (*Ant.* i. 6, §2) gives the name as *Ἀρουκαῖος*, and as possessing *Ἀρκακὴν τὴν ἐν τῷ Διδῶνι*. He also again mentions the place (*Ἀρκαλα*, *B. J.* vii. 5, §1) in defining the position of the Sabbatical river. The name is found in Pliny (v. 16), and Ptolemy (v. 15), and from Aelius Lampridius (*Alec. Sev.*) we learn that the *Urbs Arceni* contained a temple dedicated to Alexander the Great. It was the birthplace of Alexander Severus, and was thence called *Cæsarea Libani*. Arca was well known to the Crusaders, who under Ramond of Toulouse besieged it for two months in 1099 in vain; it was, however, afterwards taken by William of Sartangea. In 1202 it was totally destroyed by an earthquake. The site which now bears the name of *'Arka* (عرقا) lies on the coast, 2 to 2½ hours from the shore, about 12 miles north of Tripoli, and 5 south of the *Nahr el-Khebir* (Eleutherns). The great coast road passes halfway

between it and the sea. The site is marked by a rocky tell rising to the height of 100 feet close above the *Nahr Arka*. On the top of the tell is an area of about two acres, and on this and on a plateau to the north the ruins of the former town are scattered. Among them are some columns of granite and syenite (Rob. iii. 579-81; Ges. 1073; Winer, s. v.; Reiland, 575; Burckhardt, 162; *Dict. of Gr. and Rom. Geogr.*, art. ARCA). [G.]

**ARMAGED'DON** (*Ἀρμαγεδών*, Rev. xvi. 16). It would be foreign to the purpose of this work to enter into any of the theological controversies connected with this word. Whatever its full symbolical import may be, the image rests on a geographical basis; and the locality implied in the Hebrew term here employed (*גִּן תֹּפָן גִּן כְּלָד־מֶנּוּן* 'Eḥpaiṣṭi' *Ἀρμαγεδών*) is the great battle-field of the Old Testament, where the chief conflicts took place between the Israelites and the enemies of God's people. The passage is best illustrated by comparing a similar one in the book of Joel (iii. 2, 12), where the scene of the Divine judgments is spoken of in the prophetic imagery as the "valley of Jehoshaphat," the fact underlying the image being Jehoshaphat's great victory (2 Chr. xv. 26; see Zech. xiv. 2, 4). So here the scene of the struggle of good and evil is suggested by that battle-field, the plain of Esdraelon, which was famous for two great victories, of Barak over the Canaanites (Judg. iv., v.), and Gideon over the Midianites (Judg. vii.); and for two great disasters, the death of Saul, in the invasion of the Philistines (1 Sam. xxi. 8), and the death of Josiah in the invasion of the Egyptians (2 K. xxiii. 29, 30; 2 Chr. xxxv. 22). With the first and fourth of these events, Megiddo (*Μαγεδδών* in the LXX. and Josephus) is especially connected. Hence *Ἀρμαγεδών*, "the hill of Megiddo." (See Bahr's *Excursus* on Herol. ii. 159.) The same figurative language is used by one of the Jewish prophets (Zech. xii. 11). As regards the Apocalypse, it is remarked by Stanley (*Sinai and Palestine*, p. 330), that this imagery would be peculiarly natural to a Galilean, to whom the scene of these battles was familiar. [MEGIDDO.] [J. S. II.]

**ARMENIA** (*Ἀρμενία*) is nowhere mentioned under that name in the original Hebrew, though it occurs in the English version (2 K. xiv. 37), where our translators have very unnecessarily substituted it for Ararat (comp. marginal reading). The absence of the name, however, which was not the indigenous name of the people, by no means implies that the Hebrew writers were unacquainted with the country: they undoubtedly describe certain districts of it under the names Ararat, Minni, and Togarmah. Of these three the latter appears to have the widest signification: it is the name of a race (Gen. x. 3), and not of a locality, and is used by Ezekiel as descriptive of the whole country (xxvii. 14, xxxviii. 6), while the two former are mentioned together, and have been identified with separate localities.

Armenia is that lofty plateau whence the rivers Euphrates, Tigris, Araxes, and Arampsis, pour down their waters in different directions, the two first to the Persian Gulf, the last two respectively to the Caspian and Euxine seas. It may be termed the *nucleus* of the mountain system of western Asia: from the centre of the plateau rise two lofty chains of mountains, which run from E. to W., converging towards the Caspian sea, but paral-

lel to each other towards the W., the most northerly named by ancient geographers Abus M\*, and culminating in Mount Ararat; the other named Niphates M\*. Westward these ranges may be traced in Anti-Taurus and Taurus, while in the opposite direction they are continued in Caspius M\*. The climate of Armenia is severe, the degree of severity varying with the altitude of different localities, the valleys being sufficiently warm to ripen the grape, while the high lands are bleak and only adapted for pasture. The latter supported vast numbers of mules and horses, on which the wealth of the country chiefly depended: and hence Strabo (xi. 529) characterizes the country as *σφόδρα ἰππόβοτος*, and tells us that the horses were held in as high estimation as the celebrated Nisean breed. The inhabitants were keen traders in ancient as in modern times.

The slight acquaintance which the Hebrew writers had of this country was probably derived from the Phœnicians. There are signs of their knowledge having been progressive. Isaiah, in his prophecies regarding Babylon, speaks of the hosts as coming from "the mountains" (xiii. 4), while Jeremiah, in connexion with the same subject, uses the specific names Ararat and Minni (li. 27). Ezekiel, who was apparently better acquainted with the country, uses a name which was familiar to its own inhabitants, Togumah. Whether the use of the term Ararat in Is. xxxvii. 38 belongs to the period in which the prophet himself lived, is a question which cannot be here discussed. In the prophetic passages to which we shall refer, it will be noticed that Armenia is spoken of rather in reference to its geographical position as one of the extreme northern nations with which the Jews were acquainted, than for any more definite purpose.

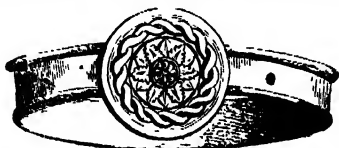

(1.) **ARARAT** is noticed as the place whither the sons of Sennacherib fled (Is. xxxvii. 38): in the prophecies of Jeremiah (li. 27) it is summoned along with Minni and Ashkenaz to the destruction of Babylon, the LXX. however only notice the last. It was the central district surrounding the mountain of that name. (2.) **MINNI** (מִנִּי) is only noticed in the passage just referred to. It is probably identical with the district Minyas, in the upper valley of the *Murad-su* branch of the Euphrates (Joseph. *Ant.* i. 3, §6). It contains the root of the name Armenia according to the generally received derivation, Har-Minni, "the mountains of Minni." It is worthy of notice that the spot where Xenophon ascertains that the name of the country through which he was passing was Armenia, coincides with the position here assigned to Minni (Xen. *An.* iv. 5; Ainsworth, *Track* of 10,000, p. 177. (3.) **TOGARMAH** (תֹּגַרְמָה; *Θογαρμά*, and *Θοργουμά*) is noticed in two passages of Ezekiel, both of which support the idea of its identity with Armenia. In xxvii. 14 he speaks of its commerce with the Tyrians in "horses, horsemen and mules" (A. V.), or, as the words mean, "carriage-horses, riding-horses, and mules" (Hitzig, *Comment.*), which we have already noticed as the staple productions of Armenia. That the house of Togarmah "traded in the fairs of Tyre," as the A. V. expresses it, is more than the Hebrew text seems to warrant: the words simply signify that the Armenians carried on commerce with the Tyrians in those articles. In this passage Togarmah is mentioned in connexion with Meshech and Tubal; in xxxviii. 6, it is described as "of the north quarters" in con-

nexion with Gomer. Coupling with these particulars the relationship between Togarmah, Ashkenaz, and Kiphat (Gen. x. 3), the three sons of Gomer, and the nations of which these patriarchs were the progenitors, we cannot fail in coming to the conclusion that Togarmah represents Armenia. We will only add that the traditional belief of the Armenians themselves, that they are descended from Thorgomass or Thorgarmah, strongly confirms this view.

**ARMLET** (ἄρμλετ; ψέλλιον; Num. xxi. 50,

χλιδόνα or χλιδόν; 2 Sam. i. 10, βραχιδλίον; Aquila, *brachiale armilla*;—properly a fetter, from ἄρμ, *a step*; comp. Is. iii. 20, and ANKLET), an ornament universal in the East, especially among women; used by princes as one of the insignia of royalty, and by distinguished persons in general. The word is not used in the A. V., as even in 2 Sam. i. 10, they render it "by the bracelet on his arm." Sometimes only one was worn, on the right arm (Ecclus. xxi. 21). From Cant. viii. 6, it appears that the signet sometimes consisted of a jewel on the armlet.

Assyrian Armlet. From Nineveh Marbles, British Museum.

These ornaments were worn by most ancient princes. They are frequent on the sculptures of Persopolis and Nineveh, and were set in rich and fantastic shapes resembling the heads of animals (Layard, *Nineveh*, ii. 298). The kings of Persia wore them, and Astyages presented a pair among other ornaments to Cyrus (Xen. *Cyr.* i. 3). The Ethiopians, to whom some were sent by Cambyses, scornfully characterised them as weak fetters (Herod. ii. 23). Nor were they confined to the kings, since Herodotus (viii. 113) calls the Persians generally *ψελλιοφόροι*. In the Egyptian monuments "kings are often represented with armlets and bracelets, and in the Leyden Museum is one bearing the name of the third Thothmes." [A gold bracelet figured below.] (Wilkinson's *Anc.*

Egyptian Armlet. From the Leyden Museum.

*Egypt.* iii. 375, and Plates 1, 2, 14). They were even used by the old British chiefs (Turner, *Angl. Sac.* i. 383). The story of Tarpela shows that they were common among the ancient Sabines, but the Romans considered the use of them effeminate, although they were sometimes given as military rewards (Liv. x. 44). Finally, they

are still worn among the most splendid regalia of modern Oriental sovereigns, and it is even said that those of the king of Persia are worth a million sterling (Kitto, *Pict. Hist. of Pal.* i. 499). They form the chief wealth of modern Hindoo ladies, and are rarely taken off. They are made of every sort of material from the finest gold, jewels, ivory, coral, and pearl, down to the common glass rings and varnished earthenware bangles of the women of the Deccan. Now, as in ancient times, they are sometimes plain, sometimes enchased; sometimes with the ends not joined, and sometimes a complete circle. The arms are sometimes quite covered with them, and if the wearer be poor, it matters not how mean they are, provided only that they glitter. It is thought essential to beauty that they should fit close, and hence Harmer calls them "rather manacles than bracelets," and Buchanan says "that the poor girls rarely get them on without drawing blood, and rubbing part of the skin from the hand; and as they wear great numbers, which often break, they suffer much from their love of admiration." Their enormous weight may be conjectured from Gen. xxiv. 24.

[F. W. F.]

**ARMO'NI** (ἄρμονι; Ἐρμωνί; *Armoni*), son of Saul by Hizpah (2 Sam. xxi. 8).

**ARMS, ARMOUR.** In the records of a people like the Children of Israel, so large a part of whose history was passed in warfare, we naturally look for much information, direct or indirect, on the arms and modes of fighting of the nation itself and of those with whom it came into contact.

Unfortunately, however, the notices that we find in the Bible on these points are extremely few and meagre, while even those few, owing to the uncertainty which rests on the true meaning and force of the terms, do not convey to us nearly all the information which they might. This is the more to be regretted because the notices of the history, scanty as they are, are literally everything we have to depend on, inasmuch as they are not yet supplemented and illustrated either by remains of the arms themselves, or by those commentaries which the sculptures, vases, bronzes, mosaics, and paintings of other nations furnish to the notices of manners and customs contained in their literature.

In remarkable contrast to Greece, Rome, Egypt, and we may now add Assyria, Palestine has not yet yielded one vestige of the implements or utensils of life or warfare of its ancient inhabitants; nor has a single sculpture, piece of pottery, coin, or jewel, been discovered of that people with whose life, as depicted in their literature, we are more familiar than with that of our own ancestors. Even the relations which existed between the customs of Israel, and those of Egypt on the one hand, and Assyria on the other, have still to be investigated, so that we are prevented from applying to the history of the Jews the immense amount of information which we possess on the warlike customs of these two nations, the former especially. Perhaps the time will arrive for investigations in Palestine of the same nature as those which have, within the last ten years, given us so much insight into Assyrian manners; but in the meantime all that can be done here is to examine the various terms by which instruments of war appear to be designated in the Bible, in the light of such help as can be got from the comparison of parallel passages, from the derivation of the words, and from the renderings of the ancient versions.

The subject naturally divides itself into—

I. Offensive weapons: Arms.

II. Defensive weapons: Armour.

I. Offensive weapons: 1. Apparently the earliest known, and most widely used, was the *Chereb* (חֶרֶב), "SWORD," from a root signifying to lay waste.

Its first mention in the history is in the narrative of the massacre at Shechem, when "Simeon and Levi took each man his sword, and came upon the city boldly and slew all the males" (Gen. xxxiv. 25). But there is an allusion to it shortly before in a passage undoubtedly of the earliest date (Ewald, i. 446 note): the expostulation of Laban with Jacob (Gen. xxxi. 26). After this, during the account of the conquest and of the monarchy, the mention of the sword is frequent, but very little can be gathered from the casual notices of the text as to its shape, size, material, or mode of use. Perhaps if anything is to be inferred it is that the *Chereb* was not either a heavy or a long weapon. That of Ehud was only a cubit, i.e. 18 inches long, so as to have been concealed under his garment, and nothing is said to lead to the inference that it was shorter than usual, for the "dagger" of the A. V. is without any ground, unless it be a rendering of the *μάχα* of the LXX. But even assuming that Ehud's sword was shorter than usual, yet a consideration of the narratives in 2 Sam. ii. 16, and xx. 8-10, and also of the ease with which David used the sword of a man so much larger than himself as Goliath (1 Sam. xvii. 51; xxi. 9, 10), goes to show that the *chereb* was both a lighter and a shorter weapon than the modern sword. What frightful wounds one blow of the sword of the Hebrews could inflict, if given even with the left hand of a practised swordsman, may be gathered from a comparison of 2 Sam. x. 8-12 with 1 K. ii. 5. A ghastly picture is there given us of the murdered man and his murderer. The unfortunate Amasa actually disembowelled by the single stroke, and "wallowing" in his blood in the middle of the road—the treacherous Joab standing over him, bespattered from his "girdle" to his "shoes" with the blood which had spouted from his victim!

The *Chereb* was carried in a sheath (חֶבֶרֶת, 1 Sam. xvii. 51; 2 Sam. xx. 8, only: חֶבֶרֶת, 1 Chr. xxi. 27, only) slung by a girdle (1 Sam. xxv. 13) and resting upon the thigh (Ps. xlv. 3; Judg. iii. 16), or upon the hips (2 Sam. xx. 8). "Girding on the sword" was a symbolical expression for commencing war, the more forcible because in times of peace even the king in state did not wear a sword (1 K. ii. 24); and a similar expression occurs to denote those able to serve (Judg. viii. 10; 1 Chr. xxi. 5). Other phrases, derived from the *chereb*, are, "to smite with the edge (literally 'mouth,' comp. *στόμα*, and comp. 'devour,' Is. i. 20) of the 'sword'—"slain with the sword"—"men that drew sword," &c.

Swords with two edges are occasionally referred to (Judg. iii. 16; Ps. cxlix. 6), and allusions are found to "whetting" the sword (Deut. xxxii. 41; Ps. lxxv. 3; Ezek. xxi. 9). There is no reference to the material of which it was composed (unless it be Is. ii. 4; Joel iii. 10); doubtless it was of metal from the allusions to its brightness and "glittering" (see the two passages quoted above, and others), and the ordinary word for blade, viz. *לָחָב*, "a flame." From the expression (Josh. v. 2, 8)—"swords of rock," A. V. "sharp knives"—we may

perhaps infer that in early times the material was flint.

2. Next to the sword was the *SPEAR*: and of this weapon we meet with at least three distinct kinds.

a. The *Chanith* (חֲנִית), a "Spear," and that of the largest kind, as appears from various circumstances attending its mention. It was the weapon of Goliath—its staff like a weaver's beam, the iron head alone weighing 600 shekels, about 25 lbs. (1 Sam. xvii. 7, 45; 2 Sam. xxi. 19; 1 Chr. xx. 5), and also of other giants (2 Sam. xxiii. 21; 1 Chr. xi. 23) and mighty warriors (2 Sam. ii. 23, xxiii. 18; 1 Chr. xi. 11, 20). The *Chanith* was the habitual companion of King Saul—a fit weapon for one of his gigantic stature—planted at the head of his sleeping-place when on an expedition (1 Sam. xxv. 7, 8, 11, 12, 16, 22), or held in his hand when mustering his forces (xxii. 6); and on it the dying king is leaning when we catch our last glimpse of his stately figure on the field of Gilboa (2 Sam. i. 6). His fits of anger or madness become even more terrible to us, when we find that it was this heavy weapon and not the lighter "javelin" (as the A. V. renders it) that he cast at David (1 Sam. xviii. 10, 11, xix. 9, 10) and at Jonathan (xx. 3). A striking idea of the weight and force of this ponderous arm may be gained from the fact that a mere back thrust from the hand of Abner was enough to drive its butt end through the body of Asahel (2 Sam. ii. 23). The *Chanith* is mentioned also in 1 Sam. xiii. 19, 22, xxi. 8; 2 K. xi. 10; 1 Chr. xxiii. 9, and in numerous passages of poetry.

b. Apparently lighter than the preceding, and in more than one passage distinguished from it, was the *Cidôn* (צִדֹן), to which the word "Javelin" perhaps best answers (Ewald, *Wurfspeiss*). It would be the appropriate weapon for such manoeuvring as that described in Josh. vii. 14-27, and could with ease be held outstretched for a considerable time (18, 26; A. V. "spear"). When not in action the *Cidôn* was carried on the back of the warrior—between the shoulders (1 Sam. xvii. 6, "target," and margin "gorget"). Both in this passage and in verse 45 of the same chapter the *Cidôn* is distinguished from the *Chanith*. In Job xxxix. 23 ("spear") the allusion seems to be to the quivering of a javelin when poised before hurling it.

c. Another kind of spear was the *Romach* (רֹמַח). In the historical books it occurs in Num. xxv. 7 ("javelin"), and 1 K. xviii. 28 ("lancets;" 1611, "lancers"). Also frequently in the later books, especially in the often recurring formula for arms, "shield and spear." 1 Chr. xii. 8 ("buckler"), 24 ("spear"), 2 Chr. xi. 12, xiv. 8, xxv. 5, and Neh. iv. 13, 16-21; Ezek. xxxix. 9 &c.

d. A lighter missile or "dart" was probably the *Shelach* (שֶׁלַח). Its root signifies to project or send out, but unfortunately there is nothing beyond the derivation to guide us to any knowledge of its nature. See 2 Chr. xxiii. 10, xxxii. 5 ("darts"); Neh. iv. 17, 23 (see margin); Job xxxiii. 18, xxxvi. 12; Joel ii. 8.

e. The word *Shobet* (שֹׁבֵט), the ordinary meaning of which is a rod or staff, with the derived force of a baton or sceptre, is used once only with a military signification, for the "darts" with which Joab dispatched Absalom (2 Sam. xviii. 14).

3. Of missile weapons of offence the chief was undoubtedly the *Bow*, *Kesheth* (קֶשֶׁת); it is met with

in the earliest stages of the history, in use both for the chase (Gen. xvi. 20, xxvii. 3) and war (xlviii. 22). In later times archers accompanied the armies of the Philistines (1 Sam. xxxi. 3; 1 Chr. x. 3) and of the Syrians (1 K. xvii. 34). Among the Jews its use was not confined to the common soldiers, but captains high in rank, as Jehu (2 K. ix. 24), and even kings' sons (1 Sam. xviii. 4) carried the bow, and were expert and sure in its use (2 Sam. i. 22). The tribe of Benjamin seems to have been especially addicted to archery (1 Chr. viii. 40, xii. 2; 2 Chr. xiv. 8, xvii. 7); but there were also bowmen among Reuben, Gad, Manasseh (1 Chr. v. 18), and Ephraim (Ps. lxxviii. 9).

Of the form or structure of the bow we can gather almost nothing. It seems to have been bent with the aid of the foot, as now, for the word commonly used for it is *רַגֵּל*, to tread (1 Chr. v. 18, viii. 40; 2 Chr. xiv. 8; Is. v. 18; Ps. vii. 12, &c.). Bows of steel (or perhaps brass, *בְּרֹזֶה*) are mentioned as if specially strong (2 Sam. xxii. 5; Ps. xviii. 34). The string is occasionally named, *יִתֵּר* or *כִּיִּתֵּר*. It was probably at first some bind-weed or natural curl, since the same word is used in Judg. xvi. 7—9 for "green withies."

In the allusion to bows in 1 Chr. xii. 2, it will be observed that the sentence in the original stands "could use both the right hand and the left in stones and arrows out of a bow," the words "hurling" and "shooting" being interpolated by the translators. It is possible that a kind of bow for shooting bullets or stones is here alluded to, like the pellet-bow of India, or the "stone-bow" in use in the middle ages, and to which allusion is made by Shakespeare (Twelfth Night, ii. 5), and which in Wisl. v. 22 is employed as the translation of *πετροβόλος*. This latter word occurs in the LXX. text of 1 Sam. xiv. 14, in a curious variation of a passage which in the Hebrew is hardly intelligible—*ἐν βολίσι, καὶ ἐν πετροβόλοις, καὶ ἐν κόχλαξι τοῦ πεδίου*: "with things thrown, and with stone-bows, and with flints of the field." If this be accepted as the true reading, we have here by comparison with xiv. 27, 43, an interesting confirmation of the statement (xiii. 19-22) of the degree to which the Philistines had deprived the people of arms; leaving to the king himself nothing but his faithful spear, and to his son, no sword, no shield, and nothing but a stone-bow and a staff (A. V. "rod").

The ARROWS, *Chitzim* (*חִצִּים*), were carried in a quiver, *Theli* (*תֵּלִי*, Gen. xxvii. 3, only), or *Ashpich* (*אַשְׁפִּיךְ*), (Ps. xxii. 6, xlix. 2, cxxvii. 5). From an allusion in Job vi. 4, they would seem to have been sometimes poisoned; and the "sharp arrows of the mighty with coals of juniper," in Ps. cx. 4, may point to a practice of using arrows with some burning material attached to them.

4. The SLING, *Kela* (*קֶלַע*), is first mentioned in Judg. xx. 16, where we hear of the 300 Benjaminites who with their left hand could "sling stones at an hairbreadth, and not miss." The simple weapon with which David killed the giant Philistine was the natural attendant of a shepherd, whose duty it was to keep at a distance and drive off anything attempting to molest his flocks. The sling would be familiar to all shepherds and keepers of sheep, and therefore the bold metaphor of Abigail has a natural propriety in the mouth of the wife of a

man whose possessions in flocks were so great as those of Nabal—"as for the souls of thine enemies them shall God sling out, as out of the middle of a sling" (1 Sam. xxv. 29).

Later in the monarchy, slingers formed part of the regular army (2 K. iii. 25), though it would seem that the slingers there mentioned must have been more ponderous than in earlier times, and that those which could break down the fortifications of so strong a place as Kir-haraseth must have been more like the engines which king Uzziah contrived to "shoot great stones" (2 Chr. xxvi. 15). In verse 14 of the same chapter we find an allusion (concealed in the A. V. by two interpolated words) to stones specially adapted for slings—"Uzziah prepared throughout all the host shields and spears . . . bows and sling-stones."

II. Passing from weapons to Armour—from offensive to defensive arms—we find several references to what was apparently armour for the body.

1. The *Shir-yon* (*שִׁירְיוֹן*); or in its contracted form *שִׁיר*, and once *שִׁירָה*; according to the LXX. *θώραξ*, Vulg. *lorica*,—a BREASTPLATE. This occurs in the description of the arms of Goliath—*שִׁירָיו כְּקַשְׁתִּים*, a "coat of mail," literally a "breastplate of scales" (1 Sam. xvii. 5), and further (38), where Shiryon alone is rendered "coat of mail." It may be noticed in passing that this passage contains the most complete inventory of the furniture of a warrior to be found in the whole of the sacred history. Goliath was a Philistine, and the minuteness of the description of his equipment may be due either to the fact that the Philistines were usually better armed than the Hebrews, or to the impression produced by the contrast on this particular occasion between this fully armed champion, and the wretchedly appointed soldiers of the Israelite host, stripped as they had been very shortly before both of arms, and of the means of supplying them, so completely, that no smith could be found in the country, nor any weapons seen among the people, and that even the ordinary implements of husbandry had to be repaired and sharpened at the forges of the conquerors (1 Sam. xiv. 19-22). *Shiryon* also occurs in 1 K. xxii. 34, and 2 Chr. xviii. 33. The last cited passage is very obscure; the A. V. follows the Syriac translation, but the real meaning is probably "between the joints and the breastplate." Ewald reads "between the loins and the chest;" LXX. and Vulgate, "between the lungs and the breastbone." It is further found in 2 Chr. xxvi. 14, and Neh. iv. 16 ("habergeons"), also in Job 26 and Is. lix. 17. This word has furnished one of the names of Mount Hermon (see Deut. iii. 9; Stanley, 403), a parallel to which is found in the name *θώραξ* given to Mount Sipylus in Lydia. It is possible that in Deut. iv. 48, Sion (*שִׁיֹן*) is a corruption of Shir-yon.

2. Another piece of defensive armour was the *Tachara* (*תַּחֲרָה*), which is mentioned but twice—namely, in reference to the *Meil* or gown of the priest, which is said to have had a hole in the middle for the head with a hem or binding round the hole "as it were the 'mouth' of an habergeon" (*הַבֶּרְגֵּעוֹן*), to prevent the stuff from tearing (Ex. xxviii. 32). The English "habergeon" was the diminutive of the "hauberk," and was a quilted shirt or doublet put on over the head.

3. The **HELMET** is but seldom mentioned. The word for it is *Coba* (כֹּבַע, or twice כִּיבַע), from a root signifying to be high and round. Reference is made to it in 1 Sam. xvii. 5; 1 Chr. xxvi. 14; Ezek. xxvii. 10.

4. **GREAVES**, or defences for the feet (not "legs" as in the A.V.)—כִּנְצָחַהּ, *Mitzechah*, made of brass, נְחֹשֶׁת—were named in 1 Sam. xvii. 6, only.

Of the defensive arms borne by the warrior the notices are hardly less scanty than those just examined.

5. Two kinds of **SHIELD** are distinguishable.

a. The *Tzinnah* (צִנָּה); from a root צָנַץ, to protect. This was the large shield, encompassing (Ps. v. 12) and forming a protection for the whole person. When not in actual conflict, the *tzinnah* was carried before the warrior (1 Sam. xvii. 7, 41). The definite article in the former passage ("the" shield, not "a shield" as in the A.V.) denotes the importance of the weapon. The word is used with *Romach* (1 Ch. xii. 8, 14; 2 Ch. xi. 32, &c.) and *Chanith* (1 Ch. xii. 34) as a formula for weapons generally.

b. Of smaller dimensions was the *Magen* (מָגֵן), from מָגַן, to cover), a buckler or target, probably for use in hand to hand fight. The difference in size between this and the *Tzinnah* is evident from 1 K. x. 16, 17; 2 Chr. ix. 15, 16, where a much larger quantity of gold is named as being used for the latter than for the former. The portability of the *magen* may be inferred from the notice in 2 Chr. xii. 9, 10; and perhaps also from 2 Sam. i. 21. The word is a favourite one with the poets of the Bible (see Job xv. 26; Ps. iii. 3, xviii. 2, &c.). Like *Tzinnah*, it occurs in the formula-like expressions for weapons of war, but usually coupled with light weapons—the bow (2 Chr. xiv. 8, xvii. 7), darts, שֵׁטֶל (2 Chr. xxxii. 5).

6. What kind of arm was the *Shelet* (שֵׁלֶט) it is impossible to determine. By some translators it is rendered a "quiver," by some "weapons" generally, by others a "shield." Whether either or none of these are correct, it is clear that the word had a very individual sense at the time: it denoted certain special weapons taken by David from Haddadezer king of Zobah (2 Sam. viii. 7; 1 Chr. xviii. 7), and dedicated in the temple, where they did service on the memorable occasion of Joash's proclamation (2 K. xi. 10; 2 Chr. xxiii. 9), and where their remembrance long lingered (Cant. iv. 4). From the fact that these arms were of gold it would seem that they cannot have been for offence.

In the two other passages of its occurrence (Jer. li. 11; Ezek. xxvii. 11) the word has the force of a foreign arm. [c.]

**ARMY.** I. **JEWISH ARMY.**—The military organization of the Jews commenced with their departure from the land of Egypt, and was adapted to the nature of the expedition on which they then entered. Every man above 20 years of age was a soldier (Num. i. 3): each tribe formed a regiment, with its own banner and its own leader (Num. ii. 2, x. 14): their positions in the camp or on the march were accurately fixed (Num. ii.): the whole army started and stopped at a given signal (Num. x. 5, 6): thus they came up out of Egypt ready for the fight (Ex. xiii. 18). That

the Israelites preserved the same exact order throughout their march, may be inferred from Balaam's language (Num. xxiv. 6). On the approach of an enemy, a conscription was made from the general body under the direction of a muster-master (originally named שֹׁמֵר, Deut. xx. 5, "officer," afterwards סוֹפֵר, 2 K. xxv. 19, "scribe of the host," both terms occurring, however, together in 2 Chr. xxvi. 11, the meaning of each being primarily a *writer* or *scribe*), by whom also the officers were appointed (Deut. xx. 9). From the number so selected, some might be excused serving on certain specified grounds (Deut. xx. 5-8; 1 Mac. iii. 56). The army was then divided into thousands and hundreds under their respective captains (שָׂרֵי הַהֲלָכִים, שָׂרֵי הַפָּאוֹת, Num. xxi. 14), and still further into families (Num. ii. 34; 2 Chr. xxv. 5, xxvi. 12)—the family being regarded as the unit in the Jewish polity. From the time the Israelites entered the land of Canaan until the establishment of the kingdom, little progress was made in military affairs: their wars resembled *border forays*, and the tactics turned upon stratagem rather than upon the discipline and disposition of the forces. Skillfully availing themselves of the opportunities which the country offered, they gained the victory sometimes by an ambush (Josh. viii. 4); sometimes by surprising the enemy (Josh. x. 8, xi. 7; Judg. vii. 21); and sometimes by a judicious attack at the time of fording a river (Judg. iii. 28, iv. 7, vii. 24, xii. 5). No general muster was made at this period; but the combatants were summoned on the spur of the moment either by trumpet-call (Judg. iii. 27), by messengers (Judg. vi. 35), by some significant token (1 Sam. xi. 7), or, as in later times, by the erection of a standard (סֵט, Is. xviii. 3; Jer. iv. 21, li. 27), or a beacon-fire on an eminence (Jer. vi. 1).

With the kings arose the custom of maintaining a body-guard, which formed the *nucleus* of a standing army. Thus Saul had a band of 3000 select warriors (1 Sam. xiii. 2, xiv. 52, xxiv. 2), and David, before his accession to the throne, 600 (1 Sam. xiii. 13, xxv. 13). This band he retained after he became king, and added the **CHERETHITES** and **PELETHITES** (2 Sam. xv. 18, xx. 7), together with another class, whose name *Shalishim* (שְׁלִישִׁים, τριῶνται, LXX.) has been variously interpreted to mean (1) a corps of veteran guards = Roman *triarii* (Winer, s. v., *Kriegsheer*); (2) chariot-warriors, as being *three* in each chariot (Gesen. *Thes.* p. 1429); (3) officers of the guard, *thirty* in number (Ewald, *Gesch.* ii. 601). The fact that the Egyptian war-chariot, with which the Jews were first acquainted, contained but two warriors, forms an objection to the second of these opinions (Wilkinson, *Anc. Egypt.* i. 335), and the frequent use of the term in the singular number (2 K. vii. 2, ix. 25, xv. 25) to the third. Whatever be the meaning of the name, it is evident that it indicated officers of high rank, the chief of whom (הַשְּׁלִישִׁים, "lord," 2 K. vii. 2, or הַשֵּׁטֶל, "chief of the captains," 1 Chr. xii. 18) was immediately about the king's person, as adjutant or secretary-at-war. David further organized a national militia, divided into twelve regiments, each of which was called out for one month in the year under their respective officers (1 Chr. xxvii. 1);

at the head of the army when in active service he appointed a commander-in-chief (שַׂר־צָבָא, "captain of the host," 1 Sam. xiv. 50).

Hitherto the army had consisted entirely of infantry (רִגְלִי, 1 Sam. iv. 10, xv. 4), the use of horses having been restrained by divine command (Deut. xvii. 16). The Jews had, however, experienced the great advantage to be obtained by chariots, both in their encounters with the Canaanites (Josh. xvii. 16; Judg. i. 19), and at a later period with the Syrians (2 Sam. viii. 4, x. 18). The interior of Palestine was indeed generally unsuited to the use of chariots: the Canaanites had employed them only in the plains and valleys, such as Jezreel (Josh. xvii. 16), the plain of Philistia (Judg. i. 19; 1 Sam. xiii. 5), and the upper valley of the Jordan (Josh. xi. 9; Judg. iv. 2). But the border, both on the side of Egypt and Syria, was admirably adapted to their use; and accordingly we find that as the foreign relations of the kingdoms extended, much importance was attached to them. David had reserved a hundred chariot from the spoil of the Syrians (2 Sam. viii. 4): these probably served as the foundation of the force which Solomon afterwards enlarged through his alliance with Egypt (2 K. x. 28, 29), and applied to the protection of his border, stations or barracks being erected for them in different localities (1 K. ix. 19). The force amounted to 1400 chariots, 4000 horses, at the rate (in round numbers) of three horses for each chariot, the third being kept as a reserve, and 12,000 horsemen (2 K. x. 26; 2 Chr. i. 14). At this period the organization of the army was complete; and we have, in 1 K. ix. 22, apparently a list of the various gradations of rank in the service, as follow:—(1) אֲנָשֵׁי הַמִּלְחָמָה, "men of war" = *privates*; (2) עֲבָדִים, "servants," the lowest rank of officers = *lieutenants*; (3) שָׂרִים, "princes" = *captains*; (4) שְׁלִישִׁים, "captains," already noticed, perhaps = *staff-officers*; (5) שָׂרֵי הָרֶכֶב and שְׂרֵי הַפָּרָשִׁים, "rulers of his chariots and his horsemen" = *cavalry officers*.

It does not appear that the system established by David was maintained by the kings of Judah; but in Israel the proximity of the hostile kingdom of Syria necessitated the maintenance of a standing army. The militia was occasionally called out in time of peace, as by Asa (2 Chr. xiv. 8), by Jehoshaphat (2 Chr. xvii. 14), by Amaziah (2 Chr. xxv. 5), and lastly by Uzziah (2 Chr. xxvi. 11): but these notices prove that such cases were exceptional. On the other hand the incidental notices of the body-guard lead to the conclusion that it was regularly kept up (1 K. xv. 28; 2 K. xi. 4, 11). Occasional reference is made to war-chariots (2 K. viii. 21), and it would appear that this branch of the service was maintained, until the wars with the Syrians weakened the resources of the kingdom (2 K. xiii. 7): it was restored by Jotham (Is. ii. 7), but in Hezekiah's reign no force of the kind could be maintained, and the Jews were obliged to seek the aid of Egypt for horses and chariots (2 K. xviii. 23, 24). This was an evident breach of the injunction in Deut. xvii. 16, and met with strong reprobation on the part of the prophet Isaiah (xxx. 1).

With regard to the arrangement and manoeuvring of the army in the field, we know but little. A division into three bodies is frequently mentioned

(Judg. vii. 16, ix. 43; 1 Sam. xi. 11; 2 Sam. xviii. 2): such a division served various purposes: in action there would be a centre and two wings, in camp, relays for the night-watches (Judg. vii. 19); and by the combination of two of the divisions, there would be a main body and a reserve, or a strong advanced guard (1 Sam. xiii. 2, xxv. 13). Jehoshaphat divided his army into five bodies, corresponding, according to Ewald (*Geschichte*, iii. 192), to the geographical divisions of the kingdom at that time: may not, however, the threefold principle of division be noticed here also, the heavy-armed troops of Judah being considered as the proper army, and the two divisions of light-armed of the tribe of Benjamin as an appendage (2 Chr. xvii. 14-18)?

The maintenance and equipment of the soldiers at the public expense dates from the establishment of a standing army: before which, each soldier armed himself, and obtained his food either by voluntary offerings (2 Sam. xvii. 28, 29), by forced exactions (1 Sam. xxv. 13), or by the natural resources of the country (1 Sam. xiv. 27): on one occasion only do we hear of any systematic arrangement for provisioning the host (Judg. xx. 10). It is doubtful whether the soldier ever received pay even under the kings (the only instance of pay being mentioned applies to mercenaries, 2 Chr. xxv. 6): but that he was maintained, while on active service, and provided with arms, appears from 1 K. iv. 27, x. 16, 17; 2 Chr. xxvi. 14: notices occur of an arsenal or armoury, in which the weapons were stored (1 K. xiv. 28; Neh. iii. 19; Cant. iv. 4).

The numerical strength of the Jewish army may be ascertained with any degree of accuracy: the numbers, as given in the text, are manifestly incorrect, and the discrepancies in the various statements irreconcilable. At the Exodus the number of the warriors was 600,000 (Ex. xii. 37), or 603,350 (Ex. xxxviii. 26; Num. i. 46); at the entrance into Canaan, 601,730 (Num. xxvi. 51). In David's time the army amounted, according to one statement (2 Sam. xxiv. 9), to 1,300,000, viz. 800,000 for Israel and 500,000 for Judah; but according to another statement (1 Chr. xxi. 5, 6) to 1,470,000, viz. 1,000,000 for Israel and 470,000 for Judah. The militia at the same period amounted to 24,000 × 12 = 288,000 (1 Chr. xxvii. 1 ff.). At a later period the army of Judah under Abijah is stated at 400,000, and that of Israel under Jeroboam at 300,000 (2 Chr. xiii. 3). Still later, Asa's army, derived from the tribes of Judah and Benjamin alone, is put at 535,000 (2 Chr. xiv. 8), and Jehoshaphat's at 1,160,000 (2 Chr. xvii. 14 ff.).

Little need be said on this subject with regard to the period that succeeded the return from the Babylonish captivity until the organization of military affairs in Judaea under the Romans. The system adopted by Judas Maccabæus was in strict conformity with the Mosaic law (1 Mac. iii. 55): and though he maintained a standing army, varying from 3000 to 6000 men (1 Mac. iv. 6; 2 Mac. vii. 16), yet the custom of paying the soldiers appears to have been still unknown, and to have originated with Simon (1 Mac. xiv. 32). The introduction of mercenaries commenced with John Hyrcanus, who, according to Josephus (*Ant.* xiii. 8, §4), riddled the tombs of the kings in order to pay them: the intestine commotions that prevailed in the reign of Alexander Jannæus obliged him to increase the number to 6200 men (Joseph. *Ant.* xiii. 13, §5, 14, §1): and the same policy was followed by Alexandra

(*Ant.* xiii. 16, §2) and by Herod the Great, who had in his pay Thracian, German, and Gallic troops (*Ant.* xvii. 8, §3). The discipline and arrangement of the army was gradually assimilated to that of the Romans, and the titles of the officers borrowed from it (*Joseph. B. J.* ii. 20, §7).

II. ROMAN ARMY.—The Roman army was divided into legions, the number of which varied considerably, each under six tribuni (χιλαρχος, "chief captain," *Acts* xxi. 31), who commanded by turns. The legion was subdivided into ten cohorts (σπεῖρα, "band," *Acts* x. 1), the cohort into three maniples, and the maniples into two centuries, containing originally 100 men, as the name implies, but subsequently from 50 to 100 men, according to the strength of the legion. There were thus 60 centuries in a legion, each under the command of a centurion (ἐκατοντάρχης, *Acts* x. 1, 22; ἐκατοντάρχος, *Matt.* viii. 5, xxvii. 54). In addition to the legionary cohorts, independent cohorts of volunteers served under the Roman standards; and Biscoe (*History of Acts*, p. 220) supposes that all the Roman forces stationed in Judaea were of this class. Josephus speaks of five cohorts as stationed at Caesarea at the time of Herod Agrippa's death (*Ant.* xix. 9, §2), and frequently mentions that the inhabitants of Caesarea and Sebaste served in the ranks (*Ant.* xx. 8, §7). One of these cohorts was named the Italian (*Acts* x. 1), not as being a portion of the Italica legio (for this was not embodied until Nero's reign), but as consisting of volunteers from Italy ("Cohors militum voluntaria, quae est in Syria," *Gruter, Inscr.* i. 434). This cohort probably acted as the body-guard of the procurator. The cohort named "Augustus" (σπεῖρα Σεβαστῆς, *Acts* xxvii. 1) may have consisted of the volunteers from Sebaste (*B. J.* ii. 12, §5; Biscoe, p. 223). Winer, however, thinks that it was a *cohors Augusti*, similar to the *legio Augusta* (*Reale. s. v. Römer*). The head-quarters of the Roman forces in Judaea were at Caesarea. A single cohort was probably stationed at Jerusalem as the ordinary guard; at the time of the great feasts, however, and on other public occasions, a larger force was sent up, for the sake of preserving order (*B. J.* ii. 12, §1, 15, §3). Frequent disturbances arose in reference to the images and other emblems carried by the Roman troops among their military ensigns, which the Jews regarded as idolatrous: deference was paid to their prejudices by a removal of the objects from Jerusalem (*Ant.* xviii. 3, §1, 5, §3). The ordinary guard consisted of four soldiers (τετραδίων, "quaternion"), of which there were four, corresponding to the four watches of the night, who relieved each other every three hours (*Acts* xii. 4; cf. *Joh. xix.* 23; *Polyb.* vi. 33, §7). When in charge of a prisoner, two watched outside the door of the cell, while the other two were inside (*Acts* xii. 6). The officer mentioned in *Acts* xviii. 16 (σπαρτορεδάρχης, "captain of the guard") was perhaps the *prae-fectus praetorio*, or commander of the Praetorian troops, to whose care prisoners from the provinces were usually consigned (*Plin. Ep.* x. 65). The δεξιόχαιροι (*lancearii*, *Vulg.*; "spearmen," *A. V.*), noticed in *Acts* xxiii. 23, appear to have been light-armed, irregular troops: the origin of the name is, however, quite uncertain (*Alford, Comm. in l. c.*).

[W. L. B.]

ARNA (*Arna*), one of the forefathers of Ezra (2 *Esdr.* i. 2), occupying the place of Zeriahah or Zaraias in his genealogy.

ARNAN (אַרְנַן; 'Oppā; *Arnan*), name of a man (1 *Chr.* iii. 21).

ARNON (אַרְנוֹן; derivable, according to Gesenius, *Thes.* 153, from roots signifying "swift" or "noisy," either suiting the character of the stream; 'Aḥḥān; *Arnon*), the river (אֲרְנוֹן, accurately "torrent") which formed the boundary between Moab and the Amorites, on the north of Moab (*Num.* xxi. 13, 14, 24, 26; *Judg.* xi. 22), and afterwards between Moab and Israel (Reuben) (*Deut.* ii. 24, 30, iii. 8, 12, 16, iv. 48; *Josh.* xii. 1, 2, xiii. 9, 16; *Judg.* xi. 13, 26). From *Judg.* xi. 18, it would seem to have been also the east border of Moab. See also 2 *K.* x. 33; *Jer.* xlvi. 20. In many of the above passages it occurs in the formula for the site of Arer, "which is by the brink of the river Arnon." In Numbers it is simply "Arnon," but in *Deut.* and *Joshua* generally "the river A." (*A. V.* sometimes "river of A."). *Isaiah* (xvi. 2) mentions its forks; and in *Judg.* xi. 26 a word of rare occurrence (אֲרְנוֹן, comp. *Num.* xiii. 29) is used for the *sides* of the stream. The "high places of A." (אֲרְנוֹן, a word which generally refers to worship) are mentioned in *Num.* xxi. 28. By Josephus (*Ant.* iv. 5, §1) it is described as rising in the mountains of Arabia and flowing through all the wilderness (ἐρημος) till it falls into the Dead Sea. In the time of Jerome it was still known as Arnon; but in the Samaritan-Arabic version of the Pentateuch by Abū Sāid (10th to 12th cent.) it is given as el-Mojeb. There can be no doubt that the *Wady el-Mojeb* of the present day is the Arnon. It has been visited and described by Burckhardt (372-375); Irby (142); and Seetzen (*Reise*, 1854, ii. 347; and in *Littér. Syria*, 1195). The ravine through which it flows is still the "locum callis in praerupta demersae satis horribilem et periculosum" which it was in the days of Jerome (*Onom.*). The Roman road from *Rabba* to *Dhibān* crosses it at about two hours' distance from the former. On the south edge of the ravine are some ruins called *Melutet el Irby*, and on the north edge, directly opposite, those still bearing the name of 'Arā'ir [AROR]. The width across between these two spots seemed to Burckhardt to be about two miles: the descent on the south side to the water occupied Irby 1½ hour: "extremely steep" (Jerome, *per abrupta descendens*), and almost impassable "with rocks and stones." On each face of the ravine traces of the paved Roman road are still found, with milestones; and one arch of a bridge, 31 feet 6 inches in span, is standing. The stream runs through a level strip of grass some 40 yards in width, with a few oleanders and willows on the margin. This was in June and July, but the water must often be much more swollen, many water-worn rocks lying far above its then level.

Where it bursts into the Dead Sea this stream is 83 ft. wide and 4 ft. deep, flowing through a chasm with perpendicular sides of red, brown, and yellow sandstone, 97 ft. wide (romantische Felsen-thor: Seetzen). It then runs through the delta in a S.W. course, narrowing as it goes, and is 10 ft. deep where its waters meet those of the Dead Sea. (Lynch, *Report*, May 3, 1847, 20.)

\* This appears to have been the branch called the *Sail es-Saidah*, which flows N.W. from *Kilaat el-Katrane*, joining the *Wady Mojeb*, two or three miles east from 'Arā'ir.

According to the information given by Burekhardt, its principal source is near *Katrama*, on the Haj route. Hence, under the name of *Seil es-Sûdeh*, it flows N.W. to its junction with the *W. Lejûm*, one hour E. of 'Ara'ir, and then, as *W. Mojeb*, more directly W. to the Dead Sea. The *W. Mojeb* receives on the North the streams of the *W. Wile*, and on the South those of *W. Shekik* and *W. Sa-lhch* (S.)

At its junction with the *Lejûm* is a piece of pasture ground, in the midst of which stands a hill with ruins on it (Burek. 374). May not these ruins be the site of the mysterious "city that is in the midst of the river" (Josh. xiii. 9, 16; Deut. ii. 36) so often coupled with Aroer? From the above description of the ravine, it is plain that that city cannot have been situated immediately below Aroer, as has been conjectured. [G.]

**A'ROD** (אֲרוֹד; *Arôd*), a son of Gad (Num. xxvi. 17), called Arodi (אֲרוֹדִי) in Gen. xli. 17. His family are called THE ARÔDITES (Num. xxvi. 17).

**AR'ÖER** (עֲרֹעַר, occasionally עֲרֹעַר = ruins, places of which the foundations are laid bare, Gesenius; \* *'Arohp*; *Aroer*), the name of several towns of Eastern and Western Palestine.

1. A city "by the brink," or "on the bank of" (both the same expression—"on the lip") or "by" the torrent Arnon, the southern point of the territory of Sihon King of the Amorites,<sup>a</sup> and afterwards of the tribe of Reuben (Deut. ii. 36, iii. 12, iv. 48; Josh. xli. 2, xlii. 9, 16; Judg. xi. 26; 2 K. x. 33; 1 Chr. v. 8), but later again in possession of Moab (Jer. xlviii. 19). It is described in the Onomasticon (*Aroer*) as "*usque hodie in vertice montis*," "*super ripam (χελος) torrentis Arnon*," an account agreeing exactly with that of the only traveller of modern times who has noticed the site, namely, Burekhardt, who found ruins with the name 'Ara'ir on the old Roman road, upon the very edge of the precipitous north bank of the *Wady Mojeb*. [ARNON.] Like all the topography east of the Jordan, this site requires further examination. Aroer is often mentioned in connexion with the city that is "in," or "in the midst of," "the river." The nature of the cleft through which the Arnon flows is such that it is impossible there can have been any town in such a position immediately near Aroer; but a suggestion has been made above [ARNON], which on investigation of the spot may clear up this point.

2. Aroer "that is 'facing' (עַל־פָּנֵי) Rabbah" (Rabbah of Ammon), a town "built" by and belonging to Gad (Num. xxiii. 34; Josh. xiii. 25; 2 Sam. xxiv. 5). This is probably the place mentioned in Judg. xi. 33, which was shown in Jerome's time (*Onom. Arvir*) "in monte, vigesimo ab Aelia lapide ad septentrionem." Ritter (*Syria*, 1130) suggests an identification with *Ayra*, found by Burekhardt 2½ hours S.W. of es-Salt. There

is considerable difference however in the radical letters of the two words, the second Ain not being present.

3. Aroer, in Is. xvii. 2, if a place at all,<sup>d</sup> must be still further north than either of the two already named, and dependant on Damascus. Gesenius, however, takes it to be Aroer of Gad, and the "forsaken" state of its cities to be the result of the deportation of Galilee and Gilead by Tiglath-Pileser (2 K. xv. 29). See Ges. *Jesaja*, 556.

4. A town in Judah, named only in 1 Sam. xxx. 28. Robinson (ii. 199) believes that he has identified its site in *Wady 'Ar'arah*, on the road from Petra to Gaza, about 11 miles W.S.W. of *Bit-es-Soba*, a position which agrees very fairly with the slight indications of the text. [G.]

**ARO'ERITE**. Hothan the Aroerite was the father of two of David's chief captains (1 Chr. xi. 44).

**A'ROM** (אַרֹם; *Aronus*), name of a man (1 Esd. v. 16).

**AR'PAD** (אַרְפָּד; \* *Arpâd*; *Arphad*), a city or district in Syria, apparently dependent on Damascus (Jer. xlix. 23). It is invariably named with Hamath (now *Hamath*, on the Orontes), but no trace of its existence has yet been discovered, nor has any mention of the place been found out of the Bible (2 K. xviii. 34, xix. 13; Is. x. 9, xxxvi. 19, xxxvii. 13: in the two last passages it is rendered in the A. V. Arphad). Arpad has been identified, but without any ground beyond the similarity in the names, with Arvad, the island on the coast of Phœnicia (Winer). [G.]

**AR'PHAD**. [ARPAD.]

**ARPHAX'AD** (אַרְפַּחְשָׁד; \* *Arpaxâd*; Jos. 'Αρφαξάδης; *Arphaxad*), the son of Shem and the ancestor of Kber (Gen. x. 22, 24, xi. 10), and said to be of the Chaldeans (Joseph. i. 6, 4). Bochart (*Phaleg*, ii. 4) supposed that the name was preserved in that of the province Arrapachitis (*Ἀρραπαχίτις*, Ptol. vi. 1, §2; \* *Arpata*) in Northern Assyria (comp. Ewald, *Gesch. des Volkes Isr.*, i. 378). Different interpretations of the name have been given; but that of Ewald (l. c.) appears to be the best, who supposes it to mean the *stronghold of the Chaldees* (Arab. *awaph*, to bind, and *Kurd*, *Kurd*, pl. *Akrad*, Chald. Comp. Niebuhr, *Gesch. Assur*, s. p. 414, n).

2. ARPHAXAD, a king "who reigned over the Medes in Ecbatana, and strengthened the city by vast fortifications" (Judith i. 1-4). In a war with "Nabuchodonosor, king of Assyria," he was entirely defeated "in the great plain in the borders of Ragau" (? *Rages*, *Raga*, Tobit i. 16, &c.), and afterwards taken prisoner and put to death (Jud. i. 13-15). From the passage in Judith (i. 2, *ἐκβατάνα* *ἐν* 'Εκβατάνας) he has been frequently identified with Deiores (Artaeus, Ctes.), the founder of Ecbatana (Herod. i. 98); but as Deiores died peaceably (Herod. i. 102), it seems better to look

their conquest, to guard the important boundary of the Arnon.

<sup>c</sup> In this place the letters of the name are transposed, עֲרֹעַר.

<sup>d</sup> The LXX. have καταλειμμένη εἰς τὸν αἰῶνα, apparently reading עֲרֹעַר עֲרֹעַר עֲרֹעַר; nor do any of the ancient versions agree with the Hebrew text.

<sup>a</sup> May it not with equal probability be derived from עֲרֹעַר, juniper, the modern Arabic 'Ar'ar (see Rob. ii. 124, note)? Comp. Luz, Rimmon, Tappuah, and other places deriving their names from trees.

<sup>b</sup> From the omission of the name in the remarkable fragment, Num. xvi. 27-30, where the principal places taken by the Amorites from Moab are named, Aroer would appear not to be one of the very oldest cities. Possibly it was built by the Amorites after

for the original of Arphaxad in his son Phraortes (Artynes, Ctes.), who greatly extended the Median empire, and at last fell in a battle with the Assyrians, 633 B.C. (Herod. i. 102, *αὐτὸς τε διεφθάρη . . . καὶ ὁ σπάρτας αὐτοῦ ὁ πολλὸς*). Niebuhr (*Gesch. Assurs*, 32) endeavours to identify the name with Astyages = Ashdakh, the common title of the Median dynasty, and refers the events to a war in the twelfth year of Nebuchadnezzar, king of Babylon, B.C. 592 (*Ibid.* pp. 212, 285). [JUDITH; NEBUCHADNEZZAR.] [B. F. W.]

### ARROWS. [ARMS.]

**ARSA'CES VI.**, a king of Parthia, who assumed the royal title *Asaces* (*Ἀσάκης*, Armen. *Arschag*, probably containing the roots both of *Arya* and *Nicor*) in addition to his proper name, **MITHRIDATES I.** (Phaates, App. *Syr.* 67 from confusion with his successor) according to universal custom (Strab. xv. p. 702), in honour of the founder of the Parthian monarchy (Justin. xli. 5, 5). He made great additions to the empire by successful wars; and when Demetrius Nicator entered his dominions to collect forces or otherwise strengthen his position against the usurper Tryphon, he despatched an officer against him who defeated the great army after a campaign of varied success (Justin. xxvi. 1), and took the king prisoner, B.C. 138 (1 Macc. xiv. 1-3; Joseph. *Ant.* xiii. 5, §11; Justin. xxxvi. 1; xxxviii. 9). Mithridates treated his prisoner with respect, and gave him his daughter in marriage (App. *Syr.*, 67, 68), but kept him in confinement till his own death, c. B.C. 130. (App. *Syr.* 68; Diod. ap. Müller, *Fragn. Hist.* ii. 19.) [B. F. W.]

**ARSARETII**, a region beyond Euphrates, apparently of great extent (2 Esdr. xiii. 45, only). [G.]

**ARTAXERXES** (אַרְטַחְשַׁשְׁטָרְסָה or אֲרַחְשָׁה, *Artachshashita* or *Artachshasta*; Ἀρταξερξῆς, *Artaxerxes*), the name probably of two different kings of Persia mentioned in the Old Testament. The word, according to Herod. vi. 98, means *ὁ μέγας ἄφιος*, the great warrior, and is compounded of *arta*, great or honoured (cf. Ἀρταίου, Herod. vii. 61, the old national name of the Persians, also *Arii*, and the Sanscrit *Arya*, which is applied to the followers of the Brahmin law), and *kshatra* or *kshérshé*, a king, grecised into Xerxes. [AHASUERUS.]

1. The first Artaxerxes is mentioned in Ezr. iv. 7, as induced by "the adversaries of Judah and Benjamin" to obstruct the rebuilding of the temple, and appears identical with Smerdis, the Magian impostor, and pretended brother of Cambyses. For there is no doubt that the Ahasuerus of Ezr. iv. 6 is Cambyses, and that the Darius of iv. 24 is Darius Hystaspis, so that the intermediate king must be the Pseudo-smerdis, who usurped the throne B.C. 522, and reigned eight months (Herod. iii. 61, 67 ff.). We need not wonder at this variation in his name. Artaxerxes may have been adopted or conferred on him as a title, and we find the true Smerdis called Tanyoxares (the younger Οὔαρις) by Xenophon (*Cyrop.* viii. 7) and Ctesias (*Pers.* fr. 8-13), and Oropastes by Justin (*Hist.* i. 9). Oxaces appears to be the same name as Xerxes, of which Artaxerxes is a compound.

2. In Neh. ii. 1, we have another Artaxerxes, who permits Nehemiah to spend twelve years at Jerusalem, in order to settle the affairs of the colony there, which had fallen into great confusion. We

may safely identify him with Artaxerxes Macrocheir or Longimanus, the son of Xerxes, who reigned B.C. 464-425. And we believe that this is the same king who had previously allowed Ezra to go to Jerusalem for a similar purpose (Ezr. vii. 1). There are indeed some who maintain that as Darius Hystaspis is the king in the sixth chapter of Ezr., the king mentioned next after him, at the beginning of the seventh, must be Xerxes, and thus they distinguish three Persian kings called Artaxerxes in the Old Testament, (1) Smerdis in Ezr. iv. (2) Xerxes in Ezr. vii., and (3) Artaxerxes Macrocheir in Nehemiah. But it is almost demonstrable that Xerxes is the Ahasuerus of the book of Esther [AHASUERUS], and it is hard to suppose that in addition to his ordinary name he would have been called both Ahasuerus and Artaxerxes in the O. T. It seems too very probable that the policy of Neh. ii, was a continuation and renewal of that of Ezr. vii., and that the same king was the author of both. Now it is not possible for Xerxes to be the Artaxerxes of Nehemiah, as Josephus asserts (*Ant.* xi. 5, §4), for Xerxes only reigned 21 years, whereas Nehemiah (xiii. 8) speaks of the 32nd year of Artaxerxes. Nor is it necessary to believe that the Artaxerxes of Ezr. vii. is necessarily the immediate successor of the Darius of Ezr. vi. The book of Ezr. is not a continuous history. It is evident from the first words of ch. vii. that there is a pause at the end of ch. vi. Indeed, as ch. vi. concludes in the 6th year of Darius, and ch. vii. begins with the 7th year of Artaxerxes, we cannot even believe the latter king to be Xerxes, without assuming an interval of 36 years (B.C. 515-479) between the chapters, and it is not more difficult to imagine one of 58, which will carry us to B.C. 457, the 7th year of Artaxerxes Macrocheir. We conclude therefore that this is the king of Persia under whom both Ezra and Nehemiah carried on their work; that in B.C. 457 he sent Ezra to Jerusalem; that after 13 years it became evident that a civil as well as an ecclesiastical head was required for the new settlement, and therefore that in 444 he allowed Nehemiah to go up in the latter capacity. From the testimony of profane historians this king appears remarkable among Persian monarchs for wisdom and right feeling, and with this character his conduct to the Jews coincides (Diod. xi. 71).

It remains to say a word in refutation of the view that the Artaxerxes of Nehemiah was Artaxerxes Mnemon, elder brother of Cyrus the Younger, who reigned B.C. 404-359. As Ezra and Nehemiah were contemporaries (Neh. viii. 9) this theory transfers the whole history contained in Ezr. vii. ad fin. and Nehemiah to this date, and it is hard to believe that in this critical period of Jewish annals there are no events recorded between the reigns of Darius Hystaspis (Ezr. vi.) and Artaxerxes Mnemon. Besides, Eliashib, who was high-priest when Nehemiah reached Jerusalem (Neh. iii. 1), i.e. on this last supposition, B.C. 397, was grandson of Jeshua (Neh. xii. 10), high-priest in the time of Zerubbabel, B.C. 530. We cannot think that the grandfather and grandson were separated by an interval of 139 years. [G. E. L. C.]

**ARTEMAS** (Ἀρτεμάς, i. e. Ἀρτεμιδιώπος), a companion of St. Paul (Tit. iii. 12). According to tradition, he was bishop of Lystra.

**ARUBOTH** (Arubboth, אֲרֻבוֹת; Ἀραβωθ; *Aruboth*), the third of Solomon's commissariat districts (1 K. iv. 10). It included Sochoh,

and was therefore probably a name for the rich corn-growing country of the Shefelah. In any case, the significance of the word is entirely lost at present. Josephus omits all mention of it. [G.]

**ARUMAH** (אַרְמָה; *Ἀρμὰ, Vat. Ἀρμὰ; in Rumi*), a place apparently in the neighbourhood of Shechem, at which Abimelech resided (Judg. ix. 41). It is conjectured that the word in verse 31, אַרְמָה, rendered "privily," and in the margin "at Tormah," should be read "at Arumah" by changing the א to an נ, but for this there is no support beyond the apparent probability of the change. Arumrah is possibly the same place as Ruma, under which name it is given by Eusebius and Jerome in the *Onomasticon*. According to them it was then called Arimathæa (see also ארמא). But this is not consonant with its apparent position in the story. [G.]

**ARVAD** (אַרְוַד), from a root signifying "wandering," Ges. 1268), a place in Phœnicia, the men of which are named in close connexion with those of Zidon as the navigators and defenders of the ship of Tyre in *Ezek.* xxvii. 8, 11. In agreement with this is the mention of "the Arvadite" (אַרְוַדִּי) in *Gen.* x. 18, and *1 Chr.* i. 16, as a son of Canaan, with Zidon, Hamath, and other northern localities. The LXX. have in each of the above passages *Ἀραδῖος*, and in Josephus (*Ant.* i. 6, §2) we find *Ἀρουδαῖος* *Ἀραδὸν τῆν ἡγεσὺν ἔχοντες*. There is thus no doubt that Arvad is the island of *Rūd* (رود), which lies off Tortosa (*Turtus*), 2 or 3 miles from the Phœnician coast, (not at, but) some distance above, the mouth of the river Eleutherus, now the *Nahr el-Kebir* (Maund. 403; Burckh. 161), and at the northern extremity of the great bay which stretches above Tripoli (Kiepert's Map, 1856). The island is high and rocky, but very small, hardly a mile in circumference (see Maund. 399; "800 yards in extreme length," Allen, ii. 178). According to Strabo (*xvi.* 2, §13) Arvad was founded by fugitives from Sidon, and he testifies to its prosperity, its likeness to Tyre, and especially to the well known nautical skill of the inhabitants.\* (See the notices by Strabo, Pliny, and others in Gesenius, 1269, and Winer, *Arvaditen*.) Opposite Arvad, on the mainland, was the city Antandrus, by which name the Targum Jerus. renders the name Arvad in *Gen.* x. 18. [ARADUS.] A plan of the island will be found in Allen's *Dead Sea*, end of vol. ii.; also in the Admiralty Charts, 2050, 'Island of Ruad.'

**AR'ZA** (אַרְצָא; *᾽Ωσᾱ, Ἀρσᾱ; Arsa*), name of a man (*1 K.* xvi. 9).

**A'SA** (אַסָּא, *curing, physician; Ἀσᾱ; Jos. Ἀραῶς; Asa*), son of Abijah, and third king of Judah, was conspicuous for his earnestness in supporting the worship of God, and rooting out idolatry with its attendant immoralities; and for the vigour and wisdom with which he provided for the prosperity of his kingdom. In his zeal against heathenism he did not spare his grandmother Maachah, who occupied the special dignity of "King's Mother," to which great importance was attached in the Jewish court, as afterwards in

Persia, and to which parallels have been found in modern Eastern countries, as in the position of the Sultana Valide in Turkey (see *1 K.* ii. 19; *2 K.* xxiv. 12; *Jer.* xxix. 2; also Calmet, *Fragm.* xvi.; and Bruce's *Travels*, vol. ii. p. 537, and iv. 244). She had set up some impure worship in a grove (the word translated *idol*, *1 K.* xv. 13, is in Hebrew *horror*, while in the Vulgate we read, *ne esset (Maachah) princeps in sacris Priapi*); but Asa burnt the symbol of her religion, and threw its ashes into the brook Kidron, as Moses had done to the golden calf (*Ex.* xxxii. 20), and then deposed Maachah from her dignity. He also placed in the temple certain gifts which his father had dedicated, probably in the earlier and better period of his reign [ABIAH], and which the heathen priests must have used for their own worship, and renewed the great altar which they apparently had de-erected (*2 Chr.* xv. 8). Besides this, he fortified cities on his frontiers, and raised an army, amounting, according to *2 Chr.* xiv. 8, to 580,000 men, but the uncertainty attaching to the numbers in our present text of Chronicles has been pointed out by Kennicott [ABIAH], and by Davidson (*Introduction to the O. T.*, p. 686), who considers that the copyists were led into error by the different modes of marking them, and by confounding the different letters which denoted them, bearing as they do a great resemblance to each other. Thus ASA's reign marks the return of Judah to a consciousness of the high destiny to which God had called her, and to the belief that the Divine Power was truly at work within her. The good effects of this were visible in the enthusiastic resistance offered by the people to Zerah, an invader, who is called a Cushite or Ethiopian, and whom several authors, as Ewald (*Gesch. des V. I.* iii. p. 470), identify with Osorkon I., the second king of the 22nd dynasty of Egypt, inheritor therefore of the quarrel of his father Shishak, to whom Asa had probably refused to pay tribute. [ZERAH.] At the head of an enormous host (a million of men, we read in *2 Chr.* xiv. 9) he attacked Mareshah or Maissu in the S.W. of the country, near the later Eleutheropolis (Robinson, *B. R.*, ii. 67), a town afterwards taken by Judas Maccabeus (*1 Mac.* v. 65), and finally destroyed by the Parthians in their war against Herod (*Joseph. Ant.* xiv. 13, §9). There he was utterly defeated, and driven back with immense loss to Gerar. As Asa returned laden with spoil, he was commended and encouraged by a prophet, and on his arrival at Jerusalem convoked an assembly of his own people and of many who had come to him from Israel, and with solemn sacrifices and ceremonies renewed the covenant by which the nation was dedicated to God. The peace which followed this victory was broken by the attempt of Baasha of Israel to fortify Ramah as a kind of Decapolis, "that he might not suffer any to go out or to come in unto Asa king of Judah." To stop this he purchased the help of Benhadad I. king of Damascus, by a large payment of treasure left in the temple and palace from the Egyptian tribute in Rehoboam's time, and thus he forced Baasha to abandon his purpose, and destroyed the works which he had begun at Ramah, using the materials to fortify two towers in Benjamin, Geba (*the hill*), and Mizpeh (*the watch-tower*), as checks to any future invasion. The wells which he sunk at Mizpeh were famous in Jeremiah's time (xli. 9). The means by which he obtained this success were censured by the prophet Hanani, who seems even to have excited some discontent in Jerusalem, in consequence of which he

\* These nautical propensities remain in full force. (See Allen's *Dead Sea*, ii. 183.)

was imprisoned, and some other punishments inflicted (2 Chr. xvi. 9). The prophet threatened Asa with war, which appears to have been fulfilled by the continuance for some time of that with Baasha, as we infer from an allusion, in 2 Chr. xvii. 2, to the cities of Ephraim which he took, and which can hardly refer to any events prior to the destruction of Ramah.

In his old age Asa suffered from the gout, and it is mentioned that "he sought not to the Lord but to the physicians." If any blame be intended, we must suppose that he acted in an arrogant and independent spirit, and without seeking God's blessing on their remedies. He died greatly loved and honoured in the 41st year of his reign. There are difficulties connected with its chronology, arising perhaps from the reasons already mentioned as to the numbers in Chronicles. For instance, in 2 Chr. xvi. 1, we read that Baasha fortified Ramah in the 36th year of Asa's reign. In 1 K. xv. 33, Baasha is said to have died in the 26th. If the former number be genuine, it is supposed by the note in the margin of the English Bible, by Clinton, and with some little hesitation by Ewald, that the Chronicler is referring to the years not of Asa's reign, but of the separate kingdom of Judah, which would coincide with the 16th of Asa and the 13th of Baasha, and leave 11 years for the statement of 1 K. xv. 16, and for the fulfilment of Hanani's threat. According to Clinton (*P. H.*, i. p. 321) the date of Asa's accession was B.C. 956. In his 15th year (B.C. 942) was the great festival after the defeat of Zerah. In B.C. 941 was the league with Benhadad, and in B.C. 916 Asa died. The statement in 2 Chr. xv. 10, must be explained of the 35th year of the kingdom of Judah, if we adopt that view of the date in xvi. 1. Clinton, with an inconsistency very unusual in him, does adopt it in the later place, but imagines a fresh war with Ethiopia in B.C. 922 to account for the former. [G. E. L. C.]

ASA'DIAS (*Ἀσαδίας*, i. e. *הַסַּדְיָהּ*, the Lord loveth; *Hasadías*), 1 Chr. iii. 20, where in A. V. it is written Hasadiah.

2. Bar. i. 1.

[B. F. W.]

ASA'EL (*Ἀσηήλ*; Vulg. omits), of the tribe of Naphtali, and forefather of Tobit (Tob. i. 1). [JANZEEL?]

ASA'HEL (*Ἀσηήλ*, made by God; *Ἀσαήλ*;

*Asael*), nephew of David, being the youngest son of his sister Zeruiah. He was celebrated for his swiftness of foot, a gift much valued in ancient times, as we see by the instances of Achilles, Antilochus (Hom. *Il.* xiv. 570), Papirius Cursor (Liv. ix. 16), and others. When fighting under the command of his brother Joab against Ishoboth's army at Gibeon, he pursued Abner, who, after vainly warning him to desist, was obliged to kill him in self-defence, though with great reluctance, probably on account of his extreme youth (2 Sam. ii. 18 ff.). [ABNER.]

Asahel was also the name of three other men (2 Chr. xvii. 8; 2 Chr. xxxi. 13; Ezr. x. 15). [G. E. L. C.]

ASAHIAH, or ASATAH (*Ἀσηΐᾱ*; *Ἀσαΐᾱ*; *Asata*), a servant of king Josiah, sent by him, together with others, to seek information of Jehovah respecting the book of the law which Hilkiah found in the temple (2 K. xxii. 12, 14; also called Asahah, 2 Chr. xxxiv. 20). [R. W. B.]

ASATAH (*Ἀσηΐᾱ*; *Asata*; Alex. *Ἀσά*; *Asaia*), name of four men. 1. (1 Chr. ix. 5). [MAASHIAH.] 2. (1 Chr. iv. 36; vi. 30). 3. (1 Chr. xv. 6). 4. (1 Chr. xv. 6, 11). See ASAHIAH.

AS'ANA (*Ἀσανά*; *Asana*), name of a man (1 Esd. v. 31). [ASHIAH.]

A'SAPH (*Ἀσάφ*; *Ἀσάφ*; *Asaph*). 1. A Levite, son of Berechiah, one of the leaders of David's choir (1 Chr. vi. 39). Psalms l. and lxxiii. are attributed to him, but probably all these, except l., lxxiii., and lxxvii., are of later origin (Vaihinger, *Vers. of Psalms*); and he was in aftertimes celebrated as a seer (*נִבִּי*) as well as a musical composer, and was put on a par with David (2 Chr. xxix. 30; Neh. xii. 46). The office appears to have remained hereditary in his family, unless he was the founder of a school of poets and musical composers, who were called after him "the sons of Asaph" (comp. the Homeridae) (1 Chr. xxv. 1; 2 Chr. xx. 14; Ezr. ii. 41).

2. The recorder (*סֹפֵר*) of Hezekiah (2 K. xviii. 18, 37; Is. xxvii. 3, 22).

3. The controller of the royal forests of Achaemenes (Neh. ii. 8).

4. A Levite (Neh. xi. 17).

[R. W. B.]

ASAR'EL (*Ἀσάρι*; *Ἐσέρηλ*; *Asarel*), name of a man (1 Chr. iv. 16).

ASARELAI (*Ἀσάρι*; *Ἐσέρηλ*; *Asarelai*) name of a man (1 Chr. xxv. 2), called JESHAR-ELAI (*Ἰσηάρι*) in ver. 14.

AS'CAION. [ASHKELON.]

ASE'AS (*Ἀσάας*; *Aseas*), name of a man (1 Esd. ix. 32).

ASEBE'BIA (*Ἀσεβηβία*; *Sebebius*), a Levite (1 Esd. viii. 47). [SHEREBIAH.]

ASE'BIA (*Ἀσεβία*; *Asbiu*), 1 Esd. viii. 48.

ASE'NATH (*Ἀσενά*; *Ἀσενέθ*; Alex. *Ἀσεννέθ*; *Aseneth*), daughter of Potiphar, priest, or possibly prince, of On [ΠΟΤΙΦΕΡΑΪ], wife of Joseph (Gen. xli. 45), and mother of Manasseh and Ephraim (xli. 50, xli. 20). Her name has been considered to be necessarily Egyptian (Lepsius, *Chronologie d. Aegypten*, i. p. 382), and Egyptian etymologies have therefore been proposed. Gesenius (*Thes. s. v.*) suggests *ΔΕ-ΚΕΙΤ*, "she who is of Neith," the Egyptian Minerva; but this word has not been found in the ancient Egyptian or Coptic; and it must be regarded as very doubtful. If we are guided by the custom of the Hebrews, and the only parallel case, that of Bithiah, whose Hebrew name, "daughter," that is, "servant, of Jehovah," implying conversion, must have been given her on her marriage to Merod, at a time probably not long distant from that of Joseph's rule [BITHIAH], we must suppose that his Egyptian wife received a Hebrew name from Joseph, especially if her native name implied devotion to the gods of the country. Such a new name would have been preserved in preference to the other in the O. T. If Hebrew, Asenath may be compared to the male proper name Asuah, *אֲשֻׁא* (Ezr. ii. 50), and derived like it from

סֹמֶךְ or סֹדֶן, in which case both names would signify *storehouse*; unless both may be cognate with סֹמֶךְ, and mean *bramble*, a sense not repugnant to Semitic usage in proper names. The former derivation is perhaps the more probable, in connexion with Joseph's history and the name of Ephraim.

A'SER. [ASHER.] [R. S. P.]

AS'FERER (אֶסְפֶּרֶר; *Stace*), name of a man (1 Esd. v. 32). [SISERA.]

A'SILAN (אֶשֶׁלַן; *A'sol, Alodp; Asan*), a city in the low country of Judah named in Josh. xv. 42, with Libnah and Ether. In Josh. xix. 7, and 1 Chr. iv. 32, it is mentioned again as belonging to Simeon, but in company with Ain and Limmon, which (see Josh. xv. 31) appear to have been much more to the south. In 1 Chr. vi. 59, it is given as a priests' city, occupying the same place as the somewhat similar word Ain (אֵין) does in the list of Josh. xxi. 16.

In 1 Sam. xxv. 30, Chor-ashan is named with Hamah and other cities of "the South."

Eusebius and Jerome (*Onom.*) mention a village named Bethasan as 15 miles west of Jerusalem; but this, though agreeing sufficiently with the position of the place in Josh. xv. 42, is not far enough south for the indications of the other passages; and indeed Euseb. and Jer. discriminate Bethasan from "Asan of the tribe of Simeon." It has not yet been identified, unless it be the same as Ain; in which case Robinson found it at *Al Ghazir*. [G.]

●ASH'BEA (אֶשְׁבֵּעַ; *T adjure; 'Esoβά; domo juramenti* is the transl. of the Vulg. "of the house of Ashbea"), name of a man (1 Chr. iv. 21).

ASH'BEI, (אֶשְׁבֵּי; *'Asoβλ, 'Asoβhp; Asbel*), a son of Benjamin (Gen. xli. 21; Num. xxvi. 38; 1 Chr. viii. 1). Respecting the sons of Benjamin, see BECHER.

ASH'DOD, or AZO'TUS (אֶשְׁדּוֹד; *Aζωτος, LXX. and N. T.*), one of the five confederate cities of the Philistines, situated about 30 miles from the southern frontier of Palestine, 3 from the Mediterranean Sea, and nearly midway between Gaza and Joppa. It stood on an elevation overlooking the plain, and the natural advantages of its position were improved by fortifications of great strength. For this reason it was probably selected as one of the seats of the national worship of Dagon (1 Sam. v. 5). It was assigned to the tribe of Judah (Josh. xv. 47), but was never subdued by the Israelites: it appears on the contrary to have been the point for conducting offensive operations against them, so much so, that after Uzziah had succeeded in breaking down the wall of the town, he secured himself against future attacks by establishing forts on the adjacent hills (2 Chr. xxvi. 6); even down to Nehemiah's age it preserved its distinctiveness of race and language (Neh. xiii. 23). But its chief importance arose from its position on the high-road from Palestine to Egypt, commanding the entrance to or from the latter country: it was on this account besieged by Tartan, the general of the Assyrian king, Sargon, about B.C. 716, apparently to frustrate the league formed between Hezekiah and Egypt (Is. xx. 1). Its importance as well as strength is testified by the protracted siege which it afterwards sustained under Ptolemy, about B.C. 630 (Herod. ii. 157), the effects of which

are incidentally referred to by Jer. (xxv. 20). That it recovered from this blow appears from its being mentioned as an independent power in alliance with the Arabians and others against Jerusalem (Neh. iv. 7). It was destroyed by the Maccabees (1 Macc. v. 68, x. 84), and lay in ruins until the Roman conquest of Judaea, when it was restored by Gabinius, B.C. 55 (Joseph. *Ant.* xiv. 5, §3; *B. J.* i. 7, §7), and was one of the towns assigned to Salome after Herod's death (Joseph. *Ant.* xvii. 8, §1). The only notice of Azotus in the N. T. is in connexion with Philip's return from Gaza (Acts viii. 40). It is now an insignificant village, with no memorials of its ancient importance, but is still called *Esbed*. [W. L. B.]

ASH'DOTH PIS'GAH (אֶשְׁדּוֹת פִּישְׁגַּח; *from אֶשֶׁר, "to pour forth;" אֶשְׁדּוֹת פִּישְׁגַּח; radices Pisgae*), a curious and (since it occurs in none of the later books) probably a very ancient term, found only in Deut. iii. 17; Josh. xii. 3, xiii. 20; and in Deut. iv. 49, A. V. "springs of Pisgah." In the two passages from Deuteronomy the words form part of a formula, by which apparently the mountains which enclose the Dead Sea on the east side are defined. Thus in iii. 17, we read, "the 'Anabah' also (i. e. the Jordan valley) and the 'border,' from 'innereth (Sea of Galilee) unto the sea of the 'Anabah, the Salt Sea, under Ashdath hap-Pisgah eastward;" and so also in iv. 49, though here our translators have chosen to vary the formula for English readers: The same intention is evident in the passages quoted from Joshua; and in x. 40, and xii. 8 of the same book, Ashdath is used alone—"the springs," to denote one of the main natural divisions of the country. The only other instance of the use of the word is in the highly poetical passage, Num. xxi. 15, "the 'pouring forth' of the 'torrents,' which extendeth to Shebeth-Ar." This undoubtedly refers also to the east of the Dead Sea.

What the real significance of the term may be, it is impossible in our present ignorance of the country east of the Dead Sea to determine. Doubtless, like the other topographical words of the Bible, it has a precise meaning strictly observed in its use; but whether it be the springs poured forth at the base of the mountains of Moab, or the roots or spurs of those mountains, or the mountains themselves, it is useless at present to conjecture. [G.]

ASH'ER, Apoc. and N. T. A'SER (אֶשֶׁר; *'Ashp; Aser*), the 8th son of Jacob, by Zilpah, Leah's handmaid (Gen. xxx. 13). The name is interpreted as meaning "happy," in a passage full of the paeonastic turns which distinguish these very ancient records: "And Leah said, 'In my happiness am I (אֶשֶׁרִי), for the daughters will call me happy' (אֶשֶׁרִי), and she called his name Asher" (אֶשֶׁר), i. e. "happy." A similar play occurs in the blessing of Moses (Deut. xxxiii. 24). Gad was Zilpah's other and elder son, but the fortunes of the brothers were not at all connected. Of the tribe descended from Asher no action is recorded during the whole course of the sacred history. Its name is found in the various lists of the tribes which occur throughout the earlier books, as Gen. xxxv. xli. Ex. i. Num. i. ii. xiii. &c., and like the rest Asher sent his chief as one of the spies from Kadesh-barnea (Num. xiii.). During the march through the desert his

place was between Dan and Naphtali on the north side of the tabernacle (Num. ii. 27); and after the conquest he took up his allotted position without any special mention.

The limits of the territory assigned to Asher are, like those of all the tribes, and especially of the northern tribes, extremely difficult to trace. This is partly owing to our ignorance of the principle on which these ancient boundaries were drawn and recorded, and partly from the absence of identification of the majority of the places named. The general position of the tribe was on the sea-shore from Carmel northwards, with Manasseh on the south, Zebulun and Issachar on the south-east, and Naphtali on the north-east (Jos. *Ant.* v. 1, §22). The boundaries and towns are given in Josh. xix. 24-31, xvii. 10, 11, and Judg. i. 31, 32. From a comparison of these passages it seems plain that Dor (*Tantura*) must have been within the limits of the tribe, in which case the southern boundary was probably one of the streams which enter the Mediterranean south of that place—either *Nahr el-Defneh* or *Nahr Zurka*. Following the beach round the promontory of Carmel, the tribe then possessed the maritime portion of the rich plain of Esdraelon, probably for a distance of eight or ten miles from the shore. The boundary would then appear to have run northwards, possibly bending to the east to embrace Ahlab, and reaching Zidon by Kanaah (a name still attached to a site six miles inland from *Said*), whence it turned and came down by Tyre to Achzib (Esdraia, now *es-Zib*\*)

This territory contained some of the richest soil in all Palestine (Stanley, 265; Kenrick, *Phoen.* 35), and in its productiveness it well fulfilled the promise involved in the name "Asher," and in the blessings which had been pronounced on him by Jacob and by Moses. Here was the oil in which he was to "dip his foot," the "bread" which was to be "fat," and the "royal dainties" in which he was to indulge;<sup>b</sup> and here in the metallic manufactures of the Phoenicians (Kenrick, 38) were the "iron and brass" for his "shoes." The Phoenician settlements were even at that early period in full vigour,<sup>c</sup> and it is not surprising that Asher was soon contented to partake their luxuries, and to "dwell among them" without attempting the conquest and extermination enjoined in regard to all the Canaanites (Judg. i. 31, 32). Accordingly he did not drive out the inhabitants of Acco, nor Dor,<sup>d</sup> nor Zidon, nor Ahlab, nor Achzib, nor Helbah, nor Aphik, nor Rehob (Judg. i. 31), and the natural consequence of this inert acquiescence is immediately visible. While Zebulun and Naphtali "jeopardied their lives unto the death" in the struggle against Sisera, Asher was content to forget the peril of his fellows in the creeks and harbours of his new allies (Judg. v. 17, 18). At the numbering of Israel at Sinai, Asher was more numerous than either Ephraim, Manasseh, or Benjamin (Num. i. 32-41), but in the reign of David, so insignificant

had the tribe become, that its name is altogether omitted from the list of the chief rulers (1 Chr. xxvii. 16-22); and it is with a kind of astonishment that it is related that "divers of Asher and Manasseh and Zebulun" came to Jerusalem to the Passover of Hezekiah (2 Chr. xxx. 11). With the exception of Simeon, Asher is the only tribe west of the Jordan which furnished no hero or judge to the nation.<sup>e</sup> "One name alone shines out of the general obscurity—the aged widow 'Anna the daughter of Phanuel of the tribe of Aser,' who in the very close of the history departed not from the temple, but 'served God with fastings and prayers night and day'" (Stanley, 265). [G.]

**ASHERAH** (אֲשֶׁרָה), the name of a Phœnician goddess, or rather of the idol itself. Our translators following the rendering of the LXX. (ἄσος), and of the Vulg. (*lucus*) translate the word by "grove." Almost all modern interpreters however since Selden (*De Diis Syriis*, p. 343) agree that an idol or image of some kind must be intended, as seems sufficiently proved from such passages as 2 K. xxi. 7, xxiii. 6, in the latter of which we find that Josiah "brought out the Asherah" (or as our version reads "the grove") "from the house of the Lord." There can, moreover, be no doubt that Asherah is very closely connected with ASHTORETH and her worship, indeed the two are so placed in connexion with each other, and each of them with Baal (e.g. Judg. iii. 7, comp. ii. 3; Judg. vi. 25; 1 K. xviii. 19), that many critics have regarded them as identical. There are other passages however in which these terms seem to be distinguished from each other as 2 K. xxiii. 13, 14, 15. Movers (*Phön.* i. 561) first pointed out and established the difference between the two names, though he probably goes too far in considering them as names of distinct deities. The view maintained by Bertheau (*Handb. d. A. T. Richt.*, p. 67) appears to be the more correct one, that Ashtoreth is the proper name of the goddess, whilst Asherah is the name of the image or symbol of the goddess. This symbol seems in all cases to have been of wood (see e.g. Judg. vi. 25-30; 2 K. xxiii. 14), and the most probable etymology of the term (אֲשֶׁרָה = אֶשֶׁר, to be straight, direct) indicates that it was formed of the straight stem of a tree, whether lying or set up for the purpose, and thus points us to the phallic rites with which no doubt the worship of Ashtar was connected. [ASHTORETH.] See also EGYPT. [F. W. G.]

**ASHES.** The ashes on the altar of burnt-offering were gathered into a cavity in its surface or a heap called the apple (תפוח), from its round shape (Cramer, *de Ara exteriori*), said to have sometimes amounted to 300 Cors; but this Maimon, and others say is spoken *hyperbolice*. On the days of the three solemn festivals the ashes were not removed, and the accumulation taken away afterwards in the morning, the priests casting lots for the office (*Mishna Temid.* i. 2, and ii. 2). The

\* Achshaph (LXX. Κεάφ or Καάφα) must be *Chaiya*: Robinson's identification (iii. 55) is surely too far inland. Alammelech was probably on the *Nahr el-Melech*, a tributary of the Kishon. Jipthah-el may be *Jefit* (Rob. iii. 107). Bethlehem (*Beit Lahm*) is 10 miles inland from the shore of the bay of *Chaiya* (Rob. 113); and as it was in Zebulun, it fixes the distance of Asher's boundary as less than that from the sea.

<sup>b</sup> For the crops, see Rob. iii. 102; for the oil, Kenrick, 31; Reland, 817.

<sup>c</sup> Zidon was then distinguished by the name *Rabbah*—"the Strong," Josh. xix. 28.

<sup>d</sup> This name is added by the LXX. Compare Josh. xvii. 11.

<sup>e</sup> This would be well compensated for if the ancient legend could be proved to have any foundation, that the parents of St. Paul resided at Giscala, or Gush Chaleh, i. e. the Ahlab of Asher (Judg. i. 31). See Reland, 813.

ashes of a red heifer burnt entire, according to regulations prescribed in Num. xix., had the ceremonial efficacy of purifying the unclean (Heb. ix. 13), but of polluting the clean. [SACRIFICE.] Ashes about the person, especially on the head, were used as a sign of sorrow. [MOURNING.] [H. H.]

**ASH'IMA** (אֲשִׁימָה; 'Ασιμα; *Asima*), a god worshipped by the people of Hamath. The worship was introduced into Samaria by the Hamathite colonists whom Shalmanezzer settled in that land (2 K. xvii. 30). The name occurs only in this single instance. The Talmudists say that the word signifies a goat without hair, or rather with short hair (Buxtorf, *Lecc. Talm.*), and from this circumstance Ashima has been regarded as identical with the Mendesian god of the Egyptians (considered by the Greeks to be Pan), to whom the goat was sacred. This god has also by some been identified with the Phœnician god Esmûn (see Winer, *Realw.*), whose name is frequently found in Phœnician inscriptions as a component of the names of persons, and who is regarded as the Phœnician Aesculapius (Gesen. *Mon. Phœn.* pp. 136, 347). The two conjectures are not necessarily discrepant, since to the Phœnician Esmûn belong the characteristics both of Pan and of Aesculapius (Movers, *Phœnizier*, i. 532). There are many other conjectures of Jewish writers respecting this god, but they are of no authority whatever. [F. W. G.]

**ASH'KELOH, AS'KELOH**, Apocr. **AS'CALON** (אֲשִׁקְלוֹן; once "the Eshkalonite,"

אֲשִׁקְלוֹנִי; 'Ασκαλων; Saml. عسقلان (note the

change from Aleph to Ain); *Ascalon*), one of the five cities of the lords of the Philistines (Josh. xiii. 3; 1 Sam. vi. 17), but less often mentioned, and, apparently, less known to the Jews than the other four. This, doubtless, arose from its remote situation, alone, of all the Philistine towns, on the extreme edge of the shore of the Mediterranean (Jer. xlvii. 7), and, also, well down to the south. Gaza, indeed, was still further south, but then it was on the main road from Egypt to the centre and north of Palestine, while Ashkelon lay considerably to the left. The site, which retains its ancient name, fully bears out the above inference: but some indications of the fact may be traced, even in the scanty notices of Ashkelon which occur in the Bible. Thus, the name is omitted from the list in Josh. xv. of the Philistine towns falling to the lot of Judah (but comp. Jos. Ant. V. 1, §22, where it is specified), although Ekron, Ashdod and Gaza are all named; and considerable uncertainty rests over its mention in Judg. i. 18 (see Bertheau in *Ezeq. Handb.*). Samson went down from Timnath to Ashkelon, when he slew the thirty men and took their spoil, as if to a remote place whence his exploit was not likely to be heard of; and the only other mention of it in the historical books is in the formulaic passages, Josh. xiii. 3, and 1 Sam. vi. 17, and in the casual notices of Jud. ii. 28; 1 Mac. x. 86, xi. 60, xii. 33. The other Philistine cities are each distinguished by some special occurrence or fact connected with it, but except the one exploit of Samson, Ashkelon is to us no more than a name. In

the poetical books it occurs 2 Sam. i. 20; Jer. xxv. 20, xlvii. 5, 7; Am. i. 8; Zeph. ii. 4, 7; Zech. ix. 5.

In the post-biblical times Ashkelon rose to considerable importance. Near the town—though all traces of them have now vanished—were the temple and sacred lake of Derceto, the Syrian Venus; and it shared with Gaza an infamous reputation for the steadfastness of its heathenism and for the cruelties there practised on Christians by Julian (Reland, 588, 590). "The soil around the town was remarkable for its fertility; the wine of Ascalon was celebrated, and the *Al-henna* plant flourished better than in any other place except Canopus" (Kenrick, 28). It was also celebrated for its cypresses, for figs, olives, and pomegranates, and for its bees, which gave their name to a valley in the neighbourhood (Kenrick, 28; Edrisi and Ibn Batuta in Ritter, *Palaestina*, 88). Its name is familiar to us in the "Eschalot" or "Shallot," a kind of onion, first grown there, and for which this place was widely known. "The sacred doves of Venus still fill with their cooings the luxuriant gardens which grow in the sandy hollow within the ruined walls" (Stanley, 257). Ascalon played a memorable part in the struggles of the Crusades. "In it was entrenched the hero of the last gleam of history which has thrown its light over the plains of Philistia, and within the walls and towers now standing Richard held his court" (Stanley, *ibid.*). By the Mahomedan geographers it was called "the bride of Syria" (Schultens, *Index Geogr.*).

"The position of the town is naturally very strong: the walls are built on a ridge of rock which winds in a semicircular curve around the town and terminates at each end in the sea. There is no bay or shelter for ships, but a small harbour towards the east advanced a little way into the town, and anciently bore, like that of Gaza, the name of Majumas" (Kenrick, 28).

In the time of Origen some wells of remarkable shape were shown near the town, which were believed to be those dug by Isaac, or at any rate, to be of the time of the patriarchs. In connexion with this tradition may be mentioned the fact that in the Samaritan version of Gen. xx. 1, 2, and xxvi. 1, Askelon (אֲשִׁקְלוֹן) is put for the "Gerar" of the Hebrew text. [G.]

**ASH'KENAZ** (אֲשִׁכְנַז; 'Ασκαναζ; *Ascanaz*), one of the three sons of Gomer, son of Japhet (Gen. x. 3), that is, one of the peoples or tribes belonging to the great Japhetic division of the human race, and springing immediately from that part of it which bears the name of GOMER. The original seat of the people of Ashkenaz was undoubtedly in the neighbourhood of Armenia, since they are mentioned by Jeremiah (li. 27) in connexion with the kingdoms of Ararat and Minni. We are not, however, on this account to conclude that they, any more than the Gomerites in general, were confined to this locality. Assuming here, what will be more properly discussed under the word JAPHET, that the Japhetic tribes migrated from their original seats westward and northward, thus peopling Asia Minor and Europe, we may probably recognise the tribe of Ashkenaz on the northern shore of Asia Minor, in the name of Lake Ascanian, and in Europe in the name *Scand-in*,

<sup>1</sup> The usual form would be אֲשִׁקְלוֹן, *Ashkal*. Rödiger (in Gesenius, 1476) suggests that the uncommon termination is a Philistine form.

<sup>2</sup> Note here, as in the Arabic, the substitution of *Ain* for *Aleph*.

*Scand-inavia*. Knobel (*Völkertafel*, p. 35) regards the word as a compound (אֲשֵׁנָה), the latter element being equivalent to the Gr. *génos*, Lat. *gens*, *genus*, Eng. *kind*, *kin*; the meaning therefore being the *As*-race. If this be so, it would seem that we here find the origin of the name Asia, which has subsequently been extended to the whole eastern part of the world. Knobel considers that Ashkenaz is to be identified with the German race. It is worthy of notice, though possessing little weight as evidence for this view, that the rabbins, even to the present day, call Germany אֲשֵׁנָה. The opinion of Gores (*Völkertafel*, p. 92) that Ashkenaz is to be identified with the Cynry or Gaelic race seems less probable than that of Knobel. [F. W. G.]

**ASH'NAH** (אֲשֵׁנָה), the name of two cities of Judah, both in the Shefelah or Lowland; (1) named between Zween and Zanoah, and therefore probably N.W. of Jerusalem (Josh. xv. 33; *'Asna*; *Asena*); and (2) between Jiphthah and Neah, and therefore to the S.W. of Jerusalem (Josh. xv. 43; *Esna*). Each, according to Robinson's Map (1857), would be about 16 miles from Jerusalem, and therefore corresponding to the Bethsan of the Onomast. Eusebius names another place, *'Asna*, but with no indication of position. [G.]

**ASH'PENAZ** (אֲשֵׁפֶנָּז), of uncertain origin, yet see Hitzig on Dan. i. 3, and compare the form אֲשֵׁפֶנָּז, Gen. x. 3; LXX., *'Αβσεφρ* = עֲפֹרָה (?) *'Aspawē*, Theodot.; *Asplaz*, *Abizer*, (Syr.), the master of the eunuchs of Nebuchadnezzar (Dan. i. 3). [B. F. W.]

**ASH'TAROTH**, and (once) **AS'TAROTH** (עֲשְׁתָּרוֹת; *'Ashtarōth*; *Astaroth*), a city on the E. of Jordan, in Bashan, in the kingdom of Og, doubtless so called from being a seat of the worship of the goddess of the same name. [ASHTORETH.] It is generally mentioned as a description or definition of Og,—who “dwelt in Astaroth in Edrei” (Deut. i. 4), “at Ashtuoth and at Edrei” (Josh. xii. 4, xiii. 12), or “who was at Ashtuoth” (ix. 10). It fell into possession of the half tribe of Manasseh (Josh. xiii. 31), and was given with its suburbs or surrounding pasture-lands (מִנְיָה) to the Gershonites (1 Chr. vi. 71 [56], the other Levitical city in this tribe being Golan. In the list in Josh. xxi. 27, the name is given as Beeshterah (quasi *'בית* = “house of A.”; Reland, 621 Gesenius, *Thes.* 175 a, 196 w, 1083). Nothing more is heard of Ashtarothe. It is not named in any of the lists, such as those in Chronicles, or of Jeremiah, in which so many of the trans-Jordanic places are enumerated. Jerome (*Onom. Astaroth*) states that in his time it lay six miles from Adin, which again was 25 from Bostra. Eusebius and he further (*Asteroth Carnaim*) speak of two *kasal*, or castella, which lay nine miles apart, “inter Adaram et Abilam civitates.” One of these was possibly that first named above, and the other may have been Ashteroth-karnaim. The only trace of the name yet recovered in these interesting districts is *Tell-Ashterah* or *Asherah* (Ritter, *Syria*, 819; Porter, ii. 212), and of this nothing more than the name is known. Uzziah the Ashterathite is named in 1 Chr. xi. 44. [G.]

**ASHTEROTH - KARNAIM** (עֲשְׁתָּרוֹת קַרְנַיִם) = “Ashtarothe of the two horns or peaks;”

Sam. Vers. עֲשִׁינִיתִק; Saad. الصنمين; *'Ashtarōth kal* (Alex. omits *kal*) *Karnain*; *Astaroth Carnaim*), a place of very great antiquity, the abode of the Rephaim at the time of the incursion of Chedorlaomer (Gen. xiv. 5), while the cities of the plain were still standing in their oasis. The name reappears but once, and that in the later history of the Jews, as Carnaim, or Carnion (1 Macc. v. 26, 43, 44; 2 Macc. xii. 21, 26; Jos. Ant. xii. 8, §4), “a strong and great city,” “hard to besiege,” with a “temple (τὸ τέμενος) of Atargatis” (τὸ *'Atraparaiōn*), but with no indication of its locality, beyond its being in “the land of Galaad.”

It is usually assumed to be the same place as the preceding [ASHTAROTH], but the few facts that can be ascertained are all against such an identification. 1. The affix “Karnaim,” which certainly indicates some distinction, and which in the times of the Maccabees, as quoted above, appears to have superseded the other name. 2. The fact that Eusebius and Jerome in the Onomasticon, though not very clear on the point, yet certainly make a distinction between Ashtarothe and A.-Carnaim, describing the latter as a *καὶ μεγίστην τῆς 'Αραβίας*, vicus grandis in angulo Batanaeae. 3. Some weight is due to the renderings of the Samaritan version, and of the Arabic version of Saadiah, which give Ashtarothe as in the text, but A.-Karnaim by entirely different names (see above). The first of these, *Aphnith*, does not appear to have been yet recognised; but the second, *es-Sumamein*, can hardly be other than the still important place which continues to bear precisely the same name, on the Haj route, about 25 miles south of Damascus, and to the N.W. of the *Lejch* (Burekh. 55; Ritter, *Syria*, 812). Perhaps it is some confirmation of this view that while the name Karnaim refers to some double character in the deity there worshipped, *es-Sumamein* is also dual, meaning “the two idols.” There accordingly we are disposed to fix the site of Ashtarothe-Karnaim in the absence of further evidence. [G.]

**ASHTORETH** (עֲשְׁתָּרֶת; *'Ashtarēth*; *Astarte*), the principal female divinity of the Phoenicians, as Baal was the principal male divinity. It is a peculiarity of both names that they frequently occur in the plural and are associated together in this form (Judg. x. 6; 1 Sam. vii. 4, xii. 10). Gesenius (*Thes. s. vv.*) maintained that by these plurals were to be understood statues of Baal and Astarte; but the more correct view seems to be that of Movers (*Phön. i.* 175, 602), that the plurals are used to indicate different modifications of the divinities themselves. In the earlier books of the O. T., only the plural, Ashtarothe, occurs, and it is not till the time of Solomon, who introduced the worship of the Sidonian Astarte, and only in reference to that particular goddess, Ashtoreth of the Sidonians, that the singular is found in the O. T. (1 K. xi. 5, 33; 2 K. xxiii. 13). The worship of Astarte was very ancient and very

\* This was held by the Jews at the date of the Talmud to refer to its situation between two high peaked hills (see Sukkah, fol. 2), though it more probably alludes to the worship of the horned goddess, the “mooned Ashtarothe.”

widely spread. We find the plural Ashtaroth united with the adjunct Karmain as the name of a city as early as the time of Abraham (Gen. xiv. 5), and we read of a temple of this goddess, apparently as the goddess of war, amongst the Philistines in the time of Saul (1 Sam. xxi. 10). From the connexion of this goddess with BAAL or BEL we should moreover naturally conclude that she would be found in the Assyrian pantheon, and in fact the name Ishtar appears to be clearly identified in the list of the great gods of Assyria (Layard, *N. and B.*, 352, 629; Rawlinson, *Early History of Babylon*, Lond. 1854, p. 23; Rawlinson, *Herodotus*, i. 634). There is no reason to doubt that this Assyrian goddess is the Ashtoreth of the Old Testament and the Astarte of the Greeks and Romans. The worship of Astarte seems to have extended wherever Phœnician colonies were founded. Thus we find her name in inscriptions still existing in the island of Cyprus on the site of the ancient Citium, and also at Carthage (Ges. *Mon. Phœn.*, pp. 125, 449), and not infrequently as an element in Phœnician proper names, as *Ἀστάρτος*, *Ἀβδαστάρτος*, *Δελειαστάρτος* (Jos. c. Ap. i. 18). The name occurs moreover written in Egyptian hieroglyphics, as *Astart* (Ges. *Thec. s. v.* For evidence of her wide-spread worship see also Eckhel, *Doct. Num.* iii. 369 sqq.). It is worthy of remark that Rödiger in his recently published Addenda to Gesenius' *Thesaurus* (p. 106) notices that in the inscription on the sarcophagus of a king named Esmunazar discovered in January, 1855 (see Robinson, iii. 36, note), the founding, or at least restoration, of the temple of this goddess at Sidon, is attributed to him and to his mother Amashitoreth, who is further styled priestess of Ashtoreth.

If now we seek to ascertain the character and attributes of this goddess we find ourselves involved in considerable perplexity. There can be no doubt that the general notion symbolized is that of productive power, as Baal symbolizes that of generative power, and it would be natural to conclude that as the sun is the great symbol of the latter, and therefore to be identified with Baal, so the moon is the symbol of the former and must be identified with Astarte. That this goddess was so typified can scarcely be doubted. The ancient name of the city, Ashtaroth-Karmain, already referred to, seems to indicate a horned Astarte, that is an image with a crescent moon on her head like the Egyptian Athor. At any rate it is certain that she was by some ancient writers identified with the moon, thus Lucian (*De Syria Dea*, 4) says, *Ἀστάρτην δ' ἐγὼ δοκέω Σεληναίην ἔμμεναι*. And again Herodian, v. 6, 10, *Ὀυρανίαν Φολίβικης Ἀστάρτην* (a greisied form of Astarte) *ὀνομάζουσι, σεληνὴν εἶναι θέλοντες*. On these grounds Movers, Winer, Keil, and others maintain that originally Ashtoreth was the moon-goddess. On the other hand it appears to be now ascertained that the Assyrian Ishtar was not the moon-goddess, but the planet Venus (Rawlinson, *Herod.* i. c.), and it is certain that Astarte was by many ancient writers identified with the goddess Venus (or Aphrodite) as well as also with the planet of that name. The name itself seems to be identical with our word *Star*, a word very widely spread (Sanskrit, *tara*;

Zend, *starānm*; Pehlevi, *setaran*; Pers. *استاره*, *istarah*; Gr. *ἀστὴρ*; Lat. *stella*). Though this derivation is regarded as doubtful by Keil, from

the absence of the initial *Y* in all the presumed representatives of the word (*Ἀστὴρ*, i. 168, Eng. tr. i. 189), it is admitted by Gesenius, Fürst, Movers, and most Hebrew critics on apparently good grounds. On the whole it seems most likely that both the moon and the planet were looked upon as symbols, under different aspects and perhaps at different periods, of the goddess, just as each of them may in different aspects of the heavens be regarded as the "queen of heaven."

The inquiry as to the worship paid to the goddess is not less perplexed than that of the heavenly body in which she was symbolized. Movers (*Phœn.* 607) distinguishes two Astartes, one Carthaginian-Sidonian, a virgin goddess symbolized by the moon, the other Syro-Phœnician symbolized by the planet Venus. Whether this be so or not, it is certain that the worship of Astarte became identified with that of Venus: thus Cicero (*de Nat. Deor.* iii. 23) speaks of a fourth Venus, "Syria Tyroque concepta, quæ Astarte vocatur," and that this worship was connected with the most impure and licentious rites is apparent from the close connexion of this goddess with ASHERAH, or, as our translators rendered the word, "groves." It is not necessary that we should here enter further into the very perplexed and revolting subject of the worship of this goddess. The reader who wishes to pursue the inquiry may find ample details in Movers' *Phœnizier*, already referred to, and in Creuzer's *Symbolik*. [F. W. G.]

**ASH-TREE** (אֶשְׁתֵּי, 'Oren, rendered by the LXX. *πίπτος*, and by the Vulg. *pinus*). It is mentioned only in Is. xiv. 14, in connexion with other timber trees. The similarity of sound favours the notion that it is the Latin *ornus*, or ash-tree; and Celsius (*Herobot.* i. 192) takes it to be the Arabic *س-ع*

أرن, which, according to Sprengel (*Hist. rei herb.* i. 14) is the *Capparis spinosa* of Linnaeus, a thorny tree producing bitter berries. Gesenius, however, prefers to render it by *pine*, on the authority of the LXX. and Vulg., and supposes the name to have arisen from the gracefulness of its form, the root being אֶשְׁתֵּי, which in Arabic signifies *agilis, gracilis fuit*. [W. D.]

**ASHUR** (אַשּׁוּר; 'Ashw, 'Assour; *Ashur*, *Assur*), the "Father of Tekoa" (1 Chr. ii. 24, iv. 5).

**ASHURITES**, the (אַשּׁוּרִי; τὸν Ἀσσυρί; Alex. *Assour*; *Cessuri*). This name occurs only in the enumeration of those over whom Ishbosheth was made king (2 Sam. ii. 9). By some of the old interpreters—Arabic, Syriac, and Vulgate versions—and in modern times by Ewald (*Gesch.* iii. 145), the name is taken as meaning the Geshurites, the members of a small kingdom to the S. or S.E. of Damascus, one of the petty states which were included under the general title of Aram. [ARAM; GESHUR.] The difficulty in accepting this substitution is that Geshur had a king of its own, Ta'mai, whose daughter moreover was married to David somewhere about this very time (1 Chr. iii. 2, compared with 4), a circumstance not consistent with his being the ally of Ishbosheth, or with the latter being made king over the people of Geshur. Talamai was still king many years after this occurrence (2 Sam. xiii. 37). In

addition, Geshur was surely too remote from Mahanaim and from the rest of Ishbo-heth's territory to be intended here.

It would therefore be perhaps safer to follow the Targum of Jonathan, which has Beth-Asher, בֵּית אֲשֶׁר, "the house of Asher," a reading supported by several MSS. of the original text, which, omitting the Vau, have אֲשֶׁרִי (Davidson, *Hebr. Text*, ad loc.). "The Asherites" will then denote the whole of the country west of the Jordan above Jezreel (the district of the plain of Esdraelon), and the enumeration will proceed regularly from north to south, Asher to Benjamin. The form "Asherite" occurs in Judg. i. 32.

The reading of the LXX. was evidently quite different: but what it was has not been yet recognised.

There is clearly no reference here to the Asshurim of Gen. xxv. 3. [G.]

† ASHVATH (אֲשָׁוֶת; *Asōth*; *Asoth*), name of a man (1 Chr. vii. 33).

ASIA (ἡ Ἀσία). The passages in the N. T., where this word occurs, are the following: Acts ii. 9, vi. 9, xvi. 6, xix. 10, 22, 26, 27, xx. 4, 16, 18, xxi. 27, xxvii. 2; Rom. xvi. 5 (where the true reading is *'Asias*); 1 Cor. xvi. 19; 2 Cor. i. 8; 2 Tim. i. 15; 1 Pet. i. 1; Rev. i. 4, 11. [CHIEF OF ASIA: see ASIARCH.] In all these passages it may be confidently stated that the word is used, not for "the continent of Asia," nor for what we commonly understand by "Asia Minor," but for a Roman province which embraced the western part of the peninsula of Asia Minor, and of which Ephesus was the capital. This province originated in the bequest of Attalus, king of Pergamum, or king of Asia, who left by will to the Roman Republic his hereditary dominions in the west of the peninsula (B.C. 133). Some rectifications of the frontier were made, and "Asia" was constituted a province. Under the early Emperors it was rich and flourishing, though it had been severely plundered under the Republic. In the division made by Augustus of senatorial and imperial provinces, it was placed in

the former class, and was governed by a proconsul. (Hence ἀὐτοκρατοί, Acts xix. 38, and on coins.) It contained many important cities, among which were the seven churches of the Apocalypse, and it was divided into assize districts for judicial business. (Hence ἀγοπαῖς, i. e. ἡμέραι, Acts, *ibid.*). It is not possible absolutely to define the inland boundary of this province during the life of St. Paul: indeed the limits of the provinces were frequently undergoing change; but generally it may be said that it included the territory anciently subdivided into Aeolis, Ionia, and Doris, and afterwards into Mysia, Lydia, and Caria. [MYSIA, LYCIA, BITHYNIA, PHRYGIA, GALATIA.]

Meyer's comment on Acts xvi. 6 is curious, and neither necessary nor satisfactory. He supposes that the divine intimation given to St. Paul had reference to the continent of Asia, as opposed to Europe, and that the apostle supposed it might have reference simply to Asia *cis* Taurum, and therefore attempted to penetrate into Bithynia. The view of Meyer and De Wette on Acts xxvii. 2 (and of the former on Acts xiv. 10), viz., that the peninsula of Asia Minor is intended, involves a bad geographical mistake: for this term "Asia Minor" does not seem to have been so applied till some centuries after the Christian era. Moreover the mistake introduces confusion into both narratives. It is also erroneous to speak of Asia in the N. T. as *A. proconsularis*; for this phrase also was of later date, and denoted one of Constantine's subdivisions of the province of which we are speaking.

In the books of Maccabees, where reference is made to the pre-provincial period of this district (B.C. 200-150), we frequently encounter the word Asia in its earlier sense. The title "King of Asia" was used by the Seleucid monarchs of Antioch, and was claimed by them even after it more properly belonged to the immediate predecessors of Attalus (see 1 Macc. xi. 13; Conybeare and Howson's *Life and Epistles of St. Paul*, ch. xiv.; Marquardt's *Röm. Alterthümer*, iii. pp. 130-146). [J. S. H.]

ASIARCHAE (Ἀσιάρχαι; *præcipes Asiæ*, Vulg.; *chief of Asia*, A. V.; Acts xix. 31), officers chosen annually by the cities of that part

Greek Imperial Copper Coin ("medallion") of Laodicea of Phrygia; Commodus; with name of Asiarch.

Obv. : ΑΥΤΑΥΤΑΥΡ ΑΝΤΩΝΕΙΝΟCΕ. Bust of Emperor to right. Rev. : ΕΠΙΛΑΛΗΠ'ΙΤΟCΑCΙΑΡ. ΑΑΟΙΚΕΩΝ ΝΕΟΚΟΡΩΝ. Figure in triumphal quadriga of lions, to left.

of the province of Asia, of which Ephesus was, under Roman government, the metropolis. They had charge of the public games and religious theatrical spectacles, the expenses of which they bore, as was done by the holders of *leitourgyai* at Athens, and

the aediles at Rome (Niebuhr, iii. 35; Gibbon, xv. ii. 205, ed. Smith). Their office was thus, in great measure at least, religious, and they are in consequence sometimes called ἀρχιερεῖς, and their office *ιερωσύνη* (Mart. S. Polycarp. in *Patr. Ap. c.* 21).

Probably it represented the religious element of the ancient Panionian league; to the territorial limits of which also the circle of the functions of the Asiarchs nearly corresponded. (See Herod. i. 142.) Officers called *Ἀσισάρχαι* are mentioned by Strabo (xiv. p. 685), who exercised judicial and civil functions, subject to the Roman government; but there is no evidence to show that the Asiarchs exercised any but the religious functions above-mentioned. Modestinus names *Βιθυνιαρχία* and *Καππαδοκάρχια* as religious offices in Bithynia and Cappadocia. The office of Asiarch was annual, and subject to the approval of the proconsul, but might be renewed; and the title appears to have been continued to those who had at any time held the office. From its costliness, it was often (*ἀεὶ*) conferred on a citizen of the wealthy city of Tralles (Strabo, xiv. p. 649). Philip, the Asiarch at the time of S. Polycarp's martyrdom, was a Trallian. Coins or inscriptions bearing the names of persons who had served the office of Asiarch, once or more times, are known as belonging to the following cities: Aphrodisias, Cyzicus, Hypaepa, Laodicea, Pergamus, Philadelphia, Sardis, Smyrna, Thyatira. (Aristid. *Or.* xvi. p. 518, cl. Dind.; Eekhel, ii. 507; iv. 207; Böckh, *Inscr.* vol. ii.; Van Dale, *Dissert.* p. 274, seq.; Krause, *Cultus Neocorae*, p. 71; Wetstein, *On Acts XIX.*; Akerman, *Numismatic Illustr.* p. 51; Herod. v. 38; Hammond, *On N. T.*) [H. W. P.]

**ASPIBIAS** (*Ἀρεβίας*; *Zabdiās*), name of a man (1 Esd. ix. 29).

**AS'IEL** (*אַשְׁיֵל*; *ʾAsiḥā*; *Asiel*), name of a man (1 Chr. iv. 35).

**ASIPHA** (*Ἀσιφά*; *Guspha*), 1 Esd. v. 29. [HASPPIA.]

**AS'KELON.** [ASHIKELON.]

**ASMODE'US** (*Ἀσμοδαῖος*, Tob. iii. 8), the same as *אַשְׁמֹדַי*, which in Job xxxi. 12, &c., means "destruction," and *Ἀπολλών*, Rev. ix. 11, where he is called "a king, the angel of the bottomless pit," and *ὁ Ὀλοθρευτής*, Wisd. xviii. 25, where he is represented as the "Evil angel" (Ps. lxxviii. 49) of the plague. (Schleusner's *Thesaur.* s. v.) From the fact that the Talmud (col. Gittin. Eccles. i. 12) calls him *מלכא דשיטרי* rex daemonum (cf. Lightfoot, *Hor. Hebr. et Talm.* in Luke xi. 15), some assume him to be identical with Beelzebub, and others with Azrael. The name is derived either from *שָׂמַד*, to destroy, or, according to Reland (Winer, s. v.), from a Persian word = *πειράειν*. In the book of Tobit this evil spirit is represented as loving Sura, the daughter of Raguel, and causing the death of seven husbands, who married her in succession, on the bridal night; gaining the power to do so (as is hinted) through their incontinence. Tobias, instructed by Raphael, burns on "the ashes of perfume" the heart and liver of the fish which he caught in the Tigris; "the which smell when the evil spirit had smelled, he fled into the utmost parts of Egypt, and the angel bound him" (Tob. viii. 3).

It is obviously a vain endeavour to attempt to rationalise this story of

... Asmodeus with the fishy fume  
That drove him, though enamoured, from the spouse  
Of Tobit's son, and with a vengeance sent  
From Media post to Egypt, thence fast bound.

since it is throughout founded on Jewish demonology, and "the loves of the angels," a strange fancy derived from Gen. vi. 2. Those however who attempt this task make Asmodeus the demon of impurity, and suppose merely that the fumes denuded the passions of Tobias and his wife. The rabbis (among other odd fables) make this demon the offspring of the incest of Tubalcain with his sister Noema, and say (in allusion to Solomon's many wives) that Asmodeus once drove him from his kingdom, but being dispossessed was forced to serve in building the temple, which he did noiselessly, by means of a mysterious stone Shamir (Calmet, s. v. and *Fragments*, 271, where there is a great deal of fanciful and groundless speculation.) [F. W. F.]

**AS'NAH** (*אַסְנָה*; *ʾAsenā*; *Asena*), name of a man (Ezr. ii. 50). [See *ASENATH*.]

**ASNAPPER** (*אַסְנַפָּר*; Syr. *Espil*; *Asse-naphar*; *Asenaphar*), mentioned in Ezr. iv. 10, with the epithets "great and noble," as the person who settled the Cuthemics in the cities of Samaria. He has been variously identified with Salmanser, Sennacherib, and Esar-laddon. Of the three the third is the most probable, as Gesenius says, since in ver. 2 of the same chapter the Cuthemics attribute their settlement to that king. But on the whole, as this is but slight evidence, it seems better to accept Patrick's view (*Comm. in loco*), that Asnapper was "some great commander, who was entrusted by one of these kings to conduct them, and bring them over the river Euphrates, and see them settled in Samaria." [G. E. L. C.]

**AS'SOM** (*אַסּוּם*; *Asom*), 1 Esd. ix. 33. [HASIUM.]

**ASP** (*אַפְתָּן*, *Pethen*; *ἄσπις*, LXX.; identical with the adder mentioned in Ps. lviii. 4, xci. 13. It occurs in Deut. xxiii. 33; Job xx. 14, 16; Is. xi. 8; and Rom. iii. 13. It is the Coluber Naja of Egypt, and is very poisonous. See *ADDER*. [W. D.]

**AS'PATHA** (*אַסְפַּתְחָה*; *Ἐσπαθᾶ*; *Esphatha*), third son of Haman (Esth. ix. 7).

**AS'PHAR, THE POOL** (*Ἰακκὸς Ἀσφάρ*) in the "wilderness of Theco." By this "pool" Jonathan and Simon Maccabaeus encamped at the beginning of their struggle with Bacchides (1 Mac. ix. 33; Joseph. *Ant.* xiii. 1, §2). Is it possible that the name is a corruption of *Ἰακκὸς Ἀσφαλτῖτης*? [G.]

**ASPHAR'ASUS** (*Ἀσφαράσος*; *Mechsapsator-chor*), 1 Esd. v. 8. [MIZPAR.]

**AS'RIEL** (*אַשְׁרִיֵּל*; *ʾEsriḥā*; *Asriel*, *Esriel*), a son of the patriarch Manasseh (Num. xxi. 31; Josh. xvii. 2; 1 Chr. vii. 14).

**ASS**, a quadruped frequently mentioned in Scripture. The name is assigned by the A. V. to several distinct Heb. words, viz. *אַתֹּן*, *חֲמֹר*, *עִיר*, *עֹרֹד*, and *פָּרָה*, and the Greek words *βους* and *εὑποδύσιον*. It occurs also in two passages of Eccles. xiii. 19, xxxiii. 24, in the first of which it stands for *δυναππος*.

*ʾAthōn* (*אַתֹּן*), a she-ass of the domestic kind, so called from its slowness, being from the root *אָתַן*, unused in Heb., but having in Arab. the meaning, *contracto brevique passu incessit*. It is men-

tioned several times in Genesis, twice as distinguished from חמור. It occurs also in Num. xlii., where Balaam's ass is mentioned, and also in 1 Sam. ix., x., in the account of Saul being sent to seek his father's asses. Also in 2 K. iv. 22, 24, and 1 Chr. xxvii. 30. In the two passages of Genesis (xii. 16, xiv. 23) where אֲתוֹן contrasts with חמור, the LXX. have ὄμιλος, but in the other passages either ὁ ὄνος, or ὄνος θηλεία. In Zech. ix. 9, only do they depart from their usual rendering, and express עֵזֶר בְּרִחְתָּנֹת by πῶλον νέον.

Chamôr (חמור) is the general term for the male ass, whether domesticated or not, and is derived from the root חמר, *rubuit*, because of its reddish colour, as in Spanish they call the ass *burro*, *burrico* = *ruber*, and in Gr. from πυρρός comes πύρριχος, sc. ἵππος. The Hebrews used the ass as a beast of burden, for ploughing, and for riding, and held it in considerable esteem. The comparison of Isachar to a strong ass (Gen. xlix. 14) is not intended as a reproach, though with the Greeks, the Romans, the Egyptians and other nations, the stupidity of the ass became a proverb. In the law of Moses (Deut. xxii. 10) it was forbidden to plough with the ox and the ass yoked together: it was also unclean because it did not chew the cud (Lev. xi. 26); and hence the force of the statement in 2 K. vi. 25, "And there was a great famine in Samaria: and behold, they besieged it, until an ass's head was sold for fourscore pieces of silver," &c.; for there could be no stronger proof of the straits the besieged were put to than that they should eat what was unclean. The imputation cast upon the Jews in ancient times of worshipping an ass's head, has been variously explained. The conjectures on this matter are some of them ingenious, but all unsatisfactory. The LXX. usually render חמור by ὁ ὄνος.

ʿAtr. (עֵזֶר, from root עֵזַר, *fervere, aestuare*) signifies a young male ass. The A. V., in Judg. x. 4, xii. 14, renders it *ass colts*; in Gen. xxvii. 15, xlii. 11, *foal*; in Job xi. 12, *colt*; and in Isa. xxx. 6, 24, *young asses*. In the four first passages the LXX. have πῶλος. In Job and Isaiah ὄνος. The ass is a lascivious animal; hence the derivation of this word; and possibly also of חמור, for one meaning of חמר is *aestuavit*.

ʿArôd (עֲרֹד). This animal is mentioned in Job xxxix. 5, in company with the פָּרָא, and both are rendered in A. V. by *wild ass*. The LXX. omit עֲרֹד. Gesenius says עֲרֹד = פָּרָא, the former being the Aramean, the latter the Heb. form; but probably two distinct animals are meant. We have the Chald. plur. emphat. עֲרֹדִיא, from עֲרַד, in Dan. v. 21, which is rendered by Theodot. ὄνδ-γγων. The עֲרֹד is probably the wild mule of Mongolia, which is superior to the onager in strength, beauty, and swiftness. The derivation is from an unused root עֲרַד, which in the Arab signifies *fugit* (cognate of עָרַד, *tremuit, trepidavit*). Bochart (*Hieroz.* ii. p. 218, Lips.) suspects the name עֲרֹד to be onomatopœtic, from the neighing of the animal when it sees man; and Gesenius thinks that there may be some truth in this con-

jecture, although we have no confirmation of it in the other Semitic dialects. In Sanscrit *rud* = *flere*, to weep.

Pere (פָּרַע), the wild ass of Asia, formerly found in Syria, but now very rare in Western Asia, but still found in Arabia and Persia. Gesenius refers to Ker Porter's *Travels in Georgia and Persia*, i. p. 459, for a description and figure of this animal, agreeing precisely with a living example which he saw in the Zoological Gardens in London in 1835. The chase of this animal by the soldiers of the army of Cyrus is related by Xenophon. Martial calls it *pulcher onager*; and Opyian has described its beauty, fleetness, and untameableness. The word occurs in Gen. xvi. 12, where it is said that Ishmael shall be פָּרַע אֲדָם, rendered in A. V. a *wild num*, in Ps. civ. 11; in several passages of Job; Isa. xxxii. 14; Jer. ii. 24, xiv. 6; and Hos. viii. 9. The LXX. variously render it by ὄναγρος, ὄνος ἄγριος, ὄνος ἐρημίτης, and ὄνοι ἐν ἄγρῳ. The derivation is from פָּרַע, *cito ferri, cito currere, onagrum agere*. See Hos. xiii. 15, where פָּרַע, *onagrum egit*, = *feraciter egit instar onagri*. [W. D.]

ASSA'BIAS (ʿAsaβlas; *Hasebiats*), 1 Est. i. 9. [HASHABIAH.]

ASSAI/TMOTHI (Σαλιμῶθ; *Salimoth* (39)), 1 Est. vii. 36. [SHELOMITH.]

ASSA'NIAS (Σαυλας; *Assanias*), 1 Est. viii. 54. [HASHABIAH.]

ASSH'UR. [ASSYRIA.]

ASSIDE'FANS (ʿAsidaiot; *Assidai*; i. e. אֲסִידִיִּם, *the pious*, "puritans"; oi εὐσεβεῖς, oi δῖοι), the name assumed by a section of the orthodox Jews (1 Macc. ii. 42, alii 'Ιουδαίων probably by correction; 1 Macc. vii. 13; 2 Macc. xiv. 6), as distinguished from "the impious" (oi ἀσεβεῖς, 1 Macc. iii. 8, vi. 21, vii. 5, &c.), "the lawless" (oi ἄνομοι, 1 Macc. iii. 6, ix. 23, &c.), "the transgressors" (oi παράνομοι, 1 Macc. i. 11, &c.), that is, the Hellenizing faction. They appear to have existed as a party before the Maccabean rising, and were probably bound by some peculiar vow to the external observance of the Law (1 Macc. ii. 42, ἐκουσιάζεσθαι τῷ νόμῳ). They were among the first to join Mattathias (1 Macc. i. c.); and seem afterwards to have been merged in the general body of the faithful (2 Macc. vi. 6, oi λεγόμενοι τῶν 'Ιουδαίων Ἀσιδαῖοι, ὡν ἀπήγειντα Ἰουδας ὁ Μακκαβαῖος . . .). When Ptolemy came against Jerusalem they used their influence (1 Macc. vii. 13, πρῶτοι oi Ἀσιδ. ἥσαν ἐν υἱοῖς Ἰσραὴλ) to conclude a peace, because "a priest of the seed of Aaron" (Alcimus) was with him, and sixty of them fell by his treachery [ALCIMUS]. The name *Chasidim* occurs frequently in the Psalms (e. g. Ps. lxxix. 2 = 1 Macc. vii. 17; cxxlii. 9, &c.); and it has been adopted in recent times by a sect of Polish Jews, who take as the basis of their mystical system the doctrines of the Cabbalistic book Zohar (Beer, *Kirsch und Gruber*, s. v. *Chassidder*). [B. F. W.]

AS'SIR (ʿAsir; ʿAsir; *Aser, Asir*).  
1. Son of Korah (Ex. vi. 24; 1 Chr. vi. 22).  
2. Son of Ephiasaph, and a forefather of Samuel (1 Chr. vi. 23, 37).  
3. Son of Jeconiah (1 Chr. iii. 17), unless אֲסִיר יְכִיָּה be translated "Jaconiah the captive" (Berthieu *ad loc.*). [G.]

**AS'SOS** or **AS'SUS** (*Ἀσσός*), a town and seaport of the Roman province of **ASIA**, in the district anciently called Mysia. It was situated on the northern shore of the gulf of **ADRAMYTTIUM**, and was only about seven miles from the opposite coast of Lesbos, near Methymna (Strab. xiii. p. 618). A good Roman road, connecting the towns of the central parts of the province with Alexandria Troas [**TROAS**] passed through Assos, the distance between the two latter places being about 20 miles (*Itin. Anton.*). These geographical points illustrate St. Paul's rapid passage through the town, as mentioned in Acts xx. 13, 14. The ship in which he was to accomplish his voyage from Troas to Caesarea went round Cape Lectum, while he took the much shorter journey by land. Thus he was able to join the ship without difficulty, and in sufficient time for her to anchor off Mitylene at the close of the day on which Troas had been left.

The chief characteristic of Assos was that it was singularly Greek. Fellows found there "no trace of the Romans." Leake says that "the whole gives perhaps the most perfect idea of a Greek city that anywhere exists." The remains are numerous and remarkably well preserved, partly because many of the buildings were of granite. The citadel, above the theatre, commands a glorious view, and must itself have been a noble object from the sea. The Street of Tombs, leading to the Great Gate, is one of the most remarkable features of Assos. Illustrations of the ancient city will be found in Texier, Charné, Fellows, and Choiseul-Gouffier. It is now utterly desolate. Two monographs on the subject are mentioned by Winer: Quandt, *De Asson*. Region. 1710; Amnell, *De Assos*. Ussell, 1758.

It is now a matter of curiosity to refer to the interpretation which used to be given to the words *ἄσος καπελέγγοιτο*, in Acts xvii. 13. In the Vulgate they were rendered "cum sustulissent de Asson," and they were supposed to point to a city of this name in Crete. Such a place is actually inserted by Padre Georgi, in the map which accompanies his *Paulus Naufragus* (Venet. 1730, p. 181). The true sense of the passage was first given by Beza.

[J. S. H.]

**ASSUERUS** (*Ἀσούρος*), Tob. xiv. 15. [**AUSURUS**.]

**ASSUR** (*Ἀσūr*; *Ἀσσοῦρ*). 1. (Ezr. iv. 2; 1s. lxxviii. 8; 2 Esd. ii. 8; Jud. ii. 14; v. 1; vi. 1, 17; vii. 20, 24; xiii. 15; xiv. 3; xv. 6; xvi. 4. [ASSUR; ASSYRIA.]) 2. (*Ἀσούρ*; Alex. *Ἀσούρ*; *Aziu*), 1 Esd. v. 31. [HARRHUR.]

**ASSYRIA**, **ASSI'UR** (*Ἀσσυρία*; *Ἀσσοῦρ*; Jos. *Ἀσσυρία*; *Assur*), was a great and powerful country lying on the Tigris (Gen. ii. 14), the capital of which was Nineveh (Gen. x. 11, &c.). It derived its name apparently from Asshur, the son of Shem (Gen. x. 22), who in later times was worshipped as their chief god by the Assyrians. The boundaries of Assyria differed greatly at different periods. Probably in the earliest times it was confined to a small tract of low country between the *Gebel Maklouh* and the Lesser Zab, or *Zab Asfal*, lying chiefly on the left bank of the Tigris. Gradually its limits were extended, until it came to be regarded as comprising the whole region between the Armenian mountains (lat. 37° 30') upon the north, and upon the south the country about Baghdad (lat. 33° 30'). Eastward its boundary was the high range of Zagros,

or mountains of *Kurdistan*; westward, it was, according to the views of some, bounded by the Mesopotamian desert, while, according to others, it reached the Euphrates. Taking the greatest of these dimensions, Assyria may be said to have extended in a direction from N.E. to S.W. a distance of nearly 500 miles, with a width varying from 350 to 100 miles. Its area would thus a little exceed 100,000 square miles, or about equal that of Italy.

1. *General character of the country.*—The country within these limits is of a varied character. On the north and east the high mountain-chains of Armenia and Kurdistan are succeeded by low ranges of limestone-hills of a somewhat arid aspect, which detach themselves from the principal ridges, running parallel to them, and occasionally inclosing, between their northern or north-eastern flank and the main mountain-line, rich plains and fertile valleys. To these ridges there succeeds at first an undulating zone of country, well watered and fully productive, which finally sinks down with some suddenness upon the great Mesopotamian plain, the modern district of *El-Jezireh*. This vast flat, which extends in length for 250 miles from the latitude of *Mardin* (37° 20') to that of *Tekrit* (34° 33'), and which is in places of nearly equal width, is interrupted only by a single limestone-range—a narrow ridge rising abruptly out of the plain; which, splitting off from Zagros in lat. 33° 30', may be traced under the names of *Sarazir*, *Hamrin*, and *Sinjar*, from *Izan* in Luristan nearly to *Rukhah* on the Euphrates. "From all parts of the plain the Sinjar is a beautiful object. Its limestone rocks, wooded here and there with dwarf oak, are of a rich golden colour; and the numberless ravines which furrow its sides form ribs of deep purple shadow" (Layard, *Nineveh and Babylon*, p. 265). Above and below this barrier, stretching southward and westward further than the eye can reach, and extending northward and eastward 70 or 80 miles to the hill-country before mentioned, is an immense level tract, now for the most part a wilderness, scantily watered on the right bank of the Tigris, but abundantly supplied on the left, which bears marks of having been in early times throughout well cultivated and thickly peopled. This plain is not alluvial, and most parts of it are even considerably raised above the level of the rivers. It is covered in spring time with the richest vegetation, presenting to the eye a carpet of flowers, varying in hue from day to day; but as the summer advances it is parched up, and gradually changes to an arid and yellow waste, except along the courses of the rivers. All over this vast flat, on both sides of the Tigris, rise "grass-covered heaps, marking the site of ancient habitations" (Layard, p. 245). Mr. Layard counted from one spot nearly a hundred (*Nineveh and its Remains*, i. p. 315); from another above 200 of these lofty mounds (*Nineveh and its Remains*, i. p. 245). Those which have been examined have been uniformly found to present appearances distinctly connecting them with the remains of Nineveh. [NINEVEH.] It may therefore be regarded as certain that they belong to the time of Assyrian greatness, and thus they will serve to mark the extent of the real Assyrian dominion. They are numerous on the left bank of the Tigris from *Basra* to the *Diqaleh*, and on the right they thickly stud the entire country both north and south of the *Sinjar* range, extending eastward beyond the *Khabour* (Layard, *cha. xii.-xiv.*)

northward to *Mardin*, and southward to the vicinity of Baghdad.

2. *Provinces of Assyria*.—Assyria in Scripture is commonly spoken of in its entirety, and unless the *Iuzzab* (יִזְזָבָב) of Nahum (ii. 7) is an equivalent for the Adiabene of the geographers, no name of a district can be said to be mentioned. The classical geographers, on the contrary, divided Assyria into a number of regions—Strabo (xvi. §1 and §4) into *Aturia*, *Arbelitis*, *Artacene*, *Apolloniatis*, *Chalonitis*, *Dolomene*, *Calachene*, *Adiabene*, *Mesopotamia*, &c.; Ptolemy (vi. 1) into *Arrapachitis*, *Adiabene*, the *Garumaeen* country, *Apolloniatis*, *Arbelitis*, the country of the *Sinbatas*, *Culacine*, and *Sittacene*. These regions appear to be chiefly named from cities, as *Arbelitis* from *Arbela*; *Calacene* (or *Calachine*) from *Calah* or *Halah* (Gen. x. 11; 2 K. xvii. 6); *Apolloniatis* from *Apollonia*; *Sittacene* from *Sittace*, &c. *Adiabene*, however, the richest region of all, derived its appellation from the *Zab* (ܕܝܒ) rivers on which it lay, as *Ammianus Marcellinus* informs us (xxiii. 20). Ptolemy (v. 18) made *Mesopotamia* (which he understood literally as the whole country between the *Euphrates* and the *Tigris*) distinct from *Assyria*, just as the sacred writers distinguish אֲרָם אֲרָם from אֲשׁוּר. Strabo (xvi. §1) extended *Assyria* to the *Euphrates*, and even across it into *Arabia* and *Syria*!

3. *Chief cities*.—The chief cities of *Assyria* in the time of its greatness appear to have been the following:—*Nineveh*, which is marked by the mounds opposite *Mosul* (*Nebbi-Yunus* and *Koyunjik*); *Calah* or *Halah*, now *Nimrud*; *Ashur*, now *Küch Sheryhat*; *Sargina*, or *Dur-Sargina*, now *Khorsabad*; *Arbela*, still *Arbil*; *Opis* at the junction of the *Diyaleh* with the *Tigris*; and *Sittace*, a little further down the latter river, if this place should not rather be reckoned to *Babylonia*.

4. *Nations bordering on Assyria*.—Towards the north, *Assyria* bordered on the strong and mountainous region of *Armenia*, which may have been at times under *Assyrian* dominion, but was never reckoned an actual part of the country. (See 2 K. xix. 37.) Towards the east her neighbours were originally a multitude of independent tribes, scattered along the *Zagros* chain, who have their fitting representatives in the modern *Kurds* and *Lurs*—the real sovereigns of that mountain-range. Beyond these tribes lay *Media*, which ultimately subjected the mountaineers, and was thereby brought into direct contact with *Assyria* in this quarter. On the south, *Elam* or *Susiana* was the border-state east of the *Tigris*, while *Babylonia* occupied the same position between the rivers. West of the *Euphrates* was *Arabia*, and higher up *Syria*, and the country of the *Hittites*, which last reached from the neighbourhood of *Damascus* to *Anti-Taurus* and *Amanus*.

5. *History of Assyria—original peopling*.—On the subject of the original peopling and early condition of *Assyria* we have more information than is generally possessed with regard to the first beginnings of nations. Scripture informs us that *Assyria* was peopled from *Babylon* (Gen. x. 11), and both classical tradition and the monuments of the country agree in this representation. In *Herodotus* (i. 7), *Ninus*, the mythic founder of *Nineveh*, is the son (descendant) of *Belus*, the mythic founder of *Babylon*—a tradition in which the derivation of

*Assyria* from *Babylon*, and the greater antiquity and superior position of the latter in early times are shadowed forth sufficiently. That *Ctesias* (ap. *Diod. Sic.* ii. 7) inverts the relation, making *Semiramis* (according to him, the wife and successor of *Ninus*), found *Babylon*, is only one out of ten thousand proofs of the untrustworthy character of his history. The researches recently carried on in the two countries clearly show, not merely by the statements which are said to have been deciphered on the historical monuments, but by the whole character of the remains discovered, that *Babylonian* greatness and civilization was earlier than *Assyrian*, and that while the former was of native growth, the latter was derived from the neighbouring country. The cuneiform writing, for instance, which is rapidly punched with a very simple instrument upon moist clay, but is only with much labour and trouble inscribed by the chisel upon rock, must have been invented in a country where men "had brick for stone" (Gen. xi. 3), and have thence passed to one where the material was unsuited for it. It may be observed also, that while writing occurs in a very rude form in the earlier *Babylonian* ruins (*Loftus's Chaldaea*, p. 169), and gradually improves in the later ones, it is in *Assyria* uniformly of an advanced type, having apparently been introduced there after it had attained to perfection.

6. *Date of the foundation of the kingdom*.—With respect to the exact date at which *Assyria* became a separate and independent country, there is an important difference between classical authorities. *Herodotus* and *Ctesias* were widely at variance on this point, the latter placing the commencement of the empire almost a thousand years before the former! Scripture does but little to determine the controversy; that little, however, is in favour of the earlier author. Geographically—as a country—*Assyria* was evidently known to *Moses* (Gen. ii. 14, xxv. 18; Num. xxiv. 22, 24); but it does not appear in Jewish history as a kingdom till the reign of *Menahem* (ab. B.C. 770). In *Abraham's* time (B.C. 1900?) it is almost certain that there can have been no *Assyrian* kingdom, or its monarch would have been found among those who invaded *Palestine* with *Chedorlaomer* (Gen. xiv. 1). In the time of the early Judges (B.C. 1400?) *Assyria*, if it existed, can have been of no great strength; for *Chushan-Rishathaim*, the first of the foreigners who oppressed *Israel* (Judg. iii. 8), is master of the whole country between the rivers (*Aram-Naharaim* = "Syria between the two rivers"). These facts militate strongly against the views of *Ctesias*, whose numbers produce for the founding of the empire the date of B.C. 2182 (*Clinton, F. H.* i. p. 263). The more modest account of *Herodotus* is at once more probable in itself, more agreeable to Scripture, and more in accordance with the native writer *Berosus*. *Herodotus* relates that the *Assyrians* were "lords of Asia" for 520 years, when their empire was partially broken up by a revolt of the subject-nations (i. 95). After a period of anarchy, the length of which he does not estimate, the *Median* kingdom was formed, 179 years before the death of *Cyrus*, or B.C. 708. He would thus, it appears, have assigned to the foundation of the *Assyrian* empire a date not very greatly anterior to B.C. 1228. *Berosus*, who made the empire last 526 years to the reign of *Pul* (ap. *Euseb. Chron. Cum.* i. 4), must have agreed nearly with this view; at least he would certainly have

placed the rise of the kingdom within the 13th century. This is, perhaps, the utmost that can be determined with any approach to certainty. If, for convenience sake, a more exact date be desired, the conjecture of Dr. Brandis has some claim to be adopted, which fixes the year B.C. 1273 as that from which the 526 years of Berosus are to be reckoned (*Rerum Assyriarum Tempora Emendata*, p. 17).

7. *Early kings, from the foundation of the kingdom to Pul.*—The long list of Assyrian kings, which has come down to us in two or three forms, only slightly varied (Clint. *F. II.* i. p. 267), and which is almost certainly derived from Ctesias, must of necessity be discarded together with his date for the kingdom. It covers a space of above 1200 years, and bears marks besides of audacious fraud, being composed of names snatched from all quarters, Arian, Semitic, and Greek—names of gods, names of towns, names of rivers—and in its estimate of time presenting the impossible average of 34 or 35 years to a reign, and the very improbable phenomenon of reigns in half the instances amounting exactly to a decimal number. Unfortunately we have no authentic list to substitute for the forgery of Ctesias. Berosus spoke of 45 kings as reigning during his period of 526 years, and mentioned all their names (Euseb. l. a. c.); but they have unluckily not been preserved to us. The work of Herodotus on Assyrian history (Herod. i. 106 and 184) has likewise entirely perished; and neither Greek nor Oriental sources are available to supply the loss, which has hitherto proved irreparable. Recently the researches in Mesopotamia have done something towards filling up this sad gap in our knowledge; but the reading of names is still so doubtful that it seems best, in the present condition of cuneiform inquiry, to treat the early period of Assyrian history in a very general way, only mentioning kings by name when, through the satisfactory identification of a cuneiform royal designation with some name known to us from sacred or profane sources, firm ground has been reached, and serious error rendered almost impossible.

The Mesopotamian researches have rendered it apparent that the original seat of government was not at Nineveh. The oldest Assyrian remains have been found at *Kileh-Sherghat*, on the right bank of the Tigris, 60 miles south of the later capital; and this place the monuments show to have been the residence of the earliest kings, as well as of the Babylonian governors who previously exercised authority over the country. The ancient name of the town appears to have been identical with that of the country, viz. *Assur*. It was built of brick, and has yielded but a very small number of sculptures. The kings proved to have reigned there are fourteen in number, divisible into three groups; and their reigns are thought to have covered a space of nearly 350 years, from B.C. 1273 to B.C. 930. The most remarkable monarch of the series was called Tiglath-Pileser. He appears to have been king towards the close of the twelfth century, and thus to have been contemporary with Samuel. He overran the whole country between Assyria Proper and the Euphrates; swept the valley of the Euphrates from south to north, from the borders of Babylon to Mount Taurus; crossed the Euphrates, and contended in northern Syria with the Hittites; invaded Armenia and Cappadocia; and claims to have subdued forty-two countries "from the channel of the Lower Zab (*Zab Asfal*) to the Upper Sen of the

Setting Sun." All this he accomplished in the first five years of his reign. At a later date he appears to have suffered defeat at the hands of the king of Babylon, who had invaded his territory and succeeded in carrying off to Babylon various idols from the Assyrian temples.

The other monarchs of the *Kileh-Sherghat* series, both before and after Tiglath-Pileser, are comparatively insignificant. The later kings of the series are only known to us as the ancestors of the two great monarchs, Sardanapalus the first, and his son Shalmaneser or Shalmanubar, who were among the most warlike of the Assyrian princes. Sardanapalus the first, who appears to have been the warlike Sardanapalus of the Greeks (Suidas, s. v.; comp. Hellen. *Fr.* 158), transferred the seat of government from *Kileh-Sherghat* to *Nimrud* (probably the Scriptural Calah), where he built the first of those magnificent palaces which have recently been exhumed by our countrymen. A great portion of the Assyrian sculptures now in the British Museum are derived from this edifice. A description of the building has been given by Mr. Layard (*Nin. and its Remains*, vol. ii. ch. 11). By an inscription repeated more than a hundred times upon its sculptures we learn that Sardanapalus carried his arms far and wide through Western Asia, warring on the one hand in Lower Babylonia and Chaldaea, on the other in Syria and upon the coast of the Mediterranean. His son, Shalmaneser or Shalmanubar, the monarch who set up the Black Obelisk, now in the British Museum, to commemorate his victories, was a still greater conqueror. He appears to have overrun Cappadocia, Armenia, *Azerbyan*, great portions of Media Magna, the Kurdish mountains, Babylonia, Mesopotamia, Syria, and Phœnicia; everywhere making the kings of the countries tributary to him. If we may trust the reading of certain names, on which cuneiform scholars appear to be entirely agreed, he came in contact with various Scriptural personages, being opposed in his Syrian wars by Benhadad and Hazael, kings of Damascus, and taking tribute from Jehu, king of Israel. His son and grandson followed in his steps, but scarcely equalled his glory. The latter is thought to be identical with the Biblical Pul, Phul, or Phaloch [PUL], who is the first of the Assyrian kings of whom we have mention in Scripture.

8. *The kings from Pul to Esarhaddon.*—The succession of the Assyrian kings from Pul almost to the close of the empire is rendered tolerably certain, not merely by the inscriptions, but also by the Jewish records. In the 2nd book of Kings we find the names of Pul, Tiglath-Pileser, Shalmaneser, Sennacherib, and Esarhaddon, following one another in rapid succession (2 K. xv. 19 and 29, xvii. 3, xviii. 13, xix. 37); and in Isaiah we have the name of "Sargon, king of Assyria" (xv. 1), who is a contemporary of the prophet, and who must evidently therefore belong to the same series. The inscriptions, by showing us that Sargon was the father of Sennacherib, fix his place in the list, and give us for the monarchs of the last half of the 8th and the first half of the 7th century B.C. the (probably) complete list of Tiglath-Pileser II., Shalmaneser II., Sargon, Sennacherib, and Esarhaddon. It is not intended in this place to enter into any detailed account of the actions of these kings, which will be more properly related in the articles specially devoted to them. [PUL, SHALMANESER, SARGON, &c.] A few remarks, however, will be

made on the general condition of the empire at this period.

9. *Establishment of the Lower Dynasty.*—It seems to be certain that at, or near, the accession of Pul, a great change of some kind or other occurred in Assyria. Berosus is said to have brought his grand dynasty of 45 kings in 526 years to a close at the reign of Pul (Polyhist. ap. Euseb. l. s. c.), and to have made him the first king of a new series. By the synchronism of Menahem (2 K. xv. 19), the date of Pul may be determined to about B.C. 770. It was only 23 years later, as we find by the Canon of Ptolemy, that the Babylonians considered their independence to have commenced (B.C. 747). Herodotus probably intended to assign nearly to this same era the great commotion which (according to him) broke up the Assyrian empire into a number of fragments, out of which were formed the Median and other kingdoms. These traditions may none of them be altogether trustworthy; but their coincidence is at least remarkable, and seems to show that about the middle of the eighth century B.C. there must have been a break in the line of Assyrian kings—a revolution, foreign or domestic—and a consequent weakening or dissolution of the bonds which united the conquered nations with their conquerors.

It was related by Bion and Polyhistor (Agathias, i. 25), that the original dynasty of Assyrian kings ended with a certain Belochus or Beleus, who was succeeded by a usurper (called by them Beletarus or Balatorus), in whose family the crown continued until the destruction of Nineveh. The general character of the circumstances narrated, combined with a certain degree of resemblance in the names—for Belochus is close upon Phaloch, and Beletarus may represent the second element in Tiglath-Pileser (who in the inscriptions is called "Tiglath-Palatsira")—induce a suspicion that probably the Pul or Phaloch of Scripture was really the last king of the old monarchy, and that Tiglath-Pileser II., his successor, was the founder of what has been called the "Lower Empire." It may be suspected that Berosus really gave this account, and that Polyhistor, who repeated it, has been misreported by Eusebius. The synchronism between the revolution in Assyria and the era of Babylonian independence is thus brought almost to exactness, for Tiglath-Pileser is known to have been upon the throne about B.C. 740 (Clinton, *F. H.*, i. p. 278), and may well have ascended it in B.C. 747.

10. *Supposed loss of the empire at this period.*—Many writers of repute—among them Clinton and Niebuhr—have been inclined to accept the statement of Herodotus with respect to the breaking up of the whole empire at this period. It is evident, however, both from Scripture and from the monuments, that the shock sustained through the domestic revolution has been greatly exaggerated. Niebuhr himself observes (*Vorläge über alte Geschichte*, i. p. 38) that after the revolution Assyria soon "recovered herself, and displayed the most extraordinary energy." It is plain, from Scripture, that in the reigns of Tiglath-Pileser, Shalmaneser, Sargon, Sennacherib, and Esarhaddon, Assyria was as great as at any former era. These kings all warred successfully in Palestine and its neighbourhood; some attacked Egypt (Is. xx. 4); one appears as master of Media (2 K. xvii. 6); while another has authority over Babylon, Susiana, and Elymais (2 K. xvii. 24; Ezr. iv. 9). So far from our observing symptoms of weakness and curtailed

dominion, it is clear that at no time were the Assyrian arms pushed further, or their efforts more sustained and vigorous. The Assyrian annals for the period are in the most complete accordance with these representations. They exhibit to us the above-mentioned monarchs as extending their dominions further than any of their predecessors. The empire is continually rising under them, and reaches its culminating point in the reign of Esarhaddon. The statements of the inscriptions on these subjects are fully borne out by the indications of greatness to be traced in the architectural monuments. No palace of the old monarchy equalled, either in size or splendour, that of Sennacherib at Nineveh. No series of kings belonging to it left buildings at all to be compared with those which were erected by Sargon, his son, and his grandson. The magnificent remains at *Konyjik* and *Khorsabad* belong entirely to these later kings, while those at *Nimrud* are about equally divided between them and their predecessors. It is further noticeable that the writers who may be presumed to have drawn from Berosus, as Polyhistor and Abydenus, particularly expatiated upon the glories of these later kings. Polyhistor said (ap. Euseb. i. 5) that Sennacherib conquered Babylon, defeated a Greek army in Cilicia, and built there Tarsus, the capital. Abydenus related the same facts, except that he substituted for the Greek army of Polyhistor a Greek fleet; and added, that Esarhaddon (his Axerdis) conquered lower Syria and Egypt (*ibid.* i. 9). Similarly Menander, the Tyrian historian, assigned to Shalmaneser an expedition to Cyprus (ap. Joseph. *Ant. Jud.* ix. 14), and Herodotus himself admitted that Sennacherib invaded Egypt (ii. 141). On every ground it seems necessary to conclude that the second Assyrian kingdom was really greater and more glorious than the first; that under it the limits of the empire reached their fullest extent, and the internal prosperity was at the highest.

The statement of Herodotus is not, however, without a basis of truth. It is certain that Babylon, about the time of Tiglath-Pileser's accession, ventured upon a revolt, which she seems afterwards to have reckoned the commencement of her independence [BABYLON]. The knowledge of this fact may have led Herodotus into his error, for he would naturally suppose that when Babylon became free there was a general dissolution of the empire. It has been shown that this is far from the truth; and it may further be observed that, even as regards Babylon, the Assyrian loss was not permanent. Sargon, Sennacherib, and Esarhaddon, all exercised full authority over that country, which appears to have been still an Assyrian fief at the close of the kingdom.

11. *Successors of Esarhaddon.*—By the end of the reign of Esarhaddon the triumph of the Assyrian arms had been so complete that scarcely an enemy was left who could cause her serious anxiety. The kingdoms of Hamath, of Damascus, and of Samaria, had been successively absorbed; Phœnicia had been conquered; Judæa had been made a feudatory; Philistia and Idumæa had been subjected, Egypt chastised, Babylon recovered, cities planted in Media. Unless in Armenia and Susiana there was no foe left to chastise, and the consequence appears to have been that a time of profound peace succeeded to the long and bloody wars of Sargon and his immediate successors. In Scripture it is remarkable that we hear nothing of Assyria after

the reign of Esarhaddon, and profane history is equally silent until the attacks begin which brought about her downfall. The monuments show that the son of Esarhaddon, who was called Sardani-palus by Abydenus (ap. Euseb. i. 9), made scarcely any military expeditions, but occupied almost his whole time in the enjoyment of the pleasures of the chase. Instead of adorning his residence—as his predecessors had been accustomed to do—with a record and representation of his conquests, Sardani-palus II. covered the walls of his palace at Nineveh with sculptures exhibiting his skill and prowess as a hunter. No doubt the military spirit rapidly decayed under such a ruler, and the advent of fresh enemies, synchronising with this decline, produced the ruin of a power which had for six centuries been dominant in Western Asia.

12. *Fall of Assyria.*—The fall of Assyria, long previously prophesied by Isaiah (x. 5-19), was effected (humanly speaking) by the growing strength and boldness of the Medes. If we may trust Herodotus, the first Median attack on Nineveh took place about the year B.C. 633. By what circumstances this people, who had so long been engaged in contests with the Assyrians, and had hitherto shown themselves so utterly unable to resist them, became suddenly strong enough to assume an aggressive attitude, and to force the Ninevites to submit to a siege, can only be conjectured. Whether mere natural increase, or whether fresh immigrations from the east, had raised the Median nation at this time so far above its former condition, it is impossible to determine. We can only say that, soon after the middle of the seventh century they began to press upon the Assyrians, and that, gradually increasing in strength, they proceeded, about the year B.C. 633, to attempt the conquest of the country. For some time their efforts were unsuccessful; but after a while, having won over the Babylonians to their side, they became superior to the Assyrians in the field, and about B.C. 625, or a little earlier, laid final siege to the capital [MEDIA]. Sardanapalus, the last king—probably the grandson of Esarhaddon—made a stout and prolonged defence, but at length, finding resistance vain, he collected his wives and his treasures in his palace, and with his own hand setting fire to the building, perished in the flames. This account is given in brief by Abydenus, who probably follows Berosus; and its outline so far agrees with Ctesias (ap. Diod. ii. 27) as to give an important value to that writer's details of the siege. [NINEVEH.] In the general fact that Assyria was overcome, and Nineveh captured and destroyed, by a combined attack of Medes and Babylonians, Josephus (*Ant. Jud.* x. 5) and the book of Tobit (xiv. 15) are agreed. Polyhistor also implies it (ap. Euseb. i. 5); and these authorities must be regarded as outweighing the silence of Herodotus, who mentions only the Medes in connexion with the capture (i. 106), and says nothing of the Babylonians.

13. *Fulfillment of prophecy.*—The prophecies of Nahum and Zephaniah (ii. 13-5) against Assyria were probably delivered shortly before the catastrophe. The date of Nahum is very doubtful [NAHUM], but it is not unlikely that he wrote about B.C. 645, towards the close of the reign of Manasseh. Zephaniah is even later, since he prophesied under Josiah, who reigned from B.C. 639 to 608. If B.C. 625 be the date of the destruction of Nineveh, we may place Zephaniah's prophecy about B.C. 630. Ezekiel, writing about B.C. 584,

bears witness historically to the complete destruction which had come upon the Assyrians, using the example as a warning to, Pharaoh-Hophra and the Egyptians (ch. xxxi.).

It was declared by Nahum emphatically, at the close of his prophecy, that there should be "no healing of Assyria's bruise" (iii. 19). In accordance with this announcement we find that Assyria never rose again to any importance, nor even succeeded in maintaining a distinct nationality. Once only was revolt attempted, and then in conjunction with Armenia and Media, the latter heading the rebellion. This attempt took place about a century after the Median conquest, during the troubles which followed upon the accession of Darius Hystaspis. It failed signally, and appears never to have been repeated, the Assyrians remaining thenceforth submissive subjects of the Persian empire. They were reckoned in the same satrapy with Babylon (Herod. iii. 92; comp. i. 192), and paid an annual tribute of a thousand talents of silver. In the Persian armies, which were drawn in great part from the subject-nations, they appear never to have been held of much account, though they fought, in common with the other Jevies, at Thermopylae, at Cunaxa, at Issus, and at Arbela.

14. *General character of the empire.*—In considering the general character of the Assyrian empire, it is, in the first place, to be noticed, that like all the early monarchies which attained to any great extent, it was composed of a number of separate kingdoms. In the East, conquest has scarcely ever been followed by amalgamation, and in the primitive empires there was not even any attempt at that governmental centralisation which we find at a later period in the satrapal system of Persia. As Solomon "reigned over all the kingdoms from the river (Euphrates) unto the land of the Philistines and the border of Egypt," so the Assyrian monarchs bore sway over a number of petty kings—the native rulers of the several countries—through the entire extent of their dominions. These native princes—the sole governors of their own kingdoms—were feudatories of the Great Monarch, of whom they held their crown by the double tenure of homage and tribute. Menahem (2 K. xv. 19), Hoshea (ibid. xvii. 4), Ahaz (ibid. xvi. 8), Hezekiah (ibid. xviii. 14), and Manasseh (2 Chr. xxxiii. 11-3), were certainly in this position, as were many native kings of Babylon, both prior and subsequent to Nabonassar; and this system (if we may trust the inscriptions) was universal throughout the empire. It naturally involved the frequent recurrence of troubles. Princes circumstanced as were the Assyrian feudatories would be always looking for an occasion when they might revolt and re-establish their independence. The offer of a foreign alliance would be a bait which they could scarcely resist, and hence the continual warnings given to the Jews to beware of trusting in Egypt. Apart from this, on the occurrence of any imperial misfortune or difficulty, such for instance as a disastrous expedition, a formidable attack, or a sudden death, natural or violent, of the reigning monarch, there would be a strong temptation to throw off the yoke, which would lead, almost of necessity, to a rebellion. The history of the kings of Israel and Judah sufficiently illustrates the tendency in question, which required to be met by checks and remedies of the severest character. The deposition of the rebel prince, the wasting of his country, the plunder of his capital, a considerable

increase in the amount of the tribute thenceforth required, were the usual consequences of an unsuccessful revolt; to which were added, upon occasion, still more stringent measures, as the wholesale execution of those chiefly concerned in the attempt, or the transplantation of the rebel nation to a distant locality. The captivity of Israel is only an instance of a practice long previously known to the Assyrians, and by them handed on to the Babylonian and Persian governments.

It is not quite certain how far Assyria required a religious conformity from the subject people. Her religion was a gross and complex polytheism, comprising the worship of thirteen principal and numerous minor divinities, at the head of the whole of whom stood the chief god, Ashur, who seems to be the deified patriarch of the nation (Gen. x. 22). The inscriptions appear to state that in all countries over which the Assyrians established their supremacy, they set up "the laws of Ashur," and "altars to the Great Gods." It was probably in connexion with this Assyrian requirement that Ahaz, on his return from Damascus, where he had made his submission to Tiglath-Pileser, incurred the guilt of idolatry (2 K. xvi. 10-6). The history of Hezekiah would seem, however, to show that the rule, if resisted, was not rigidly enforced; for it cannot be supposed that he would have consented to re-establish the idolatry which he had removed, yet he certainly came to terms with Sennacherib, and resumed his position of tributary (2 K. xviii. 14). In any case it must be understood that the worship which the conquerors introduced was not intended to supersede the religion of the conquered race, but was only required to be superadded as a mark and badge of subjection.

15. *Its extent*.—With regard to the extent of the empire very exaggerated views have been entertained by many writers. Ctesias took Semiramis to India, and made the empire of Assyria at least co-extensive with that of Persia in his own day. This false notion has long been exploded, but even Niebuhr appears to have believed in the extension of Assyrian influence over Asia Minor, in the expedition of Memnon—whom he considered an Assyrian—to Troy, and in the derivation of the Lydian Heracleids from the first dynasty of Ninevite monarchs (*Alt. Geschicht.* i. pp. 28-9). The information derived from the native monuments tends to contract the empire within more reasonable bounds, and to give it only the expansion which is indicated for it in Scripture. On the west, the Mediterranean and the river Halys appear to have been the boundaries; on the north, a fluctuating line, never reaching the Euxine nor extending beyond the northern frontier of Armenia; on the east, the Caspian Sea and the Great Salt Desert; on the south, the Persian Gulf and the Desert of Arabia. The countries included within these limits are the following:—Susiana, Chaldaea, Babylonia, Media, Mantiene, Armenia, Assyria Proper, Mesopotamia, parts of Cappadocia and Cilicia, Syria, Phoenicia, Palestine, and Idumaea. Cyprus was also for a while a dependency of the Assyrian kings, and they may perhaps have held at one time certain portions of Lower Egypt. Lydia, however, Phrygia, Lycia, Pamphylia, Pontus, Iberia, on the west and north, Bactria, Sacia, Parthia, India—even Carmania and Persia Proper—upon the east, were altogether beyond the limit of the Assyrian sway, and appear at no time even to have been over-run by the Assyrian armies.

16. *Civilisation of the Assyrians*.—The civilisation of the Assyrians, as has been already observed, was derived originally from the Babylonians. They were a Semitic race, originally resident in Babylonia (which at that time was Cushite), and thus acquainted with the Babylonian inventions and discoveries, who ascended the valley of the Tigris and established in the tract immediately below the Armenian mountains a separate and distinct nationality. Their modes of writing and building, the form and size of their bricks, their architectural ornamentation, their religion and worship, in a great measure, were drawn from Babylon, which they always regarded as a sacred land—the original seat of their nation, and the true home of all their gods, with the one exception of Ashur. Still, as their civilisation developed, it became in many respects peculiar. Their art is of home growth. The alabaster quarries in their neighbourhood supplied them with a material unknown to their southern neighbours, on which they could represent, far better than upon enamelled bricks, the scenes which interested them. Their artists, faithful and laborious, acquired a considerable power of rendering the human and animal forms, and made vivid and striking representations of the principal occupations of human life. If they do not greatly affect the ideal, and do not, in this branch, attain to any very exalted rank, yet even here their emblematic figures of the gods have a dignity and grandeur which is worthy of remark, and which implies the possession of some elevated feelings. But their chief glory is in the representation of the actual. Their pictures of war, and of the chase, and even sometimes of the more peaceful incidents of human life, have a fidelity, a spirit, a boldness, and an appearance of life, which place them high among realistic schools. Their art, it should be also noted, is progressive. Unlike that of the Egyptians, which continues comparatively stationary from the earliest to the latest times, it plainly advances, becoming continually more natural and less uncouth, more lifelike and less stiff, more varied and less conventional. The latest sculptures, which are those in the hunting-palace of the son of Esarhaddon, are decidedly the best. Here the animal-forms approach perfection, and in the striking attitudes, the new groupings, and the more careful and exact drawing of the whole, we see the beginnings of a taste and a power which might have expanded under favourable circumstances into the finished excellence of the Greeks.

The advanced condition of the Assyrians in various other respects is abundantly evidenced alike by the representations on the sculptures and by the remains discovered among their buildings. They are found to have understood and applied the arch; to have made tunnels, aqueducts, and drains; to have used the lever and the roller; to have engraved gems; to have understood the arts of inlaying, enamelling, and overlaying with metals; to have manufactured glass, and been acquainted with the lens; to have possessed vases, jars, bronze and ivory ornaments, dishes, bells, earrings, mostly of good workmanship and elegant forms—in a word, to have attained to a very high pitch of material comfort and prosperity. They were still, however, in the most important points barbarians. Their government was rude and artificial; their religion coarse and sensual; their conduct of war cruel; even their art materialistic and so debasing; they had served their purpose when they had prepared the East for

centralised government, and been God's scourge to punish the people of Israel (Is. x. 5-6); they were, therefore, swept away to allow the rise of that Arrian race which, with less appreciation of art, was to introduce into Western Asia a more spiritual form of religion, a better treatment of captives, and a superior governmental organisation.

(See for the geography Capt. Jones' paper in the xivth volume of the *Asiatic Society's Journal* (part 2); Col. Chesney's *Euphrates Expedition*; Mr. Layard's works; Rich's *Kurdistan*, &c. B. G. Niebuhr's *Vorträge über alter Geschichte*, vol. i.; Clinton's *Fasti Hell.*, vol. i.; and M. Niebuhr's *Geschichte Assur's und Babel's*.) [G. R.]

ASTAROTH (עֲשִׂתָרוֹת; *Ashtarōth*; *Astaroth*), Deut. i. 4. [ASHTAROTH.]

ASTARTE. [ASHTORETH.]

ASTATHI (Ἀσθά; *Asath*), 1 Esd. viii. 38. [AZAD.]

ASTRONOMY. [STAR.]

ASTYAGES (Ἀστυάγης; Herod. Ἀστυάγης, Ctes. Ἀσπδάς), the last king of the Medes, B.C. 595-560, or B.C. 592-558, who was conquered by Cyrus (Bel and Dragon, 1). The name is identified by Rawlinson and Niebuhr (*Gesch. Assur's*, p. 32) with Deioces = Ashdahiak (*Assur*), Ajs Dahiaka (*Pers.*), "the biting snake," the emblem of the Median power. [DARIUS THE MEDE; CYRUS.] [B. F. W.]

ASUPTIM, and "HOUSE OF" (בֵּית הַתְּפִימִים; οἶκος Ἀσάφειμ; *Essephim*; *Domus serorum Concilium*), 1 Chr. xxvi. 15, 17. This word is probably not to be taken as a proper name: in Neh. xii. 25, it is rendered in A. V. "thresholds."

ASYNCRITUS (Ἀσύγκριτος; *Asyncritus*), a Christian at Rome, saluted by St. Paul (Rom. xvi. 14).

ATAD, the threshing-floor of (נֶזֶר הָאֵתָד = "the floor (or trodden space) of the thorn;" Sam. Vers. אֶתָד עֹרֶה; Saad. العوسج; *Alwas*

*Arās*; *area Atad*), a spot "beyond Jordan," at which Joseph and his brethren, on their way from Egypt to Hebron, made their seven days "great and very sore mourning" over the body of Jacob; in consequence of which we are told it acquired from the Canaanites the new name of Abel-Mitzraim (Gen. l. 10, 11). According to Jerome (*Onom. s. v. Areacalad*) it was in his day called Bethglia or Bethacla (Beth-Hogla), a name which he connects with the goryatory dances or races of the funeral ceremony: "locus gyri; eo quod ibi more plangentium circumierint." Beth-Hoglah is known to have lain between the Jordan and Jericho, therefore on the west side of Jordan [BETH-HOG-LAH]; and with this agrees the fact of the mention

of the Canaanites, "the inhabitants of the land," who were confined to the west side of the river (see amongst others verse 13 of this chapter), and one of whose special haunts was the sunken district "by the 'side' of Jordan" (Num. xiii. 29). [CANAAN.] The word עֲבֵר, "beyond," although usually signifying the east of Jordan, is yet used for either east or west according to the position of the speaker. [E.B.R.] That Jerome should have defined the situation as "trans Jordanem," at the same time that he explains it as between the river and Jericho, may be accounted for either by the words being a mere quotation from the text, or by some subsequent corruption of copyists. The passage does not survive in Eusebius. [G.]

AT'ARAH (עֲטָרָה; Ἀτάρ; *Atara*), a wife of Jemahmeel, and mother of Onam (1 Chr. ii. 26).

ATAR'GATIS (Ἀταργάτις; Saab. xvi. p. 785, Ἀταργατίου δὲ τὴν Ἀθάραν . . . οἱ Ἕλληγες ἐκδίου), or according to another form of the word DERKETO (Δερκετό, Strab. l. c.; Luc. *de Syria dea*, p. 884 ed. Bened.; Plin. II. N. v. 19 *prodigiosa Atargatis Gracis Derceto*; Ov. *Met.* iv. 45 *Dercetis*), a Syrian goddess, represented generally with the body of a woman and the tail of a fish (Luc. l. c.; Ovid, l. c. comp. DAGON). Her most famous temples were at Hierapolis (Mabug) and Ascalon. Herodotus identified her with *Aphrodite Urania* (i. 105, compared with Diod. Sic. ii. 4). Lucian compared her with Here, though he allowed that she combined traits of other deities (Aphrodite, Rhea, Selene, &c.; see ASHTORETH). Plutarch (*Cress.* 17) says that some regarded her as "Aphrodite, others as Here, others as the cause and natural power which provides the principles and seeds for all things from moisture" (τὴν ἀρχὰς καὶ σπέρματα πᾶσιν ἐξ ὑγρῶν παρασχούσαν αἰτίαν καὶ φύσιν). This last view is probably an accurate description of the attributes of the goddess, and explains her fish-like form and popular identification with Aphrodite. Lucian also mentions a ceremony in her worship at Hierapolis which appears to be connected with the same belief, and with the origin of her name. Twice a year water was brought from distant places and poured into a chasm in the temple; because, he adds, according to tradition, the waters of the Deluge were drained away through that opening (*de Syria dea*, p. 883). Compare Burn. ad Ovid. *Met.* iv. 45, where most of the references are given at length; Movers, *Phoeniz.* i. 584 ff.

There was a temple of Atargatis (Ἀταργατεῖον, Alex. *Atargy*.—2 Macc. xii. 26) at Karnion (Karnaim, 1 Macc. v. 43; i. c. *Ashtaroth-Karnaim*) which was destroyed by Judas Maccabaeus (1 Macc. v. 44).

The name is rightly derived by Michaelis (*Lex. Syr.* pp. 975 f.) from Syr. *Targeto*, an opening (*target*, he opened). Comp. Movers, *Phoeniz.* i. 584 f. Others have deduced it, with little probability, from נֶזֶר הָאֵתָד, *greatness of fortune* (?), or גִּבּוֹר אֵתָד, *great fish*. Gesenius (*Thes.* s. v. גִּבּוֹר) suggests Syr. *dargeto* = *dagto*, a fish. It has been supposed that Atargatis was the tutelary goddess of the first Assyrian dynasty (*Derketudas*, fr. Derketo; Niebuhr, *Gesch. Assur's*, pp. 131, 138), and that the name appears in *Tiglath*- or *Tilgath*-Pileser (id. p. 37).

An interesting coin representing Atargatis is

engraved and described in the *Philosophical Transactions*, vol. lxi. pp. 346 ff.

**ATAROTH** (עֲטָרוֹת, and once עֲטָרוֹת = crowns; ἡ Ἀταρόθ; *Ataroth*), the name of several places in Palestine both on the E. and W. of Jordan.

1. One of the towns in the "land of Jazer and land of Gilead" (Num. xxxii. 3), taken and "built" by the tribe of Gad (xxxii. 34). From its mention with places which have been identified on the N.E. of the Dead Sea near the mountain of *Jebel Attarús* (عُتْرُوس), a connexion has been assumed between Ataroth and that mountain. But *Jebel Attarús* lies considerably to the S. of Heshbon (*Heshbân*), which was in the tribe of Reuben, and which is named apparently as the southernmost limit of Gad (Josh. xiii. 26), so that some other identification is necessary. Atroth-Shophan was probably in the neighbourhood of Ataroth; the Shophan serving as a distinction; but for this see ATROTII.

2. A place on the (South?) boundary of Ephraim and Manasseh (Josh. xvi. 2, 7). The whole specification of this boundary is exceedingly obscure, and it is not possible to say whether Ataroth is or is not the same place as,

3. **ATAROTH-ADAR, OR -ADDAR** (עֲטָרוֹת-אֲדָר) on the west border of Benjamin, "near the 'mountain' that is on the south side of the nether Beth-horon" (Josh. xviii. 13). In xvi. 5 it is accurately rendered Ataroth-addr.

In the Onomasticon mention is made of an Atharoth in Ephraim, in the mountains, 4 miles N. of Sebaste; as well as of two places of the name "not far from" Jerusalem. The former cannot be that seen by Robinson (ii. 265), now *Atára*. Robinson discovered another about 6 miles S. of Bethel (i. 575). This is too far to the E. of Beth-horon to be Ataroth-addr, and too far S. to be that on the boundary of Ephraim (2).

4. "**ATAROTH,**" THE HOUSE OF JOAB" (i.e. Ataroth-beth-Joab), a place (?) occurring in the list of the descendants of Judah (1 Chr. ii. 54; Ἀταρόθ οἴκος Ἰωάβ; *Coronae domus Joab*). [G.]

**ATER** (אֲתָר; Ἀτήρ; *Ather, Ater*), name of two men. 1. (Ezr. ii. 42; Neh. vii. 45), called in Esdras IATAL. 2. Ater of Hezekiah (Ezr. ii. 16; Neh. vii. 21), called in Esdras ATEREZIAS.

**ATHAI'AH** (עֲתַיָּה; Ἀθαΐα; *Athains*), name of a man (Neh. xi. 4).

**ATHALIAH** (עֲתַלְיָה; Ἀθάλια; *Athalia*), daughter of Ahab and Jezebel, married Jehoram the son of Jehoshaphat king of Judah, and introduced into the S. kingdom the worship of Baal, which had already defiled and overspread the N. After the great revolution by which Jehu seated himself on the throne of Samaria, she killed all the members of the royal family of Judah who had escaped his sword (2 K. x. 14), availing herself probably of her position as *King's Mother* [ABA], to perpetrate the crime. Most likely she exercised the regal functions during Ahaziah's absence at Jezreel (2 K. ix.), and resolved to retain her power, especially after seeing the danger to which she was

exposed by the overthrow of the house of Omri, and of Baal-worship in Samaria. It was not unusual in those days for women in the East to attain a prominent position, their present degradation being the result of Mahometanism. Miriam, Deborah, Abigail, are instances from the Bible, and Dido was not far removed from Athaliah, either in birthplace or date, if Carthage was founded B.C. 861 (Joseph. c. *Apion*. i. 18). From the slaughter of the royal house, one infant named Josiah, the youngest son of Ahaziah, was rescued by his aunt Jehosheba, daughter of Jehoram (probably by another wife than Athaliah) who had married Jehoinda (2 Chr. xxii. 11) the high-priest (2 Chr. xxiv. 6). The child was brought up under Jehoia's care, and concealed in the temple for six years, during which period Athaliah reigned over Judah. At length Jehoia thought it time to produce the lawful king to the people, trusting to their zeal for the worship of God, and loyalty to the house of David, which had been so strenuously called out by Aza and Jehoshaphat. After communicating his design to five "captains of hundreds," whose names are given in 2 Chr. xxiii. 1, and securing the co-operation of the Levites and chief men in the country-towns in case of necessity, he brought the young Josiah into the temple to receive the allegiance of the soldiers of the guard. It was customary on the Sabbath for a third part of them to do duty at the palace, while two-thirds restrained the crowd of visitors and worshippers who thronged the temple on that day, by occupying the gate of Sur (סֹר, 1 K. xi. 6, called *of the foundation*, סֹדֶר, 2 Chr. xxiii. 5, which Gerlach, *in loco*, considers the right reading in Kings also), and the gate "behind the guard" (*porta quae est post habitaculum sentariorum*, Vulg.), which seem to have been the N. and S. entrances into the temple, according to Ewald's description of it (*Geschichte*, iii. p. 306-7). On the day fixed for the outbreak there was to be no change in the arrangement at the palace, lest Athaliah, who did not worship in the temple, should form any suspicions from missing her usual guard, but the latter two-thirds were to protect the king's person by forming a long and closely-serial line across the temple, and killing any one who should approach within certain limits. They were also furnished with David's spears and shields, that the work of restoring his descendant might be associated with his own sacred weapons. When the guard had taken up their position, the young prince was anointed, crowned, and presented with the Testimony or Law, and Athaliah was first roused to a sense of her danger by the shouts and music which accompanied the inauguration of her grandson. She hurried into the temple, but found Josiah already standing "by a pillar," or more properly on it, i.e. on the tribunal or throne apparently raised on a massive column or cluster of columns, which the king occupied when he attended the service on solemn occasions. The phrase in the original is עֲלֵי עַלְמָי, rendered ἐπὶ τοῦ στύλου by the LXX. and *super tribunal* in the Vulgate, while Gesenius gives for the substantive a *stage* or *pulpit*. (Comp. 2 K. xxiii. 3, and Ezek. xli. 2.) She arrived however too late, and was immediately put to death by Jehoia's commands, without the temple. The only other recorded victim of this happy and almost bloodless revolution, was Mattan the priest of Baal. For the view here given of the details of

\* The marginal note to this name in the Bibles of the present day, viz. "Aarites or crowns," &c., is a corruption of Atharites in the edition of 1611.

Jeholada's plan, see Ewald, *Geschichte*, iii. p. 574 ff. The latter words of 2 K. xi. 6 in our version 'that it be not broken down' are probably wrong:—Ewald translates, "according to custom;" Gesenius gives in his Lexicon "a keeping off." Clinton's date for Athaliah's usurpation is B.C. 883-877. In modern times the history of Athaliah has been illustrated by the music of Handel and of Mendelssohn, and the stately declamation of Racine. [G. E. L. C.]

**ATHARIAS** (Ἀθαρίας; *et* Astharas), a corrupt rendering of אֶתְרִיָּה, THE TIRSHATHA (1 Esd. v. 40).

**ATHENOBIUS** (Ἀθηνόβιος), an envoy sent by Antiochus VII. Sidetes to Simon, the Jewish high priest (1 Macc. xv. 28-36). He is not mentioned elsewhere. [B. F. W.]

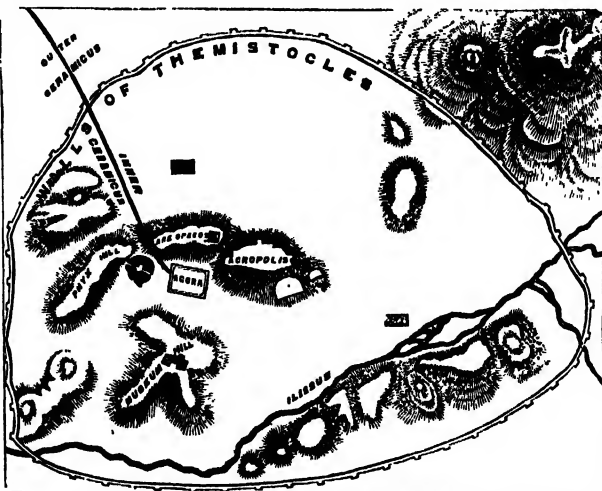

**ATHENS** (Ἀθῆναι; *Athenae*), the capital of Attica, and the chief seat of Grecian learning and civilisation during the golden period of the history of Greece. This city is fully described elsewhere (*Dict. of Gr. and Rom. Geogr.* i. p. 255, sq.); and an account of it would be out of place in the present work. St. Paul visited it in his journey from Macedonia, and appears to have remained there some time (Acts xvii. 14, 15, seq.; comp. 1 Thess. iii. 1). During his residence there he delivered his memorable discourse on the Areopagus to the "men of Athens" (Acts xvii. 22-31) [AREOPAGUS]. In order to understand the localities mentioned in the sacred narrative, it may be observed that four hills of moderate height rise within the walls of the city. Of these one to the north-east is the celebrated Acropolis, or citadel, being a square craggy rock about 150 feet high. Immediately to the west of the Acropolis is a second hill of irregular form, but inferior height, called the Areopagus. To the south-west rises a third hill, the Pnyx, on which the assemblies of the citizens were held: and to the south of the latter is a fourth hill, known as the Museum. The Agora or "market," where St. Paul disputed daily, was situated in the valley between the Acropolis, the Areopagus, the Pnyx and the Museum, being

bounded by the Acropolis on the N.E and E., by the Areopagus on the N., by the Pnyx on the N.W. and W., and by the Museum on the S. The annexed plan shows the position of the Agora. Many writers have maintained that there were two markets at Athens; and that a second market, usually called the new Agora, existed to the north of the Acropolis. If this were true, it would be doubtful in which of the two markets St. Paul disputed; but since the publication of Forchhammer's treatise on the Topography of Athens, it is generally admitted that there was only one

Agora at Athens, namely, the one situated in the valley already described. [The subject is discussed at length in the *Dict. of Geogr.* i. p. 293, seq.] The remark of the sacred historian respecting the inquisitive character of the Athenians (xvii. 21) is attested by the unanimous voice of antiquity. The great Athenian orator rebukes his countrymen for their love of constantly going about in the market, and asking one another, What news? (περιόρτες αὐτῶν πυνθανεσθαι κατὰ τὴν ἀγορὰν. λέγεταί τι καινόν; Dem. *Philipp.* i. p. 43, ed. Reiske). Their natural liveliness was partly owing to the purity and clearness of the atmosphere of Attica, which also allowed them to pass much of their time in the open air.

The remark of St. Paul upon the "superstitious" character of the Athenians (xvii. 22) is in like manner confirmed by the ancient writers. Thus Pausanias says that the Athenians surpassed all other states in the attention which they paid to the worship of the gods (Ἀθηναῖοις περισσώτερόν τι ἢ τοῖς ἄλλοις ἐς τὰ θεῖά ἐστι σπουδῆς, Paus. i. 24, §3); and hence the city was crowded in every direction with temples, altars, and other sacred buildings. The altar "to the Unknown God," which St. Paul mentions in his address, has been spoken of under ALTAR.

Of the Christian church, founded by St. Paul at Athens, we have no particulars in the N. T.; but, according to ecclesiastical tradition (Euseb. *H. E.* iii. 4), Dionysius the Areopagite, who was converted by the preaching of the Apostle, was the first bishop of the church. [DIONYSIUS.]

Plan of Athens, showing the position of the Agora.

**ATHLAI** (ἄθλι, for ἄθλη; *Θαλί; Athalai*), name of a man (Ezr. x. 28). [AMATHEIS.]

**ATIPHA** (Ἀρεφά; *Agisti*), 1 Esd. v. 32. [HATIPHA.]

**ATONEMENT, THE DAY OF** (יִם מִצִּיּוֹן; ἡμέρα ἐξιασμού; *dies expiationum*, and *dies propitiations*; in the Talmud, מִצִּיּוֹן, i. e. the day; in Philo, *ἡστέλες ἐσπρή, Lib. de Sept.* vol. v. p. 47, edit. Tauchn.; in Acts xxvii. 9, ἡ

*ἡμερα*; in Heb. vii. 27, ἡ ἡμερα, according to Olshausen and others; but see Ebnard's and Bengel's notes), the great day of national humiliation, and the only one commanded in the Mosaic law. [FASTS.] The mode of its observance is described in Lev. xvi., where it should be noticed that in vv. 3 to 10 an outline of the whole ceremonial is given, while in the rest of the chapter certain points are mentioned with more details. The victims which were offered in addition to those strictly belonging to the special service of the day, and to those of the usual daily sacrifices, are enumerated in Num. xxix. 7-11; and the conduct of the people is emphatically enjoined in Lev. xxiii. 26-32.

II. It was kept on the tenth day of Tisri, that is, from the evening of the ninth to the evening of the tenth of that month, five days before the Feast of Tabernacles. [FESTIVALS.] Some have inferred from Lev. xvi. 1, that the day was instituted on account of the sin and punishment of Nadab and Abihu. Maimonides (*More Nevochim*, xviii.) regards it as a commemoration of the day on which Moses came down from the mount with the second tables of the law, and proclaimed to the people the forgiveness of their great sin in worshipping the golden calf.

III. The observances of the day, as described in the law, were as follows. It was kept by the people as a solemn sabbath (σάββατα σαββάτων, LXX.). They were commanded to set aside all work and "to afflict their souls," under pain of being "cut off from among the people." It was on this occasion only that the high priest was permitted to enter into the Holy of Holies. Having bathed his person and dressed himself entirely in the holy white linen garments, he brought forward a young bullock for a sin-offering and a ram for a burnt-offering, purchased at his own cost, on account of himself and his family, and two young goats for a sin-offering with a ram for a burnt-offering, which were paid for out of the public treasury, on account of the people. He then presented the two goats before the Lord at the door of the tabernacle and cast lots upon them. On one lot יהוה (i. e. for Jehovah) was inscribed, and on the other אֲזַזֵּל (i. e. for Azazel). He next sacrificed the young bullock as a sin-offering for himself and his family. Taking with him some of the blood of the bullock, he filled a censer with burning coals from the brazen altar, took a handful of incense, and entered into the most holy place. He then threw the incense upon the coals and enveloped the mercy-seat in a cloud of smoke. Then, dipping his finger

into the blood, he sprinkled it seven times before the mercy-seat, eastward.\*

The goat upon which the lot "for Jehovah" had fallen was then slain, and the high-priest sprinkled its blood before the mercy-seat in the same manner as he had done that of the bullock. Going out from the Holy of Holies he purified the holy place, sprinkling some of the blood of both the victims on the altar of incense.<sup>b</sup> At this time no one besides the high-priest was suffered to be present in the holy place.

The purification of the Holy of Holies, and of the holy place, being thus completed, the high priest laid his hands upon the head of the goat on which the lot "for Azazel" had fallen, and confessed over it all the sins of the people. The goat was then led, by a man chosen for the purpose, into the wilderness, into "a land not inhabited," and was there let loose.

The high priest after this returned into the holy place, bathed himself again, put on his usual garments of office, and offered the two rams as burnt-offerings, one for himself and one for the people. He also burnt upon the altar the fat of the two sin-offerings, while their flesh was carried away and burned outside the camp. They who took away the flesh and the man who had led away the goat had to bathe their persons and wash their clothes as soon as their service was performed.

The accessory burnt-offerings mentioned Num. xxix. 7-11, were a young bullock, a ram, seven lambs, and a young goat. It would seem that (at least in the time of the second temple) these were offered by the high priest along with the evening sacrifice (see below, V. 7.)

It may be seen (as Winer has remarked) that in the special rites of the Day of Atonement there is a natural gradation. In the first place the high priest and his family are cleansed; then atonement is made by the purified priest for the sanctuary and all contained in it; then (if the view to which reference has been made be correct) for the brazen altar in the court, and lastly, reconciliation is made for the people.

IV. In the short account of the ritual of the day which is given by Josephus (*Ant.* iii. 10, §3) there are a few particulars which are worthy of notice. His words of course apply to the practice in the second temple, when the ark of the covenant had disappeared. He states that the high priest sprinkled the blood with his finger seven times on the ceiling and seven times on the floor of the most holy place, and seven times towards it (as it would appear, outside the veil), and round the golden altar. Then going into the court he either sprinkled or poured

\* See Lev. xvi. 14. The English version, "upon the mercy-seat," appears to be opposed to every Jewish authority. (See Drusus in loc. in the *Critici Sacri*.) It has, however, the support of Ewald's authority. The Vulgate omits the clause; the LXX. follows the ambiguity of the Hebrew. The word *eastward* must mean either the direction in which the drops were thrown by the priest, or else *on the east side* of the ark, i. e. the side towards the veil. The last clause of the verse may be taken as a repetition of the command, for the sake of emphasis on the number of sprinklings: "And he shall take of the blood of the bullock and sprinkle it before the mercy-seat, on the east; and seven times shall he sprinkle the blood with his finger before the mercy-seat."

<sup>b</sup> That the altar of incense was thus purified on

the day of atonement we learn expressly from Ex. xxx. 10. Most critics consider that this is what is spoken of in Lev. xvi. 18 and 20. But some suppose that it is the altar of burnt-offerings which is referred to in those verses, the purification of the altar of incense being implied in that of the holy place mentioned in ver. 16. Abenezra was of this opinion (see Drusus in loc.). That the expression, "before the Lord," does not necessarily mean within the tabernacle, is evident from Ex. xxix. 11. If the golden altar is here referred to, it seems remarkable that no mention is made in the ritual of the cleansing of the brazen altar. But perhaps the practice spoken of by Josephus and in the Mishna of pouring what remained of the mixed blood at the foot of the large altar, was an ancient one, and was regarded as its purification.

the blood round the great altar. He also informs us that along with the fat, the kidneys, the top of the liver, and the extremities (*al efochal*) of the victims were burned.

V. The treatise of the Mishna, entitled *Yoma*, professes to give a full account of the observances of the day according to the usage in the second temple. The following details appear either to be interesting in themselves or to illustrate the language of the Pentateuch.

1. The high priest himself, dressed in his coloured official garments, used, on the Day of Atonement, to perform all the duties of the ordinary daily service, such as lighting the lamps, presenting the daily sacrifices, and offering the incense. After this he bathed himself, put on the white garments, and commenced the special rites of the day. There is nothing in the Old Testament to render it improbable that this was the original practice.

2. The high priest went into the Holy of Holies four times in the course of the day: first, with the censur and incense, while a priest continued to agitate the blood of the bullock lest it should coagulate; secondly, with the blood of the bullock; thirdly, with the blood of the goat; fourthly, after having offered the evening sacrifice, to fetch out the censur and the plate which had contained the incense. These four entrances, forming, as they do, parts of the one great annual rite, are not opposed to a reasonable view of the statement in Heb. ix. 7, and that in Josephus, *Bell. Jud. V. 5. §7*. Three of the entrances seem to be very distinctly implied in Lev. xvi. 12, 14, and 15.

3. It is said that the blood of the bullock and that of the goat were each sprinkled eight times, once towards the ceiling and seven times on the floor. This does not agree with the words of Josephus (see above, IV.).

4. After he had gone into the most holy place the third time, and had returned into the holy place, the high priest sprinkled the blood of the bullock eight times towards the veil, and did the same with the blood of the goat. Having then mingled the blood of the two victims together and sprinkled the altar of incense with the mixture, he came into the court and poured out what remained at the foot of the altar of burnt-offering.

5. Most careful directions are given for the preparation of the high priest for the services of the day. For seven days previously he kept away from his own house and dwelt in a chamber appointed for his use. This was to avoid the accidental uses of pollution which he might meet with in his domestic life. But to provide for the possibility of his incurring some uncleanness in spite of this precaution, a deputy was chosen who might act for him when the day came. In the treatise of the Mishna entitled "*Pirki Avoth*," it is stated that no such mischance ever befel the high priest. But Josephus (*Ant. xvii. 6, §4*) relates an instance of the high priest Matthias, in the time of Herod the Great, when his relation Joseph took his place in the sacred office. During the whole of the seven days the high priest had to perform the ordinary sacerdotal duties of the daily service himself, as well as on the Day of Atonement. On the third day and on the seventh he was sprinkled with the ashes of the red heifer in order to cleanse him in the event of his having touched a dead body without knowing it. On the seventh day he was also required to take a solemn oath before the

elders that he would alter nothing whatever in the accustomed rites of the Day of Atonement.\*

6. Several curious particulars are stated regarding the scapegoat. The two goats of the sin-offering were to be of similar appearance, size, and value. The lots were, originally, of boxwood, but in later times they were of gold. They were put into a little box or urn, into which the High Priest put both his hands and took out a lot in each, while the two goats stood before him, one at the right side and the other on the left. The lot in each hand belonged to the goat in the corresponding position, and when the lot "*for Azazel*" happened to be in the right hand, it was regarded as a good omen. The high priest then tied a piece of scarlet cloth on the scapegoat's head, called "*the scarlet tongue*," from the shape in which it was cut. Maimonides says that this was only to distinguish him, in order that he might be known when the time came for him to be sent away. But in the Gemara it is asserted that the red cloth ought to turn white, as a token of God's acceptance of the atonement of the day, referring to Is. i. 18. A particular instance of such a change, when also the lot "*to Azazel*" was in the priest's right hand, is related as having occurred in the time of Simon the Just. It is further stated that no such change took place for forty years before the destruction of Jerusalem. The prayer which the high priest uttered over the head of the goat was as follows:—"O Lord, the house of Israel, thy people, have transgressed, rebelled, and sinned before thee. I beseech thee, O Lord, forgive now their trespasses, rebellions and sins which thy people have committed, as it is written in the law of Moses, thy servant, saying that in that day there shall be 'an atonement for you to cleanse you that ye may be clean from all your sins before the Lord' (Gemara on *Yoma*, quoted by Frischmuth). The goat was then goaded and rudely treated by the people till it was led away by the man appointed. As soon as it reached a certain spot, which seems to have been regarded as the commencement of the wilderness, a signal was made by some sort of telegraphic contrivance, to the high priest, who waited for it. The man who led the goat is said to have taken him to the top of a high precipice and thrown him down backwards, so as to dash him to pieces. If this was not a mistake of the writer of *Yoma*, it must have been, as Spencer argues, a modern innovation. It cannot be doubted that the goat was, originally, set free. Even if there be any uncertainty in the words of the Hebrew, the rendering of the LXX. must be better authority than the Talmud—*καὶ ὁ ἑξαποστέλλον τὸν χίμαρον τὸν διεσταλμένον εἰς ὕψισιν κ. τ. λ. Lev. xvi. 26*.

7. The high priest, as soon as he had received the signal that the goat had reached the wilderness, read some lessons from the law, and offered up some prayers. He then bathed himself, resumed his coloured garments, and offered either the whole, or a great part, of the accessory offering (mentioned Num. xxxix. 7-11) with the regular evening sacrifice. After this, he washed again, put on the white garments, and entered the most holy place for the fourth time, to fetch out the censur and

\* This, according to the Jerusalem Gemara *Yoma* (quoted by Lightfoot), was instituted in consequence of an innovation of the Sadducean party, who had directed the high priest to throw the incense upon the censur outside the veil, and to carry it, smoking, into the Holy of Holies.

the incense-plate. This terminated the special rites of the day.

8. The Mishna gives very strict rules for the fasting of the people. In the law itself no express mention is made of abstinence from food. But it is most likely implied in the command that the people were "to afflict their souls." According to Yoma, every Jew (except invalids and children under 13 years of age) is forbidden to eat anything so large as a date, to drink, or to wash from sun-set to sun-set.

VI. There has been much discussion regarding the meaning of the word Azazel. The opinions which seem most worthy of notice are the following:—

1. It has been regarded as a designation of the goat itself. This view has been most favoured by the old interpreters. They in general supposed it to mean the goat sent away, or let loose. In accordance with this the Vulgate renders it, *Capre Emissarius*; Symmachus, *ὁ τράγος ἀπολελόμενος*; Aquila, *ὁ τράγος ἀπολελόμενος*; Luther, *der ledige Bock*; the English translators, *the scape goat*. The LXX. uses the term *ἀποπομπαῖος*, applied to the goat itself. Theodoret and Cyril of Alexandria consider the meaning of the Hebrew to be *the goat sent away*, and regard that as the sense of the word used in the LXX. If they were right, *ἀποπομπαῖος* is, of course, not employed in its ordinary meaning (*Averruncus*). (See Suicer, s.v.) It should also be observed that in the latter clause of Lev. xvi. 10 the LXX. renders the Hebrew term as if it was an abstract noun, translating *ἡνιχὺς* by *τὴν ἀποπομπήν*. Buxtorf (*Heb. Lex.*) and Fagius (*Critici Sacri*, in loc.) in accordance with this view of its meaning, derived the word from *ἵν*, a goat, and *ἵν*, to depart. To this derivation it has been objected by Bochart, Winer, and others, that *ἵν* denotes a *she-goat*, not a *he-goat*. It is, however, alleged that the word appears to be epicure in Gen. xxx. 33; Lev. iii. 12, and other places. But the application of *ἡνιχὺς* to the goat itself involves the Hebrew text in insuperable difficulties. It can hardly be supposed that the prefix which is common to the designation of the two lots should be used in two different meanings. If one expression is to be rendered for *Jehovah*, it would seem that the other must be for *Azazel*, with the preposition in the same sense. If this is admitted, taking *Azazel* for the goat itself, it does not seem possible to make sense out of Lev. xvi. 10 and 26. In these verses the versions are driven to strange shifts. We have already referred to the inconsistency of the LXX. In the Vulgate and our own version the first clause of ver. 10 stands "cujus (sc. hirci sors) autem in caprum emissarium"—"but the goat on which the lot fell to be the scapegoat." In ver. 26 our version reads "And he that let go the goat for the scapegoat," while the Vulgate cuts the knot to escape from the awkward tautology—"ille vero, qui dimiserit caprum emissarium."

2. Some have taken *Azazel* for the name of the place to which the goat was sent. a) Abenezra quotes the words of an anonymous writer referring it to a hill near Mount Sinai. Vatablus adopts this opinion (*Critici Sacri*, in Lev. xvi.) b) Some of the Jewish writers, with Le Clerc, consider that it denotes the cliff to which the goat was taken to be thrown down, according to Yoma. c) Bochart regarded the word as a pluralis fractus signifying

*desert places*, and understood it as a general name for any fit place to which the goat might be sent. But Gesenius remarks that the pluralis fractus, which exists in Arabic, is not found in Hebrew.

3. Many of those who have studied the subject most closely take *Azazel* for a personal being to whom the goat was sent. a) Gesenius gives to *ἡνιχὺς* the same meaning as the LXX. has assigned to it, if *ἀποπομπαῖος* is to be taken in its usual sense; but the being so designated he supposes to be some false deity who was to be appeased by such a sacrifice as that of the goat. He derives the word from a root unused in Hebrew, but found in Arabic, *ḥṣṣ*, to remove or take away (*Heb. Lex. s. v.*). Ewald agrees with Gesenius, and speaks of *Azazel* as a demon belonging to the pre-Mosaic religion. b) But others, in the spirit of a simpler faith, have regarded him as an evil spirit, or the devil himself. In the book of Enoch the name *Azazel* is given to one of the fallen angels; and assuming, with Spencer, that this is a corruption of *Azazel*, if the book were written, as is generally supposed, by a Jew, about B.C. 40, it represents an old Jewish opinion on the subject. Origen, adopting the word of the LXX., identifies him with the devil: *ἔτι τε ἐν τῷ Λευιτικῷ ἀποπομπαῖος ἐν ᾧ ἑβραϊκῇ γραφῇ ἐνέμασεν Ἀζαζήλ, οὐδέτις ἕτερος ἦν* (sc. ἡ δὲ διάβολος) (*c. Cels. vi. p. 305*, ed. Spenc.). Of modern writers, Spencer and Hengstenberg have most elaborately defended the same opinion. Spencer derives the word from *ἵν*, *fortis*, and *ἵν*, explaining it as *cito recedens*, which he affirms to be a most suitable name for the evil spirit. He supposes that the goat was given up to the devil, and committed to his disposal. Hengstenberg affirms with great confidence that *Azazel* cannot possibly be anything but another name for Satan. He repudiates the conclusion that the goat was in any sense a sacrifice to Satan, and does not doubt that it was sent away laden with the sins of God's people, now forgiven, in order to mock their spiritual enemy in the desert, his proper abode, and to symbolize by its free gambols, their exulting triumph. He considers that the origin of the rite was Egyptian, and that the Jews substituted Satan for Typhon, whose dwelling was the desert. The obvious objection to Spencer's view is that the goat formed part of a sin-offering to the Lord, and that it, with its fellow, had been formally presented before the Lord at the door of the Tabernacle. Few, perhaps, will be satisfied with Hengstenberg's mode of meeting this difficulty.

4. An explanation of the word which seems less objectionable, if it is not wholly satisfactory, would render the designation of the lot *ἡνιχὺς*, "for complete sending away." Thus understood, the word would come from *ḥṣṣ* (the root adopted by Gesenius), being the Pe'pal form, which indicates intensity. This view is held by Tholuck (quoted and approved by Thompson), by Bähr, and by Winer.

VII. As it might be supposed, the Talmudists miserably degraded the meaning of the day of atonement. They regarded it as an opportunity afforded them of wiping off the score of their more heavy offences. Thus Yoma (cap. viii.) says, "The day of atonement and death make atonement through penitence. Penitence itself makes atone-

ment for slight transgressions, and in the case of grosser sins it obtains a respite until the coming of the day of atonement, which completes the reconciliation." More authorities to the same general purpose are quoted by Frischmuth (p. 917), some of which seem also to indicate that the peculiar atoning virtue of the day was supposed to rest in the scapegoat.

Philo (*Lib. de Septenario*) regarded the day in a far nobler light. He speaks of it as an occasion for the discipline of self-restraint in regard to bodily indulgence, and for bringing home to our minds the truth that man does not live by bread alone, but by whatever God is pleased to appoint. The prayers proper for the day, he says, are those for forgiveness of sins past and for amendment of life in future, to be offered in dependence, not on our own merits, but on the goodness of God.

It cannot be doubted that what especially distinguished the symbolical expiation of this day from that of the other services of the law, was its broad and national character, with perhaps a deeper reference to the sin which belongs to the nature of man. Ewald instructively remarks that though the least uncleanliness of an individual might be atoned by the rites of the law which could be observed at other times, there was a consciousness of secret and indefinite sin pervading the congregation, which was aptly met by this great annual fast. Hence, in its national character, he sees an antithesis between it and the passover, the great festival of social life; and, in its atoning significance, he regards it as a fit preparation for the rejoicing at the ingathering of the fruits of the earth in the feast of tabernacles. Philo looked upon its position in the Jewish calendar in the same light.

In considering the meaning of the particular rites of the day, three points appear to be of a very distinctive character. 1. The white garments of the high priest. 2. His entrance into the Holy of Holies. 3. The scapegoat. The writer of the Epistle to the Hebrews (ix. 7-25) teaches us to apply the first two particulars. The high priest himself, with his person cleansed and dressed in white garments, was the best outward type which a living man could present in his own person of that pure and holy One who was to purify His people and to cleanse them from their sins.

But respecting the meaning of the scapegoat, we have no such light to guide us, and (as has been already implied in what has been stated regarding the word Azazel) the subject is one of great doubt and difficulty.

Of those who take Azazel for the Evil Spirit, some have supposed that the goat was a sort of bribe, or retaining fee, for the accuser of men. Spencer, in supposing that it was given up with its load of sin, to the enemy to be tormented, made it a symbol of the punishment of the wicked; while, according to the strange notion of Hengstenberg, that it was sent to mock the devil, it was significant of the freedom of those who had become reconciled to God.

Some few of those who have held a different opinion on the word Azazel, have supposed that the goat was taken into the wilderness to suffer there

vicariously for the sins of the people. But it has been generally considered that it was dismissed to signify the carrying away of their sins, as it were, out of the sight of Jehovah.<sup>a</sup>

If we keep in view that the two goats are spoken of as parts of one and the same sin-offering, and that every circumstance connected with them appears to have been carefully arranged to bring them under the same conditions up to the time of the casting of the lots, we shall not have much difficulty in seeing that they form together but one symbolical expression. Why there were two individuals instead of one may be simply this—that a single material object could not, in its nature, symbolically embrace the whole of the truth which was to be expressed. This is implied in the reasoning of the author of the Epistle to the Hebrews on the office and sacrifice of Christ (Heb. ix.). Hence some, regarding each goat as a type of Christ, supposed that the one which was slain represented his death, and that the goat set free signified his resurrection. (Cyril, Bochart, and others, quoted by Spencer.) But we shall take a simpler, and perhaps a truer view, if we look upon the slain goat as setting forth the act of sacrifice, in giving up its own life for others "to Jehovah," in accordance with the requirements of the Divine law; and the goat which carried off its load of sin "for complete removal," as signifying the cleansing influence of faith in that sacrifice. Thus in his degree the devout Israelite might have felt the truth of the Psalmist's words, "As far as the east is from the west, so far hath he removed our transgressions from us." But for us the whole spiritual truth has been revealed in historical fact, in the life, death, and resurrection of Him who was made sin for us, who died for us, and who rose again for our justification. This Mediator, it was necessary, should, "in some unspeakable manner, unite death and life" (Maurice on Sacrifice, p. 85).

For the modes in which the Modern Jews have regarded and observed the Day of Atonement, see Buxtorf, *Synagoga Judaica*, cap. xx., and Pirat, *Cérémonies Religieuses*, vol. i.) [S. C.]

ATROTH (עֲטָרוֹת, *Etroth*), a city of Gad, named with Aroer and Jazzer (Num. xxiii. 35). No doubt the name should be taken with that following it, Shophan; the addition serving to distinguish this place from the Atroth in the same neighbourhood. The A. V. follows the Vulgate, *Etroth et Sophan*. In the LXX. it is altogether omitted. [G.]

ATTAL (אֶתַל; 'Eṭl, 'Eṭh, 'Eṭel; *Ethel, Ethel, Ethai*), name of three men. 1. (1 Chr. ii. 35, 36). 2. (1 Chr. xii. 11). 3. Second son of king Rehoboam by Maacah (2 Chr. xi. 20).

ATTALIA (Ἀττάλεια), a coast-town of Pamphylia, mentioned only very casually in the New Testament (Acts xiv. 25), as the place from which Paul and Barnabas sailed on their return to Antioch from their missionary journey into the inland parts of Asia Minor. It does not appear that they made

<sup>a</sup> In the similar part of the rite for the purification of the leper (Lev. xiv. 6, 7), in which a live bird was set free, it must be evident that the bird signified the carrying away of the uncleanness of the sufferer in precisely the same manner.

any stay, or attempted to preach the gospel in Attalia. This city, however, though comparatively modern at that time, was a place of considerable importance in the first century, and has continued to exist till now. Its name since the twelfth century has been *Satalia*, a corruption, of which the crusading chronicler, William of Tyre, gives a curious explanation.

Attalus Philadelphus, king of Pergamus, ruled over the western part of the peninsula from the N. to the S., and was in want of a port which should be useful for the trade of Egypt and Syria, as Troas was for that of the Aegean. Thus Attalia was built and named after the monarch. All its remains are characteristic of the date of its foundation.

There has been considerable doubt concerning the exact position of Attalia. There is a discrepancy even between Strabo and Ptolemy, the former placing it to the W. of the river Catarrhactes, the latter to the E. This may probably be accounted for by the peculiar character of this river, the calcareous waters of which are continually making changes in the channels. Beaufort thought that the modern *Satalia* is the ancient Olbia, and that *Laura* is the true Attalia. Forbiger, after Munier, is inclined to identify the two places. But Spratt and Forbes found the true Olbia further to the west, and have confirmed Leake's opinion, that Attalia is where the modern name would lead us to expect to find it. (Beaufort's *Kirumania*; Spratt and Forbes' *Lycia*.) [J. S. H.]

**ATTALUS** (*Ἀτταλος*, a Macedonian name of uncertain origin), the name of three kings of Pergamus who reigned respectively B.C. 241-197, 159-138 (Philadelphus), 138-133 (Philometor). They were all faithful allies of the Romans (Liv. lvi. 13); and the last appointed the Romans his heirs. It is uncertain whether the letters sent from Rome in favour of the Jews (1 Macc. xv. 22) were addressed to Attalus II. (Polyb. xxv. 6, xxi. 9, xxii. 3, 5, 8, &c., 25 f.; Strab. xiii. 4; Just. xxv. 1, xxxvi. 4, 5; App. *Mith.* 62) or Attalus III., as their date falls in B.C. 139-8 [LUCIUS], about the time when the latter succeeded his uncle. Josephus quotes a decree of the Pergamenes in favour of the Jews (*Ant.* xiv. 10, §22) in the time of Hyrcanus, about B.C. 112; comp. Apoc. ii. 12-17. [B. F. W.]

**ATTHARATES** (*Ἀτθάρτης*; *Atharathes*), 1 Esd. ix. 49; comp. Neh. viii. 9, a corruption of "The Tirshatha;" comp. **ATHARAS**.

**AUGUSTUS CAESAR** (*Αὔγουστος Καίσαρ*), the first Roman emperor. During his reign Christ was born (Luke ii. 1 ff.). He was born A.U.C. 691, B.C. 63. His father was Caius Octavius; his mother Atia, daughter of Julia the sister of C. Julius Cæsar. He bore the same name as his father, Caius Octavius. He was principally educated, having lost his father when young, by his great uncle Julius Cæsar. After his murder, the young Octavius came into Italy as Caius Julius Cæsar Octavianus, being by his uncle's will adopted into the gens Julia as his heir. He was taken into the Triumvirate with Antony and Lepidus, and after the removal of the latter, divided the empire with Antony; taking the West for his share. But there was no real concord between them, and the compact resulted in a struggle for the supreme power, which was terminated in favour of Octavianus by the decisive naval battle of Actium, B.C. 31 (Suet. *Octav.* 87; Dion Cass. l. 15 ff.; Vell. Pater. ii. 85). On this victory, he was saluted Imperator by the senate; and on his offering afterwards to resign the chief power, they conferred on him the title Augustus (B.C. 27). He managed with consummate tact and skill to consolidate the power conferred on him, by leaving the names and rights of the principal state officers intact, while by degrees he united them all in his own person. The first link binding him to N. T. history is his treatment of Herod after the battle of Actium. That prince, who had espoused Antony's side, found himself pardoned, taken into favour and confirmed, nay even increased in his power (Joseph. *Ant.* xv. 6, §5 ff.; 7 §3; 10 §3). In gratitude Herod built him a temple of marble near the source of the Jordan (*Ant.* xv. 10, §3), and was through life the fast friend of the imperial family. After Herod's death in A.D. 4, Augustus divided his dominions almost exactly according to his dying directions, among his sons (*Ant.* xvii. 11, §4); but was soon obliged to exile one of them [ARCHELAUS], and attach his portion, Judæa and Samaria, to the province of Syria (*Ant.* xvii. 13, §2). Augustus died at Nola in Campania, Aug. 19 A.U.C. 767, A.D. 14, in his 76th year (Suet. *Octav.* 99 f.; Dion Cass. lvi. 29 ff.; Joseph. *Ant.* xviii. 3, §2, *B. J.* 11, 9, §1). Long before his death he had associated Tiberius with him in the empire (Suet. *Tiber.* 21; Tacit. *Ann.* 1, 8). See, for a more complete notice, the article **AUGUSTUS** in the Dictionary of Biography and Mythology. [H. A.]

**AUGUSTUS BAND** (Acts xxvii. 1). [ARMY, p. 114, a.]

**AURANUS** (*ἄρας Αὐράνος*), leader of a riot at Jerusalem (2 Macc. iv. 40). In the Vatican LXX. and Vulgate the name is rendered *ῥας ῥαυράνος*, *quidam tyrannus*.

**AUTEPAS** (*Ἀυτάλας*; Vulg. omits), name of a Levite (1 Esd. ix. 48). [HODIJAH.]

**AVA** (*אָבָא* = *Avva*; *Ἀΐδ*; *Arub*), a place in the empire of Assyria, from which colonies were brought to repopulate the cities of Samaria after the deportation of the Jews (2 K. xvii. 24). From the names in connexion with which it is introduced, it would appear to be the same place with Irvah. [IVAH.] It has been suggested to be identical with Ahava; for other suppositions see Winckler, *sub voce*.

**AVARAN** (*Ἀβάρων*; *Abaron*), surname of Eleazar, brother of Judas Maccabæus (1 Macc. ii. 5).

**AVEN** (*אָבֵן*, nothingness). 1. The "plain of Aven" (*אָבֵן בְּיָמֵינוּ*) is mentioned by Amos (i. 5) in his denunciation of Aram (Syria) and the country to the N. of Palestine. It has not been identified with certainty. Michaelis (notes on Amos) heard from a native of Damascus of a valley near that city, called Un, and he quotes a Damascene proverb referring thereto; but the information was at best suspicious, and has not been confirmed, although the neighbourhood of Damascus has been tolerably well explored by Burckhardt (App. iv.) and by Porter. The Prophet, however, would seem to be alluding to some principal district of the country, of equal importance with Damascus itself, and so the LXX. have understood it, taking the letters as pointed *אָבֵן* and expressing it in their version as

πεδῖον<sup>7</sup> Ἄν. By this they doubtless intend the great plain of Lebanon, Coelestria, in which the renowned idol temple of Baalbek or Heliopolis was situated, and which still retains the very same name by which Amos and Joshua designated it, *el Baka'a*. The application of Aven as a term of reproach or contempt to a flourishing idol sanctuary, and the play or punomasia therein contained, is quite in keeping with the manner of Amos and of Hosea. The latter frequently applies the very same word to Bethel. [BETHAVEN.]

2. In Hos. x. 8, "the high places of Aven" (ἱερωτά<sup>8</sup>; βεμολ<sup>9</sup> Ἄν; *excelsa idoli*), the word is clearly a contraction of Beth-aven, that is Beth-el (comp. iv. 15, &c.).

3. In this manner are pointed, in Ez. xxx. 17, the letters of the name which is elsewhere given as On, Ὠν, the sacred city of Heliopolis or On, in Egypt. [ON.] (The LXX. and Vulgate both render it accordingly, Ἡλιουπόλεις, *Heliopolis*.) The intention of the prophet is doubtless to play upon the name in the same manner as Amos and Hosea. See above (1). [G.]

A'VIM, A'VIMS, or A'VITES\* (אֲוִימִי = the Avvim; of Ἐδαῖοι, the word elsewhere used by the LXX. for Hivites; *Havaei*). 1. An early, but perhaps not an aboriginal<sup>b</sup> people among the inhabitants of Palestine, whom we meet with in the S. W. corner of the sea-coast, whither they may have made their way northwards from the Desert (Stanley, *Sinai and Pal.* App. §83). The only notice of them which has come down to us is contained in a remarkable fragment of primeval history preserved in Deut. ii. 23. Here we see them "dwelling in 'the' villages" (or nomad encampments—*Chatzerim*) in the S. part of the Shefela, or great western lowland, "as far as Gaza." In these rich possessions they were attacked by the invading Philistines, "the Caphtorim which came forth out of 'Caphtor,'" and who after "destroying" them and "dwelling in their stead," appear to have pushed them further north. This must be inferred from the terms of the passage in Josh. xiii. 2, 3, the enumeration of the rest of the land still remaining to be conquered. Beginning<sup>c</sup> from "Sihor, which is before Egypt," probably the *Wady-el-Arish*, the list proceeds northwards along the lowland plains of the sea-coast, through the five lordships of the Philistines—all apparently taken in their order from S. to N.—till we reach the Avvim,<sup>d</sup> as if they had been driven up out of the more southerly position which they occupied at the date of the earlier record into the plains of Sharon.

Nothing more is told us of this ancient people, whose very name is said<sup>e</sup> to signify "ruin." Possibly a trace of their existence is to be found in the

town "Avim" (accurately, as in the other cases, 'the Avvim') which occurs among the cities of Benjamin (Josh. xviii. 23), and which may have preserved the memory of some family of the extinct people driven up out of their fertile plains to take refuge in the wild hills of Bethel; just as in the "Zemaraim" of the preceding verse we have probably a reminiscence of the otherwise forgotten Zemarites [ZEMARAIM]. But on the other hand it is possible that the word in this place is but a variation or corruption of the name of Ai. [AI.]

The inhabitants of the north-central districts of Palestine (Galileans) were in later times distinguished by a habit of confounding the gutturals, as, for instance, ע with פ (see Lightfoot, *Chor. Cent.* ch. 87; Buxtorf, *Lex. Talm.* גליל). Is it possible that אֲוִי, *Hivite*, is a variation, arising from this cause, of אֲיִ, *Aiite*, and that this people were known to the Israelites at the date of the conquest by the name of Hivites? At any rate it is a curious fact that both the LXX. and Jerome, as we have seen above, identified the two names, and also that the town of ha-Avvim was in the actual district of the Hivites, in the immediate neighbourhood of Gibeon, Chephirah, and their other chief cities (Josh. ix. 7, 17, compared with xviii. 22-27).

The name of the Avvim has been derived from Avva (Ava), or Ivvah (Ivah), as if they had migrated thence into Palestine; but there is no argument for this beyond the mere similarity of the names.<sup>f</sup>

2. The people of Avva, among the colonists who were sent by the king of Assyria to re-inhabit the depopulated cities of Israel (2 K. xvii. 31). They were idolaters, worshipping gods called Nibhaz and Tartak. [AVA.] [G.]

A'VITH (אֲוִית; Γερθαλα), the city of Hadad ben-Bedad, one of the kings of Edom before there were kings in Israel (Gen. xxxvi. 55; 1 Chr. i. 46; in the latter passage the Text (*Chetib*) has אֲוִית, which in the *Keri* is corrected to agree with the reading in Genesis). The name

may be compared with *el-Ghoreithieh* (الغويثة), a "chain of low hills," mentioned by Burckhardt (375) as lying to the E. of the district of *Kerek* in Mouab (Knobel, *Genesis*, 257). [G.]

AWL (אֲוִל; ὑψήλιον; *sublimis*), a tool of which we do not know the ancient form. The only notice of it is in connexion with the custom of boring the ear of the slave (Ex. xxi. 6; Dent. xv. 17). [W. L. B.]

AXE. The Jews had more than one designation for this tool: (1) אֲכֵרֶם, from its quality of *sharp-*

\* It is characteristic of the looseness of the A. V. that this name is given differently each time it occurs, and that they are all inaccurate.

<sup>b</sup> According to Ewald (*Geschichte*, i. §10) and Bertheau, the Avvim were an *Urvolk* of Palestine proper. They may have been so, but there is nothing to prove it, while the mode of their dwellings points rather to the desert as their origin.

<sup>c</sup> The punctuation of this passage in our Bibles is not in accordance with the Hebrew text, which has a full stop at Geshuri (ver. 2), thus: "This is the land that yet remaineth, all the borders of the Philistines and all the Geshurite. From Sihor . . . .

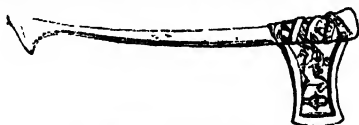

even to the border of Ekron northward, is counted to the Canaanite," &c.

<sup>d</sup> It is perhaps worth notice, where every syllable has some significance, that while "the Gazathitic . . . . the Ekronite," are all in the singular, "the Avvim" is plural.

<sup>e</sup> Gesenius, *Thesaurus*, 1000. Lengerke's explanation of it, as "dwellers in the lowlands," is not obvious; nor does he specify any derivation.

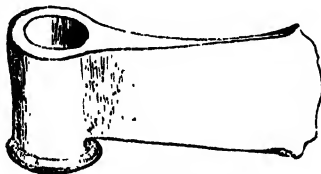

<sup>f</sup> See Lengerke's confident hypothesis (*Kenan*, 183), for which, as is often the case, he does not condescend to give the shadow of a reason.

ness; (2) **אֶזֶל**, from its use in *cutting*; (3) **אֶזֶל**, from the material, *iron*. The second of these terms appears occasionally to have been applied to the adze (1 K. vi. 7). The construction of the tool was similar to that now in use, except that the head appears to have been fastened to the handle by thongs, and so was liable to slip off

Egyptian Axe.—(British Museum.)

(Deut. xix. 5; 2 K. vi. 5). The word "axe" is improperly given in our version as the translation of **אֶזֶל** (Is. xlv. 12, marginal translation; Jer. x. 3): the instrument meant is a *curved knife*, such as a wood-carver would use: in Is. xlv. 12, the word describes the sort of workman, the *smith of knives*, or fine workman: in Jer. x. 3, the stopping should be altered so as to connect the word with "the workman." [W. L. B.]

Assyrian Axe.—(British Museum.)

**AZÆL** (**Ἀζῆλος**; *Azelus*), name of a man (1 Esd. ix. 14). [ASAHEL.]

**AZÆLUS** (**Ἀζῆλος**; *Dichus*), an Israelite in the time of Esdras: the name is probably merely a repetition of that preceding it (1 Esd. ix. 34).

**A'ZAL** (**אֶזֶל**, **אֶזֶל**, but from the emphatic accent **אֶזֶל**, *Atzal*; 'Ιασόθ, Alex. 'Ασάθ; *usque ad proximum*), a name only occurring in Zech. xiv. 5. It is mentioned as the limit to which the 'ravine' or cleft (**אֶזֶל**) of the Mount of Olives will extend when "Jehovah shall go forth to fight." The whole passage of Zechariah is a highly poetical one: and several commentators agree with Jerome in taking *Azal* as an appellative, and not a proper name. [G.]

**AZALTAH** (**אֶזֶלְתָּא**; 'Εσάλας, 'Εσάλας; *A-lit, Eselin*), name of a man (2 K. xxii. 3; 2 Chr. xxxiv. 8).

**AZANIAH** (**אֶזַנְיָה**; 'Αζανίας; *Azanias*), name of a man (Neh. x. 9).

**AZAPHION** (**Ἀσαπιών**; *Sephagus*), 1 Esd. v. 33. Possibly a corruption of SOPHERETH.

**AZARA** (**Ἀσάρ**; *Attre*), one of the "servants of the temple" (1 Esd. v. 31). No corresponding name can be traced in the parallel list in Ezra.

**AZA'RAEL** (the same name as the succeeding one; **אֶזֶרְאֵל**; 'Οζράλ; *Azareel*), a Levite-musician (Neh. xii. 36).

**AZA'REEL** (**אֶזֶרְאֵל**; 'Οζρήλ, 'Ασρήλ, 'Αζαρήλ, 'Εζρήλ, 'Εσδρήλ; *Azareel, Ezrehel, Ezrel,*

*Azareel*), name of five men. 1. (1 Chr. xii. 6). 2. (1 Chr. xxv. 18), called **UZZIEL** in xxv. 3. 3. (1 Chr. xxvii. 22). 4. (Ezr. x. 40), called elsewhere **ESRIL**. 5. (Neh. xi. 13).

**AZARIAH** (**אֶזַרְיָה** and **אֶזַרְיָה**; 'Αζαρίας; *Azarías*; *whom God hath helped*). It is a common name in Hebrew and especially in the families of the priests of the line of **ELEAZAR**, whose name has precisely the same meaning as **AZARIAH**. It is nearly identical, and is often confounded with **Ezra** as well as with **Zerahiah** and **Seraiah**. The principal persons who bore this name were:—

1. Son of Ethau, of the sons of Zerub, where, perhaps, **Zerahiah** is the more probable reading (1 Chr. ii. 8).

2. Son of Ahimaaz (1 Chr. vi. 9). He appears from 1 K. iv. 2, to have succeeded Zadok, his grandfather, in the high-priesthood, in the reign of Solomon, Ahimaaz having died before Zadok. [AHIMAAZ.] To him, it can scarcely be doubted, instead of to his grandson, Azariah the son of Johanan, belongs the notice in 1 Chr. vi. 10, "He it is that executed the priest's office in the temple that Solomon built at Jerusalem," meaning that he officiated at the consecration of the temple, and was the first high-priest that ministered in it. The other interpretation which has been put upon these words, as alluding to the Azariah who was high-priest in Uziah's reign, and resisted the king when he attempted to offer incense, is quite unsuited to the words they are meant to explain, and utterly at variance with the chronology. For this Azariah of 1 Chr. vi. 10 precedes Amariah, the high-priest in Jehoshaphat's reign, whereas Uziah was king five reigns after Jehoshaphat. Josephus merely mentions Azarias as the son and successor of Ahimaaz.

3. The son of Johanan. He must have been high-priest in the reigns of Abijah and Asa, as we know his son Amariah was in the days of Jehoshaphat, the son of Asa. It does not appear what part he took in Asa's zealous reformation (2 Chr. xv.), nor whether he approved the stripping of the house of God of its treasures to induce Benhadad to break his league with Baasha king of Israel, as related 2 Chr. xvi., for his name and his office are never alluded to in the history of Asa's reign, either in the book of Kings or Chronicles. The active persons in the religious movement of the times were the king himself and the two prophets, Azariah the son of Oded, and Hanani. The silence concerning Azariah, the high-priest, is, perhaps, rather unfavourable than otherwise to his religious character. His name is almost lost in Josephus's list of the high-priests. Having lost, as we saw in the article **AMARIAH**, its termination **AH**, which adhered to the following name, it got by some process transformed into **IOSOS**.

4. The high-priest in the reign of Uziah, king of Judah, whose name, perhaps from this circumstance, is often corrupted into Azariah (2 K. xiv. 21; xv. 1, 6, 7, 8, &c.). The most memorable event of his life is that which is recorded in 2 Chr. xxvi. 17-20. When king Uziah, elated by his great prosperity and power, "transgressed against the Lord his God, and went into the temple of the Lord to burn incense upon the altar of incense," Azariah the priest, accompanied by eighty of his brethren, went in boldly after him, and withstood him. With unflinching faithfulness, and a high sense of his own responsibility as ruler of the

House of God, he addressed the king with the well-merited reproof—"It appertaineth not unto thee, Uzziah, to burn incense unto the Lord, but to the priests the sons of Aaron, that are consecrated to burn incense: go out of the sanctuary, for thou hast trespassed: neither shall it be for thine honour from the Lord God." And it is added that when "Azariah the chief priest and all the priests looked upon him, behold he was leprous in his forehead, and they thrust him out from thence; yea himself hasted to go out, because the Lord had smitten him." Uzziah was a leper unto the day of his death, and, as such, was never able again to go to the Lord's House, which he had so presumptuously invaded. Azariah was contemporary with Isaiah the prophet, and with Amos and Joel, and doubtless witnessed the great earthquake in Uzziah's reign (Am. i. 1; Zech. xiv. 5). He is not mentioned in Josephus's list. *Ιουήλος* occurs instead; possibly the name of the prophet inadvertently substituted for that of the high-priest. Neither is he in the priestly genealogy of 1 Chr. vi.

5. The high-priest in the days of Hezekiah (2 Chr. xxxi. 10-13). He appears to have coöperated zealously with the king in that thorough purification of the temple and restoration of the temple-services which was so conspicuous a feature in Hezekiah's reign. He especially interested himself in providing chambers in the house of the Lord in which to stow the tithes and offerings and consecrated things for the use of the priests and Levites, and in appointing overseers to have the charge of them. For the attendance of priests and Levites, and the maintenance of the temple-services, depended entirely upon the supply of such offerings, and whenever the people neglected them the priests and Levites were forced to disperse themselves to their villages, and so the house of God was deserted (comp. Neh. x. 35-39, xii. 27-30, 44-47). His name seems to be corrupted into *Νηήλος* in Josephus. He succeeded Urijah, who was high-priest in the reign of Ahaz. Who his successor was is somewhat uncertain. He is not, any more than the preceding, included in the genealogy of 1 Chr. vi.

6. Another Azariah is inserted between Hilkiiah, in Josiah's reign, and Seraiah, who was put to death by Nebuchadnezzar, in 1 Chr. vi. 13. But Josephus does not acknowledge him, making Seraiah the son of Hilkiiah, and there seems to be scarcely room for him. It seems likely that he may have been inserted to assimilate the genealogy to that of Ezr. vii. 1, where, however, the Seraiah and Azariah are probably neither of them the high-priests of those names.

7. Several other priests and Levites of this name occur, as Azariah the son of Zephaniah (1 Chr. vi. 36); the son of Hilkiiah in the genealogy of Ezra (Ezr. vii. 1), who is probably the same head of a house as is indicated in 1 Chr. ix. 11; Neh. vii. 7, x. 2, and xii. 1, under the form Ezra; Azariah the son of Maaseiah, one of the priests of the plain, who repaired a portion of the wall (Neh. iii. 23, 24); a Levite (Neh. viii. 7); and other Levites (2 Chr. xxix. 12) in the days of Hezekiah.

8. A chief officer of Solomon's, the son of Nathan, perhaps David's grandson (1 K. iv. 5).

9. Son of Jehoshaphat king of Judah (2 Chr. xxi. 2).

10. The original name of Abed-nego (Dan. i. 6, 7, 11, 19). He appears to have been of the sect-

royal of Judah, and for this reason selected, with Daniel and his other two companions, for Nebuchadnezzar's especial service. The three children, as they were called, were remarkable for their beauty, and wisdom, and knowledge, and intelligence. They were no less remarkable for their piety, their strict adherence to the law of Moses, and the steadfastness of their faith, even unto death, and their wonderful deliverance.

11. Azariah, the son of Oded (2 Chr. xv. 1), called simply Oded in ver. 8, was a remarkable prophet in the days of king Asa, and a contemporary of Azariah the son of Johanan the high-priest, and of Hanani the seer. He powerfully stirred up the spirit of Asa, and of the people of Judah and Benjamin, in a brief but pithy prophecy, which has been preserved, to put away all idolatrous worship, and to restore the altar of the one true God before the porch of the temple. Great numbers of Israelites from Ephraim, and Manasseh, and Simeon, and all Israel, joined in the national reformation, to the great strengthening of the kingdom; and a season of rest and great prosperity ensued. Oded, the prophet in the days of Ahaz, may probably have been a descendant of Azariah.

12. At 2 Chr. xxii. 6, Azariah is a clerical error for Abaziah.

13. Several other persons of this name are mentioned of different tribes, as *e. g.* AZARIAH the son of Obed in the reign of Joash (1 Chr. ii. 38, 39; 2 Chr. xxiii. 1), of the tribe of Judah, whose name is very important, as marking clearly the time when the genealogy in 1 Chr. ii. 36-41, was made out, viz., in Hezekiah's reign; for Azariah, in v. 38, appears from 2 Chr. xxiii. 1, xxiv. 1, to have been the captain of a hundred when Joash was seven years old; in other words, about one generation older than Joash. Now there are six generations after Azariah in that genealogy, ending with Elihama, and, counting Joash, there are from Joash to Hezekiah also six generations, viz., Joash, Amaziah, Uzziah, Jotham, Ahaz, Hezekiah. Elihama, therefore, was contemporary with Hezekiah. Zabab, in 1 Chr. ii. 36, 37, we know too from xi. 41, to have been a contemporary of David. Another of the tribe of Ephraim, 2 Chr. xxviii. 12; a son of Hoshaiiah, Jer. xliii. 2, probably of Judah; comp. Neh. xii. 32, 33, &c. [A. C. H.]

**AZARI'AS** (*Ἀζαρίας; Azarias*). 1. (1 Esd. ix. 21), elsewhere called UZZIAH. 2. (1 Esd. ix. 43). 3. (1 Esd. ix. 48), elsewhere called AZARIAH. 4. Priest in the line of Esdras (2 Esd. i. 1), else, where AZARIAH and KHERIAS. 5. Name assumed by the angel Raphael (Tob. v. 12, vi. 6, 17; vii. 8, ix. 2). 6. A captain in the army of Judas Maccabaeus (1 Mac. v. 18, 56, 60).

**A'ZAZ** (*אָזָז; Ἀζάζ; Azaz*), name of a man (1 Chr. v. 8).

**AZAZI'AH** (*אָזַזְיָה; Ὀζας; Ozaziu, Azarius*), name of three men. 1. (1 Chr. xv. 21). 2. (1 Chr. xxvii. 20). 3. (2 Chr. xxxi. 13).

**AZBAZ'ARETH** (*Ἀσβαζαρέθ; Asbazarareth*), king of the Assyrians, probably a corruption of Esarhaddon (1 Esd. v. 69).

**AZBUK** (*אָזְבֻּק; Ἀζαβούχ; Azbooc*), name of a man (Neh. iii. 16).

**AZE'KAH** (*אָזַקָה*), from a root signifying to dig

or till the ground," see *Gesen.* s. v.; 'Αζκηδ, once 'Ιαζκηδ; *Azcoa*, a town of Judah, with dependent villages ("daughters") lying in the Shefelah or rich agricultural plain, a situation quite in accordance with the derivation of the name given above. It is named with Adullam, Shinaraim, and other places known to have been in that locality (Josh. xv. 35; 2 Chr. xi. 9; Neh. xi. 30), but is most clearly defined as being near Shochoh (that is the northern one) [SUCHOH.] (1 Sam. xvii. 1). Joshua's pursuit of the Canaanites after the battle of Beth-horon extended to Azekah (Josh. x. 10, 11). Between Azekah and Shochoh, an easy step out of their own territory, the Philistines encamped before the battle in which Goliath was killed (1 Sam. xvii. 1). It was among the cities fortified by Rehoboam (2 Chr. xi. 9), was still standing at the time of the invasion of the kings of Babylon (Jer. xxxiv. 7), and is mentioned as one of the places re-occupied by the Jews after their return from Captivity (Neh. xi. 30).

The position of Azekah has not yet been recognised. The above passages would seem to show that it must have been to the N. of the Shefelah, near Beth-horon; but by Eusebius and Jerome it is spoken of as lying between (ἀνὰ μέσον) Eleutheropolis and Jerusalem, i. e. further S. and in the mountains of Judah. Perhaps like Shochoh, Aphek, &c. there were more than one place of the name. Schwarz (p. 102) would identify it with "Tell Ezkaria" (*Zakaria* on Robinson's Map, 1856) not far from *Ain-shems*, and very possibly correctly. [G.]

A'ZEL (אֶזֶל, in pause אֶזֶל; 'Εσῆλ; *Asel*), a descendant of Saul (1 Chr. viii. 37, 38, ix. 43, 44).

A'ZEM (אֶזֶם, when not emphasized אֶזֶם; 'Ασόν, 'Ασού; *Asem, Esom*), a city in the extreme south of Judah (Josh. xv. 29), afterwards allotted to Simeon (xix. 3). Elsewhere it is ΕΖΕΜ. [G.]

AZEPIH'RITH (Ἀρσιφουρίθ; Vulg. omits), 1 Esd. v. 16. There is no name answering to this in the parallel lists of Ezra and Nehemiah.

AZ'GAD (אֶזְגָּד; 'Ασγὰδ; *Azjad*), the name of a man (Ezr. ii. 12, viii. 12; Neh. vii. 17, x. 15).

AZI'A (Ὀζῖος; *Ozius*), a "servant of the temple" (1 Esd. v. 31), elsewhere called UZZA.

AZI'EI (2 Esd. i. 2), one of the ancestors of Esdras, elsewhere called AZARIAH and ΕΜΑΣ.

A'ZIEL (אֶזִּיֶּל; 'Οζῖλ; *Oziel*), a Levite (1 Chr. xv. 20). The name is a shortened form of Jaziel (אֶזִּיֶּל), which occurs in ver. 18 of same chapter.

AZI'ZA (אֶזִּיזָא; Ὀζίζα; *Aziza*), name of a lion (Ezr. x. 27).

AZMA'VETH (אֶזְמַבֶּת; 'Αζμώθ, 'Ασμώθ; *Azmaveth, Azmoth*). 1. One of the "mighty men" of David (2 Sam. xxiii. 31; 1 Chr. xi. 33). 2. A descendant of Saul (1 Chr. viii. 36, ix. 42). 3. A Benjamite (1 Chr. xii. 3). 4. One of David's overseers (1 Chr. xxvii. 25).

AZMA'VETH (אֶזְמַבֶּת; 'Αζμώθ; *Azmaveth*), a place to all appearance in Benjamin, being named with Anathoth, Kirjath-Jearim and other towns belonging to that tribe. Forty-two of the

\* The verb occurs only in Is. v. 2, where it is rendered in the A. V. "fenced;" but by Gesenius, in his *lexicon*, "grab ihn um."

*Bene-Azmaveth* returned from the captivity with Zerubbabel (Ezr. ii. 24). The "sons of the singers" seem to have settled round it (Neh. xii. 29). The name elsewhere occurs as BETH-AZMAVETH. *Azmaveth* does not make its appearance in the lists in Joshua, but the name was borne by several Benjamites of the kindred of Saul (1 Chr. viii. 36, ix. 42, xii. 3; in the last passage *Bene-A.* may merely denote natives of the place, especially as natives of Anathoth, Gibeah, &c. are mentioned in the same verse). [G.]

AZMON (אֶזְמוֹן or אֶזְמוֹן; 'Ασμωνά, Σελμωνά; *Asemona*), a place named as being on the S. boundary of the Holy Land, apparently near the torrent of Egypt (*Wadi el-Arish*) (Num. xxix. 4, 5; Josh. xv. 4). It has not yet been identified. It is mentioned by Eusebius and Jerome (*Onom.*), but evidently was not actually known to them. [G.]

AZ'NOTH-TA-BOR (אֶזְנוֹת תְּבוֹר; 'Αζανόθ Θαβώρ, or 'Αθθαβώρ; *Aznanthabor*) = the ears (i. e. possibly the summits) of Tabor, one of the landmarks of the boundary of Naphtali (Josh. xix. 34). The town, if town it be, or the reason for the expression contained in the name, has hitherto escaped recognition. By Eusebius (under 'Αζανόθ) it is mentioned as lying in the plain in the confines of Dio-cæsarea.

For the use of the word אֶזְנוֹת = ear, comp. UZZEN-SHERAH; and for the metaphor involved in the name, comp. CHISLOTH-TABOR. [G.]

A'ZOR ('Αζώρ; *Azor*), son of Eliakim, in the line of our Lord (Matt. i. 13, 14).

AZO'TUS. [ASINOD.]

AZ'RIEL (אֶזְרִיֶּל, *help of God*; Gesen. compares the Punic *Hadrubal*, i. e. בְּעֵל, *help of Baal*; 'Ιεζριήλ, 'Οζριήλ; *Ezriel, Ozriel*), name of three men. 1. (1 Chr. v. 24). 2. (1 Chr. xxvii. 19). 3. (Jer. xxxvi. 26).

AZRIKAM (אֶזְרִיקָם; 'Εζρικάμ; *Ezricam*), the name of four men. 1. A descendant of the royal line of Judah (1 Chr. iii. 23). 2. (1 Chr. viii. 38; ix. 44). 3. (1 Chr. ix. 14; Neh. xi. 15). 4. "Governor of the house" to king Ahaz (2 Chr. xxviii. 7).

AZU'BAH (אֶזְוָבָה; 'Αζουβά; *Azuba*). 1. Wife of Caleb, son of Hezron (1 Chr. ii. 18, 19). 2. Mother of king Jehoshaphat (1 K. xxii. 42; 2 Chr. xx. 31).

A'ZUR or AZ'ZUR (אֶזְרוֹר or אֶזְרָר; 'Αζούρ, 'Εζέρ; *Azur*), name of three men. 1. A Gibeonite (Jer. xxvii. 1). 2. (Ez. xi. 1). 3. (Neh. x. 17).

AZU'RAH ('Αζαρόν, Alex. 'Αζουρός; *Azurac*), 1 Esd. v. 15. There is no corresponding name in the parallel lists of Ezra and Nehemiah.

AZ'ZAH (אֶזְזָה; Γάζα; *Gaza*). This is the more accurate rendering of the name of the well-known Philistine city, Gaza (Deut. ii. 23; 1 K. iv. 24; Jer. xxv. 20). [GAZA.] There is apparently nothing to explain why an exception should have been made in these three places from the usual but less correct version of the name. [G.]

AZ'ZAN (אֶזְזָן; 'Οζζα; *Azzan*), name of a man (Num. xxxiv. 26).

AZ'ZUR. [AZUR.]

## B

**BA'AL** (בַּעַל; *Baal*; *Baal*), the supreme male divinity of the Phœnician and Canaanitish nations, as ASHTORETH was their supreme female divinity. Both names have the peculiarity of being used in the plural, and it seems certain that these plurals designate not (as Gesenius, *Thes. s. vv.*, maintained) statues of the divinities, but different modifications of the divinities themselves. That there were many such modifications of Baal is certain from the fact that his name occurs with numerous adjuncts, both in the O. T. and elsewhere, as we shall have occasion to notice hereafter. The plural Baalim is found frequently alone (e.g. Judg. ii. 11, x. 10; 1 K. xviii. 18; Jer. ix. 14; Hos. ii. 17), as well as in connexion with Ashtoreth (Judg. x. 6; 1 Sam. vii. 4) and with Asherah, or, as our version renders it, "the groves" (Judg. iii. 7; 2 Chr. xxxiii. 3). There is no difficulty in determining the meaning of the name since the word is in Hebrew a common noun of frequent occurrence, having the meaning *Lord*, not so much, however, in the sense of Ruler as of *Master, Owner, Possessor*. The name of the god, whether singular or plural, is always distinguished from the common noun by the presence of the article (הַבַּעַל, הַבְּעֵלִים), except when it stands in connexion with some other word which designates a peculiar modification of Baal. In the Chaldaic form the word becomes shortened into בַּעַל, and, thence dropping the guttural, בַּל, *BEL*, which is the Babylonian name of this god (Buxtorf, *Lex. Chald. et Talm.*, Gesen., Fürst, Movers; the identity of the two words is, however, doubted by Rawlinson, *Herod.* i. 318).

There can be no doubt of the very high antiquity of the worship of Baal. We find his worship established amongst the Moabites and their allies the Midianites in the time of Moses (Num. xxi. 41), and through these nations the Israelites were seduced to the worship of this god under the particular form of Baal-Peor (Num. xxv. 3 sqq.; Deut. iv. 3). Notwithstanding the fearful punishment which their idolatry brought upon them in this instance, the succeeding generation returned to the worship of Baal (Judg. ii. 10-13), and with the exception of the period during which Gideon was judge (Judg. vi. 26, sqq. viii. 33) this form of idolatry seems to have prevailed amongst them up to the time of Samuel (Judg. x. 10; 1 Sam. vii. 4), at whose rebuke the people renounced the worship of Baalim. Two centuries pass over before we hear again of Baal in connexion with the people of Israel, though we can scarcely conclude from this silence that his worship was altogether abandoned. We know that in the time of Solomon the service of many gods of the surrounding nations was introduced, and particularly that of Ashtoreth, with which Baal is so frequently connected. However this may be, the worship of Baal spread greatly, and together with that of Asherah became the religion of the court and people of the ten tribes under Ahab, king of Israel, in consequence of his marriage with Jezebel (1 K. xvi. 31-33; xvii. 9, 22). And though this idolatry was occa-

sionally put down (2 K. iii. 2, x. 28) it appears never to have been permanently or effectually abolished in that kingdom (2 K. xvii. 16). In the kingdom of Judah also Baal-worship extensively prevailed. During the short reign of Ahaziah and the subsequent usurpation of his mother Athaliah, the sister of Ahab, it appears to have been the religion of the court (2 K. viii. 27; comp. xi. 18), as it was subsequently under Ahaz (2 K. xvi. 3; 2 Chr. xxviii. 2), and Manasseh (2 K. xxi. 3).

The worship of Baal amongst the Jews appears to have been appointed with much pomp and ceremonial. Temples were erected to him (1 K. xvi. 32; 2 K. xi. 18); his images were set up (2 K. x. 26); his altars were very numerous (Jer. xi. 13), were erected particularly on lofty eminences, (1 K. xviii. 20), and on the roofs of houses (Jer. xxiii. 29); there were priests in great numbers (1 K. xviii. 19), and of various classes (2 K. x. 19); the worshippers appear to have been arrayed in appropriate robes (2 K. x. 22); the worship was performed by burning incense (Jer. vii. 9) and offering burnt-sacrifices, which occasionally consisted of human victims (Jer. xix. 5). The officiating priests danced with frantic shouts around the altar, and cut themselves with knives to excite the attention and compassion of the god (1 K. xviii. 26-28; comp. Lucian, *De Dea Syria*, 50; Tert. *Apol.* 9; Lucan, i. 565; Tibul. i. 6, 47).

Throughout all the Phœnician colonies we continually find traces of the worship of this god, partly in the names of men such as Adher-bal, Asdrubal, Hannibal, and still more distinctly in Phœnician inscriptions yet remaining (Gesen. *Mon. Phœn.* passim). Nor need we hesitate to regard the Babylonian Bel (Is. xli. 1) or Belus (Herod. i. 181), as essentially identical with Baal, though perhaps under some modified form. Rawlinson distinguishes between the second god of the first triad of the Assyrian pantheon, whom he names provisionally Bel-Nimrod, and the Babylonian Bel whom he considers identical with Merodach (Herod. i. 594, sqq.; 627, sqq.).

The same perplexity occurs respecting the connexion of this god with the heavenly bodies as we have already noticed in regard to Ashtoreth. Creuzer (*Symb.* ii. 413) and Movers (*Phœn.* i. 180) declare Baal to be the Sun-god; on the other hand, the Babylonian god is identified with Zeus, by Herodotus, and there seems to be no doubt that Bel-Merodach is the planet Jupiter (Rawlinson, *Herod.* i. c.). It is quite likely that in the case of Baal as well as of Ashtoreth the symbol of the god varied at different times and in different localities. Indeed the great number of adjuncts with which the name of Baal is found is a sufficient proof of the diversity of characters in which he was regarded, and there must no doubt have existed a corresponding diversity in the worship. It may even be a question whether in the original notion of Baal there was reference to any of the heavenly bodies, since the derivation of the name does not in this instance, as it does in the case of Ashtoreth, point directly to them. If we separate the name Baal from idolatry, we seem, according to its meaning, to obtain simply the notion of Lord and Proprietor of all. With this the idea of productive power is naturally associated, and that power, as naturally symbolized by the sun, whilst on the other hand the ideas of providential arrangement and rule, and so of prosperity, are as naturally suggested by the word, and in the astral mythology these ideas are associated with

the planet Jupiter. In point of fact we find adjuncts to the name of Baal answering to all these notions, e.g. *Βαελσαμην*, *Balsamen* (Phut. Poen. v. 2, 67) = *בעל-שמן*, "Lord of the heavens;" *בעל-חמן*, *Baal-Hamou* (Gesén. *Mou. Phoen.* 349), the Sun-Baal, and similarly the name of a city in the O. T. *בעל-המן* (Cant. viii. 11); *בעל-גד*, *Baal-Gad*, the name of a city (Josh. xi. 17), Baal the Fortune-bringer, which god may be regarded as identical with the planet Jupiter (Gesén. *Thes. Filr.*). Many more compounds of Baal in the O. T. occur, and amongst them a large number of cities, which are mentioned below. We shall first mention those names of men and of gods in which Baal is the first element. It may be noted before proceeding to specify the particular compounds of Baal that the word standing alone occurs in the O. T. in two instances as the name of a man (1 Chr. x. 5, viii. 30). First considers that in these instances the latter element of the word is dropped.

1. *BA'AL-BETH* (*בְּרִית* *בַּעַל*; *Βααλβερθ*; *Baalberth*). This form of Baal was worshipped at Shechem by the Israelites after the death of Gideon (Judg. viii. 33, ix. 4). The name signifies the "Covenant-Baal," and has been compared with the Greek *Zeús theios* or the Latin *Deus filius*. The meaning, however, does not seem to be the god who presides over covenants, but the god who comes into covenant with the worshippers. In Judg. ix. 46 he is called *בְּרִית אֱלֹהִים*. We know nothing of the particular form of worship paid to this god.

2. *BA'AL-ZEBUB* (*בַּעַל זְבֻב*; *Βααλ μύτα*; *Beelzebub*), the form of Baal worshipped at Ekron (2 K. i. 2, 3, 16). The meaning of the name is *Baal* or *Lord of the fly*. Though such a designation of the god appears to us a kind of mockery, and has consequently been regarded as a term of derision (Selden, *De Diis Syris*, 375), yet there seems no reason to doubt that this was the name given to the god by his worshippers, and the plague of flies in hot climates furnishes a sufficient reason for the designation. Similarly the Greeks gave the epithet *ἀρούριος* to Zeus (Pausan. v. 14, §2; Clem. Alex. *Protrept.* ii. 38), and Pliny (xxix. 6, 34, init.) speaks of a Fly-god *Myiodes*. The name occurs in the N. T. in the well known form *BEELZEBUB*.

3. *BA'AL-HANAN* (*בַּעַל חֲנָן*; *Baal* is *gracius*; *Βααλαννός*, *Baallanón*; *Balkan*, *Balaan*; comp. *יְהוָה חֲנָן*, *Jehovah* is *gracius*). 1. The name of one of the early kings of Edom (Gen. xxxvi. 38, 39; 1 Chr. i. 49, 50). 2. The name of one of David's officers, who had the superintendence of his olive and sycomore plantations (1 Chr. xxvii. 28). He was of the town of Gederah (Josh. xv. 36) or Beth-Gader (1 Chr. ii. 51), and from his name we may conjecture that he was of Canaanitish, not Jewish origin.

4. *BA'AL-PE'OR* (*בַּעַל פְּעֹר*; *Βαελφεγώρ*; *Beelphegor*). We have already referred to the worship of this god. The narrative (Num. xxv.) seems clearly to show that this form of Baal-worship was connected with licentious rites. Without laying too much stress on the Rabbinical derivation of the

word *פְּעֹר*, *hiatus*, i. e. "aperire hymenem virgineum," we seem to have reason to conclude that this was the nature of the worship. Baal-Peor was identified by the Rabbins and early fathers with Priapus (see the authorities quoted by Selden, *De Diis Syris*, i. 4, p. 302, sq., who, however, dissents from this view). This is moreover the view of Creuzer (ii. 411), Winer, (Gesénus, *FIRST*, and almost all critics. The reader is referred for more detailed information particularly to Creuzer's *Symbolik* and Movers' *Jah-nizier*. [F. W. G.]

*BA'AL* (*בַּעַל*), *geographical*. This word occurs as the prefix or suffix to the names of several places in Palestine. Gesénus has expressed his opinion (*Thes.* 225 a.) that in these cases it has no reference to any worship of the god Baal, at the particular spot, but merely expresses that the place "possesses" or contains something special denoted by the other part of the name, the word Baal bearing in that case a force synonymous with that of BETH. Without being so presumptuous as to contradict this conclusion, some reasons may (with considerable hesitation) be mentioned for reconsidering it.

(a.) Though employed in the Hebrew Scriptures to a certain extent metaphorically, and there certainly with the force of "possession" or "ownership,"—as a "lord of land" (2 K. i. 8), "lord of dreams" (Gen. xxxvii. 19), &c., Baal never seems to have become a naturalized Hebrew word, but frequently occurs so as to betray its Canaanite origin and relationship. Thus it is several times employed to designate the inhabitants of towns either certainly or probably heathen, but rarely if ever those of one undoubtedly Hebrew. It is applied to the men of Jericho before the conquest (Josh. xxiv. 11); to the men of Shechem, the ancient city of Hamor the Hivite, who rose to recover the rights of Hamor's descendants long after the conquest of the land (Judg. ix. 2-51, with Ewald's commentary, *Gesch.* ii. 445-7), and in the account of which struggle, the distinction between the *בְּעָלִים* of Shechem, and the *יִשְׂרָאֵלִים*—the Hebrew relations of Abimelech—is carefully maintained. It is used for the men of Keilah, a place on the western confines of Judah, exposed to all the attacks and the influences of the surrounding heathen (1 Sam. xxiii. 11, 12), for Uriah the Hittite (2 Sam. xi. 26), and for others (Is. xvi. 8, &c.). Add to this the consideration that if Baal forms part of the name of a person, we are sure to find the name mentioned with some Hebrew alteration, as Jerub-besheth for Jerub-baal; Mephibosheth for Merib-baal; Ish-bosheth for Esh-baal, and others. In Hos. ii. 16, a remarkable instance is preserved of the distinction, noticed above in connexion with the record of the revolt at Shechem, between the heathen *Baal*, and the Hebrew *Ish*—"at that day, saith Jehovah, men shall call Me 'Ishi,' and shall call Me no more 'Bali,'" both words having the sense of "my husband."

(b.) Such places called by this name or its compounds as can be identified, and several of which existed at the time of the conquest, were either near Phœnicia, as Baal-gad, Baal-hermon, Belmaikos (of later times); or in proximity to some other acknowledged seat of heathen worship, as Baal-meon and Bamoth-Baal, near the infamous seat of Baal-peor; or Kirjath-Baal and Baal-tamar,

(*Ἰέβους, Ezbous*), near the "mountain of the hot springs," and reputed to be the native place of Elisha.

10. BA'AL-PER'AZIM (בְּאֵל־פְּרָצִים; *Baal-pharasis*), the scene of a victory of David over the Philistines, and of a great destruction of their images, and so named by him in a characteristic passage of exulting poetry—"Jehovah hath burst (*פָּרַץ*) upon mine enemies before me as a burst (*פָּרַץ*) of waters." Therefore he called the name of that place 'Baal-perazim,' i. e. bursts or destructions (2 Sam. v. 20; 1 Chr. xiv. 11). The place and the circumstance appear to be again alluded to in Is. xxviii. 21, where it is called *Mount P.* Perhaps this may point to the previous existence of a high place or sanctuary of Baal at this spot, which would lend more point to David's exclamation (see Gesenius, *Jes.* 814). The LXX. render the name in its two occurrences, respectively *Ἐπάνω διακοπών*, and *Διακοπή παρασίον*: the latter an instance of retention of the original word and its explanation side by side; the former uncertain.

11. BA'AL-SHAL'ISHA (בְּאֵל־שָׁלִישָׁה; *Baetharisd*, *Baethari*; *Baalalisa*), a place named only in 2 K. iv. 42; apparently not far from Migdal (comp. v. 38). It was possibly situated in the district, or "land" of the same name. [SHALISHA.]

12. BA'AL-TA'MAR (בְּאֵל־תָּמָר; *Baithamar*), *Baal Tamár*; *Baithamar*, a place named only in Judg. xi. 33, as near Gibeath of Benjamin. The palm-tree (*תָּמָר*) of Deborah (iv. 5) was situated somewhere in the locality, and is possibly alluded to (Stanley, 145, 6). In the days of Eusebius it was still known under the altered name of *Βηθθαμάρ*; but no traces of it have been found by modern travellers. [G.]

13. BA'AL-ZE'PHON (בְּאֵל־צֶפֶן; *place of Zephon*; *Beelzephon*, *Beelzephon*; *Beelzephon*), a place in Egypt near where the Israelites crossed the Red Sea (Ex. xiv. 2, 9; Num. xxxiii. 7). From the position of Goshen and the indications afforded by the narrative of the route of the Israelites, we place Baal-zephon on the western shore of the Gulf of Suez, a little below its head, which at this time was about 30 or 40 miles northward of the present head. [GOSHEN; RED SEA, PASSAGE OF.] Its position with respect to the other places mentioned with it is clearly indicated. The Israelites encamped before or at Pi-hahiroth, between Migdol and the sea, before Baal-zephon, according to Ex. (xiv. 2, 9), while in Num., Pi-hahiroth is described as being before Baal-zephon, and it is said that when the people came to the former place they pitched before Migdol (xxiii. 7); and again, that afterwards they departed from before Pi-hahiroth, here in Heb. *Hahiroth* (v. 8). Migdol and Baal-zephon must therefore have been opposite to one another, and the latter behind Pi-hahiroth with reference to the Israelites. Baal-zephon was perhaps a well-known place, if, as seems likely, it is always mentioned to indicate the position of Pi-hahiroth, which we take to be a natural locality [RED SEA, PASSAGE OF; PI-HAHIROTH]. The name has been supposed to mean "place of Typhon," or "sacred to Typhon," an etymology approved by Gesenius (*Thes.* s. v.). Zephon would well enough correspond in sound to Typhon, had we any ground for considering the latter

name to be either Egyptian or Semitic, but as we have not, the conjecture is a very bold one. Were, however, Typhon an Egyptian word, we could not consider Zephon in Baal-zephon to be its Hebrew transcription, inasmuch as it is joined with the Hebrew form *צֶפֶן*. We would rather connect Baal-zephon, as a Hebrew compound, with the root *צָפַן*, as if it were named from a watch-tower on the frontier like the neighbouring *בְּנֵי־צֶפֶן*, "the tower." It is noticeable that the name of the son of Gad called Ziphion *צִיפְיוֹן* in Gen. (xlii. 16) is written Zephon *צֶפֶן* in Num. (xxvi. 15). The identifications of Baal-zephon that have been proposed depend upon the supposed meaning "place of Typhon." Forster (*Epp. ad Mich.*, pp. 28, 29) thinks it was Heroopolis, *Ἡρώων πόλις*, which some, as Champollion (*L'Egypte sous les Pharaons*, ii. p. 87 seqq.), consider, wrongly, to be the same as Avaris, the stronghold of the Hyksos, both which places were connected with Typhon (Steph. B. s. v. *Ἡρώ*; Manetho, ap. Jos. c. *Apion*, i. 26). Avaris cannot be Heroopolis, for geographical reasons. (Comp., as to the site of Avaris, Brugsch, *Geographische Inschriften*, i. p. 86 seqq.; as to that of Heroopolis, Lepsius *Chron. d. Aegypt.* i. p. 344 seqq., and p. 342, against the two places being the same.) [R. S. P.]

BA'ALAH. [BAAL, No. 2.]

BA'ALATH. [BAAL, Nos. 3, 4.]

BA'ALE OF JUDAH. [BAAL, No. 2, a.]

BA'ALIM. [BAAL.]

BA'AL'IS (בְּאֵל־יִש; *Beleisad*; *Bualis*), king of the Bene-Ammon (*Βασιλεὺς υἱὸς Ἀμμων*) at the time of the destruction of Jerusalem by Nebuchadnezzar (Jer. xl 14).

BA'ANA (בְּאֵנָה; *Bard*, *Bard*; *Bana*, *Bana*), the name of several men. 1. The son of Ahilud, Solomon's commissariat officer in Jezreel and the north of the Jordan valley (1 K. iv. 12). 2. (Neh. iii. 4). 3. (1 Esd. v. 8). [BAANA, 4.]

BA'ANAH (בְּעָנָה; *Bard*; *Bana*). 1. Son of Rimmon, a Benjamite, who with his brother Rechab murdered Ish-bosheth. For this they were killed by David, and their mutilated bodies hung up over the pool at Hebron (2 Sam. iv. 2, 5, 6, 9). 2. A Netophathite, father of Heleb or Heled, one of David's mighty men (2 Sam. xxiii. 29; 1 Chr. xi. 30).

3. (Accurately *Bana* בְּעָנָה; *Bard*; *Bana*), son of Hushai, Solomon's commissariat officer in Asher (1 K. iv. 16).

4. A man who accompanied Zerubbabel on his return from the captivity (Ezr. ii. 2; Neh. vii. 7). Possibly the same person is intended in Neh. x. 27. [BAANA, 3.]

BA'ARA (בְּעָרָה; *Bard*; *Bard*; *Bana*), one of the wives of Shaharaim, a descendant of Benjamin (1 Chr. vii. 8).

BAASETAH (בְּעֵשֶׂה; *Baseta*; *Baseta*), a Gershonite Levite, one of the forefathers of Asaph the singer (1 Chr. vi. 40 [25]).

BA'ASHA (בְּעָשָׂה; *Bard*; *Bard*; *Bana*), third sovereign of the separate kingdom of Israel, and the founder of its second dynasty.

The name, according to Gesenius, is from a root *to be wicked*, but this would seem impossible unless it has been altered [ANIJAH], and Calmet suggests that it may mean in the *work*, from בָּנִי, and נָשָׂא *to make*, or *he who seeks* נָשָׂא, and *lays waste* נָשָׂא.

Baasha was son of Ahijah of the tribe of Issachar, and conspired against King Nadab, son of Jeroboam, when he was besieging the Philistine town of Gibbethon, and killed him with his whole family. He appears to have been of humble origin, as the prophet Jehu speaks of him as having been "exalted out of the dust" (1 K. xvi. 2). In matters of religion his reign was no improvement on that of Jeroboam; he equally forgot his position as king of the nation of God's election, and was chiefly remarkable for his persevering hostility to Judah. It was probably in the 13th year of his reign [ASA] that he made war on its king Asa, and began to fortify Ramoth as an *ἐπικύκλιον* against it. He was defeated by the unexpected alliance of Asa with Benhadad I. of Damascus, who had previously been friendly to Baasha. Benhadad took several towns in the N. of Israel, and conquered lands belonging to it near the sources of Jordan. Baasha died in the 24th year of his reign, and was honourably buried in the beautiful city of Tirzah (Cant. vi. 4), which he had made his capital. The dates of his accession and death according to Clinton (*F. II. i.* 321) are B.C. 953 and B.C. 931 (1 K. xv. 27, xvi. 7; 2 Chr. xvi. 1-6). [i. E. L. C.]

BA'BEL, BABYLON, &c. (בָּבֶל; Βαβυλών),

is properly the capital city of the country, which is called in Genesis *Shinar* (שִׁנְעַר), and in the later Scriptures *Chaldea*, or the land of the Chaldeans (כַּלְדָּיָה). The name is connected in Genesis with the Hebrew root בָּלַל, "*confundere*," "because the Lord did there confound the language of all the earth" (Gen. xi. 9); but the native etymology is *Bub-il*, "the gate of the god *Il*;" or perhaps more simply "the gate of God;" and this no doubt was the original intention of the appellation as given by Nimrod, though the other sense came to be attached to it after the confusion of tongues. Probably a temple was the first building raised by the primitive nomads, and in the gate of this temple justice would be administered in early times (comp. 2 Sam. xix. 8), after which houses would grow up about the gate, and in this way the name would readily pass from the actual portal of the temple to the settlement. According to the traditions which the Greeks derived from the Babylonians in Alexander's age the city was originally built about the year B.C. 2230. The architectural remains discovered in southern Babylonia, taken in conjunction with the monumental records, seem to indicate that it was not at first the capital, nor, indeed, a town of very great importance. It probably owed its position at the head of Nimrod's cities (Gen. x. 10) to the power and pre-eminence whereto it afterwards attained rather than to any original superiority that it could boast over the places coupled with it. *Erech*, *Ur*, and *Ekkasar*, appear to have been all more ancient than Babylon, and were capital cities when *Babil* was a provincial village. The first rise of the Chaldean power was in the region close upon the Persian Gulf, as Berossus indicated by his fish-god Oannes, who brought the Babylonians civilization and the arts out of the

sea (ap. Syncell. p. 28, B.). Thence the nation spread northwards up the course of the rivers, and the seat of government moved in the same direction, being finally fixed at Babylon, perhaps not earlier than about B.C. 1700.

1. *Topography of Babylon*.—Ancient descriptions of the city.—The descriptions of Babylon which have come down to us in classical writers are derived chiefly from two sources, the works of Herodotus and of Ctesias. These authors were both of them eye-witnesses of the glories of Babylon—not, indeed, at their highest point, but before they had greatly declined—and left accounts of the city and its chief buildings, which the historians and geographers of later times were, for the most part, content to copy. The description of Herodotus is familiar to most persons. According to this, the city, which was built on both sides of the Euphrates, formed a vast square, enclosed within a double line of high walls, the extent of the outer circuit being 480 stades, or about 56 miles. The entire area included would thus have been about 200 square miles. Herodotus appears to imply that this whole space was covered with houses, which, he observes, were frequently three or four stories high. They were laid out in straight streets crossing each other at right angles, the cross streets leading to the Euphrates being closed at the river end with brazen gates, which allowed or prevented access to the quays wherewith the banks of the Euphrates were lined along its whole course through the city. In each division of the town, Herodotus says, there was a fortress or stronghold, consisting in the one case of the royal palace, in the other of the great temple of Belus. This last was a species of pyramid, composed of eight square towers placed one above the other, the dimensions of the basement tower being a stade—or above 200 yards—each way. The height of the temple is not mentioned by Herodotus. A winding ascent, which passed round all the towers, led to the summit, on which was placed a spacious ark or chapel, containing no statue, but regarded by the natives as the habitation of the god. The temple stood in a sacred precinct, two stades (or 400 yards) square, which contained two altars for burnt-offerings and a sacred ark or chapel, wherein was the golden image of Bel. The two portions of the city were united by a bridge, composed of a series of stone piers with moveable platforms of wood stretching from one pier to another. Such are the chief features of the description left us by Herodotus (i. 178-186).

According to Ctesias (ap. *Diod. Sic. ii. 7, et seqq.*) the circuit of the city was not 480 but 360 stades—which is a little under 42 miles. It lay, he says, on both sides of the Euphrates, and the two parts were connected together by a stone bridge five stades (above 1000 yards) long, and 30 feet broad, of the kind described by Herodotus. At either extremity of the bridge was a royal palace, that in the eastern city being the more magnificent of the two. It was defended by a triple *emcint*, the outermost 60 stades, or 7 miles, round; the second, which was circular, 40 stades, or 4½ miles; and the third 20 stades, or 2½ miles. The height of the second or middle wall was 300 feet, and its towers were 420 feet. The elevation of the innermost circuit was even greater than this. The walls of both the second and the third enclosure were made of coloured brick, and represented hunting scenes—the chase of the leopard and the lion—with figures, male and female, regarded by Ctesias as those of

Ninus and Semiramis. The other palace was inferior both in size and magnificence. It was enclosed within a single *cuneate*, 30 stades, or 3½ miles, in circumference, and contained representations of hunting and battle scenes as well as statues in bronze, said to be those of Ninus, Semiramis, and Jupiter Belus. The two palaces were joined, not only by the bridge, but by a tunnel under the river! Ctesias' account of the temple of Belus has not come down to us. We may gather, however, that he represented its general character in much the same way as Herodotus, but spoke of it as surmounted by three statues, one of Bel, 40 feet high, another of Rhea, and a third of Juno or Beltis. He seems further to have described elaborately the famous "hanging gardens" of Nebuchadnezzar (Diod. Sic. ii. 10), but the description, as reported by Diodorus, is not very intelligible. It appears that they were a square of 400 feet each way, and rose in terraces, the topmost terrace being planted with trees of all kinds, which grew to a great size.

In examining the truth of these descriptions, we shall most conveniently commence from the outer circuit of the town. All the ancient writers appear to agree in the fact of a district of vast size, more or less inhabited, having been enclosed within lofty walls, and included under the name of Babylon. With respect to the exact extent of the circuit they differ. The estimate of Herodotus and of Pliny (*II. N. vi. 26*) is 480 stades, of Strabo (*xvi. i. §5*) 385, of Q. Curtius (*v. i. §26*) 368, of Clitarchus (*ap. Diod. Sic. ii. 7*) 365, and of Ctesias (*ap. eund.*) 360 stades. It is evident that here we have merely the moderate variations to be expected in independent measurements, except in the first of the numbers. Setting this aside, the difference between the greatest and the least of the estimates is little more than  $\frac{1}{3}$  per cent.\* With this near agreement on the part of so many authors, it is the more surprising that in the remaining case we should find the great difference of one-third more, or 33½ per cent. Perhaps the true explanation is that Herodotus spoke of the *outer* wall, which could be traced in his time, while the later writers, who never speak of an inner and an outer barrier, give the measurement of Herodotus' *inner* wall, which may have alone remained in their day. This is the opinion of M. Oppert, who even believes that he has found traces of both enclosures, showing them to have been really of the size ascribed to them. This conclusion is at present disputed, and it is the more general belief of those who have examined the ruins with attention that no vestiges of the ancient walls are to be found, or at least, that none have as yet been discovered. Still it is impossible to doubt that a line of wall inclosing an enormous area originally existed. The testimony to this effect is too strong to be set aside, and the disappearance of the wall is easily accounted for, either by the constant quarrying, which would naturally have commenced with it (*Rich, First Mem. p. 44*), or by the subsidence of the bulwark into the moat from which it was raised. Taking the lowest estimate of the extent of the circuit, we shall have for the space within the rampart an area of above 100

square miles; nearly five times the size of London! It is evident that this vast space cannot have been entirely covered with houses. Diodorus confesses (*ii. 9, ad fin.*) that but a small part of the enclosure was inhabited in his own day, and Q. Curtius (*v. i. §27*) says that as much as nine-tenths consisted, even in the most flourishing times, of gardens, parks, paradises, fields, and orchards.

With regard to the height and breadth of the walls there is nearly as much difference of statement as with regard to their extent. Herodotus makes the height 200 royal cubits, or 337½ feet; Ctesias 50 fathoms, or 300 feet; Pliny and Solinus 200 royal feet; Strabo 50 cubits, or 75 feet. Here there is less appearance of independent measurements than in the estimates of length. The two original statements seem to be those of Herodotus and Ctesias, which only differ accidentally, the latter having omitted to notice that the royal scale was used. The later writers do not possess fresh data; they merely soften down what seems to them an exaggeration—Pliny and Solinus changing the cubits of Herodotus into feet, and Strabo the fathoms of Ctesias into cubits. We are forced then to fall back on the earlier authorities, who are also the only eye-witnesses; and, surprising as it seems, perhaps we must believe the statement, that the vast enclosed space above mentioned was surrounded by walls which have well been termed "artificial mountains," being nearly the height of the dome of St. Paul's! (See Grote's *Greece*, vol. iii. p. 397; and, on the other side, Mure's *Lit. of Greece*, vol. iv. p. 546.) The ruined wall of Nineveh was, it must be remembered, in Xenophon's time 150 feet high (*Anab. iii. 4. §10*), and another wall which he passed in Mesopotamia was 100 feet (*ibid. ii. 4. §12*).

The estimates for the thickness of the wall are the following:—Herodotus, 50 royal cubits, or nearly 85 feet; Pliny and Solinus, 50 royal, or about 60 common feet; and Strabo, 32 feet. Here again Pliny and Solinus have merely softened down Herodotus; Strabo, however, has a new number. This may belong properly to the inner wall, which, Herodotus remarks (*i. 181*), was of less thickness than the outer.

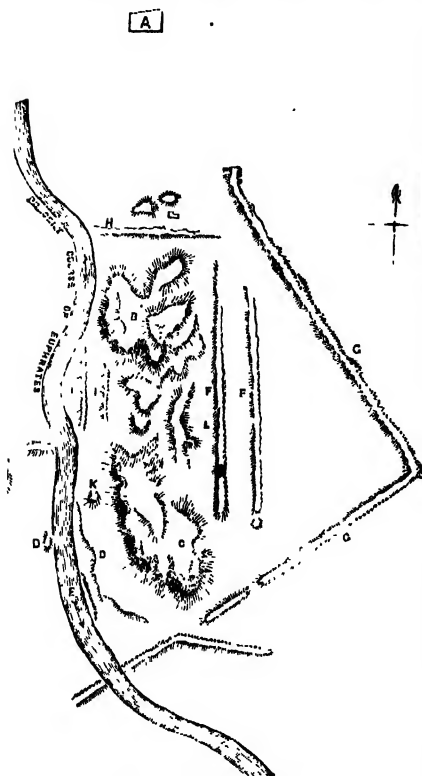

According to Ctesias the wall was strengthened with 250 towers, irregularly disposed, to guard the weakest parts (*Diod. S. ii. 7*); and according to Herodotus it was pierced with a hundred gates, which were made of brass, with brazen lintels and side-posts (*i. 179*). The gates and walls are alike mentioned in Scripture; the height of the one and the breadth of the other being specially noticed (*Jer. li. 58*; comp. *i. 15*, and *li. 53*).

Herodotus and Ctesias both relate that the banks of the river as it flowed through the city were on each side ornamented with quays. The stream has probably often changed its course since the time of Babylonian greatness, but some remains of a quay or embankment (K) on the eastern side of the stream still exist, upon the bricks of which is read the name of the last king. The two writers also agree as to the existence of a bridge, and describe it very similarly. Perhaps a remarkable mound (K) which interrupts the long flat valley—evidently the ancient course of the river—closing in the principal ruins on the west, may be a trace of this structure.

2. *Present state of the Ruins.*—Before seeking to identify the principal buildings of ancient Babylon with the ruins near Hillah, which are univer-

\* If the estimate of Ctesias be regarded as 100, that of Clitarchus will be . . . 100-1923  
 " Q. Curtius . . . . . 100-2  
 " Strabo . . . . . 100-694; but  
 " Herodotus . . . . . 133-3

sally admitted to mark the site, it is necessary to give an account of their present character and condition, which the accompanying plan will illustrate.

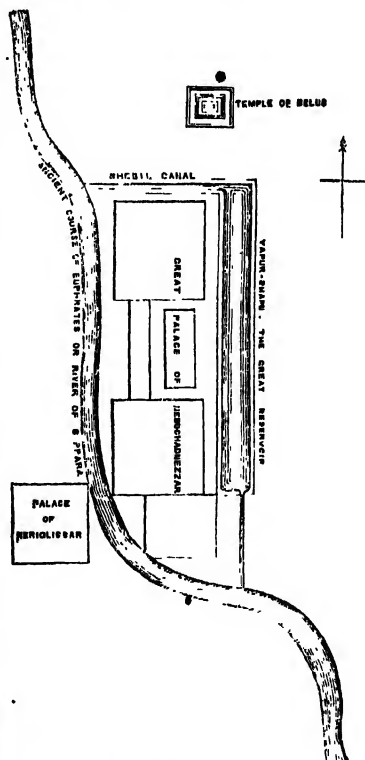

Present state of the Ruins of Babylon.

About five miles above *Hillah*, on the opposite or left bank of the Euphrates, occur a series of artificial mounds of enormous size, which have been recognised in all ages as probably indicating the site of the capital of southern Mesopotamia. They consist chiefly of "three great masses of building—the high pile of unbaked brickwork called by Rich 'Mujellibe,' but which is known to the Arabs as '*Babil* (A);' the building denominated the '*Kasr*' or palace (B); and a lofty mound (C), upon which stands the modern tomb of *Amran-ibn-'Alb*" (Loftus's *Chaldaea*, p. 17). Besides these principal masses the most remarkable features are two parallel lines of rampart (F F) bounding the chief ruins on the east, some similar but inferior remains on the north and west (I I and H), an embankment along the river-side (E), a remarkable isolated heap (K) in the middle of a long valley, which seems to have been the ancient bed of the stream, and two long lines of rampart (G G), meeting at a right angle, and with the river, forming an irregular triangle, within which all the ruins on this side (except *Babil*) are enclosed. On the west, or right bank, the remains are very slight and scanty. There is the appearance of an enclosure, and of a building of moderate size within it (D),

nearly opposite the great mound of *Amran*, but otherwise, unless at a long distance from the stream, this side of the Euphrates is absolutely bare of ruins.

Scattered over the country on both sides of the Euphrates, and reducible to no regular plan, are a number of remarkable mounds, usually standing single, which are plainly of the same date with the great mass of ruins upon the river-bank. Of these, by far the most striking is the vast ruin called the *Tirs-Nimrud*, which many regard as the tower of Babel, situated about six miles to the S.W. of Hillah, and almost that distance from the Euphrates at the nearest point. This is a pyramidal mound, crowned apparently by the ruins of a tower, rising to the height of 153½ feet above the level of the plain, and in circumference somewhat more than 2000 feet. As a complete description of it is given under the next article [BABEL, TOWER OF] no more need be said of it here. There is sufficient reason to believe from the inscriptions discovered on the spot, and from other documents of the time of Nebuchadnezzar, that it marks the site of Borsippa, and was thus entirely beyond the limits of Babylon (Beros. *Fr.* 14).

Portions of Ancient Babylon distinguishable in the present Ruins.

3. *Identification of sites.*—On comparing the existing ruins with the accounts of the ancient writers, the great difficulty which meets us is the position of the remains almost exclusively on the left bank of the river. All the old accounts agree in repre-

senting the Euphrates as running through the town, and the principal buildings as placed on the opposite sides of the stream. In explanation of this difficulty it has been urged, on the one hand, that the Euphrates having a tendency to run off to the right has obliterated all trace of the buildings in

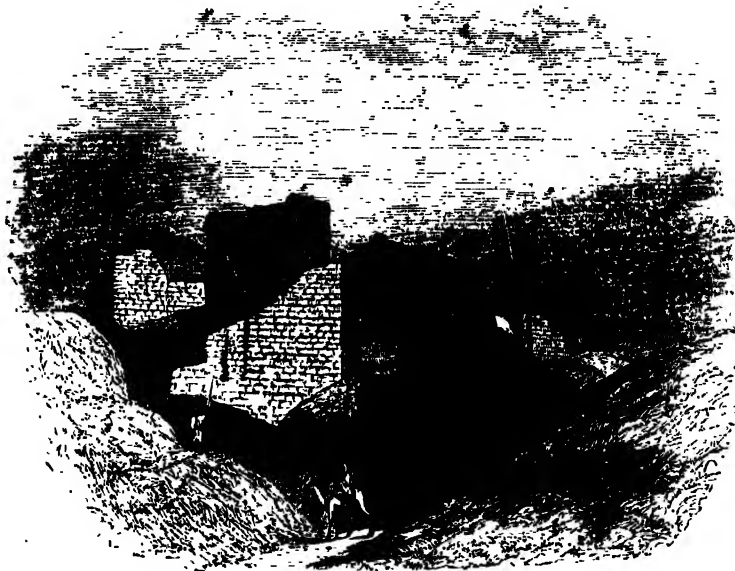

this direction (Layard's *Nin. and Bab.*, p. 493); on the other, that by a due extension of the area of Babylon it may be made to include the *Birs-Nimrud*, and that thus the chief existing remains will really lie on the opposite banks of the river (Rich, *Second Memoir*, p. 32; Ker Porter, *Travels*, ii. p.

View of Babil, from the West.

383). But the identification of the *Birs* with Borsippa completely disposes of this latter theory; while the former is unsatisfactory, since we can scarcely suppose the abrasion of the river to have entirely removed all trace of such gigantic buildings as those which the ancient writers describe. Perhaps the most probable solution is to

be found in the fact, that a large canal (called *Shetil*) intervened in ancient times between the *Kasr* mound (B) and the ruin now called *Babil* (A), which may easily have been confounded by Herodotus with the main stream. This would have had the two principal buildings upon opposite sides; while the real river, which ran down the long

valley to the west of the *Kasr* and *Amrân* mounds, would also have separated (as Ctesias related) between the greater and the lesser palace. If this explanation be accepted as probable, we may identify the 'principal ruins as follows:—1. The great mound of *Babil* will be the ancient temple of Belus. It is an oblong mass, composed chiefly of unglazed brick, rising from the plain to the height of 140 ft., flatish at the top, in length about 200, and in breadth about 140 yards. This oblong shape is common to the temples, or rather temple-towers, of lower Babylonian, which seem to have had nearly the same proportions. It was origi-

ally coated with fine burnt brick laid in an excellent mortar, as was proved by Mr. Layard (*Nim. and Bab.* pp. 503-5); and was no doubt built in stages, most of which have crumbled down, but which may still be in part concealed under the rubbish. The statement of Berosus (Fr. 14), that it was rebuilt by Nebuchadnezzar, is confirmed by the fact that all the inscribed bricks which have been found in it bear the name of that king. It formed the tower of the temple, and was surmounted by a chapel, but the main shrine, the altars, and no doubt the residences of the priests were at the foot, in a sacred precinct. 2. The mound of the *Kaar*

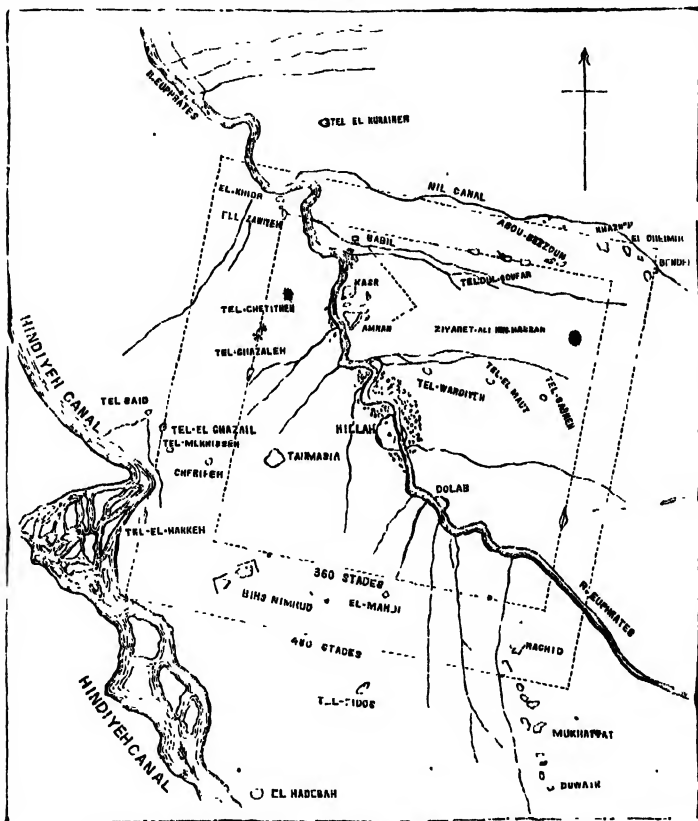

Chart of the country round Babylon, with limits of the ancient City, according to Oppert.

will mark the site of the great Palace of Nebuchadnezzar. It is an irregular square of about 700 yards each way, and may be regarded as chiefly formed of the old palace-platform (resembling those at Nineveh, Susa, and elsewhere), upon which are still standing certain portions of the ancient residence whereto the name of "*Kass*" or "*Palace*" especially attaches. The walls are composed of burnt bricks of a pale yellow colour and of excellent quality, bound together by a fine lime cement, and stamped with the name and titles of Nebuchadnezzar. They "contain traces of architectural ornament—piers, buttresses, pilasters, &c." (Layard, p. 506); and in the rubbish at their base

have been found slabs inscribed by Nebuchadnezzar, and containing an account of the building of the edifice, as well as a few sculptured fragments and many pieces of enamelled brick of brilliant hues. On these last portions of figures are traceable, recalling the statements of Ctesias (ap. Diod. Sic.) that the brick walls of the palace were coloured and represented hunting scenes. No plan of the palace is to be made out from the existing remains, which are tossed in apparent confusion on the highest point of the mound. 3. The mound of *Amrân* is thought by M. Oppert to represent the "hanging gardens" of Nebuchadnezzar; but this conjecture does not seem to be a very happy one. The mound is com-

posed of poorer materials than the edifices of that prince, and has furnished no bricks containing his name. Again, it is far too large for the hanging-gardens, which are said to have been only 400 ft. each way. The *Amrân* mound is described by Rich as an irregular parallelogram, 1100 yards long by 800 broad, and by Ker Porter as a triangle, the sides of which are respectively 1400, 1100, and 850 ft. Its dimensions therefore very greatly exceed those of the curious structure with which it has been identified. Most probably it represents the ancient palace, coeval with Babylon itself, of which Nebuchadnezzar speaks in his inscriptions as adjoining his own more magnificent residence. It is the only part of the ruins from which bricks have been derived containing the names of kings earlier than Nebuchadnezzar; and is therefore entitled to be considered the most ancient of the existing remains. 4. The ruins marked DD on either side of the Euphrates, together with all the other remains on the right bank, may be considered to represent the lesser Palace of Ctesias, which is said to have been connected with the greater by a bridge across the river, as well as by a tunnel under the channel of the stream (1). The old course of the Euphrates seems to have been a little east of the present one, passing between the two ridges marked II, and then closely skirting the mound of *Amrân*, so as to have both the ruins marked D upon its right bank. These ruins are of the same date and style. The bricks of that on the left bank bear the name of Neriglissar; and there can be little doubt that this ruin, together with those on the opposite side of the stream, are the remains of a palace built by him. Perhaps (as already remarked) the mound K may be a remnant of the ancient bridge. 5. The two long parallel lines of embankment on the east (F F in the plan) which form so striking a feature in the remains as represented by Porter and Rich, but which are ignored by M. Oppert, may either be the lines of an outer and inner inclosure, of which Nebuchadnezzar speaks as defences of his palace; or they may represent the embankments of an enormous reservoir, which is often mentioned by that monarch as adjoining his palace towards the east. 6. The embankment (E) is composed of bricks marked with the name of Labynetos or *Nabunît*, and is undoubtedly a portion of the work which Berosus ascribes to the last king (Fr. 14).

The most remarkable fact connected with the magnificence of Babylon, is the poorness of the material with which such wonderful results were produced. The whole country, being alluvial, was entirely destitute of stone, and even wood was scarce and of bad quality, being only yielded by the palm-groves which fringed the courses of the canals and rivers. In default of these, the ordinary materials for building, recourse was had to the soil of the country—in many parts an excellent clay—and with bricks made from this, either sun-dried or baked, the vast structures were raised, which, when they stood in their integrity, provoked comparison with the pyramids of Egypt, and which even in their decay excite the astonishment of the traveller. A modern writer has noticed as the true secret of the extraordinary results produced, “the unbounded command of naked human strength” which the Babylonian monarchs had at their disposal (*Grote's Hist. of Greece*, vol. iii. p. 401); but this alone will not account for the phenomena; and we must give the Babylonians credit for a genius and a grandeur of conception rarely surpassed, which led them to

employ the labour whereof they had the command in works of so imposing a character. With only “brick for stone,” and at first only “slime (חמר) for mortar” (Gen. xi. 3), they constructed edifices of so vast a size that they still remain at the present day among the most enormous ruins in the world, impressing the beholder at once with awe and admiration.

4. *History of Babylon.*—The history of Babylon mounts up to a time not very much later than the Flood. The native historian seems to have possessed authentic records of his country for above 2000 years before the conquest by Alexander (Beros. Fr. 11); and Scripture represents the “beginning of the kingdom” as belonging to the time of Nimrod, the grandson of Ham, and the great-grandson of Noah (Gen. x. 6-10). Of Nimrod no trace has been found in the Babylonian remains, unless he is identical with the god Bel of the Babylonian Pantheon, and so with the Greek Belus, the hero-founder of the city. This identity is possible, and at any rate the most ancient inscriptions appear to show that the primitive inhabitants of the country were really Cushite, i. e. identical in race with the early inhabitants of Southern Arabia and of Ethiopia. The seat of government at this early time was, as has been stated, in lower Babylonia, Erech (*Uruk*) and Ur (*Mugheir*) being the capitals, and Babylon (if built) being a place of no consequence. The country was called Shinâr (שִׁנְאָר), and the people the *Akkadim* (comp. *Accad* of Gen. x. 10). Of the art of this period we have specimens in the ruins of *Mugheir* and *Uruk*, the remains of which date from at least the 20th century before our era. We find the use of kiln-baked as well as of sun-dried bricks already begun; we find writing practised, for the bricks are stamped with the names and titles of the kings; we find buttresses employed to support buildings, and we have probable indications of the system of erecting lofty buildings in stages. On the other hand, mortar is unknown, and the bricks are laid either in clay or in bitumen (comp. Gen. xi. 3); they are rudely moulded, and of various shapes and sizes; sun-dried bricks predominate, and some large buildings are composed entirely of them; in these reed-matting occurs at intervals, apparently used to protect the mass from disintegration. There is no trace of ornament in the erections of this date, which were imposing merely by their size and solidity.

The first important change which we are able to trace in the external condition of Babylon, is its subjection, at a time anterior to Abraham, by the neighbouring kingdom of Elam or Susiana. Berosus spoke of a first Chaldean dynasty consisting of eleven kings, whom he probably represented as reigning from B.C. 2234 to B.C. 1976. At the last mentioned date he said there was a change, and a new dynasty succeeded, consisting of 49 kings, who reigned 458 years (from B.C. 1976 to B.C. 1518). It is thought that this transition may mark the invasion of Babylonia from the East, and the establishment of Elamitic influence in the country, under Chedorlaomer (Gen. xiv.), whose representative appears as a conqueror in the inscriptions. Amraphel, king of Shinâr, and Arioch, king of Ellasar (*Larsa*), would be tributary princes whom Chedorlaomer had subjected, while he himself may have become the founder of the new dynasty, which, according to Berosus, continued on the throne for above 450 years. From this point the history of

Babylon is almost a blank for above twelve centuries. Except in the mention of the plundering of Job by the Chaldeans (Job i. 17), and of the "goodly Babylonish garment" which Achan coveted (Josh. vii. 21), Scripture is silent with regard to the Babylonians from the time of Abraham to that of Hezekiah. Berosus covered this space with three dynasties; one (which has been already mentioned) of 49 Chaldaean kings, who reigned 458 years; another of 9 Arab kings, who reigned 245 years; and a third of 49 Assyrian monarchs, who held dominion for 526 years; but nothing beyond this bare outline has come down to us on his authority concerning the period in question. The monumental records of the country furnish a series of names, the reading of which is very uncertain, which may be arranged with a good deal of probability in chronological order, apparently belonging to the first of these three dynasties. Of the second no traces have been hitherto discovered. The third would seem to be identical with the Upper Dynasty of Assyria, of which some account has been given in a former article [ASSYRIA]. It would appear then as if Babylon, after having had a native Chaldaean dynasty which ruled for 224 years (Brandis, p. 17), and a second dynasty of Elamitic Chaldeans who ruled for a further period of 458 years, fell wholly under Semitic influence, becoming subject first to Akkadia for two centuries and a half, and then to Assyria for above five centuries, and not remaining even a qualified independence till the time marked by the close of the Upper and the formation of the Lower Assyrian empire. This is the conclusion which seems naturally to follow from the abstract which is all that we possess of Berosus; and doubtless it is to a certain extent true. But the statement is too broad to be exact; and the monuments show that Babylon was at no time absorbed into Assyria, or even for very many years together a submissive vassal. Assyria, which she had colonised during the time of the second or great Chaldaean dynasty, to which she had given letters and the arts, and which she had held in subjection for many hundred years, became in her turn (about B.C. 1270) the predominant Mesopotamian power, and the glory of Babylon in consequence suffered eclipse. But she had her native kings during the whole of the Assyrian period, and she frequently contended with her great neighbour, being sometimes even the aggressor. Though much sunk from her former greatness, she continued to be the second power in Asia; and retained a vitality which at a later date enabled her to become once more the head of an empire.

The line of Babylonian kings becomes exactly known to us from the year B.C. 747. An astronomical work of the geographer Ptolemy has preserved to us a document, the importance of which for comparative chronology it is scarcely possible to exaggerate. The "Canon of Ptolemy," as it is called, gives us the succession of Babylonian monarchs, with the exact length of the reign of each, from the year B.C. 747, when Nabonassar mounted the throne, to B.C. 331, when the last Persian king was dethroned by Alexander. This document, which from its close accordance with the statements of Scripture always vindicated to itself a high authority in the eyes of Christian chronologists, has recently been confirmed in so many points by the inscriptions that its authentic character is established beyond all possibility of cavil or dispute. As the basis of all accurate calculation for oriental

dates previous to Cyrus, it seems proper to transcribe the earlier portion of it in this place. [The dates B.C. are added for convenience sake.]

	Years.	N.E.	B.C.
Nabonassar . . . . .	14	1	747
Nadlus . . . . .	2	16	733
Chinzinus and Porus . . . . .	5	17	731
Elulaeus . . . . .	5	22	726
Mardocephalus . . . . .	12	27	721
Arceanus . . . . .	6	39	709
First Interregnum . . . . .	2	44	704
Belbus . . . . .	3	46	702
Aparanadius . . . . .	6	49	699
Regibelus . . . . .	1	55	693
Meselmorducus . . . . .	4	56	692
Second Interregnum . . . . .	8	60	688
Asaridanus . . . . .	13	68	680
Saoduchinus . . . . .	20	81	667
Cinneladanus . . . . .	22	101	647
Nabopolassar . . . . .	21	123	625

Nerigassolassar . . . . .	4	189	559
Nabonadlus . . . . .	17	193	555
Cyrus . . . . .	9	210	538

Of Nabonassar, the first king in Ptolemy's list, nothing can be said to be known except the fact, reported by Berosus, that he destroyed all the annals of his predecessors for the purpose of compelling the Babylonians to date from himself (Fr. 11 a). It has been conjectured that he was the husband, or son, of Semiramis, and owed to her his possession of the throne. But of this theory there is at present no proof. It rests mainly upon a synchronism obtained from Herodotus, who makes Semiramis a Babylonian queen, and places her five generations (167 years) before Nitocris, the mother of the last king. The Assyrian discoveries have shown that there was a Semiramis about this time, but they furnish no evidence of her connexion with Babylon, which still continues uncertain. The immediate successors of Nabonassar are still more obscure than himself. Absolutely nothing beyond the brief notation of the canon has reached us concerning Nadlus (or Nabius), Chinzinus (or Chinzirus) and Porus, or Elulaeus, who certainly cannot be the Tyrian king of that name mentioned by Menander (ap. Joseph. *Ant. Jud.* ix. 14. §2). Mardocephalus, on the contrary, is a monarch to whom great interest attaches. He is undoubtedly the Merodach-Baladan, or Berodach-Baladan [MERODACH-BALADAN] of Scripture, and was a personage of great consequence, reigning himself twice, the first time for 12 years, contemporaneously with the Assyrian king Sargon, and the second time for six months only, during the first year of Sennacherib; and leaving a sort of hereditary claim to his sons and grandsons, who are found to have been engaged in hostilities with Esarhaddon and his successor. His dealings with Hezekiah sufficiently indicate the independent position of Babylon at this period, while the interest which he felt in an astronomical phenomenon (2 Chr. xxxii. 31) harmonises with the character of a native Chaldaean king which appears to belong to him. The Assyrian inscriptions show that after reigning 12 years Merodach-Baladan was deprived of his crown and driven into banishment by Sargon, who appears to have placed Arceanus (his son?) upon the throne as viceroy, a position which he maintained for five years. A time of trouble then ensued, estimated in the canon at two years, during which various pretenders assumed the crown,

among them a certain Hagrisa, or Acises, who reigned for about a month, and Merodach-Baladan, who held the throne for half a year (Polyhist. ap. Euseb.). Sennacherib, bent on re-establishing the influence of Assyria over Babylon, proceeded against Merodach-Baladan (as he informs us) in his first year, and having dethroned him, placed an Assyrian named *Belib*, or *Belibus*, upon the throne, who ruled as his viceroy for three years. At the end of this time, the party of Merodach-Baladan still giving trouble, Sennacherib descended again into Babylonia, once more overran it, removed *Belib*, and placed his eldest son—who appears in the Canon as *Aparnadius*—upon the throne. *Aparnadius* reigned for six years, when he was succeeded by a certain *Regibelus*, who reigned for one year; after which *Mesessimordacus* held the throne for four years. Nothing more is known of these kings, and it is uncertain whether they were viceroys, or independent native monarchs. They were contemporary with Sennacherib, to whose reign belongs also the second interregnum, extending to eight years, which the Canon interposes between the reigns of *Mesessimordacus* and *Asaridanus*. In *Asaridanus* critical eyes long ago detected *Esarhaddon*, Sennacherib's son and successor; and it may be regarded as certain from the inscriptions that this king ruled in person over both Babylonia and Assyria, holding his court alternately at their respective capitals. Hence we may understand how *Manasseh*, his contemporary, came to be "carried by the captives of the king of Assyria to Babylon," instead of to Nineveh, as would have been done in any other reign. [*ESARHADDON*.] *Saosduchinus* and *Ciniladanus* (or *Cinneladanus*), his brother (Polyhist.), the successors of *Asaridanus*, are kings of whose history we know nothing. Probably they were viceroys under the later Assyrian monarchs, who are represented by *Abydenus* (ap. Euseb.) as retaining their authority over Babylon up to the time of the last siege of Nineveh.

With *Nabopolassar*, the successor of *Cinneladanus*, and the father of *Nebuchadnezzar*, a new era in the history of Babylon commences. According to *Abydenus*, who probably drew his information from *Berosus*, he was appointed to the government of Babylon by the last Assyrian king, at the moment when the Medes were about to make their final attack; whereupon, betraying the trust reposed in him, he went over to the enemy, arranged a marriage between his son *Nebuchadnezzar* and the daughter of the Median leader, and joined in the last siege of the city. [*NINEVEH*.] On the success of the confederates (B.C. 625) Babylon became not only an independent kingdom, but an empire; the southern and western portions of the Assyrian territory were assigned to *Nabopolassar* in the partition of the spoils which followed on the conquest, and thereby the Babylonian dominion became extended over the whole valley of the Euphrates as far as the Taurus range, over Syria, Phoenicia, Palestine, Idumaea, and (perhaps) a portion of Egypt. Thus, among others, the Jews passed quietly and almost without remark, from one feudal head to another, exchanging dependency on Assyria for dependency on Babylon, and continuing to pay to *Nabopolassar* the same tribute and service which they had previously rendered to the Assyrians. Friendly relations seem to have been maintained with Media throughout the reign of *Nabopolassar*, who led or sent a contingent to

help *Cyaxares* in his Lydian war, and acted as mediator in the negotiations by which that war was concluded (Herod. i. 74). At a later date hostilities broke out with Egypt. *Neco*, the son of *Psamatik* I., about the year B.C. 608, invaded the Babylonian dominions on the south-west, and made himself master of the entire tract between his own country and the Euphrates (2 K. xxiii. 29, and xxiv. 7). *Nabopolassar* was now advanced in life, and not able to take the field in person (*Beros. Fr.* 14). He therefore sent his son, *Nebuchadnezzar*, at the head of a large army, against the Egyptians, and the battle of *Carchemish*, which soon followed, restored to Babylon the former limits of her territory (comp. 2 K. xxiv. 7 with Jer. xlvi. 2-12). *Nebuchadnezzar* pressed forward and had reached Egypt, when news of his father's death recalled him; and hastily returning to Babylon, he was fortunate enough to find himself, without any struggle, acknowledged king (B.C. 604).

A complete account of the works and exploits of this great monarch—by far the most remarkable of all the Babylonian kings—will be given in a later article. [*NEBUCHADNEZZAR*.] It is enough to note in this place that he was great both in peace and in war, but greater in the former. Besides recovering the possession of Syria and Palestine, and carrying off the Jews after repeated rebellions into captivity, he reduced Phoenicia, besieged and took Tyre, and ravaged, if he did not actually conquer, Egypt. But it was as the adorning and beautifier of his native land—as the builder and restorer of almost all her cities and temples—that this monarch obtained that great reputation which has handed down his name traditionally in the East, on a par with those of *Nimrod*, *Solomon*, and *Alexander*, and made it still a familiar term in the mouths of the people. Probably no single man ever left behind him as his memorial upon the earth one half the amount of building which was erected by this king. The ancient ruins and the modern towns of Babylonia are alike built almost exclusively of his bricks. Babylon itself, the capital, was peculiarly the object of his attention. It was here that, besides repairing the walls and restoring the temples, he constructed that magnificent palace, which, with its triple enclosure, its hanging gardens, its plated pillars, and its rich ornamentation of enamelled brick, was regarded in ancient times as one of the seven wonders of the world (*Strab.* xvi. 1. §5).

*Nebuchadnezzar* died B.C. 561, having reigned for 43 years, and was succeeded by *Evil-Merodach*, his son, who is called in the Canon *Mloardunus*. This prince, who "in the year that he began to reign did lift up the head of *Jehoiachin*, king of Judah, out of prison" (2 K. xxv. 27), was murdered, after having held the crown for two years only, by *Neriglissar*, his brother-in-law. [*EVIL-MERODACH*.] *Neriglissar*—the *Nerigassolassar* of the canon—is (apparently) identical with the "*Nergal-shar-ezer*, *Rab-Mag*" of *Jeremiah* (xxxix. 3, 13-14). He bears this title, which has been translated "chief of the Magi" (*Gesenius*), or "chief priest" (*Col. Rawlinson*), in the inscriptions, and calls himself the son of a "king of Babylon." Some writers have considered him identical with "*Darius the Mede*" (*Larcher*, *Conringius*, *Bouhier*); but this is improbable [*DARIUS THE MEDE*], and he must rather be regarded as a Babylonian of high rank, who having married a daughter of *Nebuchadnezzar* raised his thoughts to the crown, and finding *Evil-Merodach* unpopular with his sub-

jects, murdered him, and became his successor. Neriglissar built the palace at Babylon, which seems to have been placed originally on the right bank of the river. He was probably advanced in life at his accession, and thus reigned but four years, though he died a natural death, and left the crown to his son, Laborosarchod. This prince, though a mere lad at the time of his father's decease, was allowed to ascend the throne without difficulty; but when he had reigned nine months, he became the victim of a conspiracy among his friends and connexions, who, professing to detect in him symptoms of a bad disposition, seized him, and tortured him to death. Nabonidus (or Labynetus), one of the conspirators, succeeded; he is called by Herodotus "a certain Nabonidus, a Babylonian" (ap. Joseph. c. Ap. i. 21), by which it would appear that he was not a member of the royal family; and this is likewise evident from his inscriptions, in which he only claims for his father the rank of "Rab-Mag." Herodotus seems to have been mistaken in supposing him (i. 188) the son of a great queen, Nitocris, and (apparently) of a former king, Labynetus (Nebuchadnezzar?). Indeed it may be doubted whether the Babylonian Nitocris of Herodotus is really a historical personage. His authority is the sole argument for her existence, which it is difficult to credit against the silence of Scripture, Berossus, the Canon, and the Babylonian monuments. She may perhaps have been a wife of Nebuchadnezzar; but in that case she must have been wholly unconnected with Nabonidus, who certainly bore no relation to that monarch.

Nabonidus, or Labynetus (as he was called by the Greeks), mounted the throne in the year B.C. 555, very shortly before the war broke out between Cyrus and Croesus. He entered into alliance with the latter of these monarchs against the former, and had the struggle been prolonged, would have sent a contingent into Asia Minor. Events proceeded too rapidly to allow of this; but Nabonidus had provoked the hostility of Cyrus by the mere fact of the alliance, and felt at once that sooner or later he would have to resist the attack of an avenging army. He probably employed his long and peaceful reign of 17 years in preparations against the dreaded foe, executing the defensive works which Herodotus ascribes to his mother (i. 185), and accumulating in the town abundant stores of provisions (ib. c. 190). In the year B.C. 539 the attack came. Cyrus advanced at the head of his irresistible hordes, but wintered upon the Diyaleh or Gyndes, making his final approaches in the ensuing spring. Nabonidus appears by the inscriptions to have shortly before this associated with him in the government of the kingdom his son, Bel-shar-ezer or Belshazzar; on the approach of Cyrus, therefore, he took the field himself at the head of his army, leaving his son to command in the city. In this way, by help of a recent discovery, the accounts of Berossus and the book of Daniel—hitherto regarded as hopelessly conflicting—may be reconciled. [BELSHAZZAR.] Nabonidus engaged the army of Cyrus, but was defeated and forced to shut himself up in the neighbouring town of Borsippa (marked now by the *Birs-Nimrud*), where he continued till after the fall of Babylon (Beross. ap. Joseph. c. Ap. i. 21). Belshazzar guarded the city, but, over-confident in its strength, kept insufficient watch, and recklessly indulging in untimely and impious festivities (Dan. v.), allowed the enemy to enter the town by the

channel of the river (Herod. i. 191; Xen. *Cyrop.* vii. 7). Babylon was thus taken by a surprise, as Jeremiah had prophesied (li. 31)—by an army of Medes and Persians, as intimated 170 years earlier by Isaiah (xli. 1-9), and, as Jeremiah had also foretold (li. 39), during a festival. In the carnage which ensued upon the taking of the town, Belshazzar was slain (Dan. v. 30). Nabonidus, on receiving the intelligence, submitted, and was treated kindly by the conqueror, who not only spared his life, but gave him estates in Carmania (Beross. ut supra; comp. Abyd. Fr. 9).

Such is the general outline of the siege and capture of Babylon by Cyrus, as derivable from the fragments of Berossus, illustrated by the account in Daniel, and reduced to harmony by aid of the important fact, obtained recently from the monuments, of the relationship between Belshazzar and Nabonidus. It is scarcely necessary to remark that it differs in many points from the accounts of Herodotus and Xenophon; but the latter of these two writers is in his *Cyropædia* a mere romancer, and the former is very imperfectly acquainted with the history of the Babylonians. The native writer, whose information was drawn from authentic and contemporary documents, is far better authority than either of the Greek authors, the earlier of whom visited Babylon nearly a century after its capture by Cyrus, when the tradition had doubtless become in many respects corrupted.

According to the book of Daniel, it would seem as if Babylon was taken on this occasion, not by Cyrus, king of Persia, but by a Median king, named Darius (v. 31). The question of the identity of this personage with any Median or Babylonian king known to us from profane sources, will be discussed hereafter. [DARIUS THE MEDE.] It need only be remarked here that Scripture does not really conflict on this point with profane authorities; since there is sufficient indication, from the terms used by the sacred writer, that "Darius the Mede," whoever he may have been, was not the real conqueror, nor a king who ruled in his own right, but a monarch intrusted by another with a certain delegated authority (see Dan. v. 31, and ix. 1).

With the conquest by Cyrus commenced the decay and ruin of Babylon. The "broad walls" were then to some extent "broken down" (Beross. Fr. 14), and the "high gates" probably "burnt with fire" (Jer. li. 58). The defences, that is to say, were ruined; though it is not to be supposed that the laborious and useless task of entirely demolishing the gigantic fortifications of the place was attempted, or even contemplated, by the conqueror. Babylon was weakened, but it continued a royal residence, not only during the lifetime of Darius the Mede, but through the entire period of the Persian empire. The Persian kings held their court at Babylon during the larger portion of the year; and at the time of Alexander's conquests it was still the second, if not the first, city of the empire. It had, however, suffered considerably on more than one occasion subsequent to the time of Cyrus. Twice in the reign of Darius (Behist. Ins.), and once in that of Xerxes (Ctes. *Pers.* §22), it had risen against the Persians, and made an effort to regain its independence. After each rebellion its defences were weakened, and during the long period of profound peace which the Persian empire enjoyed from the reign of Xerxes to that of Darius Codomannus they were allowed to go completely to decay. The public buildings also suffered grievously

from neglect. Alexander found the great temple of Belus in so ruined a condition that it would have required the labour of 10,000 men for two months even to clear away the rubbish with which it was encumbered (Strab. xvi. 1. §5). His designs for the restoration of the temple, and the general embellishment of the city, were frustrated by his untimely death, and the removal of the seat of empire to Antioch under the Seleucidae gave the finishing blow to the prosperity of the place. The great city of Seleucia, which soon after arose in its neighbourhood, not only drew away its population, but was actually constructed of materials derived from its buildings (Plin. *H. N.* vi. 30). Since then Babylon has been a quarry from which all the tribes in the vicinity have perpetually derived the bricks with which they have built their cities, and (besides Seleucia) (tesiphon, Al Molain, Baghdad, Kufa, Kerbelah, Hillah, and numerous other towns, have risen from its ruins. The "great city," "the beauty of the Chaldees' excellency," has thus emphatically "become heaps" (Jer. li. 37)—she is truly "an astonishment and a hissing, without an inhabitant." Her walls have altogether disappeared—they have "fallen" (Jer. li. 44), been "thrown down" (li. 15), been "broken utterly" (li. 58). "A drought is upon her waters" (li. 39); for the system of irrigation, on which, in Babylonia, fertility altogether depends, has long been laid aside; "her cities" are everywhere "a desolation" (li. 43); her "land a wilderness;" "wild beasts of the desert" (jackals) "lie there;" and "owls dwell there" (comp. Layard, *Nin. and Bab.* p. 484, with Is. xiii. 21-2, and Jer. li. 39): the natives regard the whole site as haunted, and neither will the "Arab pitch tent, nor the shepherd fold sheep there" (Is. xiii. 20).

(See for the descriptive portions, Rich's *Two Memoirs on Babylon*; Ker Porter's *Travels*, vol. ii.; Layard's *Nineveh and Babylon*, ch. xxi.; Fresnel's *Two Letters to M. Mohl in the Journal Asiatique*, June and July, 1853; and Loftus's *Chaldaea*, ch. ii. On the identification of the ruins with ancient sites, compare Rawlinson's Herodotus, vol. ii. Essay iv.; Oppert's Maps and Plans; and Rennell's Essay in Rich's *Babylon and Persopolis*. On the history, compare M. Niebuhr's *Geschichte Assur's und Babel's*; Brandis's *Rerum Assyriarum Tempora Emendata*; Bosaquet's *Sacred and Profane Chronology*; and Rawlinson's Herodotus, vol. i. Essays vi. and viii.) [G. R.]

**BABEL, TOWER OF.** The "tower of Babel" is only mentioned once in Scripture (Gen. xi. 4-5), and then as incomplete. No reference to it appears in the prophetic denunciations of the punishments which were to fall on Babylon for her pride. It is therefore quite uncertain whether the building ever advanced beyond its foundations. As, however, the classical writers universally in their descriptions of Babylon gave a prominent place to a certain tower-like building, which they called the temple (Herod., Diod. Sic., Arrian, Plin. &c.), or the tomb (Strabo) of Belus, it has generally been supposed that the tower was in course of time finished, and became the principal temple of the Chaldaean metropolis. Certainly this may have been the case; but, while there is some evidence against, there is none in favour of it. A Jewish tradition, recorded by Bochart (*Phaleg*, i. 9), declared that fire fell from heaven, and split the tower through to its foundation; while Alexander Polyhistor (Fr.

10) and the other profane writers who noticed the tower (as Abydenus, Frs. 5 and 6), said that it had been blown down by the winds. Such authorities therefore as we possess, represent the building as destroyed soon after its erection. When the Jews, however, were carried captive into Babylonia, struck with the vast magnitude and peculiar character of certain of the Babylonian temples, they imagined that they saw in them, not merely buildings similar in type and mode of construction to the "tower" (בֵּיִלָּה) of their scriptures, but in this or that temple they thought to recognise the very tower itself. The predominant opinion was in favour of the great temple of Nebo at Borsippa, the modern *Birs-Nimrud*, although the distance of that place from Babylon is an insuperable difficulty in the way of the identification. Similarly when Christian travellers first began to visit the Mesopotamian ruins, they generally attached the name of "the tower of Babel" to whatever mass, among those beheld by them, was the loftiest and most imposing. Rawulf in the 16th century found the "tower of Babel" at *Fehyiah*, Pietro della Valle in the 18th identified it with the ruin *Babil* near *Hillah*, while early in the present century Rich and Ker Porter revived the Jewish notion, and argued for its identity with the *Birs*. There are in reality no real grounds either for identifying the tower with the Temple of Belus, or for supposing that any remains of it long survived the check which the builders received, when they were "scattered abroad upon the face of the earth," and "left off to build the city" (Gen. xi. 8). All then that can be properly attempted by the modern critic is to show, 1. what was the probable type and character of the building; and 2. what were the materials and manner of its construction.

With regard to the former point, it may readily be allowed that the *Birs-Nimrud*, though it cannot be the tower of Babel itself, which was at Babylon (Gen. xi. 9), yet, as the most perfect representative of an ancient Babylonian temple-tower, may well be taken to show, better than any other ruin, the probable shape and character of the edifice. This building appears, by the careful examinations recently made of it, to have been a sort of oblique pyramid built in seven receding stages. "Upon a platform of crude brick, raised a few feet above the level of the alluvial plain, was built of burnt brick the first or basement stage—an exact square, 272 feet each way, and 26 feet in perpendicular height. Upon this stage was erected a second, 230 feet each way, and likewise 26 feet high; which, however, was not placed exactly in the middle of the first, but considerably nearer to the south-western end, which constituted the back of the building. The other stages were arranged similarly—the third being 188 feet, and again 26 feet high; the fourth 146 feet square, and 15 feet high; the fifth 104 feet square, and the same height as the fourth; the sixth 82 feet square, and again the same height; and the seventh 20 feet square and once more the same height. On the seventh stage there was probably placed the ark or tabernacle, which seems to have been again 15 feet high, and must have nearly, if not entirely, covered the top of the seventh story. The entire original height, allowing three feet for the platform, would thus have been 156 feet, or, without the platform, 153 feet. The whole formed a sort of oblique pyramid, the gentler slope facing the N.E., and the steeper in-

climbing to the S.W. On the N.E. side was the grand entrance, and here stood the vestibule, a separate building, the debris from which having joined those from the temple itself, fill up the intermediate space, and very remarkably prolong the mound in this direction" (Rawlinson's *Herodotus*, vol. ii. pp. 582-3). The *Birs* temple, which was called the "Temple of the Seven Spheres," was ornamented with the planetary colours (see the plan), but this was most likely a peculiarity. The other chief features of it seem to have been common to most, if not all, of the Babylonian temple-towers. The feature of stages is found in the temples at *Warka* and *Mugheir* (Loftus' *Chaldaea*, pp. 129 and 168), which belong to very primitive times (B.C. 2230); that of the emplacement, so that the four angles face the four cardinal points, is likewise common

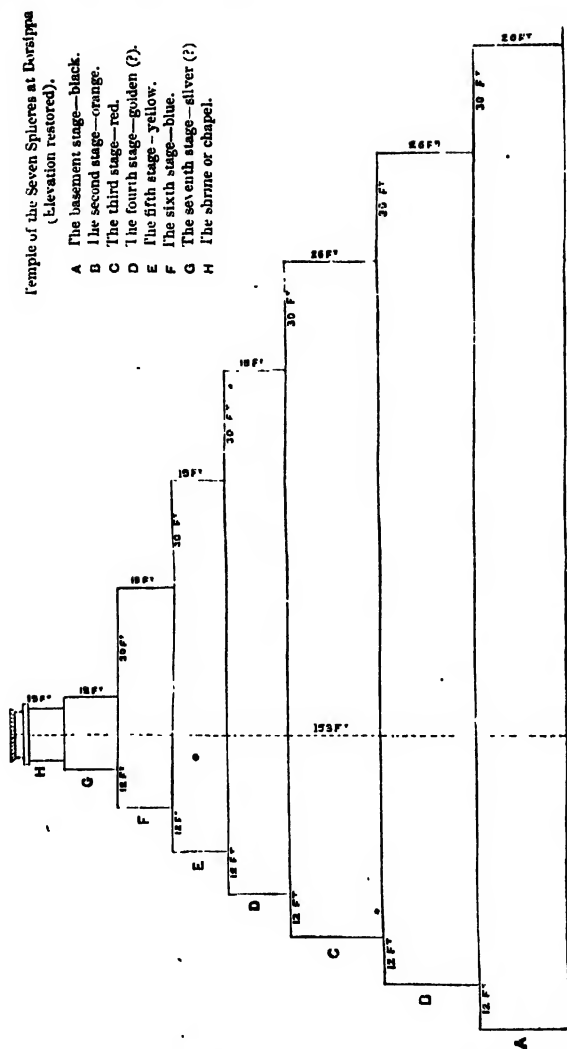

to those ancient structures; while the square form is universal. On the other hand it may be doubted whether so large a number of stages was common. The *Mugheir* and *Warka* temples have no more than two, and probably never had more than three, or at most, four stages. The great temple of Belus at Babylon (*Babil*) shows only one stage; though, according to the best authorities, it too was a sort of pyramid (Hérod., Strab.). The height of the *Birs* is 153½ feet, that of *Babil* 140 (?), that of the *Warka* temple 100, that of the temple at *Mugheir* 50 feet. Strabo's statement that the tomb of Belus was a stade (606 feet in height) would thus seem to be a gross exaggeration. Probably no Babylonian tower ever equalled the Great Pyramid; the original height of which was 480 feet.

Temple of Birs-Nimrud at Nimrup

With regard to the materials used in the tower, and the manner of its construction, more light is to be obtained from the *Warka* and *Mugheir* buildings than from the *Birs*. The *Birs* was rebuilt from top to bottom by Nebuchadnezzar, and shows the mode of construction prevalent in Babylon at the best period; the temples at *Warka* and *Mugheir* remain to a certain extent in their primitive condition, the upper stories alone having been renovated. The *Warka* temple is composed entirely of sun-dried bricks, which are of various shapes and sizes; the cement used is mud; and reeds are largely employed in the construction. It is a building of the most primitive type, and exhibits a ruder style of art than that which we perceive from Scripture to have obtained at the date of the tower. Burnt bricks were employed in the

composition of the tower (Gen. xi. 3), and though perhaps it is somewhat doubtful what the *hemar* (חמר) used for mortar may have been (see Fresnel in *Journ. Asiatique* for June, 1853, p. 9), yet on the whole it is most probable that bitumen (which abounds in Babylonia) is the substance intended. Now the lower basement of the *Mugheir* temple exhibits this combination in a decidedly primitive form. The burnt bricks are of small size and of an inferior quality; they are laid in bitumen; and they face a mass of sun-dried brick, forming a solid wall outside it, ten feet in thickness. No reeds are used in the building. Writing appears on it, but of an antique cast. The supposed date is B.C. 2300—a little earlier than the time commonly assigned to the building of the tower. Probably the erection of

the two buildings was not separated by a very long interval, though it is reasonable to suppose that of the two the tower was the earlier. If we mark its date, as perhaps we are entitled to do, by the time of Peleg, the son of Eber, and father of Reu (see Gen. x. 25), we may perhaps place it about B.C. 2600.

It is not necessary to suppose that any real idea of "scaling heaven" was present to the minds of those who raised either the Tower of Babel, or any other of the Babylonian temple-towers. The expression used in Genesis (xi. 4) is a mere hyperbole for great height (comp. Deut. i. 28; Dan. iv. 11, &c.), and should not be taken literally. Military defence was probably the primary object of such edifices in early times: but with the wish for this may have been combined further secondary motives, which remained when such defence was other-

wise provided for. Diodorus states that the great tower of the temple of Belus was used by the Chaldeans as an observatory (ii. 9), and the careful emplacement of the Babylonian temples with the angles facing the four cardinal points, would be a natural consequence, and may be regarded as a strong confirmation of the reality of this application. M. Fresnel has recently conjectured that they were also used as sleeping-places for the chief priests in the summer-time (*Journ. Asiatique*, June, 1853, pp. 529-31). The upper air is cooler, and is free from the insects, especially mosquitos, which abound below; and the description which Herodotus gives of the chamber at the top of the Belus tower (i. 181) goes far to confirm this ingenious view. [G. R.]

BA'BI (*BaB*; Alex. *BηBai*; *Beer*), 1 Esd. viii. 37. [BEBAI.]

BABYLON. [BABEL.]

BA'CA, THE VALLEY OF (בְּעֵי הַבָּקָה);

κοιλίᾱς τοῦ κλαυθμώνος; *Vallis lacrymarum*), a valley somewhere in Palestine, through which the exiled Psalmist sees in vision the pilgrims passing in their march towards the sanctuary of Jehovah at Zion (Ps. lxxxiv. 6). The passage seems to contain a play, in the manner of Hebrew poetry, on the name of the trees (בְּעֵי הַבָּקָה; MULBERRY) from which the valley probably derived its name, and the "tears"

(בְּעֵי) shed by the pilgrims in their joy at their approach to Zion. These tears were so abundant as to turn the dry valley in which the Baecim trees delighted (Niebuhr, quoted in Winckler, s. v.) into a springy or marshy place (בְּעֵי הַבָּקָה). That the valley was a real locality is most probable, from the use of the definite article before the name (Gesen. *Thes.* 205). A valley of the same name (وادي البكا) still exists in the Sinaitic district (Burck. 619).

The rendering of the Targum is Gehenna, i. e. the Go-Hinnom or ravine below Mount Zion. This locality agrees well with the mention of Baecim trees in 2 Sam. v. 23. [G.]

BACCHIDES (*Bακχίδης*), a friend of Antiochus Epiphanes (Joseph. *Ant.* xii. 10, §2) and

governor of Mesopotamia (ἐν τῷ πέραν τοῦ ποταμοῦ, 1 Macc. vii. 8; Joseph. l. c.), who was commissioned by Demetrius Soter to investigate the charges which Alcimus preferred against Judas Maccabaeus. He confirmed Alcimus in the high priesthood; and, having inflicted signal vengeance on the extreme party of the Assideans [ASSIDEANS] he returned to Antioch. After the expulsion of Alcimus and the defeat and death of Nicanor, he led a second expedition into Judaea. Judas Maccabaeus fell in the battle which ensued at Laia (B.C. 161); and Bacchides reestablished the supremacy of the Syrian faction (1 Macc. ix. 25, of ἀσείβεις ἄνδρες; Jos. Ant. xiii. 1, §1). He next attempted to surprise Jonathan, who had assumed the leadership of the national party after the death of Judas; but Jonathan escaped across the Jordan. Bacchides then placed garrisons in several important positions, and took hostages for the security of the present government. Having completed the pacification of the country (Joseph. Ant. xiii. 1, 5) he returned to Demetrius (B.C. 160). After two years he came back at the request of the Syrian faction, in the hope of overpowering Jonathan and Simon, who still maintained a small force in the desert; but meeting with ill success, he turned against those who had induced him to undertake the expedition, and sought an honourable retreat. When this was known by Jonathan he sent envoys to Bacchides and concluded a peace (B.C. 158) with him, acknowledging him as governor under the Syrian king, while Bacchides pledged himself not to enter the land again, a condition which he faithfully observed (1 Macc. vii. ix.; Joseph. Ant. xii. 10, 11; xiii. 1). [B. F. W.]

**BACCHURUS** (Βακχούρος; Ζακχούρος), one of the "holy singers" (τῶν ἱεροψαλτῶν) who had taken a foreign wife (1 Esd. ix. 24). No name corresponding with this is traceable in the parallel list in Ezr.

**BACCHUS.** [DIONYSUS.]

**BACENOR** (Βαχναρ; Βακενор), apparently a captain of horse in the army of Judas Maccabaeus (2 Mac. xii. 35). Or possibly τοῦ Βαχναρος may have been the title of one of the Jewish companies or squadrons.

**BACHIRITES, THE** (הַבְּכִירִי; LXX. omits; *fam. Becheritarum*), the family of BECHER, son of Ephraim (Num. xxvi. 35). [BENJAMIN.]

**BADGER** (שִׁנְיָה, Tachash). The word occurs seven times in the 4th chapter of Numbers and six times in Exodus, always (with one exception) in connexion with שֶׁן, a skin, and in relation to the coverings of the Tabernacle, of the Ark of the Covenant, and of other sacred vessels. In Ezek. xvi. 10 it indicates the material of which the shoes of women were made. The LXX. render it by δέρματα βακθίθια and κάλυμμα δερμάτινον βακθίνων. Aquil. and Symm. λανθίνα, Jer. pelles lanthinæ: and in this conjecture that a colour is signified these ancient authorities are followed by Bochart, Oedman, Rosenmüller, and Hamilton Smith in Kitto. The fact, however, that שִׁנְיָה is frequently found in the plural seems to exclude the notion of a colour, and Gesenius argues that some animal must be meant, probably a badger

or seal. The Talmudists say that שִׁנְיָה is an animal

like a weasel. ● The Arabic تَنْكَس is not only a dolphin but also a seal, and seals were numerous on the shores of the peninsula of Sinai (Strab. xvi. p. 776). Perhaps the Latin *taxus* or *taxo*, the original of the Spanish *taxon*, Ital. *tusso*, Fr. *taisson*, Germ. *Duchs*, is the same word. The etymology of the word in Heb. is favourable to this view. שִׁנְיָה = שִׁנְיָה from the root שָׁנַה, *quiescit*; and seals no less than badgers are somnolent animals. Maurer, however, derives it from the root שָׁנַה, *intrusit, irrupit, penetra il*, a notion which suits the burrowing of the badger as well as the plunging of the seal. Pliny (ii. 56) mentions the use of the skins of seals as a covering for tents, and as a protection from lightning. (Comp. Plut. *Symp.* v. 9; Sueton. *Octav.* 90; Faber, *Archaeol. Hebr.* i. p. 115.)

The שִׁנְיָה has also been identified with the *Trichechus marinus* of Linnaeus, and with the sea-cow called *Lamantin* or *Dugong*. Others find it in an animal of the hyena kind, which is called by the Arabs *Tahesch* (Botta's *Voyage en Perse*, 1841) Robinson (i. 171) mentions sandals made of the thick skin of a fish which is caught in the Red Sea. It is a species of halibut, named by Elenberg *Halibut Hemprichii*. The skin is clumsy and coarse, and might answer very well for the external covering of the Tabernacle. The badger is not unknown in Palestine, but on the whole the weight of authority is in favour of rendering the word *seal*. [W. D.]

**BA'GO** (Βαγό; Βαγό; Vulg. omits), 1 Esd. viii. 40. [BIGVAI.]

**BAGO'AS** (Βαγώας; Βαγούας, *Vagao*), Jud. xii. 11. The name is said to be equivalent to eunuch in Persian (Plin. *H. N.* xiii. 4, 9). Comp. Burmann ad *Ovid. Am.* ii. 2, 1. [B. F. W.]

**BA'GOI** (Βαγού; *Zoroar*), 1 Esd. v. 14. [BIGVAI.]

**BAHARUMITE, THE.** [BAHURIM.]

**BAHURIM** (בְּחֻרִים; בְּחֻרִים; *Barakim*; Alex. Βαουρίμ, Βαουρίμ; Jos. Βαχουρή and Βαουρί; *Bahurim*), a village, the slight notices remaining of which connect it almost exclusively with the flight of David. It was apparently on, or close to the road leading up from the Jordan valley to Jerusalem. Shimei the son of Gera resided here (2 Sam. xvii. 18; 1 K. ii. 8), and from the village, when David, having left the "top of the mount" behind him, was making his way down the eastern slopes of Olivet, into the Jordan valley below, Shimei issued forth, and running along (Jos. διατρέχων) on the side or "rib" of the hill over against the king's party, flung his stones and dust, and foul abuse (xvi. 5), with a virulence which is to this day exhibited in the East towards fallen greatness however eminent it may previously have been. Here in the court of a house was the well in which Jonathan and Ahimaaz eluded their pursuers (xvii. 18). In his account of the occurrence, Josephus (*Ant.* vii. 9, §7) distinctly states that Bahurim lay off the main road (παῖδες ἐκτραπέυοντες τῆς ὁδοῦ), which agrees well with the account of Shimei's behaviour. Here Phaltiel, the husband of Michal, bade farewell to his wife when on her return to King David at Hebron (2 Sam. iii. 16). Bahurim must have been very near the south

\* In 1 Macc. ix. 27, his return seems to be referred to the death of Alcimus.

boundary of Benjamin, but it is not mentioned in the lists in Joshua, nor is any explanation given of its being Benjunitic, as from Shimei's residing there we may conclude it was. In the Targum Jonathan on 2 Sam. xvi. 5, we find it given as Almon (עלמן).

But the situation of Almon (see Josh. xxi. 18) will not at all suit the requirements of Bahurim. Dr. Barclay conjectures that the place lay where some ruins still exist close to a *Wady Rucahy*, which runs in a straight course for 3 miles from Olivet directly towards Jordan, offering the nearest though not the best route (Barclay, 563, 4).

**AZMAVETH** "the Barhumite" (הַבְּרֻחִי; *δ Βαρδιαμύτης*; Alex. *Βαρουμείτης*; 2 Sam. xxiii. 31), or "the Baharumite" (הַבְּהַרְוִי; *δ Βαρωυλ*; 1 Chr. xi. 33), one of the heroes of David's guard, is the only native of Bahurim that we hear of except Shimei. [G.]

**BAJITH** (הַבֵּית, with the definite article, "the house"), referring not to a place of this name, but to the "temple" of the false gods of Moab, as opposed to the "high places" in the same sentence (Is. xv. 2, and compare xvi. 12). The allusion has been supposed to be to Beth-Baal-meon, or Beth-diblathaim, which are named in Jer. xlviii. 22, as here, with Dibon and Nebo. But this is mere conjecture, and the conclusion of Gesenius is as above (*Jesuius ad loc.*); LXX. *Λυπεισθε ἐφ' εἰστρούς*; *Asculit domus*. [G.]

**BAKBAK'KAR** (בְּקֶבֶק; *Βακβακάρ*; *Bacbacur*), a Levite, apparently a descendant of Asaph (1 Chr. ix. 15).

**BAK'BUK** (בְּקֻבֵּק; *Βακβούκ*; *Bacbuq*). "Children of Bakbuk" were among the Nethinim who returned from captivity with Zerubbabel (Ezr. ii. 51; Neh. vii. 53).

**BAKBUKIAH** (בְּקֻבֵּקִיָּה; LXX. omits).  
1. A Levite in time of Nehemiah (Neh. xi. 17, xii. 9). 2. A Levite porter, apparently a different person from the preceding (Neh. xii. 25).

#### BAKING. [BREAD.]

**BAI'AAM** (בַּלְעָם, i. e. Bileam; *Βαλαάμ*; Joseph. *Βάλαμος*; *Bilauum*), a man endowed with the gift of prophecy, introduced in Numbers (xvii. 1) as the son of Beor. He belonged to the Midianites, and perhaps as the prophet of his people possessed the same authority that Moses did among the Israelites. At any rate he is mentioned in conjunction with the five kings of Midian, apparently as a person of the same rank (Num. xxxi. 8; cf. xxxi. 16). He seems to have lived at Pethor, which is said at Deut. xxiii. 4 to have been a city of Mesopotamia (אֲרָם נְהָרַיִם). He himself speaks of being "brought from Aram out of the mountains of the East" (Num. xxiii. 7). The reading, therefore, בְּנֵי עַמּוֹן, instead of עַמּוֹן, which at Num. xxii. 5, is found in some MSS., and is adopted by the Samaritan, Syriac, and Vulgate versions, need not be preferred, as the Ammonites do not appear to have ever extended so far as the Euphrates, which is probably the river alluded to in this place. The name Balaam, according to Gesenius, is compounded of בַּל and עָם, "non-populus fortasse, i. q. peregrinus;" according

to Vitringa it is בַּעַל and עָם, *the lord of the people*; according to Simonis, בָּלַעַל and עָם, *the destruction of the people*. There is a Bela, the son of Beor, mentioned Gen. xxxvi. 32, as the first king of Edom. Balaam is called in 2 Pet. ii. 15 "the son of Bosor;" this Lightfoot (*Works*, vii. 80) thinks a Chaldaism for Beor, and infers that St. Peter was then in Babylon. Balaam is one of those instances which meet us in Scripture of persons dwelling among heathens but possessing a certain knowledge of the one true God. He was endowed with a greater than ordinary knowledge of God: he was possessed of high gifts of intellect and genius: he had the intuition of truth, and could see into the life of things,—in short, he was a poet and a prophet. Moreover, he confessed that all these superior advantages were not his own but derived from God, and were his gift. And thus, doubtless, he had won for himself among his contemporaries far and wide a high reputation for wisdom and sanctity. It was believed that he whom he blessed was blessed, and he whom he cursed was cursed. Elated, however, by his fame and his spiritual elevation he had begun to conceive that these gifts were his own, and that they might be used to the furtherance of his own ends. He could make merchandise of them, and might acquire riches and honour by means of them. A custom existed among many nations of antiquity of devoting enemies to destruction before entering upon a war with them. At this time the Israelites were marching forwards to the occupation of Palestine: they were now encamped in the plains of Moab, on the east of Jordan by Jericho. Balak, the king of Moab, having witnessed the discomfiture of his neighbours, the Amorites, by this people, entered into a league with the Midianites against them, and despatched messengers to Balaam with the rewards of *divination* in their hands. We see from this, therefore, that Balaam was in the habit of using his wisdom as a trade, and of mingling with it devices of his own by which he imposed upon others and perhaps partially deceived himself. When the elders of Moab and Midian told him their message, he seems to have had some misgivings as to the lawfulness of their request, for he invited them to tarry the night with him that he might learn how the Lord would regard it. These misgivings were confirmed by the express prohibition of God upon his journey. Balaam reported the answer, and the messengers of Balak returned. The king of Moab, however, not deterred by this failure, sent again more and more honourable princes to Balaam, with the promise that he should be promoted to very great honour upon complying with his request. The prophet again refused, but notwithstanding invited the embassy to tarry the night with him that he might know what the Lord would say unto him further; and thus by his importunity he extorted from God the permission he desired, but was warned at the same time that his actions would be overruled according to the Divine will. Balaam therefore proceeded on his journey with the messengers of Balak. But God's anger was kindled at this manifestation of determined self-will, and the angel of the Lord stood in the way for an adversary against him. The words of the Psalmist, "Be ye not like to horse and mule which have no understanding, whose mouths must be held with bit and bridle, lest they fall upon thee," had they been familiar to Balaam, would

have come home to him with most tremendous force; for never have they received a more forcible illustration than the comparison of Balaam's conduct to his Maker with his treatment of his ass, affords us. The wisdom with which the tractable brute was allowed to "speak with man's voice," and "forbid" the untractable "madness of the prophet," is palpable and conspicuous. He was taught, moreover, that even she had a spiritual perception to which he, though a prophet, was a stranger; and when his eyes were opened to behold the angel of the Lord, "he bowed down his head and fell flat on his face." It is hardly necessary to suppose, as some do, among whom are Heingstenberg, and Leibnitz, that the event here referred to happened only in a trance or vision, though such an opinion might seem to be supported by the fact that our translators render the word **פָּלַח** in xiv. 4, 16, "falling into a trance," whereas no other idea than that of simple falling is conveyed by it. St. Peter refers to it as a real historical event: "the dumb ass, speaking with man's voice, forbade the madness of the prophet" (2 Pet. ii. 16). We are not told *how* these things happened, but that they *did* happen, and that it pleased God thus to interfere on behalf of His elect people, and to bring forth from the genius of a self-willed prophet, who thought that his talents were his own, strains of poetry bearing upon the destiny of the Jewish nation and the Church at large, which are not surpassed throughout the Mosaic records. It is evident that Balaam, although acquainted with God, was desirous of throwing an air of mystery round his wisdom, from the instructions he gave Balak to offer a bullock and a ram on the seven altars he everywhere prepared for him; but he seems to have thought also that these sacrifices would be of some avail to change the mind of the Almighty, because he pleads the merit of them (xxii. 4), and after experiencing their impotency to effect such an object, "he went no more," we are told, "to seek for enchantments" (xiv. 1). His religion, therefore, was probably such as would be the natural result of a general acquaintance with God not confirmed by any covenant. He knew Him as the fountain of wisdom, how to worship Him he could merely guess from the customs in vogue at the time. Sacrifices had been used by the patriarchs, to what extent they were efficient could only be surmised. There is an allusion to Balaam in the prophet Micah (vi. 5), where Bishop Butler thinks that a conversation is preserved which occurred between him and the king of Moab upon this occasion. But such an opinion is hardly tenable, if we bear in mind that Balak is nowhere represented as consulting Balaam upon the acceptable mode of worshipping God, and that the directions found in Micah are of quite an opposite character to those which were given by the son of Boor upon the high places of Baal. The prophet is recounting "the righteousness of the Lord" in delivering His people out of the hand of Moab under Balak, and at the mention of his name the history of Balaam comes back upon his mind, and he is led to make those noble reflections upon it which occur in the following verses. "The doctrine of Balaam" is spoken of in Rev. ii. 14, where an allusion has been supposed to *Nikolaos*, the founder of the sect of the Nicolaitans, mentioned in v. 15, these two names being probably similar in signification. Though the utterance of Balaam was overruled so

that he could not curse the children of Israel, he nevertheless suggested to the Moabites the expedient of seducing them to commit fornication. The effect of this is recorded in ch. xxv. A battle was afterwards fought against the Midianites, in which Balaam sided with them and was slain by the sword of the people whom he had endeavoured to curse (Numb. xxxi. 8). (Comp. Bishop Butler's *Sermons*, serm. vii.; Ewald, *Gesch. des Volkes Israel*, ii. 277). [S. L.]

**BALAC** (δ Βαλάκ; *Balac*), Rev. ii. 14. [BALAK.]

**BAL'ADAN.** [MERODACH-BALADAN.]

**BAL'AIH** (בַּלְאִי; *Balá; Bala*), Josh. xix. 3. [BALA, *Geogr.* No. 2, b.]

**BAL'AK** (בַּלְאָק; *Balak; Balac*), son of Zippor, king of the Moabites, at the time when the children of Israel were bringing their journeyings in the wilderness to a close. According to Gesenius the name signifies *vanitas, vicinus*. Balak entered into a league with Midian and hired Balaam to curse the Israelites; but his designs were frustrated in the manner recorded in Num. xxii.-xxiv. He is mentioned also at Josh. xxiv. 9; Judg. xi. 26; Mic. vi. 5. [BALAAM.] [S. L.]

**BAL'AMO.** [BALA, *Geogr.* No. 6.]

**BALASAMUS** (Βαλασαμος; *Balsamus*), in 1 Esd. ix. 43. The corresponding name in the list in Ezra is ΜΑΑΣΕΙΑΗ.

**BALDNESS** (ἡ γῆλη; *φαλκρωσις, φαλκρωμα*; and in Lev. xiii. 43, *φαλάντωμα*). There are two kinds of baldness, viz. artificial and natural. The latter seems to have been uncommon, since it exposed people to public derision, and is perpetually alluded to as a mark of squalor and misery (2 K. ii. 23; Is. iii. 24, "instead of well-set hair, baldness, and burning instead of beauty." Is. xv. 2; Jer. xvii. 5; Ez. vii. 18, &c.). For this reason it seems to have been included under the *λευχῆν* and *ψωρά* (Lev. xxi. 20, LXX.) which were disqualifications for priesthood. A man bald on the back of the head is called **גֵּהֵל, φαλακρός**, LXX., Lev. xiii. 40, and if forehead-bald, the word used to describe him is **גֵּהֵל, ἀναφαλάντιος**, LXX., Lev. xiii. 41 (*recalaster*). (Gesen. s. vv.) In Lev. xiii. 29 sq., very careful directions are given to distinguish Boahk, "a plague upon the head and beard" (which probably is the Mentagra of Pliny, and is a sort of leprosy), from mere natural baldness which is pronounced to be clean, v. 40 (Jahn, *Arch. Bibl.* §189). But this shows that even natural baldness subjected men to an unpleasant suspicion. It was a defect with which the Israelites were by no means familiar, since *Αλιγυπτίους ἐν τῇ ἐλαχίστου τοιοῦτο φαλακροῦς πάντων ἀνθρώπων*, says Herod. (iii. 12); an immunity which he attributes to their constant shaving. They adopted this practice for purposes of cleanliness, and generally wore wigs, some of which have been found in the ruins of Thebes. Contrary to the general practice of the East, they only let the hair grow as a sign of mourning (Herod. ii. 36), and shaved themselves on all joyous occasions: hence in Gen. xli. 44 we have an undesigned coincidence. The same custom obtains in China, and among the modern Egyptians, who shave off all the hair except the shooshah, a tuft on the forehead and crown of the head (Wilkinson, *Anc. Egypt.* iii. 359, sq.; Lane, *Mod. Egypt.* i. ch. 1).

Baldness was despised both among Greeks and Romans. In *Il.* ii. 219, it is one of the defects of Thersites; Aristophanes (who was probably bald himself, *Par.* 767, *Eg.* 550) takes pride in not joining in the ridicule against it (*ὁὐδ' ἔσκωψεν τοὺς φαλακροὺς*, *Nub.* 540). Caesar was said "cultiviti deformitatem iniquissime ferre," and he generally endeavoured to conceal it (*Suet. Cæs.* 45; comp. *Rom.* 18).

Artificial baldness marked the conclusion of a Nazirite's vow (*Acts* xviii. 18; *Num.* vi. 9), and was a sign of mourning ("quasi calvitio luctus levaretur," *Cic. Tusc. Disp.* iii. 26). It is often alluded to in Scripture; as in *Mic.* i. 16; *Am.* viii. 10; *Jer.* xvii. 5, &c.; and in *Deut.* xiv. 1, the reason for its being forbidden to the Israelites is their being "a holy and peculiar people." (*Cf. Lev.* xiv. 27, and *Jer.* ix. 26, marg.) The practices alluded to in the latter passages were adopted by heathen nations (*e.g.* the Arabs, &c.) in honour of various gods. Hence the expression *προχοκουράδες*. The Abantes (*ἑπιθεν κομοῦντες*), and other half-civilised tribes, shaved off the forelocks, to avoid the danger of being seized by them in battle. (See also *Herod.* ii. 36, i. 82.) [F. W. F.]

**BALM**, the translation in the A. V. of the Hebrew *Tzavi* (צָוִי). Lee (*Lex.* p. 520) supposes it to be *Mustich*, a gum obtained from the *Pistacia Lentiscus*; but Gesenius defends the common rendering, balsam. It was the gum of a tree or shrub growing in Gilgal, and very precious. It was one of the best fruits of Palestine (*Gen.* xliii. 11), exported (*Gen.* xxxvii. 25; *Ez.* xxvii. 17) and especially used for healing wounds (*Jer.* viii. 22; xvi. 11, ii. 8). The Balsam was almost peculiar to Palestine (*Strab.* xvi. 2, p. 763; *Tac. Hist.* v. 6; *Plin.* xii. 25, §54, 32, §59), distilling from a shrub like the vine and rue, which in the time of Josephus was cultivated in the neighbourhood of Jericho and of the Dead Sea (*Ant.* xiv. 4, §1, xv. 4, §2), and still grows in gardens near Tiberias (*Burckhardt, Syria*, 323). It is derived from an unwooded root צָוִי, *fidit, fissuras fecit*, from the process by which it was obtained. In *Ezek.* xxvii. 17 the A. V. gives in the margin *rosin*. The LXX. have *ῥητινή* wherever צָוִי occurs in the Heb. The fact that the צָוִי grew originally in Gilgal does not forbid us to identify it with the shrub mentioned by Josephus as cultivated near Jericho; nor is it necessary to tie the sense of צָוִי down to the meaning of the cognate words in

Arab. and Syr. *ضرو* and *لَوْز*, the etymology of each being the same, so that they may be applicable to the gum of different trees or shrubs, which flourished in the localities where these languages were respectively spoken. Jahn says that the odoriferous balsam צָוִי is not gathered from the tree in Yemen called by the Arabic name *Abu Shamm*, but is distilled from a fruit which is indigenous on the mountains of Mecca and Medina. The sap extracted from the body of the tree is *opobalsamum*; the juice of the fruit is *carpobalsamum*, and the liquid which is extracted from the branches when cut off is *xylobalsamum* (Jahn, *Bibl. Ant.* i. §74). Bochart contends that the balm mentioned in *Jer.* viii. 8 was the resin drawn from the terebinth or turpentine tree. [W. D.]

**BALNU'US** (*Βαλνυός*; *Bonnus*), 1 *Esd.* ix. 31. [BINNUI.]

**BALTHAZAR**, *Bar.* i. 11, 12. [BELSHAZZAR.]

**BA'MAH** (בָּמָה, *a high place*). Though frequently occurring in the Bible to denote the elevated spots or erections on which the idolatrous rites were conducted [HIGH-PLACE], this word appears in its Hebrew form only in one passage (*Ez.* xx. 29), very obscure, and full of the periphrasis so dear to the Hebrew poets, so difficult for us to appreciate: "What is the high-place (בָּמָה) wherunto ye hie (יֵהֵבְתֶּם)? and the name of it is called Bamah (בָּמָה) unto this day." (*LXX.* τι ἐστὶν ἀβαμὰ . . . καὶ ἐπεκλέσαν τὸ ὄνομα αὐτοῦ Ἀβαμὰ.) Ewald (*Propheten*, 286) pronounces this verse to be an extract from an older prophet than Ezekiel. [G.]

**BA'MOTH-BA'AL** (בָּמֹת-בָּאֵל, *high places of Baal*; *Βαιμών Βαάλ*; *Bamothbaal*), a sanctuary of Baal in the country of Moab (*Josh.* xiii. 17), which is probably mentioned in the Itinerary in *Num.* xxi. 19, under the shorter form of Bamoth, or Bamoth-in-the-ravine (20), and again in the enumeration of the towns of Moab in *Is.* xv. 2. In this last passage the word is translated in the A. V. "the high places," as it is also in *Num.* xvii. 41, where the same locality is doubtless referred to.<sup>a</sup> Near to Bamoth was another place bearing the name of the same divinity. ΒΑΛΙΜΕΩΝ, or ΒΕΤΙ-ΒΑΛΙΜΕΩΝ. [G.]

**BAN** (τοῦ Βαενύ; *Tubal*), a name in a very corrupt passage (*1 Esd.* v. 37); it stands for TOBIAH in the parallel lists in *Ezra* and *Nehemiah*.

**BANATAS** (*Βανατας*; *Baneas*), 1 *Esd.* ix. 35. [BENAIH.]

**BA'NI** (בָּנִי; *Bani, Bouvi, Bavoul; Bonni, Bani, Benni*), the name of several men. 1. A Gadite, one of David's mighty men (2 *Sam.* xliii. 36; *LXX.* translate, Πολυδυναμῶς υἱὸς Γαλααθί). 2. A Levite of the line of Merari, and forefather to Kthan (*1 Chr.* vi. 46). 3. A man of Judah of the line of Pharez (*1 Chr.* ix. 4). 4. "Children of Bani" returned from captivity with Zerubbabel (*Ezra.* ii. 10; *Neh.* x. 14; *Ezra.* x. 29, 34; 1 *Esd.* v. 12). [BINNUI, MANI, and MAANI.] 5. An Israelite "of the sons of Bani" (*Ezra.* x. 38). [BANNUS.] 6. A Levite (*Neh.* iii. 17). 7. A Levite (*Neh.* viii. 7; ix. 4; *LXX.* transl. καὶ οἱ υἱοὶ Καμυήλ, 5; x. 13). [ANUS.] 8. Another Levite (*Neh.* ix. 4; *LXX.* transl. υἱοὶ Χωρενί). 9. Another Levite, of the sons of Asaph (*Neh.* xi. 22).

**BANID** (*Βανίας*; *Alex. Bani; Banir*), 1 *Esd.* viii. 36. This represents a name which has apparently escaped from the present Hebrew text (see *Ezra.* viii. 10).

**BANNA'IA** (*Σαβανναίος*; *Alex. Bannvalous; Bannus*), 1 *Esd.* ix. 33. The corresponding name in the list in *Ezra* is ZABAD.

**BAN'NUS** (*Βαννυός*; *Baneas*), 1 *Esd.* ix. 34. [BANI, or BINNUI.]

**BANQUETS**. These, among the Hebrews,

<sup>a</sup> It will be observed that our Translators have, in *Num.* xliii. 3, rendered by "high place" a totally different word (בָּמָה), which is devoid of the special meaning of "Bamoth."

were not only a means of social enjoyment, but were a part of the observance of religious festivity. At the three solemn festivals, when all the males appeared before the Lord, the family also had its domestic feast, as appears from the place and the share in it to which "the widow, the fatherless, and the stranger," were legally entitled (Deut. xvi. 11). Probably, when the distance allowed, and no inconvenience hindered, both males and females went up (e. g. to Shiloh. 1 Sam. i. 9) together, to hold the festival. These domestic festivities were doubtless to a great extent retained, after laxity had set in as regards the special observance by the male sex (Nehem. viii. 17). Sacrifices, both ordinary and extraordinary, as amongst heathen nations (Ex. xxiv. 15; Judg. xvi. 23), included a banquet, and Eli's sons made this latter the prominent part. The two, thus united, marked strongly both domestic and civil life. It may even be said that some sacrificial recognition, if only in pouring the blood solemnly forth as before God, always attended the slaughter of an animal for food. The firstlings of cattle were to be sacrificed and eaten at the sanctuary if not too far from the residence (1 Sam. ix. 13; 2 Sam. vi. 19; Ex. xxii. 29, 30; Lev. xiv. 5, 6; Deut. xii. 17, 20, 21, xv. 19-22). From the sacrificial banquet probably sprang the *ἀγανθ*; as the Lord's supper with which it for a while coalesced, derived from the Passover. Besides religious celebrations, such events as the weaning a son and heir, a marriage, the separation or reunion of friends, and sheep-shearing, were customarily attended by a banquet or revel (Gen. xli. 8, xlix. 22, xxii. 27, 54; 1 Sam. xxv. 2, 36; 2 Sam. xiii. 23). At a funeral, also, refreshment was taken in common by the mourners, and this might tend to become a scene of indulgence, but ordinarily abstemiousness seems on such occasions to have been the rule. The case of Archelaus is not conclusive, but his inclination towards alien usages was doubtless shared by the Herodianizing Jews (Jer. xvi. 5-7; Ezek. xxiv. 17; Hos. ix. 4; Eccl. vii. 2; Joseph. *de B. J.* ii. 1). Birthday-banquets are only mentioned in the cases of Pharaoh and Herod (Gen. xl. 20; Matt. xiv. 6). A leading topic of prophetic rebuke is the abuse of festivals to an occasion of drunken revelry, and the growth of fashion in favour of drinking parties. Such was the invitation typically given by Jeremiah to the Rechabites (Jer. xxxv. 5). The usual time of the banquet was the evening, and to begin early was a mark of excess (Is. v. 11; Eccl. x. 16). The slaughtering of the cattle, which was the preliminary of a banquet, occupied the earlier part of the same day (Prov. ix. 2; Is. xxii. 13; Matt. xxi. 4). The most essential materials of the banqueting-room, next to the viands and wine, which last was often drugged with spices (Prov. ix. 2; Cant. viii. 2), were perfumed ointments, garlands or loose flowers, white or brilliant robes, after these, exhibitions of music, singers, and dancers, riddles, jesting and merriment (Is. xxviii. 1; \*Wis. ii. 6; 2 Sam. xix. 35; Is. xlv. 6, v. 12; Judg. xiv. 12; Neh. viii. 10; Eccl. x. 19; Matt. xxii. 11; Am. vi. 5, 6; Luke xv. 25). Seven days was a not uncommon duration of a festival, especially for a wedding, but sometimes fourteen (Tob. viii. 19; Gen. xxx. 27; Judg. xiv. 12); but if the bride were a widow, three days formed the limit (Buxtorf, *de Conviv. Hebr.*). The remainder sent to the guests (Luke xiv. 17) was, probably, only usual in princely banquets on a large scale, involving pro-

tracted preparation. "Whether the slaves who bade the guests had the office (as the *vocatores* or *invitatores* among the Romans) of pointing out the places at table and naming the strange dishes, must remain undecided." (Winer, s. v. *Gastmahl*.) There seems no doubt that the Jews of the O. T. period used a common table for all the guests. In Joseph's entertainment a ceremonial separation prevailed, but there is no reason for supposing a separate table for each, as is distinctly asserted in Tosephot Tr. Berach. c. vi. to have been usual (Buxtorf, l. c.). The latter custom certainly was in use among the ancient Greeks and Germans (Hom. *Od.* xxiii., xxii. 74; Tac. *German.* 22), and perhaps among the Egyptians (Wilkinson, ii. 202, engravings). But the common phrase to "sit at table," or "eat at any one's table," shows the originality of the opposite usage. The posture at table in early times was sitting (שָׁבַע, סָבַב, to sit round, 1 Sam. xvi. 11, xx. 5, 18), and the guests were ranged in order of dignity (Gen. xliii. 33; 1 Sam. ix. 22; Joseph. *Ant.* xv. 2, §4): the words which imply the recumbent posture (*ἀνακλινειν*, *ἀναπαύειν*, or *ἀνακεισθαι*) belong to the N. T. The separation of the women's banquet was not a Jewish custom (Esth. i. 9). Portions or messes were sent from the entertainer to each guest at table, and a double or even five-fold share when peculiar distinction was intended, or a special part was reserved (1 Sam. i. 5; Gen. xliii. 34; 1 Sam. ix. 23, 24). Portions were similarly sent to poorer friends direct from the banquet-table (Neh. viii. 10; Esth. ix. 19, 22). The kiss on receiving a guest was a point of friendly courtesy (Luke vii. 45). Perfumes and scented oils were offered for the head, beard, and garments. It was strictly enjoined by the Rabbis to wash both before and after eating, which they called the *מים ראשונים* and *מים אחרונים*; but washing the feet seems to have been limited to the case of a guest who was also a traveller.

In religious banquets the wine was mixed, by rabbinical regulation, with three parts of water, and four short forms of benediction were pronounced over it. At the passover four such cups were mixed, blessed, and passed round by the master of the feast (*ἀρχιεπίκληστος*). It is probable that the character of this official varied with that of the entertainment; if it were a religious one, his office would be quasi-priestly; if a revel, he would be the mere *συμποσίτάρχης* or *arbiter bibendi*. [II. H.]

**BANUAS** (*Βάνυος*; *Bannis*), a name occurring in the lists of those who returned from captivity (1 Esd. v. 26). Banuas and Sudias answer to Hodaiviah in the parallel lists of Ezra and Nehemiah.

**BARAB'BAS** (*Βαραββᾶς*, *בָּרַבְבָּאס*, son of Abba, see Simonis *Onom.* N. T. 38), a robber (*ἀγροτής*, John xviii. 40), who had committed murder in an insurrection (Mark xiv. 7; Luke xxiii. 19) in Jerusalem, and was lying in prison at the time of the trial of Jesus before Pilate. When the Roman governor, in his anxiety to save Jesus, proposed to release him to the people in accordance with the custom that he should release one prisoner to them at the Passover, the whole multitude cried out. *Αἶρε τοῦτον, ἀπόλυσον δὲ ἡμῖν τὸν Βαραββᾶν*: which request was complied with by Pilate. According to many of the cursive, or later MSS. in Matt. xxvii. 16, his name was *Ἰησοῦς Βαραββᾶς*; Pilate's question there running, *τίνα θέλετε ἀπολύνω*

ὡμῶν; Ἰησοῦν Βαραββᾶν, ἢ Ἰησοῦν τὸν λεγόμενον Χριστόν; and this reading is supported by the Armenian version, and cited by Origen (on Matt. vol. v. 35). It has in consequence been admitted into the text by Fritzsche and Tischendorf. But the contrast in ver. 20, "that they should ask Barabbas, and destroy Jesus," seems fatal to it. [H. A.]

BARACHEL (בִּרְחֵל; Βαραχίηλ; Barachel), the "Buize," father of Elihu (Job xxxii. 2, 6). [Buz.]

BARACHI'AS, Matt. xxiii. 35. [ZACHARIAS.]

BARAK (בָּרַק, lightning, as in Ex. xix. 16; Barak, LXX.; comp. the family name of Hannibal, Barca = "fulmen belli"), son of Abinoam of Kedesh, a refuge-city in Mount Naphtali, was invited by Deborah, a prophetess of Ephraim, to deliver Israel from the yoke of Jabin ("prudent") was probably the dynastic name of those kings of northern Canaan, whose capital city was Hazor on L. Merom. Sisera, his general and procurator, oppressed a promiscuous population at Harosheth. Accompanied, at his own express desire, by Deborah, Barak led his rudely-armed force of 10,000 men from Naphtali and Zebulun to an encampment on the summit of Tabor, where the 900 iron chariots of Jabin would be useless. At a signal given by the prophetess, the little army, seizing the opportunity of a providential storm (Joseph. v. 5, §4) and a wind that blew in the faces of the enemy, boldly rushed down the hill, and utterly routed the unwieldy host of the Canaanites in the plain of Jezreel (Esdraelon), "the battlefield of Palestine" (Stanley, *N. and P.* p. 311). From the prominent mention of Taanach (Judg. v. 19, "sandy soil") and of the river Kishon, it is most likely that the victory was partly due to the suddenly swollen waves of that impetuous torrent (χειμάρρους, LXX.), particularly its western branch called Megiddo. The victory was decisive, Harosheth taken (Judg. iv. 16), Sisera murdered, and Jabin ruined. A peace of 40 years ensued, and the next danger came from a dilettant quarter. The victors composed a splendid epinician ode in commemoration of their deliverance (Judg. v.).

It is difficult to decide the date of Barak. He appears to have been a contemporary of Shamgar (Judg. v. 6). If so, he could not have been so much as 178 years after Joshua, where he is generally placed. Lord A. Hervey supposes the narrative to be a repetition of Josh. xi. 1-12 (*Genealogies*, p. 228, *sq.*). A great deal may be said for this view; the names Jabin and Hazor; the mention of subordinate kings (Judg. v. 19; cf. Josh. xi. 2 *sq.*); the general locality of the battle; the prominence of chariots in both narratives, and especially the name Misrephoth-maim, which seems to mean "burning by the waters," as in the marg. of the A. V., and not "the flow of waters." Many chronological difficulties are also thus removed; but it is fair to add that in Stanley's opinion (*S. and P.*, 392, note) there are geographical difficulties in the way. (Ewald, *Gesch. des Volkes Israel*; Lord A. Hervey, *Genealogies*, 225-246 *sq.*) [DEBORAH.] [F. W. F.]

BARBARIAN (βάρβαρος). Πᾶς μὴ Ἑλλην βάρβαρος is the common Greek definition, quoted by Serv. ad Virg. *Aen.* ii. 504; and in this strict sense the word is used in Rom. i. 14, "I am debtor both to Greeks and barbarians;" where Luther used

the term 'Ungrieche,' which happily expresses its force. "Ἕλληνες καὶ βάρβαροι is the constant division found in Greek literature, but Thucydides (i. 3) points out that this distinction is subsequent to Homer, in whom the word does not occur, although he terms the Carians βαρβάρφωνοι (Il. ii. 867, where Eustathius connects the other form Κάρβατος with Κάρ). At first, according to Strabo (xiv. 662), it was only used κατ' ὀνοματοποιαν ἐπὶ τῶν δυσεκφόρων καὶ κληρῶν καὶ τραχείων λαλούντων, and its generic use was subsequent. It often retains this primitive meaning, as in 1 Cor. xiv. 11 (of one using an unknown tongue), and Acts xxviii. 24 (of the Maltese, who spoke a Punic dialect). So too Aesch. *Agam.* 2013, χελιδὼς δίκην Ἀγνώτα φωνῇν βάρβαρον κεκτημένη; and even of one who spoke a patois, ἔτε Λέσβιος ἐν καὶ ἐν φωνῇ βάρβαρῳ τετραμμένος, Plat. *Protag.* 341 c. (it is not so strong a word as παλιγγλωσσος, Donaldson, *Crit.* §88); and the often quoted line of Ov. *Trist.* v. 10, 37.

"Barbarus hic ego sum quia non intelligor uli."

The ancient Egyptians (like the modern Chinese) had an analogous word for all τοὺς μὴ σφισιν ὁμογλώσσους, Herod. ii. 158; and βάρβαρος is used in the LXX. to express a similar Jewish distinction. Thus in Ps. lxxii. 1, λαὸς βάρβαρος is used to translate מְגֵרִי, "peregrino sermone utens." (Schleusn. *Theor.* s. v.), which is also an onomatopoeian from מְגֵרִי, to stammer. In 1 Cor. v. 13, 1 Tim. iii. 7, we have of ἔξω, and Matt. vi. 32, τὰ ἔθνη, used Hebraistically for ὀνῆ, ὀνῆς (in very much the same sort of sense as that of βάρβαροι) to distinguish all other nations from the Jews; and in the Talmudists we find Palestine opposed to תַּלְמִדְיָא,

just as Greece was to Barbaria or ἡ βάρβαρος; (cf. Cic. *Fin.* ii. 15; Lightfoot, *Centuria Chorogr.* ad *init.*) And yet so completely was the term βάρβαρος accepted, that even Josephus and Philo scruple as little to reckon the Jews among them (*Ant.* xi. 7, §1, &c.), as the early Romans did to apply the term to themselves ("Demophilus scripsit, Marcus vertit barbæ;" Plant. *Asin.* prol. 10). Very naturally the word after a time began to involve notions of cruelty and contempt (ἔσθρος βάρβαρος, 2 Mac. iv. 25, xv. 2, &c.), and then the Romans excepted themselves from the scope of its meaning (Cic. *de Rep.* i. 37, §68). Afterwards only the savage nations were called barbarians; though the Greek Constantinopolitans called the Romans "barbarians" to the very last. (Gibbon, c. 51, vi. 351, ed. Smith; Winer, s. v.) [F. W. F.]

BARHUMITE, THE. [BAHURIM.]

BARIAH (בִּרְיָה; Βερρί; Alex. Βερία; Baria), one of the sons of Shimeiah, a descendant of the royal family of Judah (1 Chr. iii. 22).

BAR-JE'SUS. [ELYMAS.]

BAR-JONA. [PETER.]

BAR'KOS (בִּרְכֹּס; Βαρκός, Βαρκουέ; Barcos).

"Children of Barkos" were among the Nethinim who returned from the captivity with Zerubbabel (*Exr.* ii. 53; *Neh.* vii. 55).

BARLEY (בָּרִיָּה; κριθή; hordeum), a grain cultivated for food both in Egypt and Palestine. It is first mentioned in Ex. ix. 31, from which passage we learn that it was earlier than wheat.

It was sown in October or the beginning of November, ripened in March, and was generally cut in April. It is reckoned among the valuable products of the promised land in Deut. viii. 8. We read of barley-meal in Num. v. 15, of barley-bread in Jud. vii. 13, and barley-cakes in Ex. iv. 12. It was measured by the ephah and homer. Barley was used as food for horses (1 K. iv. 28; comp. Hom. *Il.* v. 196), and there are several passages which indicate that it was less valued than wheat. The jealousy-offering (Num. v. 15) was to be barley-meal, though the common mincha was of fine wheat-flour (Lev. ii. 1), the meaner grain being appointed to denote the vile condition of the person on whose behalf it was offered. The purchase-money of the adulteress in Hos. iii. 2 is generally believed to be a mean price. The derivation of the word from שָׁבֵר, *horruit*, is obviously from the bearded ears of the barley—just as in Latin we have *hordeum* from *horreo*. Gesenius notices that שָׁבֵר sing. is used for the growing crop, and שָׁבֵרִים plur. for the grain. [W. D.]

**BARNABAS** (בְּרִנְבָּאס; *Barnabas*), a name signifying υἱὸς παρακλήσεως, "son of prophecy," or "exhortation" (or, but not so probably, "consolation," as A. V.), given by the Apostles (Acts iv. 36) to JOSEPH (or Joses, as the Rec. Text), a Levite of the island of Cyprus, who was early a disciple of Christ (according to Euseb. *II. E.* i. 12, and Clem. Alex. *Strom.* ii. p. 176 Sylb., one of the Seventy), and in Acts (*I. c.*) is related to have brought the price of a field which he had sold, and to have laid it at the feet of the Apostles. In Acts ix. 27, we find him introducing the newly-converted Saul to the Apostles at Jerusalem, in a way which seems to imply previous acquaintance between the two. On tidings coming to the church at Jerusalem that men of Cyprus and Cyrene had been, after the persecution which arose about Stephen, preaching the word to Gentiles at Antioch, Barnabas was sent thither (Acts xi. 19-26), and being a good man, and full of the Holy Ghost, he rejoiced at seeing the extension of the grace of God, and went to Tarsus to seek Saul, as one specially raised up to preach to the Gentiles (Acts xxvi. 17). Having brought Saul to Antioch, he was sent, together with him, to Jerusalem, upon a prophetic intimation of a coming famine, with relief to the brethren in Judaea (Acts xi. 30). On their return to Antioch, the two, being specially pointed out by the Holy Ghost (Acts xiii. 2) for the missionary work, were ordained by the church, and sent forth (A.D. 45). From this time, though not of the number of the Twelve, Barnabas and Paul enjoy the title and dignity of Apostles. Their first missionary journey is related in Acts xiii. xiv.; it was confined to Cyprus and Asia Minor. Some time after their return to Antioch (A.D. 47 or 48), they were sent (A.D. 50), with some others, to Jerusalem, to determine with the Apostles and Elders the difficult question respecting the necessity of circumcision for the Gentile converts (Acts xv. 1 ff.). On that occasion, Paul and Barnabas were recognized as the Apostles of the uncircumcision. After another stay in Antioch on their return, a variance took place between Barnabas and Paul on the question of taking with them, on a second missionary journey, John Mark, sister's son to Barnabas (Acts xv. 36 ff.). "The contention was so sharp, that they parted asunder;" and if we may judge from the hint furnished by the

notice that Paul was commended by the brethren to the grace of God, it would seem that Barnabas was in the wrong. He took Mark, and sailed to Cyprus, his native island. And here the Scripture notices of him cease: those found in Gal. ii. 1, 9, 13, belong to an earlier period; see above. From 1 Cor. ix. 6, we infer that Barnabas was a married man; and from Gal. i. c., and the circumstances of the dispute with Paul, his character seems not to have possessed that thoroughness of purpose and determination which was found in the great Apostle. As to his further labours and death, traditions differ. Some say that he went to Milan, and became first bishop of the church there: the Clementine Homilies make him to have been a disciple of our Lord Himself, and to have preached in Rome and Alexandria, and converted Clement of Rome: the Clementine Recognitions—to have preached in Rome even during the lifetime of Our Lord. There is extant an apocryphal work, probably of the fifth century, *Acta et Passio Barnabas in Cypro*, which relates his second missionary journey to Cyprus, and his death by martyrdom there; and a still later encomium of Barnabas, by a Cyprian monk Alexander, which makes him to have been brought up with St. Paul under Gamaliel, and gives an account of the pretended finding of his body in the time of the Emperor Zeno (474-490). We have an Epistle in 21 chapters called by the name of Barnabas. Of this, the first four chapters and a half are extant only in a barbarous Latin version; the rest in the original Greek. Its authenticity has been defended by some great names; and it is quoted as the work of Barnabas by Clem. Alex. (seven times), by Origen (thrice), and its authenticity, but not its authority, is allowed by Euseb. (*H. E.* iii. 25), and Jerome (*Catal. Scriptor. Ecclesiast.* c. 6; see Pearson, *l'indiction Ignatienne*, pt. i. c. 4). But it is very generally given up now, and the Epistle is believed to have been written early in the second century. The matter will be found concisely treated by Hefele, in the prolegomena to his edition of the Apostolic Fathers, 1 vol. 8vo., Tübingen, 1847; and more at length in his volume, *Das Sendschreiben des Ap. Barnabas*, &c., Tübingen, 1840; and in Heberle's article in Herzog's Cyclopaedia. [H. A.]

**BARODIS** (Βαρωδῖς; *Rahotis*), a name inserted in the list of those "servants of Solomon" who returned with Zerubbabel (1 Esd. v. 34). There is no corresponding name in the list of Ezra or Nehemiah.

**BARNABAS**. [JOSEPH BARNABAS; JUDAS BARNABAS.]

**BARTACUS** (Βαρτάκος; *Bezaz*), the father of Apame, the concubine of king Darius (1 Esd. iv. 29). "The admirable" (δ θαυμαστός) was probably an official title belonging to his rank. The Syriac version has ܒܪܬܐ, a name which recalls that of Artachnes (Ἀρταχάνης), who is named by Herodotus (vii. 22, 117) as being in a high position in the Persian army under Xerxes, and a special favourite of that king (Simonis, *Onom.*; Smith's *Dict. of Biog.* i. 369).

**BARTHOLOMEW** (Βαρθολομαῖος, i. c. בְּרִתְלַמִּי, son of Talmai; comp. the LXX. Θολμαί, Θολαμαί, Josh. xv. 14, 2 K. xiii. 37, and Θολομαῖος, Joseph. *Ant.* xx. 1, §1; *Bartholomaeus*), one of the Twelve Apostles of Christ (Matt. x. 3; Mark iii. 18; Luke vi. 14; Acts i. 13). His *οὐν*

name nowhere appears in the three first Gospels: and it has been not improbably conjectured that he is identical with Nathanael (John i. 45 ff.). Nathanael there appears to have been first brought to Jesus by Philip; and in the three first catalogues of the Apostles (cited above) Bartholomew and Philip appear together. It is difficult also to imagine, from the place assigned to Nathanael in John xxi. 2, that he can have been other than an Apostle. If this may be assumed, he was born at Cana of Galilee: and is said to have preached the gospel in India (Euseb. *H. E.* v. 10; Jerome, *Vir. Illust.* 36): meaning thereby, probably, Arabia Felix (*Ἰνδοὶ οἱ καλούμενοι εὐδαίμονες*, Sophron.), which was sometimes called India by the ancients (Mosheim, *De Rebus Christ. ante Construkt. M. Commentarii*, b. 206). Some allot Armenia to him as his mission-field, and report him to have been there thayed alive and then crucified with his head downwards (Assmann, *Bibl. Or.* iii. 2, 20). [H. A.]

**BARTIMAEUS** (*Βαρτιμαῖος*, i. e. *בִּרְמַיָּה*, son of *Tinnai*), a blind beggar of Jericho who (Mark x. 46 ff.) sat by the wayside begging as our Lord passed out of Jericho on His last journey to Jerusalem. Notwithstanding that many charged him to hold his peace, he continued crying, "Jesus, thou son of David, have mercy on me!" Being called, and his blindness miraculously cured, on the ground of his faith, by Jesus, he became thenceforward a disciple. Nothing more is known of him. [H. A.]

**BARUCH** (*בְּרָכְיָה*, *blessed* = *Benedict*; *Βαρούχ*; Joseph. *Βαρούχος*; *Baruch*). 1. Son of Neriah, the friend (Jer. xxii. 12), amanuensis (Jer. xxxvi. 4 ff.; 32) and faithful attendant of Jeremiah (Jer. xxvi. 10 ff.; Joseph. *Ant.* x. 6, §2; *N. C.* 603), in the discharge of his prophetic office. He was of a noble family (Joseph. *Ant.* x. 9, §1, *ἐξ ἐπισήμων σφόδρα οἰκίας*; comp. Jer. li. 59; Bar. i. 1, *De tribu Simeon*, Vet. Lat.), and of distinguished acquisitions (Joseph. *l. c.* *τῇ πατριφίᾳ γλώττῃ διαφέρωντας πεπαιδευμένους*); and his brother Seraiah held an honourable office in the court of Zedekiah (Jer. li. 59). His enemies accused him of influencing Jeremiah in favour of the Chaldeans (Jer. xliii. 3; cf. xxxvii. 13); and he was thrown into prison with that prophet, where he remained till the capture of Jerusalem B.C. 586 (Joseph. *Ant.* x. 9, §1). By the permission of Nebuchadnezzar he remained with Jeremiah at Mispas (Joseph. *l. c.*); but was afterwards forced to go down to Egypt with "the remnant of Judah, that were returned from all nations" (Jer. xliii. 6; Joseph. *Ant.* x. 9, §6). Nothing is known certainly of the close of his life. According to one tradition he remained in Egypt till the death of Jeremiah, and then retired to Babylon, where he died in the 12th year after the destruction of Jerusalem (Bertholdt, *Eint.* 1740 n.). Jerome, on the other hand, states, "on the authority of the Jews" (*Hebraei tradunt*), that Jeremiah and Baruch died in Egypt "before the desolation of the country by Nabuchodonosor" (*Comm. in Is.* xxx. 6, 7, p. 405). [JEREMIAH.]

2. Son of Zababai (Neh. iii. 20, x. 6). 3. Son of Col-hozeh (Neh. xi. 5). [B. F. W.]

**BARUCH, THE BOOK OF**, is remarkable as the only book in the Apocrypha which is formed on the model of the Prophets; and though it is wanting in originality, it presents a vivid reflection

of the ancient prophetic fire. It may be divided into two main parts i.—iii. 8, and iii. 9—end. The first part consists of an Introduction (i. 1—14), followed by a confession and prayer (i. 15—iii. 8). The second part opens with an abrupt address to Israel (iii. 9—iv. 30), pointing out the sin of the people in neglecting the divine teaching of Wisdom (iii. 9—iv. 8), and introducing a noble lament of Jerusalem over her children, through which hope still gleams (iv. 9—30). After this the tone of the book again changes suddenly, and the writer addresses Jerusalem in words of triumphant joy, and paints in the glowing colours of Isaiah the return of God's chosen people and their abiding glory (iv. 30—v. 9).

1. The book at present exists in Greek, and in several translations which were made from the Greek. The two classes into which the Greek MSS. may be divided do not present any very remarkable variations (Fritzsche, *Eint.* §7); but the Syro-Hexaplaric text of the Milan MS., of which a complete edition is at length announced, is said to contain references to the version of Theodotion (Eichhorn, *Eint. in die Apoc. Schrift.* 388 n.), which must imply a distinct revision of the Greek, if not an independent rendering of an original Hebrew text. Of the two Old-Latin versions which remain, that which is incorporated in the Vulgate is generally literal; the other (Cursus, Rom. 1688; Sabatier) is more free. The vulgar Syriac and Arabic follow the Greek text closely (Fitzsche, *l. c.*).

2. The assumed author of the book is undoubtedly the companion of Jeremiah, though Jalu denied this; but the details are inconsistent with the assumption. If the reading in i. 1 be correct (*ἔρει*; De Wette *conj.* *μνησθ.* *Eint.* §321 a; comp. 2 K. xxv. 8), it is impossible to fix "the fifth year" in such a way as to suit the contents of the book, which exhibits not only historical inaccuracies but also evident traces of a later date than the beginning of the captivity (iii. 9 ff., iv. 22 ff.; i. 3 ff. Comp. 2 K. xxv. 27).

3. The book was held in little esteem among the Jews (Hieron. *Præf. in Jerem.* p. 834... *nec habetur apud Hebræos*; Epiph. *de mens. oὐ κεῖνται ἐπιστολαὶ (Βαρούχ) παρ' Ἑβραίοις*); though it is stated in the Greek text of the Apostolic Constitutions that it was read, together with the Lamentations, "on the tenth of the month Gorpiceus" (i. e. the day of Atonement; *Const. Ap.* v. 20, 1). But this reference is wanting in the Syriac version (Bunsen, *Anal. Ante-Nic.* ii. 187), and the assertion is unsupported by any other authority. There is no trace of the use of the book in the New Testament, or in the Apostolic Fathers, or in Justin. But from the time of Irenæus it was frequently quoted both in the East and in the West, and generally as the work of Jeremiah (IREN. *adv. Hæc.* v. 35, 1 *significavit Jeremias*, Bar. iv. 36—v; TERTULL. *c. Gnóst.* 8 *Hieremias*, Bar. (Epist.) vi. 3 ff.; CLEM. *Pæd.* i. 10, §91, *διὰ Ἱερεμίου*, Bar. iv. 4; *id. Pæd.* ii. 3, §36, *θεοῦ γραφή*, Bar. iii. 16—19; ORIG. *c.* Euseb. *H. E.* vi. 25; *Ἱερεμίας σὺν θρήνοις καὶ τῇ ἐπιστολῇ* (?). CYPR. *Test. Lib.* ii. 6, *apud Hieremiam*, Bar. iii. 35, &c.). It was, however, "obelized" throughout in the LXX, as deficient in the Hebrew (*Cod. Chis.* ap. Daniel, &c., Rome, 1772, p. xxi.). On the other hand it is contained as a separate book in the Pseudo-Ladicean Catalogue, and in the Catalogues of Cyril of Jerusalem, Athanasius and Nicephorus; but it is not specially mentioned

In the Conciliar catalogues of Carthage and Hippo, probably as being included under the title Jeremiah. (Comp. [ATHAN.] *Syn. S. Script.* ap. Credner, *Zur Gesch. des Kan.* 138. HILAR. *Prolog. in Psalm.* 15.) It is omitted by those writers who reproduced in the main the Hebrew Canon (e.g. Melito, Gregory Nazianzen, Epiphanius). Augustine quotes the words of Baruch (iii. 16) as attributed "more commonly to Jeremiah" (*quidam . . . scribas ejus attribuerunt . . . sed Jeremiae celebratius habetur, de Civ.* xviii. 33), and elsewhere uses them as such (c. *Faust.* xii. 43). At the Council of Trent Baruch was admitted into the Roman Canon; but the Protestant churches have unanimously placed it among the Apocryphal books, though Whiston maintained its authenticity (l. c. *infra*).

4. Considerable discussion has been raised as to the original language of the book. Those who advocated its authenticity generally supposed that it was first written in Hebrew (Huett, Dereser, &c.; but Jahn is undecided; Bertholdt, *Einkl.* 1755), and this opinion found many supporters (Bendtsen, Grüneberg, Mövers, Hitzig, De Wette, *Einkl.* §323). Others again have maintained that the Greek is the original text (Eichhorn, *Einkl.* 388 ff.; Bertholdt, *Einkl.* 1757; Hävernick, ap. De Wette, l. c.) The truth appears to lie between these two extremes. The two divisions of the book are distinguished by marked peculiarities of style and language. The Hebrew character of the first part (i.-iii. 8) is such as to mark it as a translation and not as the work of a Hellenizing Greek: e.g. i. 14, 15, 22, ii. 4, 9, 25, iii. 8; and several obscurities seem to be mistranslations: e.g. i. 2, 8, ii. 18, 29. The second part, on the other hand, which is written with greater freedom and vigour, closely approaches the Alexandrine type. And the imitations of Jeremiah and Daniel which occur throughout the first part (cf. i. 15-18=Dan. ix. 7-10; ii. 1, 2=Dan. ix. 12, 13, ii. 7-19=Dan. ix. 13-18) give place to the tone and imagery of the Psalms and Isaiah.

5. The most probable explanation of this contrast is gained by supposing that some one thoroughly conversant with the Alexandrine translation of Jeremiah, perhaps the translator himself (Hitzig, Fritzsche), found the Hebrew fragment which forms the basis of the book already attached to the writings of that prophet, and wrought it up into its present form. The peculiarities of language common to the LXX. translation of Jeremiah and the first part of Baruch seem too great to be accounted for in any other way (for instance the use of *δεσμώντης, ἀποστολή, βόμβησις (βομβεύει), ἀποικισμός, μάννα, ἀποστρέφειν (πειν.)*, *ἐργάζεσθαι τινι, ὄνομα επικαλεῖσθαι ἐπὶ τινι*), and the great discrepancy which exists between the Hebrew and Greek texts as to the arrangement of the later chapters of Jeremiah, increases the probability of such an addition having been made to the canonical prophecies. These verbal coincidences cease to exist in the second part, or become very rare; but this also is distinguished by characteristic words: e.g. *ὁ αἰώνιος ὁ ἄγιος, ἐπάγειν*. At the same time the general unity (even in language, e.g. *χαρμοσύνη*) and coherence of the book in its present form point to the work of one man. (Fritzsche, *Einkl.* §5; Hitzig, *Psalm.* ii. 119; Ewald, *Gesch. d. Volkes Isr.* iv. 232 n.). Bertholdt appears to be quite in error (*Einkl.* 1743, 1762) in assigning iii. 1-8 to a separate writer (De Wette, *Einkl.* §322).

6. There are no certain data by which to fix the time of the composition of Baruch. Ewald (l. c.

pp. 230 ff.) assigns it to the close of the Persian period; and this may be true as far as the Hebrew portion is concerned; but the present book must be placed considerably later, probably about the time of the war of liberation (c. B.C. 160), or somewhat earlier.

7. The *Epistle of Jeremiah*, which, according to the authority of some Greek MSS., stands in the English version as the 6th chapter of Baruch, is the work of a later period. It consists of a rhetorical declamation against idols (comp. Jerem. x., xxix.) in the form of a letter addressed by Jeremiah "to them which were to be led captive to Babylon." The letter is divided into clauses by the repetition of a common burden: *they are no gods; fear them not* (vv. 16, 23, 29, 66); *how can a man think or say that they are gods?* (vv. 40, 44, 56, 64). The condition of the text is closely analogous to that of Baruch; and the letter found the same partial reception in the Church. The author shows an intimate acquaintance with idolatrous worship; and this circumstance, combined with the purity of the Hellenistic dialect, points to Egypt as the country in which the Epistle was written. There is no positive evidence to fix its date, for the supposed reference in 2 Mac. ii. 2, is more than uncertain; but it may be assigned with probability to the first century B.C.

8. A Syriac first Epistle of Baruch "to the nine and a half tribes" (comp. 4 Esdr. xiii. 40, Vers. Arab.) is found in the London and Paris Polyglots. This is made up of commonplaces of warning, encouragement, and exhortation. Fritzsche (*Einkl.* §8) considers it to be the production of a Syrian monk. It is not found in any other language. Whiston (*A Collection of Authentic Records*, &c. London, 1727, i. pp. 1 ff., 25 ff.) endeavoured to maintain the canonicity of this Epistle as well as that of the Book of Baruch. [B. F. W.]

**BARZIL'LAI** (בָּרְזִילַי, *iron*; Βερζελλί; *Barzillai*). 1. A wealthy Gileadite who showed hospitality to David when he fled from Absalom (2 Sam. xvii. 27). On the score of his age, and probably from a feeling of independence, he declined the king's offer of ending his days at court (2 Sam. xix. 32-39). David before his death recommended his sons to the kindness of Solomon (1 K. ii. 7).

2. A Melchite, whose son Adriel married Michal, Saul's daughter (2 Sam. xxi. 8).

3. Ezr. ii. 61; Neh. vii. 63. [R. W. B.]

**BASALOTH** (Βασαλέμ; Alex. Βασαλώ; *Phasulon*), 1 Esd. v. 31. [BAZLITH.]

**BAS'CAMA** (ἡ Βασκαμᾶ; Jos. Βασκά; *Bas-cama*), a place in Gilead (εἰς τὴν Γαλααδῖτιν) where Jonathan Maccabæus was killed by Trypho, and from which his bones were afterwards disinterred and conveyed to Modin by his brother Simon (1 Mac. xiii. 23; Joseph. *Ant.* xiii. 6, §6). No trace of the name has yet been discovered. [G.]

**BASH'AN** (almost invariably with the definite article, בָּשָׁן; *Basán*; *Basan*), a district on the east of Jordan. It is not, like Argob and other districts of Palestine, distinguished by one constant designation, but is sometimes spoken of as the "land of Bashan" (בְּרֶחַץ בָּשָׁן, 1 Chr. v. 11; and comp. Num. xxi. 33, xxxii. 33), and sometimes as "all Bashan" (כָּל בָּשָׁן; Deut. iii. 10, 13; Josh.

xii, 5, xiii, 12, 30), but most commonly without any addition. It was taken by the children of Israel after their conquest of the land of Sihon from Arnon to Jabbok. They "turned" from their road over Jordan and "went up by the way of Bashan"—probably by very much the same route as that now followed by the pilgrims of the Hifji and by the Romans before them—to Edrei on the western edge of the *Lejah*. [EDREI.] Here they encountered Og king of Bashan, who "came out" probably from the natural fastnesses of Argob, only to meet the entire destruction of himself, his sons, and all his people (Num. xxi. 33-35; Deut. iii. 1-3). Argob, with its 60 strongly fortified cities, evidently formed a principal portion of Bashan (Deut. iii. 4, 5), though still only a portion (13), there being besides a large number of unalled towns (5). Its chief cities were Ashtaroth (i. e. Beeshterah, comp. Josh. xxi. 27 with 1 Chr. vi. 71), Edrei, Golan, Saleah, and possibly Mahanaim (Josh. xiii. 30). Two of these cities, viz. Golan and Beeshterah, were allotted to the Levites of the family of Gershom, the former as a "city of refuge" (Josh. xxi. 27; 1 Chr. vi. 71).

The limits of Bashan are very strictly defined. It extended from the "border of Gilead" on the south to Mount Hermon on the north (Deut. iii. 3, 10, 14; Josh. xii. 5; 1 Chr. v. 23), and from the Arabah or Jordan valley on the west to Salchah (*Salchad*) and the border of the Geshurites, and the Manathites on the east (Josh. xii. 3-5; Deut. iii. 10). This important district was bestowed on the half tribe of Manasseh (Josh. xiii. 29-31), together with "half Gilead." After the Manassites had assisted their brethren in the conquest of the country west of the Jordan, they went to their tents and to their cattle in the possession which Moses had given them in Bashan (xii. 7, 8). It is just named in the list of Solomon's commissariat districts (1 K. iv. 13). And here, with the exception of one more passing glimpse, closes the history of Bashan as far as the Bible is concerned. It vanishes from our view until we meet with it as being devastated by Hazael in the reign of Jehu (2 K. x. 33). True the "oaks" of its forests and the wild cattle of its pastures—the "strong bulls of Bashan"—long retained their proverbial fame (Ezek. xxvii. 6; Ps. xvii. 12), and the beauty of its high downs and wide sweeping plains could not but strike now and then the heart of a poet (Am. iv. 1; Ps. lxxviii. 15; Jer. l. 19; Mic. vii. 14), but history it has none; its very name seems to have given place as quickly as possible to one which had a connexion with the story of the founder of the nation (Gen. xxxi. 47-8), and therefore more claim to use. Even so early as the time of the conquest, "Gilead" seems to have begun to take the first place as the designation of the country beyond the Jordan, a place which it retained afterwards to the exclusion of Bashan (comp. Josh. xii. 9, 15, 32; Judg. xx. 1; Ps. lx. 7, ciii. 8; 1 Chr. xxvii. 21; 2 K. xv. 29). Indeed "Bashan" is most frequently used as a mere accompaniment to the name of Og, when his overthrow is alluded to in the national poetry.

After the captivity, Bashan is mentioned as divided into four provinces—Gaulanitis, Auranitis, Trachonitis, and Batanea. Of these four, all but the third have retained almost perfectly their ancient names, the modern *Lejah* alone having superseded the Argob and Trachonitis of the Old and New Testaments. The province of *Jaulan* is the most western of the four; it abuts on the sea of Galilee and the lake of Merom, from the former of which it

risers to a plateau nearly 3000 feet above the surface of the water. This plateau, though now almost wholly uncultivated, is of a rich soil, and its N.W. portion rises into a range of hills almost everywhere clothed with oak forests (Porter, ii. 259). No less than 127 ruined villages are scattered over its surface. [GOLAN.]

The *Hauran* is to the S.E. of the last named province and S. of the *Lejah*; like *Jaulan*, its surface is perfectly flat, and its soil esteemed amongst the most fertile in Syria. It too contains an immense number of ruined towns, and also many inhabited villages. [HAURAN.]

The contrast which the rocky intricacies of the *Lejah* present to the rich and flat plains of the Hauran and the *Jaulan* has already been noticed. [ARGOB.]

The remaining district, though no doubt much smaller in extent than the ancient Bashan, still retains its name, modified by a change frequent in the Oriental languages. *Ari-el-Bathanyeh* lies on the east of the *Lejah* and the north of the range of *Jebel Hauran* or *ed Druze* (Porter, ii. 57). It is a mountainous district of the most picturesque character, abounding with forests of evergreen oak, and with soil extremely rich; the surface studded with towns of very remote antiquity, deserted it is true, but yet standing almost as perfect as the day they were built.

For the boundaries and characteristics of these provinces, and the most complete researches yet published into this interesting portion of Palestine, see Porter's *Damascus*, vol. ii. [G.]

BASHAN-HA'VOTH-JA'IR, a name given to Argob after its conquest by Jair (Deut. iii. 14).

BASH'EMATH, or DAS'MATH (בַּשְׁמַת, *fragrant*; *Basemath*). 1. Daughter of Ishmael, the last married of the three wives of Esau (Gen. xxvi. 3, 4, 13), from whose son, Reuel, four tribes of the Edomites were descended. When first mentioned she is called Mahalath (Gen. xxviii. 9); whilst, on the other hand, the name Bashemath is in the narrative (Gen. xxvi. 34) given to another of Esau's wives, the daughter of Elion the Hittite. It is remarkable that all Esau's wives receive different names in the genealogical table of the Edomites (Gen. xxxvi.) from those by which they have been previously mentioned in the history. The diversity will be best seen by placing the names side by side:—

GENEALOGY (Gen. xxvi. 2, 3).	NARRATIVE (Gen. xxvi. 34; xxviii. 9).
1. Adah, d. of Elion.	2. Bashemath, d. of Elion.
2. Aholibamah, d. of Anah.	1. Judith, d. of Beeri.
3. Bashemath, d. of Ishmael.	3. Mahalath, d. of Ishmael.

Whatever be the explanation of this diversity of names, there is every reason for supposing that they refer to the same persons respectively; and we may well conclude with Hengstenberg that the change of all the names cannot have arisen from accident; and further, that the names in the genealogical table, which is essentially an Edomitish document, are those which these women respectively bore as the wives of Esau (Hengstenberg, *Auth. d. Pent.* ii. 277, Eng. transl. ii. 226). This view is confirmed by the fact that the Seirite wife, who is called Judith in the narrative, appears in the genealogical account under the name of AHOLIBAMAH, a name which appears to have belonged to a district of Idumea (Gen. xxvi. 41). The only ground for hesitation

or suspicion of error in the text is the occurrence of this name Bashemath both in the narrative and the genealogy, though applied to different persons. The Samaritan text seeks to remove this difficulty by reading Mahalath instead of Bashemath in the genealogy. We might with more probability suppose that this name (Bashemath) has been assigned to the wrong person in one or other of the passages; but if so it is impossible to determine which is erroneous.

2. A daughter of Solomon and wife of one of his officers, called in A. V. **BASMATH** (1 K. iv. 15). [F. W. G.]

**BASIN.** 1. **בַּסִּין**; **φιδλη**; *phiale*; from **פָּרַץ**, to scatter (Ges. p. 434); often in A. V. *basin*. 2. **בִּסְתָּ**; *κρατήρ*; *crater*. 3. **בִּפְתָּר**; *crater*; in A. V. sometimes *cup*, from **כַּפֶּר**, *cover*, a cup with a lid. 4. **בִּסְתָּ**, wrongly in LXX. (Ex. xii. 22) *θύρα*, and in Vulg. *linen* (Ges. p. 965).

1. Between the various vessels bearing in the A. V. the names of basin, bowl, charger, cup and dish, it is scarcely possible now to ascertain the precise distinction, as very few, if any remains are known up to the present time to exist of Jewish earthen or metal ware, and as the same words are variously rendered in different places. We can only conjecture as to their form and material from the analogy of ancient Egyptian or Assyrian specimens of works of the same kind, and from modern Oriental vessels for culinary or domestic purposes. Among the smaller vessels for the Tabernacle or Temple-service, many must have been required to receive from the sacrificial victims the blood to be sprinkled for purification. Moses, on the occasion of the great ceremony of purification in the wilderness, put half the blood in "the basins" **בַּסִּיִּם**, or bowls, and afterwards sprinkled it on the people (Ex. xxiv. 6, 8, xxxix. 21; Lev. i. 5, ii. 15, iii. 2, 8, 13, iv. 5, 34, viii. 23, 24, xiv. 14, 25, xvi. 15, 19; Heb. ix. 19). Among the vessels cast in metal, whether gold, silver, or brass, by Hiram for Solomon, besides the laver and great sea, mention is made of basins, bowls, and cups. Of the first (**בַּסִּיִּם**, marg. *bowls*) he is said to have made 100 (2 Chr. iv. 8; 1 K. vii. 45, 46. Cf. Ex. xxv. 29 and 1 Chr. xxviii. 14, 17). Josephus, probably with great exaggeration, reckons of **φιδλαι** and **σπονδία**, 20,000 in gold and 40,000 in silver, besides an equal number in each metal of **κρατήρες**, for the offerings of flour mixed with oil (Ant. viii. 3 §§7, 8. Comp. Birch, *Hist. of Pottery*, i. 152).

2. The "basin" from which our Lord washed the disciples' feet, **νιπτήρ**, was probably deeper and larger than the hand-basin for sprinkling, **בִּסְתָּ** (Jer. lii. 18), which, in A. V. "caldrons," Vulg. *lobetes*, is by the Syr. rendered *basin* for washing the feet (John xiii. 5). (Schleusner, Drusus.) [WASHING OF FEET AND HANDS.] [H. W. P.]

**BASKET.** The Hebrew terms used in the description of this article are as follows: (1) **סַל**, so called from the *twigs* of which it was originally made, specially used as the Greek *κανόνη* (Hom. *Od.* iii. 442), and the Latin *canistrum* (Virg. *Æn.* i. 701) for holding bread (Gen. xl. 16 ff.; Ex. xxix. 3, 23; Lev. viii. 2, 26, 31; Num. vi. 15, 17, 19). The form of the Egyptian bread-basket is delineated in Wilkinson's *Anc. Egypt.* iii. 226,

after the specimens represented in the tomb of Rameses III. These were made of gold (comp. Hom. *Od.* x. 355), and we must assume that the term *sal* passed from its strict etymological meaning to any vessel applied to the purpose. In Judg. vi. 19, meat is served up in a *sal*, which could hardly have been of wickerwork. The expression **סַלֵּי חֵרִי**

(Gen. xl. 16) is sometimes referred to the material of which the baskets were made (*κανὰ βαϊνά* Symm.), or the white colour of the peeled sticks, or lastly to their being "full of holes" (A. V. margin), i. e. *open work* baskets. (2) **סַלְמִלֹחַת**,

Egyptian Baskets. (From Wilkinson.)

a word of kindred origin, applied to the basket used in gathering grapes (Jer. vi. 9). (3) **סַלְמִלֹחַת**, in which the first-fruits of the harvest were presented (Deut. xvi. 2, 4). From its being coupled with the kneading-bowl (A. V. "store"; Deut. xxviii. 5, 17), we may infer that it was also used for household purposes, perhaps to bring the corn to the mill. The equivalent term in the LXX. for this and the preceding Hebrew words is **κάρταλλος**, which specifically means a basket that tapers downwards (*κόφινος ὅξως τὰ κάτω*, Suid.), similar to the Roman *corbis*. This shape of basket appears to have been familiar to the Egyptians (Wilkinson, ii. 401). (4) **בִּלְבֵּב**, so called from its similarity

Egyptian Baskets. (From Wilkinson.)

to a birdcage or trap (**κάρταλλος** is used in the latter sense in Eccles. xi. 30), probably in regard to its having a lid: it was used for carrying fruit (A. V. viii. 1, 2); the LXX. gives **ἄγγος**; Symm. more correctly **κάλαθος**; the Vulg. *umcinus*. (5) **בִּלְבֵּב**, used like the Greek **κάλαθος** (LXX.) for carrying fruit (Jer. xxiv. 1, 2), as well as for a larger scone for carrying clay to the brickyard (Is. lxxxi. 6; *κόφινος*, LXX.; *pots*, A. V.), or for holding bulky articles (2 K. x. 7; **κάρταλλος**, LXX.): the shape of this basket and the mode of carrying it usual among the brickmakers in Egypt is delineated in Wilkinson, ii. 99, and aptly illustrates Is. lxxvi. 6.

The name Sallai (Neh. xi. 8, xii. 20) seems to indicate that the manufacture of baskets was a recognised trade among the Hebrews.

In the N.T. baskets are described under the three following terms, *κόφινος*, *στυρίς*, and *σαργύνη*. The last occurs only in 2 Cor. xi. 33, in describing St. Paul's escape from Damascus: the word properly refers to anything twisted like a rope (Aesch. *Suppl.* 791) or any article woven of rope (*πλέγμα τι ἐκ σχοινοῦ*, Suid.); fish-baskets specially were so made (*ἀπὸ σχοινοῦ πλεγμάτων εἰς ὑποδοχὴν ἰχθύων*, Etym. Mag.). With regard to *κόφινος* is exclusively used in the description of the miracle of feeding the five thousand (Matt. xiv. 20, xvi. 9; Mark vi. 43; Luke ix. 17; John vi. 13), and *στυρίς* in that of the four thousand (Matt. xv. 37; Mark viii. 8), the distinction is most definitely brought out in Mark vii. 19, 20. The *στυρίς* is also mentioned as the means of St. Paul's escape (Acts ix. 25). The difference between these two kinds of baskets is not very apparent. Their construction appears to have been the same; for *κόφινος* is explained by Suidas as *ἀγγεῖον πλεκτόν*, while *στυρίς* is generally connected with *στειρά*. The *στυρίς* (*sporta*, Vulg.) seems to have been most appropriately used of the provision basket, the Roman *sportula*. Hesychius explains it as *τὸ τῶν πυρῶν ἄγγος*; compare also the expression *δείπνον ἀπὸ στυρίδος* (Athen. viii. 17). The *κόφινος* seems to have been generally larger. According to Etym. Mag. it is *βαθὺ καὶ κοίλον χώραμα*; as used by the Romans (Colum. xi. 3, p. 460) it contained manure enough to make a portable hotbed [*Dict. of Ant.* COPHINUS]; in Rome itself it was constantly carried about by the Jews (*quorum cophinus foenumque suppellex*, Juv. iii. 14, vi. 542). Greswell (*Diss.* viii. pt. 4) surmises that the use of the *cophinus* was to sleep in, but there is little to support this. [W. L. B.]

**BAS'MATH** (בַּסְמַת; ἡ Βασεμμάθ; *Basemath*), a daughter of Solomon, married to Ahimanz, one of his commissariat officers (1 K. iv. 15). [BASHEMATH.]

**BAS'SA** (*Basas*; Alex. *Βάσσα*; Vulg. not recognisable), 1 Esd. v. 16. [BEZAL.]

**BA'STAI** (*Basath*; *Hasten*), 1 Esd. v. 31. [BFSAL.]

**BAT** (בַּת; *hátalléph*), an animal included by the Mosaic law among unclean things which may not be eaten (Deut. xiv. 18, 19, and Lev. xi. 19, 20). It is accurately described in the latter passage as a fowl that creeps, going upon all-fours, for the bat has claws on its pinions by which it attaches itself to the surface of its dwelling-place, and creeps along it. It is mentioned in Is. ii. 20. Bats are very common in the East. Layard (*Nineveh and Babylon*, p. 307) describes his visit to a cavern on the banks of the Khabor, swarming with bats. "Flying towards the light," he adds, "these noisome beasts compelled us to retreat. They clung to our clothes, and our hands could scarcely prevent them settling on our faces. The rustling of their wings was like the noise of a great wind, and an abominable stench arose from the recesses of the cave."

The derivation of בַּת is of itself conclusive as to its meaning, being from: עָלָה = *caligi-*

*nosa fuit nox*, and בַּת רַבִּי *volans*; just as we have the Gk. *νύκτερις* from *νύξ*, and the Latin *Vespertilio* from *vesper*. Gesenius points out a similar derivation in Persian. *Comp. Or. Met.* iv. 415:—

Nocte volant, seroque trahunt a vespere noem."

In the three passages above referred to the LXX. have *νύκτερις*. [W. D.]

**BATH, BATHING.** This was a prescribed part of the Jewish ritual of purification in cases of accidental, leprous, or ordinary uncleanness (Lev. xv. *pass.*, xvi. 28, xxii. 6; Num. xix. 7, 19; 2 Sam. xi. 2, 4; 2 K. v. 10); as also after incurring which always implied defilement, e. g. Ruth iii. 3; 2 Sam. xii. 20. The high-priest at his inauguration (Lev. xiii. 6) and on the day of atonement, once before each solemn act of propitiation (xvi. 4, 24), was also to bathe. The rabbis have multiplied into ten times on that day. Maimon. (*Constit. de Vasis Sanct.* v. 3) gives rules for the strict privacy of the high-priest in bathing. There were bath-rooms in the later Temple over the chambers *Abtines* and *Hippararai* for the priests' use (Lightfoot, *Descr. of Temp.* 24). A bathing-chamber was probably included in houses even of no great rank in cities from early times (2 Sam. xi. 2); much more in those of the wealthy in later times; often in gardens (Susan. 15). With this, anointing was customarily joined; the climate making both these essential alike to health and pleasure, to which luxury added the use of perfumes (Susan. 17; Jud. x. 3; Esth. ii. 12). The "pools," such as that of Siloam, and Hezekiah's (Neh. iii. 15, 16; 2 K. xx. 20; Is. xxvii. 11; John ix. 7), often sheltered by porticoes (John v. 2), are the first indications we have of public bathing accommodation. Ever since the time of Jason (Prideaux, ii. 168) the Greek usages of the bath probably prevailed, and an allusion in Josephus (*Λουόμενος στρατιωτικώτερον*, B. J. i. 17, §7) seems to imply the use of the bath (hence, no doubt, a public one, as in Rome), by legionary soldiers. We read also of a castle luxuriously provided with a volume of water in its court, and of a Herodian palace with spacious pools adjoining, in which the guests continued swimming, &c. in very hot weather from noon till dark (Joseph. *Ant.* xii. 4, §11, xv. 3, §3). The hot baths of Tiberias, or more strictly of Emmaus (Euseb. *Onomast.* Αἰθρά, query Αἰμάθ? Bonferrius) near it, and of Callirhoe, near the Eastern shore of the Dead Sea, were much resorted to. (Ireland, i. 46; Joseph. *Ant.* xviii. 2, xvii. 6, §5, B. J. i. 33, §5; Amm. Marcell. xiv. 8; Stanley, 375, 295.) The parallel customs of ancient Egypt, Greece, and Rome, are too well known to need special allusion. (See *Dict. of Gr. and Rom. Ant.* art. *Balneus*.) [H. H.]

**BATH.** [MEASURES.]

**BATH-RAB'BIM**, THE GATE OF (בַּת רַבִּי), one of the gates of the ancient city of Heshbon, by (עַל) which were two "pools," where-to Solomon likens the eyes of his beloved (Cant. vii. 4 [5]). The "Gate of Bathrabbim" at Heshbon would, according to the Oriental custom, be the gate pointing to a town of that name. The only place in this neighbourhood at all resembling Bath-

\* The "fishpools" of the A. V. is from *piscinas* of the Vulg. The Hebrew word Boreach is simply a pool or tank.

rabbim in sound is Rabbah (*Ammán*), but the one tank of which we gain any intelligence as remaining at *Heshbān*, is on the opposite (S.) side of the town to *Ammán* (Porter, *Handbook*, 298). Future investigations may settle this point. The LXX. and Vulg. translate: *ἐν πύλαις θυγατρὸς πολλῶν; in porta filiae multitudinis*. [G.]

**BATH'SHEBA** (בַּת־שֶׁבַע, 2 Sam. xi. 3, &c.;

also called Bathshua, בַּת־שׁוּא, in 1 Chr. iii. 5; *Βηρσαβέ*; Joseph. *Βεθσαβή*; i. e. *daughter of an oath*, or, *daughter of senen, so. years*, the daughter of Elian (2 Sam. xi. 3), or Amiel (1 Chr. iii. 5), the son of Ahithophel (2 Sam. xxiii. 34), the wife of Uriah the Hittite. It is probable that the enmity of Ahithophel towards David was increased, if not caused, by the dishonour brought by him upon his family in the person of Bathsheba. The child which was the fruit of her adulterous intercourse with David died: but after marriage she became the mother of four sons, Solomon (Matt. i. 6), Shimea, Shobab, and Nathan. When, in David's old age, Adonijah, an elder son by Haggith, attempted to set aside in his own favour the succession promised to Solomon, Bathsheba was employed by Nathan to inform the king of the conspiracy (1 K. i. 11, 15, 23). After the accession of Solomon, she, as queen-mother, requested permission of her son for Adonijah to take in marriage Abishag the Shunamite. This permission was refused, and became the occasion of the execution of Adonijah (1 K. i. 24, 25). [DAVID.] Bathsheba was said by Jewish tradition to have composed and recited Prov. xxxi. by way of atonement or reproof to her son Solomon, on his marriage with Pharaoh's daughter. Calmet, *Dict. s. v.*; Corn. : Lapid, on *Prov.* xxxi. [H. W. P.]

**BATH-SHUA** (בַּת־שׁוּא; Vat. and Alex

ή *Βηρσαβέ*; *Bethsabbe*), a variation of the name of Bathsheba, mother of Solomon, occurring only in 1 Chr. iii. 5. It is perhaps worth notice that Shua was a Canaanite name (comp. 1 Chr. ii. 3, and Gen. xxviii. 2, 12—where "Bath-shua" is really the name of Judah's wife), while Bathsheba's original husband was a Hittite.

**BATH-ZACHARI'AS** (בֵּית זַכְרְיָה; quasi

*Βαθ(α)χαρία*; Alex. and Joseph. *Βεθ(α)χαρία* *Bethzacharia*), a place, named only 1 Mac. vi. 32, 33, to which Judas Maccabaeus marched from Jerusalem, and where he encamped for the relief of Bethsura (Bethzur) when the latter was besieged by Antiochus Eupator. The two places were seventy stadia apart (Joseph. *Ant.* xii. 9, §4), and the approaches to Bathzacharia were intricate and confined—*στενῆς ὁδοῦ τῆς παρόδου* (Joseph. *R. J.* i. i. §5, and comp. the passage cited above from which it is evident that Josephus knew the spot). This description is met in every respect by the modern *Beit Sukârich*, which has been discovered by Robinson at nine miles north of *Beit sir* "on an almost isolated promontory or tell, jutting out between two deep valleys, and connected with the high ground south by a low neck between the heads of the valleys, the neck forming the only place of access to what must have been an almost impregnable position" (Rob. iii. 283, 284). The place lies in the entangled country west of th. Hebron road between four and five miles south of Bethlehem. [BETHZUR.] [G.]

**BAV'AI** (בָּבַי; *Bevet*; *Bavai*), son of Heundal, nler (שֹׁרֶר) of the "district" (פְּקֻדָּה) of Keilah in the time of Nehemiah (Neh. iii. 18).

**BAY-TREE**. The Heb. *Ezrâch* (עֶזְרָח) occurs only once in the Bible, in Ps. xxxvii. 35, where the A. V. renders it bay-tree, and in the margin "a tree that groweth in his own soil." In this passage the LXX. have *ὡς τὰς κέδρους τοῦ Λιβάνου*. Gesenius renders it *arbor indigena*, and derives it from the root עֶזַח, *ortus est sol, procrevit, progeminavit*, the form עֶזַח being equivalent to עֶזַח, with N prosthetic. There is no authority for assigning the name to any particular tree, though many commentators suppose the laurel to be meant. The *κέδρου* of the LXX. arose from confounding *עֶזַח* with *עֶזְרָה*. [W. D.]

**BAZ'LITH** (בְּצִלִּית), "Children of B." were amongst the Nethinim who returned with Zerubabel (Neh. vii. 54). In Ezr. ii. 52, the name is given as *BAZLUTH* (בְּצִלּוּת). LXX. in both *Βασαλώθ*; *Besluth*. [BASALOTH.]

**BDELLIUM**, the translation of the Heb. *bedolach* (בְּדֹלַח), which occurs only twice in the Scriptures. It is mentioned in Gen. ii. 12 as one of the productions of the land of Havilah, and in Num. xi. 7, where the colour of the manna is said to be as the colour of *bedellium*, while in Exod. xvi. 14 the manna is likened to the hoar-frost on the ground. The LXX. render it by *ἄνθραξ* in Gen. and by *πρόσταλλον* in Num. They therefore took it to be a precious stone; in which they are followed by Island, who supposes it to be a *crystal*, and by Wahl and Hartmann, who render it *beryl*, and would read *בְּרִלָה* for *בְּדֹלַח*. Others have taken it to be *Bdelium*, a

vegetable product exuding from a tree growing in Arabia, India, and Babylonia, whitish in colour, resinous, pellucid, and approaching to the colour of frankincense. Dioscorides describes it (i. 70, al. 80), and after him Pliny (xii. 9, §19). See also Joseph. *Ant.* iii. 1, §6; Celsus, *Hierob.* i. 324; and Clericus, *ad Gen.* ii. 12. Gesenius objects to both these explanations. It cannot be a precious stone, he argues, because in Gen. ii. 12 *אֲבָן* is prefixed to *שֹׁהַם*, not to *בְּדֹלַח*. It is not a gum, because that would not be of sufficient value to rank with the gold and precious stones of the land of Havilah. He adopts therefore the theory of Bochart (*Hieroz.* ii. 674-83, iii. 592, Lips.) that *בְּדֹלַח* signifies *pearls*, which are found in great abundance on the shores of the Persian Gulf. In this case *בְּדֹלַח* is a quadriliteral from *בָּדַל*, with a guttural added, and signifies *margarita selecta et eximia*. It is most probable that *bedolach* is a precious stone. [W. D.]

**BEAL'AI** (בְּעֵלְאִי), remarkable as containing the names of both Beal and Jah; *Baalaid*; *Baulia*), a Benjamite, who went over to David at Ziklag (1 Chr. xii. 5).

**BE'ALOTH** (בְּעֵלּוֹת, the plur. fem. form of *Baal*; *Balmainân*; Alex. *Balâth*; *Buloth*), a town in the extreme south of Judah (Josh. xv. 24).

**BEAN**, CHILDREN OF (*בְּנֵי בִדְוֹן*; Joseph. *Βοι τοῦ Βιδών*; *filii Bean*), a tribe, apparently of predatory Bedouin habits, retreating into "towers" (*πύργους*) when not plundering, and who were destroyed by Judas Macabæus (1 Mac. v. 4). The name has been supposed to be identical with BEON; but in the absence of more information this must remain mere conjecture, especially as it is very difficult to tell from the context whether the residence of this people was on the east or west of Jordan. [G.]

**BEANS** (*בִּיב*; *Pál*), mentioned in 2 Sam. xvii. 28 among the provisions brought for David and for the people to Mahanaim, and in Ez. iv. 9 as one of the ingredients of the bread which the prophet should eat for 390 days. The LXX. in both places have *κναυός*. *בִּיב* is from the root *בָּב*, which, according to Gesenius, signifies *voleendo acquirere et complanare*, though, according to others, *findere, secare*. In the former case we have allusion to the rounded form of the bean—in the latter to its mode of germination. The monuments of Egypt show that the bean was cultivated in that country at an early date; and in spite of the contrary statement of Herodotus, it was probably an article of food with the lower classes. Beans with rice and dourra bread are chief articles of food to this day among the Fellahs. They eat horse-beans steeped in oil. [W. D.]

**BEAR** (*בֶּרֶךְ* and *בֶּרֶךְ*; *ἄρκτος*; *ursa*), an animal frequently mentioned in Scripture. The ferocity of the she-bear when deprived of her cubs is alluded to in 2 Sam. xvii. 8; Prov. xvii. 12; and Hos. xiii. 8—its attacking flocks in 1 Sam. xvii. 34, 36, 37—its hostility to cattle is implied in Is. xi. 7—its roaring in Is. lix. 11—its habit of ranging far and wide for food in Prov. xviii. 15—its lying in wait for its prey in Lam. iii. 10; and from 2 K. ii. 24 we may infer that it would attack men, and from Am. v. 19 that it was as much to be dreaded as the lion. The second beast of Daniel's vision "was like to a bear, and it raised up itself on one side, and it had three ribs in the mouth of it between the teeth of it: and they said thus unto it, Arise, devour much flesh." The *בֶּרֶךְ* was therefore a carnivorous animal. The bear in Rev. xiii. 2 had the feet of a bear. It is also mentioned in Wisd. xi. 17, and Eccles. xlvii. 3. The LXX. translate it by *ἄρκτος*. Gesenius derives *בֶּרֶךְ* from *בָּרַךְ*, *repsit, rependo incessit*; but Bochart (*Hieroz.* i. 806) says it was so called because it is an hairy animal, comparing *دب*,

*parros pilos habuit in facie*. The variety of the Asiatic bear which inhabits the Himalayas is especially ferocious, and it is probable that the same species among the mountains of Armenia is the animal of Scripture. [W. D.]

**BEARD** (*בֶּרֶךְ*; *πώγων*; *barba*). Western Asiatics have always cherished the beard as the badge of the dignity of manhood, and attached to it the importance of a feature. The Egyptians on the contrary, sedulously, for the most part, shaved the hair of the face and head, and compelled their slaves to do the like. Herodotus (i. 36) mentions it as a peculiarity of the Egyptians, that they let the beard grow in mourning, being at all other times shaved. Hence Joseph, when released

from prison, "shaved his beard" to appear before Pharaoh (Gen. xli. 14). It was, however, the practice among the Egyptians to wear a false beard,

Beards. Egyptian, from Wilkinson (top row). Of other nations from Rosellini and Layard (bottom row).

made of plaited hair, and of a different form according to the rank of the persons, private individuals being represented with a small beard, scarcely two inches long, kings with one of considerable length, square at the bottom, and gods with one turning up at the end (Wilkinson, *An. Egypt.* suppl. plate 77, part 2). The enemies of the Egyptians, including probably many of the nations of (Canaan, Syria, and Armenia, &c.), are represented nearly always bearded. On the tomb of Beni Hassan is represented a train of foreigners with asses and cattle, who all have short beards, as have also groups of various nations on another monument.

Egyptians of low caste or mean condition are represented sometimes, in the spirit of caricature, apparently with beards of slovenly growth (Wilkinson, ii. 127). In the Ninevite monuments is a series of battle-views from the capture of Lachish by Sennacherib, in which the captives have beards very like some of those in the Egyptian monuments.

There is, however, an appearance of conventionalism both in Egyptian and Assyrian treatment of the hair and beard on monuments, which prevents our accepting it as characteristic. Nor is it possible to decide with certainty the meaning of the precept (Lev. xix. 27, xxi. 5) regarding the "corners of the beard." It seems to imply something in which the cut of a Jewish beard had a ceremonial difference from that of other western Asiatics; and on comparing Herod. iii. 8 with Jer. ix. 26, xxv. 23, xlix. 32, it is likely that the Jews retained the hair on the sides of the face between the ear and eye (*κρόταφοι*), which the Arabs and others shaved away. Size and fullness of beard are said to be regarded, at the present day, as a mark of respectability and trustworthiness. The beard is the object of an oath, and that on which blessings or shame are spoken of as resting (D'Arvieux, *Moeurs et Coutumes des Arabes*). The custom was and is to shave or pluck it and the hair out in mourning (Is. i. 6, xv. 2; Jer. xli. 5, xlviii. 37; Ezr. ix. 3; Bar. vi. 31); to neglect it in seasons of permanent affliction (2 Sam. xix. 24), and to regard any insult to it as the last outrage which enmity can inflict. Thus David resented the treatment of his ambassadors by Hanun (2 Sam. x. 4); so the people of God are figuratively spoken of as "beard" or "hair" which he will shave with "the razor, the king of Assyria" (Is. vii. 20). The beard was the object of salutation, and under this show of friendly reverence Joab beguiled Amasa (2 Sam. xix. 9). The dressing, trimming, anointing, &c. of the

beard, was performed with much ceremony by persons of wealth and rank (Ps. cxxxiii. 2). The removal of the beard was a part of the ceremonial treatment proper to a leper (Lev. xiv. 9). There is no evidence that the Jews compelled their slaves to wear beards otherwise than they wore their own; although the Romans, when they adopted the fashion of shaving, compelled their slaves to cherish their hair and beard, and let them shave when manumitted (Liv. xxxiv. 52, xlv. 44). [II. H.]

BE'BAI (בְּבַי; *Baṣat*, *Bḡḡl*, *Bḡṣat*; *Bebai*).

1. "Sons of Bebai," 623 (Neh. 628) in number, returned from Babylon with Zerubbabel (Ezr. ii. 11; Neh. vii. 16; 1 Esd. v. 13), and at a later period twenty-eight more, under Zechariah the son of Bebai, returned with Ezra (Ezr. viii. 11). Four of this family had taken foreign wives (Ezr. x. 28; 1 Esd. ix. 29). The name occurs also among those who sealed the covenant (Neh. x. 15). [PAB.]

2. Father of Zechariah, who was the leader of the twenty-eight men of his tribe mentioned above (Ezr. viii. 11). *Baḡl*.

BE'DAI (Alex. *Bḡḡal*; Vat. omits; Vulg. omits), a place named only in Jud. xv. 4. It is possibly a mere repetition of the name Chobai occurring next to it.

BECHER (בְּכָר; *Boḡḡr*; *Bechor*: *first-born*, but according to Gesen. a *young camel*, which Simonis also hints at, *Onom.* p. 399).

1. The second son of Benjamin, according to the list both in Gen. xlv. 21, and 1 Chr. vii. 6; but omitted in the list of the sons of Benjamin in 1 Chr. vii. 1, as the text now stands. No one, however, can look at the Hebrew text of 1 Chr. viii. 1, בְּנֵימִן הוֹלִיד אֶת-בְּלַע בְּכוֹרוֹ אֲשֶׁבֶל, without at least suspecting that בְּכוֹרוֹ, *his first-born*, is a corruption of בְּכָר, *Becher*, and that the suffix י is a corruption of י, and belongs to the following אֲשֶׁבֶל, so that the genuine sense in that case would be, *Benjamin begat Bela, Becher, and Ashbel*, in exact agreement with Gen. xlv. 21. The enumeration, the second, the third, &c., must then have been added since the corruption of the text. There is, however, another view which may be taken, viz., that 1 Chr. viii. 1 is right, and that in Gen. xlv. 21, and 1 Chr. vii. 8, בְּכָר, as a proper name, is a corruption of בְּכָר, *first-born*, and so that Benjamin had no son of the name of Becher. In favour of this view it may be said that the position of Becher, immediately following Bela the first-born in both passages, is just the position it would be in if it meant "first-born;" that *Becher* is a singular name to give to a second son; and that the discrepancy between Gen. xlv. 21, where *Ashbel* is the third son, and 1 Chr. viii. 1, where he is expressly called the *second*, and the omission of *Ashbel* in 1 Chr. vii. 6, would all be accounted for on the supposition of בְּכָר having been accidentally taken for a proper name, instead of in the sense of "first-born." It may be added further that in 1 Chr. viii. 38, the same confusion has arisen in the case

of the sons of Azel, of whom the second is in the A. V. called *Bocheru*, in Hebrew בְּכָרִי, but which in the LXX. is rendered *πρωτότοκος αὐτοῦ*, and another name, Ἀσά, added to make up the six sons of Azel. And that the LXX. are right in their rendering is made highly probable by the very same form being repeated in ver. 39, "and the sons of Eshek his brother were Ulum his first-born, בְּכָרִי, *Jelush the second*," &c. The support too

which *Becher* as a proper name derives from the occurrence of the same name in Num. xxvi. 35, is somewhat weakened by the fact that Beral (*Baḡḡḡl*, LXX.) is substituted for *Becher* in 1 Chr. vii. 20, and that it is omitted altogether in the LXX. version of Num. xxvi. 35. Moreover, which is perhaps the strongest argument of all, in the enumeration of the Benjamite families in Num. xxvi. 38, there is no mention of *Becher* or the *Bachrites*, but *Ashbel* and the *Ashbelites* immediately follow *Bela* and the *Belaïtes*. Notwithstanding, however, all this, the first supposition was, it can scarcely be doubted, substantially the true one. *Becher* was one of Benjamin's three sons, *Bela*, *Becher*, *Ashbel*, and came down to Egypt with Jacob, being one of the fourteen descendants of Rachel who settled in Egypt, viz. Joseph and his two sons *Manasseh* and *Ephraim*, Benjamin and his three sons above named, *Gera*, *Naaman*, *Ehi* (אֶחִי, alius אֶחִירָם, *Ahiram*, Num. xxvi. 38, and אֶחָרָה, *Aharah*, 1 Chr. viii. 1, and perhaps אֶחָרִי and אֶחִירָה, ver. 4 and 7), and *Ard* (אֶרֶד, but in 1 Chr. viii. 3, אֶדָר, *Addar*, the sons of *Bela*, *Muppim* (otherwise *Shuppim*, and *Shephuphan*, 1 Chr. vii. 12, 15, viii. 5; but *Shupham*, Num. xxvi. 39) and *Huppim* (*Hurum*, 1 Chr. viii. 5, but *Hupham* Num. xxvi. 39), apparently the sons of *Ahiram* or *Ehi* (*Aher*, 1 Chr. vii. 12), and *Iosh*, of whom we can give no account, as there is no name the least like it in the parallel passages, unless perchance it be for *Jonah* (יֹנָתַן), a son of *Becher*, 1 Chr. vii. 8.<sup>a</sup> And so, it is worthy of observation, the LXX. render the passage, only that they make *Ard* the son of *Gera*, great-grandson therefore to Benjamin, and make all the others sons of *Bela*. As regards the posterity of *Becher*, we have already noticed the singular fact of there being no family named after him at the numbering of the Israelites in the plains of Moab, as related in Num. xxvi. But the no less singular circumstance of there being a *Becher*, and a family of *Buchrites*, among the sons of *Ephraim* (ver. 35), seems to supply the true explanation. The slaughter of the sons of *Ephraim* by the men of *Gath*, who came to steal their cattle out of the land of *Goshen*, in that border army related in 1 Chr. vii. 21, had sadly thinned the house of *Ephraim* of its males. The daughters of *Ephraim* must therefore have sought husbands in other tribes, and in many cases must have been heireses. It is therefore highly probable that *Becher*,<sup>b</sup> or his heir and head of his house, married an *Ephraimitish* heiress, a daughter of *Shuthelah* (1 Chr. vii. 20, 21), and so that his house was reckoned in the tribe of *Ephraim*, just as *Jair*, the son of *Segub*, was reckoned in the tribe of *Manasseh* (1 Chr. ii. 22; Num. xxxii. 40, 41). The

<sup>a</sup> We are more inclined to think it is a corruption of אֶרֶד, or אֶדָר, and belongs to the preceding אֶחִי, *Ehi*, as *Ahiram* is certainly the right name, as appears by Num. xxvi. 38.

<sup>b</sup> This view suggests the possibility of *Becher* being really the first-born of Benjamin, but having forfeited his birthright for the sake of the *Ephraimitish* inheritance.

time when Becher first appears among the Ephraimites, viz., just before the entering into the promised land, when the people were numbered by genealogies for the express purpose of dividing the inheritance equitably among the tribes, is evidently highly favourable to this view. (See Num. xxvi. 52-56, xxvii.) The junior branches of Becher's family would of course continue in the tribe of Benjamin. Their names, as given in 1 Chr. vii. 8, were Zemira, Joush, Eliezer, Elioenai, Omri, Jerimoth, and Abiah; other branches possessed the fields round Anathoth and Alameth, called Alemeth vi. 60, and Almon Josh. xxi. 18. Which of the above were Becher's own sons, and which were grandsons, or more remote descendants, is perhaps impossible to determine. But the most important of them, as being ancestor to king Saul, and his great captain Abner (2 Sam. iii. 38), the last named Abiah, was it seems literally Becher's son. The generations appear to have been as follows: Becher—Abihū (Aphiah, 1 Sam. ix. 1)—Bechorath—Zeror—Abiel (Jehiel, 1 Chr. ix. 35)—Ner—Kish—Saul. Abner was another son of Ner, brother therefore to Kish, and uncle to Saul. Abiel or Jehiel seems to have been the first of his house who settled at Gibeon or Gibeah (1 Chr. viii. 29, ix. 35), which perhaps he acquired by his marriage with Maachah, and which became thenceforth the seat of his family, and was called afterwards Gibeah of Saul (1 Sam. xi. 4; Is. x. 29). From 1 Chr. vii. 6 it would seem that before this, Gibeon, or Geba, had been possessed by the sons of Ehud (called Abihud ver. 3) and other sons of Bela. But the text appears to be very corrupt.

Another remarkable descendant of Becher was Sheba the son of Bichri, a Benjamite, who headed the formidable rebellion against David described in 2 Sam. xx.; and another, probably, Shimei the son of Gera of Bahurim, who cursed David as he fled from Absalom (2 Sam. xvi. 5), since he is said to be "a man of the family of the house of Saul." But if so, Gera must be a different person from the Gera of Gen. xlii. 21 and 1 Chr. viii. 3. Perhaps therefore מְשִׁימָה is used in the wider sense of tribe, as Josh. vii. 17, and so the passage may only mean that Shimei was a Benjamite. In this case he would be a descendant of Bela.

From what has been said above it will be seen how important it is, with a view of reconciling apparent discrepancies, to bear in mind the different times when different passages were written, as well as the principle of the genealogical divisions of the families. Thus in the case before us we have the tribe of Benjamin described (1) as it was about the time when Jacob went down into Egypt; (2) as it was just before the entrance into Canaan; (3) as it was in the days of David; and (4) as it was eleven generations after Jonathan and David, i. e. in Hezekiah's reign. It is obvious how in these later times many new heads of houses, called sons of Benjamin, would have sprung up, while older ones, by failure of lines, or translation into other tribes, would have disappeared. Even the non-appearance of Becher in 1 Chr. viii. 1 may be accounted for on this principle, without the necessity for altering the text.

2. Son of Ephraim, Num. xxvi. 35, called Bereb 1 Chr. vii. 20. Same as the preceding. [A. C. H.]

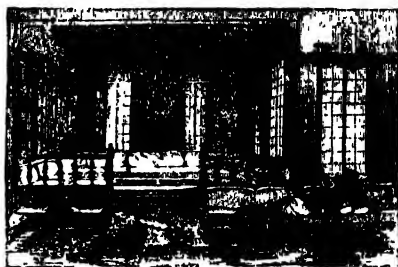

\* It is possible that Bechorath may be the same person as Becher, and that the order has been accidentally inverted.

† Comp. 1 Chr. vii. 14, viii. 5, 8, 29, ix. 35.

BECHO'RATH (בְּכוֹרֶת; Vat. Βαχίρ; Alex. Βεχωράθ; Bechorath), son of Aphiah, or Abiah, and grandson of Becher, according to 1 Sam. ix. 1, 1 Chr. vii. 8. [BECHER.] [A. C. H.]

BECTILETH, THE PLAIN OF (τὸ πεδῖον Βακταίλθ; Alex. Βεκτελέθ; Syr. ܒܕܬܝܠܬܐ) = house of slaughter, mentioned in Jud. ii. 21, as lying between Nineveh and Cilicia. The name has been compared with Βακταίαλλα, a town of Syria named by Ptolemy; Bactiali in the Peutinger Tables, which place it 21 miles from Antioch. The most important plain in this direction is the Bekaa, or valley lying between the two chains of Lebanon. And it is possible that Bectileth is a corruption of that well-known name: if indeed it be a historical word at all. [G.]

BED AND BED-CHAMBER. We may distinguish in the Jewish bed five principal parts:—1. the substratum; 2. the covering; 3. the pillow; 4. the bedstead or analogous support for 1., 5. the ornamental portions.

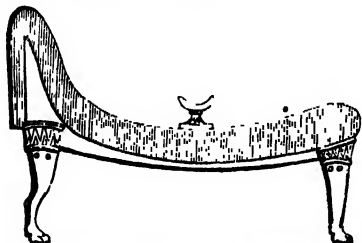

Bed. (From Fellows, A. C. H. Memoir.)

1. This substantive portion of the bed was limited to a mere mat, or one or more quilts. 2. A quilt tinner than those used in 1. In summer a thin blanket or the outer garment worn by day (1 Sam. xix. 13) sufficed. This latter, in the case of a poor person, often formed both 1. and 2. and that without a bedstead. Hence the law provided that it should not be kept in pledge after sunset, that the poor man might not lack his needful covering (Deut. xxiv. 13). 3. The only material mentioned, for this is that which occurs 1 Sam. xix. 13, and the word used is of doubtful meaning, but seems to signify some fabric woven or plaited of goat's-hair. It is clear, however, that it was something hastily adopted to serve as a pillow, and is not decisive of the ordinary use. In Ez. xiii. 18, occurs the word Πῶς (προσκεφάλαιον, LXX.), which seems to be the proper term. Such pillows are common to this day in the East, formed of sheep's fleece or goat's-skin, with a stuffing of cotton, &c. We read of a "pillow," also, in the boat in which our Lord lay asleep (Mark iv. 38) as he crossed the lake. The block of stone such as Jacob used, covered perhaps with a garment, was not unusual among the poorer folk, shepherds, &c.

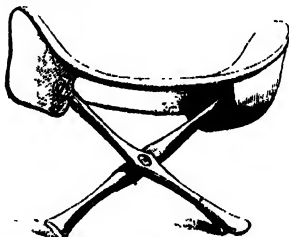

4. The bedstead was not always necessary, the divan, or platform along the side or end of an Oriental room, sufficing as a support for the bedding. (See preceding cut.) Yet some slight and portable frame seems implied among the senses of the word מַטָּה, which is used for a "bier" (2 Sam. iii. 31), and for the ordinary bed (2 K. iv. 10), for

the litter on which a sick person might be carried (1 Sam. xix. 15), for Jacob's bed of sickness (Gen. xlvii. 31), and for the couch on which guests reclined at a banquet (Esth. i. 6). Thus it seems the comprehensive and generic term. The proper word for a bedstead appears to be **נִרְשָׁה**, used Deut. iii. 11, to describe that on which lay the giant Og, whose vast bulk and weight required one of iron.

Bed and Head-rest. (Wilkinson, *Ancient Egyptians*.)

5. The ornamental portions, and those which luxury added, were pillars and a canopy (Jud. xiii. 9); ivory carvings, gold and silver (Joseph. *Ant.* xii. 21, 14), and probably mosaic work, purple and fine linen, are also mentioned as constituting parts of beds (Esth. i. 6; Cant. iii. 9, 10) where the word **מִטָּה**, LXX. *φάρατρον*, seems to mean "a litter" (Prov. vii. 16, 17; Amos xi. 4). So also are perfumes.

Pillow, or Head-rest. (Wilkinson, *Ancient Egyptians*.)

There is but little distinction of the *bed* from sitting furniture among the Orientals; the same article being used for nightly rest, and during the day. This applies both to the divan and bedstead in all its forms, except perhaps the litter.

There was also a garden-watcher's bed, **מִטָּה גַּנְנוֹן**, rendered variously in the A. V. "cottage" and "lodge," which seems to have been slung like a hammock, perhaps from the trees (Is. i. 8, xiv. 20).

Josephus (*Ant.* xii. 4, 11) mentions the bed-chambers in the Arabian palace of Hyrcanus.

The ordinary furniture of a bedchamber in private life is given in 2 K. iv. 10. The "bed-chamber" in the temple where Joash was hidden, was, as Calmet suggests (*Dict. of Bib. Art.* "Beds"), probably, a store-chamber for keeping beds, not a mere bedroom, and thus better adapted to conceal the fugitives (2 K. xi. 2; 2 Chr. xxii. 11, **חֲדָרֵי הַמִּטּוֹת**, "chamber of beds," not the usual **חֲדָרֵי מִשְׁכָּב**, "chamber of reclining," Ex. vii. 28 and *passim*).

The position of the bed-chamber in the most remote and secret parts of the palace seems marked in the passages, Ex. viii. 3; 2 K. vi. 12. [H. II.]

**BE'DAD** (**בְּדָד**; *Bapdδ*; *Badud*), the father of one of the kings of Edom, "Iladad ben-Bedad" (Gen. xxxvi. 35; 1 Chr. i. 46).

**BEDAN** (**בְּדָן**; *Badan*), mentioned 1 Sam. xii. 11, as a Judge of Israel between Jerubbaal (Gideon) and Jephthah. As no such name occurs in the Book of Judges, various conjectures have been formed as to the person meant, most of which are discussed in Pole (*Synopsis, in loc.*). Some maintain him to be the Jair mentioned in Judg. x. 3, who, it must then be supposed, was also called Bedan to distinguish him from the older Jair, son of Manasseh, (Num. xxxii. 41), a Bedan being actually named among the descendants of Manasseh in 1 Chr. vii. 17. The Chaldee Paraphrast reads Samson for Bedan in 1 Sam. xii. 11, and many suppose Bedan to be another name for Samson, either a contraction of Ben-Dan (the son of Dan or Danite), or else meaning *in* or *into* Dan (**דָּן**) with a reference to Judg. xii. 25.

Neither explanation of the word is very probable, or defended by any analogy, and the order of the names does not agree with the supposition that Bedan is Samson, so that there is no real argument for it except the authority of the Paraphrast. The LXX., Syr., and Arab. all have Barak, a very probable correction except for the order of the names. Ewald suggests that it may be a false reading for Abdon. After all, as it is clear that the Book of Judges is not a complete record of the period of which it treats, it is possible that Bedan was one of the Judges whose names are not preserved in it, and so may perhaps be compared with the Jael of Judg. v. 6, who was probably also a Judge, though we know nothing about the subject except from Deborah's song. The only objection to this view is, that as Bedan is mentioned with Gideon, Jephthah, and Samuel, he would seem to have been an important Judge, and therefore not likely to be omitted in the history. The same objection applies in some degree to the views which identify him with Abdon or Jair, who are but cursorily mentioned. [G. E. L. C.]

**BEDEIAH** (**בְּדֵיָה**; *Baḏaia*; *Badaia*), one of the sons of Bani, in the time of Ezra, who had taken a foreign wife (Ezr. x. 35).

**BEE** (**דְּבוּרָה**; *Debbrah*), a gregarious insect of the Hymenopterous order. In Deut. i. 44, Ps. cxviii. 12, and Is. vii. 18 reference is made to the way in which bees attack the objects of their anger in swarms. Both the Psalmist and the Prophet in all probability adopted the simile from Moses. "The Amorites, which dwell in the mountains, came out against you and chased you as bees do," &c. (Deut. i. c.). In Judg. xiv. 8 and in Eccles. xi. 3 the production of honey by bees and its use as food is mentioned. Bees must have been very common in Palestine to justify the title given to it of a land flowing with milk and honey. It is noticeable that in Prov. vi. 8 the LXX. have introduced after the description of the forethought of the ant a similar panegyric on the bee as an example of industry and ingenuity in her work. This insertion, if it be an insertion, is of very ancient date, for it is quoted by Clemens Alexandrinus, by Origen, by Basil, &c. The LXX.

always render בְּרִיךְ by μελίσσα. The root of the word is בִּרְךְ, *exerjit*—*examen arum quasi exagimen* (Ges.) [W. D.]

**BEELI'ADA** (בְּעִלְיָדָה = known by Baul; 'Ελιαδέ; Alex. Βαλλιαδέ; *Bualiaida*), one of David's sons, born in Jerusalem (1 Chr. xiv. 7). In the lists in Samuel the name is ELIADA, El being substituted for Baul.

**BEEL'SARUS** (Βεελσαρδος; *Beelsuro*), 1 Esd. v. 8. [BISHAN.]

**BEELTETH'MUS** (Βέλτεθμος; Alex. Βεελτεμώ; *Bullthennus*), an officer of Artaxerxes residing in Palestine (1 Esd. ii. 16, 25). The name is a corruption of בְּעַל תְּהוֹם = lord of judgment, A. V. "chancellor," the title of Rehūm, the name immediately before it (Ezr. iv. 8).

**BEEL'ZEBUL** (Βεελζεβού; *Beelzebub*), the title of a heathen deity, to whom the Jews ascribed the sovereignty of the evil spirits (Matt. x. 25, xii. 24; Mark iii. 22; Luke xi. 15 ff.). The correct reading is without doubt *Beelzebub*, and not *Beelzebub* as given in the Syriac, the Vulg., and some other versions; the authority of the MSS. is decisive in favour of the former, the alteration being easily accounted for by a comparison with 2 K. i. 2, to which reference is made in the passages quoted. [BAAL, p. 146, No. 2.] Two questions present themselves in connexion with this subject:—(1) How are we to account for the change of the final letter of the name? (2) On what grounds did the Jews assign to the Beelzebub of Ekron the peculiar position of *δ ἄρχων τῶν δαιμονίων*? The sources of information at our command for the answer of these questions are scanty: the names are not found elsewhere: the LXX. translates Beelzebub Βεαλ μυίας, as also does Josephus (*Ant.* ix. 2, §1); and the Talmudical writers are silent on the subject.

1. The explanations offered in reference to the change of the name may be ranged into two classes, according as they are based on the *sound*, or the *meaning* of the word. The former proceeds on the assumption that the name Beelzebub was offensive to the Greek ear, and that the final letter was altered to avoid the double *b*, just as Habakkuk became in the LXX. Ἀμβακούμ (Hitzig, *Vorbericht* in Habakkuk), the choice of *k* as a substitute for *b*, being decided by the previous occurrence of the letter in the former part of the word (Bengel, *Gnomon* in Matt. x. 25, comparing Μελαχόλ in the LXX. π=Michal). It is, however, by no means clear why other names, such as Magog, or Eldad, should not have undergone a similar change: we should prefer the assumption, in connexion with this view, that the change was purely of an accidental nature, for which no satisfactory reason can be assigned. The second class of explanations carries the greatest weight of authority with it: these proceed on the ground that the Jews intentionally changed the pronunciation of the word, so as either to give a significance to it adapted to their own ideas, or to cast ridicule upon the idolatry of the neighbouring nations, in which case we might compare the adoption of Sychar for Sychem, Bethaven for Bethel. The Jews were certainly keenly alive to the significance of names, and not unfrequently indulged in an exercise of wit, consisting of a play

upon the meaning of the words, as in the case of Nabal (1 Sam. xxv. 25), Abraham (Gen. xvii. 5), and Sarah (Gen. xvii. 15). Lightfoot (*Exercitationes*, Matt. xii. 24) adduces instances from the Talmudical writers of opprobrious puns applied to idols. The explanations, which are thus based on etymological grounds, branch off into two classes; some connect the term with בְּבִיל, *habitation*, thus making Beelzebub = *οικοδεσπότης* (Matt. x. 25), *the lord of the dwelling*, whether as the "prince of the power of the air" (Eph. ii. 2), or as the prince of the lower world (Paulus, quoted by Olshausen, *Comment.* in Matt. x. 25), or as inhabiting human bodies (Schleusner, *Lex. s. v.*), or as occupying a mansion in the seventh heaven, like Saturn in Oriental mythology (Movers, *Phoenic.* i. 260, quoted by Winer, *Realwort.* art. *Beelzebub*; comp. Michaelis, *Suppl. ad Lex.* p. 205, for a similar view). Others derive it from בְּזַל, *dung* (a word, it must be observed, not in use in the Bible itself, but frequently occurring in Talmudical writers), thus making Beelzebub, literally, *the lord of dung, or the dunghill*; and in a secondary sense, as *zebel* was used by the Talmudical writers as = *idol* or *idolatry* (comp. Lightfoot *Errata*, Matt. xii. 24; Luke xi. 15), *the lord of idols, prince of false gods*, in which case it = *ἄρχων τῶν δαιμονίων*. It is generally held that the former of these two senses is more particularly referred to in the N. T. (Carpzov, *Appar.* p. 498, comparing the term בְּזַל as though connected with בִּלְזַל, *ding*; Olshausen, *Comment.* in Matt. xii. 25); the latter, however, is adopted by Lightfoot and Schleusner. We have lastly to notice the ingenious conjecture of Hug (as quoted by Winer) that the fly, under which Baalzebub was represented, was the *Scarabæus pillularius* or *dunghill beetle*, in which case Baalzebub and Beelzebub might be used indifferently.

2. The second question hinges to a certain extent on the first. The reference in Matt. x. 25 may have originated in a fancied resemblance between the application of Abrahah to Baalzebub, and that of the Jews to our Lord for the ejection of the unclean spirits. As no human remedy availed for the cure of this disease, the Jews naturally referred it to some higher power and selected Beelzebub as the heathen deity to whom application was made in case of severe disease. The title *ἄρχων τῶν δαιμονίων* may have special reference to the nature of the disease in question, or it may have been eluded from the name itself by a fancied or real etymology. It is worthy of special observation that the notices of Beelzebub are exclusively connected with the subject of demoniacal possession, a circumstance which may account for the subsequent disappearance of the name. [W. L. B.]

**BEER** (בְּרַם = well; τὸ φρέαρ; *puteus*).

1. One of the latest halting-places of the Israelites, lying beyond the Arnon, and so called because of the well which was there dug by the "princes" and "nobles" of the people, and is perpetuated in a fragment of poetry (Numb. xxi. 16-16).<sup>a</sup> This

<sup>a</sup> There is no connexion between the "gathering" in ver. 16 and that in xx. 8. From the A. V. it might be inferred that the former passage referred to the event described in the latter; but the two words rendered "gather" are radically different,—גָּחַץ in ch. xx., שָׁבַע in xxi.

is possibly the BEER-ELIM, or "well of heroes," referred to in Is. xv. 8. The "wilderness" (בְּרִית) which is named as their next starting point in the last clause of verse 18, may be that before spoken of in 13, or it may be a copyist's mistake for בְּרִית. It was so understood by the LXX., who read the clause, *καὶ ἀπὸ φρέατος*—"and from the well," i. e. "from Beer."

According to the tradition of the Targumists—a tradition in part adopted by St. Paul (1 Cor. x. 4)—this was one of the appearances, the last before the entrance on the Holy Land, of the water which had "followed" the people, from its first arrival at Rephidim, through their wanderings. The water—so the tradition appears to have run—was granted for the sake of Miriam, her merit being that, at the peril of her life, she had watched the ark in which lay the infant Moses. It followed the march over mountains and into valleys, encircling the entire camp, and furnishing water to every man at his own tent door. This it did till her death (Num. xx. 1), at which time it disappeared for a season, apparently rendering a special act necessary on each future occasion for its evocation. The striking of the rock at Kadesh (Num. xx. 10) was the first of these; the digging of the well at Beer by the staves of the princes, the second. Miriam's well at last found a home in a gulf or recess in the sea of Galilee, where at certain seasons its water flowed, and was resorted to for healing purposes (Targums Onkelos, and Ps. Jon. Num. xx. 1, xxi. 18, and also the quotations from the Talmud in Lightfoot on John v. 4).

2. A place to which Jotham, the son of Gideon, fled for fear of his brother Abimelech (Judg. ix. 21). There is nothing in the text or elsewhere to indicate its position (LXX. Vat. *Βαῖρα*; the Alex. entirely alters the passage—*καὶ ἐπορεύθη ἐν ὁδῷ καὶ φούρες εἰς Παρά*; Vulg. in *Bera*). [G.]

BE'ERA (בְּעֵרָא; *Benpá*; *Bera*), son of Zophai, of the tribe of Asher (1 Chr. vii. 37).

BE'ERAH (בְּעֵרָה; *Be'há*; Alex. *Benpá*; *Beera*), prince (בִּנְיָן) of the Reubenites, carried away by Tiglath-Pileser (1 Chr. v. 6).

BEER-ELIM (בְּעֵר אֵלִים, *well of heroes*; *φρέατ τοῦ Αἰλῆμ*; *puteus Elim*), a spot named in Is. xv. 8 as on the "border of Moab," apparently the south, Eglaim being at the north end of the Dead Sea. The name points to the well dug by the chiefs of Israel on their approach to the promised land, close by the "border of Moab" (Num. xxi. 16; comp. 13), and such is the suggestion of Gesenius (*Jesaja*, 533). [BEER, 1.] Beer-elim was probably chosen by the Prophet out of other places on the boundary on account of the similarity between the sound of the name and that of בְּרִית—the "howling" which was to reach even to that remote point (Ewald, *Proph.* 233). [G.]

BE'ERI (בְּעֵרִי, *fontanus*, Gesen.; *illustrious*, Fürst; *Be'há*, Gen., *Benpá*, Hos.; *Beerí*). 1. The father of Judith, one of the wives of Esau (Gen. xxvi. 34). There need be no question that Judith, daughter of Be'eri, is the same person as is called in the genealogical table (Gen. xxvi. 2) Abolibamah, daughter of Anah, and con-

sequently Be'eri and Anah must be regarded as names of the same person. There is the further difficulty that Be'eri is spoken of as a Hittite, whilst Anah is called a Horite and also a Ilvite, and we have thus three designations of race given to the same individual. It is stated under ANAH that Ilvite is most probably to be regarded as an error of transcription for Horite. With regard to the two remaining names the difficulty does not seem to be formidable. It is agreed on all hands that the name Horite (חֲרִי) signifies one who dwells in a hole or cave, a Troglodyte; and it seems in the highest degree probable that the inhabitants of Mount Seir were so designated because they inhabited the numerous caverns of that mountainous region. The name therefore does not designate them according to their race, but merely according to their mode of life, to whatever race they might belong. Of their race we know nothing except indeed what the conjunction of these two names in reference to the same individual may teach us: and from this case we may fairly conclude that these Troglodytes or Horites belonged in part at least to the widely extended Canaanitish tribe of the Hittites. On this supposition the difficulty vanishes, and each of the accounts gives us just the information we might expect. In the narrative, where the stress is laid on Esau's wife being of the race of Canaan, her father is called a Hittite; whilst in the genealogy, where the stress is on Esau's connexion by marriage with the previous occupants of Mount Seir, he is most naturally and properly described under the more precise term Horite. 2. Father of the prophet Hosea (Hos. i. 1). [F. W. G.]

BEER-LAHA'I-ROI (בְּעֵר לַחַי רֹאי, *well of the living and seeing* [*God*]; *φρέατ τοῦ ἐνῶπιον εἶδον*; *τὸ φρέατ τῆς ὁράσεως*; *puteus viventis et videntis me*), a well, or rather a living spring,\* (A. V. *fountain*, comp. ver. 7) between Kadesh and Bered, in the wilderness, "in the way to Shur," and therefore in the "south country" (Gen. xxiv. 62), which, according to the explanation of the text, was so named by Hagar, because God saw her (רָאָה) there (Gen. xvi. 14). From the fact of this etymology not being in agreement with the formation of the name, it has been suggested (Gen. *Thes.* 175) that the origin of the name is Lechi (comp. Judg. xv. 9, 19). It would seem, however, that the Lechi of Samson's adventure was much too far north to be the site of the well Lahai-roi.

By this well Isaac dwelt both before and after the death of his father (Gen. xxiv. 62, xxv. 11). In both these passages the name is given in the A. V. as "the well Lahai-roi."

Mr. Rowland announces the discovery of the well Lahai-roi at *Moyle* or *Moihi*, a station on the road to Beersheba, 10 hours south of *Ruheibeh*; near which is a hole or cavern bearing the name of *Boit Hagar* (Ritter, *Sinai*, 1086, 7); but this requires confirmation.

This well is not to be confounded with that by which the life of Ishmael was preserved on a subsequent occasion (Gen. xxi. 19) and which, according to the Moslem belief, is the well *Zem-zem* at Mecca. [G.]

\* One of the very few cases in which the two words בְּרִית, *Ein*, a living spring, and בְּעֵר, *Beer*, an artificial well, are applied to the same thing.

**BEER'ROTH** בְּאֵרֹת, wells; Βηρώτ, Βηρωσάδ, Βηρωσά; *Berth*), one of the four cities of the Hivites who deluded Joshua into a treaty of peace with them, the other three being Gibeon, Chephirah, and Kirjath-Jearim (Josh. ix. 17). Beeroth was with the rest of these towns allotted to Benjamin (xviii. 25), in whose possession it continued at the time of David, the murderers of Ish-bosheth being named as belonging to it (2 Sam. iv. 2). From the notice in this place (verse 2, 3) it would appear that the original inhabitants had been forced from the town, and had taken refuge at Gittaim (Neh. vi. 34), possibly a Philistine city.

Beeroth is once more named with Chephirah and K. Jearim in the list of those who returned from Babylon (Ezr. ii. 25; Neh. vii. 29; 1 Esdr. v. 19). [BEEROTH.]

Beeroth was known in the times of Eusebius, and his description of its position (*Onom. Beeroth* with the corrections of Keland, 618, 9; Rob. i. 452, note) agrees perfectly with that of the modern *el-Birch*, which stands at about 10 miles north of Jerusalem by the great road to *Nāblus*, just below a ridge which bounds the prospect northwards from the Holy city (Rob. i. 451, 2; ii. 262). No mention of Beeroth beyond those quoted above is found in the Bible, but one link connecting it with the N. T. has been suggested, and indeed embodied in the traditions of Palestine, which we may well wish to regard as true, viz. that it was the place at which the parents of "the child Jesus" discovered that he was not among their "company" (Luke ii. 43-45). At any rate the spring of *el-Birch* is even to this day the customary resting-place for caravans going northward, at the end of the first day's journey from Jerusalem (Stanley, 215; Lord Nugent, ii. 112; Schubert in Winer, s. v.).

Besides Baanah and Rechab, the murderers of Ishbosheth, with their father Rimmon, we find Nahari "the Beerothite" (הַבְּרִיתִי; δ Βηρωσάιος; 2 Sam. xxiii. 37), or "the Berothite" (הַבְּרִיתִי; δ Βηρωσά; 1 Chr. xi. 39), one of the "mighty men" of David's guard. [G.]

**BEER'ROTH OF THE CHILDREN OF JAAKAN** (בְּאֵרֹת בְּנֵי-יַעֲקֹב; Βηρώτ υἱῶν 'Ιακώ; Alex. 'Ιακώ; *Berth filiorum Jacan*), the wells of the tribe of Bene-Jaakan, which formed one of the halting-places of the Israelites in the desert (Dent. x. 6). In the lists in Num. xxxiii. the name is given as **BENE JAAKAN** only. [G.]

**BEER'-SHEBA** בְּאֵר שֶׁבַע, well of *swearing*, or of *seven*; Φεάρ ὁρκισμοῦ, and Φεάρ τοῦ ὁρκῶ, in Genesis; Βηρσαβέε in Joshua and later books; Jos. Βηρσουβά; ὁρκισμὸν δὲ φεάρ λέγοιτο αὐτ.; *Bersabee*), the name of one of the oldest places in Palestine, and which formed, according to the well-known expression, the southern limit of the country.

There are two accounts of the origin of the name.

1. According to the first, the well was dug by Abraham, and the name given, because there he and Abimelech the king of the Philistines "swore" (נִשְׁבַּע) both of them (Gen. xxi. 31). But the compact was ratified by the setting apart of "seven ewe lambs;" and as the Hebrew word for "seven" is שֶׁבַע, *Sheba*, it is equally possible that this is the meaning of the name. It should not be over-

looked that here, and in subsequent early notices of the place, it is spelt *Beer-shaba* (שֶׁבַע בְּ).

2. The other narrative ascribes the origin of the name to an occurrence almost precisely similar, in which both Abimelech the king of the Philistines, and Phicol his chief captain, are again concerned, with the difference that the person on the Hebrew side of the transaction is Isaac instead of Abraham (Gen. xxvi. 31-33). Here there is no reference to the "seven" lambs, and we are left to infer the derivation of *Shibeah* (שִׁבְעָה, not "Shebah," as in the A. V.) from the mention of the "swearing" (יִשְׁבַּע) in yer. 31.

If we accept the statement of verse 18 as referring to the same well as the former account, we shall be spared the necessity of enquiring whether these two accounts relate two separate occurrences, or refer to one and the same event, at one time ascribed to one, at another time to another of the early heroes and founders of the nation. There are at present on the spot two principal wells, and five smaller ones. They are among the first objects encountered on the entrance into Palestine from the South, and being highly characteristic of the life of the Bible, at the same time that the identity of the site is beyond all question, the wells of Beersheba never fail to call forth the enthusiasm of the traveller.

The two principal wells—apparently the only ones seen by Robinson—are on or close to the northern bank of the *Wady es-Saba*. They lie just a hundred yards apart, and are so placed as to be visible from a considerable distance (Bonar, *Land of Prom.* 1). The larger of the two, which lies to the east, is, according to the careful measurements of Dr. Robinson, 12½ feet diam., and at the time of his visit (Apr. 12) was 44½ feet to the surface of the water: the masonry which encloses the well reaches downwards for 28½ feet.

The other well is 5 feet diam. and was 42 feet to the water. The curb-stones round the mouth of both wells are worn into deep grooves by the action of the ropes of so many centuries, and "look as if frilled or fluted all round." Round the larger well there are nine, and round the smaller five large stone troughs—some much worn and broken, others nearly entire, lying at a distance of 10 or 12 feet from the edge of the well. There were formerly ten of these troughs at the larger well. The circle around is carpeted with a sward of fine short grass, with crocuses and lilies (Bonar, 5, 6, 7). The water is excellent, the best, as Dr. R. emphatically records, which he had tasted since leaving Sinai.

The five lesser wells—apparently the only ones seen by Van de Velde—are, according to his account and the casual notice of Bonar, in a group in the bed of the wady, not on its north bank, and at so great a distance from the other two, that the latter were missed by Lieut. V.

On some low hills north of the large wells are scattered the foundations and ruins of a town of moderate size. There are no trees or shrubs near the spot. So much for the actual condition of Beersheba.

After the digging of the well Abraham planted a "grove" (עֵשֶׂל, *Eshel*) as a place for the worship of Jehovah, and here he lived until the sacrifice of Isaac, and for a long time afterwards, xxi. 33—xxii. 1, 19. Here also Isaac was dwelling at the time of the transference of the birthright from Esau to Jacob (xxvi. 39, xxviii. 10), and from the pa-

triarchal encampment round the wells of his grandfather, Jacob set forth on the journey to Mesopotamia which changed the course of his whole life. Jacob does not appear to have revisited the place until he made it one of the stages of his journey down to Egypt. He then halted there to offer sacrifice to "the God of his father," doubtless under the sacred grove of Abraham.

From this time till the conquest of the country we lose sight of B., only to catch a momentary glimpse of it in the lists of the "cities" in the extreme south of Judah (xv. 28) given to the tribe of Simeon (ix. 2; 1 Chr. iv. 28). Samuel's sons were judges in Beersheba (1 Sam. viii. 2), its distance no doubt precluding its being among the number of the "holy cities" (LXX. τοῖς ἁγιασμένοις πόλεσι) to which he himself went in circuit every year (vii. 16). By the times of the monarchy it had become recognized as the most southerly place of the country. Its position as the place of arrival and departure for the caravans trading between Palestine and the countries lying in that direction would naturally lead to the formation of a town round the wells of the patriarchs, and the great Egyptian trade begun by Solomon must have increased its importance. Either Job's census extended (2 Sam. xxiv. 7; 1 Chr. xxi. 2), and here Elijah bade farewell to his confidential servant (משרת) before taking his journey across the desert to Sinai (1 K. xix. 3). From Dan to Beersheba (Judg. xx. 1, &c.), or from Beersheba to Dan (1 Chr. xvi. 2; comp. 2 Sam. xxiv. 2), now became the established formula for the whole of the promised land; just as "from Geba to B." (2 K. xxiii. 8), or "from B. to Mount Ephraim" (2 Chr. xix. 4) was that for the southern kingdom after the disruption. After the return from the captivity the formula is narrowed still more, and becomes "from B. to the Valley of Hinnom" (Neh. xi. 30).

One of the wives of Ahaziah, king of Judah, Zibiah mother of Joash, was a native of Beersheba (2 K. xii. 1; 2 Chr. xxiv. 1). From the incidental references of Amos, we find that, like Bethel and Gilgal, the place was at this time the seat of an idolatrous worship, apparently connected in some intimate manner with the northern kingdom (Am. v. 5, viii. 14). But the allusions are so slight that nothing can be gathered from them, except that in the latter of the two passages quoted above, we have perhaps preserved a form of words or an adjuration used by the worshippers, "Live the 'way' of Beersheba!"\* After this, with the mere mention that Beersheba and the villages round it ("daughters") were re-inhabited after the Captivity (Neh. xi. 30), the name dies entirely out of the Bible records; like many other places, its associations are entirely confined to the earlier history, and its name is not even once mentioned in the New Testament.

But though unheard of, its position ensured a continued existence to Beersheba. In the time of Jerome it was still a considerable place (*oppidum*, Quæst. ad Gen. xvii. 30; or *vicius grandis*, Onom.), the station of a Roman *præsidium*; and later it is mentioned in some of the ecclesiastical lists as an episcopal city under the Bishop of Jerusalem (Itinerary, 820). Its present condition has been already described. It only remains to notice that the place

retains its ancient name as nearly similar in sound as an Arabic signification will permit—*Bir es-Sebâ*—the "well of the lion," or "of seven." [G.]

**BEESH'TERAH** (בִּישְׁתֶּרָה; ἡ Βοσράδ, Alex. *Beeθapā*; *Bosra*), one of the two cities allotted to the sons of Gershon, out of the tribe of Manasseh beyond Jordan (Josh. xxi. 27). By comparison with the parallel list in 1 Chr. vi. 71, Beeshterah appears to be identical with Ashtaroth. In fact the name is considered by Gesenius as merely a contracted form of Beth-Ashtaroth, the house of A. (*Thes.* 196; comp. 175). [BOSOR.] [G.]

**BEETLE** (תִּרְיָל, *Charyôl*) occurs only in Lev. xi. 22, where it is mentioned as one of four *flying creeping things, that go upon all four, which have legs above their feet to leap without upon the earth*, which the Israelites were permitted to eat. The other three are the locust, the bald locust, and the grasshopper, respectively rendered by the LXX. *βρογχος*, *ἀντάκη*, and *ἄκρίς*—while they translate תִּרְיָל by *δριουμάχης*, which Suidas explains by *εἶδος ἀκρίδος, μὴ ἔχον πτερὰ*. Pliny (xi. 29) and Ari-totle (*Hist. Anim.* ix. 6) mention locusts that are serpent-destroyers.

Beetle is certainly an incorrect rendering of תִּרְיָל. It does not appear that the beetle, though common in Egypt, was ever an article of food, but the various kinds of locusts were so. The word is derived from an unused quadriliteral תִּרְיָל = Arab.

حرجل, *salūt, saltāvit*; as in Germ. we have *Heuschrecke* from *schrecken*. The Egyptian beetle is mentioned in Exod. viii. 21, &c., under the name אֶת־הַצִּבְעָה where the A. V. renders it "swarms of flies." See FLY. [W. D.]

## BEHEADING. [PUNISHMENTS.]

**BEHEMOTH** (בְּהֵמוֹת), an animal described in Job xl. 15-24, and nowhere else mentioned in Scripture. Various conjectures have been hazarded as to what animal is meant, the principal authorities being in favour either of the elephant or the hippopotamus. Among those who adopt *elephant* are Drusus, Grotius, Schultens, J. D. Michaëlis, &c., while among the advocates of *rhinoceros* are Bochart (*Hieroz.* ii. p. 754 sq.), Ludolf (*Hist. Aethiop.* i. 11), and Gesenius (*Thes. Ling. Heb.* p. 183). The arguments of the last in favour of his own view may be summed up thus: 1st, the general purpose and plan of Jehovah's two discourses with Job require that the animal which in this second discourse is classed with the crocodile should be an amphibious not a terrestrial animal, the first discourse (xxxviii. xxxix.) having been limited to land-animals and birds. 2ndly, the crocodile and hippopotamus being both natives of Egypt and Aethiopia, are constantly mentioned together by the ancient writers (see Herod. ii. 69-71; Dio. i. 35; Plin. xxviii. 8). 3rdly, it seems certain that an amphibious animal is meant from the contrast between vv. 16, 20, 21, 22, and vv. 23, 24, in which the argument seems to be, "Though

\* There is a correspondence worth noting between the word "way" or "manner" in this formula (תִּרְיָל, literally "the road"), and the word

הַדָּבָר, "the way" (A. V. incorrectly "that way," by which the new religion is designated in the Acts of the Apostles (see ix. 2, &c.).

he feedeth upon grass," &c. like other animals, yet he liveth and delighteth in the waters, and nets are set for him there as for fish, which by his great strength he pierces through. 4thly, the mention of his tail in v. 17 does not agree with the elephant, nor can בָּהֵמָה, as some have thought, signify the trunk of that animal: and 5thly, though בְּהֵמָה may be the plural *majestatis* of בְּהֵמָה, *bestia*, yet it is probably an Egyptian word signifying *boos murinus*, put into a Semitic form.

The following is the passage of Job which describes the behemoth, literally rendered. It certainly suits the hippopotamus better than the elephant.

"Behold now Behemoth, which I have made with thee! He eateth chires (= the Egyptian *scitella porrum*) like cattle! Behold now, his strength is in his loins and his power in the muscles (lit. *firm parts*) of his belly.

"He curveth his tail like a cedar: the tendons of his haunches are intertwined.

"His bones are as pipes of brass; his spine like bars of hammered iron.

"He is chief of the works of God: He that made him hath furnished him with his weapon (i. e. his sharp-cutting teeth).

"For as to fold the mountains bring it forth for him, and all the beasts of the field disport there.

"Beneath the lotus-trees he lieth down; in covert of the reeds and marsh.

"The lotus-trees hide him with their shadow; the willows of the stream surround him.

"Lo! the river hath swoln beyond his channel, he does not haste to fly; he is confident though a river (or Jordan) draw near to his mouth.

"In his eyes (= sight) shall we take him? through the nets he has bored his nostril."

This description fully accords with Gordon Cumming's accurate observation of the habits of the hippopotamus, and also with Dr. Livingstone's account of the animal. [W. D.]

BE'KAIL. [WEIGHTS.]

BEL. [BAAL.]

BEL AND DRAGON. [DANIEL, APOCRYPHAL ADDITIONS TO.]

BE'LA (בְּעֵלָא; Baalā, and Baal, and Baalā, Gen. xiv. 2, 8; *Bela*; a *swallowing up*, or *destruction*. In the *Liber Nona. Hebr.*, in St. Jerome's works, tom. ii., it is corrupted to *Salal*, in the *Cod. Reg.*; but in the *Cod. Colbert.* it is written *Bālla*, and interpreted *καταποντισμός* (see Ps. lv. (liv.) 9, Sept.). Jerome appears to confound it with בְּעֵל, where he renders it "*habens, sive devorans*," and with בְּלָה, where he says, "*Bulla, absorpta sive inveterata*").

1. One of the five cities of the plain which was spared at the intercession of Lot, and received the name of Zoar (צוֹר), *smallness*, i. e. a *little one* (Gen. xiv. 2, xix. 22). It lay on the southern extremity of the Dead Sea, on the frontier of Moab and Palestine (Jerome on Is. xv.), and on the route to Egypt; the connexion in which it is found,

\* Baalā is also the LXX.'s version of *Bera*, Gen. xiv. 2.

\* There can be no doubt that in both passages the cry of the distressed Moabites is compared to the howling of a heifer whose calf has been taken from

Is. xv. 5; Jer. xlviii. 34; Gen. xiii. 10. We first read of Bela in Gen. xiv. 2, 8, where it is named with Sodom, Gomorrah, Admah, and Zebolim, as forming a confederacy under their respective kings, in the vale of Siddim, to resist the supremacy of the king of Shinar and his associates. It is singular that the king of Bela is the only one of the five whose name is not given, and this suggests the probability of *Bela* having been his own name, as well as the name of his city, which may have been so called from him. The tradition of the Jews was that it was called *Bela* from having been repeatedly engulfed by earthquakes; and in the passage Jer. xlviii. 34, "From Zoar even unto Horonaim (have they uttered their voice) as an heifer" of three years old," and Is. xv. 5, they absurdly fancied an allusion to its destruction by three earthquakes (Jerome, *Quæst. Heb. in Gen. xiv.*). There is nothing improbable in itself in the supposed allusion to the *swallowing up* of the city by an earthquake, which בְּעֵל exactly expresses (Num. xvi. 30); but the repeated occurrence of בְּעֵל, and words compounded with it, as names of men, rather favours the notion of the city having been called *Bela* from the name of its founder. This is rendered yet more probable by *Bela* being the name of an Edomitish king in Gen. xxxvi. 32. For further information see De Saucy's *Narrative*, i. 457-481, and Stanley's *S. & P.* 285. [ZOAR.]

2. Son of Beor, who reigned over Edom in the city of Dinhabah, eight generations before Saul, king of Israel, or about the time of the Exodus. Bernard Hyde, following some Jewish commentators (Simon. *Onnast.* 142, note), identifies this Bela with Balaam the son of Beor; but the evidence from the name does not seem to prove more than identity of family and race. There is nothing whatever to guide us as to the age of Beor, or Bosor, the founder of the house from which Bela and Balaam sprung. As regards the name of Bela's royal or native city Dinhabah, which Fürst and Gesenius render "place of plunder," it may be suggested whether it may not possibly be a form of בְּהֵמָה, the Chaldee for *gold*, after the analogy of the frequent Chaldee resolution of the daghes forte into nun. There are several names of places and persons in Idumea which point to gold as found there—as DIZAHAB, Deut. i. 1, "place of gold;" MEZAHAB, "waters of gold," or "gold-streams," Gen. xxvii. 39. Compare Dehebris, the ancient name of the Tiber, famous for its yellow waters. If this derivation for Dinhabah be true, its Chaldee form would not be difficult to account for, and would supply an additional evidence of the early conquests of the Chaldees in the direction of Idumea. The name of Bela's ancestor Beor, בְּעוֹר, is of a decidedly Chaldee or Aramean form, like Peor בְּעוֹר, Pethor בְּעוֹר, Rehob רְהוֹב, and others; and we are expressly told that Balaam the son of Beor dwelt in Pethor, which is by the river of the land of the children of his people, i. e. the river Euphrates; and he himself describes his home as being in Aram (Num. xxii. 5, xxiii. 7). Saul again, who reigned over Edom after Samlah, came

her. The בְּ of comparison is very frequently omitted in Hebrew poetry.

\* In מְדִינָהּ, "the golden city," Is. xiv. 4, the reading is doubtful (Gesen. in v.).

from Rehoboth by the river Euphrates (Gen. xxxvi. 37). We read in Job's time of the Chaldeans making incursions into the land of Uz, and carrying off the camels, and slaying Job's servants (Job i. 17). In the time of Abraham we have the king of Shinar apparently extending his empire so as to make the kings on the borders of the Dead Sea his tributaries, and with his confederates extending his conquests into the very country which was afterwards the land of Edom (Gen. xiv. 6). Putting all this together, we may conclude with some confidence that Bela the son of Beor, who reigned over Edom, was a Chaldean by birth, and reigned in Edom by conquest. He may have been contemporary with Moses and Baham. Hadad, of which name there were two kings (Gen. xxxvi. 35, 39), is probably another instance of an Aramean king of Edom, as we find the name Benhadad as that of the kings of Syria, or Aram, in later history (1 K. xx.). Compare also the name of Hadad-ezer, king of Zobah, in the neighbourhood of the Euphrates (2 Sam. viii. 3, &c.). The passage Gen. xxxvi. 31-39, is given in duplicate 1 Chr. i. 43-51.

3. Eldest son of Benjamin, according to Gen. xli. 21.<sup>d</sup> Num. xxvi. 38, 1 Ch. vii. 6 viii. 1, and head of the family of the Belaites. The houses of his family, according to 1 Chr. viii. 3-5, were Addar, Gera, Abihud (read *Ehud*, עֲהוּד, for עֲבִיחֻד), Abishua, Naamay, Aheah, Shupham, and Harum. Of these Ehud is the most remarkable. The exploit of Ehud the son of Gera, who shared the peculiarity of so many of his Benjamite brethren, in being left-handed (Judg. x. 16), in slaying Eglon the king of Moab, and delivering Israel from the Moabitish yoke, is related at length Judg. iii. 14-30. The greatness of the victory subsequently obtained may be measured by the length of the rest of 80 years which followed. It is perhaps worth noticing that as we have Husham by the side of Bela among the kings of Edom, Gen. xxxvi. 34, so also by the side of Bela, son of Benjamin, we have the Benjamite family of Hushim (1 Chr. vii. 12), sprung apparently from a foreign woman of that name, whom a Benjamite took to wife in the land of Moab (1 Chr. viii. 8-11). [BECHER.]

4. Son of Ahaz, a Reubenite (1 Chr. v. 8). It is remarkable that his country too was "in Arero, even unto Nebo and Baal-moon; and eastward he inhabited into the entering in of the wilderness from the river Euphrates" (8, 9). [A. C. H.]

BELAH. [BELA, 3.]

BELAITES, THE (עֲבֵיטִים), Num. xxvi. 38. [BELA, 3.]

BEL'LEMUS (Βήλεμος; *Balsamus*), 1 Esd. ii. 16. [BISHLAM.]

BELIAL. The translators of our A. V., following the Vulgate, have frequently treated the word בְּעִלְזָה as a proper name, and given it in the form *Belial*, in accordance with 2 Cor. vi. 15. This is particularly the case where it is connected with the expressions עֲלֵי man of, or בֶּן son of: in other instances it is translated *wicked* or some equivalent term (Deut. xv. 9; Ps. xli. 8, cl. 3; Prov. vi. 12, xvi. 27, xix. 28; Nah. i. 11, 15). There can be no question, however, that the word is not to be regarded as a proper name in the O. T.; its

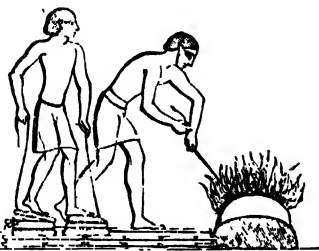

meaning is *worthlessness*, and hence *recklessness*, *lawlessness*. Its etymology is uncertain: the first part בְּ = *without*; the second part has been variously connected with עֹל, *yoke*, as in the Vulg. (Judg. xix. 22) *Belial*, *id est absque iugo*, in the sense of *unbridled*, *rebellious*; with עָלָה, *to ascend*, as = *without ascent*, that is, of the *lowest condition*; and lastly with עָלָה, *usefulness* = *without usefulness*, that is, *good for nothing* (Gesen. *Thesaur.* p. 209): the latter appears to be the most probable, not only in regard to sense, but also as explaining the unusual fusion of the two words, the ב at the end of the one and at the beginning of the other leading to a *crasis*, originally in the pronunciation, and afterwards in the writing. The expression *son* or *man* of *Belial* must be understood as meaning simply a *worthless*, *lawless* fellow (παράνομος, I.XX.): it occurs frequently in this sense in the historical books (Judg. xix. 22, xx. 13; 1 Sam. i. 16, ii. 12, x. 27, xxv. 17, 25, xxx. 22; 2 Sam. xvi. 7, xx. 1; 1 K. xxi. 10; 2 Chr. xiii. 7), and only once in the earlier books (Deut. xiii. 13). The adjunct עָלִים is occasionally omitted, as in 2 Sam. xxiii. 6, and Job xxiv. 18, where בְּעִלְזָה stands by itself, as a term of reproach. The later Hebrews used *ḥamad* and *ḥamé* in a similar manner (Matt. v. 22); the latter is perhaps the most analogous; in 1 Sam. xxv. 25, Nabal (נָבָל = *ωυπρός*) is described as a man of *Belial*, as though the terms were equivalent.

In the N. T. the term appears in the form *Belias* and not *Belial*, as given in the A. V. The change of λ into ρ was common: we have an instance even in Biblical Hebrew מְרִיבֹת (Job xxxviii. 32) for מְרִיבֹת (2 K. xxiii. 5); in Chalde we meet with מְרִיבֹת for מְרִיבֹת; and various other instances; the same change occurred in the Doric dialect (φαῖρος for φαῖλος), with which the Alexandrine writers were most familiar. The term as used in 2 Cor. vi. 15 is generally understood as an appellative of Satan, as the personification of all that was bad: Bengel (*Gnomon* in loc.) explains it of Antichrist, as more strictly the opposite of Christ (*omnem collucientem antichristianum notare videtur*). [W. L. B.]

BELLOWS (חֶבֶל; *φυστήρ*, I.XX.). The word occurs only in Jer. vi. 29, "The bellows are burned;" where their use is to heat a smelting furnace. They were known even in the time of Moses, and perhaps still earlier, since the operations of a foundry would be almost impossible without them. A picture of two different kinds of bellows, both of highly ingenious construction, may be found in Wilkinson, *Anc. Egypt.* iii. 338. "They consisted," he says, "of a leather, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked by the feet, the operator standing upon them, with one under each foot, and pressing them alternately while he pulled up each exhausted skin with a string he held in his hand. In one instance we observe from the painting, that when the man left the bellows, they were raised as if inflated with air; and this would imply a knowledge of the valve. The pipes even in the time of Thothmes III., [supposed to be] the contemporary of Moses, appear

<sup>d</sup> In A. V. "Belah," the ב being rendered by IL. Comp. SHUAM.

to have been simply of reed, tipped with a metal point to resist the action of the fire."

Egyptian Bellows. (F. Grailard, *Recherches sur les Arts des Anciens Egyptiens.*)

Bellows of an analogous kind were early known to the Greeks and Romans. Homer (*Il.* xviii. 470) speaks of 20 φῦσαι in the forge of Hephaestus, and they are mentioned frequently by ancient authors (*Dict. of Ant.* s. v. FOLLIS). Ordinary hand-bellows, made of wood and kid's-skin, are used by the modern Egyptians, but are not found in the old paintings. They may however have been known, as they were to the early Greeks. [F. W. F.]

**BELLS.** There are two words thus translated in the A. V., viz. מְצַפֵּץ, Ex. xxviii. 33 (from צַפֵּץ, to strike; *κῶδωνες*, LXX.), and מוֹצֵץ, Zech. xiv. 20 (τὸ ἐπὶ τὸν χάλινον τοῦ ἵππου, LXX.; A. V. marg. "bridles," from מוֹצֵץ, to strike).

In Ex. xxviii. 33 the bells alluded to were the golden ones, according to the Rabbis 72 in number (Winer, s. v. *Schellen*), which alternated with the three-coloured pomegranates round the hem of the high-priest's ephod. The object of them was "that his sound might be heard when he went in unto the holy place, and when he came out, that he die not" (Ex. xxviii. 34), or "that as he went there might be a sound, and a noise made that might be heard in the temple, for a memorial to the children of his people" (Keeley. xlv. 9). No doubt they answered the same purpose as the bells used by the Brahmans in the Hindoo ceremonies, and by the Roman Catholics during the celebration of mass (comp. Luke i. 21). To this day bells are frequently attached, for the sake of their pleasant sound, to the anklets of women. [ANKLET.] The little girls of Cairo wear strings of them round their feet (Lane, *Mod. Eg.* ii. 370), and at Koojar Mungo Park saw a dance "in which many performers assisted, all of whom were provided with little bells fastened to their legs and arms."

In Zech. xiv. 20 "bells of the horses" (where our marg. Vers. follows the LXX.) is probably a wrong rendering. The Hebr. word is almost the same as מְצַפֵּץ "a pair of cymbals," and as they are supposed to be inscribed with the words "Holiness unto the Lord," it is more probable that they are not bells but "concave or flat pieces of brass, which were sometimes attached to horses for the sake of ornament" (Jahn, *Arch. Bibl.* §96). Indeed they were probably the same as the שְׁהַרְרִים, *σηρράκοι* (Is. iii. 18; Judg. viii. 21), lunulae of gold, silver, or brass used as ornaments, and hung by the Arabians round the necks of their camels, as we still see them in England on the harness of horses. They were not only ornamental, but

useful, as their tinkling tended to enliven the animals; and in the caravans they thus served the purpose of our modern sheep-bells. The comparison to the *κῶδωνες* used by the Greeks to test horses seems out of place; and hence Archbishop Secker's explanation of the verse, as meaning that war-horses would become useless, and their trappings would be converted to sacred purposes, is untenable. The general meaning, as obvious from the context, is that true religion will then be universally professed. [F. W. F.]

**BEL/MAIM** (Βελθέμ; Alex. Βελβαίμ; *Belma*), a place which, from the terms of the passage, would appear to have been south of Dothaim (Jud. vii. 3). Possibly it is the same as BELMEN, though whether this is the case, or indeed whether either of them ever had any real existence it is at present impossible to determine. [JUDITH.] The Syriac has Abel-mechola. [G.]

**BEL/MEN** (Βελμέν; Alex. Βελμαίν, Compl. Βελμαίμ; Vulg. omits), a place named amongst the towns of Samaria as lying between Bethhoron and Jericho (Jud. iv. 4). The Hebrew name would seem to have been Abel-maim, but the only place of that name in the O. T. was far to the north of the locality here alluded to. [ABEL-MAIM.] The Syriac version has Abel-meholah, which is more consistent with the context. [ABEL-MEHOLOH; BELMAIM.] [G.]

**BELSHAZ'ZAR** (בֶּלְשַׁצְצָר, Dan. v. 1, and בֶּלְשַׁצְצָר, vii. 1; Βαλτασαρ; *Baltasar*), the last king of Babylon. According to the well-known scriptural narrative, he was warned of his coming doom by the handwriting on the wall which was interpreted by Daniel, and was slain during a splendid feast in his palace. Similarly Xenophon (*Cyrop.* vii. 5. 3) tells us that Babylon was taken by Cyrus in the night, while the inhabitants were engaged in feasting and revelry, and that the king was killed. On the other hand the narratives of Berossus in Josephus (*c. Apion.* i. 20) and of Herodotus (i. 184 ff.) differ from the above account in some important particulars. Berossus calls the last king of Babylon Nabonnedus or Nabonadius (*Nabu-nit* or *Nibon-nhit*, i. e. *Nebo blesses or makes prosperous*), and says that in the 17th year of his reign Cyrus took Babylon, the king having retired to the neighbouring city of Borsippus or Borsippa (Birs-i-Nimrud), called by Niebuhr (*Lect. on Anc. Hist.* xii.) "the Chaldean Benares, the city in which the Chaldeans had their most revered objects of religion, and where they cultivated their science." Being blockaded in that city Nabonnedus surrendered, his life was spared, and a principality or esate given to him in Carmania, where he died. According to Herodotus the last king was called Labynetus, a name easy to reconcile with the Nabonnedus of Berossus, and the Nabonidochus of Megasthenes (Euseb. *Præp. Evang.* ix. 41). Cyrus, after defeating Labynetus in the open field, appeared before Babylon, within which the besieged defied attack and even blockade, as they had walls 300 ft. high, and 75 ft. thick, forming a square of 15 miles to a side, and had stored up previously several years' provision. But he took the city by drawing off for a time the waters of the Euphrates, and then marching in with his whole army along its bed, during a great Babylonian festival, while the people, feeling perfectly secure, were scattered over the whole city in reckless amusement. These dis-

crapaudies have lately been cleared up by the discoveries of Sir Henry Rawlinson; and the histories of profane writers, far from contradicting the scriptural narrative, are shown to explain and confirm it. In 1854 he decyphered the inscriptions on some cylinders found in the ruins of Um-Qeer (the ancient Ur of the Chaldees), containing memorials of the works executed by Nabonnelus. From these inscriptions it appears that the eldest son of Nabonnelus was called Bel-shar-ezar, and admitted by his father to a share in the government. This name is compounded of Bel (the Babylonian god) Shar (*a kinu*), and the same termination as in Nabopolassar, Nebuchadnezzar, &c., and is contracted into Belshazzar, just as Neriglissar (again with the same termination) is formed from Nergal-sharezar. In a communication to the *Athenæum*, No. 1377, Sir Henry Rawlinson says, "we can now understand how Belshazzar, as joint king with his father, may have been governor of Babylon, when the city was attacked by the combined forces of the Medes and Persians, and may have perished in the assault which followed; while Nabonnelus leading a force to the relief of the place was defeated, and obliged to take refuge in Borsippa, capitulating after a short resistance, and being subsequently assigned, according to Berosus, an honourable retirement in Carmania." In accordance with this view we arrange the last Chaldean kings as follows:—Nebuchadnezzar, his son Evilmerodach, Neriglissar, Labrosoarchad (his son, a boy, killed in a conspiracy), Nabonnelus or Labynetus, and Belshazzar. Herodotus says that Labynetus was the son of Queen Nitocris; and Megasthenes (Euseb. *Chr. Arm.* p. 60) tells us that he succeeded Labrosoarchad, but was not of his family. *Ναβαυλδοχον ἀποδεύκονσι βασιλέα, προσήκοντα ὁ οὐδέν.* In Dan. v. 2, Nebuchadnezzar is called the father of Belshazzar. This of course need only mean grandfather or ancestor. Now Neriglissar usurped the throne on the murder of Evilmerodach (Beros. *ap. Joseph. Apion.* i.): we may therefore well suppose that on the death of his son Labrosoarchad, Nebuchadnezzar's family was restored in the person of Nabonnelus or Labynetus, possibly the son of that king and Nitocris, and father of Belshazzar. The chief objection to this supposition would be that if Neriglissar married Nebuchadnezzar's daughter (Joseph. *c. Ap. i.* 21), Nabonnelus would through her be connected with Labrosoarchad. This difficulty is met by the theory of Rawlinson (*Herod. Essay* viii. §25), who connects Belshazzar with Nebuchadnezzar through his mother, thinking it probable that Nabu-nahit, whom he does not consider related to Nebuchadnezzar, would strengthen his position by marrying the daughter of that king, who would thus be Belshazzar's maternal grandfather. A totally different view is taken by Marcus Niebuhr (*Geschichte Assur's und Babel's seit Phil.* p. 91), who considers Belshazzar to be another name for Evilmerodach, the son of Nebuchadnezzar. He identifies their characters by comparing Dan. v. with the language of Berosus about Evilmerodach, *προσὸς τῶν πραγμάτων ἀνδρὸς καὶ ἀσελγῆς.* He considers that the capture of Babylon described in Daniel, was not by the Persians, but by the Medes, under Astyages (*i. e.* Darius the Mede), and that between the reigns of Evilmerodach or Belshazzar, and Neriglissar, we must insert a brief period during which Babylon was subject to the Medes. This solves a difficulty as to the age of Darius (Dan. v. 31; cf. Rawlinson, *Essay* iii. §11), but

most people will probably prefer the actual facts discovered by Sir Henry Rawlinson to the theory (though doubtless very ingenious) of Niebuhr. On Rawlinson's view, Belshazzar died B.C. 538, on Niebuhr's B.C. 559. [G. E. L. C.]

## BELTESHAZZAR. [DANIEL.]

BEN (בֶּן; LXX. omits; *Ben*), a Levite "of the second degree," one of the porters appointed by David to the service of the ark (1 Chr. xv. 18).

BENAI'AH (בְּנֵי־יָהּ and בְּנֵי־יָהּ = "built by Jah"; *Bavaias*; *Banaias*), the name of several Israelites:—

1. BENAIAHU, the son of Jehoiada the chief priest (1 Chr. xxvii. 5), and therefore of the tribe of Levi, though a native of Kabzeel (2 Sam. xxiii. 20; 1 Chr. xi. 22), in the south of Judah; set by David (1 Chr. xi. 25) over his bodyguard of Cherethites and Pelethites (2 Sam. viii. 18; 1 K. i. 38; 1 Chr. xviii. 17; 2 Sam. xx. 23) and occupying a middle rank between the first three of the Gibeonim or "mighty men," and the thirty "valiant men of the armies" (2 Sam. xxiii. 22, 23; 1 Chr. xi. 25, xxvii. 6; and see Kennicott, *Diss.* 177). The exploits which gave him this rank are narrated in 2 Sam. xxiii. 20, 21; 1 Chr. xi. 22. He was captain of the host for the third month (1 Chr. xxvii. 5).

Benaiah remained faithful to Solomon during Adonijah's attempt on the crown (1 K. i. 8, 10), a matter in which he took part in his official capacity as commander of the king's body-guard (1 K. i. 32, 38, 44); and after Adonijah and Joab had both been put to death by his hand, he was raised by Solomon into the place of the latter as commander-in-chief of the whole army (ii. 35, iv. 4).

Benaiah appears to have had a son, called after his grandfather, Jehoiada, who succeeded Ahithophel about the person of the king (1 Chr. xxvii. 34). But this is possibly a copyist's mistake for "Benaiah the son of Jehoiada."

2. BENAIAH the PIRATHONITE; an Ephraimite, one of David's thirty mighty men (2 Sam. xxiii. 30; 1 Chr. xi. 31), and the captain of the eleventh monthly course (1 Chr. xxvii. 14).

3. BENAIAHU; a Levite in the time of David, who "played with a psalter on Alamoth" (1 Chr. xv. 18, 20, xvi. 5).

4. BENAIAHU; a priest in the time of David, appointed to blow the trumpet before the ark (1 Chr. xv. 24, xvi. 6).

5. BENAIAH; a Levite of the sons of Asaph (2 Chr. xx. 14).

6. BENAIAHU; a Levite in the time of Hezekiah, one of the "overseers (שְׂרָפִים) of offerings" (2 Chr. xxxi. 13).

7. BENAIAH, one of the "princes (שְׂרָפִים) of the families of Simeon (1 Chr. iv. 36).

8. BENAIAH; four laymen in the time of Ezra who had taken strange wives. 1 (Ezr. x. 25). [BAANTIAS.] 2 (Ezr. x. 30). [NAIDUS.] 3 (x. 35) and 4 (x. 43). [BANAIAS.]

9. BENAIAHU; father of Pelatiah, "a prince of the people" in the time of Ezekiel (xi. i. 13).

BEN-AMMI (בֶּן־אָמִי, son of my kindred), the son of the younger daughter of Lot, and the progenitor of the Ammonites (Gen. xix. 38). The

reading of the LXX. and Vulgate differs from the Hebrew text, by inserting the name of Ammon, as well as the exclamation which originated it: καὶ ἐκάλεσε τὸ ὄνομα αὐτοῦ Ἀμμὼν λέγουσα Ὑἱὸς γένους μου; *Ammon, id est filius populi mei.*

**BENE-BERAK** (בְּנֵי-בֶרַק; *Bavai-Berak*; Alex. *Βαυβαράκ*; *et Bane et Baruch*; Syr. ܒܪܟܬܐ), one of the cities of the tribe of Dan, mentioned only in Josh. xix. 46. The paucity of information which we possess regarding this tribe (omitted entirely from the lists in 1 Chr. ii.-viii., and only one family mentioned in Num. xxvi.) makes it impossible to say whether the "sons of Berak" who gave their name to this place belonged to Dan, or were, as we may perhaps infer from the name, earlier settlers dispossessed by the tribe. The reading of the Syriac, *Baal-debac*, is not confirmed by any other version. By Eusebius the name is divided (comp. Vulg.), and *Bapaxal* is said to have been then a village near Azotus. No trace has been found of it. [G.]

**BENE-JA'AKAN** (בְּנֵי-יַעֲקֹב, *Children of Jaakan*; *Bavala*; Alex. *Bavakdv*; *Benefnacan*), a tribe who gave their name to certain wells in the desert which formed one of the halting-places of the Israelites on their journey to Canaan. [BEEROTH BENE-JA'AKAN.] In Num. xxxiii. 31, 32, the name is given in the shortened form of Bene-jaakan. The tribe doubtless derived its name from Jaakan, the son of Ezer son of Seir the Horite (1 Chr. i. 42), whose name is also given in Genesis as Akan. [AKAN; JAKAN.]

The situation of these wells has not been yet identified. In the time of Eusebius (*Onom. Beroth fil. Jacin*, *Iaxela*) the spot was shown 10 miles from Petra on the top of a mountain. Robinson suggests the small fountain *et-Taigyeb*, at the bottom of the Pass *er-Rubdy* under Petra, a short distance from the Arabah. The word Beeroth, however, suggests not a spring but a group of artificial wells.

In the Targ. Ps. Jon. the name is given in Numbers as Aktha. בְּנֵי יַעֲקֹב. [G.]

**BENE-KE'DEM** (בְּנֵי קֶדֶם, *the children of the East*), an appellation given to a people, or to peoples, dwelling to the east of Palestine. It occurs in the following passages of the O. T.:—(1) Gen. xix. 1, "Jacob came into the land of the people of the East," in which was therefore reckoned Haran. (2) Job i. 3, Job was "the greatest of all the men of the East" [JOB]. (3) Judg. vi. 3, 33, vii. 12, viii. 10. In the first three passages the Bene-Kedem are mentioned together with the Midianites and the Amalekites; and in the fourth the latter peoples seem to be included in this common name: "Now Zebah and Zalmunna [were] in Karkor, and their hosts with them, about fifteen thousand [men], all that were left of all the hosts of the children of the East." In the events to which these passages of Judges relate, we find a curious reference to the language spoken by these eastern tribes, which was understood by Gideon and his servant (or one of them) as they listened to the talk in the camp; and from this it is to be inferred that they spoke a dialect intelligible to an Israelite: an inference bearing on an affinity of race, and thence on the growth of the Semitic languages. (4) 1 K. iv. 30, "Solomon's wisdom excelled the wisdom of all the children of the East

country." (5) Is. xi. 14; Jer. xlix. 28; Ez. xxv. 4, 10. From the first passage it is difficult to deduce an argument, but the other instances, with their contexts, are highly important. In Ezekiel, Ammon is delivered to the "men of the East," and its city Rabbah is prophesied to become "a stable for camels, and the Ammonites a couching-place for flocks;" referring, apparently, to the habits of the wandering Arabs; while "palaces" and "dwellings," also mentioned and thus rendered in the A. V., may be better read "*camps*" and "*tents*." The words of Jeremiah strengthen the supposition just mentioned: "Concerning Kedar, and concerning Hazor, which Nebuchadnezzar king of Babylon shall smite, thus saith the Lord, Arise ye, go up to Kedar, and spoil the men of the East. Their *tents* and their *flocks* shall they take away: they shall take to themselves their curtains [*i. e. tents*], and all their vessels, and their *camels*."

Opinions are divided as to the extension of the appellation of Bene-Kedem; some (as Rosenmüller and Wiener) holding that it came to signify the Arabs generally. From a consideration of the passages above cited, and that which makes mention of the land of Kedem, Gen. xxv. 6 [ISMAEL], we think (with Gesenius) that it primarily signified the peoples of the Arabian deserts (east of Palestine and Lower Egypt), and chiefly the tribes of Ishmael and of Keturah, extending perhaps to Mesopotamia and Babylonia (to which we may suppose Kedem to apply in Num. xxiii. 7, as well as in Is. ii. 6); and that it was sometimes applied to the Arabs and their country generally. The only positive instance of this latter signification of Kedem occurs in Gen. x. 30, where "Sephar, a mount of the East," is by the common agreement of scholars situate in Southern Arabia [ARABIA; SEPHAR].

In the O. T. עֶרֶב, with its conjugate forms, seems to be a name of the peoples otherwise called Bene-Kedem, and with the same limitations. The same may be observed of ἡ ἀνατολή in the N. T. (Matt. ii. 1, *seq.*). אֶרֶץ בְּנֵי קֶדֶם, בְּנֵי קֶדֶם, אֶרֶץ קֶדֶם (in the passages above referred to), are translated by the LXX. and in the Vulg., and sometimes transcribed (*Kedem*) by the former; except LXX. in 1 K. iv. 30, and LXX. and Vulg. in Is. ii. 6, where they make Kedem to relate to ancient time. [E. S. P.]

**BENIHA'DAD** (בְּנֵי-חֲדָד, *son of Hadad*; *vids* 'Aḏep; *Bcnadad*), the name of three kings of Damascus. *Hadad* or *Adad* was a Syrian god, probably the Sun (*Macrob. Saturnalia*, i. 23), still worshipped at Damascus in the time of Josephus (*Ant.* ix. 4, 6), and from it several Syrian names are derived, as Hadadezer, *i. e. Hadad has helped*. The "*son of Hadad*," therefore, means worshipper of Hadad. Damascus, after having been taken by David (2 Sam. viii. 5, 6), was delivered from subjection to his successor by Rezon (1 K. xi. 24), who "was an adversary to Israel all the days of Solomon."

BENHADAD I. was either son or grandson to Rezon, and in his time Damascus was supreme in Syria, the various smaller kingdoms which surrounded it being gradually absorbed into its territory. Benhadad must have been an energetic and powerful sovereign, and his alliance was courted both by Baasha of Israel and Asa of Judah. He finally closed with the latter on receiving a large amount of treasure,

and conquered a great part of the N. of Israel, thereby enabling Aza to pursue his victorious operations in the S. From 1 K. xx. 34, it would appear that he continued to make war upon Israel in Omri's time, and forced him to make "streets" in Samaria for Syrian residents. [AHAB.] This date is B.C. 950.

BENHADAD II., son of the preceding, and also king of Damascus. Some authors call him *grand-son*, on the ground that was unusual in antiquity for the son to inherit the father's name. But Benhadad seems to have been a religious title of the Syrian kings, as we see by its reappearance as the name of Hazael's son, Benhadad III. Long wars with Israel characterised the reign of Benhadad II., of which the earlier campaigns are described under AHAB. His power and the extent of his dominion are proved by the thirty-two vassal kings who accompanied him to his first siege of Samaria. Some time after the death of Ahab, probably owing to the difficulties in which Jehoram of Israel was involved by the rebellion of Moab, Benhadad renewed the war with Israel, and after some minor attempts which were frustrated by Elisha, attacked Samaria a second time, and pressed the siege so closely that there was a terrible famine in the city, and atrocities were committed to get food no less revolting than those which Josephus relates of the siege of Jerusalem by Titus. But when the Syrians were on the very point of success, they suddenly broke up in the night in consequence of a sudden panic, under which they surmised that assistance was coming to Israel from Egypt or some Canaanitish cities as Tyre or Ramoth. Jehoram seems to have followed up this unhelped deliverance by successful offensive operations, since we find from 2 K. ix. 1 that Ramoth in Gilead was once more an Israelitish town. [AHAB.] Soon after Benhadad fell sick, and sent Hazael, one of his chief officers, with vast presents, to consult Elisha, who happened to be in Damascus, as to the issue of his malady. Elisha replied that the sickness was not a mortal one, but that still he would certainly die, and he announced to Hazael that he would be his successor, with tears at the thought of the misery which he would bring on Israel. On the day after Hazael's return Benhadad was murdered, but not, as is commonly thought from a cursory reading of 2 K. viii. 15, by Hazael. Such a supposition is hardly consistent with Hazael's character, would involve Elisha in the guilt of having suggested the deed, and the introduction of Hazael's name in the latter clause of ver. 15, can scarcely be accounted for, if he is also the subject of the first clause. Ewald, from the Hebrew text and a general consideration of the chapter (*Gesch. des V. I.* iii. p. 523, *note*), thinks that one or more of Benhadad's own servants were the murderers: Calmet (*Fragm.* vii.) believes that the wet cloth which caused his death, was intended to effect his cure. This view he supports by a reference to Bruce's *Travels*, iii. p. 33. Hazael succeeded him perhaps because he had no natural heirs, and with him expired the dynasty founded by Rezon. Benhadad's death was about B.C. 890, and he must have reigned some 30 years.

BENHADAD III., son of the above-mentioned Hazael, and his successor on the throne of Syria. His reign was disastrous for Damascus, and the vast power wielded by his father sank into insignificance. In the striking language of scripture, "Jehonhaz [the son of Jehu] besought the Lord, and the Lord hearkened unto him, for he saw the oppression of

Israel, because the king of Syria oppressed them; and the Lord gave Israel a saviour" (2 K. xii. 4, 5). This saviour was Jeroboam II. (cf. 2 K. xiv. 27), but the prosperity of Israel began to revive in the reign of his father Jehoahaz, the son of Jehoahaz. When Benhadad succeeded to the throne of Hazael, Jehoahaz, in accordance with a prophecy of the dying Elisha, recovered the cities which Jehoahaz had lost to the Syrians, and beat him in Aphek (2 K. xv. 17) in the plain of Esdraelon, where Alab had already defeated Benhadad II. [AHAB.] Jehoahaz gained two more victories, but did not restore the dominion of Israel on the E. of Jordan. This glory was reserved for his successor. The date of Benhadad III. is B.C. 840. His misfortunes in war are noticed by Amos i. 4. [G. E. L. C.]

BEN-HA'IL (בְּנֵי-חַיִל), son of the host, i. e. warrior; Benhail), one of the "princes" (שָׂרִים) whom king Jehoshaphat sent to teach in the cities of Judah (2 Chr. xvii. 7). The LXX. translates, τοὺς ἡγουμένους αὐτοῦ καὶ τοὺς υἱοὺς τῶν δυνάτων.

BEN-HA'NAN (בְּנֵי-חָנָן; υἱὸς Φανῆ; Alex. *avan*; *filius Hanan*), son of Shimon, in the line of Judah (1 Chr. iv. 20).

BENI'NU (בְּנֵי-נִי; *Bavouat*; Alex. *Bavouaiat*; *Baninu*), a Levite; one of those who sealed the covenant with Nehemiah (Neh. x. 13 [14]).

BENJAMIN (בְּנֵי-יָמִין; *Benjamin*, *Benjamin*). 1. The youngest of the children of Jacob, and the only one of the thirteen (if indeed there were not more: comp. "all his daughters," Gen. xxxvii. 35, xli. 7), who was born in Palestine. His birth took place on the road between Bethel and Bethlehem, a short distance—"a length of earth"—from the latter, and his mother Rachel died in the act of giving birth to him, naming him with her last breath Ben-oni, "son of my sorrow" (comp. 1 Sam. iv. 19-22). This was by Jacob changed into Benjamin (*Benjamin*) (Gen. xxxv. 16-18).

The name is worthy some attention. From the terms of the story it would appear to be implied that it was bestowed on the child in opposition to the desponding, and probably ominous, name given him by his dying mother, and on this assumption it has been interpreted to mean "Son of the right hand," i. e. fortunate, dexterous, *Felix*; as if

בְּנֵי-יָמִין. This interpretation is inserted in the text of the Vulgate and the margin of the A. V. and has the support of Gesenius (*Thes.* 219). On the other hand the Samaritan Codex gives the name in an altered form as בְּנֵי-יָמִין, son of days, i. e. son of my old age (comp. Gen. xlv. 20), which is adopted by Philo, Aben-ezra, and others. Both these interpretations are of comparatively late date, and it is notorious that such explanatory glosses are not only often invented long subsequently to the original record, but are as often at variance with the real meaning of that record. The meaning given by Josephus—*διδόντων ἐπ' αὐτῷ γενομένην δόξαν τῇ μητρὶ* (*Ant.* i. 21, §3)—is completely different from either of the above. However this may be, the name is not so pointed as to agree with any interpretation founded on "son of"—being בְּנֵי, and not בְּנֵי. Moreover in the adjectival forms of the word the first syllable is generally suppressed,

as *בְּנֵי יִמִּינִי* *בְּנֵי יִמִּינִי*, *i. e.* "sons of Yemini," for sons of Benjamin; *אִישׁ יִמִּינִי*, "man of Yemini," for *man* of Benjamin (1 Sam. ix. 1; Esth. ii. 5); *אֶרֶץ יִמִּינִי*, land of Yemini for land of Benjamin (1 Sam. ix. 4); as if the patriarch's name had been originally *יִמִּין*, Yamin (comp. Gen. xli. 10), and that of the tribe Yeminites. These adjectival forms are carefully preserved in the LXX.

Until the journeys of Jacob's sons and of Jacob himself into Egypt we hear nothing of Benjamin, and as far as he is concerned those well-known narratives disclose nothing beyond the very strong affection entertained towards him by his father and his whole-brother Joseph, and the relation of fond endearment in which he stood, as if a mere darling child (comp. Gen. xli. 20), to the whole of his family. Even the harsh natures of the elder patriarchs relaxed towards him. But Benjamin can hardly have been the "lad" which we commonly imagine him to be, for at the time that the patriarchs went down to reside in Egypt, when "every man with his house went with Jacob," ten sons are ascribed to Benjamin,—a larger number than to any of his brothers—and two of these, from the plural formation of their names, were themselves apparently families (Gen. xli. 21).<sup>a</sup>

And here, little as it is, closes all we know of the life of the patriarch himself; henceforward the history of Benjamin is the history of the tribe. And up to the time of the entrance on the Promised Land that history is as meagre as it is afterwards full and interesting. We know indeed that shortly after the departure from Egypt it was the smallest tribe but one (Num. i. 36; comp. verse 1); that during the march its position was on the west of the tabernacle with its brother tribes of Ephraim and Manasseh (Num. ii. 18-24). We have the names of the "captain" of the tribe, when it set forth on its long march (Num. ii. 22); of the "ruler" who went up with his fellows to spy out the land (xiii. 9); of the families of which the tribe consisted when it was marshalled at the great halt in the plains of Moab by Jordan-Jericho (Num. xvi. 38-41, 63), and of the "prince" who was chosen to assist in the dividing of the land (xxiv. 21). These are indeed preserved to us. But there is nothing to indicate what were the characteristics and behaviour of the tribe which sprang from the orphan darling of his father and brothers. No touches of personal biography like those with which we are favoured concerning Ephraim (1 Chr. vii. 20-23): no record of zeal for Jehovah like Levi (Ex. xxxii. 26): no evidence of special bent as in the case of Reuben and Gad (Num. xxxii.). The only foreshadowing of the tendencies of the tribe which was to produce Ehud, Saul, and the perpetrators of the deed of Gibeah, is to be found in the prophetic gleam which lighted up the dying Jacob, "Benjamin shall ravin as a wolf,

in the morning he shall devour the prey, and at night he shall divide the spoil" (Gen. xlix. 27).

The proximity of Benjamin to Ephraim during the march to the Promised Land was maintained in the territories allotted to each. Benjamin lay immediately to the south of Ephraim and between him and Judah. The situation of this territory was highly favourable. It formed almost a parallelogram, of about 26 m. in length by 12 in breadth. Its eastern boundary was the Jordan, and from thence it extended to the wooded district of Kirjath-jearim, a point about eight miles west of Jerusalem, while in the other direction it stretched from the valley of Hinnom, under the "Shoulder of the Jebusite" on the south, to Bethel on the north. Thus Dan intervened between Benjamin and the Philistines, while the communications with the valley of the Jordan were in their own power. On the south the territory ended abruptly with the steep slopes of the hill of Jerusalem,—on the north it melted imperceptibly into the possessions of the friendly Ephraim. The smallness of this district, hardly larger than the county of Middlesex, was, according to the testimony of Josephus, compensated for by the excellence of the land (*ὁδὸς ἡγρῆς γῆς ἀπερῆν*, *Ant.* v. 1).<sup>b</sup> In the degenerate state of modern Palestine few traces remain of this excellence. But other and more enduring natural peculiarities remain, and claim our recognition, rendering this possession one of the most remarkable among those of the tribes.

(1.) The general level of this part of Palestine is very high, not less than 2000 feet above the maritime plain of the Mediterranean on the one side, or than 3000 feet above the deep valley of the Jordan on the other, besides which this general level or plateau is surmounted, in the district now under consideration, by a large number of eminences—defined, rounded hills—almost every one of which has borne some part in the history of the tribe. Many of these hills carry the fact of their existence in their names. Gibeon, Gibeah, Geba or Galn, all mean "hill;" Ramah and Ramathaim, "eminence;" Mizpeh, "Watch tower;" while the "ascent of Beth-horon," the "cliff Kimmou," the "pass of Mich-mash" with its two "teeth of rock," all testify to a country eminently broken and hilly.

The special associations which belong to each of these eminences, whether as sanctuary or fortress, many of them arising from the most stirring incidents in the history of the nation, will be best examined under the various separate heads.

(2.) No less important than these eminences are the torrent beds and ravines by which the upper country breaks down into the deep tracts on each side of it. They formed then, as they do still, the only mode of access from either the plains of Philistia and of Sharon on the west, or the deep valley of the Jordan on the east—the latter steep and precipitous in the extreme, the former more gradual in their declivity. Up these western passes swarmed the Philistines on their incursions during the times of Samuel and

<sup>a</sup> According to other lists, some of these "children" would seem to have been grandchildren (comp. Num. xvi. 38-41; 1 Chr. vii. 6-12, viii. 1).

<sup>b</sup> A trace of the pasture lands may be found in the mention of the "herd" (1 Sam. xi. 3); and possibly others in the names of some of the towns of Benjamin: as *hap-Parah*, "the cow;" *Zelah-ha-eleph*, "the ox-rib" (Josh. xviii. 23, 28).

<sup>c</sup> It is perhaps hardly fanciful to ask if we may not account in this way for the curious prevalence among

the names of the towns of Benjamin of the titles of *tribes*. *Ila-Avvin*, the *Avites*; *Zemuraim*, the *Zemarites*; *ha-Ophni*, the *Ophnites*; *Chephar ha-Ammonai*, the village of the *Ammonites*; *ha-Jebusi*, the *Jebusite*,—are all among the names of places in Benjamin; and we can hardly doubt that in these names is preserved the memory of many an ascent of the wild tribes of the desert from the sultry and open plains of the low level to the fresh air and secure fastnesses of the upper district.

of Saul, driving the first king of Israel right over the higher district of his own tribe, to Gilgal in the hot recesses of the Arabah, and establishing themselves over the face of the country from Michmash to Ajalon. Down these same defiles they were driven by Saul after Jonathan's victorious exploit, just as in earlier times Joshua had chased the Canaanites down the long hill of Beth-horon, and as centuries after the forces of Syria were chased by Judas Maccabaeus (1 Macc. iii. 16-24).

The passes on the eastern side are of a much more difficult and intricate character than those on the western. The principal one, which, now unfrequented, was doubtless in ancient times the main ascent to the interior, leaves the Arabah behind the site of Jericho, and breaking through the barren hills with many a wild bend and steep slope, extends to and indeed beyond the very central ridge of the table-land of Benjamin, to the foot of the eminence on which stand the ruins of *Birch*, the ancient Beeroth. At its lower part this valley bears the name of *Wady Fiwat*, but for the greater part of its length it is called *Wady Suweinit*. It is the main access, and from its central ravine branch out side valleys, conducting to Bethel, Michmash, Gibeah, Anathoth, and other towns. After the fall of Jericho this ravine must have stood open to the victorious Israelites, as their natural inlet to the country. At its lower end must have taken place the repulse and subsequent victory of Ai, with the conviction and stoning of Achan, and through it Joshua doubtless listened to the relief of the Gibeonites, and to his memorable pursuit of the Canaanites down the pass of Beth-horon, on the other side of the territory of Benjamin.

Another of these passes is that which since the time of our Saviour has been the regular road between Jericho and Jerusalem, the scene of the parable of the Good Samaritan.

Others lie further north by the mountain which bears the traditional name of Quarantania; first up the face of the cliff, afterwards less steep, and finally leading to Bethel or Taiyibeh, the ancient Ophrah (Rob. i. 570).

These intricate ravines may well have harboured the wild beasts, which, if the derivation of the names of several places in this locality are to be trusted, originally haunted the district—*zeboim*, hyaenas (1 Sam. xiii. 18), *shual* and *shaalbim*, foxes or jackals (Judg. i. 35; 1 Sam. xiii. 17), *ajalon*, gazelles.<sup>d</sup>

Such were the limits and such the character of the possession of Benjamin as fixed by those who originally divided the land. But it could not have been long before they extended their limits, since in the early lists of 1 Chr. viii. we find mention made of Benjamites who built Lod and Ono, and of others who were founders of Ajalon (12, 13), all which towns were beyond the spot named above as the westernmost point in their boundary. These places too were in their possession after the return from the captivity (Neh. xi. 35).

The contrast between the warlike character of the tribe and the peaceful image of its progenitor has been already noticed. That fierceness and power

are not less out of proportion to the smallness of its numbers and of its territory. This comes out in many scattered notices. (a) Benjamin was the only tribe which seems to have pursued archery to any purpose, and their skill in the bow (1 Sam. xx. 20, 36; 2 Sam. i. 22; 1 Chr. viii. 40, xii. 2; 2 Chr. xvii. 17) and the sling (Judg. xx. 16) are celebrated. (b) When, after the first conquest of the country, the nation began to groan under the miseries of a foreign yoke, it is to a man of Benjamin, Ehud the son of Gera, that they turn for deliverance. The story seems to imply that he accomplished his purpose on Eglon with less risk, owing to his proficiency in the peculiar practice of using his left hand, a practice apparently confined to Benjamites, though by them greatly employed (Judg. iii. 15, and see xx. 16; 1 Chr. xii. 2). (c) Baanah and Rehab, "the sons of Rimmon the Beerothite of the children of Benjamin," are the only Israelites west of the Jordan named in the whole history as captains of marauding predatory "bands" (בָּנֵי יָדָיִם); and the act of which they

were guilty—the murder of the head of their house—hardly needed the summary vengeance inflicted on them by David to testify the abhorrence in which it must have been held by all Orientals however warlike. (d) The dreadful deed recounted in Judg. xix. though repelled by the whole country, was unhesitatingly adopted and defended by Benjamin with an obstinacy and spirit truly extraordinary. Of their obstinacy there is a remarkable trait in 1 Sam. xxii. 7-18. Though Saul was not only the king of the nation, but the head of the tribe, and David a member of a family which had as yet no claims on the friendship of Benjamin, yet the Benjamites resisted the strongest appeal of Saul to betray the movements of David, and after those movements had been revealed by Doeg the Edomite (worthy member—as he must have seemed to them—of an accursed race!) they still firmly refused to lift a hand against those who had assisted him.

And yet—to return to the deed of Gibeah—in one or two of the expressions of that antique and simple narrative—the phrase "Benjamin my brother"—the anxious inquiry, "what shall we do for wives for them that remain?"—and the entreaty to be favourable to them "for our sakes"—we seem to hear as it were an echo of those tones of fond affection which have given the son of Rachel's grief so distinct a place in our minds.

That frightful transaction was indeed a crisis in the history of the tribe: the narrative undoubtedly is intended to convey that the six hundred who took refuge in the cliff of Rimmon, and who were afterwards provided with wives partly from Jabesh Gilead (Judg. xxi. 10), partly from Shiloh (xxi. 21), were the only survivors. A long interval must have elapsed between so abject a condition and the culminating point at which we next meet with the tribe.<sup>e</sup>

Several circumstances may have conduced to its restoration to that place which it was now to assume. The Tabernacle was at Shiloh in Ephraim

nology of the book of Judges may be drawn from this circumstance—since no shorter period would have been sufficient for the tribe to have recovered such almost total extermination, and to have reached the numbers and force indicated in the lists of 1 Chr. xii. 1-8, vii. 6-12, viii. 1-40.

<sup>d</sup> The subject of the connexion between the topography of Benjamin and the events which took place there is treated in the most admirable manner in the 4th chapter of Mr. Stanley's *Sinai and Palestine*. Very much of the above article is drawn from that source.

<sup>e</sup> A fair argument in favour of the received chrono-

during the time of the last Judge; but the Ark was in Benjamin at Kirjath-jearim. Ramah, the official residence of Samuel, and containing a sanctuary greatly frequented (1 Sam. ix. 12, &c.),—Mizpeh, where the great assemblies of "all Israel" took place (1 Sam. vii. 5),—Bethel, perhaps the most ancient of all the sanctuaries of Palestine, and Gibeon, specially noted as "the great high place" (2 Chr. i. 3), were all in the land of Benjamin. These must gradually have accustomed the people who resorted to these various places to associate the tribe with power and sanctity, and they tend to elucidate the anomaly which struck Saul so forcibly, "that all the desire of Israel" should have been fixed on the house of the smallest of its tribes (1 Sam. ix. 21).

The struggles and contests which followed the death of Saul arose from the natural unwillingness of the tribe to relinquish its position at the head of the nation, especially in favour of Judah. Had it been Ephraim, the case might have been different, but Judah had as yet no connexion with the house of Joseph, and was besides the tribe of David, whom Saul had pursued with such unrelenting enmity. The tact and sound sense of Abner, however, succeeded in overcoming these difficulties, though he himself fell a victim in the very act of accomplishing his purpose, and the proposal that David should be "king over Israel" was one which "seemed good to the whole house of Benjamin," and of which the tribe testified its approval, and evinced its good faith, by sending to the distant capital of Hebron a detachment of 3000 men of the "brethren of Saul" (1 Chr. xii. 29). Still the insults of Shimel and the insurrection of Sheba are indications that the soreness still existed, and we do not hear of any cordial co-operation or firm union between the two tribes until a cause of common quarrel arose, at the disruption, when Rehoboam assembled "all the house of Judah with the tribe of Benjamin, to fight against the house of Israel, to bring the kingdom again to the son of Solomon" (1 K. xii. 21; 2 Chr. xi. 1). Possibly the seal may have been set to this by the fact of Jeroboam having just taken possession of Bethel, a city of Benjamin, for the calf-worship of the northern kingdom (1 K. xii. 29). On the other hand Rehoboam fortified and garrisoned several cities of Benjamin, and wisely dispersed the members of his own family through them (2 Chr. xi. 10-12). The alliance was further strengthened by a covenant solemnly undertaken (2 Chr. xv. 9), and by the employment of Benjamites in high positions in the army of Judah (2 Chr. xvii. 17). But what above all must have contributed to strengthen the alliance was the fact that the Temple was the common property of both tribes. True, it was founded, erected, and endowed by princes of "the house of Judah," but the city of "the Jebusite" (Josh. xviii. 25), and the whole of the ground north of the Valley of Hinnom, was in the lot of Benjamin. In this latter fact is literally fulfilled the prophecy of Moses (Deut. xxxiii. 12): Benjamin "dwelt between" the "shoulders" of the ravines which encompass the Holy City on the west, south, and east (see a good treatment of this point in Blunt's *Undes. Coincidences*, Pt. II. §xvii.).

Henceforward the history of Benjamin becomes

<sup>1</sup> Bethel, however, was on the very boundary line, and centuries before this date was inhabited by both Ephraimites and Benjamites (Judg. xix. 10).

merged in that of the southern kingdom. That the tribe still retained its individuality is plain from the constant mention of it in the various censuses taken of the two tribes, and on other occasions, and also from the lists of the men of Benjamin who returned with Zerubbabel (Ezr. ii.; Neh. vii.) and took possession of their old towns (Neh. xi. 31-35). At Jerusalem the name must have been always kept alive, if by nothing else, by the name of "the high gate of Benjamin" (Jer. xx. 2). [JERUSALEM.]

But though the tribe had thus given up to a certain degree its independent existence, it is clear that the ancient memories of their house were not allowed to fade from the recollections of the Benjamites. The genealogy of Saul, to a late date, is carefully preserved in the lists of 1 Chr. (viii. 33-40, ix. 39-44); the name of Kish recurs as the father of Mordecai (Est. ii. 5), the honoured deliverer of the nation from miseries worse than those threatened by Nahash the Ammonite. But it was reserved for a greater than these to close the line of this tribe in the sacred history. The royal name once more appears, and "Saul who also is called Paul" has left on record under his own hand that he was "of the stock of Israel, of the tribe of Benjamin." It is perhaps more than a mere fancy to note how remarkably the chief characteristics of the tribe are gathered up in his one person. There was the fierceness, in his persecution of the Christians; and there were the obstinacy and persistence, which made him proof against the tears and prayers of his converts, and "ready not to be bound only, but also to die for the name of the Lord Jesus" (Acts xxi. 12, 13). There were the force and vigour to which natural difficulties and confined circumstances formed no impediment; and lastly, there was the keen sense of the greatness of his house, in his proud reference to his forefather "Saul the son of Cis, a man of the tribe of Benjamin."

Be this as it may, no nobler hero could be found to close the rolls of the worthies of his tribe—no prouder distinction could be desired for Benjamin than that of having produced the first judge of its nation, the first king, and finally, when Judaism gave place to Christianity, the great Apostle of the Gentiles.

2. A man of the tribe of Benjamin, son of Bilhan, and the head of a family of warriors (1 Chr. vii. 10).

3. One of the "sons of Harim;" an Israelite in the time of Ezra, who had married a foreign wife (Ezr. x. 32). [G.]

BENJAMIN, HIGH GATE, or GATE, OF (שַׁעַר בִּנְיָמִן), Jer. xx. 2, xxxvii. 13, xxxviii. 7; Zech. xiv. 10. [JERUSALEM.]

BENO (בְּנוֹ); LXX. translates υἱοι; *Benno*, a Levite of the sons of Memri (1 Chr. xxiv. 26, 27).

BEN-O'NI (בֶּן-אֲוִי), son of my sorrow, or of my strength, i. e. of my last effort, Hiller, *Onom.* 300, &c.; υἱὸς ὀδύνης μου; *Benoni*, id est filius doloris mei, the name which the dying Rachel gave to her newly-born son, but which by his father was changed into BENJAMIN (Gen. xxxv. 18).

BEN-ZOHEH (בֶּן-זֹהֶה); υἱὸς Ζωδῆ; Alex. Ζωχδῆ; *Zoheth*, a name occurring among the descendants of Judah (1 Chr. iv. 20). The passage

appears to be a fragment, and as if the name of a son of the Zoheth just mentioned had originally followed. A. V. follows Vulgate.

**BE'ON** (בֵּעוֹן; *Baia*; Alex. βαμά; *Beon*), a place on the east of Jordan (Num. xxxii. 3), doubtless a contraction of BAAL-MEON (comp. ver. 38).

**BE'OR** (בְּעוֹר; *Beor*; *Beor*). 1. The father of BEA, one of the early Edomite kings (Gen. xxxvi. 32; 1 Chr. i. 43). 2. Father of Balaam (Num. xxii. 5, xxiv. 3, 15; xxxi. 8; Josh. xiii. 22, xxiv. 9; Mic. vi. 5). He is called BOSOR in the N. T. [BEA.]

**BE'RA** (בְּרָע; *Vat.* and Alex. βαλλά; *Joseph.* βαλλάς; *Bera*), king of Sodom at the time of the invasion of the five kings under Chedorlaomer (Gen. xiv. 2; also 17 and 21).

**BERA'CHAH** (בְּרָכָה; *Bercha*; *Baracha*), a Benjamite, one of "Saul's brethren," who attached himself to David at Ziklag (1 Chr. xii. 3).

**BERA'CHAH, VALLEY OF** (עֶמְקַ בְּרָכָה; *Koila*ς *Eblorlas*; *vallis benedictionis*), a valley (Jos. τινα κοίλον καὶ παραγγελίᾳ τόπον) in which Jehoshaphat and his people assembled to "bless" Jehovah after the overthrow of the hosts of Moabites, Ammonites, and Meunim, who had come against them, and which from that fact acquired its name of "the valley of blessing" (2 Chr. xx. 26). The place is remarkable as furnishing one of the latest instances in the O. T. of a name bestowed in consequence of an occurrence at the spot.

The name of *Bereikht* (بريكت) still survives, attached to ruins in a valley of the same name lying between Tekna and the main road from Beth-lehem to Hebron, a position corresponding accurately enough with the locality of the battle as described in 2 Chr. xx. (Rob. iii. 275; the discovery is due to Wolcott; see Ritter, *Jordan*, 635.) It must not be confounded with Caphar-barucha, now probably *Beni Naim*, an eminence on very high ground, 3 or 4 miles east of Hebron, commanding an extensive view of the Dead Sea, and traditionally the scene of Abraham's intercession for Sodom. The tomb of Lot has been shown there since the days of Mandeville (see Ireland, 685; Rob. i. 489-91). [G.]

**BERACHI'AH** (בְּרַחִיָּה; *Berechiah*; *Berachia*; *Barachia*), a Gershonite Levite, father of Asaph the singer (1 Chr. vi. 39). [BERECHIAH.]

**BERAI'AH** (בְּרַאִיָּה; *Bapaa*; *Baraia*), son of Shimhi, a chief man of Benjamin (1 Chr. viii. 21).

**BERE'A** (Βερεΐα). 1. A city of Macedonia, to which St. Paul retired with Silas and Timotheus, in the course of his first visit to Europe, on being persecuted in Thessalonica (Acts xvii. 10), and from which, on being again persecuted by emissaries from Thessalonica, he withdrew to the sea for the purpose of proceeding to Athens (ib. 14, 15). The community of Jews must have been considerable in Berea, and their character is described in very favourable terms (ib. 11). Sopater, one of St. Paul's missionary companions, was from this place (Βερεῖας, Acts xx. 4). He accompanied the apostle on his return from the second visit to Europe

(ib.); and he appears to have previously been with him, in the course of that second visit, at Corinth, when he wrote the Epistle to the Romans (Rom. xvi. 21).

Berea, now called *Verria* or *Kara-Verria*, is fully described by Leake (*Northern Greece*, vol. iii. pp. 290 seqq.), and by Cousinery (*Voyage dans la Macédoine*, vol. i. pp. 69 seqq.). Situated on the eastern slope of the Olympian mountain-range, with an abundant supply of water, and commanding an extensive view of the plain of the Axios and Halicmon, it is regarded as one of the most agreeable towns in Rumili, and has now 15,000 or 20,000 inhabitants. A few ancient remains, Greek, Roman, and Byzantine, still exist here. Two roads are laid down in the Itineraries between Thessalonica and Berea, one passing by Pella. St. Paul and his companions may have travelled by either of them. Two roads also connect Berea with Dium, one passing by Pydna. It was probably from Dium that St. Paul sailed to Athens, leaving Silas and Timotheus behind; and possibly 1 Thess. iii. 2 refers to a journey of Timotheus from Berea, not from Athens. [TIMOTHY.] The coin in *Achern's Numismatic Illustrations of the N. T.* p. 46, is erroneously assigned to the Macedonian Berea, and belongs to the following.

2. The modern *Aleppo*, mentioned in 2 Macc. xiii. 4, in connexion with the invasion of Judaea by Antiochus Eupator, as the scene of the miserable death of Menelaus. This seems to be the city, in which Jerome says that certain persons lived, who possessed and used St. Matthew's Hebrew Gospel (*De Vir. Illust.* c. 3).

3. (*Bepia*), a place in Judaea, apparently not very far from Jerusalem, where Bacchides, the general of Demetrius, encamped shortly before the engagement in which Judas Maccabaeus was slain (1 Macc. ix. 4. See Joseph. *Ant.* xii. 11, §1). [J. S. H.]

**BERECHIAH** (בְּרַחִיָּה and בְּרַכִּיָּה; *Berachia*; *Barachia*). 1. One of the sons of Zerubabel, and a descendant of the royal family of Judah (1 Chr. iii. 20).

2. A man mentioned as the father of Meshullam who assisted in rebuilding the walls of Jerusalem (Neh. iii. 4, 30; vi. 18).

3. A Levite of the line of Elkanah (1 Chr. ix. 16).

4. A doorkeeper for the ark (1 Chr. xv. 23).

5. Berechiah, one of the chief men of the tribe of Ephraim in time of king Ahaz (2 Chr. xxviii. 12).

6. Berechiah, father of Asaph the singer (1 Chr. xv. 17). [BERACHIAH.]

7. Berechiah, father of Zechariah the prophet (Zech. i. 1, also 7). [G.]

**BERED** (בְּרֵד; *Bapad*; *Barad*). 1. A place in the south of Palestine, between which and Kadeshi lay the well Lachai-roi (Gen. xvi. 14). The name is variously given in the ancient versions: Peschito, *Gadar*, גַּדָּר? = *Gerar*; Arab. *Iared*, يارد, probably a mere corruption of the Hebrew name; Onkelos, *Chagra*, חֲגָרָה (elsewhere employed in the Targums for "Shur"; can it be connected with Hagar, הָגָר, הֲגָרִי?); Ps.-Jonathan, *Chalutza*, חֲלוּצָא, i. e. the Elusa, "Ελουσα, of Ptolemy and the ecclesiastical writers, now *al-Khūssā*, on the Hebron road, about 12 miles south of Beersheba

(Rob. i. 201, 2; Stewart, 205; Reland, 755). We have the testimony of Jerome (*Vita S. Hilarionis*) that Elusa was called by its inhabitants *Bareo*, which would be an easy corruption of Bered, בֶּרֶד, being read for בֶּרֶד. Chalutza is the name elsewhere given in the Arabic version for "Shur" and for "Genu."

2. A son or descendant of Ephraim (1 Chr. vii. 20), possibly identical with Becher in Num. xxvi. 35, by a mere change of letters (בֶּרֶד for בֶּכֶר). [G.]

### BERENICE. [BERNICE.]

BE'RI (בֶּרִי; *Bapiv*; *Beri*), son of Zophah, of the tribe of Asher (1 Chr. vii. 36).

BERIAH (בְּרִיעָה, *in evil*, or *a gift*, see No. 2; *Bepid*, *Bapid*; *Baria*, *Beria*, *Brie*). 1. A son of Asher (Gen. xli. 17; Num. xxvi. 44, 45), from whom descended the "family of the Berities," בְּרִיעִי, *Bepiat*, *familia Bricitarum* (Num. xxvi. 44).

2. A son of Ephraim, so named on account of the state of his father's house when he was born. "And the sons of Ephraim; Shuthelah, and Bered his son, and Tahath his son, and Eladah his son, and Tahath his son, and Zabab his son, and Shuthelah his son, and Ezer, and Elead, whom the men of Gath [that were] born in [that] land slew" [*lit.* "and the men . . . slew them"], "because they came down to take away their cattle. And Ephraim their father mourned many days, and his brethren came to comfort him. And when he went in to his wife, she conceived, and bare a son, and he called his name Beriah, because it went evil with his house" [*lit.* "because evil" or "a gift" "was to his house" בְּרִיעָה הָיְתָה בְּבֵיתוֹ] *וְשֵׁם*

*ἐν κακοῖς ἐγένετο ἐν οἴκῳ μου*, LXX.: "eo quod in malis domus ejus ortus esset," Vulg.] (1 Chr. vii. 20-23). With respect to the meaning of the name, Gesenius prefers the rendering "in evil" to "a gift," as probably the right one. In this case בְּרִיעָה in the explanation would be, according to him, רָעָה with *Beth essentiae* (*Thes.*

s. v.). It must be remarked, however, that the supposed instances of *Beth essentiae* being prefixed to the subject in the O. T. are few and inconclusive, and that it is disputed by the Arabian grammarians if the parallel "redundant Bé" of the Arabic be ever so used (comp. *Thes.* pp. 174, 175, where this use of "redundant Bé" is too arbitrarily denied). The LXX. and Vulg. indicate a different construction, with an additional variation in the case of the former, ("my house" for "his house,") so that the rendering "in evil" does not depend upon the construction proposed by Gesenius. Michaelis suggests that בְּרִיעָה may mean a spontaneous gift of God, beyond expectation and the law of nature, as a son born to Ephraim now growing old might be called (*Suppl.* pp. 224, 225). In favour of this meaning, which, with Gesenius, we take in the simple sense of "gift," it may be urged, that it is unlikely that four persons would have borne a name of an unusual form, and that a case similar to that here supposed is found in the naming of Seth (Gen. iv. 25). This short notice is of no slight historical importance; especially as it refers to a period of Hebrew history respecting which the Bible affords us no other like information. The event must be assigned to the time between Jacob's death and the beginning of the oppression. The indications that

guide us are, that some of Ephraim's sons must have attained to manhood, and that the Hebrews were still free. The passage is full of difficulties. The first question is: What sons of Ephraim were killed? The persons mentioned do not all seem to be his sons. Shuthelah occupies the first place, and a genealogy of his descendants follows as far as a second Shuthelah, the words "his son" indicating a direct descent, as Houbigant (ap. Barrett, *Synopsis in loc.*) remarks, although he very needlessly proposes conjecturally to omit them. A similar genealogy from Beriah to Joshua is given in ver. 25-27. As the text stands there are but three sons of Ephraim mentioned before Beriah—Shuthelah, Ezer, and Elead—all of whom seem to have been killed by the men of Gath, though it is possible that the last two are alone meant, and the first of whom is stated to have left descendants. In the enumeration of the Israelite families in Numbers four of the tribe of Ephraim are mentioned, sprung from his sons Shuthelah, Becher, and Tahai, and from Erna, son or descendant of Shuthelah (xxvi. 35, 36). The second and third families are probably those of Beriah and a younger son, unless the third is one of Beriah, called after his descendant Tahai (1 Chr. vii. 25); or one of them may be that of a son of Joseph, since it is related that Jacob determined that sons of Joseph who might be born to him after Ephraim and Manasseh should "be called after the name of their brethren in their inheritance" (Gen. xlviii. 6). See however BECHER. There can be no doubt that the land in which the men of Gath were born is the eastern part of Lower Egypt, if not Goshen itself. It would be needless to say that they were born in their own land. At this time very many foreigners must have been settled in Egypt, especially in and about Goshen. Indeed Goshen is mentioned as a non-Egyptian country in its inhabitants (Gen. xli. 34), and its own name as well as nearly all the names of its cities and places mentioned in the Bible, save the cities built in the oppression, are probably Semitic. In the Book of Joshua, Shihor, the Nile, here the Pelusiac branch, is the boundary of Egypt and Canaan, the Philistine territories apparently being considered to extend from it (Josh. xiii. 2, 3). It is therefore very probable that many Philistines would have settled in a part of Egypt so accessible to them and so similar in its population to Canaan as Goshen and the tracts adjoining it. Or else these men of Gath may have been mercenaries like the Cherethim (in Egyptian Shayratana) who were in the Egyptian service at a later time, as in David's, and to whom lands were probably allotted as to the native army. Some suppose that the men of Gath were the aggressors, a conjecture not at variance with the words used in the relation of the cause of the death of Ephraim's sons, since we may read "when (כִּי) they came down," &c., instead of "because," &c. (*Bagster's Bible, in loc.*), but it must be remembered that this rendering is equally consistent with the other explanation. There is no reason to suppose that the Israelites at this time may not have sometimes engaged in predatory or other warfare. The warlike habits of Jacob's sons are evident in the narrative of the vengeance taken by Simeon and Levi upon Hamor and Shechem (Gen. xxxiv. 25-29), and of their posterity in the account of the fear of that Pharaoh who began to oppress them lest they should, in the event of war in the land, join with the enemies of his people, and by fighting

against them get them out of the country (Ex. i. 8-10). It has been imagined, according to which side was supposed to have acted the aggressor, that the Gittites descended upon the Ephraimites in a predatory excursion from Palestine, or that the Ephraimites made a raid into Palestine. Neither of these explanations is consistent with sound criticism, because the men of Gath are said to have been born in the land, that is, to have been settled in Egypt, as already shown, and the second one, which is adopted by Bunsen (*Egypt's Place*, i. pp. 177, 178), is inadmissible on the ground that the verb used, יָרַד, "he went down," or "descended," is applicable to going into Egypt, but not to coming from it. The Rabbinical idea that these sons of Ephraim went to take the Promised Land needs no refutation. (For these various theories see *Poli Synopsis in loc.*)

3. A Benjamite. He and his brother Sheima were ancestors of the inhabitants of Ajalon, and adopted the inhabitants of Gath (1 Chr. viii. 13, 16).

4. A Levite (1 Chr. xliii. 10, 11). [R. S. P.]

BERITES. [BERIAH, 1.]

BERITES, THE (בְּרִיתִים; *Ev Xapβή*), a tribe or people who are named with Abel and Beth maachah—who were therefore doubtless situated in the north of Palestine—mentioned only as having been visited by Job in his pursuit after Sheba the son of Bichri (2 Sam. xv. 14). The expression is a remarkable one, "all the Berites" (כָּל הַבְּרִיתִים, "all the Bithron"). The Vulgate has a different reading—omnesque viri cuncti congregati fuerant—apparently reading for הַבְּרִיתִים by an easy transposition and change of letters בְּרִיתִים, i.e. the young men, and this is in Ewald's opinion the correct reading (*Gesch.* iii. 249, *note*). [G.]

BERITH, THE GON (בְּרִית), Judg. iv. 46. [BAAL-BERITH, p. 146.]

BERNICE and BERENICE (Βερνίκη, also in *Bernice*; *Berenice* = Φερηνίκη, see Sturz, *Diad. Mace.* p. 31; the form Beronice is also found), the eldest daughter of Herod Agrippa I. (Acts vii. 1, &c.). She was first married to her uncle Herod, king of Chalcis (Joseph. *Ant.* xix. 5, §1), and after his death (A.D. 48) she lived under circumstances of great suspicion with her own brother Agrippa II. (Joseph. *Ant.* xv. 7, 3; Juvenal, *Sat.* vi. 156 ff.), in connexion with whom she is mentioned Acts xxv. 13, 23, xxvi. 30, as having visited Festus on his appointment as Procurator of Judea. She was a second time married, to Polemon, king of Cilicia, but soon left him, and returned to her brother (Joseph. *ibid.*). She afterwards became the mistress of Vespasian (Tacit. *Hist.* ii. 81), and of his son Titus (Sueton. *Tit.* 7). [H. A.]

BER'ODACH-BAL'ADAN. 2 K. xx. 12. [MERODACH-BALADAN.]

BER'OTH (*Βηρώθ*; Alex. *Βηρώθ*), 1 Esd. v. 9. [BEROTH.]

BE'ROTHAH, BE'ROTHAI (בְּרוֹתַי, בְּרוֹתַי; *Berotha, Bereth*). The first of these two names, each of which occurs once only, is given by Ezekiel (xlvii. 16) in connexion with Hamath and

Damascus as forming part of the northern boundary of the promised land. The second is mentioned (2 Sam. viii. 8) as the name of a city of Zobah taken by David, also in connexion with Hamath and Damascus. The slightness of these references makes it impossible to identify the names with any degree of probability, or even to decide whether they refer to the same locality or not. The well-known city *Beirút* (Berytus) naturally suggests itself as identical with one at least of the names; but in each instance the circumstances of the case seem to require a position further east, since Ezekiel places Berothah between Hamath and Damascus, and David's war with the king of Zobah led him away from the sea-coast towards the Euphrates (2 Sam. viii. 3). In the latter instance the difficulty is increased by the Hebrew text reading in 1 Chr. xviii. 8, *CHU* instead of Berothai, and by the fact that both in Samuel and Chronicles the Greek translators, instead of giving a proper name, translate by the phrase *ἐκ τῶν ἐκλεκτῶν πόλεων*, clearly showing that they read either the same text in each passage, or at least words which bore the same sense. Fürst regards Berothah and Berothai as distinct places, and identifies the first with Berytus. Mislin (*Scripta Litur.* i. 244) derives the name from the wells (*Beeroth*), which are still to be seen bored in the solid rock at *Beirút*. [F. W. G.]

BE'ROTHITE, THE (1 Chr. xi. 39). [BEROTH.]

BERYL (בִּרְזִיתִי, *Turshish; θήρυλλος*), a precious stone, the first in the fourth row on the breastplate of the high-priest (Ex. xxviii. 20, xxix. 13). The colour of the wheels in Ezekiel's vision was as the colour of a beryl-stone (Ez. i. 16, x. 9); it is mentioned among the treasures of the king of Tyre in Ez. xxviii. 13, where the marginal reading is *chrysolite*; in Cant. v. 14 as being set in rings of gold; and in Dan. x. 6 the body of the man whom Daniel saw in vision is said to be like the beryl. In Rev. xxi. 19 the beryl is the 8th foundation of the city, the chrysolite being the 7th. In Ex. xxviii. 20 the LXX. have *χρυσόλιθος*, while they render the 11th stone, *הַשֵּׁנִי*, by *βηρύλλιον*. In Ez. i. 16 they have *θαρσεῖς*, in x. 9 *λίθος ἑνθρακος*, and xviii. 13 *ἑνθραξ*. In Cant. v. 14 and in Dan. x. 6 *θαρσεῖς*. This variety of rendering shows the uncertainty under which the old interpreters laboured as to the stone actually meant. Josephus takes it to have been the chrysolite, a golden-coloured gem, the topaz of more recent authors, found in Spain (Plin. xxxvii. 109), whence its name *בִּרְזִיתִי* (see Braun, *de Vest. Sac. Heb.* lib. ii. c. 18, §193). Luther suggests *turquoise*, while others have thought that amber was meant. Kailisch in the two passages of Exodus translates *בִּרְזִיתִי* by chrysolite, which he describes as usually green, but with different degrees of shade, generally transparent, but often only translucent—harder than glass, but not so hard as quartz. The passage in Rev. xxi. 20 is adverse to this view. Schleusner (i. p. 446) says the *θήρυλλος* is aquamarine. "The beryl is a gem of the genus emerald, but less valuable than the emerald. It differs from the precious emerald in not possessing any of the oxide of chrome. The colours of the beryl are greyish-green, blue, yellow, and sometimes nearly white." (Humble, *Dict. Geol. &c.* p. 30.) [W. D.]

**BERZEL'US** (Φαρζελάδος; Alex. Ζορ(ε)λάδου; Pharyzeleu), 1 Esd. i. 38. [BARZILLAI.]

**BESAI** (בֶּסַי; Βησαι, Basí; Besce). "Children of Besai" were among the Nethinim who returned to Judaea with Zerubbabel (Ezr. ii. 49; Neh. vii. 52). [BASAI.]

**BESODEIAH** (בֶּסֹדִיָּה; Βασωδία, "Aßδεια; Besodia), father of Meshullam, and one of the repairers of the wall of Jerusalem (Neh. iii. 6).

**BESOR, THE BROOK** (נַחַל הַבְּשׂוֹר; χειμῶν-ρος τοῦ Βασόρ; torrens Besor), a torrent-bed or wady in the extreme south of Judah, of which mention occurs only in 1 Sam. xxx. 9, 10, 21. It is plain from the conditions of the narrative that it must have been south of Ziklag, but hitherto the situation of neither town nor wady has been identified with any probability. The name may signify "fresh" or "cool" (Fürst). [G.]

**BE'TAH** (בֵּיתָה; ἡ Μερεβάδα, quasi בֵּית מֶרֶבָּה; Alex. ἡ Μαρβάδα; Bete), a city belonging to Hadadezer, king of Zobah, mentioned with Beithai as having yielded much spoil of brass to David (2 Sam. viii. 8). In the parallel account 1 Chr. xviii. 8, the name is called by an inversion of letters, T'ibchath. Ewald (*Gesch.* ii. 195) pronounces the latter to be the correct reading, and compares it with Tebach (Gen. xxii. 24). [G.]

**BET'ANE** (Βετάνη; Alex. Βαιτάνη, i. e. prob. Βαιτάνη; Vulg. omits), a place apparently south of Jerusalem (Jud. i. 9), and possibly identical with Βηθανία of Eusebius (*Onom.* "Apl, Ain), two miles from the Terebinth of Abraham and four from Hebron. This has been variously identified with Betharath, Bethaninun, and Betaneh or Ecbatana in Syria, placed by Pliny (v. 17) on Carmel (Winer, s. v. *Betane*). Bethany is inadmissible from the fact of its unimportance at the time, if indeed it existed at all. [G.]

**BE'TEN** (בֵּיתָן; Βαιτόκ; Alex. Βαιτνέ; Beten), one of the cities on the border of the tribe of Asher (Josh. xix. 25, only). By Eusebius (*Onom.* Βαιτνέ) it is said to have been then called Bebeten, and to have lain eight miles east of Ptolemais. No other trace of its existence has been discovered elsewhere. [G.]

**BETH** (בֵּית, according to Gesenius (*Thes.* and *Lex.*)), from a root, בָּנָה, to pass the night, or from בָּנָה, to build, as *domus*, *domus*, from *δέμω*, the most general word for a house or habitation. Strictly speaking it has the force of a settled stable dwelling, as in Gen. xxiii. 17, where the building of a "house" marks the termination of a stage of Jacob's wanderings (comp. also 2 Sam. vii. 2, 6, and many other places); but it is also employed for a dwelling of any kind, even for a tent, as in Gen. xxiv. 32, where it must refer to the tent of Laban; also Judg. xviii. 31, 1 Sam. i. 7, to the tent of the tabernacle, and 2 K. xxiii. 7, where it expresses the textile materials (A. V. "hangings") for the tents of Astarte. From this general force the transition was natural to a house in the sense of a family, as Ps. cvii. 41, "families" (Prayer-Book, "households"), or a pedigree, as Ezr. ii. 59. In 2 Sam. xiii. 7, 1 K. xiii. 7, and other places, it has the sense of "home," i. e. "to the house." Beth

also has some collateral and almost technical meanings, similar to those which we apply to the word "house," as in Ex. xxv. 27 for the "places" or sockets into which the bars for carrying the table were "housed;" and others.

Like *Aedes* in Latin and *Dom* in German, Beth has the special meaning of a temple or house of worship, in which sense it is applied not only to the tabernacle (see above) or temple of Jehovah (1 K. iii. 2; vi. 1, &c.), but to those of false gods—Dagon (Judg. xvi. 27; 1 Sam. v. 2), Rimmon (2 K. v. 18), Baal (2 K. x. 21), Nisroch (2 K. xix. 37), and other gods (Judg. ix. 27). "Bajith" in Is. xv. 2 is really In-Bajith = "the Temple"—meaning some well-known idol fane in Moab. [BAJITH.]

Beth is more frequently employed in combination with other words to form the names of places than either Kirjath, Hatzar, Beer, Ain, or any other word. A list of the places compounded with Beth is given below in alphabetical order; but in addition to these it may be allowable here to notice two, which, though not appearing in that form in the A. V., yet do so in the LXX., probably with greater correctness.

**BETH-EKED** (בֵּית עֶקֶד; Βαιθακῆδ; camera pastorum), the "shearing house," at the pit or well (בֵּית) of which, the forty-two brethren of Ahaziah were slain by Jehu (2 K. x. 12). It lay between Jezreel and Samaria according to Jerome (*Onom.*) 15 miles from the town of Legio, and in the plain of Esdraelon.

**BETH-HAGGAN** (בֵּית הַגָּן; Βαιθγαν; Domus horti), A. V. "the garden-house" (2 K. ix. 27), one of the spots which marked the flight of Ahaziah from Jehu. It is doubtless the same place as EN-GANNIM, "spring of gardens," the modern *Jenin*, on the direct road from Samaria northward, and overlooking the great plain (Stanley, 349, note). [G.]

**BETH-AB'ARA** (Βηθαβάρ, quasi בֵּית אַבְרָהָם, house of ford or ferry), a place beyond Jordan, πέραν τοῦ Ἰορδάν, in which, according to the Received Text of the N. T., John was baptizing (John i. 28), apparently at the time that he baptized Christ (comp. ver. 29, 39, 35). If the reading of the Received Text be the correct one, Bethabara may be identical with Beth-barah, the ancient ford of Jordan, of which the men of Ephraim took possession after Gideon's defeat of the Midianites [BETH-NIMRAH]; or, which seems more likely, with Beth-nimrah, on the east of the river, nearly opposite Jericho. [BETH-NIMRAH.] But the oldest MSS. (A B) and the Vulgate have not Bethabara but Bethany, a reading which Origen (*ad loc.*) states to have obtained in almost all the copies of his time, σχέδον πάντα τὰ ἀντίγραφα, though altered by him in his edition of the Gospel on topographical grounds. In favour of Bethabara are, (a) the extreme improbability of so familiar a name as Bethany being changed by copyists into one so unfamiliar as Bethabara, while the reverse—the change from an unfamiliar to a familiar name—is of frequent occurrence. (b) The fact that Origen, while admitting that the majority of MSS. were in favour of Bethany, decided notwithstanding for Bethabara. (c) That Bethabara was still known in the days of Eusebius (*Onomasticon*, s. v.), and

\* In the *Onomasticon*, however, Jerome has Bethabara.

greatly resorted to by persons desirous of baptism (*vitali gurgite baptizantur*).

Still the fact remains that the most ancient MSS. have "Bethany," and that name has been accordingly restored to the text by Lachmann, Tischendorf, and other modern editors. At this distance of time, and in the absence of any careful research on the east of Jordan, it is impossible to decide on evidence so slight and conflicting. It must not be overlooked that if Bethany be accepted, the definition "beyond Jordan" still remains, and therefore another place must be intended than the well-known residence of Lazarus. [G.]

**BETH-ANATHI** (בֵּית אֲנָתִי; Βαθθαμέ, Βαθαρὰ, Βαθνήθ; *Bethanath*), one of the "fenced cities" of Naphtali, named with Bethshemesh (Josh. xix. 38); from neither of them were the Canaanites expelled (Judg. i. 33). By Eusebius and Jerome (*Onom. s. v. Avelp, Βαθμὰ, Βηθανάδα*) it is spoken of as a village called Batanana, 15 miles eastward of Caesarea (Diocæsarea, or Sepphoris), and reputed to contain medicinal springs, *λουτρά ἰσχυρά*. Nothing, however, is known to have been discovered of it in modern times. [G.]

**BETH-ANOTH** (בֵּית אֲנוֹת; Βαθανάμ; *Beth-anoth*), a town in the mountainous district of Judah, named with Halhul, Bethzur, and others, in Josh. xv. 59 only. It is very probably the modern *Beit-'anûn*, the remains of which, near to those of *Halhul* and *Beit Sâr*, were discovered by Wolcott and visited by Robinson (iii. 281). [G.]

**BETHANY** (quasi בֵּית הַיְּתָן, *house of dates*; Βηθανία; *Bethania*), a village which, scanty as are the notices of it contained in Scripture, is more intimately associated in our minds than perhaps any other place with the most familiar acts and scenes of the last days of the life of Christ. It was at Bethany that He raised Lazarus from the dead, and from Bethany that He commenced His "triumphal entry" into Jerusalem. It was His nightly resting-place during the time immediately preceding His passion; and here at the houses of Martha and Mary, and of Simon the leper, we are admitted to view Him, more nearly than elsewhere, in the circle of His domestic life.

Though it was only at a late period of the life of our Lord that His connexion with Bethany commenced, yet this is fully compensated for by its having been the scene of His very last acts on earth. It was somewhere here, on these wooded slopes beyond the ridge of Olivet, that the Apostles stood when they last beheld His figure, as, with "uplifted hands"—still, to the very moment of disappearance, "blessing" them—He was "taken up" into the "cloud" which "received" and hid Him from their "steadfast" gaze, the words still ringing in their ears, which prove that space and time are no hindrance to the connexion of Christians with their Lord—"Lo I am with you always, even to the end of the world."

The little information we possess about Bethany is entirely gathered from the N. T., neither the O. T. nor the Apocrypha having apparently any

allusion to it.\* It was situated "at" (πρὸς) the Mount of Olives (Mark xi. 1; Luke xix. 29), about fifteen stadia from Jerusalem (John xi. 18), on or near the usual road from Jericho to the city (Luke xix. 29, comp. 1; Mark xi. 1, comp. x. 46), and close by and west (?) of another village called *BETHPIAGE*, the two being several times mentioned together.

There never appears to have been any doubt as to the site of Bethany, which is now known by a name derived from Lazarus—*el 'Azariyeh* (العازرية).

It lies on the eastern slope of the Mount of Olives, fully a mile beyond the summit, and not very far from the point at which the road to Jericho begins its more sudden descent towards the Jordan valley (Lindsay, 91, and De Saulcy, 120). The spot is a woody hollow more or less planted with fruit-trees,—olives, almonds, pomegranates, as well as oaks, and carobs; the whole lying below a secondary ridge or hump, of sufficient height to shut out the village from the summit of the mount (Rob. i. 431, 432; Stanley, 189; Bonar, 138, 9).

From a distance the village is, to use the emphatic words of the latest published description, "remarkably beautiful"—"the perfection of retirement and repose"—"of seclusion and lovely peace" (Bonar, 139, 230, 310, 337; and see Lindsay, 69). It is difficult to reconcile these glowing descriptions with Mr. Stanley's words (189), or with the impression which the present writer derived from the actual view of the place. Possibly something of the difference is due to the different time of year at which the visits were made.

*El-'Azariyeh* itself is a ruinous and wretched village, a "wild mountain hamlet" of "some twenty families," the inhabitants of which display even less than the ordinary eastern thrift and industry (Rob. i. 432; Stanley, 189; Bonar, 310). In the village are shown the traditional sites of the house and tomb of Lazarus; the former the remains of a square tower, apparently of old date, though certainly not of the age of the kings of Judah, to which De Saulcy assigns it (128)—the latter a deep vault excavated in the lime-stone rock, the bottom reached by 26 steps. The house of Simon the leper is also exhibited. As to the real age and character of these remains there is at present no information to guide us.

Schwarz maintains *el 'Azariyeh* to be AZAI; and would fix Bethany at a spot which, he says, the Arabs call *Beth-banan*, on the mount of Offence above Siloam (263; 135).

These traditional spots are first heard of in the 4th century—in the *Itinerary* of the Bourdeaux Pilgrim, and the *Onomasticon* of Eusebius and Jerome; and they continued to exist, with certain varieties of buildings and of ecclesiastical establishments in connexion therewith, down to the 16th century, since which the place has fallen gradually into its present decay. This part of the history is well given by Robinson (i. 432-3). By Mandeville and other mediæval travellers the town is spoken of as the "Castle of Bethany," an expres-

sions mentioned in the passage, and is quite out of the line of Sennacherib's advance.

\* The Arabic name is given above from Robinson. Lord Lindsay, however, denies that this is correct, and asserts, after frequently hearing it pronounced, that the name is *Lazariëh*.

\* It has been suggested (Hitzig, *Jesaja*) that the word rendered "poor" in the A. V. of Is. x. 30 (פֶּתִי)—"poor Anathoth"—is an abbreviated form of the name of Bethany, as Nimrah is of Beth-nimrah, &c.; but apart from any other difficulty, there is the serious one that Bethany does not lie near the other

sion which had its origin in *castellum* being employed in the Vulgate as the translation of *κώμη* in John xi. 1.

N.B. The derivation of the name of Bethany given above—that of Lightfoot and Reland—is doubtless more correct than the one proposed by Simonis (*Onom. s. v.*), viz. *בֵּית עֵינָה*, *locus depressionis*, which has no special applicability to this spot more than any other, while it lacks the correspondence with Beth-phage, “House of Figs,” and with the “Mount of Olives,” which gives so much colour to this derivation, although it is true that the dates have disappeared, and the figs and olives alone are now to be found in the neighbourhood of Bethany. This has been well brought out by Stauley (*N. d. P.* 186, 187). It may also be remarked that the use of the Chaldee word *הֵינִי*, for the fruit of the date-palm, is consistent with the late period at which we first hear of Bethany. [G.]

**BETH-AR'ABAH** (*בֵּית הָעֲרָבָה*, *house of the desert*; *Βαθαράβα*, *Θαράβαδμ*, *Βηθαράβα*; *Beth-Arabā*), one of the six cities of Judah which were situated down in the Arabah, i. e. the sunk valley of the Jordan and Dead Sea (“wilderness,” Josh. xv. 61), on the north border of the tribe, and apparently between Beth-hoglah and the high land on the west of the Jordan valley (xv. 6). It is also included in the list of the towns of Benjamin (xviii. 22, *Βαθαράβα*, Vat.). [G.]

**BETH-A'RAM** (accurately BETH-HARAM, *בֵּית הָרָם*; *Βαθαράμ*, Alex. *Βαθαράμ*; *Betharam*), one of the towns of Gad on the east of Jordan, described as in “the valley” (*הַעֲמֵק*), not to be confounded with the Arabah or Jordan valley, Josh. xiii. 27, and no doubt the same place as that named BETH-HARAM in Num. xxxii. 36. No further mention is found of it in the Scriptures; but Eusebius and Jerome (*Onomast.*) report that in their day its appellation (*α Syris dicitur*) was *Bethramtha*, *Βηθραμθθά* (see also the quotations from the Talmud in Schwarz, 231); the Syriac and other versions, however, have all *Bethharan*, with no material variation, and that in honour of Augustus, Herod had named it *Libias* (*Λιβίας*). Josephus' account is that Herod (Antipas), on taking possession of his tetrarchy, fortified Sepphoris and the city (*πόλις*) of *Betharamphtha*, building a wall round the latter, and calling it *Julias* in honour of the wife of the emperor. As this could hardly be later than B.C. 1—Herod the Great, the predecessor of Antipas, having died in B.C. 4—and as the empress Livia did not receive her name of *Julia* until after the death of Augustus, A.D. 14, it is probable that Josephus is in error as to the new name given to the place, and speaks of it as having originally received that which it bore in his own day. It is curious that he names *Libias* long before (*Ant.* xiv. 1, §4) in such connexion as to leave no doubt that he alludes to the same place. Under the name of *Amathus* he again mentions it (*Ant.* xvii. 10, §6; comp. *B. J.* ii. 4, §2), and the destruction of the royal palaces there by insurgents from Perea.

Ptolemy gives the locality of *Libias* as 31° 26' lat. and 67° 10' long. (Lüster, *Jordan*, 573); and Eusebius and Jerome (*Onomasticon*) state that it was five miles south of *Bethuabran*, or *Bethamuran* (i. e. *Beth nimrah*?). This agrees with the position of the *Wady Seir*, or *Sir*, which falls into the Ghôr

opposite Jericho, and half way between *Wady Hesbān* and *Wady Shoub*. No one appears to have explored this valley. Seezen heard that it contained a castle and a large tank in masonry (*Reisen*, 1854; ii. 318). These may turn out to be the ruins of *Livias*. [G.]

**BETH-AR'BEI** (*בֵּית אֲרֵבַי*; *ἐκ τοῦ οἴκου τοῦ Ἱεροβόδμ*; Alex. *Ἱεροβαδλ*), named only in Hos. x. 14, as the scene of a sack and massacre by Shalman (Shalmaneser). No clue is given to its position; it may be the ancient stronghold of *Arbela* in Galilee, or (as conjectured by Hitzig) another place of the same name near Pella, of which mention is made by Eusebius in the *Onomasticon*. In the Vulgate Jerome has translated the name to mean “e domo ejus qui judicavit Raal,” i. e. *Jernubaal* (*יֶרֶנֻבַּעַל*) or *Gideon*, understanding *Salman* as *Zalmunna*, and the whole passage as a reference to Judg. viii. [G.]

**BETH-A'VEN** (*בֵּית אֲוֵן*, *house of naught*, i. e. *badness*; *Βαθών*, Alex. *Βηθαόν*; *Betharon*), a place on the mountains of Benjamin, east of Bethel (Josh. vii. 2, *Βαθήλ*, xviii. 12), and lying between that place and Michmash (1 Sam. xii. 5; also xiv. 23, *τῇ Βαμῶθ*). In Josh. xviii. 12, the “wilderness” (*Μῆδω* = pasture-land) of *Bethaven* is mentioned. In 1 Sam. xiii. 5 the reading of the LXX. is *Βαθωρών*, *Beth-horon*; but if this be correct, another *Beth-horon* must be intended than that commonly known, which was much further to the west. In Hos. iv. 15, v. 8, x. 5, the name is transferred, with a play on the word very characteristic of this prophet, to the neighbouring Bethel—once the “house of God,” but then the house of idols, of “naught.” [G.]

**BETH-AZ'MAVETH** (*בֵּית עֲמֻת*; *Βηθασμῶθ*; *Bethazmōth*). Under this name is mentioned, in Neh. vii. 28 only, the town of Benjamin which is elsewhere called *AZMAVETH*, and *BETHSAMOS*.

Mr. Finn proposes to identify *Azmaveth* with *Himch*, a village on the hills of Benjamin to the S.E. of *Jeba*. [G.]

**BETH-BAAL-ME'ON** (*בֵּית בַּעַל מְעוֹן*; *οἶκος Μεελαῶθ*; Alex. *οἶκος Βελαμών*; *Oppidum Baalmonon*), a place in the possessions of Reuben, on the “Mishor” or downs (A. V. “plain”) east of Jordan (Josh. xiii. 17). At the Israelites' first approach its name was *BAAL-MEON* (Num. xxxii. 38, or in its contracted form, *BEON*, xxxii. 3), to which the *Beth* was possibly a Hebrew addition. Later it would seem to have come into possession of Moab, and to be known either as *Beth-meon* (Jer. xlviii. 23) or *Baal-meon* (Ez. xxv. 9). The name is still attached to a ruined place of considerable size (*betächtlich*, Seezen), a short distance to the S.W. of *Hesbān*, and bearing the name of “the fortress of *Mān*” (*حصن مبعون*), according to Burckhardt (865), or *Maḥin*, according to Seezen (*Reisen*, i. 408), which appears to give its appellation to the *Wady Zerkā Maḥin* (*Ibid.* 402). [G.]

**BETH-BA'RAH** (*בֵּית בָּרָה*, quasi *בֵּית עֲבָרָה*, *house of passage*, or, of the ford; *Βαθράδ*; *Beth-*

\* It is possible that the name contains a trace of the tribe or nation of *Maon*,—the *Maonites* or *Meunim*. [MAON; MEUNIM.]

*vera*), named only in Judg. vii. 24, as a point apparently south of the scene of Gideon's victory, which took place at about Bethshean, and to which point "the waters" (מים) were "taken" by the Ephraimites against Midian. What these "waters" were is not clear, probably the wadis and streams which descend from the highlands of Ephraim; it is only plain that they were distinct from the Jordan, to which river no word but its own distinct name is ever applied. Beth-barah derives its chief interest from the possibility that its more modern representative may have been Beth-abara where John baptized [BETH-ABARA]; but there is not much in favour of this beyond their similarity in sound. The pursuit of the Midianites can hardly have reached so far south as Beth-abara, which was accessible to Judaea and Jerusalem and all the "region round about" (ἡ περιχωρος; i. e. the oasis of the South Jordan at Jericho).

If the derivation of the name given above be correct, Beth-barah was probably the chief ford of the district, and may therefore have been that by which Jacob crossed on his return from Mesopotamia, and at which Jephthah slew the Ephraimites. [G.]

**BETH-BA'SI** (Βαιθβασι; *Bethbasai*), a town which from the mention of its decays (τὰ καθρημένα) must have been originally fortified, lying in the desert (τῇ ἐρημῳ), and in which Jonathan and Simon Maccabaeus took refuge from Bacchides (1 Mac. iv. 62, 64). Josephus (*Ant.* xiii. 1, §5) has Βηθαλαργά (Beth-hogla), but a reading of the passage quoted by Rehd. (632) presents the more probable form of Beth-koxiz. Either alternative fixes the situation as in the Jordan valley not far from Jericho. [KLIZ, VALLEY OF.] [G.]

**BETH-BIR'EI** (Βηθβρι; οἶκος Βαρουσαυρίμ (by inclusion of the next name); *Bethberai*), a town of SAMARIA (1 Chr. iv. 31), which by comparison with the parallel list in Josh. xix. appears to have had also the name of BETH-LEBATHIM. It lay to the extreme south, with Beersheba, Horonah, &c. (comp. Josh. xv. 32, Lebaoth). [G.]

**BETH-CAR** (βη'β, *house of lambs*; Βαιθχόρ, Alex. Βελχόρ; *Bethchar*), a place named as the point to which the Israelites pursued the Philistines from Mizpeh on a memorable occasion (1 Sam. vii. 11), and therefore west of Mizpeh. From the unusual expression "under Beth-car" (ב'תחתיה), it would seem that the place itself was on a height, with the road at its foot. Josephus (*Ant.* vi. 2, §2) has μέγρι Κορβαίων, and goes on to say that the stone Ebenezer was set up at this place to mark it as the spot to which the victory had extended. [EBEN-EZER.] [G.]

**BETH-DA'GON** (βηθ'ג, *house of Dayan*; Βαγαδίαλ; Alex. Βηθδαγών; *Bethdayon*).

1. A city in the low country (*Shefel-th*) of Judah (Josh. xv. 41), and therefore not far from the Philistine territory, with which its name implies a connexion. From the absence of any conjunction before this name, it has been suggested that it should be taken with the preceding, "Gederoth-Bethdagion;" in that case probably distinguishing Gederoth from the two places of similar name in the neighbourhood. Guphardagon existed as a very large village between Diospolis (Lydda) and Jamnia in the time of Jerome (*Onom.* s. v.). A *Beitdagion* has been found by

Robinson between Lydda and Jatta, but this is too far north, and must be another place.

2. A town apparently near the coast, named as one of the landmarks of the boundary of Asher (Josh. xix. 27; βηθ'ג, Βαιθγενέθ). The name and the proximity to the coast, point to its being a Philistine colony.

3. In addition to the two modern villages noticed above as bearing this ancient name, a third has been found by Robinson (iii. 298) a few miles east of *Nabulus*. There can be no doubt that in the occurrence of these names we have indications of the worship of the Philistine god having spread far beyond the Philistine territory. Possibly these are the sites of towns founded at the time when this warlike people had overrun the face of the country to "Michmash eastward of Bethaven" on the south, and Gilboa on the north—that is, to the very edge of the heights which overlook the Jordan valley—driving "the Hebrews over Jordan into the land of Gad and Gilead" (1 Sam. xiii. 5-7; comp. 17, 18; xxix. 1; xxxi. 1). [G.]

**BETH-DIBLATHA'IM** (βηθδιβλαθ'αίμ, *house of the double cake* (of figs); οἶκος Δαιβλαθαίμ; domus Deblathaim), a town of Moab (Jer. xlviii. 22), apparently the place elsewhere called ALMOX-DIBLATHAIM. [G.]

**BETH-ÉL** (בית'אל, *house of God*; Βαιθηλ; Joseph. Βηθήλ, Βεθήλ η πόλις; *Bethel*).

1. A well-known city and holy place of central Palestine. Of the origin of the name of Bethel there are two accounts extant. 1. It was bestowed on the spot by Jacob under the awe inspired by the nocturnal vision of God, when on his journey from his father's house at Beersheba to seek his wife in Haran (Gen. xxviii. 19). He took the stone which had served for his pillow and put (שם) it for a pillar, and anointed it with oil; and he "called the name of that place (הוא מקום) Bethel; but the name of 'the' city (העיר) was called Luz at the first."

The expression in the last paragraph of this account is curious, and indicates a distinction between the "city" and the "place"—the early Canaanite "city" Luz, and the "place," as yet a mere undistinguished spot, marked only by the "stone," or the heap (Joseph. τοῖς λίθοις συμφορουμένοις), erected by Jacob to commemorate his vision.

2. But according to the other account, Bethel received its name on the occasion of a blessing bestowed by God upon Jacob after his return from Padan-aram; at which time also (according to this narrative) the name of Israel was given him. Here again Jacob erects (שם) a "pillar of stone," which, as before, he anoints with oil (Gen. xxxv. 14, 15). The key of this story would seem to be the fact of God's "speaking" with Jacob. "God went up from him in the place where He 'spoke' with him"—"Jacob set up a pillar in the place where He 'spoke' with him," and "called the name of the place where God 'spoke' with him Bethel."

Whether these two narratives represent distinct events, or, as would appear to be the case in other

\* The word is the same (בבר) in all three cases; though in the A. V. it is rendered "talked" in the two former.

instances in the lives of the patriarchs, are different representations of the one original occasion on which the hill of Bethel received its consecration, we know not, nor indeed does it concern us to know. It is perhaps worth notice that the prophet Hosea—in the only reference which the Hebrew Scriptures contain to this occurrence—had evidently the second of the two narratives before him, since in a summary of the life of Jacob he introduces it in the order in which it occurs in Genesis—laying full and characteristic stress on the keyword of the story: "He had power over the angel and prevailed; he wept and made supplication unto him; He found him in Bethel, and there He spake with us, even Jehovah God of hosts" (Hos. xii. 4, 5).

Early as is the date involved in these narratives, yet, if we are to accept the precise definition of Gen. xii. 8, the name of Bethel would appear to have existed at this spot even before the arrival of Abram in Canaan: he removed from the oaks of Moreh to "the' mountain on the east of Bethel," with "Bethel on the west and Hai on the east." Here he built an altar; and hither he returned from Egypt with Lot before their separation (xiii. 3, 4). See Stanley, *S. & P.* 218.

In one thing, however, the above narratives all agree,—in omitting any mention of town or buildings at Bethel at that early period, and in drawing a marked distinction between the "city" of Luz and the consecrated "place" in its neighbourhood (comp. besides the passages already quoted, Gen. xxxv. 7). Even in the ancient chronicles of the conquest the two are still distinguished (Josh. xvi. 1, 2); and the appropriation of the name of Bethel to the city appears not to have been made till still later, when it was taken by the tribe of Ephraim; after which the name of Luz occurs no more (Judg. i. 22-26). If this view be correct, there is a strict parallel between Bethel and Moriah, which (according to the tradition commonly followed) received its consecration when Abraham offered up Isaac, but did not become the site of an actual sanctuary till the erection of the Temple there by Solomon. [MORIAH.]

The intense significance of the title bestowed by Jacob on the place of his vision—"House of God"—and the wide extent to which that appellation has been adopted in all languages and in spite of the utmost diversities of belief, has been well noticed by Mr. Stanley (220, 1). It should not be overlooked how far this has been the case with the actual name; the very syllables of Jacob's exclamation, forming, as they do, the title of the chief sanctuary of the Mahometan world—the Beit-allah of Mecca—while they are no less the favourite designation of the meanest conventicles of the humblest sects of Protestant Christendom.

On the other hand, how singular is the fact—if the conclusions of etymologists are to be trusted (Spencer, *de Leg. Hebr.* 444; Bochart, *Canaan*, ii. 2)—that the awful name of Bethel should have lent its form to the word by which was called one of the most perplexing of all the perplexing forms assumed by the idolatry of the heathen—the Baitulia, the λίθοι ἑμψυχοί, or living stones, of the ancient Phœnicians. Another opportunity will occur for going more at length into this interesting subject [STONES]; it will be sufficient here to say that the Baitulia seem to have preserved the erect position of their supposed prototype, and that the worship consisted of anointing them with oil (Ammian, *adv. Gent.*, i. 39).

The actual stone of Bethel itself was the subject

of a Jewish tradition, according to which it was removed to the second temple, and served as the pedestal for the ark. It survived the destruction of the temple by the Romans, and was resorted to by the Jews in their lamentations (Reland, *Pal.* 638). [TEMPLE, THE SECOND.]

After the conquest Bethel is frequently heard of. In the troubled times when there was no king in Israel, it was to Bethel that the people went up in their distress to ask counsel of God (Judg. xx. 18, 26, 31, xxi. 2: in the A. V. the name is translated "house of God"). Here was the ark of the covenant under the charge of Phinehas the grandson of Aaron, with an altar and proper appliances for the offering of burnt-offerings and peace-offerings (xx. 26-28, xxi. 4); and the unwonted mention of a regular road or causeway as existing between it and the great town of Shechem is doubtless an indication that it was already in much repute. Later than this we find it named as one of the holy cities to which Samuel went in circuit, taking equal rank with Gilgal and Mizpeh (1 Sam. vii. 16).

Doubtless, although we are not so expressly told, it was this ancient reputation, combined with its situation on the extreme south frontier of his new kingdom, and with the hold which it must have had on the sympathies both of Benjamin and Ephraim—the former's by lot, and the latter's by conquest—that made Jeroboam choose Bethel as the depository of the new false worship which was to seal and consummate the division between the ten tribes and the two.

Here he placed one of the two calves of gold, and built a "house of high places" and an altar of incense, by which he himself stood to burn; as we see him in the familiar picture of 1 K. xiii. Towards the end of Jeroboam's life Bethel fell into the hands of Judah (2 Chr. xiii. 19), whence it was probably recovered by Baasha (xvi. 1). It then remains unmentioned for a long period. The worship of Baal, introduced by the Phœnician queen of Ahab (1 K. xvi. 31), had probably alienated public favour from the simple erections of Jeroboam to more gorgeous shrines (2 K. x. 21, 22). Samaria had been built (1 K. xvi. 24), and Jezreel, and these things must have all tended to draw public notice to the more northern part of the kingdom. It was during this period that Elijah visited Bethel, and that we hear of "sons of the prophets" as resident there (2 K. ii. 2, 3), two facts apparently incompatible with the active existence of the calf-worship. The mention of the bears so close to the town (iii. 23, 25), looks too as if the neighbourhood were not much frequented at that time. But after his destruction of the Baal worship throughout the country, Jehu appears to have returned to the simpler and more national religion of the calves, and Bethel comes once more into view (2 K. x. 29). Under the descendants of this king the place and the worship must have greatly flourished, for by the time of Jeroboam II., the great-grandson of Jehu, the rude village was again a royal residence with a "king's house" (Am. vii. 13); there were palaces both for "winter" and "summer," "great houses" and "houses of ivory" (iii. 15), and a very high degree of luxury in dress, furniture, and living (vi. 4-6). The one original altar was now accompanied by several others (iii. 14, ii. 8); and the simple "incense" of its founder had developed into the "burnt-offerings" and "meat-offerings" of the "solemn assemblies," with the fragrant "peace-offerings" of "fat beasts" (v. 21, 22).

How this prosperity came to its doom we do not told. After the desolation of the northern kingdom by the king of Assyria, Bethel still remained an abode of priests, who taught the wretched colonists "how to fear Jehovah," "the God of the land" (2 K. xvii. 28, 27). The buildings remained till the time of Josiah, by whom they were destroyed; and in the account preserved of his reforming iconoclasm we catch one more glimpse of the altar of Jeroboam, with its last loathsome fire of "dead men's bones" burning upon it, the altar and high-place surviving in their archaic antiquity amidst the successive additions of later votaries, like the wooden altar of Becket at Canterbury, which continued in its original simplicity through all the subsequent magnificence of the church in which he was murdered (Stanley, *Canterbury*, 184). Not the least remarkable of these later works was the monument (בֵּית־אֱלֹהִים; סְתֵּלָה), evidently a conspicuous erection, of the "man of God" who proclaimed the ultimate downfall of this idolatrous worship at its very outset, and who would seem to have been at a later date canonized as it were by the votaries of the very idolatry which he denounced. "Woe unto you! for ye build the sepulchres of the prophets, and your fathers killed them."

But, in any case, the fact of the continued existence of the tomb of this protester through so many centuries of idolatry illustrates very remarkably the way in which the worship of Jehovah and the false-worship went on side by side at Bethel. It is plain from several allusions of Amos that this was the case (v. 14, 23); and the fact before noticed of prophets of Jehovah being resident there, and of the friendly visits even of the stern Elijah; of the relation between the "man of God from Judah" and the "lying prophet" who caused his death; of the manner in which Zedekiah the son of Chenaanah, a priest of Baal, resorts to the name of Jehovah for his solemn adjuration, and lastly of the way in which the denunciations of Amos were tolerated and he himself allowed to escape,—all these point to a state of things well worthy of investigation. In this connexion, too, it is curious that men of Bethel and Ai returned with Zerubbabel (Ezr. ii. 28; Neh. vii. 32); and that they returned to their native place whilst continuing their relations with Nehemiah and the restored worship (Neh. xi. 31). In the Book of Esdras the name appears as BETOLUIS. In later times Bethel is only named once, amongst the strong cities in Judaea which were repaired by Bacchides during the struggles of the times of the Maccabees (1 Mac. ix. 50).

Bethel receives a bare mention from Eusebius and Jerome in the *Onomasticon*, as 12 miles from Jerusalem on the right hand of the road to Sichem; and here its ruins still lie under the scarcely altered name of *Beitln*. They cover a space of "three or four acres," and consist of "very many foundations and half-standing walls of houses and other buildings." "The ruins lie upon the front of a low hill between the heads of two hollow wadys which unite and run off into the main valley *es-Suweinit*" (Rob. i. 448-9). Dr. Clarke, and other travellers since his visit, have remarked on the "stony" nature of the soil at Bethel, as perfectly in keeping with the narrative of Jacob's slumber there. When on the spot little doubt can be felt as to the localities of this interesting place. The round mount S.E. of Bethel must be the "mountain" on which Abram built the altar, and on which he and Lot stood when they made their division of the land (Gen.

xii. 7, xiii. 10). It is still thickly strewn to its top with stones formed by nature for the building of "altar" or sanctuary. As the eye turns involuntarily eastward, it takes in a large part of the plain of the Jordan opposite Jericho; distant it is true, but not too distant to discern in that clear atmosphere the lines of verdure that mark the brooks which descend from the mountains beyond the river, and fertilize the plain even in its present neglected state. Further south lies, as in a map, fully half of that sea which now covers the once fertile oasis of the "cities of the plain," and which in those days was as "the garden of the Lord, even as the land of Egypt." Eastward again of this mount, at about the same distance on the left that Bethel is on the right, overlooking the *Wady Suweinit*, is a third hill crowned by a remarkably desolate-looking mass of grey debris, the most perfect heap of ruin to be seen even in that country of ruins. This is *Tell er-Rijme*, "the mound of the heap," agreeing in every particular of name, aspect, and situation, with Ai.

An admirable passage on the history of Bethel will be found in Stanley (217-223).

2. A town in the south part of Judah, named in Josh. xii. 16, and 1 Sam. xxx. 27. The collocation of the name in these two lists is decisive against its being the well-known Bethel. In the latter case the LXX. read *Baithsôp*, i. e. Bethzur. By comparison of the lists of the towns of Judah and Simeon (Josh. xv. 30, xix. 4; 1 Chr. v. 29, 30), the place appears under the names of CHESIL, BETHUL, and BETHUEL.

HIEL, THE BETHELITE (חִיל הַבֵּית־הָאֱלֹהִים) is recorded as the rebuilder of Jericho (1 K. xvi. 34). [G.]

BETH-EMEK (בֵּית הָעֶמֶק, *house of the valley*; Βαιθμέ; Alex. *Βηθαμεία*; *Bethemec*), a place on or near the border of Asher, on the north side of which was the ravine of Jiphthah-el (Josh. xix. 27). Robinson has discovered an *Amkûh* about 8 miles to the N. E. of *Akka*; but if his identification of *Jefit* with Jiphthah-el be tenable, the site of Beth-emek must be sought for further south than *Amkûh* (Rob. iii. 103, 107, 8). [G.]

BE'THER, THE MOUNTAINS OF (הַרֵי בִּתְרִי; *δρη κοιλωμάτων*; *Bether*, and *Bethel*), Cant. ii. 17. There is no clue to guide us to what mountains are intended here.

For the site of Bether, so famous in the post-biblical history of the Jews, see Reland, 639, 640; Rob. iii. 267-271. [G.]

BETHES'DA (Βηθεσδα, as if *בֵּית מַעְיָן*, *house of mercy*, or *בֵּית מַעְיָן*, *place of the flowing of water*; Euseb. *Βηθαδα*; *Bethsaida*), the Hebrew name of a reservoir or tank (*κολυμβήθρα*, i. e. a swimming-pool), with five "porches" (*στοδς*), close upon the sheep-gate or "market" (*ἐπὶ τῇ προβατικῇ*)—it will be observed that the word "market" is supplied in Jerusalem (John v. 2). The porches—i. e. cloisters or colonnades—were extensive enough to accommodate a large number of sick and infirm people, whose custom it was to wait there for the "troubling of the water."

\* Cloisters or colonnades round artificial tanks are common in the East. One example is the *Taj Bower*, in the set of drawings of Bejapore now publishing by the East India Company.

Eusebius—though unfortunately he gives no clue to the situation of Bethesda—describes it in the *Onomasticon* as existing in his time as two pools (*ἐν ταῖς λίμναις διδύμοις*), the one supplied by the periodical rains, while the water of the other was of a reddish colour (*ὑποκρινόμενον*), due, as the tradition then ran, to the fact that the flesh of the sacrifices was anciently washed there before offering, on which account the pool was also called *προβατική*. See, however, the comments of Lightfoot on this view, in his *Exercit. on S. John*, v. 2. Eusebius's statement is partly confirmed by the Bourdeaux Pilgrim (A.D. 333), who mentions in his *Itinerary* "twin fish-pools, having five porches, which are called Bethesda" (quoted in Barclay, 299).

The large reservoir called the *Birket Israil*, within the walls of the city, close by the St. Stephen's gate, and under the north-east wall of the Haram area, is generally considered to be the modern representative of Bethesda. This tradition reaches back certainly to the time of Saewulf, A.D. 1102, who mentions it under the name of Bethesda (*Early Trav.* 41). It is also named in the *Cities de Jerusalem*, A.D. 1187 (sect. vii.; Rob. ii. 562), and in more modern times by Maundrell and all the later travellers.

The little that can be said on the subject goes rather to confirm than to invalidate this tradition. On the one hand, (1) the most probable position of the sheep-gate is at the north-east part of the city [JERUSALEM]. On the other hand the *Birket Israil* exhibits none of the marks which appear to have distinguished the water of Bethesda in the records of the Evangelist and of Eusebius. (2) The construction of the *Birket* is such as to show that it was originally a water-reservoir, and not, as has been suggested, the moat of a fortress (Rob. i. 293-4, iii. 243); (3) there is certainly a remarkable coincidence between the name as given by Eusebius, Bezatha, and that of the north-east suburb of the city at the time of the Gospel history—Bezetha; and (4) there is the difficulty that if the *Birket Israil* be not Bethesda, which of the ancient "pools" does it represent?

One other proposed identification must be noticed, viz. that of Dr. Robinson (i. 342-3), who suggests the "fountain of the Virgin," in the valley of the Kedron, a short distance above the Pool of Siloam. In favour of this are its situation, supposing the sheep-gate to be at the south-east of the city, as Lightfoot, Robinson, and others suppose, and the strange intermittent "troubling of the water" caused by the periodical ebbing and flowing of the supply. Against it are the confined size of the pool, and the difficulty of finding room for the five stags. (See Barclay's detailed account, *City*, &c. 516-524, and 325, 6.) [G.]

**BETH'EZEL** (בֵּית הָעֶזֶל, *house of firmness* (?); *ὄικος ἐχόμενος ἀβρῆς*; *domus vicina*), a place named only in Mic. i. 11. From the context it was doubtless situated in the plain of Philistia. [G.]

**BETH-GA'DER** (בֵּית גַּדְרָא, if not in pause, Geder, גַּדְרָא; *Βαθυγέδωρ*; *Bethyader*), doubtless a place, though it occurs in the genealogies of Judah as if a person (1 Chr. ii. 51). Possibly the same place as GEDIR (Josh. xii. 13). [G.]

<sup>b</sup> The photographs, woodcuts, and careful statements of Salzmänn, are conclusive on this point.

**BETH-GA'MUL** (בֵּית גַּמּוּל, *house of the weaned, Gesen. Lev.*, but may it not be "house of camel" ?; *ὄικος γαμωλ*; Alex. *γαμωλ*; *Beth-gamul*), a town of Moab, in the *mishor* or downs east of Jordan (A. V. "plain country," Jer. xlviii. 23, comp. 21); apparently a place of late date, since there is no trace of it in the earlier lists of Num. xxxii. 34-38, and Josh. xiii. 16-20. A place called *Um el-Jemal* is said to exist a few miles south of Busrah in the Hauran (Burch. 106; Kiepert's map in Rob. 1857); but this is much too far to the N.E. to suit the requirements of the text. In a country of nomadic tribes this latter name would doubtless be a common one. [G.]

**BETH-HAC'-CEREM** (בֵּית הַכֶּרֶם, *house of the vine*; *Βηθακχαρῆμ*, *Βηθακχαράμ*; *Bethacharam*), a town which, like a few other places, is distinguished by the application to it of the word *pelec*, פֶּלֶץ, A. V. "part," (Neh. iii. 14). It had then a "ruler" called פֶּלֶץ. From the other mention of it (Jer. vi. 1) we find that it was used as a beacon-station, and that it was near Tekoa. By Jerome (*Comm. Jer.* vi.) a village named *Bethacharam* is said to have been on a mountain between Tekoa and Jerusalem, a position in which the eminence known as the Frank mountain (Herodium) stands conspicuous; and this has accordingly been suggested as Beth-haccerem (Pococke, Rob. i. 480). The name is at any rate a testimony to the early fruitfulness of this part of Palestine.

Karem (*Καρέμ*) is one of the towns added in the LXX. to the Hebrew text of Josh. xv. 59, as in the mountains of Judah, in the district of Bethlehem. [G.]

**BETH-HA'ARAN** (בֵּית הָאָרָן; ἡ Βαιθαράν; *Beth-aran*), one of the "fenced cities" on the east of Jordan, "built" by the Gadiates (Num. xxiii. 36). It is named with Beth-nimrah, and therefore is no doubt the same place as BETH-ARAM (accurately Beth-haram), Josh. xiii. 27. The name is not found in the lists of the towns of Moab in either Isaiah, Jeremiah, or Ezekiel. [G.]

**BETH-HOG'LA**, and -HOG'LAH (בֵּית הַחֲגִלָּה, *house of partridge, Gesen.*; though Jerome gives another interpretation, *locus gyri*, reading the name חֲגִלָּה, and connecting it with the funeral races or dances at the mourning for Jacob [ATAD]; *Βαθυγλαδάμ*, *Βεθεγαῖώ*, *Βαθαλαγά*; *Bethagla*), a place on the border of Judah (Josh. xv. 6) and of Benjamin (xviii. 19), to which latter tribe it was reckoned to belong (xviii. 21). A magnificent spring and a ruin between Jericho and the Jordan still bear the names of *Ain-hajla* and *Käsr Hajla*, and are doubtless on or near the old site (Rob. i. 544-6). The LXX. reading, *Βαθυγλαδάμ*, may point to En-eglam, a place which was certainly near this locality. [G.]

**BETH-HORON** (בֵּית חֹרֶן, or in contracted form חֹרֶן, and once חֹרֶן, *house of caverns* or

<sup>a</sup> This name deserves notice as one of the very few instances in which the translators of the A. V. have retained the definite article, which in the original so frequently occurs in the middle of compound proper names.

holes; Βαιθωράν; *Beth-horon*), the name of two towns or villages, an "upper" (בֵּית הָעֶלְיוֹן) and a "nether" (בֵּית הַתַּחְתִּי), (Josh. xvi. 3, 5; 1 Chr. vii. 24), on the road from Gibeon to Azekah (Josh. x. 10, 11) and the Philistine Plain (1 Macc. iii. 24). Beth-horon lay on the boundary-line between Benjamin and Ephraim (Josh. xvi. 3, 5, and xviii. 13, 14), was counted to Ephraim (Josh. xxi. 22; 1 Chr. vii. 24), and given to the Kohathites (Josh. xxi. 22; 1 Chr. vi. 68 [53]).

The road connecting the two places is memorable in sacred history as the scene of two of the most complete victories achieved by the Jewish arms; that of Joshua over the five kings of the Amorites (Josh. x.; Eccles. xlv. 6), and that of Judas Maccabæus over the forces of Syria under Seron (1 Macc. iii. 13-24). Later still the Roman army under Cestius Gallus was totally cut up at the same spot (Joseph. *B. J.* ii. 19, §§8, 9).

There is no room for doubt that the two Beth-horons still survive in the modern villages of

*Beit-ûr* (بیت عور), *et-tahta*, and *el-fok*, which were first noticed by Dr. Chuke, and have been since visited by Dr. Robinson, Mr. Stanley, and others. Besides the similarity of the name, and the fact that the two places are still designated as "upper" and "lower," all the requirements of the narrative are fulfilled in this identification. The road is still the direct one from the site which must have been Gibeon (*et-Sib*), and from Michmash (*Makkhûsh*) to the Philistine plain on the one hand, and Antipatris (Joseph. *B. J.* ii. 19, §9) on the other. On the mountain which lies to the southward of the nether village is still preserved the name (*Yalâ*) and the site of Ajalon, so closely connected with the proudest memories of Beth-horon; and the long "descent" between the two remains unaltered from what it was on that great day "which was like no day before or after it."

The importance of the road on which the two Beth-horons are situated, the main approach to the interior of the country from the hostile districts on both sides of Palestine—Philistia and Egypt on the west, Moab and Ammon on the east—at once explains and justifies the frequent fortification of these towns at different periods of the history (1 K. ix. 17; 2 Chr. viii. 5; 1 Mac. ix. 50; Jud. iv. 4, 5). This road, still, as in ancient times, "the great road of communication and heavy transport between Jerusalem and the sea-coast" (Rob. ii. 252), though a route rather more direct, known as the "Jaffa road," is now used by travellers with light baggage—leaves the main north road at *Tidei et-Pul*,  $\frac{3}{4}$  miles from Jerusalem, due west of Jericho. Bending slightly to the north, it runs by the modern village of *el-Sib*, the ancient Gibeon, and then proceeds by the Beth-horons in a direct line due west to *Jimzu* [JIMZO] and *Ludd* [LYDDA], at which it puts into three, diverging north to *Caphar-Saba* [ANTIPATRIS], south to *Gaza*, and west to *Jaffa* [JOPPA].

From Gibeon to the Upper Beth-horon is a distance of about 4 miles of broken ascent and descent. The ascent, however, predominates, and this therefore appears to be the "going up" to Beth-horon

which formed the first stage of Joshua's pursuit.\* With the upper village the descent commences; the road rough and difficult even for the mountaineers of Palestine; now over sheets of smooth rock flat as the flagstones of a London pavement; now over the upturned edges of the limestone strata; and now amongst the loose rectangular stones so characteristic of the whole of this district. There are in many places steps cut, and other marks of the path having been artificially improved. But though rough, the way can hardly be called "precipitous;" still less is it a ravine (Stanley, 208), since it runs for the most part along the back of a ridge or watershed dividing wadis on either hand. After about three miles of this descent, a slight rise leads to the lower village standing on its mamelon,—the last outpost of the Benjamite hills, and characterized by the date-palm in the enclosure of the village mosque. A short and sharp fall below the village, a few undulations, and the road is amongst the *dûra* of the great con-growing plain of Sharon.

This rough descent from the upper to the lower *Beitur* is the "going down to Beth-horon" of the Bible narrative. Standing on the high ground of the upper village, and overlooking the walled scene, we may feel assured that it was over this rough path that the Canaanites fled to their native lowlands.

In a remarkable fragment of early history (1 Chr. vii. 24) we are told that both the upper and lower towns were built by a woman of Ephraim, Sherah, who in the present state of the passage appears as a granddaughter of the founder of her tribe, and also as a direct progenitor of the great leader with whose history the place is so closely connected. [G.]

**BETH-JESHI'MOTH**, or -JES'TMOTH (בֵּית הַיִּשְׁמוֹת); in Numbers, בֵּית הַיִּשְׁמוֹת, *house of the wastes*; Αἰρημός; Alex. Ἀσμηός; *Bethsinuth*, *Bethiesinuth*, a town or place east of Jordan, in the "deserts" (עֲרֵבָה) of Moab; that is, on the lower level at the south end of the Jordan valley (Num. xxiii. 49); and named with Ashdath-pisgah and Beth-peor. It was one of the limits of the encampment of Israel before crossing the Jordan. Later it was allotted to Reuben (Josh. xii. 3, xlii. 20), but came at last into the hands of Moab, and formed one of the cities which were "the glory of the country" (Ez. xxv. 9). Schwarz (228) quotes "a *Beth-Jishmuth* as still known at the north-easternmost point of the Dead Sea, half a mile from the Jordan;" but this requires confirmation. [G.]

**BETH-LEBA'OTH** (בֵּית לֵבְאוֹת), *house of lionsesses*; Βαθαράθ, Alex. Βαθαλβάθ; *Beth-lebaoth*, a town in the lot of Simeon (Josh. xix. 6), and therefore in the extreme south of Judah (xv. 32. Lebaoth), probably in the wild country to which its name bears witness. In the parallel list in 1 Chr. iv. 31 the name is given BETH-UREI. [G.]

**BETH-LEHEM** (בֵּית לֵחֶם) = *house of bread*; Βηθλεέμ; *Bethlehem*. 1. One of the oldest towns in Palestine, already in existence at the time of Jacob's return to the country. Its earliest name

\* The statements of Dr. Robinson and Mr. Stanley on this point are somewhat at variance; but although the road from Gibeon to *Beitur et-Tahta* is by no means a uniform rise, yet the impression is certainly

that of an ascent; and *Beitur*, though perhaps no higher than the ridge between it and Gibeon, yet looks higher, because it is so much above everything beyond it.

was EPHRATH or EPHRAFAH (see Gen. xxxv. 16, xlviii. 7; Josh. xv. 59, LXX.), and it is not till long after the occupation of the country by the Israelites that we meet with it under its new name of Bethlehem. Here, as in other cases (comp. Bethmeon, Bethdiblathaim, Bethpsor), the "Beth" appears to mark the bestowal of a Hebrew appellation; and if the derivations of the Lexicons are to be trusted, the name in its present shape appears to have been an attempt to translate the earlier Ephrata into Hebrew language and idiom, just as the Arabs have in their turn, with a further slight change of meaning, converted it into *Beit-lahm* (house of flesh).

However this may be, the ancient name lingered as a familiar word in the mouths of the inhabitants of the place (Ruth i. 2, iv. 11; 1 Sam. xvii. 12) and in the poetry of the Psalmists and Prophets (Ps. cxxxii. 6; Mic. v. 2) to a late period. [EPHRAFAH.] In the genealogical lists of 1 Chr. it recurs, and Ephrath appears as a person—the wife of Caleb and mother of Hur (יְהוּרָה) (ii. 19, 51, iv. 4); the title of "father of Bethlehem" being bestowed both on Hur (iv. 4) and on Salma, the son of Hur (ii. 51, 54). The name of Salma recalls a very similar name intimately connected with Bethlehem, namely the father of Boaz, Salmah

שַׁלְמָה, Ruth iv. 20; A. V. "Salmon") or Salmon (שַׁלְמוֹן), verse 21). Hur is also named in Ex. xxxi. 2 and 1 Chr. ii. 20, as the father of Uri the father of Bezaleel. In the East a trade or calling remains fixed in one family for generations, and if there is any foundation for the tradition of the Targum that Jesse the father of David was "a weaver of the veils of the sanctuary" (Targ. Jonathan on 2 Sam. xxi. 19), he may have inherited the accomplishments and the profession of his art from his forefather, who was "filled with the Spirit of God," "to work all manner of works," and amongst them that of the embroiderer and the weaver (Ex. xxv. 35).<sup>b</sup>

After the conquest Bethlehem appears under its own name Beth-lehem-judah (Judg. xvii. 7; 1 Sam. xvii. 12; Ruth i. 1, 2), possibly, though hardly probably, to distinguish it from the small and remote place of the same name in Zebulun. As the Hebrew text now stands, however, it is omitted altogether from the list of the towns of Judah in Joshua xv. though retained by the LXX. in the eleven names which they insert between verses 59 and 60. Among these it occurs between Teko (Tekoa), *Θεκώ* (comp. 1 Chr. iv. 4, 5), and Phagor (P'oor, *Φαγόρ*). This omission from the Hebrew text is certainly remarkable, but it is quite in keeping with the obscurity in which Bethlehem remains throughout the whole of the Sacred history. Not to speak of the later event which has made the name of Bethlehem so familiar to the whole Christian and Mussulman world, it was, as the birthplace of David, the scene of a most important occurrence to ancient Israel. And yet from some cause or other it never rose to any eminence, nor ever became the theatre

of any action or business. It is difficult to say why Hebron and Jerusalem, with no special associations in their favour, were fixed on as capitals, while the place in which the great ideal king, the hero and poet of the nation, drew his first breath and spent his youth, remained an "ordinary Judæan village." No doubt this is in part owing to what will be noticed presently—the isolated nature of its position, but that circumstance did not prevent Gibeon, Ramah, and many other places situated on eminences from becoming famous, and is not sufficient to account entirely for such silence respecting a place so strong by nature, commanding one of the main roads, and the excellence of which as a military position may be safely inferred from the fact that at one time it was occupied by the Philistines as a garrison (2 Sam. xxiii. 14; 1 Chr. xi. 16).

Though not named as a Levitical city, it was apparently a residence of Levites, for from it came the young man Jonathan, the son of Gershon who became the first priest of the Danites at their new northern settlement (Judg. xvii. 7, xviii. 30), and from it also came the concubine of the other Levite whose death at Gibeon caused the destruction of the tribe of Benjamin (xix. 1-9).

The Book of Ruth is a page from the domestic history of Bethlehem; the names, almost the very persons, of the Bethlehemites are there brought before us; we are allowed to assist at their most peculiar customs, and to witness the very springs of those events which have conferred immortality on the name of the place. Many of these customs were doubtless common to Israel in general, but one thing must have been peculiar to Bethlehem. What most strikes the view, after the charm of the general picture has lost its first hold on us, is the intimate connexion of the place with Moab. Of the origin of this connexion no record exists, no hint of it has yet been discovered, but it continued in force for at least a century after the arrival of Ruth, till the time when her great grandson could find no more secure retreat for his parents from the fury of Saul, than the house or the king of Moab at Mizpeh (1 Sam. xxii. 3, 4). But whatever its origin, here we find the connexion in full vigour. When the famine occurs, the natural resource is to go to the country of Moab and "continue there;" the surprise of the city is occasioned not at Naomi's going but at her return. Ruth was "not like" the handmaidens of Boaz—some difference of feature or complexion there was doubtless which distinguished the "children of Lot" from the children of Abraham, Isaac, and Jacob; but yet she glens after the reapers in the field without molestation or remark, and when Boaz in the most public manner possible proclaims his intention of taking the stranger to be his wife, no voice of remonstrance is raised, but loud congratulations are expressed, the parallel in the life of Jacob occurs at once to all, and a blessing is invoked on the head of Ruth the Moabitess, that she may be like the two daughters of the Mesopotamian Nahor, "like Rachel and like Leah, who did build the house of Israel." This, in the face of the strong denunciations of Moab contained in the law is, to say the least, very remarkable.<sup>a</sup>

<sup>a</sup> At the date of the visit of Benjamin of Tudela, there were still "twelve Jews, *dyers* by profession, living at Beth-lehem" (Benj. of Tudela, *Asher*, i. 75).

<sup>b</sup> May not this elucidate the allusions to the "weaver's beam" (whatever the "beam" may be) which occur in the accounts of giants or mighty men slain by David or his heroes; but not in any unconnected with him.

<sup>c</sup> Moab appears elsewhere in connexion with a place in Judah, *Jashubi-lehem* (1 Chr. iv. 22). We might be tempted to believe the name merely another form of *Beth-lehem*, if the context—the mention of Mare-shah and Chozeba, places on the extreme west of the tribe—did not forbid it.

The elevation of David to the kingdom does not appear to have affected the fortunes of his native place. The residence of Saul acquired a new title specially from him, by which it was called even down to the latest time of Jewish history (2 Sam. xvi. 6; Joseph. *B. J.* v. 2, §1, Γαββαθουλή), but David did nothing to dignify Bethlehem, or connect it with himself. The only touch of recollection which he manifests for it, is that recorded in the well-known story of his sudden longing for the water of the well by the gate of his childhood (2 Sam. xxiii. 15).

The few remaining casual notices of Bethlehem in the Old Testament may be quickly enumerated. It was fortified by Rehoboam (2 Chr. xi. 6). By the time of the captivity, the Inn of Chimham by (בֵּית לֶחֶם = "close to") Bethlehem, appears to have become the recognised point of departure for travellers to Egypt (Jer. xli. 17)—a caravanserai or khan (כְּנָסִיָּה; see Stanley, *App.* §90), perhaps the identical one which existed there at the time of our Lord (καρδλυμα), like those which still exist all over the East at the stations of travellers. Lastly, a "children of Bethlehem," to the number of 123, returned with Zerubbabel from Babylon (Ezr. ii. 21; Neh. vii. 26).

In the New Testament Bethlehem retains its distinctive title of Bethlehem-judah<sup>4</sup> (Matt. ii. 1, 5), and once, in the announcement of the Angels, the "city of David" (Luke ii. 4; and comp. John vii. 42; κώμη; *custellum*). Its connexion with the history of Christ is too familiar to all to need any notice here: the remark should merely be made that as in the earlier history less is recorded of the place after the youth of David than before, so in the later, nothing occurs after the birth of our Lord to indicate that any additional importance or interest was fastened on the town. In fact, the passages just quoted, and the few which follow, exhaust the references to it in the N. T. (Matt. ii. 6, 8, 16; Luke ii. 15).

After this nothing is heard of it till near the middle of the 2nd century, when Justin Martyr speaks of our Lord's birth as having taken place "in a certain cave very close to the village," which cave he goes on to say had been specially pointed out by Isaiah as "a sign." The passage from Isaiah to which he refers is xxxiii. 13-19, in the LXX. version of which occurs the following—"He shall dwell on high: His place of defence shall be in a lofty cave of the strong rock" (Justin. *Dial. c. Tryph.* §§78, 70). Such is the earliest supplement we possess to the meagre indications of the narrative of the Gospels; and while it is not possible to say with certainty that the tradition is true, there is no reason for discrediting it. There is nothing in itself improbable—as there certainly is in many cases where the traditional scenes of events are laid in caverns—in the supposition that the place in which Joseph and Mary took shelter, and where was the "manger" or "stall" (whatever the φάτνη may have been),<sup>5</sup> was a cave in the limestone rock of which the eminence of Bethlehem is

composed. Nor is it necessary to assume that Justin's quotation from Isaiah is the ground of an inference of his own; it may equally be an authority happily adduced by him in support of the existing tradition.

But the step from the belief that the nativity may have taken place in a cavern, to the belief that the present subterranean vault or crypt is that cavern, is a very wide one. Even in the 150 years that had passed when Justin wrote, so much had happened at Bethlehem that it is difficult to believe that the true spot could have been accurately preserved. In that interval—an interval as long as that between the landing of William III. and the battle of Waterloo—not only had the neighbourhood of Jerusalem been overrun and devastated by the Romans at the destruction of the city, but the emperor Hadrian, amongst other desecrations, had actually planted a grove of Adonis at the spot (*lucus inunbrabat Adonidis*, Jerome, *Ep. Paul.*). This grove remained at Bethlehem for no less than 180 years, viz., from A.D. 135 till 315. After this the place was purged of its abominations by Constantine, who about A.D. 330 erected the present church (Euseb. *Vit. Const.* 3, 40. See Tobler, 102, *note*). Conceive the alterations in the ground implied in this statement!—a heathen sanctuary established and a grove planted on the spot—that grove and those erections demolished to make room for the Basilica of Constantine!

The modern town of *Beit-lahm* (بيت لحم)

lies to the E. of the main road from Jerusalem to Hebron, 6 miles from the former. It covers the E. and N.E. parts of the ridge of a "long grey hill" of Jura limestone, which stands nearly due E. and W., and is about a mile in length. The hill has a deep valley on the N. and another on the S. The west end shelves down gradually to the valley; but the east end is bolder, and overlooks a plain of some extent. The slopes of the ridge are in many parts covered by terraced gardens, shaded by rows of olives with figs and vines, the terraces sweeping round the contour of the hill with great regularity. On the top of the hill lies the village in a kind of irregular triangle (Stewart), at about 150 yards from the apex of which and separated from it by a vacant space on the extreme eastern part of the ridge, spreads the noble Basilica of St. Helena, "half church, half fort," now embraced by its three convents, Greek, Latin, and Armenian.

This is not the place for a description of the "holy places" of Bethlehem. All that can be said about them has been well said by Lord Nugent (i. 13-21), and Mr. Stanley (438-442). (See also, though interspersed with much irrelevant matter, Stewart, 246, 334, 5.) Of the architecture of the church very little is known; for a resumé of that little see Ferguson's *Handbook of Architecture*, 524; also Salzmann's Photographs and the *Etude* accompanying them (p. 72).<sup>6</sup> One fact, of great

<sup>4</sup> It is as well to remember that the "stable," and its accompaniments, are the creations of the imagination of poets and painters, with no support from the Gospel narrative.

<sup>5</sup> Mr. Stanley mentions, and recurs characteristically to the interesting fact, that the present roof is constructed from English oak given to the church by Edward IV. (*S. & P.*, 141, 439.) Tobler, 104 *note*, adduces the authority of Eutychius that the present Church is the work of Justinian, who destroyed that of Constantine as not sufficiently magnificent.

<sup>4</sup> In the Greek copies of St. Matthew the name is given as Β. τῆς Ἰουδαίας; but in the more ancient Syriac recension lately published by Mr. Cureton it is, as in the O. T., Bethlehem-judah.

<sup>5</sup> Observe that this phrase has lost the meaning which it bears in the O. T., where it specially and invariably signifies the fortress of the Jebusites, the fastness of Zion (2 Sam. v. 7, 9; 1 Chr. xi. 5, 7).

interest—probably the most genuine about the place—is associated with a portion of the crypt of this church, namely, that here, “beside what he believed to be the cradle of the Christian faith,” St. Jerome lived for more than 30 years, leaving a lasting monument of his sojourn in the Vulgate translation of the Bible.

In the plain below and east of the convent, about a mile from the walls, is the traditional scene of the angels’ appearance to the shepherds, a very small poor village called *Beit-Sahur*, to the E. of which are the unimportant remains of a Greek church. These buildings and ruins are surrounded by olives (Seetzen, ii. 41, 42). Here in Arculf’s time, “by the tower of Ader,” was a church dedicated to the three shepherds, and containing their monuments (Arculf, 6). But this plain is too rich ever to have been allowed to lie in pasturage, and it is more likely to have been then occupied, as it is now, and as it doubtless was in the days of Jotham, by corn-fields, and the sheep to have been kept on the hills.<sup>b</sup>

The traditional well of David (2 Sam. xliii. 15), a group of three cisterns, is more than half a mile away from the present town on the other side of the wady on the north. A few yards from the western end of the village are two apertures, which have the appearance of wells; but they are merely openings to a cistern connected with the aqueduct below, and we have Dr. Robinson’s assurance that “there is now no well of living water in or near the town.”

The population of *Beit-I-tha* is about 3000 souls, entirely Christians. All travellers remark the good looks of the women (*Etolien*), the substantial clean appearance of the houses, and the general air of comfort (for an eastern town) which prevails.

2. (בֵּית לֵחֵם; *Baithlēm*, Alex. *Baithlēēm*; *Bethlehem*), a town in the district of Zebulun named nowhere but in Josh. xiv. 15. It has been recovered by Dr. Robinson at *Beit Lahm*, about six miles west of Nazareth, and lying between that town and the main road from Akka to Gaza. Robinson characterises it as “a very miserable village, none more so in all the country, and without a trace of antiquity except the name” (iii. 113). [G.]

BETHILOMON (*Baithlōmōn*), 1 Esd. v. 17. [BETHLEHEM, 1.] [G.]

BETH-MA’ACHAH (בֵּית מַעֲכָה), and with the article, הַבֵּית; *Bethmachā*, *Φερμαχά*; *Bethmachah*), a place named only in 2 Sam. xx. 14, 15, and there occurring more as a definition of the position of ABEL than for itself. In the absence of more information, we can only conclude that it is identical with MAACHAH, or ARAM-MAACHAH, one of the petty Syrian kingdoms in the north of Palestine. [ARAM.] [G.]

BETH-MAR’CABOTH (בֵּית הַמָּרְקָבִית, *house of the chariot*), in Chron. without the article; *Baithmarqabē*; Alex. *Baithamarchasbō*; *Bethmarchaboth*), one of the towns of Simeon, situated to the extreme south of Judah, with Ziklag and Hormah (Josh. xix. 5; 1 Chr. iv. 31). What “chariots” can have been in use in this rough and thinly inhabited part of the country, at a time so early as that at which

<sup>b</sup> Ἀγνανούστες (Luke ii. 8; A. V. “abiding in the field”) has no special reference to “field” more than hill; but means rather “passing the night out of doors.” χωρά also means a “district” or neighbourhood, with no special topographical signification.

these lists of towns purport to have been made out, we know not. At a later period—that of Solomon “chariot cities” are named, and a regular trade with Egypt in chariots was carried on (1 K. ix. 19; 2 Chr. viii. 6; 1 K. x. 29; 2 Chr. i. 17), which would naturally require depots or stopping-places on the road “up” to Palestine (Stanley, 160). In the parallel list, Josh. xv. 30, 31, Madmannah occurs in place of Beth-nimrah; possibly the latter was substituted for the former after the town had become the resort of chariots. Without supposing the one word to be a mere corruption of the other, the change of a name to one differing less in appearance than in meaning is quite in character with the plays on words frequent in Hebrew literature. [HAZAR-SUM, MADMANNAH.] [G.]

BETH-ME’ON (בֵּית מְעֹן; *oikos Meōn*; *Bethmaon*), Jer. xlviii. 23. A contracted form of the name elsewhere given as BETH-BAM-MLON. [G.]

BETH-NIM’RAH (בֵּית נִמְרָה = *house of sweet water*, Gesen.; ἡ Ναυρᾶ; Alex. Ἀμφραν, *Baithanabrad*; *Bethnaim*), one of the “fenced cities” on the East of the Jordan taken and “built” by the tribe of Gal (Num. xxxii. 36) and described as lying “in the valley” (בֵּית נִמְרָה) beside Beth-haran (Josh. xii. 27). In Num. xxxii. 3 it is named simply NIMRAH. By Eusebius and Jerome (*Onom.* Bethannaiam, and Beth-nemina) the village is said to have been still standing five miles north of Lilius (Beth-haran); and under Νέβρα Eusebius mentions that it was a large place, *κώμη μεγάλη*, in *Katania* (? Batanea), and called Ahna.

The name still survives in the *Nahr Nimrin*, the Arab appellation of the lower end of the *Wady Shoab*, where the waters of that valley discharge themselves into the Jordan close to one of the regular fords a few miles above Jericho. It has been seen by Seetzen (*Reisen*, 1854, ii. 318), and Robinson (i. 551), but does not appear to have been explored, and all that is known is that the vegetation is very thick, betokening an abundance of water. The *Wady Shoab* runs back up into the Eastern mountains, as far as *es-Salt*. Its name (the modern form of Hobaḥ?) connects it with the wanderings of the children of Israel, and a tradition still clings to the neighbourhood, that it was down this valley they descended to the Jordan (Seetzen, ii. 377).

It seems to have escaped notice how fully the requirements of Bethnaba are met in the circumstances of Bethnima—its abundance of water and its situation close to “the region round about Jordan” (ἡ περίχωρος τοῦ Ἰορδάνου, i. e. the CIGAR of the O. T., the Oasis of Jericho), immediately accessible to “Jerusalem and all Judaea” (John i. 28; Matt. iii. 5; Mark i. 5) by the direct and ordinary road from the capital. Add to this, what is certainly a strong confirmation of this suggestion, that in the LXX. the name of Bethnima is found almost exactly assuming the form of Bethabana—*Baithanabrad*, *Bethabrad*, *Betharabā* (see Holmes and Parsons’ LXX.).

The “Waters of Nimrin,” which are named in the denunciations of Moab by Isaiah and Jeremiah, must from the context be the brook which still bears the same name at the S. E. part of the Dead Sea. [NIMRIN.] A similar name (signifying, however, in Arabic, “panther”) is not uncommon on the east of the Jordan. [G.]

**BETH-PA'LET** (בֵּית פֶּלֶט; when not in pause, בֵּלֶט, *house of flight*; Βαιθφαλάδ; *Bethphalel*), a town among those in the extreme south of Judah, named in Josh. xv. 27, and Neh. xi. 26, with Moladah and Beersheba. In the latter place it is ΒΕΤΗΦΑΛΕΤ (following the Vulgate). Its remains have not yet been discovered. [G.]

**BETH-PAZ'ZEF** (בֵּית פֶּצֶץ; Βηρσαφίς; Alex. Βαιθραφίς; *Bethphazis*), a town of Issachar named with En-haddah (Josh. xix. 21), and of which nothing is known. [G.]

**BETH-PE'OR** (בֵּית פְּעוֹר; οἶκος Φογώρ; in Josh. Βαιθφογώρ; *fanum Phogor, Phogor, Bethphogor*; in *Onom.* *Bethfogo*), a place, no doubt dedicated to the god Baal-peor, on the east of Jordan, opposite (ἀπέναντι) Jericho, and six miles above Libias or Beth-baran (Euseb. *Onomasticon*). It was in the possession of the tribe of Reuben (Josh. xiii. 20). In the Pentateuch the name occurs in a formula by which one of the last halting-places of the children of Israel is designated—"the ravine (בְּנֵי הַנָּחַל) over against (מולד) Beth-peor" (Deut. iii. 29, iv. 46). In this ravine Moses was probably buried (xxiv. 6).

Here, as in other cases, the Beth may be a Hebrew substitution for Baal. [G.]

**BETH-PHAGE** (Βεθφαγή and Βηθφαγή; *Bethphage*; quasi בֵּית פֶּיגָה, *house of unripe figs*), the name of a place on the mount of Olives, on the road between Jericho and Jerusalem. From the two being twice mentioned together, it was apparently close to BETHANY (Matt. xxi. 1, Mark xi. 1; Luke xiv. 29), and from its being named first of the two in the narrative of a journey from east to west, it may be presumed that it lay, if anything, to the eastward of Bethany. The fact of our Lord's making Bethany His nightly lodging place (Matt. xxi. 17, &c.) is no confirmation of this (as Winer would have it); since He would doubtless take up His abode in a place where He had friends, even though it were not the first place at which He arrived on the road. No remains which could answer to this position have however been found (Rob. i. 433), and the traditional site is above Bethany, halfway between that village and the top of the mount.

By Eusebius and Jerome, and also by Origen, the place was known, though no indication of its position is given; by the former it is called *κώμη*, by Jerome *villula*. They describe it as a village of the priests, possibly from "Beth place," signifying in Syriac the "house of the jaw," and the jaw in the sacrifices being the portion of the priests (Beland, 653). Lightfoot's theory, grounded on the statements of the Talmudists, is extraordinary: that Bethphage was the name of a district reaching from the foot of Olivet to the wall of Jerusalem. (But see Beland, 652; Hug, *Krit.* i. 18, 19.) Schwarz (263, 4), and Barclay, in his map, appear to agree in placing Bethphage on the southern shoulder of the "Mount of Offence," above the village of Siloam, and therefore west of Bethany.

The name of Bethphage, the signification of which as given above is generally accepted, is, like those of Bethany, Capernaum, Bezetha, and the Mount of Olives itself, a testimony to the ancient fruitfulness of this district (Stanley, 187). [G.]

**BETH-PH'LEET**, Neh. xi. 26. [BETH-PALET.]

**BETH-RA'PHA** (בֵּית רָפָא; *house of Rapha*, or of the giant; δ Βαθράα; Alex. Βαθρεφά; *Bethrapha*), a name which occurs in the genealogy of Judah as the son of Esh-ton (1 Chr. iv. 12 only). There is a Rapha in the line of Benjamin and elsewhere, but no apparent connexion exists between those and this, nor has the name been identified as belonging to any place. [G.]

**BETH-RE'HOB** (בֵּית רְחוֹב; *house of Rechob*, or of room; Ροάβ, δ οἶκος Ραάβ, Alex. Τάβ; *Rohob*), a place mentioned as having near it the valley in which lay the town of Laish or Dan (Judg. xviii. 28). It was one of the little kingdoms of Aiam or Syria, like Zohab, Maacah, and Ish-tob (comp. the reading of the Alex. LXX. above), in company with which it was hired by the Ammonites to fight against David (2 Sam. x. 6). In ver. 8 the name occurs in the shorter form of Rehob, in which form it is doubtless again mentioned in Num. xiii. 21. Being, however, "far from Zidon" (Judg. xviii. 28), this place must not be confounded with two towns of the name of Rehob in the territory of Asher. [REHOB.] The conjecture of Robinson (iii. 371) is that this ancient place is represented by the modern *Hinnin*, a fortress commanding the plain of the *Hileh*, in which the city of Dan (*Tell el-Kady*) lay.

Hadadezer the king of Zobah is said to have been the son of Rehob (2 Sam. viii. 3, 12). [G.]

**BETH-SA'IDA** (Βηθσαιδά; *house of fish*; *Bethsaida*), the name of two places in Northern Palestine:—

1. "Bethsaida of Galilee" (John xii. 21), a city (πόλις), which was the native place of Andrew, Peter, and Philip (John i. 44, xii. 21) in the land of Gennesareth (τῆς γῆς Γ.) (Mark vi. 45; comp. 53), and therefore on the west side of the lake. It was evidently in near neighbourhood to Capernaum, and Chorazin (Matt. xi. 21; Luke x. 13; and comp. Mark vi. 45, with John vi. 16), and, if the interpretation of the name is to be trusted, close to the water's edge. By Jerome (*Comm. in Esai.* ix. 1) and Eusebius (*Onom.*) these towns and Tiberias are all mentioned together as lying on the shore of the lake. Euphrasius (*adv. Hier.* v.) says of Bethsaida and Capernaum οὐ μακρὰν ὕψτων τῇ διαστήματι. Willibald (A.D. 722) went from Magdala to Capernaum, thence to Bethsaida, and then to Chorazin. These ancient notices, however, though they fix its general situation, none of them contain any indication of its exact position, and as, like the other two towns just mentioned, its name and all memory of its site have perished, no positive identification can be made of it. Dr. Robinson places Bethsaida at *Ain el-Tibiqah*, a short distance north of Khan Minyeh, which he identifies with Capernaum (iii. 359).

2. By comparing the narratives (of the same event) contained in Mark vi. 31-53, and Luke ix. 10-17, in the latter of which Bethsaida is named as the spot at which the miracle took place, while in the former the disciples are said to have crossed the water from the scene of the event "to Bethsaida in the land of Gennesareth"—it appears certain that the Bethsaida at which the 5000 were fed must have been a second place of the same name on the east of the lake. Such a place there was at the

north-eastern extremity—formerly a village (κώμη), but rebuilt and adorned by Philip the Tetrarch, and raised to the dignity of a town under the name of Julius, after the daughter of the emperor (Jos. Ant. xviii. 2, §1; B. J. ii. 9, §1, iii. 10, §7). Here in a magnificent tomb Philip was buried (Jos. Ant. xviii. 4, §6).

Of this Bethsaida we have certainly one and probably two mentions in the Gospels: 1. that named above, of the feeding of the 5000 (Luke ix. 10). The miracle took place in a *τόπος ἔρημος*—a vacant, lonely spot, somewhere up in the rising ground at the back of the town, covered with a profusion of green grass (John vi. 3, 10; Mark vi. 39; Matt. xiv. 19), and in the evening the disciples went down to the water and went home across the lake (*εἰς τὸ πέραν*) to Bethsaida (Mark vi. 45), or as St. John (vi. 17) and St. Matthew (xiv. 34) more generally express it, towards Capernaum, and to the land of Gennesareth. The coincidence of the two Bethsidas occurring in the one narrative, and that on the occasion of the only absolutely certain mention of the eastern one, is extraordinary. In the very ancient Syriac recension (the Nitrian) just published by Mr. Cureton, the words in Luke ix. 10 "belonging to the city, called Bethsaida" are omitted.

2. The other, highly probable, mention of this place is in Mark viii. 22.<sup>a</sup> If Dalmanutha (viii. 10) was on the west side of the lake, then was Bethsaida on the east; because in the interval Christ had departed by ship to the other side (13). And with this well accords the mention immediately after of the villages of Caesarea Philippi (27), and of the "high mountain" of the transfiguration (ix. 2), which, as Mr. Stanley has ingeniously suggested, was, not the traditional spot, but a part of the Hermon range somewhere above the source of the Jordan (*S. & P.* 399).

Of the western Bethsaida no mention is made in Josephus, and until the discovery by Reland of the fact that there were two places of the name, one on the west, and one on the east side, the elucidation of the various occurrences of the two was one of the hardest knots of sacred geography (see Cellarius, *Notit.* ii. 536). [G.]

**BETH-SAMOS** (Βαιθασμών; Alex. Βαιθασμῶν; *Cybethinus*), 1. Esd. v. 18. [BETH-AZMAVETH.]

**BETH'SAN** (1 Macc. v. 52; xii. 40, 41). [BETHSHEAN.]

**BETH'SHAN** (1 Sam. xxxi. 10, 12; 2 Sam. xxi. 12). [BETHSHEAN.]

**BETH-SHE'AN** (בֵּית שֵׁעַן), or, in Samuel, BETHSHAN, (בֵּית שָׁן; Βαιθσάν, Βηθσάν, δ ὁ ἱὸς Σάν; *Bethsan*), a city which, with its "daughter" towns belonged to Manasseh (1 Chr. vii. 29), though within the limits of Issachar (Josh. xvii. 11), and therefore on the west of Jordan (comp. 1 Macc. v. 52)—but not mentioned in the lists of the latter tribe. The Canaanites were not driven out from the

town (Judg. i. 27). In Solomon's time it seems to have given its name to a district extending from the town itself to Abel-meholah; and "all Bethshean" was under the charge of one of his commissariat officers (1 K. iv. 12).

The corpses of Saul and his sons were fastened up to the wall of Bethshean by the Philistines (1 Sam. xxxi. 10, 12) in the open "street" or space (חֹרֶף), which—then as now—fronted the gate of an eastern town (2 Sam. xxi. 12). From this time we lose sight of Beth-shean<sup>b</sup> till the period of the Maccabees, in connexion with whose exploits it is mentioned more than once in a cursory manner (1 Macc. v. 32; comp. 1 Macc. xii. 40, 41). The name of Scythopolis (Σκυθων πόλις) appears for the first time in 2 Macc. xii. 29. [SCYTHOPOLIS.] This name, which it received after the exile, and under the Greek dominion, has not survived to the present day; as in many other cases (comp. PROLEMAIS) the old, Semitic appellation has revived, and the place is still called. *Beisán*. It lies in the Ghôr or Jordan valley, about twelve miles south of the sea of Galilee, and four miles west of the Jordan. The site of the town is on the brow of the descent, by which the great plain of Esdraelon drops down to the level of the Ghôr. A few miles to the south-west are the mountains of Gilboa, and close beside the town runs the water of the *Ain-Jalad*, the fountain of which is in Jezreel, and is in all probability the spring by which the Israelites encamped before the battle in which Saul was killed (1 Sam. xxix. 1).<sup>c</sup> Three other large brooks pass through or by the town, and in the fact of the abundance of water, and the exuberant fertility<sup>d</sup> of the soil consequent thereon, as well as in the power of using their chariots, which the level nature of the country near the town conferred on them (Josh. xvii. 16), resides the secret of the hold which the Canaanites retained on the place.

If Jabesh-Gilead was where Dr. Robinson conjectures—at *ed-Deir* in the *Wady Yâbis*—the distance from thence to Beisan, which it took the men of Jabesh "all night" to traverse, cannot be less than twenty miles. [G.]

**BETH-SHEMESH** (בֵּית שֵׁמֶשׁ), in prose שֵׁמֶשׁ, house of the sun; πόλις ἡλίου; Βαιθσαμὸς; *Bethsames*), the name of several places. 1. One of the towns which marked the north boundary of Judah (Josh. xv. 10), but not named in the lists of the cities of that tribe. It was in the neighbourhood of Kirjath-jearim and Timnah, and therefore in close proximity to the low-country of Philistia. The expression "went down" in Josh. xv. 10; 1 Sam. vi. 21, seems to indicate that the position of the town was lower than Kirjath-jearim; and it is in accordance with the situation that there was a valley (עֵמֶק) of cornfields attached to the place (1 Sam. v. 13).

From Ekron to Bethshemesh a road (יָרֵד, ὁδός) existed along which the Philistines sent back the ark

<sup>a</sup> The use of the word κώμη in this place is remarkable. Mr. Stanley suggests that its old appellation had stuck to it, even after the change in its dignity (*S. & P.* App. §85).

<sup>b</sup> Unless the conjecture of Schwarz (148, note) be accepted, that the words (בֵּית הַשָּׁן, house of the tooth; A. V. *irony house*) in 1 K. xxii. 39, should be rendered Beth-ahan.

<sup>c</sup> The exactness of the definition in this description is seriously impaired in the A. V. by the substitution of "a fountain" for "the fountain" of the original.

<sup>d</sup> So great was this fertility, that it was said by the Rabbis, that if Paradise was in the land of Israel, Beth-shean was the gate of it; for that its fruits were the sweetest in all the land. (See the quotations in Lightfoot, *Chor. Cent.* ix.)

after its calamitous residence in their country (1 Sam. vi. 9, 12); and it was in the field of "Joshua the Beth-shemite" (בֵּית הַשֵּׁמִי) that the "great Abel" (whatever that may have been) was, on which the ark was set down (1 Sam. vi. 18). Beth-shemesh was a "suburb city," allotted to the priests (Josh. xxi. 16; 1 Chr. vi. 59); and it is named in one of Solomon's commissariat districts under the charge of Ben-Dekar (1 K. iv. 9). It was the scene of an encounter between Jehoash, king of Israel, and Amaziah, king of Judah, in which the latter was worsted and made prisoner (2 K. xiv. 11, 13; 2 Chr. xxv. 21, 23). Later, in the days of Ahaz, it was taken and occupied by the Philistines, together with several other places in this locality (2 Chr. xxviii. 18).

By comparison of the lists in Josh. xv. 10, xix. 41, 43, and 1 K. iv. 9, it will be seen that IR-SHEMESII, "city of the sun," must have been identical with Beth-shemesh, Ir being probably the older form of the name; and again, from Judg. i. 35, it appears as if Har-cheres, "mount of the sun," were a third name for the same place; suggesting an early and extensive worship of the sun in this neighbourhood. [IR-SHEMESII; HERES.]

Beth-shemesh is now *Ain-Shems*. It was visited by Dr. Robinson, who found it to be in a position exactly according with the indications of Scripture, on the north-west slopes of the mountains of Judah - "a low plateau at the junction of two fine plains" (Rob. iii. 153)—about two miles from the great Philistine plain, and seven from Ekron (ii. 224-6). The origin of the *Ain* ("spring") in the modern name is not obvious, as no spring or well appears now to exist at the spot; but the *Shems* and the position are decisive.

2. A city on the border of Issachar (Josh. xix. 22).

3. One of the "fenced cities" of Naphtali, twice named (Josh. xix. 38; Judg. i. 33), and on both occasions with BETH-ANATH. The Canaanite inhabitants were not expelled from either place, but became tributaries to Israel. Jerome's expression (*Onom.* Bethsamis) in reference to this is perhaps worthy of notice, "in qua cultores pristini manserunt;" possibly glancing at the worship from which the place derived its name.

4. By this name is once mentioned (Jer. xliii. 13) an idolatrous temple or place in Egypt, which the LXX. render by Ἡλιουπόλις ἐν Ἰνῶν, i. e. the famous Heliopolis; Vulg. *domus solis*. In the middle ages Heliopolis was still called by the Arabs *Ain Shems* (Edrisi, &c., in Rob. i. 25). [AVEN; ON.]

**BETH-SHITTAH** (בֵּית הַשִּׁטָּה, *house of the acacia*; Βηθσέττα; Alex. ἡ Βασιέττα; *Beth-setta*), one of the spots to which the flight of the host of the Midianites extended after their discomfiture by Gideon (Judg. vii. 22). Both the narrative and the name (comp. "Abel-shittim," which was in the Jordan valley opposite Jericho) require its situation to be somewhere near the river, where also Zereth (probably Zeredatha or Zartan) and Abel-meholah doubtless lay: but no identification has yet been made of any of these spots. The *Shittah* mentioned by Robinson (ii. 356) and Wilson (Ritter, *Jordan*, 414) is too far to the west to suit the above requirements. Josephus's version of the locality is absolutely in favour of the place being well watered: ἐν κοίλῃ χαράδρῃ περιειλημμένῃ χωρίῳ (*Ant.* v. 6, §5).

**BETH-SUR'A** (ἡ Βαθσούρα, τὰ Βαθσούρα, 1 Mac. iv. 29. 61; vi. 7, 26, 31, 49, 50; ix. 52; x. 14; xi. 65; xiv. 7; 2 Mac. xi. 5; xiii. 19, 23). [BETH-ZUR.]

**BETH-TAPPUAH** (בֵּית תַּפּוּא, *house of the apple or citron*; Βαθαχού, Alex. Βεθααφουέ; *Beth-thaphua*), one of the towns of Judah, in the mountainous district, and near Hebron (Josh. xv. 53; comp. 1 Chr. ii. 43). Here it has actually been discovered by Robinson under the modern name of *Teffah*, 1½ hour, or say 5 miles, W. of Hebron, on a ridge of high table-land. The terraces of the ancient cultivation still remain in use, and though the "apples" have disappeared, yet olive-groves and vineyards with fields of grain surround the place on every side (Rob. ii. 71; Schwarz, 105A).

The name of Tappuah was borne by another town of Judah which lay in the rich lowland of the Shefela. [APPLE; TAPPUAH.] [G.]

**BETHUEL** (בֵּיתוּאֵל; Βαθουήλ; Joseph. Βαθούηλος; *Bethuel*), the son of Nahor by Milcah; nephew of Abraham, and father of Rebekah (Gen. xxii. 22, 23; xxiv. 15, 24, 47; xxviii. 2). In xxv. 20, and xxviii. 5, he is called "Bethuel the Syrian" (i. e. Aramite, אֲרָמִי). Though often referred to as above in the narrative, Bethuel only appears in person once (xxiv. 50). Upon this an ingenious conjecture is raised by Prof. Blunt (*Coincidences*, I. §iv.) that he was the subject of some imbecility or other incapacity. The Jewish tradition, as given in the Targum Ps. Jonathan on Gen. xxiv. 55 (comp. 33), is that he died on the morning after the arrival of Abram's servant, owing to his having eaten a sauce containing poison at the meal the evening before, and that on that account Laban requested that his sister's departure might be delayed for a year or ten months. Josephus was perhaps aware of this tradition since he speaks of Bethuel as dead (*Ant.* i. 16, §2). [G.]

**BETHUEL** (בֵּיתוּאֵל; Βαθουήλ; Alex. Βαθούλ; *Bathuel*), 1 Chr. iv. 30. [BETHUL.]

**BETH'UL** (בֵּתוּל; Arab. *Bethur*, بثور; Βουλά; *Rethul*), a town of Simeon in the south, named with El-tolad and Ilormah (Josh. xix. 4). In the parallel lists in Josh. xv. 30, and 1 Chr. iv. 9, the name appears under the forms of CHESIL (כְּסִיל) and BETHU'EL; and probably also under that of Bethel in Josh. xii. 16; since, for the reasons urged under BETH'EL, and also on account of the position of the name in this list, the northern Bethel can hardly be intended. [BETH'EL.] [G.]

**BETHULIA** (Βεθουλία; *Bethulia*), the city which was the scene of the chief events of the book of Judith, in which book only does the name occur. Its position is there described with very minute detail. It was near to Dothaim (iv. 6), on a hill (ὄρος) which overlooked (ἀνέαντι) the plain of Esdraelon (vi. 11, 13, 14, vii. 7, 10, xiii. 10) and commanded the passes from that plain to the hill country of Manasseh (iv. 7, vii. 1), in a position so strong that Holofernes abandoned the idea of taking it by attack, and determined to reduce it by possessing himself of the two springs or wells (πηγάς) which were "under the city" in the valley at the foot of the eminence on which it was built, and from which the inhabitants derived their chief supply of water (vi. 11, vii. 7, 13, 21). Not-

withstanding this detail, however, the identification of the site of Bethulia has hitherto defied all attempts, and is one of the greatest puzzles of sacred geography; so much so as to form an important argument against the historical truth of the book of Judith (Rob. iii. 337, 8).

In the middle ages the name of Bethulia was given to "the Frank Mountain," between Bethlehem and Jerusalem (Rob. i. 479), but it is unnecessary to say that this is very much too far to the south to suit the narrative. More lately it has been assumed to be *Safel* in North Galilee (Rob. ii. 425); which again, if in other respects it would agree with the story, is too far north. Von Raumer (*Pal.* 135, 6) suggests *Sandir*, which is perhaps the nearest to probability. The ruins of that town are on an "isolated rocky hill," with a plain of considerable extent to the east, and, as far as situation is concerned, naturally all but impregnable (Rob. ii. 312). It is about three miles from *Dotham*, and some six or seven from *Jenin* (Engannim), which stand on the very edge of the great plain of Esdraelon. Though not absolutely commanding the pass which leads from *Jenin* to *Sebastieh*, and forms the only practicable ascent to the high country, it is yet sufficiently near to bear out the somewhat vague statement of Jud. v. 6. Nor is it unimportant to remember that *Samir* actually endured a siege of 2 months from Djezzar Pasha without yielding, and that on a subsequent occasion it was only taken after a three or four months' investment, by a force very much out of proportion to the size of the place (Rob. ii. 313). [G.]

#### BETH-ZACHARIAS. [BATH-ZACHARIAS.]

**BETH-ZUR** (בֵּית זֹר, *house of rock*; Βηθσούρ; *Bethsura*), a town in the mountains of Judah, named between Halhal and Gedor (Josh. xv. 58). As far as any interpretation can, in their present imperfect state, be put on the genealogical lists of 1 Chr. ii. 42-49, Bethzur would appear from ver. 45 to have been founded by the people of Maon, which again had derived its origin from Hebron. However this may be, Beth-zur was "built," —i. e. probably fortified—by Rehobam, with other towns of Judah, for the defence of his new kingdom (2 Chr. xi. 7). After the captivity the people of Beth-zur assisted Nehemiah in the rebuilding of the wall of Jerusalem (Neh. iii. 16); the place had a "ruler" (שָׂרָא), and the peculiar word *Pelec* (פֶּלֶעַץ) is employed to denote a district or circle attached to it, and to some other of the cities mentioned here. [TOPOGRAPHICAL TERMS.]

In the wars of the Maccabees, Bethzur, or Bethsura, played an important part. It was fortified by Judas and his brethren "that the people might have a defence against Idumaea," and they succeeded in making it "very strong and not to be taken without great difficulty" (Jos. Ant. xii. §4); so much so, that it was able to resist for a length of time the attacks of Simon Mac. (1 Macc. xi. 65) and of Lysias (2 Macc. xi. 5), the garrison having in the former case capitulated. Before Bethzur took place one of the earliest victories of Judas over Lysias (1 Macc. iv. 29), and it was in an attempt to relieve it when besieged by Antiochus Epiphanes, that he was defeated in the passes between Bethzur and Bath-zacharias, and his brother Eleazar killed by one of the elephants of the king's army (1 Macc. vi. 32-47; Jos. Ant. xii. 9, 3). The recovery of the site of Bethzur, under

the almost identical name of *Beit-sar*, by Wolcott and Robinson (i. 216, note; iii. 277), explains its impregnability, and also the reason for the choice of its position, since it commands the road from Beersheba and Hebron, which has always been the main approach to Jerusalem from the south.

A short distance from the Tell, on which are strewn the remains of the town, is a spring, *Ain el-Dhirweh*, which in the days of Jerome, and later, was regarded as the scene of the baptism of the Eunuch by Philip. The probability of this is elsewhere examined [GAZA]; in the meantime it may be noticed that *Beit-sar* is not near the road to Gaza (Acts viii. 26), which runs much more to the north-west. [BETHI-SURA.] [G.]

**BETO'LUS** (Βετόλιος), 1 Esd. v. 21. [BETHEL.]

**BETOMESTHAM** (Βετομεσθαίμ) and **BETOMASTHEM** (Βαιτομασθαίμ); Syr. *Bithmasthin*, a town "over against Esdraelon, facing the plain that is near Dotham" (Jud. iv. 6, xv. 4), and which from the manner of its mention would seem to have been of equal importance with Bethulia itself. No attempt to identify either Betomestham or Bethulia has been hitherto successful. [BETHULIA. DOTHAIM.] [G.]

**BETO'NIM** (בֵּית נִים = pistachio nuts; *Betonim*; *Betonim*), a town in the inheritance of the children of Gad, apparently on their northern boundary (Jos. xiii. 26). The word, somewhat differently pointed, occurs in Gen. xliii. 11, A. V. "nuts." It is probably related to the modern Arabic word *Bulm* = terebinth, *Pistacia terebinthus*. [G.]

#### BETROTHING. [MARRIAGE.]

**BEU'IAH** (בְּעֻיָּה = married; *oikouménē*; *inhabitant*), the name which the land of Israel is to bear, when "the land shall be married (נִשְׁתַּבַּח)," Is. liii. 4.

**BE'ZAI** (בְּצַי; Βασσαι, Βεσαι, Βησι; *Bezni*), "children of *Bezni*" to the number of 323, returned from captivity with Zerubbabel (Ezr. ii. 17; Neh. vii. 23). The name occurs again among those who sealed the covenant (Neh. x. 18). [BASSA.]

**BEZAI'EEEL** (בְּצַיִּיֵּעֵל; Βεσαϊεήλ; *Bezeleel*).

1. The artificer to whom was confided by Jehovah the design and execution of the works of art required for the tabernacle in the wilderness (Ex. xxxi. 1-6). His charge was chiefly in all works of metal, wood, and stone, Aholiab being associated with him for the textile fabrics; but it is plain from the terms in which the two are mentioned (xxxvi. 1, 2, xxxviii. 22), as well as from the enumeration of the works in Bezaleel's name in xxxvii. and xxxviii., that he was the chief of the two, and master of Aholiab's department as well as his own. Bezaleel was of the tribe of Judah, the son of Uri the son of Hur (or Chur). Hur was the offspring of the marriage of Caleb (one of the chiefs of the great family of Pharez) with Ephrath (1 Chr. ii. 19, 50), and one of his sons, or descendants (comp. Ruth iv. 20) was Salma, or Salmon, who is handed down under the title of "father of Bethlehem;" and who, as the actual father of Boaz, was the direct progenitor of king David (1 Chr. ii. 51, 54; Ruth iv. 21). [BETHLEHEM, HUR.]

2. One of the sons of Pahath-moab who had taken a foreign wife, Ezr. x. 30.

BE'ZEK (בֶּזֶק; Bezék; Bezoe), the name of two apparently distinct places in Palestine.

1. The residence of Adoni-bezek, i. e. the "lord of Bezek" (Judg. i. 5); in the "lot (לֹט) of Judah" (verse 3), and inhabited by Canaanites and Perizzites (verse 4). This must have been a distinct place from

2. Where Saul numbered the forces of Israel and Judah before going to the relief of Jabesh-gilead (1 Sam. xi. 8). From the terms of the narrative this cannot have been more than a day's march from Jabesh; and was therefore doubtless somewhere in the centre of the country, near the Jordan valley. In accordance with this is the mention in the *Onomasticon*, of two places of this name seventeen miles from Neapolis (Shechem), on the road to Beth-shean. The LXX. inserts ἐν Βαυδ after the name, possibly alluding to some "high place" at which this solemn muster took place. This Josephus gives as Βαλδ (Ant. vi. 5, §1).

No identification of either place has been made in modern times.

[G.]

BE'ZER IN THE WILDERNESS (בְּצֶר בְּמִדְבָּר; Βοσόρ ἐν τῇ ἐρημῳ; *Besor in solitude*), a city of the Reubenites, with "suburbs," in the *Mishor* or downs, set apart by Moses as one of the three cities of refuge on the east of the Jordan, and allotted to the Merarites (Deut. iv. 43; Josh. xx. 8, xxi. 36; 1 Chr. vi. 78). In the two last passages the exact specification, בְּצֶר, of the other two is omitted, but traces of its former presence in the text in Josh. xvi. 16 are furnished us by the reading of the LXX. and Vulg.—τὴν Βοσόρ ἐν τῇ ἐρημῳ, τὴν Μισώρ (Alex. Μισώρ) καὶ τὰ περισπόρια; *Besor in solitude, Mishor et Jaser*.

Bezer may be the Bosor of the Books of Maccabees. [BOSOR.]

[G.]

BE'ZER (בְּצֶר; Βοσόρ; Alex. Βασόρ; *Bosor*), son of Zophah, one of the heads of the house of Asher (1 Chr. vii. 37).

BE'ZETH (Βηζέθ; *Bethzecha*), a place at which Bacchides encamped after leaving Jerusalem, and where there was a "great pit" (τὸ φρέαρ τὸ μέγα; 1 Macc. vii. 19). By Josephus (Ant. xii. 10, §2) the name is given as "the village Beth-zetho" (κώμη Βηθζήθω λεγομένη), which recalls the name applied to the Mount of Olives in the early Syriac recension of the N. T. published by Mr. Cureton — Beth-Zaith. The name may thus refer either to the main body of the Mount of Olives, or to that branch of it to the north of Jerusalem, which at a later period was called Bezetha. [G.]

BI'ATAS (Φατίας; Alex. Φιδίας; *Philius*), 1 Esdr. ix. 48. [PELAIACH.]

BIBLIE (Βιβλία, LXX.; *Biblia*, Vulg.).—1. The application of this word, κατ' ἐξοχήν, to the collected books of the Old and New Testament is not to be traced further back than the 5th century. The terms which the writers of the New Testament use of the Scriptures of the Old are ἡ γραφή (2 Tim. iii. 16; Acts viii. 32; Gal. iii. 22), αἱ γραφαί (Matt. xxi. 42; Luke xxiv. 27), τὰ ἱερὰ γράμματα (2 Tim. iii. 15). Βιβλίον is found (2 Tim. iv. 13; Rev. x. 3, v. 1), but with no distinctive meaning; nor does the use of τὰ λοιτὰ τῶν βιβλίων for the Hagiographa in the Preface

to Ecclesiasticus, or of αἱ ἱερὰ βιβλία in Josephus (Ant. i. 6, §2), indicate anything as to the use of τὰ βιβλία alone as synonymous with ἡ γραφή. The words employed by early Christian writers were naturally derived from the language of the New Testament, and the old terms, with epithets like θεία, ἁγία, and the like continued to be used by the Greek fathers, and the equivalent "Scriptura" was by the Latin. The use of ἡ παλαιὰ διαθήκη in 2 Cor. iii. 14, for the law as read in the synagogues, and the prominence given in the Epistle to the Heb. (vii. 22, viii. 6, ix. 15) to the contrast between the παλαιὰ and the καινή, led gradually to the extension of the former to include the other books of the Jewish Scriptures, and to the application of the latter as of the former to a book or collection of books. Of the Latin equivalents which were adopted by different writers (*Instrumentum, Testamentum*), the latter met with the most general acceptance, and perpetuated itself in the languages of modern Europe. One passage in Tertullian (*adv. Marc.* iv. 1) illustrates the growing popularity of the word which eventually prevailed, "Instrumenti vel quod magis in usu est dicere, testamenti." The word was naturally used by Greek writers in speaking of the parts of these two collections. They enumerate (e. g. Athan. *Synop. Sac. Script.*) τὰ βιβλία of the Old and New Testament; and as these were contrasted with the apocryphal books circulated by heretics, there was a natural tendency to the appropriation of the word as limited by the article to the whole collection of the canonical Scriptures. In Chrysostom (*Hom. x. in Gen., Hom. ix. in Col.*) it is thus applied in a way which shows this use to have already become familiar to those to whom he wrote. The liturgical use of the Scriptures, as the worship of the Church became organised, would naturally favour this application. The MSS. from which they were read would be emphatically the books of each church or monastery. And when this use of the word was established in the East, it was natural that it should pass gradually to the Western Church. The terminology of that Church bears witness throughout (e. g. Episcopus, Presbyter, Diaconus, Litania, Liturgia, Monachus, Abbas, and others) to its Greek origin, and the history of the word Biblia has followed the analogy of those that have been referred to. Here too there was less risk of its being used in any other than the higher meaning, because it had not, in spite of the introduction even in classical Latinity of Bibliotheca, Bibliopola, taken the place of libri, or libelli, in the common speech of men.

It is however worthy of note, as bearing on the history of the word in our own language, and on that of its reception in the Western Church, that "Bible" is not found in Anglo-Saxon literature, though Bibliothece is given (Lye, *Dict. Anglo-Sax.*) as used in the same sense as the corresponding word in mediæval Latin for the Scriptures as the great treasure-house of books (Du Cange and Adelung, *in voc.*). If we derive from our mother-tongue the singularly happy equivalent of the Greek ἐπαγγελίον, we have received the word which stands on an equal eminence with Gospel as one of the later importations consequent on the Norman Conquest and fuller intercourse with the Continent. When the English which grew out of this union first appears in literature, the word is already naturalised. In R. Brunne (p. 290), *Piers Ploughman* (1916, 4271), and Chaucer (*Prolog.* 437), it appears in its dis-

inctive sense, though the latter, in at least one passage (*House of Fame*, Book iii.) uses it in a way which indicates that it was not always limited to that meaning. From that time however the higher use prevailed to the exclusion of any lower; and the choice of it, rather than of any of its synonyms by the great translators of the Scriptures, Wyclif, Luther, Coverdale, fixed it beyond all possibility of a change. The transformation of the word from a plural into a singular noun in all the modern languages of Europe, though originating probably in the solecisms of the Latin of the 13th century (Dr Cange, in *voc. Biblia*), has made it fitter than it would otherwise have been, for its high office as the title of that which, by virtue of its unity and plan, is emphatically *THE* Book.

II. The history of the growth of the collections known as the Old and New Testament respectively, will be found fully under CANON. It falls within the scope of the present article to indicate in what way and by what steps the two came to be looked on as co-ordinate authority, and therefore as parts of one whole—how, *i. e.* the idea of a completed Bible, even before the word came into use, presented itself to the minds of men. As regards a large portion of the writings of the New Testament it is not too much to say that they claim an authority not lower, nay even higher than the Old. That which had not been revealed to the "prophets" of the Old dispensation is revealed to the prophets of the New (Eph. iii. 5). The Apostles write as having the Spirit of Christ (1 Cor. vii. 40), as teaching and being taught "by the revelation of Jesus Christ" (Gal. i. 12). Where they make no such direct claim their language is still that of men who teach as "having authority," and so far the old prophetic spirit is revived in them, and their teaching differs, as did that of their Master, from the traditions of the Scribes. As the revelation of God through the Son was recognised as fuller and more perfect than that which had been made *πολυμερῶς καὶ πολυτρόπως* to the fathers (Heb. i. 1), the records of what He had done and said, when once recognised as authentic, could not be regarded as less sacred than the Scriptures of the Jews. Indications of this are found even within the N. T. itself. Assuming the genuineness of the 2nd Epistle of Peter, it shows that within the lifetime of the Apostles, the Epistles of St. Paul had come to be classed among the *γραφαὶ* of the Church (2 Pet. iii. 16). The language of the same Epistle in relation to the recorded teaching of Prophets and Apostles (iii. 2, cf. Eph. iii. 20, iii. 5, v. 11), shows that the *πᾶσα προφητεία γραφῆς* can hardly be limited to the writings of the Old Testament. The command that the letter to the Colossians was to be read in the church of Laodicea (Col. iv. 16), though it does not prove that it was regarded as of equal authority with the *γραφὴ θεοκνευστος*, indicates a practice which would naturally lead to its being so regarded. The writing of a man who spoke as inspired, could not fail to be regarded as participating in the inspiration. It is part of the development of the same feeling that the earliest records of the worship of the Christian Church indicate the liturgical use of some at least of the writings of the New, as well as of the Old Testament. Justin (*Apol.* i. 66) places *τὰ ἀπομνημονεύματα τῶν ἀποστόλων* as read in close connexion with, or in the place of *τὰ ἀντιγράμματα τῶν προφητῶν*, and this juxtaposition corresponds to the manner in which Ignatius had previously spoken of *αἱ προφητεῖαι, νόμος Μωσέως*,

*τὸ εὐαγγέλιον* (*Ep. ad Smyrn.* c. 7). It is not meant of course that such phrases or such practices prove the existence of a recognised collection, but they show with what feelings individual writings were regarded. They prepare the way for the acceptance of the whole body of N. T. writings, as soon as the Canon is completed, as on a level with those of the Old. A little further on and the recognition is complete. Theophilus of Antioch (*ad Autolyo.* B. iii.), Irenaeus (*adv. Hær.* ii. 27, iii. 1), Clement of Alexandria (*Strom.* iii. p. 455, iv. p. 561), Tertullian (*adv. Prax.* 15, 20), all speak of the New Testament writings (what writings they included under this title is of course a distinct question) as making up with the Old, *μία γνώσις* (Clem. Al. *l. c.*), "totum instrumentum utriusque testamenti" (Tert. *l. c.*), *universæ scripturæ*. As this was in part a consequence of the liturgical usage referred to, so it reacted on it, and influenced the transcribers and translators of the books which were needed for the instruction of the Church. The Syrian Peschito in the 3rd, or at the close of the 2nd century, includes (with the omission of some of the *ἀπτελεγόμενα*) the New Testament as well as the Old. The Alexandrian Codex, presenting in the fullest sense of the word a complete Bible, may be taken as the representative of the full maturity of the feeling, which we have seen in its earlier developments.

III. The existence of a collection of sacred books recognised as authoritative, leads naturally to a more or less systematic arrangement. The arrangement must rest upon some principle of classification. The names given to the several books will indicate in some instances the view taken of their contents, in others the kind of notation applied both to the greater and smaller divisions of the sacred volumes.

The existence of a classification analogous to that adopted by the later Jews and still retained in the printed Hebrew Bibles, is indicated even before the completion of the O. T. Canon (Zech. vii. 12). When the Canon was looked on as settled, in the period covered by the books of the Apocrypha, it took a more definite form. The Prologue to Ecclesiasticus mentions "the law and the prophets and the other Books." In the N. T. there is the same kind of recognition. "The Law and the Prophets" is the shorter (Matt. xi. 13; xxii. 40; Acts xiii. 15, &c.); "the Law, the Prophets, and the Psalms" (Luke xxiv. 44), the fuller statement of the division popularly recognised. The arrangement of the books of the Heb. text under these three heads, requires however a further notice.

1. The *Torah*, תּוֹרָה, *νόμος*, naturally continued to occupy the position which it must have held from the first as the most ancient and authoritative portion. Whatever questions may be raised as to the antiquity of the whole Pentateuch in its present form, the existence of a book bearing this title is traceable to a very early period in the history of the Israelites (Josh. i. 8, viii. 3, xxiv. 26). The name which must at first have attached to those portions of the whole book was applied to the earlier and contemporaneous history connected with the giving of the Law, and ascribed to the same writer. The marked distinctness of the five portions which make up the Torah shows that they must have been designed as separate books, and when the Canon was completed, and the books in their present form made the object of study, names for each book were wanted and were found. In the Hebrew

classification the titles were taken from the initial words, or prominent words in the initial verse; in that of the LXX. they were intended to be significant of the subject of each book, and so we have—

1. בְּרֵאשִׁית . . . Γένεσις.
2. שְׁמוֹת (וַאֲלֵה) . . . Ἔξοδος.
3. וַיִּקְרָא . . . Λευιτικόν.
4. בְּמִדְבָּר . . . Ἀριθμοί.
5. דְּבָרִים . . . Δευτερονόμιον.

The Greek titles were adopted without change, except as to the 4th in the Latin versions, and from them have descended to the bibles of modern Christendom.

2. The next group presents a more singular combination. The arrangement stands as follows:—

Achim. נביאים Prophetae.	{ ראשונים (prioris)	{ נבואים (majores)	{ Isaiah. Jeremiah. Ezekiel.
	{ אחרונים (posteriores)	{ כְּתוּבִים (minores)	{ The twelve minor prophets.

—the Hebrew titles of these books corresponding to those of the English bibles.

The grounds on which books simply historical were classed under the same name as those which contained the teaching of Prophets, in the stricter sense of the word, are not at first sight obvious, but the O. T. presents some facts which may suggest an explanation. The Sons of the Prophets (1 Sam. x. 5; 2 K. v. 22, vi. 1) living together as a society, almost as a caste (Am. vii. 14), trained to a religious life, cultivating sacred ministrations, must have occupied a position as instructors of the people, even in the absence of the special calling which sent them as God's messengers to the people. A body of men so placed, become naturally, unless intellectual activity is absorbed in asceticism, historians and annalists. The references in the historical books of the O. T. show that they actually were so. Nathan the prophet, Gad, the seer of David (1 Chr. xxix. 29), Ahijah and Iddo (2 Chr. ix. 29), Isaiah (2 Chr. xxvi. 22, xxxiii. 32), are cited as chroniclers. The greater antiquity of the earlier historical books, and perhaps the traditional belief that they had originated in this way, were likely to co-operate in raising them to a high place of honour in the arrangement of the Jewish Canon, and so they were looked on as having the prophetic character which was deputed to the historical books of the Hagiographa. The greater extent of the prophecies of Isaiah, Jeremiah, Ezekiel, no less than the prominent position which they occupied in the history of Israel, led naturally to their being recognised as the Prophetae Majores. The exclusion of Daniel from this subdivision is a more remarkable fact, and one which has been differently interpreted, the Rationalistic school of later criticism (Eichhorn, De Wette, Bertholdt) seeing in it an indication of later date, and therefore of doubtful authenticity, the orthodox school on the other, as represented by Heugstenberg (*Dissert. on Dan.*, Ch. ii. §iv. and v.), maintaining that the difference rested only on the ground that, though the utterer of predictions, he had not exercised, as the others had done, a prophet's office among the people. Whatever may have been its origin, the position of this Book in

the Hagiographa led the later Jews to think and speak slightly of it, and Christians who reasoned with them out of its predictions were met by remarks disparaging to its authority (Heugstenberg, *l. c.*). The arrangement of the Prophetae Minores does not call for special notice, except so far as they were counted, in order to bring the whole list of Canonical books within a memorial number, answering to that of the letters in the Hebrew alphabet, as a single volume, and described as τὸ δωδεκαπρόβητον.

3. Last in order came the group known as *Octubium*, כְּתוּבִים (from כָּתַב, to write), γραφαί, ἀγιο-γραφαί, including the remaining books of the Hebrew Canon, arranged in the following order, and with subordinate divisions:

- (a) Psalms, Proverbs, Job.
- (b) The Song of Songs, Ruth, Lamentations, Ecclesiastes, Esther.
- (c) Daniel, Ezra, Nehemiah, 1 and 2 Chronicles.

Of these, (a) was distinguished by the memorial word אֱמֶת, "truth," formed from the initial letters of the three books; (b) הַמֶּשֶׁן מְנוּלוֹת, the five rolls as being written for use in the synagogues on special festivals on five separate rolls.

Of the Hebrew titles of these books, those which are descriptive of their contents are תְּהִלִּים, the Psalms, מְשָלִי, Proverbs, אֵיכָה, Lamentations (from the opening word of wailing in i. 1). The Song of Songs (שִׁיר הַשִּׁירִים). Ecclesiastes (קֹהֵלֶת, the Preacher). 1 and 2 Chronicles (דְּבָרֵי הַיָּמִים, words of days = records).

The Septuagint translation presents the following titles, — Ψαλμοί, Παροιμιαί, Θρήνοι, Ἄσμα ἀσμα-των, Ἑκκλησιαστής, Παραλειπομένα (i. e. things omitted, as being supplementary to the Books of Kings). The Latin version imports some of the titles, and translates others. Psalmi, Proverbia, Threni, Canticum Cantiorum, Ecclesiastes, Paralipomenon, and these in their translated form have determined the received titles of the book in our English Bibles, — Ecclesiastes, in which the Greek title is retained, and Chronicles, in which the Hebrew and not the Greek title is translated, being exceptions.

The LXX. presents, however, some striking variations in point of arrangement as well as in relation to the names of books. Both in this and in the insertion of the ἀπτελεσόμενα (i. e. things which are not completed), among the other books, we trace the absence of that strong reverence for the Canon and its traditional order which distinguished the Jews of Palestine. The Law, it is true, stands first, but the distinction between the greater and lesser prophets, between the Prophets and the Hagiographa is no longer recognised. Daniel, with the Apocryphal additions, follows upon Ezekiel; the Apocryphal 1st or 3rd Book of Esdras comes as a 2nd following on the Canonical Ezra. Tobit and Judith are placed after Nehemiah, Wisdom (Σοφία Σαδουμαντος) and Ecclesiasticus (Σοφία Σειραχ) after Canticles, Baruch before and the Epistle of Jeremiah after Lamentations, the twelve Lesser Prophets before the four Greater, and the two Books of Maccabees come at the close of all. The Latin version follows nearly the same order, inverting the relative position of the greater and lesser prophets.

The separation of the doubtful books under the title of Apocrypha in the Protestant versions of the Scriptures, left the others in the order in which we now have them.

The history of the arrangement of the Books of the New Testament presents some variations, not without interest, as indicating differences of feeling or modes of thought. The four Gospels and the Acts of the Apostles uniformly stand first. They are so far to the New what the Pentateuch was to the Old Testament. They do not present however in themselves, as the Books of Moses did, any order of succession. The actual order does not depend upon the rank or function of the writers to whom they are assigned. The two not written by Apostles are preceded and followed by those which are, and it seems as if the true explanation were to be found in a traditional belief as to the dates of the several Gospels, according to which St. Matthew's, whether in its Greek or Hebrew form, was the earliest, and St. John's the latest. The arrangement once adopted would naturally confirm the belief, and so we find it assumed by Irenæus, Origen, Augustine. The position of the Acts as an intermediate book, the sequel to the Gospels, the prelude to the Epistles, was obviously a natural one. After this we meet with some striking differences. The order in the Alexandrian, Vatican and Ephraem MSS. (A B C) gives precedence to the Catholic Epistles, and as this is also recognised by the Council of Laodicea (*Can.* 60), Cyril of Jerusalem (*Catech.* iv. p. 35), and Athanasius (*Epist. Fest.* ed. Bened. i. p. 961), it would appear to have been characteristic of the Eastern Churches. Lachmann, who bases his recension of the text chiefly on this family of MSS., has reproduced the arrangement in his editions. The Western Church on the other hand, as represented by Jerome, Augustine, and their successors, gave priority of position to the Pauline Epistles, and as the order in which these were given presents (1.) those addressed to Churches arranged according to their relative importance, (2.) those addressed to individuals, the foremost place was naturally occupied by the Epistle to the Romans. The tendency of the Western Church to recognise Rome as its centre of authority may perhaps in part account for this departure from the custom of the East. The order of the Pauline Epistles themselves, however, is generally the same, and the only conspicuously different arrangement was that of Marcion, who aimed at a chronological order. In the three MSS. above referred to, the Epistle to the Hebrews comes after 2 Thessalonians. In those followed by Jerome, it stands, as in the English Bible and the Textus Receptus, after Philemon. We are left to conjecture the grounds of this difference. Possibly the absence of St. Paul's name, possibly the doubts which existed as to his being the sole author of it, possibly its approximation to the character of the Catholic Epistles may have determined the arrangement. The Apocalypse, as might be expected from the peculiar character of its contents, occupied a position by itself. Its comparatively late recognition may have determined the position which it has uniformly held as the last of the Sacred Books.

IV. *Division into Chapters and Verses.* As soon as any break is made in the continuous writing which has characterised in nearly all countries the early stages of the art, we get the germs of a system of division. But these divisions may be

used for two distinct purposes. So far as they are used to exhibit the logical relations of words, clauses and sentences to each other, they tend to a recognised punctuation. So far as they are used for greater convenience of reference, or as a help to the memory, they answer to the chapters and verses of our modern Bibles. The question now to be answered is that which asks what systems of notation of the latter kind have been employed at different times by transcribers of the Old and New Testament, and to whom we owe the system now in use.

(1.) The Hebrew of the Old Testament.

It is hardly possible to conceive of the liturgical use of the books of the Old Testament, without some kinds of recognised division. In proportion as the books were studied and commented on in the schools of the Rabbis, the division would become more technical and complete, and hence the existing notation which is recognised in the Talmud (the Gemara ascribing it to Moses,—Hupfeld, *Stud. und Krit.* 1830, p. 827) may probably have originated in the earlier stages of the growth of the synagogue ritual. The New Testament quotations from the Old are for the most part cited without any more specific reference than to the Book from which they come. The references however in Mark xii. 26 and Luke xx. 37 (ἐν τῇ βίβλῳ), Rom. xi. 2 (ἐν ἡλίᾳ) and Acts viii. 32 (ἡ περὶ τῆς γραφῆς), indicate a division which had become familiar, and show that some at least of the sections were known popularly by titles taken from their subjects. In like manner the existence of a cycle of lessons is indicated by Luke iv. 17; Acts xiii. 15, xv. 21; 2 Cor. iii. 14; and this, whether identical or not with the later Rabbinic cycle, must have involved an arrangement analogous to that subsequently adopted.

The Talmudic division is on the following plan. The law was in the first instance divided into fifty-four פְּרָשְׁיֹת, *Parshioth*=sections, so as to provide a lesson for each Sabbath in the Jewish intercalary year, provision being made for the shorter year by the combination of two of the shorter sections. Co-existing with this there was a subdivision into lesser *Parshioth*, which served to determine the portions of the sections taken by the several readers in the synagogue. The lesser *Parshioth* themselves were classed under two heads—the open פְּתוּחֹת, *Petuchoth*, which served to indicate a change of subject analogous to that between two paragraphs in modern writing, and began accordingly a fresh line in the MSS., and the shut סְתוּמֹת, *Satumoth*, which corresponded to minor divisions, and were marked only by a space within the line. The initial letters *D* and *D* served as a notation, in the margin or in the text itself, for the two kinds of sections. The threefold initial *DDD* or *DDD*. was used when the commencement of one of the *Parshioth* coincided with that of a Sabbath lesson (comp. Kell. *Einleitung in das A. T.* §170, 171).

A different terminology was employed for the Prophets *Priores* and *Posteriores*, and the division was less uniform. The tradition of the Jews that the Prophets were first read in the service of the synagogue, and consequently divided into sections, because the reading of the Law had been forbidden by Antiochus Epiphanes, rests upon a very slight foundation, but its existence is at any rate a proof

that the Law was believed to have been systematically divided before the same process was applied to the other books. The name of the sections in this case was הפטרות (Haphtaroth, from פתר, dimittere).

If the name were applied in this way because the lessons from the Prophets came at the close of the synagogue service, and so were followed by the dismissal of the people (Vitiinga *de Synag.* iii. 2, 20), its history would present a singular analogy to that of "Missa," "Mass," on the assumption that it also was derived from the "Ite missa est," by which the congregation was informed of the conclusion of the earlier portion of the service of the Church. The peculiar use of Missa shortly after its appearance in the Latin of ecclesiastical writers in a sense equivalent to that of Haphtaroth (sex Missas de Prophetâ Esaiâ facite, Caesar. Arelat. and Aurelian in Bingham, *Ant.* xiii. 1) presents at least a singular coincidence. The Haphtaroth themselves were intended to correspond with the larger Parshioth of the Law, so that there might be a distinct lesson for each Sabbath in the intercalary year as before; but the traditions of the German and the Spanish Jews, both of them of great antiquity, present a considerable diversity in the length of the divisions, and show that they had never been determined by the same authority as that which had settled the Parshioth of the Law (Van der Hooght, *Præfat. in Bib.* §35). Of the traditional divisions of the Hebrew Bible however that which has exercised most influence in the received arrangement of the text, was the subdivision of the larger sections into verses (פסוקים *Pesukim*). These do not appear to have been used till the post-Talmudic revision of the text by the Masoretes of the 9th century. They were then applied, first to the prose and afterwards to the poetical books of the Hebrew Scriptures, superseding in the latter the arrangement of *סτίχοι, κῶλα, κόμματα*, lines and groups of lines, which had been based upon metrical considerations. The verses of the Masoretic divisions were preserved with comparatively slight variations through the middle ages, and came to the knowledge of translators and editors when the attention of European scholars was directed to the study of Hebrew. In the Hebrew MSS. the notation had been simply marked by the Soph-Pessuk (:) at the end of each verse; and in the earlier printed Hebrew Bibles (Sabionetta's, 1557, and Plantin's, 1566) the Hebrew numerals which guide the reader in referring, are attached to every fifth verse only. The Concordance of Rabbi Nathan 1450, however, had rested on the application of a numeral to each verse, and this was adopted by the Dominican Paginus in his Latin version, 1528, and carried throughout the whole of the Old and New Testament, coinciding substantially, as regards the former, with the Masoretic, and therefore with the modern division, but differing materially as to the New Testament from that which was adopted by Robert Stephens (*cf. infra*) and through his widely circulated editions passed into general reception. The chief facts that remain to be stated as to the verse divisions of the Old Testament are, (1.) that it was adopted by Stephens in his edition of the Vulgate, 1555, and by Frelon in that of 1556; that it appeared, for the first time in an English translation, in the Geneva Bible of 1560, and was thence transferred to the Bishops' Bible of 1568, and the Authorized Version of 1611. In Coverdale's Bible we meet with the older nota-

tion, which was in familiar use for other books, and retained in some instances (*e.g.* in references to Plato), to the present times. The letters A B C D are placed at equal distances in the margin of each page, and the reference is made to the page (or, in the case of Scripture, to the chapter) and the letter accordingly.

The Septuagint translation, together with the Latin versions based upon it, have contributed little or nothing to the received division of the Bibles. Made at a time when the Rabbinic subdivisions were not enforced, hardly perhaps existing, and not used in the worship of the synagogue, there was no reason for the scrupulous care which showed itself in regard to the Hebrew text. The language of Tertullian (*Scorp.* ii.) and Jerome (*in Mic.* vi. 9; *Zeph.* iii. 4) implies the existence of "capitula" of some sort; but the word does not appear to have been used in any more definite sense than "locus" or "passage." The liturgical use of portions of the Old Testament would lead to the employment of some notation to distinguish the ἀναγνώσματα or "lectiones," and individual students or transcribers might adopt a system of reference of their own; but we find nothing corresponding to the fully organised notation which originated with the Talmudists or Masoretes. It is possible indeed that the general use of Lectionaria—in which the portions read in the Church services were written separately—may have hindered the development of such a system. Whatever traces of it we find are accordingly scanty and fluctuating. The sticho-metric mode of writing (*i.e.* the division of the text into short lines generally with very little regard to the sense) adopted in the 4th or 5th centuries (see *Prolegom.* to Bickington's *Septuaginta*, i. §6), though it may have facilitated reference, or been useful as a guide to the reader in the half-chant commonly used in liturgical services, was too arbitrary (except where it corresponded to the parallel clauses of the Hebrew poetical books) and inconvenient to be generally adopted. The Alexandrian MSS. present a partial notation of κεφαλαία, but as regards the Old Testament these are found only in portions of Deuteronomy and Joshua. Traces exist (Monument. Eccles. Cotelier. Breitinger, *Proleg. ut sup.*) of a like division in Numbers, Exodus, and Leviticus, and Latin MSS. present frequently a system of division into "tituli" or "capitula," but without any recognised standards. In the 13th century, however, the development of theology as a science, and the more frequent use of the Scriptures as a text-book for lectures, led to the general adoption of a more systematic division, traditionally ascribed to Stephen Langton, Archbishop of Canterbury (Trivet *Annal.* p. 182, ed. Oxon), Hugh de St. Cher (Gilbert Genebrard, *Chronol.* i. iv. p. 644), and passing through his Commentary (*Postilla in Universa Biblia*, and Concordance, *circ.* 1240) into general use. No other subdivision of the chapters was united with this beyond that indicated by the marginal letters A B C D as described above.

As regards the Old Testament then, the present arrangement grows out of the union of Cardinal Hugo's caputular division and the Masoretic verses. The Apocryphal books, to which of course no Masoretic division was applicable, did not receive a versicular division till the Latin edition of Paginus in 1528, nor the division now in use till Stephens' edition of the Vulgate in 1545. The history of the New Testament presents some additional facts of interest. Here, as in the case of the Old, the

system of notation grew out of the necessities of study. The comparison of the Gospel narrative gave rise to attempts to exhibit the harmony between them. Of these, the first of which we have any record, was the *Diatesaron* of Tatian in the 2nd century (Euseb. *II. E.* iv. 29). This was followed by a work of like character from Ammonius of Alexandria in the 3rd (Euseb. *Epist. ad Carpianum*). The system adopted by Ammonius, however, that of attaching to the Gospel of St. Matthew the parallel passages of the other three, and inserting those which were not parallel, destroyed the outward form in which the Gospel history had been recorded, was practically inconvenient. Nor did their labours have any direct effect on the arrangement of the Greek text, unless we adopt the conjectures of Mill and Wetstein that it is to Ammonius or Tatian that we have to ascribe the marginal notation of κεφάλαια, marked by Α Β Γ Δ, which are found in the older MSS. The search after a more convenient method of exhibiting the parallelisms of the Gospels led Eusebius of Caesarea to form the ten Canons (κανόνες, registers) which bear his name, and in which the sections of the Gospels are classed according as the fact narrated is found in one Evangelist only, or in two or more. In applying this system to the transcription of the Gospels, each of them was divided into shorter sections of variable length, and to each of these were attached two numerals, one indicating the Canon under which it would be found, and the other its place in that Canon. Luke, for example, would represent the 13th section belonging to the first Canon. This division, however, extended only to the books that had come under the study of the Harmonists. The Epistles of St. Paul were first divided in a similar manner by the unknown Bishop to whom Euthalius assigns the credit of it (*circa* 396), and he himself, at the instigation of Athanasius, applied the method of division to the Acts and the Catholic Epistles. Andrew, bishop of Caesarea in Cappadocia, completed the work by dividing the Apocalypse (*circa* 500).

Of the four great uncial MSS., A presents the Ammonian or Eusebian numerals and canons, C and D the numerals without the canons. B has neither numerals nor canons, but a notation of its own, the chief peculiarity of which is, that the Epistles of St. Paul are treated as a single book, and brought under a continuous capitulation. After passing into disuse and so into comparative oblivion, the Eusebian and Euthalian divisions have recently (since 1827) again become familiar to the English student through Bishop Lloyd's edition of the Greek Testament.

With the New Testament, however, as with the Old, the division into chapters adopted by Hugh de St. Cher superseded those that had been in use previously, appeared in the early editions of the Vulgate, was transferred to the English Bible by Coverdale and so became universal. The notation of the verses in each chapter naturally followed on the use of the Masoretic verses for the Old Testament. The superiority of such a division over the marginal notation Α Β Γ Δ in the Bible of Cardinal Hugh de St. Cher led men to adopt an analogous system for the New. In the Latin version of Pagninus accordingly, there is a versicular division, though differing from the one subsequently used in the greater length of its verses. The absence of an authoritative standard like that of the Masoretes, left more scope to the individual discre-

tion of editors or printers, and the activity of the two Stephens caused that which they adopted in their numerous editions of the Greek Testament and Vulgate to be generally received. In the Preface to the Concordance, published by Henry Stephens, 1591, he gives the following account of the origin of this division. His father, he tells us, finding the books of the New Testament already divided into chapters (temata, or sections), proceeded to a further subdivision into verses. The name *versiculi* did not commend itself to him. He would have preferred temmata or sectionculae, but the preference of others for the former led him to adopt it. The whole work was accomplished "inter equitulum" on his journey from Paris to Lyons. While it was in progress men doubted of its success. No sooner was it known than it met with universal acceptance. The edition in which this division was first adopted was published in 1551, another came from the same press in 1555. It was used for the Vulgate in the Antwerp edition of Plantin in 1559, for the English version published in Geneva in 1580, and from that time, with slight variations in detail, has been universally recognised. The convenience of such a system for reference is obvious; but it may be questioned whether it has not been purchased by a great sacrifice of the perception by ordinary readers of the true order and connexion of the books of the Bible. In some cases the division of chapters separates portions which are very closely united (See e. g. Matt. ix. 38, and x. 1, xix. 1, and xx. 1; Mark ii. 23-28, and iv. 1-5, viii. 38, and ix. 1; Luke xx. 45-47, and xxi. 1-4; Acts vii. 60, and viii. 1; 1 Cor. x. 33, xi. 1; 2 Cor. iv. 18, v. 1, vi. 18, and vii. 1), and throughout gives the impression of a formal division altogether at variance with the continuous flow of narrative or thought which characterised the book as it came from the hand of the writer. The separation of verses in its turn has conduced largely to the habit of building doctrinal systems upon isolated texts. The advantages of the received method are united with those of an arrangement representing the original more faithfully in the structure of the Paragraph Bibles, lately published by different editors, and in the Greek Testaments of Lloyd, Lachmann, and Tischendorf. The student ought, however, to remember in using these that the paragraphs belong to the editor not to the writer, and are therefore liable to the same casualties rising out of subjective peculiarities, dogmatic bias, and the like, as the chapters of our common Bibles. Practically the risk of such casualties has been reduced almost to a minimum by the care of editors to avoid the errors into which their predecessors have fallen, but the possibility of the evil exists, and should therefore be guarded against by the exercise of an independent judgment. [E. H. P.]

**BICH'RI** (בִּחְרִי; Βοχρῆ-εἰ; *Bichri* and *Bochri*: first-born, Sim.; youthful, Gesen., Fürst; but perhaps rather son of *Becher*), ancestor of Sheba (2 Sam. xx. 1 ff.). [BECHER.] [A. C. H.]

**BID'KAR** (בִּדְקָר; Βαδεκάρ; Joseph. Βαδάκρος; *Badacer*), Jehu's "captain" (בִּדְקָר; Joseph. δὲ τῆς ῥοπῆς πολὺς ἡγεμὼν, *Ant.* ix. 6, §3), ignally his fellow-officer (2 K. ix. 25); who completed the sentence on Jehoram son of Ahab, by casting his body into the field of Naboth after Jehu had transfixed him with an arrow.

**BIER.** [BURIAL.]

**BIG'THA** (בִּגְתָּה; Βαγάθ; *Bagatha*), one of the seven "chamberlains" (שְׂרָפִים, eunuchs) of the harem of Ahasuerus (Esth. i. 10).

**BIG'THAN** and **BIG'THANA** (בִּגְתָּן, Esth. ii. 21, and בִּגְתָּנָה, vi. 2; *Bagathan*), an eunuch (chamberlain, A. V.) in the court of Ahasuerus, one of those "who kept the door" (marg. "threshold," ἀρχισματόφύλακες, LXX.), and who conspired with Teresh, one of his confidants, against the king's life. The conspiracy was detected by Mordecai, and the eunuchs hung. Prieaux (*Con.* i. 363) supposes that these officers had been partially superseded by the degradation of Vashti, and sought revenge by the murder of Ahasuerus. This suggestion falls in with that of the Chaldee V.s., and of the LXX. which in Esth. ii. 21 interpolates the words ἐλπιήθησαν οἱ δύο εὐνοῦχοι τοῦ βασιλέως . . . ὅτι προήχθη Μορδοχάιος. The name is omitted by the LXX. on both occasions. Bigthan is probably derived from the Persian and Sanskrit *Bagānā*, "a gift of fortune" (Gesen. s. v.). [F. W. F.]

**BIG'VAI** (בִּגְוַי; Βαγουέ, *Bagouai*; *Beguai*, *Beguai*).

1. "Children of Bigvai," 2056 (Neh. 2067) in number, returned from the captivity with Zerubbabel (Ezr. ii. 14; Neh. vii. 19), and 72 of them at a later date with Ezra (Ezr. viii. 14). [BAGOI; BAGO.]

2. Apparently one of the chiefs of Zerubbabel's expedition (Ezr. ii. 2; Neh. vii. 7), and who afterwards signed the covenant (Neh. x. 16).

**BIL'DAD** (בִּלְדָּד, son of contention, if Genesis' derivation of it from בִּלְדָּן be correct; *Baldad*; *Baldad*), the second of Job's three friends. He is called "the Shuhite" (שֻׁחִיטָי), which implies both his family and nation. Shuah was the name of a son of Abraham and Keturah, and of an Arabian tribe sprung from him, when he had been sent eastward by his father. Gesen. (s. v.) supposes it to be "the same as the *Sakala* of Ptolemy (v. 15) to the east of Batanen," and therefore to the east of the land of Uz [SHUAH]. The LXX. strangely enough, renders it δὲ τῶν Σαυχέων τύραννος, appearing to intend a distinction between him and the other friends, whom in the same verse it calls βασιλεῖς (Job ii. 11).

Bildad takes a share in each of the three controversies with Job (viii. xviii. xxv.). He follows in the train of Eliphaz, but with more violent declamation, less argument, and keener invective. His address is abrupt and untender, and in his very first speech he cruelly attributes the death of Job's children to their own transgressions; and loudly calls on Job to repent of his supposed crimes. His second speech (xviii.) merely recapitulates his former assertions of the temporal calamities of the wicked; on this occasion he implies, without expressing, Job's wickedness, and does not condescend to exhort him to repentance. In the third speech (xxv.), unable to refute the sufferer's arguments, he takes refuge in irrelevant dogmatism on God's glory and man's nothingness: in reply to which Job justly reproves him both for deficiency in argument and failure in charitable forbearance (Ewald, *das Buch Ijob*). [F. W. F.]

**BIL'EAM** (בִּלְעָם; Ἰερμβλάν, Alex. *ΙΒλαμ*; *Balam*), a town in the western half of the tribe

of Manasseh, named only in 1 Chr. vi. 70, as being given (with its "suburbs") to the Kohathites. In the lists in Josh. xvii. and xxi. this name does not appear, and Ibleam and Gath-rimmon are substituted for it, the former by an easy change of letters, the latter uncertain. [GATHRIMMON; IBLEAM.] [G.]

**BIL'GAH** (בִּלְגָּה; δ Βελγάς; *Belya*). 1. A priest in the time of David; the head of the fifteenth course for the temple service (1 Chr. xxiv. 14).

2. A priest who returned from Babylon with Zerubbabel and Joshua (Neh. xii. 5, 18); probably the same who, under the slightly altered name BILGAI, sealed the covenant (Neh. x. 8).

**BIL'GAI** (בִּלְגַּי; Βελγαί; *Belyai*), Neh. x. 8; probably the same as BILGAI, 2.

**BIL'HAH** (בִּלְהָה; Βαλλά; *Bala*). 1. Handmaid of Rachel (Gen. xxix. 29), and concubine of Jacob, to whom she bore Dan and Naphtali (Gen. xxx. 3-8, xxxv. 25, xli. 25; 1 Chr. vii. 13). Her stepson Reuben afterwards lay with her (Gen. xxxv. 22), which entailed a curse upon Reuben (Gen. xlix. 4).

2. A town of the Simeonites (1 Chr. iv. 29); also called Bualah and Bulah. [BAAL, p. 147, No. 2, b.]

**BIL'HAN** (בִּלְהָן; Βαλαάν, *Balaan*; *Balan*; the same root as Bilhah, Gen. xxx. 3, &c. The final *n* is evidently a Horite termination, as in Zaan, Akan, Dihan, Aran, Lotan, Alvan, Hemandan, Esiban, &c.; and may be compared with the Ethiopian *ana*, Greek αἰνῶ, αν, &c.).

1. A Horite chief, son of Ezer, son of Seir, dwelling in Mount Seir, in the land of Edom (Gen. xxxvi. 27; 1 Chr. i. 42).

2. A Benjamite, son of Jediel (1 Chr. vii. 10). It does not appear clearly from which of the sons of Benjamin Jediel was descended, as he is not mentioned in Gen. xli. 21, or Num. xvi. But as he was the father of Ehud (ver. 10), and Ehud seems, from 1 Chr. viii. 3, 6, to have been a son of Bela, Jediel, and consequently Bilhan, were probably Belaites. The occurrence of Bilhan as well as Bela in the tribe of Benjamin, names both imported from Edom, is remarkable. [A. C. H.]

**BIL'SHAN** (בִּלְשָׁן; Βαλασάν, *Balaan*; *Belsan*), one of Zerubbabel's companions on his expedition from Babylon (Ezr. ii. 2; Neh. vii. 7).

**BIM'HAI** (בִּמְהַי; Βαμαήλ; *Chumai*), one of the sons of Japhlet in the line of Asher (1 Chr. vii. 33).

**BIN'EÄ** (בִּנְעָה; Βαριά; *Banaa*), the son of Moza; one of the descendants of Saul (1 Chr. viii. 37; ix. 43).

**BIN'NUI** (בִּנְנוּי; Βανούι, *Banaia*, *Bavi*; *Bennai*, *Benuis*, *Binnui*). 1. A Levite, father of Noadiah, in Ezra's time (Ezr. viii. 33).

2. One of the sons of Pahath-moab, who had taken a foreign wife (Ezr. x. 30). [BALNUUS.]

3. Another Israelite, of the sons of Bani, who had also taken a foreign wife (Ezr. x. 38).

4. Altered from BANI in the corresponding list in Ezra (Neh. vii. 15).

5. A Levite, son of Henadad, who assisted at the reparation of the wall of Jerusalem, under Nehemiah, Neh. iii. 24; x. 9. He is possibly also the Binnui in xii. 8.

**BIRDS** (ἄν, ἄν, ἄν; τὰ πετεινά—τὰ ὄρνεα τοῦ οὐρανοῦ, ὄρνεα, ὄρνιθιον; volucris, avis). Birds are mentioned as articles of food in Deut. xiv. 11, 20, the intermediate verses containing a list of unclean birds which were not to be eaten. There is a similar list in Lev. xi. 13-19. From Job vi. 6, Luke xi. 12, we find that the eggs of birds were also eaten. Quails and pigeons are edible birds mentioned in the O. T. Our Saviour's mention of the hen gathering her chickens under her wing implies that the domestic fowl was known in Palestine. The art of snaring wild birds is referred to in Ps. cxvii. 7; Prov. i. 17, vii. 23; Am. iii. 5; Hos. v. 1, vii. 12. The cage full of birds in Jer. v. 27, was a trap in which decoy-birds were placed to entice others, and furnished with a trap-door which could be dropped by a fowler watching at a distance. This practice is mentioned in Ecclesi. xi. 30 (πέδιξε θηρευτὴς ἐν καρτάλλῳ; comp. Arist. Hist. Anim. ix. 8). In Deut. xxi. 6, it is commanded that an Israelite finding a bird's-nest in his path might take the young or the eggs, but must let the hen-bird go. By this means the extirpation of any species was guarded against. (Comp. Phocyl. Carm. 80, seq.:

Μή τις ὄρνιθας καλῆς ἅμα πάντας ἐλίσσῃ  
μητέρα δ' ἐκπολίποις, ἢ ἔχη πάλι τῆσδε νεοττούς.

Birds were not ordinarily used as victims in the Jewish sacrifices. They were not deemed valuable enough for that purpose; but the substitution of turtle-doves and pigeons was permitted to the poor, and in the sacrifice for purification. The way of offering them is detailed in Lev. i. 15-17, and v. 8; and it is worthy of notice that the practice of not dividing them, which was the case in other victims, was of high antiquity (Gen. xv. 10).

The abundance of birds in the East has been mentioned by many travellers. In Curzon's *Memoirs of the Levant*, and in Stanley's *Sinai and Palestine*, this abundance is noticed; by the latter in connexion with his admirable illustration of the parable of the sower (Matt. xiii. 4). (Comp. Rosenmüller, *Morgenl.* v. 59.)

The nests of birds were readily allowed by the Orientals to remain in their temples and sanctuaries, as though they had placed themselves under the protection of God (comp. Herod. i. 159; Aelian, V. H. v. 17). There is probably an allusion to this in Ps. lxxiv. 3.

The seasons of migration observed by birds are noticed in Jer. viii. 7. Birds of song are mentioned in Ps. civ. 12; Eccl. xii. 4. Ducks and geese are supposed to be meant by the word בְּרִיִּים in 1 K. iv. 23. [W. D.]

**BIR'SHA** (בִּרְשָׁא; Bapod; Bersa), king of Gomorha at the time of the invasion of Chedor-lamer (Gen. xiv. 2).

**BIRTH-DAYS** (τὰ γενέσια, Matt. xiv. 6). Properly τὰ γενέσια is a birthday feast (and hence in the early writers the day of a martyr's commemoration), but τὰ γενέσια seems to be used in this sense by a Hellenism, for in Herod. iv. 26, it means a day in honour of the dead. It is very probable that in Matt. xiv. 6, the feast to commemorate Herod's accession is intended, for we know that such feasts were common (especially in Herod's family, Joseph. Ant. xv. 11, §3; Blunt's *Coincidences*, Append. vii.), and were called "the day of the king" (Hos. vii. 5). The Gemarists distinguish ex-

pressly between מְלָכִים שֶׁל בְּנוֹסָא, γενέσια regui, and the הַלִּידָה יוֹם or birthday. (Lightfoot, *Hor. Hebr. ad Matt.* xiv. 6.)

The custom of observing birthdays is very ancient (Gen. xl. 20; Jer. xx. 15); and in Job i. 4, &c., we read that Job's sons "feasted every one his day." In Persia they were celebrated with peculiar honours and banquets, for the details of which see Herod. i. 138. And in Egypt "the birthdays of the kings were celebrated with great pomp. They were looked upon as holy: no business was done upon them, and all classes indulged in the festivities suitable to the occasion. Every Egyptian attached much importance to the day, and even to the hour of his birth" (Wilkinson, v. 290). Probably in consequence of the ceremonies usual in their celebration the Jews regarded their observance as an idolatrous custom (Lightfoot, l. c.). [F. W. F.]

### BIRTHRIGHT (בִּכּוּר; τὰ πρωτοτοκία).

The advantages accruing to the eldest son were not definitely fixed in patriarchal times. The theory that he was the priest of the family rests on no scriptural statement, and the rabbis appear divided on the question (see Hottinger's *Note on Goodwin's Moses and Aaron*, i. 1; Ugel. iii. 53). Great respect was paid to him in the household, and, as the family widened into a tribe, this grew into a sustained authority, undefined save by custom, in all matters of common interest. Thus the "princes" of the congregation had probably rights of primogeniture (Num. vii. 2, xxi. 18, xxv. 14). A "double portion" of the paternal property was allotted by the Mosiac law (Deut. xxi. 15-17), nor could the caprice of the father deprive him of it. This probably means twice as much as any other son enjoyed. Such was the inheritance of Joseph, his sons reckoning with his brethren, and becoming heads of tribes. This seems to explain the request of Elisha for a "double portion" of Elijah's spirit (2 K. ii. 9). Reuben, through his unfilial conduct, was deprived of the birthright (Gen. xlix. 4; 1 Chr. v. 1). It is likely that some remembrance of this lost pre-eminence stirred the Reubenite leaders of Korah's rebellion (Num. xvi. 1, 2, xxvi. 5-9). Esau's act, transferring his right to Jacob, was allowed valid (Gen. xxv. 33). The first-born of the king was his successor by law (2 Chr. xxi. 3); David, however, by divine appointment, excluded Adonijah in favour of Solomon, which deviation from rule was indicated by the anointing (Goodwin, l. c. 4, with Hottinger's notes). The first-born of a line is often noted by the early scriptural genealogies, e. g. Gen. xxii. 21, xxv. 13; Num. xxvi. 5, &c. The Jews attached a sacred import to the title (see Schöttgen, *Hor. Hebr.* i. 922) and thus "first-born" and "first-begotten" seem applied to the Messiah (Rom. vii. 29, Heb. i. 6). [H. II.]

**BIR'ZAVITH** (בִּרְזָוִית, Keri, ברִּית; Bep-θαιθ, Alex. Bep'αί; Barsaith), a name occurring in the genealogies of Asher (1 Chr. vii. 31), and apparently, from the mode of its mention, the name of a place (comp. the similar expression, "father of Bethlehem," "father of Tekoa," &c. in chaps. ii. and iv.). The reading of the Keri may be interpreted "well of olives." No trace of it is found elsewhere.

**BISH'LAM** (בִּשְׁלָם; Beselan), apparently an officer or commissioner (συνταγμασόμενος, 1 Esd. ii. 16) of Artaxerxes in Palestine at the time of the

return of Zerubbabel from captivity (Ezr. iv. 7). By the LXX. the word is translated, *ἐν εἰρήνῃ*, in peace; see margin of A. V., and so also both Arabic and Syriac versions.

**BISHOP** (*ἐπίσκοπος*). This word, applied in the N. T. to the officers of the Church who were charged with certain functions of superintendence, had been in use before as a title of office. The inspectors or commissioners sent by Athens to her subject-states were *ἐπίσκοποι* (Aristoph. *Av.* 1022), and their office, like that of the Spartan Harmosts, authorised them to interfere in all the political arrangements of the state to which they were sent. The title was still current and beginning to be used by the Romans in the later days of the republic (Cic. *ad Att.* vii. 11). The Hellenistic Jews found it employed in the LXX. though with no very definite value, for officers charged with certain functions (Num. iv. 16, xxxi. 14; Ps. cix. 8; Is. lx. 17; for Heb. *בִּשְׁפָּרָה*, or *בִּשְׁפָּרָה*). When the organisation of the Christian churches in Gentile cities involved the assignment of the work of pastoral superintendence to a distinct order the title *ἐπίσκοπος* presented itself as at once convenient and familiar, and was therefore adopted as readily as the word elder (*πρεσβύτερος*) had been in the mother church of Jerusalem. That the two titles were originally equivalent is clear from the following facts.

1. *ἐπίσκοποι* and *πρεσβύτεροι* are nowhere named together as being orders distinct from each other.

2. *ἐπίσκοποι* and *διδάκοι* are named as apparently an exhaustive division of the officers of churches addressed by St. Paul as an apostle (Phil. i. 1; 1 Tim. iii. 1, 8).

3. The same persons are described by both names (Acts xx. 17, 18; Tit. i. 5, 8).

4. *πρεσβύτεροι* discharge functions which are essentially episcopal, i. e. involving pastoral superintendence (1 Tim. v. 17; 1 Pet. v. 1, 2). The age that followed that of the Apostles witnessed a gradual change in the application of the words, and in the Epistles of Ignatius, even in their least interpolated or most mutilated form, the bishop is recognised as distinct from, and superior to, the Presbyters (*Ep. ad Smyrn.* viii.; *ad Trall.* ii., iii., viii.; *ad Magn.* vi.). In those of Clement of Rome, however, the two words are still dealt with as interchangeable (1 Cor. xlii., xlv., lvii.). The omission of any mention of an *ἐπίσκοπος* in addition to the *πρεσβύτεροι* and *διδάκοι* in Polycarp's Epistle to the Philippians (c. v.), and the enumeration of "apostoli, episcopi, doctores, ministri" in the Shepherd of Hermas (i. 3, 5), are less decisive, but indicate a transition stage in the history of the word.

Assuming as proved the identity of the bishops and elders of the N. T. we have to inquire into—1. The relation which existed between the two titles. 2. The functions and mode of appointment of the men to whom both titles were applied. 3. Their relations to the general government and discipline of the Church.

I. There can be no doubt that *πρεσβύτεροι* had the priority in order of time. The existence of a body bearing that name is implied in the use of the correlative of *πρεσβύτεροι* (comp. Luke xii. 26; 1 Pet. v. 1, 5) in the narrative of Ananias (Acts v. 6). The order itself is recognised in Acts xi. 30, and takes part in the deliberations of the Church at Jerusa-

lem in Acts xv. It is transferred by Paul and Barnabas to the Gentile churches in their first missionary journey (Acts xiii. 23). The earliest use of *ἐπίσκοποι*, on the other hand, is in the address of St. Paul to the elders at Miletus (Acts xv. 18), and there it is rather descriptive of functions than given as a title. The earliest epistle in which it is formally used as equivalent to *πρεσβύτεροι* (except on the improbable hypothesis that Timothy belongs to the period following on St. Paul's departure from Ephesus in Acts xx. 1) is that to the Philippians, as late as the time of his first imprisonment at Rome. It was natural, indeed, that this should be the order; that the word derived from the usages of the *synagogues* of Palestine, every one of which had its superintending elders (*בְּרִיָּה*; comp. Luke vii. 3), should precede that borrowed from the constitution of a Greek state. If the latter was afterwards felt to be the more adequate, it may have been because there was a life in the organisation of the Church higher than that of the *synagogues*, and functions of pastoral superintendence devolving on the elders of the Christian congregation which were unknown to those of the other periods. It had the merit of being descriptive as well as titular; a "nomen officii" as well as a "nomen dignitatis." It could be associated, as the other could not be, with the thought of the highest pastoral superintendence—of Christ himself as the *πομπὴν καὶ ἐπίσκοπος* (1 Pet. ii. 25).

II. Of the order in which the first elders were appointed, as of the occasion which led to the institution of the office, we have no record. Arguing from the analogy of the Seven in Acts vi. 5, 6, it would seem probable that they were chosen by the members of the Church collectively (possibly to take the place that had been filled by the Seven, comp. Stanley's *Apost. Age*, p. 64) and then set apart to their office by the laying on of the apostles' hands. In the case of Timothy (1 Tim. iv. 14; 2 Tim. i. 6) the *πρεσβύτεροι*, probably the body of the elders at Lystra, had taken part with the apostle in this act of ordination; but here it remains doubtful whether the office to which Timothy was appointed was that of the Bishop-Elder or one derived from the special commission with which the two epistles addressed to him show him to have been entrusted. The connexion of 1 Tim. v. 22 is, on the whole, against our referring the laying on of hands there spoken of to the ordination of elders (comp. Hammond, *in loc.*), and the same may be said of Heb. vi. 2. The imposition of hands was indeed the outward sign of the communication of all spiritual *χαρίσματα*, as well as of functions for which *χαρίσματα* were required, and its use for the latter (as in 1 Tim. iv. 14; 2 Tim. i. 6) was connected with its instrumentality in the bestowal of the former. The conditions which were to be observed in choosing these officers, as stated in the pastoral epistles, are, blameless life and reputation among those "that are without" as well as within the Church, fitness for the work of teaching, the wide kindness of temper which shows itself in hospitality, the being "the husband of one wife" (i. e. according to the most probable interpretation, not divorced and then married to another; but comp. Hammond, Estius, Ellicott, *in loc.*), showing powers of government in his own household as well as in self-control, not being a recent and, therefore, an untried convert. When appointed, the duties of the bishop-elders appear to have

been as follows:—1. General superintendence over the spiritual well-being of the flock (1 Pet. v. 2). According to the aspects which this function presented those on whom it devolved were described as *ποιμένες* (Eph. iv. 11), *προεστώτες* (1 Tim. v. 17), *ποιστάρται* (1 Thess. v. 12). Its exercise called for the *χάρισμα κυβερνήσεως* (1 Cor. xii. 28). The last two of the above titles imply obviously a recognised rank, as well as work, which would show itself naturally in special marks of honour in the meetings of the Church. 2. The work of teaching, both publicly and privately (1 Thess. v. 12; Tit. i. 9; 1 Tim. v. 17). At first, it appears from the description of the practices of the Church in 1 Cor. xiv. 26, the work of oral teaching, whatever form it assumed, was not limited to any body of men, but was exercised according as each man possessed a special *χάρισμα* for it. Even then, however, there were, as the warnings of that chapter show, some inconveniences attendant on this freedom, and it was a natural remedy to select men for the special function of teaching because they possessed the *χάρισμα*, and then gradually to confine that work to them. The work of preaching (*κηρύσσειν*) to the heathen did not belong, apparently, to the bishop-elders as such, but was the office of the apostle-evangelist. Their duty was to feed the flock, teaching publicly (Tit. i. 9), opposing errors, admonishing privately (1 Thess. v. 12). 3. The work of visiting the sick appears in Jam. v. 14, as assigned to the elders of the Church. There, indeed, it is connected with the practice of anointing as a means of healing, but this office of Christian sympathy would not, we may believe, be confined to the exercise of the extraordinary *χαρίσματα λαδύνων*, and it is probably to this, and to acts of a like kind, that we are to refer the *ἀντιλαμβάνεσθαι τῶν ἀσθενούντων* of Acts xix. 34, and the *ἀντιλήψεις* of 1 Cor. xii. 28. 4. Among these acts of charity that of receiving strangers occupied a conspicuous place (1 Tim. iii. 2; Tit. i. 8). The bishop-elder's house was to be the house of the Christian who arrived in a strange city and found himself without a friend. 5. Of the part taken by them in the liturgical meetings of the Church we have no distinct evidence. Reasoning from the language of 1 Cor. x. xii., and from the practices of the post-apostolic age, we may believe that they would preside at such meetings, that it would belong to them to bless and to give thanks when the Church met to break bread.

The mode in which these officers of the Church were supported or remunerated varied probably in different cities. At Miletus St. Paul exhorts the elders of the Church to follow his example and work for their own livelihood (Acts xix. 34). In 1 Cor. ix. 14, and Gal. vi. 6, he asserts the right of the ministers of the Church to be supported by it. In 1 Tim. v. 17, he gives a special application of the principle in the assignment of a double allowance (*τιμή*, comp. Hammond, *in loc.*) to those who have been conspicuous for their activity.

Collectively at Jerusalem, and probably in other churches, the body of bishop-elders took part in deliberations (Acts xv. 6-22, xxi. 18), addressed other churches (*ibid.* xv. 23), were joined with the apostles in the work of ordaining by the laying on of hands (2 Tim. i. 6). It lay in the necessities of any organised society that such a body of men should be subject to a power higher than their own, whether vested in one chosen by themselves or de-

iving its authority from some external source; and we find accordingly that it belonged to the delegate of an apostle, and *à fortiori* to the apostle himself, to receive accusations against them, to hear evidence, to admonish where there was the hope of amendment, to depose where this proved unavailing (1 Tim. v. 19, iv. 1; Tit. iii. 10).

III. It is clear from what has been said that episcopal functions in the modern sense of the words, as implying a special superintendence over the ministers of the Church, belonged only to the apostles and those whom they invested with their authority. The name of apostle was not, however, limited to the twelve. It was claimed for St. Paul for himself (1 Cor. ix. 1); it is used by him of others (Rom. xvi. 7; 2 Cor. viii. 23; Phil. ii. 25). It is clear that a process of change must have been at work between the date of the latest of the pastoral epistles and the letters of Ignatius, leading not so much to an altered organisation as to a modification of the original terminology. The name of apostle is looked on in the latter as belonging to the past, a title of honour which their successors could not claim. That of bishop rises in its significance, and takes the place left vacant. The dangers by which the Church was threatened made the exercise of the authority which was thus transmitted more necessary. The permanent superintendence of the bishop over a given district, as contrasted with the less settled rule of the travelling apostle, would tend to its development. The Revelation of St. John presents something like an intermediate stage in this process. The angels of the seven churches are partly addressed as their representatives, partly as individuals ruling them (Rev. ii. 2, iii. 2-4). The name may belong to the special symbolism of the Apocalypse, or have been introduced like *πρεσβύτεροι* from the organisation of the synagogue, and we have no reason for believing it ever to have been in current use as part of the terminology of the Church. But the functions assigned to the angels are those of the earlier apostolate, of the later episcopate. The abuse of the old title of the highest office by pretenders, as in Rev. ii. 2, may have led to a reaction against its being used at all except for those to whom it belonged *κατ' ἐξοχήν*. In this, or in some similar way, the constitution of the Church assumed its later form; the bishops, presbyters, and deacons of the Ignatian Epistles, took the place of the apostles, bishops, elders, and deacons, of the New Testament (Stanley, *Sermons and Essays on the Apostolic Age*, pp. 63-77; Neander's *Pflichten*, u. *Leit.* i. p. 248-266; Augusti, *Christl. Archäol.* b. ii. c. 6).

The later history of the word is only so far remarkable as illustrating by its universal reception in all the western churches, and even in those of Syria, the influence of the organisation which originated in the cities of Greece or the Proconsular Asia, and the extent to which Greek was the universal medium of intercourse for the churches of the first and second centuries (Milman, *Latin Christ.* b. i. c. i.); nowhere do we find any attempt at substituting a Latin equivalent, hardly even an explanation of its meaning. Augustine (*de Civ. D.* i. 9) compares it with "speculators," "præpositi;" Jerome (*Ep. VIII. ad Euseb.*) with "superintendentes." The title *episcopus* itself, with its companions, *presbyter* and *diaconus*, was transmitted by the Latin of the Western Church to all the Romance languages. The members of the

Gothic race received it, as they received their (Christianity, from the missionaries of the Latin Church. [E. II. P.]

**BITHIAH** (בִּיתְיָה, *worshipper*, lit. *daughter*, of *Jehovah*; *Bethia*; *Bethis*), daughter of a Pharaoh, and wife of Meret, a descendant of Judah (1 Chr. iv. 18). The date of Meret cannot be determined, for the genealogy in which his name occurs is indistinct, some portion of it having apparently been lost. It is probable, however, that he should be referred to the time before the Exodus, or to a period not much later. Pharaoh in this place might be conjectured not to be the Egyptian royal title, but to be or represent a Hebrew name; but the name Bithiah probably implies conversion, and the other wife of Meret seems to be called "the Jewess." Unless we suppose a transposition in the text, or the loss of some of the names of the children of Meret's wives, we must consider the name of Bithiah understood before "she bare Miriam" (ver. 17), and the latter part of ver. 18 and ver. 19 to be recapitulatory; but the LXX. does not admit any except the second of these conjectures. The Scriptures, as well as the Egyptian monuments, show that the Pharaohs intermarried with foreigners; but such alliances seem to have been contracted with royal families alone. It may be supposed that Bithiah was taken captive. There is, however, no ground for considering her to have been a concubine: on the contrary, she is shown to be a wife, from her taking precedence of one specially designated as such. [R. S. P.]

**BITHRON** (more accurately "the Bithron," בֵּיתְרוֹן, *the broken or divided place*, from בָּרַץ, *to cut up*, Ges.; *ἄλην τὴν παρατείνουσαν*; *omnis Bethuron*), a place—from the form of the expression, "all the Bithron," doubtless a district—in the Arabah or Jordan valley, on the east side of the river (2 Sam. ii. 29). The spot at which Abner's party crossed the Jordan not being specified, we cannot fix the position of the Bithron, which lay between that ford and Muhannaim. As far as we know the whole of the country in the Ghôr on the other side of the river is of the broken and intersected character indicated by the derivation of the name. If the renderings of the Vulg. and Aquila are correct, they must of course intend another Bethoron than the well known one. Bethharam, the conjecture of Thesius, is also not probable. [G.]

**BITHYNIA** (Βιθυνία). This province of Asia Minor, though illustrious in the earlier parts of post-apostolic history, through Pliny's letters and the Council of Nicea, has little connexion with the history of the Apostles themselves. It is only mentioned in Acts xvi. 7, and in 1 Pet. i. 1. From the former of these passages it appears that St. Paul, when on his progress from Iconium to Troas, in the course of his second missionary journey, made an attempt to enter Bithynia, but was prevented, either by providential hindrances or by direct Divine intimations. From the latter it is evident that, when St. Peter wrote his first Epistle, there were Christians (probably of Jewish or proselyte origin) in some of the towns of this province, as well as in "Pontus, Galatia, Cappadocia and Asia."

Bithynia, considered as a Roman province, was on the west contiguous to Asia. On the east its limits underwent great modifications. The province was originally inherited by the Roman republic

(B.C. 74) as a legacy from Nicomedes III., the last of an independent line of monarchs, one of whom had invited into Asia Minor those Gauls, who gave the name of GALATIA to the central district of the peninsula. On the death of Mithridates, king of Pontus, B.C. 63, the western part of the Pontic kingdom was added to the province of Bithynia, which again received further accessions on this side under Augustus A.D. 7. Thus the province is sometimes called "Pontus and Bithynia" in inscriptions; and the language of Pliny's letters is similar. The province of Pontus was not constituted till the reign of Nero [PONTUS]. It is observable that in Acts ii. 9 Pontus is in the enumeration and not Bithynia, and that in 1 Pet. i. 1 both are mentioned. See Marquardt's continuation of Becker's *Röm. Alterthümer*, III. i. p. 146. For a description of the country, which is mountainous, well-wooded and fertile, Hamilton's *Researches in A. A.* may be consulted, also a paper by Ainsworth in the *Roy. Geog. Journal*, vol. ix. The course of the river Rhynclacus is a marked feature on the western frontier of Bithynia, and the snowy range of the Mysian Olympus on the south-west. [J. S. H.]

**BITTERN** (כִּפּוֹד, *Kipód*), an animal mentioned in connexion with the desolations of Babylon, Idumaea, and Nineveh (Is. xiv. 23, xxiv. 11, and Zeph. ii. 14). In all these passages the LXX. have *ἐχίνος*, the hedgehog or porcupine, a translation which Gesenius defends on etymological grounds, deriving כִּפּוֹד from כָּפַר (*contractus est*, "quippe qui prae metu contrahit et contrahit se"). The context of the passages in which it occurs seems to require an aquatic bird rather than a quadruped, and this is confirmed by the Arabic version, which has *Al-houbara*, the name of a bird which, according to Shaw, is of the bigness of a capon, but of a longer habit of body. The bittern answers these conditions, and is a solitary bird, loving marshy ground. Its scientific name is *Botaurus stellatus*, and it belongs to the Gruidae or cranes. [W. D.]

**BIZJOTHIAH** (בִּזְיֹתְיָה; LXX. omits; *Buziothia*), a town in the south of Judah named with BEERSHEBA and BAALAH (Josh. xv. 28). No mention or identification of it is found elsewhere. [G.]

**BIZ'THA** (בִּזְתָּה; *Baz'du*, Alex. *Baz'ea*; *Buzath*), the second of the seven eunuchs of king Alasnerus' harem (Est. i. 10). The name is Persian, possibly *بسته*, *baste*, a word referring to his condition as a eunuch (Ges. *Thes.* 197).

**BLAINS** (בִּלְיָנִים; *φλυκτίδες*, *φλύκταιναι*, LXX.; Ex. ix. 9, *ἀναξίουσαι ἐν τε τοῖς ἀνθρώποις καὶ ἐν τοῖς τετραπόδοις*; also *בִּלְיָנִים*, *pustula urdens*), violent ulcerous inflammations (from *בָּלַע*, to boil up). It was the sixth plague of Egypt, and hence is called in Deut. xxviii. 27, 35, "the botch of Egypt" (*בִּלְיָנִים מִצְרַיִם*; cf. Job ii. 7, *בִּלְיָנִים*). It seems to have been the *ψώρα ἀγρία* or black leprosy, a fearful kind of elephantiasis (comp. Plin. xxvi. 5). It must have come with dreadful intensity on the magicians whose art it baffled, and whose scrupulous cleanliness (Herod. ii. 36) it rendered nugatory: so that they were unable to stand in the presence of Moses because of the boils.

Other names for purulent and leprous eruptions are **צִנְחָה** (Morphea alba), **צִנְחָה** (Morphea nigra), and the more harmless scab **סִפְחָה** (Lev. xiii. passim (Jahn, *Arch. Bibl.* §189). [F. W. F.]

**BLASPHEMY** (βλασφημία), in its technical English sense, signifies the speaking evil of God (נִכְבֵּשׁ יְהוָה, in this sense it is found Ps. lxxiv. 18; Is. lli. 5; Rom. ii. 24, &c. But according to its derivation (βλάπτω φημι quasi βλαψίφ.) it may mean any species of calumny and abuse (or even an unlucky word, Eurip. *Ion*. 1187): see 1 K. xxi. 10; Acts xviii. 6; Jude 9, &c. Hence in the LXX. it is used to render **כָּרַךְ**, Job ii. 5; **רָחַף**, 2 K. xix. 6; **הוֹכִיחַ**, 2 K. xix. 4, and **לָעַן** Hos. vii. 16, so that it means "reproach," "derision," &c.: and it has even a wider use, as 2 Sam. xii. 14, where it means "to despise Judaism," and 1 Macc. ii. 6, where βλασφημία = idolatry. In Sir. iii. 18 we have **ὡς βλάσφημος ὁ ἐγκαταλιπὼν πατέρα**, where it is equivalent to **κατ' ἁγιάσματός** (Schleusner, *Thesaur.* s. v.).

Blasphemy was punished with stoning, which was inflicted on the son of Shelomith (Lev. xxiv. 11). On this charge both our Lord and St. Stephen were condemned to death by the Jews. From Lev. xxiv. 16, wrongly understood, arose the singular superstition about never even *pronouncing* the name of Jehovah. Ex. xxii. 28, "Thou shalt not revile the gods, nor curse the ruler of thy people," does not refer to blasphemy in the strict sense, since "elohim" is there used (as elsewhere) of imagistrates, &c.

The Jews, misapplying Ex. xxiii. 13, "Make no mention of the name of other gods," seemed to think themselves bound to give nicknames to the heathen deities; hence their use of Bosheth for Baal, Bethaven for Bethel, Beelzebub for Beelzebub, Hos. iv. 5, &c. It is not strange that this "contumelia numinum" (Plin. xiii. 9), joined to their zealous proselytism, made them so deeply unpopular among the natives of antiquity (Winer, s. v. *Gotteslästerung*). When a person heard blasphemy he laid his hand on the head of the offender, to symbolize his sole responsibility for the guilt, and rising on his feet, tore his robe, which might never again be mended. (On the mystical reasons for these observances, see Lightfoot, *Hor. Hebr.* Matt. xxvi. 65.)

It only remains to speak of "the blasphemy against the Holy Ghost," which has been so fruitful a theme for speculation and controversy (Matt. xii. 32; Mark iii. 28). It consisted in attributing to the power of Satan those unquestionable miracles, which Jesus performed by "the finger of God," and the power of the Holy Spirit; nor have we any safe ground for *extending* it to include all sorts of *willing* (as distinguished from *unwilling*) offences, besides this one limited and special sin. The often misunderstood expression "it shall not be forgiven him, neither in this world, &c.," is a direct application of a Jewish phrase in allusion to a Jewish error, and will not bear the inferences so often extorted from it. According to the Jewish school notions, "a quo blasphematur nomen Dei, ei non valet poenitentia ad suspendendum iudicium, nec dies expiationis ad expandendum, nec plagae ad adstergendum, sed omnes suspendunt iudicium, et mors adestergit." In refutation of this tradition our Lord used the phrase to imply that "blasphemy against the Holy Ghost shall not be forgiven; neither before death, nor, as

you vainly dream, by means of death" (Lightfoot, *Hor. Hebr. ad locum*). As there are no tenable grounds for identifying this blasphemy with "the sin unto death," 1 John v. 16, we shall not here enter into the very difficult inquiries to which that expression leads. [F. W. F.]

**BLASTUS** (βλάστος), the chamberlain (δ ἐπὶ τοῦ κοιτῶνος) of Herod Agrippa I., mentioned Acts xii. 20, as having been made by the people of Tyre and Sidon a mediator between them and the king's anger. [H. A.]

## BLINDING. [PUNISHMENTS.]

**BLINDNESS** (עִוְרָה, עִוְרָה, from the root עָוַר, to bore) is extremely common in the East from many causes; e. g. the quantities of dust and sand pulverised by the sun's intense heat; the perpetual glare of light; the contrast of the heat with the cold sea-air on the coast where blindness is specially prevalent; the dews at night while they sleep on the roofs; small pox, old age, &c.; and perhaps more than all the Mahometan fatalism, which leads to a neglect of the proper remedies in time. One traveller mentions 4000 blind men in Cairo, and Volney reckons that 1 in every 5 were blind, besides others with sore eyes (i. 86). *Ludd*, the ancient Lydda, and *Ramleh*, enjoy a fearful notoriety for the number of blind persons they contain. The common saying is that in *Ludd* every man is either blind or has but one eye. Jaffa is said to contain 500 blind out of a population of 5000 at most. There is an asylum for the blind in Cairo (which at present contains 300), and their conduct is often turbulent and fanatic (Lane, i. 39, 292; Trench, *On the Miracles*; Matt. ix. 27, &c.). Blind beggars figure repeatedly in the N. T. (Matt. xii. 22), and "opening the eyes of the blind" is mentioned in prophecy as a peculiar attribute of the Messiah (Is. xxix. 18, &c.). The Jews were specially charged to treat the blind with compassion and care (Lev. xix. 4; Deut. xvii. 18).

Penal and miraculous blindness are several times mentioned in the Bible (Gen. xix. 11, *ἀσπασία*, LXX.; 2 K. vi. 18-22; Acts ix. 9). In the last passage some have attempted (on the ground of St. Luke's profession as a physician) to attach a technical meaning to *ἀχλὺς* and *σκότος* (Jahn, *Arch. Bibl.* §201), viz. a spot or "thin tunicle over the cornea," which vanishes naturally after a time: for which fact Winer (s. v. *Blindheit*) quotes Hippocr. (*Prædict.* ii. 215) *ἀχλὺς . . . ἐκλεαίνονται καὶ ἀφανίζονται ἢ μὴ τῷ μὲν ἐπιγενέσθαι ἐν τούτῳ τῷ χωρίῳ*. But this does not remove the miraculous character of the infliction. In the same way analogies are quoted for the use of saliva (Matt. viii. 23, &c.) and of fish-gall in the case of the *λεῦκωμα* of Tobias; but, whatever may be thought of the latter instance, it is very obvious that in the former the saliva was no more instrumental in the cure than the touch alone would have been (Trunch *on the Miracles, ad loc.*).

Blindness wilfully inflicted for political or other purposes was common in the East, and is alluded to in Scripture (1 Sam. xi. 2; Jer. xiii. 12). [F. W. F.]

**BLOOD** (דָּם). To blood is ascribed in Scripture the mysterious sacredness which belongs to life, and God reserves it to Himself when allowing man the dominion over and the use of the lower animals for food, &c. (as regards, however, the eating of blood, see FOOD). Thus reserved, it acquires

a double power; 1. that of sacrificial atonement, in which it had a wide recognition in the heathen world; and 2. that of becoming a curse, when wantonly shed, *e. g.* even that of beast or fowl by the huntsman, unless duly expiate, *e. g.* by burial (Gen. ix. 4; Lev. vii. 26, xvii. 11-13). As regards 1. the blood of sacrifices was caught by the Jewish priest from the neck of the victim in a basin, then sprinkled seven times (in case of birds at once squeezed out on the altar, *i. e.* on its horns, its base, or its four corners, or on its side above or below a line running round it, or on the mercy-seat, according to the quality and purpose of the offering; but that of the passover on the lintel and door-posts, Exod. xii.; Lev. iv. 5-7, xvi. 14-19; Ugolini, *Thes.* vol. x. and xiii.). There was a drain from the temple into the brook Cedron to carry off the blood (Maimon. *apud Cramer de Aré Ester*. Ugolini, viii.). In regard to 2. it sufficed to pour the animal's blood on the earth, or to bury it, as a solemn rendering of the life to God; in case of human bloodshed a mysterious connexion is observable between the curse of blood and the earth or land on which it is shed, which becomes polluted by it; and the proper expiation is the blood of the shedder, which every one had thus an interest in seeking, and was bound to seek (Gen. iv. 10, ix. 4-6; Num. xxxv. 33; Ps. cvi. 38; see BLOOD, AVENGER OF). In the case of a dead body found, and the death not accounted for, the guilt of blood attached to the nearest city, to be ascertained by measurement, until freed by prescribed rites of expiation (Deut. xxi. 1-9). The guilt of murder is one for which "satisfaction" was forbidden (Num. xxxv. 31). [H. H.]

### BLOOD, ISSUE OF (דִּם יֵצֵא; Rabin.;

*fluxus laborans*). The term is in Scripture applied only to the case of women under menstruation or the *fluxus ulteri* (Lev. xv. 19-30; Matt. ix. 20, γυνὴ ἀμώροισα; Mark v. 25 and Luke viii. 43, ὄδρα ἐν ῥύσει αἵματος). The latter caused a permanent legal uncleanness, the former a temporary one, mostly for seven days; after which she was to be purified by the customary offering. The "bloody flux" (δυσενεπία) in Acts xxviii. 8, where the patient is of the male sex, is, probably, a medically correct term (see Bartholini *de Morbis Biblicis*, 17). [H. H.]

### BLOOD, REVENGER OF (דָּם; Goel).

It was, and even still is, a common practice among nations of patriarchal habits, that the nearest of kin should, as a matter of duty, avenge the death of a murdered relative. The early impressions and practice on this subject may be gathered from writings of a different though very early age and of different countries (Gen. xxiv. 30; Hom. *Il.* xxiii. 84, 88, xxiv. 480, 482; *Od.* xv. 270, 276; Müller on Aeschyl. *Eum.* c. ii. A. & B.). Compensation for murder is allowed by the Koran, and he who transgresses after this by killing the murderer shall suffer a grievous punishment (Sale, *Koran*, ii. p. 21, and xvii. p. 230). Among the Bedouins, and other Arab tribes, should the offer of blood-money be refused, the 'Thar,' or law of blood, comes into operation, and any person within the fifth degree of blood from the homicide may be legally killed by any one within the same degree of consanguinity to the victim. Frequently the homicide will wander from tent to tent over the Desert, or even rove through the towns and villages on its borders with

a chain round his neck and in rags begging contributions from the charitable to pay the apportioned blood-money. Three days and four hours are allowed to the persons included within the 'Thar,' for escape. The right to blood-revenge is never lost, except as annulled by compensation: it descends to the latest generation. Similar customs with local distinctions are found in Persia, Abyssinia, among the Druses and Circassians. (Niebuhr, *Descr. de l'Arabie*, pp. 28, 30, *Voyage*, ii. p. 350; Burckhardt, *Notes on the Bedouins*, pp. 66, 85, *Travels in Arabia*, i. p. 409, ii. 330, *Syria*, pp. 540, 113, 643; Layard, *Nin. & Bab.* pp. 305-307; Chardin, *Voyages*, vol. vi. pp. 107-112.) Money-compensations for homicide are appointed by the Hindû law (Sir W. Jones, vol. iii. chap. vii.), and Tacitus remarks that among the German nations "lucrum homicidium certo armentorum ac pecorum numero" (*Germani*. 21). By the Anglo-Saxon law also money-compensation for homicide, *wer-gild*, was sanctioned on a scale proportioned to the rank of the murdered person (Lappenberg, ii. 336; Lingard, i. 411, 414).

The spirit of all legislation on the subject has probably been to restrain the licence of punishment assumed by relatives, and to limit the duration of feuds. The law of Moses was very precise in its directions on the subject of Retaliation.

1. The wilful murderer was to be put to death without permission of compensation. The nearest relative of the deceased became the authorized avenger of blood (דָּם, the redeemer, or avenger, as next of kin, Gesen. s. v. p. 254, who rejects the opinion of Michaëlis, giving it the sig. of "polluted," *i. e.* till the murder was avenged (δ ἀρχαῖος, *LXX.*, *propinquus occisi*, Vulg., Num. xxxv. 19), and was bound to execute retaliation himself if it lay in his power. The king, however, in later times appears to have had the power of restraining this licence. The shedder of blood was thus regarded as impious and polluted (Num. xxxv. 16-31; Deut. xix. 11; 2 Sam. xiv. 7, 11, xvi. 8, and iii. 29, with 1 K. ii. 31, 33; 1 Chr. xxdv. 22-25).

2. The law of retaliation was not to extend beyond the immediate offender (Deut. xxiv. 16; 2 K. xiv. 6; 2 Chr. xxv. 4; Jer. xxxi. 29-30; Ezek. xviii. 20; Joseph. *Ant.* iv. 8, §39).

3. The involuntary shedder of blood was permitted to take flight to one of six Levitical cities, specially appointed out of the 48 as cities of refuge, three on each side of the Jordan (Num. xxxv. 22, 23; Deut. xix. 4-6. The cities were Kedesh, in Mount Naphtali; Shechem, in Mount Ephraim; Hebron, in the hill-country of Judah. On the E. side of Jordan, Bezer, in Reuben; Ramoth, in Gad; Golan, in Manasseh (Josh. xx. 7, 8). The elders of the city of refuge were to hear his case and protect him till he could be tried before the authorities of his own city. If the act were then decided to have been involuntary, he was taken back to the city of refuge, round which an area with a radius of 2000 (3000, Patrick) cubits was assigned as the limit of protection, and was to remain there in safety till the death of the high-priest for the time being. Beyond the limit of the city of refuge the revenger might slay him, but after the high-priest's death he might return to his home with impunity (Num. xxxv. 25, 28; Josh. xx. 4, 6). The roads to the cities were to be kept open (Deut. xix. 3).

To these particulars the Talmudists add, among others of an absurd kind, the following: at the

cross-roads posts were erected bearing the word **מקלט**, *refuge*, to direct the fugitive. All facilities of water and situation were provided in the cities: no implements of war or chase were allowed there. The mothers of high-priests used to send presents to the detained persons to prevent their wishing for the high-priest's death. If the fugitive died before the high-priest, his bones were sent home after the high-priest's death (P. Fagius in Targ. Onk. Ap. Kittershus. *de Jure Asyli, Crit. Sacr.* viii. p. 159; Lightfoot, *Cent. Chorogr.* c. 50, Op. ii. p. 208).

4. If a person were found dead, the elders of the nearest city were to meet in a rough valley untouched by the plough, and washing their hands over a beheaded heifer, protest their innocence of the deed, and deprecate the anger of the Almighty (Deut. xxi. 1-9).

[H. W. P.]

**BOANERGES** (**Boavepyés**), a name signifying *vial* **Βοαυγής**, "sons of thunder," given by our Lord to the two sons of Zebedee, James and John. It is the Aramaic pronunciation (according to which *Scheva* is sounded as *oa*) of **בני רעש**. The latter word in Hebrew signifies a *thunder* or *uproar* (Ps. ii. 1), but in Arabic and Syriac *thunder*. Probably the name had respect to the fiery zeal of the brothers, signs of which we may see in Luke ix. 54; Mark ix. 38; comp. Matt. xx. 20 ff.

[H. A.]

**BOAR** (**חזיר**, *Chazir*), a pachydermatous animal, mentioned only by this name in Ps. lxxv. 14, but in several other passages where the domesticated animal is meant the A. V. has *swine* (Lev. xi. 7; Deut. xiv. 8; Prov. xi. 22; Is. lxxv. 4, lxxvi. 3). The boar is an animal which commits great ravages upon vineyards, and it is in this connexion that he is mentioned by the Psalmist. Pooncke observed very large herds of wild swine by the Jordan where it flows into the sea of Tiberias, and among the reeds by the shore of that sea. This habit of lurking in reeds was known to the Assyrians, and sculptured on their monuments (see Layard, *Nimrod and Babylon*, p. 109). **חזיר** is from an unused root **חזר** (*circumivit, volvit, quod se volutant in luto porci*). The LXX. render it *sūs* or *ēs*, but in the N. T. **χοίρος** is used for swine.

[W. D.]

**BO'AZ** (**בועז**, *Boe'az*; **Booz**). 1. A wealthy Bethlehemite, kinsman to Elimelech, the husband of Naomi. Finding that the kinsman of Ruth, who stood in a still nearer relation than himself, was unwilling to perform the office of **גאל**, he had those obligations publicly transferred with the usual ceremonies to his own discharge; and hence it became his duty by the "levirate law" to marry Ruth (although it is hinted, Ruth iii. 10, that he was much her senior, and indeed this fact is evident whatever system of chronology we adopt), and to redeem the estates of her deceased husband Mahlon (iv. 1 ff.; Jahn, *Arch. Bibl.* §157). He gladly undertook these responsibilities, and their happy union was blessed by the birth of Obed, from whom in a direct line our Lord was descended. No objection seems to have arisen on the score of Ruth's Moabitish birth; a fact which has some bearing on the date of the narrative (cf. Ex. ix. 1 ff.).

[BETHLEHEM.]

Boaz is mentioned in the genealogy (Matt. i. 5), but there is great difficulty in assigning his date. The genealogy in Ruth (iv. 18-22) only allows 10

generations for 850 years, and only 4 for the 450 years between Salmon and David, if (as is almost certain from St. Matt. and from Jewish tradition) the Rahab mentioned is Rahab the harlot. If Boaz be identical with the judge Ibzan (**יבזן**), as is stated with some shadow of probability by the Jerusalem Talmud and various Rabbis, several generations must be inserted. Dr. Kennicott, from the difference in form between Salmah and Salmor (Ruth v. 20, 21), supposes that by mistake two different men were identified (*Dissert.* i. 543); but we want at least *three* generations, and this supposition gives us only one. Mill quotes from Nicolas Syranus the theory, "dicunt majores nostri, et bene quod videtur, quod tres fuerint Boaz sibi succedentes; in Mt. i. isti tres sub uno nomine comprehenduntur." Even if we shorten the period of the Judges to 240 years, we must suppose that Boaz was the youngest son of Salmon, and that he did not marry till the age of 65 (Dr. Mill, *On the Genealogies*; Lord A. Hervey, *Id.* 262, &c.).

2. BOAZ, the name of one of Solomon's brazen pillars erected in the temple porch. [**JACHIN**.] It stood on the left, and was 17½ cubits high (1 K. vii. 15, 21; 2 Chr. iii. 15; Jer. lii. 21). It was hollow and surmounted by a chapter, 5 cubits high, ornamented with net-work and 100 pomegranates. The apparent discrepancies in stating the height of it, arise from the including and excluding of the ornament which united the shaft to the chapter, &c.

[F. W. F.]

**BOOC'AS** (**δ Βορκάς**; *Boccus*), a priest in the line of Esdras (1 Esd. viii. 2). [**BUKKI**; **BOURIH**.]

**BOCH'ERU** (**בכר**; *Boeru*; 1 Chr. viii. 38, ix. 44, according to the present Hebrew text), son of Azel; but rendered **πρωτότοκος** by LXX. in both passages, as if pointed **בכר**. [**BUCHER**.] [**A.C.H.**]

**BO'CHIM** (**הבכים**, *the weepers*; **δ Κλαυθμών**, *Κλαυθμῶνες*; *locus flentium sive lacrymarum*), a place on the west of Jordan above Gilgal (Judg. ii. 1 and 5), so called because the people "wept" there.

**BO'HAN** (**בון**; **Bdon**; *Boen*), a Reubenite, after whom a stone was named, possibly erected to commemorate some achievement in the conquest of Palestine (comp. 1 Sam. vii. 12). Its position was on the border of the territories of Benjamin and Judah between Betharabah and Bethhogla on the E., and Adummim and Enshemesh on the W. Its exact situation is unknown (Josh. xv. 6, xvii. 17). [**STONES**.]

[W. L. B.]

**BONDAGE**. [**SLAVERY**.]

**BOOK**. [**WRITING**.]

**BOOTH**. [**SUCCOTH**; **TABERNACLES**, **FEAST OF**.]

**BOOTY**. This consisted of captives of both sexes, cattle, and whatever a captured city might contain, especially metallic treasures. Within the limits of Canaan no captives were to be made (Deut. xx. 14 and 16); beyond those limits, in case of warlike resistance, all the women and children were to be made captives, and the men put to death. A special charge was given to destroy the "pictures and images" of the Canaanites, as tending to idolatry (Num. xxxiii. 52). The case of Amalek was a special one, in which Saul was bidden to destroy the

cattle. So also was that of the expedition against Arad, in which the people took a vow to destroy the cities, and that of Jericho, on which the curse of God seems to have rested, and the gold and silver, &c. of which were viewed as reserved wholly for Him (1 Sam. xv. 2, 3; Num. xxi. 2; Josh. vi. 19). The law of booty was that it should be divided equally between the army who won it and the people of Israel, but of the former half one head in every 500 was reserved to God, and appropriated to the priests, and of the latter one in every 50 was similarly reserved and appropriated to the Levites (Num. xxi. 26-47). As regarded the army David added a regulation that the baggage-guard should share equally with the troops engaged. The present made by David out of his booty to the elders of towns in Judah was an act of grateful courtesy merely, though perhaps suggested by the law, Num. i. c. So the spoils devoted by him to provide for the temple, must be regarded as a free-will offering (1 Sam. xxx. 24-26; 2 Sam. viii. 11; 1 Chr. xvi. 27). [H. H.]

BO'OZ (Rec. T. *Bod̄z*; Lachm. with ABD, *Bod̄s*; Booz), Matt. i. 5; Luke iii. 32. [BOAZ.]

BO'RITH (*Borith*), a priest in the line of Ephraim (2 Esd. i. 2). The name is a corruption of BUKKI.

BORROWING. [LOAN.]

BOS'CATH (בֹּסְקַת), 2 K. xxii. 1. [BOZ-KATH.]

BO'SOR, 1. (Βοσόρ; ܒܫܘܪ; *Bosor*), a city both large and fortified, on the East of Jordan in the land of Gilead (Galad), named with Bozrah (Bosora), Carnaim, and other places in 1 Macc. v. 26, 36. It is probably BEZER, though there is nothing to make the identification certain.

2. (ὁ Βοσόρ, *cc Bosor*), the Aramaic mode of pronouncing the name of BEOR, the father of Balaam (2 Pet. ii. 15); in accordance with the substitution, frequent in Chaldee, of *ב* for *ב* (see Gesenius, 1144). [G.]

BOS'ORA (Βοσώρα, and Βοσὸρρα; ܒܫܘܪܐ; *Barasa, Bosor*), a strong city in Gilead taken by Judas Maccabaeus (1 Mac. v. 26, 28), doubtless the same as BOZRAH.

**BOTTLE.** The words which are rendered in A. V. of O. T. "bottle" are, 1. *בֹּתֵל* (Gen. xxi. 14, 15, 19); *ἀσκός*; *uter*: a skin-bottle. 2. *בִּלְלִי* (1 Sam. x. 3; Job xxviii. 37; Jer. xiii. 12; Is. v. 10, xxx. 14; Lam. iv. 2); *ἀγγεῖον, κερμαῖον, ἀσκός*; *uter, vas testevum, lagenā, lagunculā*. 3. *בִּנְיָן* (Jer. xix. 1); *βυκὸς δοτράκων; lagunculā*. 4. *בִּנְיָן* (Josh. ix. 4, 13; Judg. iv. 19; 1 Sam. xvi. 20; Ps. cxix. 83); *ἀσκός*; *uter, lagenā*.

In N. T. the only word rendered "bottle" is *ἀσκός* (Matt. ix. 27; Mark ii. 18; Luke v. 33). The bottles of Scripture are thus evidently of two kinds. 1. The skin bottle; 2. The bottle of earthen or glass-ware, both of them capable of being closed from the air. 1. The skin bottle will be best described in the following account collected from Chardin and others. The Arabs, and all those that lead a wandering life, keep their water, milk, and other liquors, in

leathern bottles. These are made of goatskins. When the animal is killed, they cut off its feet and its head, and they draw it in this manner out of the skin, without opening its belly. In Arabia they are tanned with acacia-bark and the hairy part left outside. If not tanned, a disagreeable taste is imparted to the water. They afterwards sew up the places where the legs were cut off and the tail, and when it is filled they tie it about the neck. The great leathern bottles are made of the skin of a he-goat, and the small ones, that serve instead of a bottle of water on the road, are made of a kid's skin. These bottles when rent are repaired sometimes by setting in a piece; sometimes by gathering up the wounded place in manner of a purse; sometimes they put in a round flat piece of wood, and by that means stop the hole (Chardin, ii. 405, viii. 409; Wellsted, *Arabia*, i. 89, ii. 78; Lane, *Mod. Eg.* ii. c. 1. Harmer, from Chardin's notes, ed. Clarke, i. 284). Bruce gives a description of a vessel of the same kind, but larger. "A gerba is an ox's skin, squared, and the edges sewed together by a double seam, which does not let out water. An opening is left at the top, in the same manner as the bung-hole of a cask; around this the skin is gathered to the size of a large handful, which, when the gerba is full of water, is tied round with whipcord. These gerbas contain about sixty gallons each, and two of them are the load of a camel. They are then all besmeared on the outside with grease, as well to hinder the water from oozing through, as to prevent its being evaporated by the heat of the sun upon the gerba, which, in fact, happened to us twice, so as to put us in danger of perishing with thirst." (*Travels*, iv. 334.)

Skin Bottles. (From the Museo Barbours.)

Wine-bottles of skin are mentioned as used by Greeks, Romans, and Egyptians, by Homer (*Od.* vi. 78, *οἶνον ἔχειεν Ἀσκόφ ἐν αἰγέλω*; *Il.* iii. 247); by Herodotus, as used in Egypt (ii. 121), where he speaks of letting the wine out of the skin by the *ποδῶν*, the end usually tied up to serve as the neck; by Virgil (*Georg.* ii. 384). Also by Athenaeus, who mentions a large skin-bottle of the nature of the gerba (*ἀσκός ἐκ παρθαλῶν δερμάτων ἑρβαμένος*, v. 28 p. 199). Chardin says that wine in Persia is preserved in skins saturated with pitch, which, when good, impart no flavour to the wine (*Voyages*, iv. 75). Skins for wine or other liquids are in use to this day in Spain, where they are called *borrachas*.

The effect of external heat upon a skin-bottle is indicated in Ps. cxix. 83, "a bottle in the smoke," and of expansion produced by fermentation in Matt. ix. 17, "new wine in old bottles."

2. Vessels of metal, earthen, or glass ware for liquids were in use among the Greeks, Egyptians, Etruscans, and Assyrians (*χρυσόπυκος φιάλη Τυροσηνή, Athen.* i. 20 (28); *ἀργυρέη φιάλη, Il.* xxiii. 243; *κροφίθετον φιάλην ἀπύρωτον*, 270), and also no doubt among the Jews, especially in later times. Thus Jer. xix. 1, "a potter's earthen bottle."

The Jews probably borrowed their manufactures in this particular from Egypt, which was celebrated for glass work, as remains and illustrations of Egyptian workmanship are extant at least as early as the 15th century B.C. (Wilkinson, ii. 59, 60).

Egyptian Bottles. 1 to 7, glass; 8 to 11, earthenware. (From the British Museum Collection.)

Glass bottles of the 3rd or 4th century B.C. have been found at Babylon by Mr. Layard. At Cairo many persons obtain a livelihood by selling Nile water, which is carried by camels or asses in skins, or by the carrier himself on his back in pitchers of porous grey earth (Lane, *Mod. Eg.* ii. 153, 155; Burckhardt, *Syria*, p. 611; Maundrell, *Journey*, p. 407, Bohm; Wilkinson, *Egypt*, c. iii. vol. i. 148-158; *Dict. of Antiq. VINUM*; Layard, *Nineveh and Babylon*, pp. 196, 503; *Gesenius*, s. v.) [H. W. P.]

Assyrian Glass Bottles. (From the British Museum Collection.)

## BOW. [ARMS.]

**BOWL.** 1. **בִּלְלָה**; *στρογγύλον ἀνθέμιον*; *funiculus*; see Ges. p. 288. 2. **בִּסְפָל**; *λεκανή*; *concha*. 3. **בִּסְפָל**; also in A. V. *dish*. 4. **בִּיבִי**; *κρατήρ*; *scyphus*. 5. **בִּמְכִי**; *κύαθος*; *cyathus*. Of these words (1) may be taken to indicate chiefly roundness, from **בִּלְלָה**, *roll*, as a ball or globe, placed as an ornament on the tops of capitals of columns (1 K. vii. 41; 2 Chr. iv. 12, 13); also the knob or boss from which proceed the branches of a candlestick (Zech. iv. 2), and also a suspended lamp, in A. V. "golden bowl" (Eccl. xii. 3). (2) indicating lowness, is perhaps a shallow dish or basin; (3) a hollow vessel; (4) a round vessel (Jer. xxxv. 5) *κεράμιον* LXX.; (5) a lustratory vessel, from **בִּמְכִי**, *pure*.

A like uncertainty prevails as to the precise form and material of these vessels as is noticed under **BASIN**. Bowls would probably be used at meals for liquors, or broth, or potage (2 K. iv. 40). Modern Arabs are content with a few

wooden bowls. In the Brit. Mus. are deposited several terra-cotta bowls with Chaldean inscriptions of a superstitious character, expressing charms against sickness and evil spirits, which may possibly explain the "divining cup" of Joseph (Gen. xlv. 5). The bowl was filled with some liquid and drunk off as a charm against evil. See a case of Tippoo Sahib drinking water out of a black stone as a charm against misfortune (Gleig, *Life of Munro*, i. 218). One of the Brit. Mus. bowls still retains the stain of a liquid. These bowls, however, are thought by Mr. Birch not to be very ancient (Layard, *Nin. and Bab.* 509, 511, 526. Birch, *Anc. Pottery*, i. 154. Shaw, 231.) [H. W. P.]

**BOX-TREE** (**בֹּזְרַח**, *Te issahir*), a tree mentioned twice by the Prophet Isaiah, and in one passage as a product of Mount Lebanon (Is. xli. 19, lx. 13). It is translated box-tree in A. V. and *burus* in the Vulgate, but is properly a species of cedar, called *Scherbin*, to be recognized by the small size of the cones, and the upward tendency of the branches. (See Niebuhr's *Arab.* p. 149.) This last character explains the derivation from **בֹּזְרַח**, *erectus fuit*, whence **בֹּזְרַח**, *erectio* = *proceritas* = *proceru arbor*. In both the above-quoted passages the word is connected in the A. V. with the fir-tree and the pine-tree. In Is. xli. 19 the LXX. do not translate it at all, and they render **בֹּזְרַח** by *πόρον*; in Is. lx. 13 they translate it by *κέρπος*.

There is no reference to the **בֹּזְרַח** in Stanley's enumeration of the trees of Palestine (Stanley's *Sinai and Palestine*, pp. 139-146, App. p. 517-521), and possibly the name is synonymous with **בִּרְזַח**; but Robinson, in his latest volume of Biblical Researches in Palestine, mentions a grove near el-Hadith which only the natives speak of as *Arez*, though the tree bears a general resemblance to the cedar, and is probably the *Scherbin*. (See Cels. *Herob.* i. pp. 74, 79; Freytag, *Lex.* ii. p. 408; Roh. iii. 593.) [W. D.]

**BO'ZEZ** (**בֹּזֶזֶז**, *shining*, according to the conjecture of Gesenius, *Thes.* 229; *Boazés*; *Boscs*), the name of one of the two "sharp rocks" (Hebrew, "teeth of the cliff") "between the passages" by which Jonathan entered the Philistine garrison. It seems to have been that on the north side (1 Sam. xiv. 4, 5). Robinson notices two hills of blunt conical form in the bottom of the *Wady Swereit* just below *Makhnds* (i. 441 and iii. 289). Stanley, on the other hand, could not make them out (*S. & P.* 205, note). And indeed these hills answer neither to the expression of the text nor the requirements of the narrative. [G.]

**BOZ'KATH** (**בֹּזְקַת**; *Βασθηδω*; Alex. *Μαοχθ*; in Kings, *Βασουπθ*; Joseph. *Βοαίθ*; *Buscath*, *Bescath*), a city of Judah in the Shefelah; named with Lachish (Josh. xv. 39). It is mentioned once again (2 K. xxii. 1) as the native place of the mother of king Josiah. Here it is spelt in the A. V. "Boscath." No trace of the site has yet been discovered. [G.]

**BOZ'RAH** (**בֹּזְרָה**), possibly from a root with the force of restraining, therefore used for a sheepfold, Gesen. s. v.; *Βοσράρα*; *Boarép*, also *δρυρῶμα* Jer. xlix. 22, *τειχος* Am. i. 12; *Bosra*), the name of more than one place on the east of

Palestine. 1. In Edom—the city of Jobab the son of Zerah, one of the early kings of that nation (Gen. xxxvi. 33; 1 Chr. i. 44). This is doubtless the place mentioned in later times by Isaiah (xxiv. 6, lxiii. 1 (in connexion with Edom), and by Jeremiah (xlix. 13, 22), Amos (i. 12), and Micah (ii. 12, “sheep of B,” comp. *Isa. xxiv. 6*: the word is here rendered by the Vulgate and by Gesenius “fold,” “the sheep of the fold,” *Ges. Thes.* 230). It was known to Eusebius, who speaks of it in the *Onomasticon* (Βοσάρα) as a city of Esau in the mountains of Idumaea, in connexion with *Isa. lxiii. 1*, and in contradistinction to Bostra in Peræa. There is no reason to doubt that the modern representative of Bozrah is *el-Busairih*, البصيرة, which was

first visited by Burckhardt (*Syr.* 407; *Rezezyra*), and lies on the mountain district to the S.E. of the Dead Sea, between Tüfleh and Petra, about halfway between the latter and the Dead Sea. Irby and Mangles mention it under the name of *Ipsayra* and *Bsüda* (chap. viii.: see also Robinson, ii. 167). The “goats” which Isaiah connects with the place were found in large numbers in this neighbourhood by Burckhardt (*Syr.* 405).

2. In his catalogue of the cities of the land of Moab, Jeremiah (xlviii. 24) mentions a Bozrah as in “the plain country” (ver. 21, בְּצִוְיָא, *i. e.* the high level downs on the east of the Dead Sea and of the lower Jordan, the *Belka* of the modern Arabs). Here lay Heshbon, Nebo, Kirjathaim, Diblathaim, and the other towns named in this passage, and it is here that we presume Bozrah should be sought, and not, as has been lately suggested, at Bosra, the Roman city in Bashan full sixty miles from Heshbon (Porter’s *Damascus*, ii. 163, &c.). On the other hand Bozrah stands by itself in this passage of Jeremiah, not being mentioned in any of the other lists of the cities of Moab, *e. g.* Num. xxiii.; Josh. xiii.; *Isa. xvi.*; *Ez. xiv.*; and the catalogue of Jeremiah is expressly said to include cities both “far and near” (xlviii. 24). Some weight also is due to the consideration of the improbability that a town at a later date so important and in so excellent a situation should be entirely omitted from the Scripture. Still there is the fact of the specification of its position as in the Mishor; and also this, that in a country where the Qery kings were “sheep-masters” (2 K. iii. 4), a name signifying a sheepfold must have been of common occurrence.

For the Roman Bostra, the modern *Busra*, on the south border of the *Hauran*, see Reland, 665, and Porter, ii. chap. 12. [G.]

### BRACELET (רֶמֶסֶת; ψάλλιον; χλιδών).

Under ARMLET an account is given of these ornaments, the materials of which they were generally made, the manner in which they were worn, &c. Besides רֶמֶסֶת three other words are translated by “bracelet” in the Bible, viz.: 1. מַצְצָה (from מָצַץ to fasten), Num. xxxi. 50, &c.; 2. שֶׁרֶת (a chain, σείρα, from its being wreathed, שָׂרַף). It only occurs in this sense in *Is. iii. 19*, but compare the expression “wreathen chains” in *Ex. xxviii. 14, 22*. Bracelets of fine twisted Venetian gold are still common in Egypt (Lane, ii. 368, Append. A. and plates); 3. מַתְּיָל, Gen. xxxviii.

18, 25, rendered “bracelet,” but meaning probably “a string by which a seal-ring was suspended” (*Gesen. s. v.*).

Gold Egyptian Bracelet. (Wilkinson.)

Men as well as women wore bracelets, as we see from Cant. v. 14, which may be rendered, “His wrists are circlets of gold full set with topazes.” Layard says of the Assyrian kings: “The arms were encircled by armlets, and the wrists by bracelets, all equally remarkable for the taste and beauty of the design and workmanship. In the centre of the bracelets were stars and rosettes, which were probably inlaid with precious stones” (*Nineveh*, ii. 323). These may be observed on the sculptures in the British Museum. [ARMLET; ANKLET.] [F. W. F.]

Assyrian Bracelet (lasp. (Nineveh Marbles.)

### BRAMBLE. [THISTLE; THORN.]

BRASS (χαλκός). The word שִׁנִּי (from the root שָׁנָה, to shine) is improperly translated by “brass” in the earlier books of Scripture, since the Hebrews were not acquainted with the compound of copper and zinc known by that name. In most places of the O. T. the correct translation would be copper (although it may sometimes possibly mean bronze (χαλκός κεκραμένος), a compound of copper and tin. Indeed a simple metal was obviously intended, as we see from Deut. viii. 9, “out of whose hills thou mayest dig brass,” and Job xxviii. 2, “Brass is molten out of the stone,” and Deut. xxxiii. 25, “Thy shoes shall be iron and brass,” which seems to be a promise that Asher should have a district rich in mines, which we know to have been the case, since Euseb. (viii. 15, 17) speaks of the Christians being condemned τοῖς κατὰ Φαινὸν τῆς Παλαιστοῖνος χαλκοῦ μετάλλοις (Lightfoot, *Cent. Chorogr.* c. 99). [ASHER.]

Copper was known at a very early period, and the invention of working it is attributed to Tubalcain (Gen. iv. 24; cf. Wilkinson, *Anc. Egypt.* iii. 243; comp. “Prius aeris erat quam ferri cognitus usus,” *Lucr.* v. 1292). Its extreme ductility (χαλκός from χλιδών) made its application almost universal among the ancients, as Hesiod expressly says (*Dict. of Ant.*, art. AES).

The same word is used for money, in both Testaments (*Ezek. xvi. 36*; *Matt. x. 9*, &c.).

It is often used in metaphors, *e. g.* *Lev. xxvi. 9*, “I will make your heaven as iron and your earth as brass,” *i. e.* dead and hard. This expression is reversed in Deut. xxviii. 23 (comp. Coleridge’s “All in a hot and copper sky,” &c. *Anc. Mar.*). “Is my flesh of brass,” *i. e.* invulnerable, *Job vi. 12*. “They are all brass and iron,” *i. e.* base, ignoble, impure, *Jer. vi. 28*. It is often used as an emblem of strength, *Zech. vi. 1*; *Jer. i. 18*, &c. The “brazen thighs” of the mystic image in Nebuchadnezzar’s dream were a fit symbol of the Ἀχαιοὶ χαλκοχί-  
Q

**τῶνες.** No special mention of orichalcum seems to be made in the Bible.

The word *χαλκολίβανον* in Rev. i. 15, ii. 18 (*οἱ πόδες αὐτοῦ ὡμοῖσι χαλκολίβανον*), has excited much difference of opinion. The A. V. renders it "fine brass," as though it were from *χ.* and *λείβω* (smelting brass), or that *δρεῖχαλκος*, which was so rare as to be more valuable than gold. Bochart makes it "as album igneo colore splendens," as though from *לָבַן*, "shining." It may perhaps be deep-coloured frankincense, as opposed to *ἀργυρολίβανον* (Liddell and Scott's *Lec.*) [F. W. F.]

### BRAZEN-SERPENT. [SERPENT.]

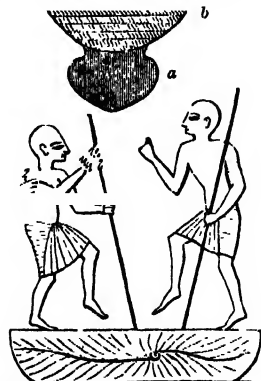

**BREAD (ἄρτος).** The preparation of bread as an article of food dates from a very early period: it must not, however, be inferred from the use of the word *lechem* in Gen. iii. 19 ("bread," A. V.) that it was known at the time of the fall, the word there occurring in its general sense of *food*: the earliest undoubted instance of its use is found in Gen. xviii. 6. The corn or grain (*שֵׁבֶר, גֶּזֶר*) employed was of various sorts: the best bread was made of wheat, which after being ground produced the "flour" or "meal" (*קֶמַח; ἄλευρον*; Judg. vi. 19; 1 Sam. i. 24; 1 K. iv. 22, xvii. 12, 14), and when sifted the "fine flour" (*סֵלֶת*), more fully *סֵלֶת הַקֵּיץ*, Ex. xlix. 2; or *סֵלֶת קֶמַח*, Gen. xviii. 6; *σεμιδαλῖς*) usually employed in the sacred offerings (Ex. xxix. 40; Lev. ii. 1; Ex. xlii. 14), and in the meals of the wealthy (1 K. iv. 22; 2 K. vii. 1; Ez. xvi. 13, 19; Rev. xviii. 13). "Barley" was used only by the very poor (John vi. 9, 14), or in times of scarcity (Ruth iii. 15, compared with i. 1; 2 K. iv. 38, 42; Rev. vi. 6; Joseph. *B. J.* v. 10, §2): as it was the food of horses (1 K. iv. 28), it was considered a symbol of what was mean and insignificant (Judg. vii. 13; comp. Joseph. *Ant.* v. 6, §4, *μάζαν κριθίνην, ἢ εὐτελέας ἀνθρώποις ἔβρωτον*; Liv. xxvii. 13), as well as of what was of a mere animal character, and hence ordered for the offering of jealousy (Num. v. 15; comp. Hos. iii. 2; Philo, ii. 307). "Spelt" (*שֶׁבֶר; ὄλυν, ζέα; rye, fitches, spelt*, A. V.) was also used both in Egypt (Ex. ix. 32) and Palestine (Is. xxviii. 25; Ez. iv. 9; 1 K. xix. 6, LXX. *ἐγκρυφῶς ὀλυντῆς*); Hierolotus indeed states (ii. 36) that in the former country bread was made exclusively of *olyra*, which, as in the LXX., he identifies with *zea*; but in this he was mistaken, as wheat was also used (Ex. ix. 32; comp. Wilkinson's *Anc. Eg.* ii. 397). Occasionally the grains above mentioned were mixed, and other ingredients, such as beans, lentiles, and millet, were added (Ez. iv. 9; cf. 2 Sam. xvii. 28); the bread so produced is called "barley cakes" (Ez. iv. 12, "as barley cakes," A. V.), inasmuch as barley was the main ingredient. The amount of meal required for a single baking was an ephah or three measures (Gen. xviii. 6; Judg. vi. 19; 1 Sam. i. 24; Matt. xiii. 33), which appears to have been suited to the size of the ordinary oven. The baking was done in primitive times by the mistress of the house (Gen. xviii. 6) or one of the daughters (2 Sam. xiii. 8); female servants were however employed in large households (1 Sam. viii. 13): it appears always to have been the proper business of women in a family (Jer. vii. 18, xlv. 19; Matt. xii. 33; cf. Plin. xviii. 11, 28). Baking

as a profession, was carried on by men (Hos. vii. 4, 6). In Jerusalem the bakers congregated in one quarter of the town, as we may infer from the names "bakers' street" (Jer. xxxvii. 21), and "tower of the ovens" (Neh. iii. 11, xii. 38, "furnaces," A. V.). In the time of the Herods, bakers were scattered throughout the towns of Palestine (*Ant.* xv. 9, §2). As the bread was made in thin cakes, which soon became dry and unpalatable, it was usual to bake daily, or when required (Gen. xviii. 6; comp. Harmer's *Observations*, i. 483): reference is perhaps made to this in the Lord's prayer (Matt. vi. 11; Luke xi. 3). The bread taken by persons on a journey (Gen. xlv. 23; Josh. ix. 12) was probably a kind of biscuit. The process of making bread was as follows:—the flour was first mixed with water, or perhaps milk (Burchiardi's *Notes on the Bedouins*, i. 58); it was then kneaded (*שָׁבַב*) with the hands (in Egypt with the feet also;

Egyptians kneading dough with their hands. (Wilkinson. From a painting in the Tomb of Hunefer III. at Thebes.)

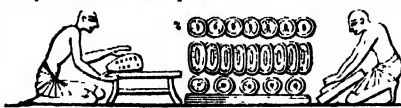

Herod. ii. 36; Wilkinson, ii. 386) in a small wooden bowl or "kneading-trough" (*מִשְׁכָּה*), a term which may, however, rather refer to the leathern bag in which the Bedouins carry their provisions, and which serves both as a wallet and a table; Niebuhr's *Voyage*, i. 171; Harmer, iv. 366 ff.; the LXX. inclines to this view, giving *ἐγκαταλειμματα* ("store," A. V.) in Deut. xxviii. 5, 17; the expression in Ex. xii. 34, however, "bound up in their clothes," favours the idea of a wooden bowl), until it became dough (*פַּצֵּץ; σταῖς*, Ex. xii. 34, 39; 2 Sam. xiii. 8; Jer. vii. 18; Hos. vii. 4: the term "dough" is improperly given in the

Egyptians kneading the dough with their feet. At *a* and *b* the dough is probably left to ferment in a basket, as is now done at Cairo. (Wilkinson.)

A. V. as = עֲרִיסוֹת, in Num. xv. 20, 21; Neh. x. 37; Ez. xlv. 30). When the kneading was completed, leaven (שָׂאֵר; ζύμη) was generally added [LEAVEN]; but when the time for preparation was short, it was omitted, and unleavened cakes, hastily baked, were eaten, as is still the prevalent custom among the Bedouins (Gen. xviii. 6, xix. 3; Ex. xii. 39; Judg. vi. 19; 1 Sam. xxviii. 24). Such cakes were termed מַצּוֹת (ἄζυμα, LXX.), a word of doubtful sense, variously supposed to convey the ideas of *thinness* (Fürst. *Lec. s. v.*), *sweetness* (Ges. *Thesaur.* p. 815), or *purity* (Knobel, *Comm.* in Ex. xii. 20), while leavened bread was called חֻמֵּץ (lit. *sharpened* or *soured*; Ex. xii. 39; Hos. vii. 4). Unleavened cakes were ordered to be eaten at the passover to commemorate the hastiness of the departure (Ex. xii. 15, xiii. 3, 7; Deut. xvi. 3), as well as on other sacred occasions (Lev. ii. 11, vi. 16; Num. vi. 15). The leavened mass was allowed to stand for some time (Matt. xiii. 33; Luke xiii. 21), sometimes for a whole night ("their baker sleepeth all the night," Hos. vii. 6), exposed to a moderate heat in order to forward the fermentation ("he censeth from stirring" [מְעִיר] "raising," A. V.) the fire "until it be leavened," Hos. vii. 4). The dough was then divided into round cakes (חֻמֵּץ, lit. *circles*; ἄρτοι; "loaves," A. V.; Ex. xxix. 23; Judg. viii. 5; 1 Sam. x. 3; Prov. vi. 26; in Judg. vii. 13, עֲלֵלֶה; *magis*), not unlike flat stones in shape and appearance (Matt. vii. 9; comp. iv. 3), about a span in diameter and a finger's breadth in thickness (comp. Lane's *Modern Egypt*, i. 164): three of these were required for the meal of a single person (Luke xi. 5), and consequently

vi. 19), and mixed with oil. Similar cakes, sprinkled with seeds, were made in Egypt (Wilkinson, ii. 386). Sometimes they were rolled out into wafers

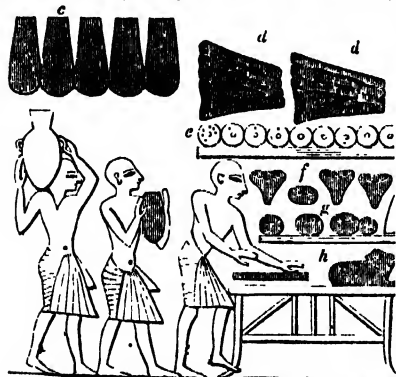

Egyptians making cakes of bread sprinkled with seeds. (Wilkinson.)

רְקִיקֹת; ἄλγανον; Ex. xxi. 2, 23; Lev. ii. 4; Num. vi. 15-19), and merely coated with oil. Oil was occasionally added to the ordinary cake (1 K. xvii. 12). A more delicate kind of cake is described in 2 Sam. xiii. 6, 8, 10; the dough ("flour," A. V.) is kneaded a second time, and probably some stimulating seeds added, as seems to be implied in the name לֵבִיבוֹת (from לֵבֵב, *heart*; compare our expression *a cordial*; κολλυβιστός; *sorbitioncake*). The cakes were now taken to the oven; having been first, according to the practice in Egypt, gathered into "white baskets" (Gen. xl. 16), סָלִי חָרִי, a doubtful expression, referred by some to the whiteness of the bread (κατὰ χροσθιστῶν; Aquil. κόφινον γυρῶς; *cinistra farinæ*), by others, as in the A. V., to the whiteness of the baskets, and again, by connecting the word חָרִי with the idea of a *hole*, to an open-work basket (*margin*, A. V.), or lastly to bread baked in a hole (Kitto, *Cyclop.* art. *Bread*). The baskets were placed on a tray and carried on the baker's head (Gen. xl. 16; Herod. ii. 35; Wilkinson, ii. 386).

An Egyptian carrying cakes to the oven. (Wilkinson.)

The methods of baking (פֶּתַח) were, and still are, very various in the East, adapted to the various styles of life. In the towns, where professional bakers resided, there were no doubt fixed ovens, in shape and size resembling those in use among ourselves: but more usually each household possessed a portable oven (פֶּתַח; κλίβανος), consisting of a stone or metal jar about three feet high, which was heated inwardly with wood (1 K. xvii. 12; Is. xlv. 15; Jer. vii. 18) or dried grass and flower-stalks (χόρτος, Matt. vi. 30); when the fire had burned down, the cakes were applied either inwardly (Herod. ii. 92) or outwardly: such ovens were used by the Egyptians (Wilkinson, ii. 385), and by the Easterns of Jerome's time (*Comment.* in Lam. v. 10), and are still common among the Bedouins (Wellsted's *Travels*, i. 350; Niebuhr's *Descript. de l'Arabie*, pp. 45, 46). The use of a single oven by several families only took place in time of famine (Lev. xxvi. 26). Another species of oven consisted of a hole dug in the ground, the sides of which were coated with clay and the bottom with pebbles (Harmer, i. 487). Jahn (*Archæol.* i. 9, §140) thinks that this oven is referred to in the term בִּירִים (Lev. xi. 35); but the dual number is an objection to this view; the term חָרִי (Gen. xl. 16) has also been referred to it.

Two Egyptians curving bread to the confectioner, who rolls out the paste, which is afterwards made into cakes of various forms, d, e, f, g, h. (Wilkinson.)

one was barely sufficient to sustain life (1 Sam. ii. 36, "morsel," A. V.; Jer. xxxvii. 21, "piece," A. V.), whence the expression לֶחֶם חַיִּים, "bread of affliction" (1 K. xxii. 27; Is. xxx. 20), referring not to the quality (*pauæ plebeia*, Grotius), but to the quantity; two hundred would suffice for a party for a reasonable time (1 Sam. xxv. 18; 2 Sam. xvi. 1). The cakes were sometimes *punctured*, and hence called חֻמֵּץ (καλλυρίς; Ex. xxix. 2, 23; Lev. ii. 4, viii. 26, xxiv. 5; Num. xv. 20; 2 Sam.

Other modes of baking were specially adapted to the migratory habits of the pastoral Jews, as of the modern Bedouins; the cakes were either spread upon stones, which were previously heated by lighting a fire above them (Burckhardt's *Notes*, i. 58) or beneath them (Belzoni's *Travels*, p. 84); or they were thrown into the heated embers of the fire itself (Wellsted's *Travels*, i. 350; Niebuhr, *Descript.* p. 46); or lastly, they were roasted by being placed between layers of dung, which burns slowly, and is therefore specially adapted for the purpose (Ez. iv. 12, 15; Burckhardt's *Notes*, i. 57; Niebuhr's *Descript.* p. 46). The terms by which such cakes were described were **עֲנַה** (Gen. xviii. 6; Ex. xii. 39; 1 K. xvii. 13; Ez. iv. 12; Hos. vii. 8), **מַעֲוֵה** (1 K. xvii. 12; Ps. xxxv. 16), or more fully **עֲנַה רְצִים** (1 K. xix. 6, lit. on the stones, "coals," A. V.), the term **עֲנַה** referring, however, not to the mode of baking, but to the rounded shape of the cake (Ges. *Thesaur.* p. 997): the equivalent terms in the LXX. **ἐγκυφλας**, and in the Vulg. *subcinericius panis*, have direct reference to the peculiar mode of baking. The cakes required to be carefully turned during the process (Hos. vii. 8; Harmer, i. 488). Other methods were used for other kinds of bread; some were baked on a pan (**מַחְבַּת**; **τῆγανον**; *sartago*: the Greek term survives in the *tajen* of the Bedouins), the result being similar to the *khubz* still used among the latter people (Burckhardt's *Notes*, i. 58), or like the Greek **ταγῆνια**, which were baked in oil, and eaten warm with honey (Athen. xiv. 55, p. 646); such cakes appeared to have been chiefly used as sacred offerings (Lev. ii. 5, vi. 14, vii. 9; 1 Chr. xliii. 29). A similar cooking utensil was used by Tamar (2 Sam. xiii. 9) named **מִשְׁרֵת** (**τῆγανον**), in which she baked the cakes and then emptied them out in a heap (**צָק**, not *poured*, as if it had been broth) before Amnon. A different kind of bread, probably resembling the *flûta* of the Bedouins, a *pasty* substance (Burckhardt's *Notes*, i. 57) was prepared in a saucepan, **מִרְחֶשֶׁת** (**ἄρχαδα**; *oraticula*; *frying-pan*, A. V.; none of which meanings however correspond with the etymological sense of the word, which is connected with *boiling*); this was also reserved for sacred offerings (Lev. ii. 7; vii. 9). As the abovementioned kinds of bread (the last excepted) were thin and crisp, the mode of eating them was by breaking (Lev. ii. 6; Is. lviii. 7; Lam. iv. 4; Matt. xiv. 19, xv. 36, xxvi. 26; Acts xx. 11; comp. Xen. *Anab.* vii. 3, §22, **ἄπρους διέκλα**), whence the **טָמַר**, **פָּרַם**, to break = to give bread (Jer. xvi. 7): the pieces broken for consumption were called **מִלֶּחֶם מֵרֶגֶל** (Matt. xiv. 20; John vi. 12). Old bread is described in Josh. ix. 5, 12, as **crumbled** (**דָּבָק**; Aquil. **ψαθουρωμένος**; *in frusta comminuti*; A. V. "mouldy," following the LXX. **ἐσθιωτῶν καὶ βεβρωμένος**), a term which is also applied (1 K. xiv. 3) to a kind of biscuit, which easily crumbled (**καλλυπτός**; "cracknels," A. V.). [W. M. B.]

BREASTPLATE. [ARMS, p. 111.]

BRETHREN OF JESUS. [BROTHER.]

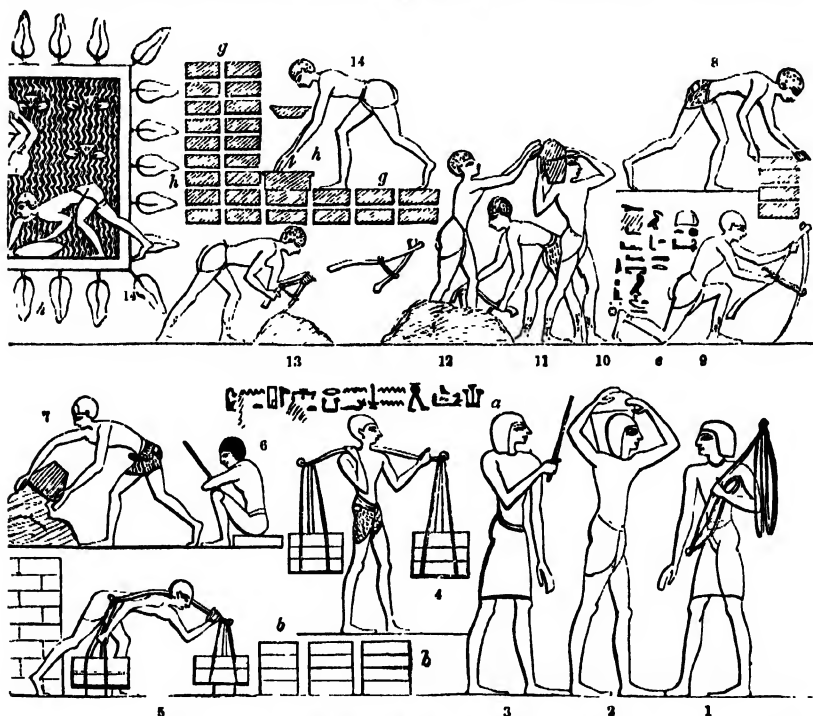

BRICK (**לִבְנָה**, *made of white clay*; **πλῆθος**; *later*; in Ez. iv. 1, A. V., *tile*). Herodotus (i.

179), describing the mode of building the walls of Babylon, says that the clay dug out of the ditch was made into bricks as soon as it was carried up, and burnt in kilns, **καμίνισσι**. The bricks were cemented with hot bitumen (**ἄσφαλτος**), and at every thirtieth row crates of reeds were stuffed in. This account agrees with the history of the building of the Tower of Confusion, in which the builders used brick instead of stone, and slime (**ἰλ**; **ἄσφαλτος**), for mortar (Gen. xi. 3; Joseph. *Ant.* i. 4, §3). In the alluvial plain of Assyria, both the material for bricks and the cement, which bubbles up from the ground, and is collected and exported by the Arabs, were close at hand for building purposes, but the Babylonian bricks were more commonly burnt in kilns than those used at Nineveh, which are chiefly sun-dried like the Egyptian. Xenophon mentions a wall called the wall of Media, not far from Babylon, made of burnt bricks set in bitumen (**πλινθοῖσι σπασίαι ἐν ἄσφαλτῳ κειμέναις**) 20 feet wide, and 100 feet high. Also another wall of brick 50 feet wide (Diod. ii. 7, 8, 12; Xen. *Anab.* ii. 4, §12, iii. 4, §11; Nah. iii. 14; Layard, *Nimrod*, ii. 46, 252, 278). While it is needless to inquire to what place, or to whom the actual invention of brick-making is to be ascribed, there is perhaps no place in the world more favourable for the process, none in which the remains of original brick structures have been more largely used in later times for building purposes. The Babylonian bricks are usually from 12 to 13 in. square, and  $3\frac{1}{2}$  in. thick. (English bricks are usually 9 in. long,  $4\frac{1}{2}$  wide,  $2\frac{1}{2}$  thick.) They most of them bear the name inscribed in cuneiform character, of Nebuchadnezzar, whose buildings, no doubt, replaced those of an earlier age (Layard, *Nin. and Babyl.* pp. 505, 531). They thus possess more of the character of tiles (Ezek. iv. 1). They were sometimes glazed and enamelled with patterns of various colours. Semiramis is said by Diodorus to have overlaid some of her towers with surfaces of enamelled brick bearing elaborate designs (Diod. ii. 8). Enamelled bricks have been found at Nimroud (Layard, ii. 312). Pliny (vii. 56) says that the Babylonians used to record their astronomical observations on tiles (*oculibus laterculis*). He also, as well as Vitruvius, describes the process of making bricks at Rome. There were three sizes, (1.)  $1\frac{1}{2}$  ft. long, 1 ft. broad; (2.) 4 (Greek) palms long, 12-135 in. (3.) 5 palms long, 15-16875 in. The breadth of (2.) and (3.) the same. He says the Greeks preferred brick walls in general to stone (xxxv. 14; Vitruv. ii. 3, 8). Bricks of more than 3 palms length and of less than  $1\frac{1}{2}$  palm, are mentioned by the Talmudists (Ges. s. v.). The Israelites, in common with other captives, were employed by the Egyptian monarchs in making bricks and in building (Ex. i. 14, v. 7). Kiln-bricks were not generally used in Egypt, but were dried in the sun, and even without straw as firm as when first put up in the reigns of the Amunophs and Thothmes whose names they bear. The usual dimensions vary from 20 in. or 17 in. to 14½ in. long;  $8\frac{1}{2}$  in. to 6½ in. wide; and 7 in. to 4½ in. thick. When made of the Nile mud, or alluvial deposit, they required (as they still require) straw to prevent cracking, but those formed of clay taken from the torrent beds on the edge of the desert, held together without straw; and crude brick walls had frequently the additional security of a layer of reeds and sticks, placed at intervals to act as binders (Wilkinson, ii. 194, smaller ed.; Birch, *Ancient Pottery*, i. 14; comp. Her.

i. 179). Baked bricks however were used, chiefly in places in contact with water. They are smaller than the sun-dried bricks (Birch, i. 23). A brick-kiln is mentioned as in Egypt by the prophet Jeremiah (xliii. 9). A brick pyramid is mentioned by Herodotus (ii. 136) as the work of King Asychis. Sesostrius (ii. 138) is said to have employed his captives in building. Numerous remains of buildings of various kinds exist, constructed of sun-dried bricks, of which many specimens are to be seen in the Brit. Mus. with inscriptions indicating their date and purpose (Birch, i. 11, 17). Among the paintings at Thebes, one on the tomb of Rekshara, an officer of the court of Thothmes III. (about 1400 B.C.), represents the enforced labours in brick-making of captives, who are distinguished from the natives by the co-

lour in which they are drawn. Watching over the labourers are "task-masters," who, armed with sticks, are receiving the "tale of bricks" and urging on the work. The processes of digging out the clay, of moulding, and of arranging, are all duly represented, and though the labourers cannot be determined to be Jews, yet the similarity of employment illustrates the Bible history in a remarkable degree (Wilkinson, ii. 197; Birch, i. 19; see Aristoph. *Av.* 1133, *Αἰγύπτιος πλωτοφόρος*; *Ex.* v. 17, 18).

The Jews learned the art of brick-making in Egypt, and we find the use of the brick-kiln in David's time (2 Sam. xii. 31), and a complaint made by Isaiah that the people built altars of brick instead of unhewn stone as the law directed (*Is.* lxxv. 3; *Ex.* xx. 25). [POTTERY.] [H. W. P.]

Foreign captives employed in making bricks at Thebes. (Wilkinson.)

Making bricks with a wooden mould, 4, 5. Fig. 14. Fetching water from the tank, 4. At 4 the bricks (10b) are said to be made at Thebes.

## BRIDE, BRIDEGROOM. [MARRIAGE.]

**BRIDGE.** The only mention of a bridge in the Canonical Scriptures is indirectly in the proper name Geshur (*גֶּשׁוּר*), a district in Bashan, N.E. of the sea of Galilee. At this place a bridge still exists, called the bridge of the sons of Jacob (*Gesen. s. v.*). Absalom was the son of a daughter of the king of Geshur (2 Sam. iii. 3, xiii. 37, xiv. 23, 32). The Chaldee paraphrase renders "gates," in Nahum ii. 6, "bridges," where however dykes or weirs are to be understood, which being burst by inundation, destroyed the walls of Nineveh (*Diod. ii. 27*). Judas Maccabæus is said to have intended to make a bridge in order to besiege the town of Casphor or Caspis,

situate near a lake (2 Mac. xii. 13). Josephus (*Ant.* v. 1, §3), speaking of the Jordan at the time of the passage of the Israelites, says it had never been bridged before, *οὐκ ἔσκευτο πρῶτον*, as if in his own time bridges had been made over it, which under the Romans was the case. (See the notices below.) In *Is.* xxxvii. 25, *הָאֵר, dig for water*, is rendered by LXX. *γέφυρας τρέψου*.

Permanent bridges over water do not appear to have been used by the Israelites in their earlier times, but we have frequent mention made of fords, and of their military importance (*Gen.* xxxii. 22; *Josh.* ii. 7; *Judg.* iii. 28, vii. 24, xii. 5; *Is.* xvi. 2). West of the Jordan there are few rivers of importance (*Amm. Marc.* xiv. 8; *Ireland*, p. 284),

and perhaps the policy of the Jews may have discouraged intercourse with neighbouring tribes, for it seems unlikely that the skill of Solomon's architects was unable to construct a bridge.

Herodotus (i. 186) describes a bridge consisting of stone piers, with planks laid across, built by Nitocris, B.C. circ. 600, connecting the two portions of Babylon (see Jer. li. 31, 32, l. 38), and Diodorus speaks of an arched tunnel under the Euphrates (ii. 9). Bridges of boats are described also by Herodotus (iv. 88, vii. 36; comp. Aesch. *Pers.* 69, *λυδῆσμος σκεδία*), and by Xenophon (*Anab.* ii. 4, §12). A bridge over the Zab, made of wicker-work connecting stone piers, is described by Layard (i. 192), a mode of construction used also in South America.

Though the arch was known and used in Egypt as early as the 15th century B.C. (Wilkinson, ii. 302, *sup.*, Birch, i. 14), the Romans were the first constructors of arched bridges. They made bridges over the Jordan and other rivers of Syria, of which remains still exist (Stanley, 296; Irby and Mangles, 90, 91, 92, 142, 143). A stone bridge over the Jordan, called the Bridge of the daughters of Jacob, is mentioned by B. de la Brocquière, A.D. 1132, and a portion of one by Arculf, A.D. 700 (*Early Trav.* in *Pal.* 8, 300; Burckhardt, *Syria*, 315; Robinson, ii. 441). The bridge (*γεφύρα*) connecting the Temple with the upper city, of which Josephus speaks (*B. J.* vi. 6, §2, *Ant.* xv. 11, 5), seems to have been an arched viaduct (Robinson, i. 288, iii. 224). [H. W. P.]

**BRIERS.** No less than six Heb. words are thus rendered in eleven passages of the O. T. In Heb. vi. 8, it represents *ἀκανθαι*. In the 8th chapter of Judges occurs twice (v. 7, 16) the word בְּרִיקָנִים, which the LXX. render by ταῖς Βαρκενίμ, or Βαρκομυελ, and the A. V. by *briers*. This is probably an incorrect rendering. The word properly means a threshing machine, consisting of a flat square wooden board set with teeth of iron, flint, or fragments of iron pyrites, which are abundant in Palestine. Gesenius conjectures that בְּרִיקָן was the name for *pyrites*, from בְּרִיק, *fulguravit*; and hence that בְּרִיקָנִי = *tribula pyritica munita* = מורֶנֶ (see Robinson, ii. 307).

For חֲרִיק, Mic. vii. 4, and סִלּוֹן, Ez. xxviii. 24, see under THORN.

In Ez. ii. 6, we read "Though briers and thorns be with thee," *briers* representing the Heb. סְרָבִים, which is explained by *rebels* in the margin. The root is סָרַב, *rebellis vel refractarius fuit*, and the rendering should be "Though rebellious men like thorns be with thee."

In Is. lv. 13, we have "instead of the brier shall come up the myrtle-tree," the Heb. word for brier being סִרְפָּד, *sirpad*; *κονίη*; *urtica*. *Κόνυσα* is a strong-smelling plant of the endive kind, *flea-bane*, *Inula helenium*, Linn. (*Arist. H. A.* iv. 8,

28; Diosc. iii. 126). The Peschito has סִרְפָּד, *satureia*, savory, wild thyme, *Thymus Serpyllum*, a plant growing in great abundance in the desert of Sinai according to Burckhardt (*Syr.* ii.). Gesenius rejects both flea-bane and wild thyme on etymological grounds, and prefers *urtica*, nettle, consider-

ing סִרְפָּד to be a compound of סָרַב, *ussit*, and סִרְפָּד, *punctil.* He also notices the opinion of Ewald (*Gram. Crit.* p. 520) that *Sinupi album*, the white-mustard, is the plant meant.

In Is. v. 6, we have mention of briers and thorns as springing up in desolated and wasted lands; and here the Hebrew word is שִׁמְרִי, from root שִׁמַּר, *riguit, horruit* [ADAMANT] (comp. Is. vii. 23, 24, 25, ix. 18, and xxxii. 13. In Is. x. 17, xxvii. 4, שִׁמְרִי is used metaphorically for men. The LXX. in several of these passages have *ἀκανθα*; in one *χόρτος*, in another *ἀγρωστis ἐρηδ.*

There is nothing in the etymology or usage by which we can identify the שִׁמְרִי with any particular species of prickly or thorny plant. Possibly it is a general term for the very numerous plants of this character which are found in the uncultivated lands of the East. [W. D.]

**BRIMSTONE** (בְּרִית; *θεῖον; sulphur*). The Hebrew word is connected with בָּרַח, "gopher-wood." A. V. Gen. vi. 14, and probably signified in the first instance the *gum* or *resin* that exuded from that tree; hence it was transferred to all inflammable substances, and especially to sulphur, a mineral substance found in considerable quantities on the shores of the Dead Sea, as well as in other parts of Palestine. It was one of the elements employed in the destruction of the cities of the plain (Gen. xix. 24), and hence is frequently employed in a metaphorical sense, as expressive of Divine vengeance (Deut. xxix. 23; Job xviii. 15; Is. xxxiv. 9; Ez. xxxviii. 22; Rev. xix. 20, xx. 10, xxi. 8). [W. L. B.]

**BROTHER** (אָח; *ἀδελφός*). The Hebrew word is used in various senses in the O. T. as 1. Any kinsman, and not a mere brother; e.g. nephew (Gen. xiv. 16, xiii. 8), husband (Cant. iv. 9). 2. One of the same tribe (2 Sam. xix. 13). 3. Of the same people (Ex. ii. 11), or even of a cognate people (Num. xx. 14). 4. An ally (Am. i. 9). 5. Any friend (Job v. 15). 6. One of the same office (1 K. ix. 13). 7. A fellow man (Lev. xix. 17). 8. Metaphorically of any similarity. It is a very favourite Oriental metaphor, as in Job xxx. 19, "I am become a brother to the jackals" (Gesen. s. v.).

The word *ἀδελφός* has a similar range of meanings in the N. T., and is also used for a disciple (Matt. xxv. 40, &c.); a fellow-worker, as in St. Paul's *Epp.* passim; and especially a Christian. Indeed, we see from the Acts that it was by this name that Christians usually spoke of each other. The name Christian was merely used to describe them objectively, i.e. from the Pagan point of view, as we see from the places where it occurs, viz. Acts [xi. 26], xxvi. 28, and 1 Pet. iv. 16.

The Jewish schools distinguish between "brother" and "neighbour;" "brother" meant an Israelite by blood, "neighbour" a proselyte. They allowed neither title to the Gentiles; but Christ and the Apostles extended the name "brother" to all Christians, and "neighbour" to all the world, 1 Cor. v. 11; Luke x. 29, 30 (Lightfoot, *Hor. Hebr. ad Matt.* v. 22).

We must now briefly touch on the difficult and interesting question as to who were "the brethren of the Lord," and pass in review the theories respecting them. And first we would observe that in arguing at all against their being the *real* brethren

of Jesus, far too much stress has been laid on the assumed indefiniteness of meaning attached to the word "brother" in Scripture. In all the adduced cases it will be seen that, when the word is used in any but its proper sense, the context prevents the possibility of confusion; and indeed in the only two exceptional instances (not metaphorical), viz. those in which Lot and Jacob are respectively called "brothers" of Abraham and Lahan, the word is only extended so far as to mean "nephew;" and it must be remembered that even these exceptions are quoted from a single book, seventeen centuries earlier than the gospels. If then the word "brethren," as repeatedly applied to James, &c. really mean "cousins" or "kinsmen," it will be the *only* instance of such an application in which no data are given to correct the laxity of meaning. Again, no really parallel case can be quoted from the N. T., except in merely rhetorical and tropical passages; whereas when "nephews" are meant they are always specified as such, as in Col. iv. 10; Acts xvii. 16 (Kitto, *The Apostles*, &c., p. 165, sq.). There is therefore no adequate warrant in the language alone, to take "brethren" as meaning "relatives;" and therefore the *à priori* presumption is in favour of a literal acceptance of the term. We have dwelt the more strongly on this point, because it seems to have been far too easily assumed that no importance is to be attached to the mere fact of their being *invariably* called Christ's brethren; whereas this consideration alone goes far to prove that they really were so.

There are however three traditions respecting them. They are first mentioned (Matt. xiii. 56) in a manner which would certainly lead an unbiased mind to conclude that they were our Lord's uterine brothers. "Is not this the carpenter's son? is not *his mother* called Mary? and *his brethren* James, and Joses, and Judas, and Simon? and *his sisters*, are they not all with us?" But since we find that there was a "Mary, the mother of James and Joses" (Matt. xxviii. 36), and that a "James and Judas (?)" were sons of Alphaeus (Luke vi. 15, 16), the most general tradition is—1. That they were all our Lord's first cousins, the sons of Alphaeus (or Clopas—not Cleopas, see Alford, *Gk. Test.* Matt. x. 3) and Mary, the sister of the Virgin. This tradition is accepted by Papias, Jerome (*Cat. Script. Ecc.* 2), Augustine, and the Latin Church generally, and is now the one most commonly received. Yet there seem to be overwhelming arguments against it: for (1.) The reasoning entirely depends on three very doubtful assumptions, viz. *a.* that "his mother's sister" (John xix. 25) must be in apposition with "Mary, the wife of Cleophas," which would be improbable, if only on the ground that it supposes two sisters to have had the same name, a supposition substantiated by no parallel cases [Wieseler (comp. Mark xv. 40) thinks that Salome, the wife of Zebedee, is intended by "his mother's sister"]. *b.* that "Mary, the mother of James" was the wife of Alphaeus, *i. e.* that the James intended is Ἰάκωβος ὁ Ἀλφαίου. *c.* That Cleophas, or more correctly Clopas, whose wife Mary was, is identical with Alphaeus; which may be the case, although it cannot be proved. (2.) If his cousins were meant, it would be signally untrue that "neither did his brethren believe on him" (John vii. 5 sq.), for in all probability three out of the four (viz. James the Less, Matthew (or Levi), and Jude, the brother (?) of James) were actual *Apostles*. We do not see how this objection can be

removed. (3.) It is quite unaccountable that these "brethren of the Lord," if they were only his cousins, should be always mentioned in conjunction with the Virgin Mary, and never with their own mother Mary, who was both alive and in constant attendance on our Lord. (4.) They are generally spoken of as *distinct from* the Apostles; see Acts i. 14; 1 Cor. ix. 15; and Jude (17) seems to clearly imply that he himself was not an Apostle. It seems to us that these four objections are quite adequate to set aside the very slight grounds for identifying the "brethren of the Lord" with the "sons of Alphaeus."

II. A second tradition accepted by Hilary, Epiphanius, and the Greek fathers generally, makes them the sons of Joseph by a former marriage with a certain Escha or Salome of the tribe of Judah; indeed Epiphanius (*Hæres.* 29, §4) even mentions the supposed order of birth of the 4 sons and 2 daughters. But Jerome (*Comm. in Matt.* xii. 49) slights this as a mere conjecture, borrowed from the "decrementa Apocryphorum," and Origen says that it was taken from the Gospel of St. Peter. The only shadow of ground for its possibility is the apparent difference of age between Joseph and the Virgin.

III. They are assumed to have been the offspring of a levirate marriage between Joseph and the wife of his deceased brother Clopas. But apart from all evidence, it is obviously idle to examine so arbitrary an assumption.

The arguments *against* their being the sons of the Virgin after the birth of our Lord, are founded on—(1.) The almost constant tradition of her *ἀειπαρθενία*. St. Basil (*Serm. de S. Nativ.*) even records a story that "Zachary was slain by the Jews between the porch and the altar" for affirming her to be a Virgin *after*, as well as before the birth of her most holy Son (Jer. Taylor, *Duct. Dubit.* II. 3, 4). Still the tradition was *not* universal: it was denied, for instance, by large numbers called Antidicomarianitæ and Helvidiani. To quote Ezek. xlv. 2 as any *argument* on the question is plainly absurd. (2.) On the fact that on the cross Christ commended his mother to the care of *St. John*; but this is easily explicable on the ground of his brethren's apparent disbelief in Him at that time, though they seem to have been converted very soon afterwards. (3.) On the identity of their names with those of the sons of Alphaeus. This argument loses all weight, when we remember the constant recurrence of names in Jewish families, and the extreme commonness of these particular names. In the N. T. alone there may be at least five contemporary Jameses, and several Judes, not to mention the 21 Simons, 17 Joses, and 16 Judes mentioned by Josephus.

On the other hand, the arguments for their being our Lord's uterine brothers are numerous, and, *taken collectively*, to an unprejudiced mind almost irresistible, although singly they are open to objections: *a. g.* (1.) The word *παρδρόνος υἱός*, Luke ii. 7. (2.) Matt. i. 25, *οὐκ ἐγγίνωσκεν αὐτῇ υἱὸς οὐ ἔτεκεν*, κ.τ.λ., to which Alford justly remarks, only one meaning could have been attached but for preconceived theories about the *ἀειπαρθενία*. (3.) The general tone of the gospels on the subject, since they are *constantly* spoken of *with* the V. Mary, and with no shadow of a hint that they were not her own children (Matt. xii. 46; Mark iii. 31, &c.). It can we think be hardly denied that any one of these arguments is singly stronger than those produced on the other side.

To sum up then, we have seen (I.) that "the brethren of the Lord" could hardly have been identical with the sons of Alphaeus, and (II.) that we have no grounds for supposing them to have been the sons of Joseph by a previous, or (III.) a levirate marriage; that the arguments in favour of their being actual brothers of our Lord are cogent, and that the tradition on the other side is not sufficiently weighty or unanimous to set them aside. Finally, this tradition of the perpetual virginity of the mother of our Lord (which any one may hold, if he will, as one of the "pie credibilia," Jer. Taylor, *Duct. Dub.* II. 3, 6) is easily accounted for by the general error on the inferiority of the wedded to the virgin state: Scripture in no way requires us to believe it, and since Mary's previous virginity is alone requisite to the Gospel narrative, we must regard it as a question of mere curiosity. [JAMES; JESUS; JUDE] (Pearson, *On the Creed*, Art. III. and notes; Kuinoel and Alford on *Matt.* xiii. 56; Lightfoot, *Hor. Hebr. Matt.* v. 22, &c., &c.). [F. W. F.]

## BUBASTIS. [PIBSETHL]

BUK'KI (בֻּקִּי; *Bokki* and *Bokai*; *Bocci*). 1. Son of Abishua and father of Uzzi, fifth from Aaron in the line of the high-priests in 1 Chr. v. 31, vi. 36 (vi. 5, 51, A. V.), and in the genealogy of Ezra, *Ezra*. vii. 4, and 1 Esdr. viii. 2, where he is called *Bokkai*, *BOCCAS*, which is corrupted to *BORITII*, 2 Esdr. i. 2. Whether Bukki ever filled the office of high-priest, we are not informed in Scripture. Epiphanius in his list of the ancestors of Jehoiada, whom he fancifully supposes to be brother of Elijah the Tishbite, omits both Bukki and Abishua (*Advers. Melchizedec.* iii.). Josephus (*Ant.* viii. 1, §3) expressly says that all of Aaron's line between Joseph (Abishua) the high-priest, and Zadok who was made high-priest in the reign of David, were private persons (*idiautouoantes*) i. e. not high-priests, and mentions by name "Bukki the son of Joseph the high-priest," as the first of those who lived a private life, while the pontifical dignity was in the house of Ithamar. But in v. 11, §5 Josephus says as expressly that Abishua (there called Abiezer) having received the high-priesthood from his father Phinehas, transmitted it to his own son Bukki, who was succeeded by Uzzi, after whom it passed to Eli. We may conclude therefore that Josephus had no more means of knowing for certain who were high-priests between Phinehas and Eli, than we have, and may adopt the opinion, which is far the most probable, that there was no high-priest between them, unless perhaps Abishua. For an account of the absurd fancies of the Jews, and the statements of Christian writers relative to the succession of the high-priests at this period, see Selden, *de Success. in Pontif. Hebr.*; also *Genealog. of our Lord*, ch. x. [A. C. H.]

2. Son of Jogli, "prince" (יְנִישִׁי) of the tribe of Dan, one of the ten men chosen to apportion the land of Canaan between the tribes (*Num.* xxiv. 22). (בֻּקִּיָּה, Alex. *Bokki*; *Bocci*.)

BUKKI'AH (בֻּקִּיָּה, *Bukkijahu*; *Bouklas*, Alex. *Bokelas*; *Boccianus*), a Kohathite Levite, of the sons of Heman, one of the musicians in the Temple, the leader of the sixth band or course in the service (1 Chr. xxv. 4, 13).

\* The "princes" are only specified to seven tribes out of the ten: not to Judah, Simeon, or Benjamin.

## BUL. [MONTHS.]

BULLI, BULLOCK, terms used synonymously with ox, oxen, in the A. V. as the representatives of several Hebrew words. Twice in the N. T. as the rendering of ταύρος, *Heb.* ix. 13, x. 4.

בֶּקָר is properly a generic name for horned cattle when of full age and fit for the plough. Accordingly it is variously rendered *bullock* (*Is.* lxiv. 25), *cow* (*Ex.* iv. 15), *oxen* (*Gen.* xii. 16). Hence in *Deut.* xxi. 3, בֶּקָרָהּ is a *heifer*; *Ex.* xix. 1, בֶּקָרָהּ, a *young bullock*; and in *Gen.* xviii. 7, simply בֶּקָרָהּ; rendered a *calf* in A. V. It is derived from an unused root, בָּקַר, to *clear*, hence to *plough*, as in Latin *armentum* is *aramentum*.

שֶׁן differs from בֶּקָר in the same way as שֶׁן, a *sheep*, from שָׂן, a *flock* of sheep. It is a generic name, but almost always signifies *one head of horned cattle*, without distinction of age or sex. It is very seldom used collectively. The Chaldee form of the word, שֶׁן, occurs in *Ezra*. vi. 9, 17, vii. 17; *Dan.* iv. 25, &c.; and *Plutarch* (*Sull.* c. 17) says Θῆρ of Φοίνικες τὴν βοὴν καλοῦσι. It is probably the same word as ταύρος, *taurus*, *German* *stier*; *Engl.* *steer*. The root שֶׁן is not used, but

the Arab. شَرَّ, *excitavit pulverem*, is a very natural derivation of the word.

עֵגֶל-עֵגֶל, a *calf, male or female, property of the first year*, derived, as Gesenius thinks, from an Aethiopic word signifying *fetus, embryo, pullus, vatulus*, while others derive it from עָגַל, *rotavit, rotavit, festinavit*. The word is used of a trained heifer (*Hos.* x. 11), of one giving milk (*Is.* vii. 21, 22), of one used in ploughing (*Judg.* xiv. 18), and of one three years old (*Gen.* xv. 9). Almost synonymous with עֵגֶל is פָּר, the latter signifying generally a young bull of two years old, though in one instance (*Judg.* vi. 25) possibly a bull of seven years old. It is the customary term for bulls offered in sacrifice, and hence is used metaphorically in *Hos.* xiv. 3, "so will we render, 'as bullocks, our lips'."

There are four or five passages in which the word עֵגֶל is used for *bulls*. It is the plural of עֵגֶל, *strong*, whence its use. See *Ps.* xxii. 13, l. 11; *Is.* xxxiv. 7; *Jer.* l. 11.

All the above words refer to domesticated cattle, which formed of old, as now, an important part of the wealth of the people of Palestine. In *Is.* li. 20, the word מִלֵּךְ occurs, and is rendered "wild bull" but "wild ox" in *Deut.* xiv. 5. The LXX. have σαρδαν in the former passage and θύρα in the latter. It was possibly one of the larger species of antelope, and took its name from its swiftness—the

Arabic عَرَب being *cursu anteverit*. The *Antelope Oryx* of Linnæus is indigenous in Syria, Arabia, and Persia. Dr. Robinson mentions large herds of black and almost hairless buffaloes as still existing in Palestine, and these may be the animal indicated (*iii.* 396). [W. D.]

BULRUSH, used synonymously with *Rush* in the A. V. as the rendering of the words אֲנָחַן and אֲנָחַל. In *Is.* ix. 13, xix. 15, we have the

proverbial expression **בִּנְיָן וְרֹשֶׁת**, A. V. "branch and rush," equivalent to high and low alike (the LXX. have *μέγαν καὶ μικρον* in one passage, *ἀρχὴν καὶ τέλος* in the other), and in Is. lviii. 5, **בִּנְיָן** is rendered *bulrush*. The word is derived from **בִּנְיָן**, *marsh*, because the bulrush grows in marshy ground. The root **בִּנְיָן** is not in use, but we have

the cognate Arab. verb **بَنَى**, *tepida fuit aqua, corrupta, stagnans*. The bulrush was platted into ropes, as appears from Job xli. 2, where **בִּנְיָן** = *funis junceus* (see Bochart. *Hieroz.* ii. p. 772); comp. Plin. H. N. xix. 2, "*junco Græcos ad funes usos, nomini credamus, quo herbam eam appellant.*" The LXX. have *κρίνον* in Is. lviii. 5, and also in Job xli. 2.

**בִּנְיָן**, translated *bulrush*, occurs in Ex. ii. 3; Is. xviii. 2; translated *rush* in Job viii. 11, and Is. xxxv. 7. It is the Hebrew name of the *Papyrus Niloticus*, which was called so from its quality of absorbing water, the root being **בִּנְיָן**, *sorpsit, hausit*. The Egyptians used this plant for garments, shoes, baskets, various kinds of utensils, and especially for boats. It was the material of the ark in which Moses was exposed, and of it the vessels mentioned in Is. xviii. 2, were formed. This practice is referred to by Lucan (iv. 136), "*Conserisit bibula Memphis cymba papyro,*" and by Pliny (xiii. 11. s. 22) "*Ex ipso quidem papyro navigia texunt.*" (Comp. Cels. *Hierob.* ii. 137-152.) In Job viii. 11, the LXX. have *πάρπος*. [W. D.]

**BUNAH** (**בִּנְיָן**; *Bavad; Huna*), a son of Jerahmeel, of the family of Pharez in Judah (1 Chr. ii. 25).

**BUN'NI**. 1. (**בִּנְיָן**; *Bonni, Boni*), one of the Levites in the time of Nehemiah (Neh. ix. 4); possibly the same person is mentioned in x. 15. The LXX. in both cases translate the name by *vids*.

2. Another Levite, but of earlier date than the preceding (Neh. xi. 15). The name, **בִּנְיָן**, is also slightly different. LXX. omits.

3. Bunni is said to have been the Jewish name of Nikodemus (Lightfoot on John iii. 1; Ewald, v. 233).

**BURIAL, SEPULCHRES, TOMBS**. The Jews uniformly disposed of the corpse by entombment where possible, and failing that, by interment; extending this respect to the remains even of the slain enemy and malefactor (1 K. xi. 15; Deut. xxi. 23), in the latter case by express provision of law. Since this was the only case so guarded by Mosaic precept, it may be concluded that natural feeling was relied on as rendering any such general injunction superfluous. Similarly, to disturb remains was regarded as a barbarity, only justifiable in the case of those who had themselves outraged religion (2 K. xxiii. 16, 17; Jer. viii. 1, 2). The Rabbis quote the doctrine "dust thou art, and unto dust shalt thou return," as a reason for preferring to entomb or inter their dead; but that preferential practice is older than the Mosaic record, as traceable in patriarchal examples, and continued unaltered by any Gentile influence; so Tacitus (*Hist.* v. 5) notices that it was a point of Jewish custom, *corpora condere quam cremare*.

On this subject we have to notice: 1. the place of burial, its site and shape; 2. the mode of burial; 3. the prevalent notions regarding this duty.

1. A natural cave enlarged and adapted by excavation, or an artificial imitation of one, was the standard type of sepulchre. This was what the structure of the Jewish soil supplied or suggested. A distinct and simple form of sepulchre as contrasted with the complex and elaborate rites of Egypt clings to the region of Palestine and varies but little with the great social changes between the periods of Abrahah and the captivity. Jacob and Joseph, who both died in Egypt, are the only known instances of the Egyptian method applied to patriarchal remains. Sepulchres, when the owner's means permitted it, were commonly prepared beforehand, and stood often in gardens, by roadsides, or even adjoining houses. Kings and prophets alone were probably buried within towns (1 K. ii. 10, xvi. 6, 28; 2 K. x. 35, xij. 9; 2 Chr. xvi. 14, xxviii. 27; 1 Sam. xxv. 1, xxviii. 3). Sarah's tomb and Rachel's seem to have been chosen merely from the accident of the place of death; but the successive interments at the former (Gen. xlix. 31) are a chronicle of the strong family feeling among the Jews. It was the sole fixed spot in the unsettled patriarchal life; and its purchase and transfer, minutely detailed, are remarkable as the sole transaction of the kind, until repeated on a similar occasion at Shechem. Thus it was deemed a misfortune or an indignity, not only to be deprived of burial (Is. xiv. 20; Jer. passim; 2 K. ix. 10), but in a lesser degree to be excluded from the family sepulchre (1 K. xiii. 22), as were Uzziah the royal leper, and Manasseh (2 Chr. xvi. 23, xxxiii. 20). Thus the remains of Saul and his sons were reclaimed to rest in his father's tomb. Similarly it was a mark of a profound feeling towards a person not of one's family to wish to be buried with him (Ruth i. 17; 1 K. xiii. 31), or to give him a place in one's own sepulchre (Gen. xliii. 6; comp. 2 Chr. xxiv. 16). The head of a family commonly provided space for more than one generation; and these galleries of kindred sepulchres are common in many eastern branches of the human race. Cities soon became populous and demanded cemeteries (comp. the term *ποταμὸς θείων*, Ez. xxxix. 15), which were placed without the walls; such an one seems intended by the expression in 2 K. xxiii. 6, "the graves of the children of the people," situated in the valley of the Kedron or of Jehoshaphat. Jeremiah (vii. 32, xix. 11) threatens that the eastern valley called Tophet, the favourite haunt of idolatry, should be polluted by burying there (comp. 2 K. xxiii. 16). Such was also the "Potter's Field" (Matt. xxvii. 7), which had perhaps been wrought by digging for clay into holes serviceable for graves.

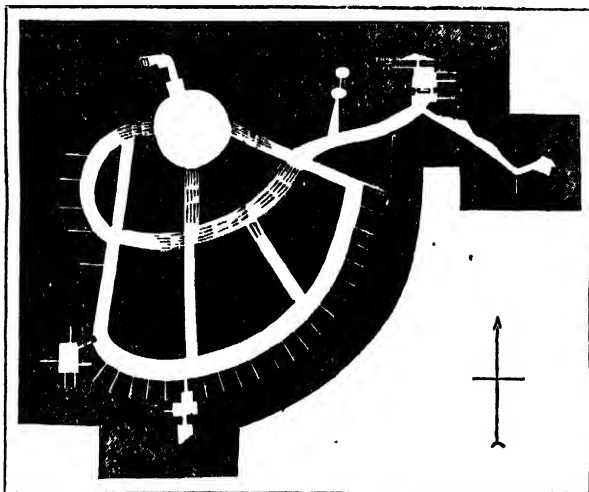

The Mishnaic description of a sepulchre, complete according to Rabbinical notions, is somewhat as follows: a cavern about 6 cubits square, or 6 by 8, from three sides of which are recessed longitudinally several vaults, called **כְּבוֹתִים**, each large enough for a corpse. On the fourth side the cavern is approached through a small open covered court, or portico **מִדְּלָתוֹ**, of a size to receive the bier and bearers. In some such structures the demoniac may have housed. The entry from this court to that cavern was closed by a large stone called **סֶלֶק**, as capable of being rolled, thus confirming the Evangelistic narrative. Sometimes several such caverns, each with its recesses, were entered from the several sides of the same portico. (Mishna, Bava

Batra, 6, 8, quoted by J. Nicolaus *de sepulchris Hebraeorum*.) Such a tomb is that described in Buckingham's *Travels in Arabia* (p. 158), and those known to tradition as the "tombs of the kings" (see below). But earlier sepulchres were doubtless more simple, and, to judge from 2 K. xiii. 21, did not prevent mutual contact of remains. Sepulchres were marked sometimes by pillars, as that of Rachel, or by pyramids as those of the Asmoneans at Modin (Joseph. *Ant.* xiii. 6, 7), and had places of higher and lower honour. Like temples, they were, from their assumed inviolability, sometimes made the depositories of treasures (De Saulcy, ii. 183). We find them also distinguished by a "title" (2 K. xxiii. 17). Such as were not otherwise noticeable were scrupulously "whited" (Matt. xxiii. 27) once a year, after the rains before the passover, to warn passers by of deilement (*Cippi Hebr.* Hottinger, p. 1034; Rossteusch *de sepul. calce notat.* Ugolini, xxxii.).

2. With regard to the mode of burial, we should remember that our impressions, as derived from the O. T., are those of the burial of persons of rank or public eminence, whilst those gathered from the N. T. regard a private station. But in both cases "the manner of the Jews" included the use of spices, where they could command the means. Thus Asa lay in a "bed of spices" (2 Chr. xvi. 14). A portion of these were burnt in honour of the deceased, and to this use was probably destined part of the 100 pounds weight of "myrrh and aloes" in our Lord's case. On high state occasions the vessels, bed, and furniture used by the deceased were burnt also. Such was probably the "great burning" made for Asa. If a king was unpopular or died disgraced (e. g. Jehoram, 2 Chr. xxxi. 19; Joseph. *Ant.* ix. 5, §3), this was not observed. In no case, save that of Saul and his sons, were the bodies burned, nor in that case were they so burnt as not to leave the "bones" easily concealed and transported, and the whole proceeding looks like a hasty precaution against hostile violence. Even then the bones were interred, and re-exhumed for solemn entombment. The ambiguous word in Am. vi. 10, מַסְרֵפוֹ, rendered in the A. V. "he that burneth him," probably means "the burner of perfumes in his honour," i. e. his near relation, on whom such duties devolved; not, as Winer (*s. v. Begraben*) and others think, "the burner of the corpse." For a great mortality never causes men to burn corpses where it is not the custom of the country; nor did the custom vary among the Jews on such an occasion (Ez. xxxix. 12-14). It was the office of the next of kin to perform and preside over the whole funeral office; but a company of public buriers, originating in an exceptional necessity (Ez. i. c.), had become, it seems, customary in the times of the N. T. (Acts v. 6, 10). The closing of the eyes, kissing, and washing the corpse (Gen. xli. 4, l. 1; Acts iv. 37), are customs common

to all nations. Coffins were but seldom used, and if used were open; but fixed stone sarcophagi were common in tombs of rank. The bier, the word for which in the O. T. is the same as that rendered bed [see BED], was borne by the nearest relatives, and followed by any who wished to do honour to the dead. The grave-clothes (δένδια, ἐντάφια) were probably of the fashion worn in life, but swathed and fastened with bandages, and the head covered separately. Previously to this being done, spices were applied to the corpse in the form of ointment, or between the folds of the linen; hence our Lord's remark, that the woman had anointed his body, πρὸς τὸ ἐνταφιάζειν, "with a view to dressing it in these ἐντάφια;" not, as in A. V. "for the burial." For the custom of mourners visiting the sepulchre see MOURNING; for that of frequenting tombs for other purposes, see NECROMANCY.

3. The precedent of Jacob's and Joseph's remains being returned to the land of Canaan was followed, in wish at least, by every pious Jew. Following a similar notion, some of the Rabbins taught that only in that land could those who were buried obtain a share in the resurrection which was to usher in Messiah's reign on earth. Thus that land was called by them "the land of the living," and the sepulchre itself, "the house of the living." Some even feigned that the bodies of the righteous, wherever else buried, rolled back to Canaan underground, and found there only their appointed rest (J. Nicolaus, *de sepult. Heb.* xiii. 1). Tombs were, in popular belief, led by the same teaching, invested with traditions. Thus Machpelah is stated (Lightfoot, *Centuria Chorographia*, s. v. Hebron) to have been the burial-place not only of Abraham and Sarah, but also of Adam and Eve; and there was probably at the time of the N. T. a spot fixed upon by tradition as the site of the tomb of every prophet of note in the O. T. To repair and adorn these was deemed a work of exalted piety (Matt. xxiii. 29). The scruples of the Scribes extended even to the burial of the ass whose neck was broken (Ex. xxxiv. 20), and of the first-born of cattle. (R. Maimon, *de primogen.* ch. iii. §4, quoted by J. Nicolaus, *de sepult. Heb.* xvi. 3, 4.) [H. H.]

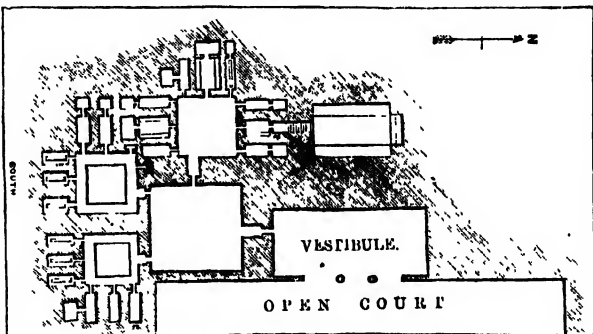

Plan of the Tombs called "Tomb of the Prophets."

The neighbourhood of Jerusalem is thickly studded with tombs, many of them of great antiquity. A succinct but valuable account of them is given in Porter's *Handbook* (p. 143, sq.); but it is only necessary in this article to refer to two or three of the most celebrated. The so-called "Tombs of the Prophets" will be best explained by the preceding plan, taken from Porter (p. 147), and of which he gives the following description:—

"Through a long descending gallery, the first part of which is winding, we enter a circular chamber about 24 ft. in diameter and 10 high, having a hole in its roof. From this chamber two parallel galleries, 10 ft. high and 5 wide, are carried southwards through the rock for about 60 ft., a third diverges S.E., extending 40 ft. They are connected by two cross-galleries in concentric curves, one at their extreme end, the other in the middle. The outer one is 115 ft. long and has a range of thirty niches on the level of its floor, radiating outwards. Two small chambers, with similar niches, also open into it."

The celebrated "Tombs of the Kings" have received this name on account of their remarkable character; but they are supposed by Robinson and Porter to be the tomb of Helena, the widowed queen of Monobazus king of Adiabene. She became a proselyte to Judaism, and fixed her residence at Jerusalem, where she relieved many of the poor during the famine predicted by Agabus in the days of Claudius Caesar (Acts xi. 28), and built for herself a tomb, as we learn from Josephus. (On Helena and her tomb see Joseph. *Ant.* xx. 2 §1, sq., 4, §3; *B. J.* v. 2, §2, 4, §2; Paus. viii. 16, §5; Robinson, i. 361, sq.) Into the question of the origin of these tombs it is, however, unnecessary to enter; but their structure claims our attention. They are excavated out of the rock. The traveller passes through a low arched doorway into a court 92 ft. long by 87 wide. On the western side is a vestibule or porch 39 ft. wide. The open front was supported by two columns in

the middle. Along the front extend a deep frieze and cornice, the former richly ornamented. At the southern side of the vestibule is the entrance to the tomb. The first room is a mere antechamber 18½ ft. by 19. On the S. side are two doors leading to other chambers, and on the W. one. These three chambers have recesses, running into the walls at right angles, and intended for bodies. (For further particulars see Porter, from whose *Handbook* the preceding account is taken.)

Plan of the Tombs called "Tombs of the Kings."

The so-called "Tomb of Zachariah," said to have been constructed in honour of Zachariah, who was slain "between the temple and the altar" in the

The so-called "Tomb of Zachariah." (From Photograph.)

reign of Joash (2 Chr. xxiv. 21; Matt. xxiii. 35), is held in great veneration by the Jews. It is doubtful, however, whether it be a tomb at all, and the style of architecture can scarcely be earlier than our era. A drawing of it is inserted here on account of its celebrity. It bears a considerable resemblance to the so-called tomb of Absalom which is figured on p. 14.

**BURNT-OFFERING** (חֶלֶב or חֶלֶבֶת, and in poetical passages חֶלֶבֶת, i.e. "perfect," *δολοκρπαστος* (Gen.), *δολοκαύτωμα* (Ex. and Lev., &c. LXX.;

Front of the Vestibule of the Tombs called "Tombs of the Kings." (From Photograph.)

*δολοαύρωμα*, N. T.; *holocaustum*, Vulg.). The original derivation of the word *עֹלָה* is from the root *עָלָה* "ascends;" and it is applied to the offering, which was wholly consumed by fire on the altar, and the whole of which, except the refuse ashes, "ascended" in the smoke to God. It corresponds therefore in sense, though not exactly in form, to the word *δολοαύρωμα*, "whole burnt-offering," from which the name of the sacrifice in modern languages is taken. Every sacrifice was in part "a burnt-offering," because, since fire was the chosen manifestation of God's presence, the portion of each sacrifice especially dedicated to Him was consumed by fire. But the term is generally restricted to that which is properly a "whole burnt-offering," the whole of which was so offered and so consumed.

The burnt-offering is first named in Gen. viii. 20, as offered after the Flood. (In iv. 4 we find the more general word *מִנְחָה* "offering," a word usually applied to unbloody sacrifices, though in the LXX. and in Heb. xi. 4 translated by *θυσία*.) Throughout the whole of the book of Genesis (see xv. 9, 17, xxi. 2, 7, 8, 13) it appears to be the only sacrifice referred to; afterwards it became distinguished as one of the regular classes of sacrifice under the Mosaic law.

Now all sacrifices are divided (see Heb. v. 1) into "gifts" and "sacrifices-for-sin" (i. e. eucharistic and propitiatory sacrifices), and of the former of these the burnt-offering was the choicest specimen. Accordingly (in Ps. xl. 8, 9, quoted in Heb. x. 5) we have first (in ver. 8) the general opposition, as above, of sacrifices (*θυσίαι*) (propitiatory), and offerings (*προσφοραί*), and then (in ver. 9) "burnt-offering," as representing the one, is opposed to "sin-offering," as representing the other. Similarly in Ex. x. 25 (less precisely) "burnt-offering" is contrasted with "sacrifice." (So in 1 Sam. xv. 22; Ps. l. 8; Mark xii. 33.) On the other hand, it is distinguished from "meat-offerings" (which were unbloody), and from "peace-offerings" (both of the eucharistic kind), because only a portion of them were consumed. (See 1 K. iii. 15, viii. 64, &c.)

The meaning therefore of the whole burnt-offering was that which is the original idea of all sacrifice, the offering by the sacrificer of himself, soul and body, to God, the submission of his will to the Will of the Lord. See Ps. xl. 10, li. 17, 19, and compare the more general treatment of the subject under the word SACRIFICE. It typified (see Heb. v. 1, 3, 7, 8) our Lord's offering (as especially in the temptation and the agony), the perfect sacrifice of His own human will to the Will of His Father. As that offering could only be accepted from one either sinless or already purified from sin, therefore the burnt-offering (see Ex. xxix. 36, 37, 38; Lev. viii. 14, 18, ix. 8, 12, xvi. 3, 5, &c.) was always preceded by a sin-offering. So also we Christians, because the sin-offering has been made once for all for us, offer the continual burnt-offering of ourselves, "as a living sacrifice, holy and acceptable to the Lord." (See Rom. xii. 1.)

In accordance with this principle it was enacted that with the burnt-offering a "meat-offering" (of

flour and oil) and "drink-offering" of wine should be offered, as showing that, with themselves, men dedicated also to God the chief earthly gifts with which He had blessed them. (Lev. viii. 18, 22, 26, ix. 16, 17, xiv. 20; Ex. xxix. 40; Num. xxviii. 4, 5.)

The ceremonial of the burnt-offering is given in detail in the book of Leviticus. The animal was to be a male unblemished, either a young bullock, ram, or goat, or, in case of poverty, a turtle-dove or pigeon. It was to be brought by the offerer "of his own voluntary will," and slain by himself, after he had laid his hand upon its head, to make it his own representative, on the north side of the altar. The priest was then to sprinkle the blood upon the altar,\* and afterwards to cut up and burn the whole victim, only reserving the skin for himself. The birds were to be offered similarly, but not divided. (See Lev. i., vii. 8, viii. 18-21, &c.) It will be observed how all these ceremonies were typical of the meaning described above, and especially how emphatically the freedom of will in the sacrificer is marked.

The burnt-offering being thus the rite which represented the normal state and constant duty of man, when already in covenant with God,<sup>b</sup> was the one kind of sacrifice regularly appointed. Thus there were, as *public burnt-offerings*—

1st. *The daily burnt-offering*, a lamb of the first year, sacrificed every morning and evening (with an offering of flour and wine) for the people (Ex. xxix. 38-42; Num. xxviii. 3-8).

2ndly. *The Sabbath burnt-offering*, double of that which was offered every day (Num. xxviii. 8-10).

3rdly. *The offering at the new moon, at the three great festivals, the great Day of Atonement, and feast of trumpets*: generally two bullocks, a ram, and seven lambs. (See Num. xxviii. 11-xxix. 39.)

*Private burnt-offerings* were appointed at the consecration of priests (Ex. xxix. 15; Lev. viii. 18, ix. 12), at the purification of women (Lev. xii. 6, 8), at the cleansing of the lepers (Lev. xiv. 19), and removal of other ceremonial uncleanness (xv. 15, 30), on any accidental breach of the Nazarite vow, or at its conclusion (Num. vi.; comp. Acts xxi. 26), &c.

But *freewill burnt-offerings* were offered and accepted by God on any solemn occasions, as, for example, at the dedication of the tabernacle (Num. vii.) and of the temple (1 K. viii. 64), when they were offered in extraordinary abundance. But, except on such occasions, the nature, the extent, and the place of the sacrifice were expressly limited by God, so that, while all should be unblemished and pure, there should be no idea (as among the heathen) of buying His favour by costliness of sacrifice. Of this law Jephthah's vow was a transgression, consistent with the semi-heathenish character of his early days (see Judg. xi. 3, 24). The sacrifice of cows in 1 Sam. vi. 14 was also a formal infraction of it, excused by the probable ignorance of the people, and the special nature of the occasion.

[A. B.]

BUSHEL. [MEASURES.]

\* It is clear that in this ceremony the burnt-offering touched closely on the propitiatory or sin-offering; although the solemnity of the blood-sprinkling in the latter was much greater, and had a peculiar significance. It is, of course, impossible that the forms of sacrifices should be rigidly separated, because the

ideas which they enshrine, though capable of distinction, are yet inseparable from one another.

<sup>b</sup> This is remarkably illustrated by the fact that heathens were allowed to offer burnt-offerings, and that Augustus ordered two lambs and a bullock to be offered for him every day (Joseph. B. J. ii. 17, §2).

**BUTTER** (חֶמֶן, *chem'hân*; *Βούτυρον*, *butyrun*), curdled milk, as distinguished from חֶלֶב, *fresh milk*; hence *curds*, *butter*, and in one place probably *cheese*. It comes from an unused

root, חֶמֶן = Arab. حَمَّ, *spissum fuit lac*. In Gen. xviii. 8, *butter and milk* are mentioned among the things which Abraham set before his heavenly guests (comp. Judg. v. 25; 2 Sam. xvii. 29). Milk is generally offered to travellers in Palestine in a curdled or sour state, "*lebben*," thick, almost like butter (comp. Josephus' rendering in Judg. iv. 19:—γάλα διεφθόρος ἦν). In Deut. xxxii. 15, we find חֶמֶן וְחֶלֶב בֵּין חֶמֶן among the blessings which Joshua had enjoyed, where milk of kine would seem contrasted with milk of sheep. The two passages in Job (xx. 17, xix. 6) where the word חֶמֶן occurs are also best satisfied by rendering it *milk*; and the same may be said of Ps. lv. 21, which should be compared with Job xxix. 6.

In Prov. xxx. 33, Gesenius thinks that cheese is meant, the word חֶמֶן signifying *pressure* rather than churning. Jarchi (on Gen. xviii. 8) explains חֶמֶן to be *pinguedo lactis, quam de ejus superficie colligunt*, i. e. cream, and Vittinga and Hitzig give this meaning to the word in Is. vii. 15-22. Butter was not in use among the Greeks and Romans except for medicinal purposes, but this fact is of no weight as to its absence from Palestine. Robinson mentions the use of butter at the present day (*Bib. Res.* i. 449), and also the method of churning (i. 485, and ii. 418), and from this we may safely infer that the art of butter-making was known to the ancient inhabitants of the land, so little have the habits of the people of Palestine been modified in the lapse of centuries. Burckhardt (*Travels in Arabia*, i. p. 52) mentions the different uses of butter by the Arabs of the Hedjaz. [W. D.]

**BUZ** (בּוּז, *contempt*; δ *Baûz*), the second son of Milah and Nahor (Gen. xii. 21). The genitive name is בּוּזִי, and Elihu is called "the Buzite" (בּוּזִי-הַנָּזֵר) of the kindred of Ram, i. e. Aram. Elihu was therefore probably a descendant of Buz, whose family seems to have settled in Arabia Deserta or Petraea, since Jeremiah (xxv. 23 'Pûr), in denouncing God's judgments against them, mentions them with Thema and Dedan. Some connect the territory of Buz with Busan, a Roman fort mentioned in Amm. Marc. xviii. 10, and others with Baza in Arabia Petraea, which however has only the first letter in common with it (Winer, s. v.).

The jingle of the names Huz and Buz is by no means so apparent in the Hebrew (חֻז, בּוּז); but it is quite in the Oriental taste to give to relations these rhyming appellatives; comp. Ishua and Ishui (Gen. xvi. 17); Meluajael and Methusael (Gen. iv.), Uzziel and Uzzi (1 Chr. vii. 7); and among the Arabians, Haroot and Marout the rebel angels, Hasan and Huseyn, the sons of 'Alee, &c. The Koran abounds in such homoioteleuta, and so pleasing are they to the Arabs, that they even call Cain and Abel, Kabil and Habil (Weil's *Bibl. Legends*, 23; also Southey's *Notes to Thalaba*), or Habil and Habid (see Stanley, 413). The same idiom is found in Mahatta and the modern languages of the East.

2. A name occurring in the genealogies of the

tribe of Gad (1 Chr. v. 14). (Βούξ, Alex. 'Αυξ-Βούξ; *Buz*). [F. W. F.]

**BU'ZI** (בּוּזִי, no article; Βουζί, *Buzi*), father of Ezekiel the prophet (Ez. i. 3).

**BYSSUS**. [LINEN.]

## C

**CAB**. [MEASURES.]

**CAB'BON** (כַּבּוֹן; Καββᾶ; Alex. Καββᾶ; *Chelbon*), a town in the low country (*Shefelah*) of Judah (Josh. xv. 40) which is only once mentioned, and of which nothing has been since discovered. ● [G.]

**CA'BUL** (כַּבּוּל; Χωθαμασσομέλ, including the Hebrew word following, כַּבּוּלָה; Alex. Καβῶλ; *Cabul*), a place named as one of the landmarks on the boundary of Asher (Josh. xix. 27). From its mention in proximity to Jiphthach-el—afterwards Jotapata, and now *Jefat*—it is probable that it is the same with that spoken of by Josephus (*Vit.* §43, 45) as in the district of I'otemais, and 40 stadia from Jotapata. In this case it may fairly be considered as still existing in the modern *Kabûl*, which was found by Dr. Smith and by Robinson 8 or 9 miles east of *Akht*, and about the same distance from *Jefat* (Rob. iii. 87, 8. For references to the Talmuds see Schwarz, 192). Being thus on the very borders of Galilee, it is more than probable that there is some connection between this place and the district (כַּבּוּלָה, "the land of C.") containing twenty cities, which was presented by Solomon to Hiram king of Tyre (1 K. ix. 11-14). The LXX. rendering of the name, "Οριον, appears to arise from their having read כַּבּוּל, *Gebool*, "boundary," for כַּבּוּל.

On the other hand, the explanation of Josephus is quite in accordance with that hinted at in the text—itself thoroughly in keeping with Oriental modes of speech. Hiram, not liking Solomon's gift, seizes on the name of one of the cities, which in his own Phœnician tongue expresses his disappointment (κατὰ φωνικὴν γλῶτταν, οὐκ ἀρέσκον, Jos. Ant. viii. 5, §3), and forms from it a designation for the whole district. The pun is doubtless a Phœnician one, since there is no trace of it in the Hebrew beyond the explanation in ver. 12, "they pleased him not;" the Hebrew words for which, כַּבּוּלָה וְכַבּוּל, have no affinity whatever with "Cabul." See however possible derivations of the name in the *Onomasticon* of Simonis (p. 417), and Hiller (435, 775). [G.]

**CAD'DIS** (Καδδῖς; *Gaddis*), the surname (καλούμενος) of JOANNAN, the eldest brother of Judas Maccabæus (1 Macc. ii. 2).

**CADES**, 1 Mac. xi. 63, 73. [KEDESH.]

**CA'DES-BARNE** (Κάδης Βαρνή; Vulg. *has* different reading), Judith v. 14. [KADESH-BARNEA.]

**CAD'MIEL** (Καδομήλος; Alex. Καδομήλος; *Caduhel*), 1 Esd. v. 26, 58. [KADMIEL.]

**CAESAR** (*Καῖσαρ*, also *ὁ Σεβαστός* [AUGUSTUS] in Acts xxv. 21, 25), always in the N. T. the Roman emperor, the sovereign of Judaea (John xix. 15; Acts xvii. 7). It was to him that the Jews paid tribute (Matt. xxii. 17 ff.; Luke xx. 22, xxiii. 2); and to him that such Jews as were *ciccs Romani* had the right of appeal (Acts xxv. 11 f., xxvi. 32, xxviii. 19); in which case, if their cause was a criminal one, they were sent to Rome (Acts xxv. 12, 21,—comp. Pliny, *Epp.* x. 97); where was the court of the emperor (Phil. iv. 22). The N. T. history falls entirely within the reigns of the five first Roman Caesars, viz., Augustus, Tiberius, Caligula, Claudius, and Nero; only the two former of whom, and Claudius, are mentioned by name; but Nero is the emperor alluded to in the Acts from ch. xxv. to the end, and in Phil. (I. c.), and possibly in the Apocalypse. See further under AUGUSTUS, and under the names of the several Caesars above-mentioned. [H. A.]

**CAESARE'A** (*Καῖσαρεα*, Acts viii. 40, ix. 30, x. 1, 24, xi. 11, xii. 19, xviii. 22, xxi. 8, 16; xxiii. 23, 33; xxv. 1, 4, 6, 13). The passages just enumerated show how important a place this city occupies in the Acts of the Apostles. It was the residence, apparently for several years, of Philip, one of the seven deacons or almoners (viii. 40, xxi. 8, 16), and the scene of the conversion of the Italian centurion, Cornelius (x. 1; 24, xi. 11). Here Herod Agrippa I. died (xii. 19). From hence St. Paul sailed to Tarsus, when forced to leave Jerusalem on his return from Damascus (ix. 30), and at this port he landed after his second missionary journey (xviii. 22). He also spent some time at Caesarea on his return from the third missionary journey (xxi. 8, 16), and before long was brought back a prisoner to the same place (xxiii. 23, 33), where he remained two years in bonds before his voyage to Italy (xxv. 1, 4, 6, 13).

Caesarea was situated on the coast of Palestine, on the line of the great road from Tyre to Egypt, and about half way between Joppa and Dora (Joseph. *B. J.* i. 21, §5). The journey of St. Peter from Joppa (Acts x. 24) occupied rather more than a day. On the other hand St. Paul's journey from Ptolemais (Acts xxi. 8) was accomplished within the day. The distance from Jerusalem was about 70 miles; Josephus states it in round numbers as 600 stadia (*Ant.* xiii. 11, §2; *B. J.* i. 3, §5). The Jerusalem Itinerary gives 68 miles (*Wesseling*, p. 600. Dr. Robinson thinks this ought to be 78: *Bib. Res.* ii. 242, note). It has been ascertained, however, that there was a shorter road by *Antipatris* than that which is given in the Itinerary,—a point of some importance in reference to the night-journey of Acts xxiii. [ANTIPATRIS].

In Strabo's time there was on this point of the coast merely a town called "Strato's tower" with a landing-place (*πρόσβασις ἔκων*), whereas, in the time of Tacitus, Caesarea is spoken of as being the head of Judaea ("Judaene caput," Tac. *Hist.* ii. 79). It was in this interval that the city was built by Herod the Great. The work was in fact accomplished in ten years. The utmost care and expense were lavished on the building of Caesarea. It was a proud monument of the reign of Herod, who named it in honour of the Emperor Augustus. The full name was *Καῖσαρεα Σεβαστή* (Joseph. *Ant.* xvi. 5, §1). It was sometimes called Caesarea Stratonis, and Caesarea Palaestinae; sometimes also (from its position) *παρὰ τὸς* (Joseph. *B. J.* iii. 9,

§1), or *ἡ ἐπὶ θαλάττῃ* (id. vii. 1, §3). It must be carefully distinguished from CAESAREA PHILIPPI.

The magnificence of Caesarea is described in detail by Josephus in two places (*Ant.* xv. 9; *B. J.* i. 21). The chief features were connected with the harbour (itself called *Σεβαστὸς λιμὴν* on coins, and by Josephus, *Ant.* xvii. 5, §1), which was equal in size to the Piræus. A vast breakwater, composed of stones 50 feet long, curved round so as to afford complete protection from the south-westerly winds, leaving an opening only on the north. Broad landing-wharves surrounded the harbour; and conspicuous from the sea was a temple, dedicated to Caesar and to Rome, and containing colossal statues of the Emperor and the Imperial City. Caesarea contained also an amphitheatre and a theatre. The latter was the scene of the death of Herod Agrippa I. Caesarea was the official residence of the Hæroclidian kings, and of Festus, Felix, and the other Roman procurators of Judaea. Here also were the head-quarters of the military forces of the province. It was by no means strictly a Jewish city. The Gentile population predominated; and at the synagogue-worship the Scriptures of the O. T. were read in Greek. Constant feuds took place here between the Jews and Greeks; and an outbreak of this kind was one of the first incidents of the great war. It was at Caesarea that Vespasian was declared emperor. He made it a Roman colony, called it by his name, and gave to it the *Jus Italicum*. The history of the place, during the time of its greatest eminence, is summed up in one sentence by Pliny:—"Statonis turis, eadem Caesarea, ab Herode rege condita: nunc Colonia prima Flavia, a Vespasiano Imperatore deducta" (v. 14).

To the Biblical geographer Caesarea is interesting as the home of Eusebius. It was also the scene of some of Origen's labours and the birth-place of Procopius. It continued to be a city of some importance even in the time of the Crusades. Now, though an Arabic corruption of the name still lingers on the site (*Kaisariyeh*), it is utterly desolate; and its ruins have for a long period been a quarry, from which other towns in this part of Syria have been built. (See Buckingham's *Travels* and the Appendix to vol. i. of Dr. Traill's *Josephus*.) [J. S. H.]

**CAESAREA PHILIPPI** (*Καῖσαρεα ἡ Φιλιπποῦ*) is mentioned only in the two first Gospels (Matt. xvi. 13; Mark viii. 27) and in accounts of the same transactions. The story in Eusebius, that the woman healed of the issue of blood, and supposed to have been named Berenice, lived at this place, rests on no foundation.

Caesarea Philippi was the northernmost point of our Lord's journeyings; and the passage in His life, which was connected with the place, was otherwise a very marked one. (See Stanley's *Sinai & Palestine*, p. 391.) The place itself too is remarkable in its physical and picturesque characteristics, and also in its historical associations. It was at the easternmost and most important of the two recognised sources of the Jordan, the other being at *Tell-el-Kadi*. [DAN or LAISH, which by Winer and others has been erroneously identified with Caes. Philippi.] Not that either of these sources is the most distant fountain-head of the Jordan, the name of the river being given (as in the case of the Mississippi and Missouri, to quote Dr. Robinson's illustration, not to the most remote fountains, but the most copious. The spring rises, and the city was built, on a limestone terrace in a

valley at the base of Mount Hermon. Caesarea Philippi has no O. T. history, though it has been not unreasonably identified with *Baal-Gad*. Its annals run back direct from Herod's time into heathenism. There is no difficulty in identifying it with the *Panion* of Josephus; and the inscriptions are not yet obliterated, which show that the God Pan had once a sanctuary at this spot. Here Herod the Great erected a temple to Augustus, the town being then called from the grotto where Pan had been honoured. It is worth while here to quote in succession the words of Josephus and of Dr. Robinson:—"Herod, having accompanied Caesar to the sea and returned home, erected him a beautiful temple of white marble near the place called Panium. This is a fine cavern in a mountain; under which there is a great cavity in the earth; and the cavern is abrupt, and very deep, and full of still water. Over it hangs a vast mountain, and under the mountain rise the springs of the river Jordan. Herod adorned this place, which was already a very remarkable one, still further by the erection of this temple, which he dedicated to Caesar." (Joseph. *Ant.* xv. 10, §3; comp. *B. J.* i. 21, §3). "The situation is unique; combining in an unusual degree the elements of grandeur and beauty. It nestles in its recess at the southern base of the mighty Hermon, which towers in majesty to an elevation of 7000 or 8000 feet above. The abundant waters of the glorious fountain spread over the terrace luxuriant fertility and the graceful interchange of copse, lawn and waving fields." (Robinson, iii. 404.)

Panium became part of the territory of Philip, tetrarch of Trachonitis, who enlarged and embellished the town, and called it Caesarea Philippi, partly after his own name, and partly after that of the emperor (*Ant.* xviii. 2, §1; *B. J.* ii. 9, §1). Agrippa II. followed in the same course of flattery, and called the place *Neronias* (*Ant.* xx. 9, §4). Josephus seems to imply in his life (*Vit.* 13) that many heathens resided here. Titus exhibited gladiatorial shows at Caesarea Philippi after the end of the Jewish war (*B. J.* vii. 2, §1). The old name was not lost. Coins of *Caesarea Paneas* continued through the reigns of many emperors. Under the simple name of *Paneas* it was the seat of a Greek bishopric in the period of the great councils and of a Latin bishopric during the crusades. It is still called *Baniyas*, the first name having here, as in other cases, survived the second. A remarkable monument, which has seen all the periods of the history of Caesarea Philippi, is the vast castle above the site of the city, built in Syro-Greek or even Phœnician times, and, after receiving additions from the Saracens and Franks, still the most remarkable fortress in the Holy Land. [J. S. H.]

**CAGE.** The term so rendered in Jer. v. 27, צִיָּה, is more properly a *trap* (παγίς, *decipula*), in which decoy birds were placed: the same article is referred to in Eccus. xi. 30 under the term κάραλλος, which is elsewhere used of a tapering basket. [FOWLING.] In Rev. xviii. 2 the Greek term is φυλακή, meaning a prison or restricted habitation rather than a cage. [W. L. B.]

**CAIAPHAS** (Καϊάφας, said (Winer, &c.) to be derived from נִדְּבָא, *depressio*, Targ. Prov. xvi. 26), in full ΙΩΣΗΦΙ ΚΑΙΑΦΑΣ (Joseph. *Ant.* xviii. 2, 2), high-priest of the Jews under Tiberius during the years of our Lord's public ministry, and at the

time of his condemnation and crucifixion. Matt. xvi. 3, 57 (Mark and Luke do not name him); John xi. 49, xviii. 13, 14, 24, 28; Acts iv. 6. The Procurator Valerius Gratus, shortly before his leaving the province, appointed him to the dignity, which was before held by Simon ben-Camith. He held it during the whole procuratorship of Pontius Pilate, but soon after his removal from that office was deposed by the Proconsul Vitellius (A.D. 36), and succeeded by Jonathan, son of Ananias (Joseph. *Ant.* xviii. 4, §3). He was son-in-law of Annas. [ANNAS.] Some in the ancient church confounded him with the historian Josephus, and believed him to have become a convert to Christianity. (Assmann, *Biblioth. Orient.* ii. 165.) [H. A.]

**CAIN** (קַיִן, derived either from קַיִן, *to acquire*, Gen. iv. 1; from קַיִן, *a spear*, as indicative of the violence used by Cain and Lamech, Gesen. *Thesaur.* p. 120; or from an Arabic word *kayn*, *a smith*, in reference to the arts introduced by the Cainites, von Bohlen, *Introd.* to Gen. ii. 85; קַיִן; Joseph. *Kdīs; Cain*). The historical facts in the life of Cain, as recorded in Gen. iv., are briefly these:—He was the eldest son of Adam and Eve; he followed the business of agriculture; in a fit of jealousy, roused by the rejection of his own sacrifice and the acceptance of Abel's, he committed the crime of murder, for which he was expelled from Eden, and led the life of an exile; he settled in the land of Nod, and built a city which he named after his son Enoch; his descendants are enumerated, together with the inventions for which they were remarkable. Occasional references to Cain are made in the N. T. (Heb. xi. 4; 1 John iii. 12; Jude 11.)

The following points deserve notice in connexion with the Biblical narrative:—1. The position of the land of Nod. The name itself tells us little; it means *flight* or *exile*, in reference to v. 12 where a cognate word is used: von Bohlen's attempt to identify it with India, as though the Hebrew name *Ilind* (הִינד) had been erroneously read *ham-Nod*, is too far fetched; the only indication of its position is the indefinite notice that it was "east of Eden" (16), which of course throws us back to the previous settlement of the position of Eden itself. Knobel (*Comm.* in loc.), who adopts an ethnological interpretation of the history of Cain's descendants, would identify Nod with the whole of Eastern Asia, and even hints at a possible connexion between the names Cain and China. It seems vain to attempt the identification of Nod with any special locality; the direction "east of Eden" may have reference to the previous notice in iii. 24, and may indicate that the land was opposite to (κατέναντι, LXX.) the entrance, which was barred against his return. It is not improbable that the *east* was further used to mark the direction which the Cainites took, as distinct from the Sethites, who would, according to Hebrew notions, be settled towards the west. Similar observations must be made in regard to the city Enoch, which has been identified with the names of the Heniochi, a tribe in Caucasus (Hasse), Anuchta, a town in Susiana (Huetius), Chnago, an ancient town in India (von Bohlen), and Iconium, as the place where the deified king Anncas was honoured (Ewald): all such attempts at identification must be subordinated to the previous settlement of the position of Eden and Nod.

2. The "mark set upon Cain" has given rise to

various speculations, many of which would never have been broached, if the Hebrew text had been consulted: the words probably mean that Jehovah gave a sign to Cain, very much as signs were afterwards given to Noah (Gen. ix. 13), Moses (Ex. iii. 2, 12), Elijah (1 K. xix. 11), and Hezekiah (Is. xxxviii. 7, 8). Whether the sign was perceptible to Cain alone, and given to him once for all, in token that no man should kill him, or whether it was one that was perceptible to others, and designed as a precaution to them, as is implied in the A. V., is uncertain; the nature of the sign itself is still more uncertain.

3. The narrative implies the existence of a considerable population in Cain's time; for he fears lest he should be murdered in return for the murder he had committed (14). Josephus (*Ant. i. 2, §1*) explains his fears as arising not from men but from wild beasts; but such an explanation is wholly unnecessary. The family of Adam may have largely increased before the birth of Seth, as is indeed implied in the notice of Cain's wife (17), and the mere circumstance that none of the other children are noticed by name may be explained on the ground that their lives furnished nothing worthy of notice.

4. The character of Cain deserves a brief notice. He is described as a man of a morose, malicious, and revengeful temper; and that he presented his offering in this state of mind is implied in the rebuke contained in ver. 7, which may be rendered thus: "If thou dost well (or, as the LXX. has it, *ἐὰν ὀρθῶς προσενέγκῃς*), is there not an elevation of the countenance (i. e. cheerfulness and happiness)? but if thou dost not well, there is a sinking of the countenance: sin lurketh (as a wild beast) at the door, and to thee is its desire: but thou shalt rule over it." The narrative implies therefore that his offering was rejected on account of the temper in which it was brought.

5. The descendants of Cain are enumerated to the sixth generation. Some commentators (Knobel, von Bohlen) have traced an artificial structure in this genealogy, by which it is rendered parallel to that of the Sethites: e. g. there is a decade of names in each, commencing with Adam and ending with Jubal and Noah, the deficiency of generations in the Cainites being supplied by the addition of the two younger sons of Lamech to the list; and there is a considerable similarity in the names, each list containing a Lamech and an Enoch; while Cain in the one = Cain-an in the other, Methuselah = Methuselah, and Mehujel = Mahalalel: the inference from this comparison being that the one was framed out of the other. It must be observed, however, that the differences far exceed the points of similarity; that the order of the names, the number of generations, and even the meanings of those which are noticed as similar in sound, are sufficiently distinct to remove the impression of artificial construction.

6. The social condition of the Cainites is prominently brought forward in the history. Cain himself was an agriculturist, Abel a shepherd: the successors of the latter are represented by the Sethites and the progenitors of the Hebrew race in later times, among whom a pastoral life was always held in high honour from the simplicity and devotional habits which it engendered: the successors of the former are depicted as the reverse in all these respects. Cain founded the first city; Lamech instituted polygamy; Jubal introduced the nomadic

life; Jubal invented musical instruments; Tubalcain was the first smith; Lamech's language takes the stately tone of poetry; and even the names of the women, Naamah (*pleasant*), Zillah (*shadow*), Adah (*ornamental*), seem to bespeak an advanced state of civilization. But along with this, there was violence and godlessness; Cain and Lamech furnish proof of the former, while the concluding words of Gen. iv. 26 imply the latter.

7. The contrast established between the Cainites and the Sethites appears to have reference solely to the social and religious condition of the two races. On the one side there is pictured a high state of civilization, unsanctified by religion, and productive of luxury and violence; on the other side, a state of simplicity which afforded no material for history beyond the declaration "then began men to call upon the name of the Lord." The historian thus accounts for the progressive degeneration of the religious condition of man, the evil gaining a pre-dominance over the good by its alliance with worldly power and knowledge, and producing the state of things which necessitated the flood.

8. Another motive may be assigned for the introduction of this portion of sacred history. All ancient nations have loved to trace up the invention of the arts to some certain author, and, generally speaking, these authors have been regarded as objects of divine worship. Among the Greeks, Apollo was held to be the inventor of music, Vulcan of the working of metals, Triptolemus of the plough. A similar feeling of curiosity prevailed among the Hebrews; and hence the historian has recorded the names of those to whom the invention of the arts was traditionally assigned, obviating at the same time the dangerous error into which other nations had fallen, and reducing the estimate of their value by the position which their inventors held. [W. L. B.]

CAIN<sup>1</sup> (with the article, *כַּיִן* = "the lance," Gen.; but may it not be derived from *כֵּן*, *Kēn*, "a nest," possibly in allusion to its position; *Zanawadu*, Alex. *Zawawadu*, both by including name preceding; *Accain*); one of the cities in the low country (*Shefelah*) of Judah, named with Zanoah and Gibeah (Josh. xv. 56). It does not appear to have been mentioned or identified by any one. [G.]

CAINAN (Marg., correctly Kenan; *כֵּנָן*; *Kān-vān*; *Cainan*; *possessor*, *Fürst*; *tel. faber*, Gesen., as if = *כֵּן* from the Arab. *to forge*, as in Tubalcain, Gen. iv. 22: see Dr. Mill's *Vind. of our Lord's Geneal.* p. 150). 1. Son of Enos, aged 70 years when he begat Mahalalel his son. He lived 840 years afterwards, and died aged 910 (Gen. v. 9-14). The rabbinical tradition was that he first introduced idol-worship and astrology—a tradition which the Hellenists transferred to the post-diluvian Cainan. Thus Ephrem-Syrus asserts that the Chaldees in the time of Terah and Abram worshipped a graven god called Cainan; and Gregory Bar-Hebraeus, another Syriac author, also applies it to the son of Arphaxad (Mill, *ut sup.*). The origin of the tradition is not known; but it may probably have been suggested by the meaning of the supposed root in Arabic and the Aramean dialects; just

<sup>1</sup> The letter *כ* is generally rendered in the A. V. by *K*. A possible connexion of this name with that of the "Kenites" is obscured by the form *Cain*, which is probably derived from the Vulgate.

as another signification of the same root seems to have suggested the tradition that the daughters of Cain were the first who made and sang to musical instruments (Gesen. s. v. חָנַן).

2. Son of Arphaxad, and father of Sala, according to Luke iii. 35, 36, and usually called the second Cainan. He is also found in the present copies of the LXX. in the genealogy of Shem, Gen. x. 24, xi. 12, and 1 Chr. i. 18 (though he is omitted in 1 Chr. i. 24), but is nowhere named in the Hebrew codex, nor in any of the versions made from the Hebrew, as the Samaritan, Chaldee, Syriac, Vulgate, &c. Moreover it can be demonstrated that the intrusion of the name into the version of the LXX. is comparatively modern, since Augustine is the first writer who mentions it as found in the O. T. at all;\* and since we have the absolute certainty that it was not contained in any copies of the Alexandrine Bible which either Berosus, Eupolemus, Polyhistor, Josephus, Philo, Theophilus of Antioch, Julius Africanus, Origen, Eusebius, or even Jerome, had access to. It seems certain therefore that his name was introduced into the genealogies of the Greek O. T. in order to bring them into harmony with the genealogy of Christ in St. Luke's Gospel, where Cainan was found in the time of Jerome. The question is thus narrowed into one concerning its introduction into the Gospel. It might have been thought that it had found its way by accident into the genealogy of Joseph, and that Luke inserted that genealogy exactly as he found it. But as Beza's very ancient MS. presented to the University of Cambridge, does not contain the name of Cainan, and there is strong ground for supposing that neither did Irenaeus's copy of St. Luke, it seems on the whole more probable that Cainan was not inserted by St. Luke himself, but was afterwards added, either by accident, or to make up the number of generations to 17, or from some other cause which cannot now be discovered. For further information, see *Geneal. of our Lord J. C.*, ch. viii.; Heidegger, *Hist. Patriarch.* ii. 8-15; Bochart, *Phaleg*, lib. ii. cap. 13; and for the opposite view, Mill's *Vind. of our Lord's Geneal.* p. 143 sqq. [A. C. H.]

**CAIUS.** [JOHN, SECOND AND THIRD EPISTOLICALS.] [BREAD.] [TLES OF.]

**CALAH** (כַּלַּח; Καλαχ; Chale), one of the most ancient cities of Assyria. Its foundation is ascribed to the patriarch Ashur (Gen. x. 11). The name has been thought identical with the Halah (חֲלָה), which is found in Kings (2 K. xvii. 6, and xviii. 11) and Chronicles (1 Chr. v. 26); but this view is unsupported by the Septuagint, which renders Halah by Ἀλαῖ. According to the opinion of the best Oriental antiquaries, the site of Calah is marked by the *Nimrod* ruins, which have furnished so large a proportion of the Assyrian remains at present in England. If this be regarded as ascertained, Calah must be considered to have been at one time (about B.C. 930-720) the capital of the empire. It was the residence of the warlike Sardanapalus and his successors down to the time of Sargon, who built a new capital, which he called by his

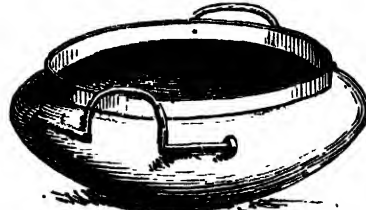

own name, on the site occupied by the modern *Khorsabad*. Calah still continued under the later kings to be a town of importance, and was especially favoured by Esarhaddon, who built there one of the grandest of the Assyrian palaces. In later times it gave name to one of the chief districts of the country, which appears as Calacine (Ptolem. vi. 1) or Calachène (Strab. xvi. 1, §1) in the geographers. [G. R.]

**CALAMO'LALUS** (Καλαμωλλός; *Chlomis*), 1 Esdr. v. 22, a corrupt name, apparently agglomerated of ELAM, LOD, and HADID.

**CALAMUS** (קָנָה; κάλαμος). This word occurs three times in A. V.—Ex. xxx. 23 among the ingredients of the holy anointing oil,—Cant. iv. 14 in an enumeration of the sweet scents,—and Ex. xxvii. 19, among the articles brought to the markets of Tyre. קָנָה is properly the marsh and river reed, and is used in that sense in various passages of Scripture [REED]; but in the places just referred to it signifies the *Calamus odoratus*, an Indian and Arabian plant (Plin. xii. 12, 48), of which the Linnaean name is *Acorus calamus*. No doubt the same plant is intended in Is. xlii. 24; Jer. vi. 20; where A. V. has *sweet cane*. In the latter text the Heb. is קָנָה הַפֶּשֶׁת, and in Ex. xxx. 23, קָנָה בָּשֵׁם. "A scented cane is said to have been found in a valley of Mount Lebanon (Polyb. v. 46; Strab. xvi. 4). The plant has a reed-like stem which is extremely fragrant, like the leaves, especially when bruised. It is of a tawny colour, much jointed, breaking into splinters, and having the hollow stem filled with pith like a spider's web." (Kalisch on Ex. xxx. 23.) [W. D.]

**CAL'COL** (כַּלְכָּל; Καλχάλ, Χαλκός; Chalchal, Chalcol), a man of Judah, son or descendant of Zerah (1 Chr. ii. 6). Probably identical with CHALCOL (A. V. only; no difference in the Hebrew), son of Mahol, one of the four wise men whom Solomon excelled in wisdom (1 K. iv. 31). For the grounds of this identification see DARDA. [G.]

**CALDRON.** 1. קִדְרִין, probably from קִדְרִין, *boil*, akin to Arab. كَلَد, *to be moved*, as water in boiling; a pot or kettle; also a basket. 2. קִדְרִין, a pot or kettle. 3. אִתְּנִין, or אִתְּנִין. 4. קִדְרִין, from קִדְרִין, *pour*. אִתְּנִין, *χύτρα, ποδιστήρ, lebes, olla*. A vessel for boiling flesh, either for ceremonial or domestic

Bronze caldron from Egyptian Thebes. (Brit. Mus.)

\* Demetrius (a.c. 170), quoted by Eusebius (*Præp. Evang.* ix. 21), reckons 1360 years from the birth of Shem to Jacob's going down to Egypt, which seems to include the 130 years of Cainan. But in the great fluctuation of the numbers in the ages of the patri-

archs, no reliance can be placed on this argument. Nor have we any certainty that the figures have not been altered in the modern copies of Eusebius, to make them agree with the computation of the altered copies of the LXX.

use (2 Chr. xxxv. 13; 1 Sam. ii. 14; Mic. iii. 3; Job xli. 20). [H. W. P.]

**CALEB** (כָּלֵב; *Xalæß*; *dog*, Gesen.; *Beller*, *Kläffer*, i. e. *barker*, Fürst). 1. According to 1 Chr. ii. 9, 18, 19, 42, 50, the son of Hezron, the son of Pharez, the son of Judah, and the father of Hur by Ephrath or Ephratah, and consequently grandfather of Caleb the spy. His brothers, according to the same authority, were Jerahmeel and Ram; his wives Azubah, Jerioth, and Ephratah; and his concubines Ephah and Maachah (ver. 9, 42, 46, 48). But from the manifest corruption of the text in many parts of the chapter, from the name being written כְּלֵבִי in ver. 9, which looks like a patronymic, from כְּלֵב, Chelub (1 Chr. iv. 11) the brother of Shuah, from the evident confusion between the two Calebs at ver. 49, and from the non-appearance of this elder Caleb anywhere except in this genealogy, drawn up in Hezekiah's reign [AZARIAH, No. 13], it is impossible to speak with confidence of his relations, or even of his existence.

2. Son of Jephunneh, by which patronymic the illustrious spy is usually designated (Num. xiii. 6, and ten other places), with the addition of that of "the Kenazite," or "son of Kenaz," in Num. xxii. 12; Josh. xiv. 6, 14. Caleb is first mentioned in the list of the rulers or princes (נְשִׂאִים), called in the next verse ראשֵׁי הָעָם, "heads," one from each tribe, who were sent to search the land of Canaan in the second year of the Exodus, where it may be noted that these נְשִׂאִים or ראשֵׁי הָעָם are all different from those named in Num. i. ii. vii. x. as princes or heads of the tribes of Israel, and consequently that the same title was given to the chiefs of families as to the chiefs of the whole tribe. Caleb was a נְשִׂאִי or ראשֵׁי הָעָם in the tribe of Judah, perhaps as chief of the family of the Hezronites, at the same time that Nahshon the son of Amminadab was prince of the whole tribe. He and Oshea or Joshua the son of Nun were the only two of the whole number, who on their return from Canaan to Kadesh-Barnea, encouraged the people to enter in boldly to the land, and take possession of it; for which act of faithfulness they narrowly escaped stoning at the hands of the infuriated people. In the plague that ensued, while the other ten spies perished, Caleb and Joshua alone were spared. Moreover, while it was announced to the congregation by Moses that, for this rebellious murmuring, all that had been numbered from 20 years old and upwards, except Joshua and Caleb, should perish in the wilderness, a special promise was made to Caleb the son of Jephunneh, that he should survive to enter into the land which he had trodden upon, and that his seed should possess it. Accordingly, 45 years afterwards, when some progress had been made in the conquest of the land, Caleb came to Joshua and reminded him of what had happened at Kadesh, and of the promise which Moses made to him with an oath. He added that though he was now 85 years of age, he was as strong as in the day when Moses sent him to spy out the land, and he claimed possession of the land of the Anakims, Kirjath-Arba, or Hebron, and the neighbouring hill-country (Josh. xiv.). This was immediately granted to him, and the following chapter relates how he took possession of Hebron, driving out the three sons of Anak; and how he offered

Achsah his daughter in marriage to whoever would take Kirjath-Sepher, i. e. Debir; and how when Othniel, his younger brother, had pertained the feat, he not only gave him his daughter to wife, but with her the upper and nether springs of water which she asked for. After this we hear no more of Caleb, nor is the time of his death recorded. But we learn from Josh. xxi. 13, that in the distribution of cities out of the different tribes for the priests and Levites to dwell in, Hebron fell to the priests, the children of Aaron, of the family of Kohathites, and was also a city of refuge, while the surrounding territory continued to be the possession of Caleb, at least as late as the time of David (1 Sam. xxv. 3, xxx. 14).

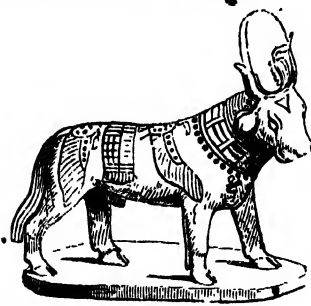

But a very interesting question arises as to the birth and parentage of Caleb. He is, as we have seen, styled "the son of Jephunneh the Kenazite," and his younger brother Othniel, afterwards the first Judge, is also called "the son of Kenaz" (Josh. xv. 17; Judg. i. 13, ii. 9, 11).

On the other hand the genealogy in 1 Chr. ii. makes no mention whatever of either Jephunneh or Kenaz, but represents Caleb, though obscurely, as being a descendant of Hezron and a son of Hur (see too ch. iv.). Again in Josh. xv. 13 we have this singular expression, "Unto Caleb the son of Jephunneh he gave a part among the children of Judah;" and in xiv. 14, the no less significant one, "Hebron became the inheritance of Caleb the son of Jephunneh the Kenazite, because that he wholly followed Jehovah God of Israel." It becomes therefore quite possible that Caleb was a foreigner by birth; a proselyte, incorporated into the tribe of Judah, into which perhaps he or his ancestors had married, and one of the first-fruits of that gentle harvest, of which Jethro, Rahab, Ruth, Naaman, and many others were samples and signs. And this conjecture receives a most striking confirmation from the names in Caleb's family. For on turning to Gen. xxxvi. 11, 15, we find that Kenaz is an Edomitish name, the son of Eliphaz. Again, in 1 Chr. ii. 50, 52, among the sons of Caleb the son of Hur we find Shobal and half the Manahethites or sons of Manahath. But in Gen. xxxvi. 20-23, we are told that Shobal was the son of Seir the Horite, and that he was the father of Manahath. So too Korah, Phuran, Etah (1 Chr. ii. iv.), and perhaps Jephunneh, compared with Pinon, are all Edomitish names (1 Chr. i.; Gen. xxxvi.). We find too Temanites, or sons of Teman (1 Chr. i. 36), among the children of Ashur the son of Hezron (1 Chr. iv. 6). The finding thus whole families or tribes, apparently of foreign origin, incorporated into the tribes of Israel, seems further to supply us with an easy and natural solution of the difficulty with regard to the great numbers of the Israelites at the Exodus. The seed of Abraham had been multiplied by the accretion of proselytes, as well as by generation.

3. **CALEB-EPHRATAH**, according to the present text of 1 Chr. ii. 24, the name of a place where Hezron died. But no such place was ever heard of, and the composition of the name is a most improbable one. Nor could Hezron or his son have given any name to a place in Egypt, the land of their bondage, nor could Hezron have died, or his son have lived, elsewhere than in Egypt. The present text must therefore be corrupt, and the reading which Jerome's Hebrew Bible had, and which is preserved in the LXX., is probably the true one. viz. בְּנֵי כָלֵב אֶפְרַתָּה, "Caleb came in unto

Ephraim." The whole information given seems to be that Hezron had two wives, the first whose name is not given, the mother of Jeralmeel, Ram, and Caleb or Chelubai; the second, Abiah, the daughter of Machir, whom he married when 60 years old, and who bore him Segub and Ashur. Also that Caleb had two wives, Azubah, the first, the mother, according to Jerome's version, of Jeieloth; and Ephratah, the second, the mother of Hur; and that this second marriage of Caleb did not take place till after Hezron's death. [A. C. H.]

**CALF** (חֲזַרְיָ לֶעֱזָרָה; μόσχον, δέμαλις). In Ex. xxxii. 4, we are told that Aaron, constrained by the people in the absence of Moses, made a molten calf of the golden earrings of the people, to represent the Elohim which brought Israel out of Egypt. He is also said to have "finished it with a graving-tool," but the word חֲזַרְיָ may mean a mould (comp. 2 K. v. 23, A. V. "bags;" LXX. θυλάκας). Bochart (*Hieroz.* lib. ii. cap. xxxiv.) explains it to mean "he placed the earrings in a bag," as Gideon did (Judg. viii. 24). Probably, however, it means that after the calf had been cast, Aaron ornamented it with the sculptured wings, feathers, and other marks, which were similarly represented on the statues of Apis, &c. (Wilkinson, iv. 348). It does not seem likely that the earrings would have provided the enormous quantity of gold required for a solid figure. More probably it was a wooden figure laminated with gold, a process which is known to have existed in Egypt. A gilded ox covered with a pall" was an emblem of Osiris (Wilkinson, iv. 335).

Bronze figure of Apis. (Wilkinson.)

The legends about the calf are numerous. The suggestion is said by the Jews to have originated with certain Egyptian proselytes (Godwyn's *Mos. and Aur.* iv. 5); Hur, "the desert's martyr," was killed for opposing it; Abu'lfeida says that all except 12,000 worshipped it; when made, it was magically animated (Ex. xxxii. 24). "The devil," says Jonathan, "got into the metal and fashioned it into a calf" (Lightfoot, *Works*, v. 398). Hence the Koran (vii. 146) calls it "a corporeal calf, made of their ornaments, which loved." This was effected, not by Aaron (according to the Mohammedans), but by al Sâmeri, a chief Israelite, whose descendants still inhabit an island of the Arabian gulf. He took a handful of dust from the footsteps of the horse of Gabriel, who rode at the head of the host, and threw it into the mouth of the calf, which immediately began to low. No one is to be punished in hell more than

40 days, being the number of days of the calf-worship (Sale's *Koran*, ed. Davenport, p. 7, note; and see Weil's *Legends*, 125). It was a Jewish proverb that "no punishment befalleth the Israelites in which there is not an ounce of this calf" (Godwyn, *ubi sup.*).

To punish the apostasy Moses burnt the calf, and then grinding it to powder scattered it over the water, where, according to some, it produced in the drinkers effects similar to the water of jealousy (Num. v.). He probably adopted this course as the deadliest and most irreparable blow to their superstition (Jerome, *Ep.* 128; Plut. *de Is.* p. 362), or as an allegorical act (Job xv. 16), or with reference to an Egyptian custom (Herod. ii. 41; *Poli Syn. ad loc.*). It has always been a difficulty to explain the process which he used; some account for it by his supposed knowledge of a forgotten art (such as was one of the boasts of alchemy) by which he could reduce gold to dust. Goguet (*Origine des Loix*) invokes the assistance of natron, which would have had the additional advantage of making the daught nauseous. Baumgarten easily endows the fire employed with marvellous properties. Bochart and Rosenmüller merely think that he cut, ground, and filed the gold to powder, such as was used to sprinkle over the hair (Jos. *Ant.* viii. 7, §3). There seems little doubt that חֲזַרְיָ = κατακάτω, LXX. (Hävernick's *Introd. to the Pentat.* p. 292.)

It has always been a great dispute respecting this calf and those of Jeroboam, whether, I. the Jews intended them for some Egyptian God, or II. for a mere cherubic symbol of Jehovah.

I. The arguments for the first supposition are, 1. The ready apostasy of the Jews to Egyptian superstition (Acts vii. 39, and chap. v. passim; Lactant. *Inst.* iv. 10). 2. The fact that they had been worshippers of Apis (Jo-Ji. xxiv. 14), and their extreme familiarity with his cultus (1 K. xi. 40). 3. The resemblance of the feast described in Ex. xxxii. 5, to the festival in honour of Apis (Sund. s. v. "Apis"). Of the various sacred cows of Egypt, that of Isis, of Athor, and of the three kinds of sacred bulls, Apis, Basis, and Mnevis, Sir G. Wilkinson fixes on the latter as the prototype of the golden calf; "the offerings, dancings, and rejoicings practised on that occasion were doubtless in imitation of a ceremony they had witnessed in honour of Mnevis" (*Anc. Egypt.*, v. 197, see Plates 35, 36). The ox was worshipped from its utility in agriculture (Plut. *de Is.* 74), and was a symbol of the sun, and consecrated to him (Hom. *Od.* i. xii. &c.; Warburton, *Div. Leg.* iv. 3, 5). Hence it is almost universally found in Oriental and other mythologies. 4. The expression "an ox that eateth hay," &c. (Is. cvi. 20, &c.), where some see an allusion to the Egyptian custom of bringing a bottle of hay when they consulted Apis (Godwyn's *Mos. and Aur.* iv. 5). Yet these terms of scorn are rather due to the intense hatred of the Jews, both to this idolatry and that of Jeroboam. Thus in Tob. i. 5, we have one of Jeroboam's calves called ἡ δέμαλις Βδαλ, which is an unquestionable calumny; just as in Jer. xlvi. 15, "ἄνις ὁ μόσχος σου ὁ ἐκλεκτός is either a mistake or a corruption of the text (Bochart, *Hieroz.* ii. 28, 6, and Schleusner, s. v. "Apis").

II. It seems to us more likely that in this calf-worship the Jews merely

"Likened their Maker to the graven ox;"

or in other words, adopted a well-understood cherubic emblem. For 1. it is obvious that they were aware of this symbol, since Moses finds it unnecessary to describe it (Ex. xxv. 18-22). 2. Josephus seems to imply that the calf symbolized God (*Ant.* viii. 8, §4). 3. Aaron in proclaiming the feast (Ex. xxxii. 5) distinctly calls it a feast to Jehovah, and speaks of the god as the visible representation of Him who had led them out of Egypt. 4. It was extremely unlikely that they would so soon adopt a deity whom they had so recently seen humiliated by the judgments of Moses (Num. xxxiii. 4). 5. There was only one Apis, whereas Jeroboam erected two calves. (But see Jahn, *Arch. Bibl.* §464.) 6. Jeroboam's well-understood political purpose was, not to introduce a new religion, but to provide a different form of the old; and this alone explains the fact that *this* was the only form of idolatry into which Judah never fell, since she already possessed the archetypal emblems in the Temple. 7. It appears from 1 K. xxii. 6, &c. that the prophets of Israel, though sanctioning the calf-worship, still regarded themselves, and were regarded, as "prophets of Jehovah."

These arguments, out of many others, are aduced from the interesting treatise of Moncaeus, *de Vitulo Aureo* (*Sacri Critici*, ix.). The work is inhibited by the Church of Rome, and has been answered by Visorinus. A brief resumé of it may be found in *Poli Syn.* ad Ex. xxxii., and in Watt's "Remnants of Time" (ad finem). [CHERUBIM.]

The prophet Hosea is full of denunciations against the calf-worship of Israel (Hos. viii. 5, 6, x. 6), and mentions the curious custom of *kissing* them (xiii. 2). His change of Bethel into Bethaven possibly rose from contempt of this idolatry (but see BETHAVEN). The calf at Dan was carried away by Tiglath-Pileser, and that of Bethel 10 years after by his son Shalmaneser (1 K. xv. 29, xvii. 13; Prideaux, *Connexion*, i. 15).

Bochart thinks that the ridiculous story of Celsus about the Christian worship of an ass-headed deity called *Θαφαβαθ ή Ουριλ* (a story, at the source of which Tertullian, 'Όσκολογος, *Apol.* 16, *Ad. Nat.* i. 14, could only guess), sprang from some misunderstanding of cherubic emblems (Minuc. Fel. *Apol.* ix.). But it is much more probable, as Origen conjectured, that the Christians were confounded with the absurd mystic *Ophiani* (Tac. *Hist.* v. 4; Merivale, *Hist. of Emp.* vi. 564).

In the expression "the calves of our lips" (Hos. xiv. 2), the word "calves" is used metaphorically for victims or sacrifices, and the passage signifies either "we will render to thee sacrifices of our lips," that is, "the tribute of thanksgiving and praise," or "we will offer to thee the sacrifices which our lips have vowed." The LXX. erroneously translate *καρπὸν τῶν χειλέων*, which is followed by the Syr. and Arab. versions, and is supposed to have been borrowed by the author of the epistle to the Hebrews (xiii. 15). For allusions to the "fatted calf" see Gen. xviii. 21; Luke xv. 23, &c.; and on the custom of cutting up a calf, and "passing between the parts thereof" to ratify a covenant, see Jer. xxiv. 18, 19; Gen. xv. 10, 17; Ephrem Syrus, i. 161; Hom. *Il.* iii. 208. [F. W. F.]

CALITAS (Καλιτάς, and Καλίτας; *Calitas*), 1 Esd. ix. 23, 48. [KALITA.]

CALLISTHENES (Καλλισθένης), a partisan of Nicanor, who was burnt by the Jews on the

leat of that general in revenge for his guilt in setting fire to "the sacred portals" (2 Macc. viii. 33). [B. F. W.]

CAL/NEH, or CAL/NO (כַּלְנֶה, כַּלְנֵה; *Cal* *dan*, *Chaldan*; *Chalanne*), appears in Genesis (x. 10) among the cities of Nimrod. The word is thought to mean "the foot of the god *Ana* or *Anu*," who was one of the chief objects of Babylonian worship. Probably the site is the modern *Niffer*, which was certainly one of the early capitals, and which, under the name of *Nopher*, the Talmud identifies with Calneh (see the *Goma*). Arab traditions made Niffer the original Babylon, and said that it was the place where Nimrod endeavoured to mount on eagles' wings to heaven. Similarly, the LXX. speak of Calneh or Calno, as "the place where the tower was built" (Is. x. 9). *Niffer* is situated about 60 miles S.E.E. of Babylon in the marshes on the left bank of the Euphrates; it has been visited and described by Mr. Layard (*Nin. & Bab.* ch. xxiv.), and Mr. Loftus (*Chaldaea*, p. 101). We may gather from Scripture that in the 8th century B.C. Calneh was taken by one of the Assyrian kings, and never recovered its prosperity. Hence it is compared with Carchemish, Hamath, and Gath (Is. x. 9; Am. vi. 2), and regarded as a proof of the resistless might of Assyria. [G. R.]

CAL/NO (כַּלְנֶה; *Chaldan*; Alex. *Chaldan*), the passage however does not agree with the Hebrew; *Calano*, Is. x. 9. [CAL/NEH.]

CAL/PHI (δ Καλφί; Jos. *Καψάλος*; *Calphi*), father of Judas, one of the two captains (*ἀρχοντες*) of Jonathan's army who remained firm at the battle of Gennesar (1 Macc. xi. 70).

CALVARY (κράνιον; Syr. *Karkaptha*; *Calvaria*), a word occurring in the A. V. only in Luke xiii. 33, and there no proper name, but arising from the translators having literally adopted the word *calvaria*, i. e. a bare skull, the Latin word by which the κράνιον of the Evangelists is rendered in the Vulgate; κράνιον again being nothing but the Greek interpretation of the Hebrew GOLGOTHA.

Κράνιον is used by each of the four Evangelists in describing the place of the Crucifixion, and is in every case translated in the Vulg. *calvarias* and in every case that in St. Luke the A. V. has "scull." Prof. Stanley has not omitted to notice this (*S. & P.* 460, note), and to call attention to the fact that the popular expression "Mount Calvary" is not warranted by any statement in the accounts of the place of our Lord's crucifixion. There is no mention of a mount in either of the narratives. [CRUCIFIXION; GOLGOTHA; JERUSALEM.] [G.]

CAMEL (כַּמֶּלֶךְ, כַּמֶּלֶךְ, כַּמֶּלֶךְ; *kámelos*; *camelus*, *dromedarius*), an animal of the order *Ruminantia*, and genus *Camelus*. It is a native of Asia, where from the earliest ages to the present day it has been the chief means of communication between the different regions of the East; and from its wonderful powers of endurance in the desert has enabled routes to be opened which would otherwise have been impracticable. "Their home is the desert; and they were made, in the wisdom of the Creator, to be the carriers of the desert. The coarse and prickly shrubs of the wastes are to them the most delicious food; and even of these they eat but little. So few are the wants of their nature, that their power of going without food, as well as

without water, is wonderful. Their well-known habit of lying down upon the breast to receive their burdens, is not, as is often supposed, merely the result of training; it is an admirable adaptation of their nature to their destiny as carriers. This is their natural position of repose; as is shown too by the callosities upon the joints of the legs, and especially by that upon the breast. Hardly less wonderful is the adaptation of their broad cushioned foot to the arid sands and gravelly soil, which it is their lot chiefly to traverse. . . . . As the carriers of the East, the 'ships of the desert,' another important quality of the camel is their sure-footedness" (Robinson, ii. 632-635). The present geographical distribution of the camel extends over Arabia, Syria, Asia Minor to the foot of the Caucasus, the south of Tartary, and part of India. In Africa it is found in the countries extending from the Mediterranean to the Senegal, and from Egypt and Abyssinia to Algiers and Morocco. The camel and dromedary are one species; the latter being distinguished only by higher breeding and finer qualities. The two-humped camel, sometimes called the Bactrian camel, is a variety only, not a distinct species (Patterson, *Introd. to Zoology*, p. 417). The dromedary is a swift-riding camel, called by the Arabs *Delou*, by the Turks *Hejia*; the difference between them and a common camel being as great as that between a high-bred Arab mare and an English cart-horse (Layard, *N. & B.* p. 292).

The camel is frequently mentioned in Holy Scripture. It was used not only in Palestine, but also in Arabia (Jud. vii. 12), in Egypt (Ex. ix. 3), in Syria (2 K. viii. 9), and in Assyria, as appears from the sculptures of Nineveh (see Layard, *N. & B.* p. 582). It was used at an early date both as a riding animal and as a beast of burden (Gen. xxiv. 64, xxxvii. 25). It was likewise used in war (1 Sam. xxx. 17; Is. xxi. 7). Of its hair course garments were manufactured (Matt. iii. 4; Mark i. 6). The camel is included in the lists of unclean animals (Lev. xi. 4; Deut. xiv. 7). The word **נֶמֶל** is found in all the Semitic languages, in the Greek and Latin (whence it has passed into the languages of Western Europe), and in the Coptic **ⲕⲣⲁⲛⲉⲗⲁ**. In Sanscrit it occurs as *kramēla* and *kranēlaka*; and hence Schlegel traces the word to the root *kram* = to step. Bochart derives it from the root **נָמַל**, to revenge, because the camel is vindictive and retains the memory of injuries (animal *μνησκάων*); but Gesenius considers it more likely that **נֶמֶל** should have assumed the force of the cognate verb **חָמַל**, to carry.

The word **נֶמֶל** occurs in Is. lx. 5, and in Jer. ii. 25. In both places A. V. has *dromedary*: it should rather be *young camel*; the distinction between it and **נֶמֶל** being of age, and not of species.

**נֶמֶלֶת**, in Is. lxvi. 20, seems to be the name given to high-bred riding camels, now called *Delous*: the root being **נָמַל**, to leap, or move quickly, in the same way as we have in the Greek *δρόμαδες*. (Comp. *Herod.* iii. 103, *αἱ γὰρ σφί τετραπόδες ἵππων οὐκ ἔχουσιν ἐς ταχέστερά εἰσι*. See Layard, *N. & B.* p. 292, note.)

In Esth. viii. 10, the words **הַחֲמֵשׁתָּיִם הַרְפָּדִים** are rendered in A. V. "camels and young dromedaries" [MULE]; and 1 K. iv. 28 (v. 8, Heb.), **רָכָשׁ** is rendered *dromedaries* [HORSE]. [W. D.]

**CA'MON** (**קָמוֹן**; *Ῥαμων*; Alex. *Ῥαμῶν*; Jos. *Καμών*; *Camon*), the place in which JAIR the Judge was buried. The few notices of Jair which we possess have all reference to the country E. of Jordan, and there is therefore no reason against accepting the statement of Josephus (*Ant.* v. 7, §6) that Camon was a city of Gilead. In support of this is the mention by Polybius (v. 70, §12) of a Camoun (*Καμουῖν*) in company with Pella and other trans-Jordanic places (Reland, 679). In modern times, however, the name has not been recovered on the E. of Jordan. Eusebius and Jerome identify it with CYAMON, in the plain of Esdraelon. [G.]

# CAMP. [ENCAMPMENTS.]

**CAMPHIRE** (**כִּפְרִי**; *κύπρος*; *cyprius*; A. V. marg. *cypress*), a plant or shrub, mentioned only in Cant. i. 14, iv. 13. It is the *Lansonia incana* of Linnaeus, has whitish scented flowers growing in bunches, and acquired its name from **כִּפְרִי**, to cover, or paint, because from the dried leaves of the plant was made an unguent, with which women imparted a red stain to their nails. In Adler's *Lex.* the Syr.

**ܚܝܢܐ** is explained by *henna, folia hennae*.

The Arabs call the plant *Menna*; it is still used for the same purpose as of old; and it is an interesting proof of the identity of this plant with the **כִּפְרִי** of Canticles, that the women of the East are fond of placing its bunches of sweet-smelling flowers in their bosom. It is supposed that allusion to the practice of staining the nails with henna is made in Deut. xxi. 12. The practice is universal in Egypt, and must have been so for ages, for the nails of mummies (especially of females) show traces of it. The shrub is described and figured in Sonnini, *Aegypt. Travels*, i. p. 164. (See also Dioscorid. i. 125; Plin. xii. 24; Celsius, *Hierobot.* i. p. 222, seq.)

Kimchi mentions that Eben Esra would connect

**כִּפְרִי** with the Arb. word **كفر**, the calyx of the palm-tree flower—comparing the Chald. **ܚܝܢܐ** = unripe dates; so also T. D. Michaelis: but this view of the word is rejected by Gesenius. [W. D.]

**CANA OF GALILEE**, once CANA IN GALILEE (*Κανά της Γαλιλαίας*; Syriac, *Katna*, **ܟܬܢܐ**, Nitrian, *Katnah*, **ܟܬܢܐ**; *Cana Galilæae*), a village or town memorable as the scene of Christ's first miracle (John ii. 1, 11, iv. 46), as well as of a subsequent one (iv. 46, 54), and also as the native place of the Apostle Nathanael (xii. 2). The four passages quoted—all, it will be observed, from St. John—are the only ones in which the name occurs. Neither of them affords any clue to the situation of Cana. All we can gather is, that it was not far from Capernaum (John ii. 12, iv. 46), and also on higher ground, since our Lord went down (*κατέβη*) from the one to the other (ii. 12). No further help it to be obtained from the notices either of Josephus (*Vit.* §16; *B. J.* i. 17, §5)—even if the place

which he mentions be the same—or of Eusebius and Jerome in their *Onomasticon*.

The traditional site is at *Kefr Kenna*, a small village about  $4\frac{1}{2}$  miles north-west of Nazareth. It now contains only the ruins of a church said to stand over the house in which the miracle was performed, and—doubtless much older—the fountain from which the water for the miracle was brought (*Mislin*, iii. 44:3-6). The Christians of the village are entirely of the Greek Church. The "water-pots of stone" were shown to M. Lamartine, though at St. Willibald's visit centuries before there had been but one remaining (*Early Trav.* 16). In the time of the Crusades, the six jars were brought to France, where one of them is said still to exist in the Musée d'Angers (see M. Didron's *Essays in the Annales Archéologiques*, xi. 5, xiii. 2).

The tradition identifying *Kefr Kenna* with Cana is certainly of considerable age. It existed in the time of Willibald (the latter half of the 8th cent.), who visited it in passing from Nazareth to Tabor, and again in that of Phocas (12th cent. See *Reiland*, 680). From that time until lately the tradition appears to have been undisturbed. But even by Quakerism the claims of another site were admitted, and these have been lately brought forward by Dr. Robinson with much force. The rival site is a village situated further north, about 5 miles north of *Seffurieh* (Sepphoris) and 9 of Nazareth, near the present *Jefut*, the Jotapata of the Jewish wars. This village still bears the name of *Kam el-jelil* (قنا للجليل), a name which is

in every respect the exact representative of the Hebrew original—as *Kenna*, כפר כנא, is widely different from it—and it is in this fact that the chief strength of the argument in favour of the northern Kana seems to reside. The argument from tradition is not of much weight. The testimonies of Willibald and Phocas, given above, appear to have escaped the notice of Dr. Robinson, and they certainly form a balance to those of Adichomius and others, which he quotes against *Kefr Kenna* (*Rob.* ii. 346-9, iii. 108, with the note on *De Sauley*; comp. *Ewald*, v. 147; *Mislin*, iii. 443-6).

The Gospel history will not be affected whichever site may be discovered to be the real one. [G.]

**CANAAN** (כנען) (= *C'nann*; comp. the Greek name *Xvā*, as mentioned below); *Xavān*; *Jos. Xavānos*; (*Chanaan*). 1. The fourth son of Ham (*Gen.* x. 6; 1 Chr. i. 8; comp. *Jos. Ant.* i. 6, §4), the progenitor of the Phœnicians ("Zidon"), and of the various nations who before the Israelite conquest peopled the sea-coast of Palestine, and generally the whole of the country westward of the Jordan (*Gen.* x. 13; 1 Chr. i. 13). [CANAAN, LAND OF; CANAANITES.] In the ancient narrative of *Gen.* ix. 20-27, a curse is pronounced on Canaan for the unfilial and irreverential conduct of Ham: it is almost as if the name had belonged to both, or the father were already merged in the son.

2. The name "Canaan" is sometimes employed for the country itself—more generally styled "the land of C." It is so in *Zeph.* i. 5; and we also find "Language of C." (*Is.* xix. 18); "Wars of C." (*Judg.* iii. 1); "Inhabitants of C." (*Ex.* xv. 15); "King of C." (*Judg.* iv. 2, 23, 24, v. 19); "Daughters of C." (*Gen.* xxviii. 1, 6, 8, xxxvi. 2); "Kingdoms of C." (*Ps.* cxxxv. 11).

In addition to the above the word occurs in several passages where it is concealed in the A. V. by being translated. These are: *Is.* xxiii. 8, "traffickers," and xxiii. 11, "the merchant city;" (*Gesenius*, "Jehovah gab Befehl über Canaan;" *Hos.* xii. 2, "He is a merchant;" *Ewald*, "Kanaan halt trügerische wage;" *Zeph.* i. 11, "merchant-people;" *Ewald*, "dass alle Canaaniter sind dahin.") [G.]

**CANAAN, THE LAND OF** (כנען), from a root כנע, signifying to be low; see 2 Chr. xxviii.

19; *Job* xl. 12, amongst other passages in which the verb is used), a name denoting the country west of the Jordan and Dead-Sea, and between those waters and the Mediterranean; specially opposed to the "land of Gilead," that is the high table-land on the east of the Jordan. Thus: "our little ones and our wives shall be here in the cities of Gilead . . . but we will pass over armed into the land of Canaan" (*Num.* xxxii. 20-32), and see xxxiii. 51: "Phineas . . . returned from the children of Reuben and the children of Gad out of the land of Gilead into the land of Canaan to the children of Israel," *Josh.* xxii. 32; see also *Gen.* xii. 5, xiii. 2, 19, xxi. 18, xxiii. 18, xxv. 6, xxvii. 1, xviii. 4, 7, xlv. 30; *Num.* xii. 2, 17, xxvii. 40, 51; *Josh.* xvi. 2; *Judg.* xxi. 12. True the district to which the name of "low land" is thus applied contained many very elevated spots—Shechem (*Gen.* xxi. 18), Hebron (*xviii.* 19), Bethel (*xxv.* 6), Beth-lehem (*xlviii.* 7), Shiloh (*Josh.* xxi. 2; *Judg.* xxi. 12), which are all stated to be in the "land of Canaan." But high as the level of much of the country west of the Jordan undoubtedly is, there are several things which must always have prevented, as they still prevent, it from leaving an impression of elevation. These are, (1) that remarkable, wide, maritime plain over which the eye ranges for miles from the central hills; a feature of the country which cannot be overlooked by the most casual observer, and which impresses itself most indelibly on the recollection; (2) the still deeper, and still more remarkable and impressive hollow of the Jordan valley, a view into which may be commanded from almost any of the heights of central Palestine; and, (3) there is the almost constant presence of the long high line of the mountains east of the Jordan, which from their distance have the effect more of an enormous cliff than of a mountain range—looking down on the more broken and isolated hills of Canaan, and furnishing a constant standard of height before which everything is dwarfed.

The word "Canaanite" was used in the O. T. in two senses, a broader and a narrower, which will be most conveniently examined under that head; but this does not appear to be the case with "Canaan," at least in the older cases of its occurrence. It is only in later notices, such as *Zeph.* ii. 5, and *Matt.* xv. 22, that we find it applied to the low maritime plains of Philistia and Phœnicia (comp. *Mark* vii. 26). In the same manner it was by the Greeks that the name *Xvā*, *C'na*, was used for Phœnicia, i. e. the sea-side plain north of the "Tyrian ladder" (see the extract in *Reiland*, 7, and *Gesenius*, 696), and by the later Phœnicians both of Phœnicia proper and of the Punic colonies in Africa. (See the coin of Laodicea ad Lib. and the testimony of Augustin, both quoted by *Gesenius*, 696.) The LXX. translators had learnt to apply this meaning to the word, and in two cases they render the Hebrew words given above by *χώρα τῶν*

Φοινίκων (Ex. xvi. 35; Josh. v. 12, comp. v. 1), as they do "Canaanites" by Φοινίκες. [G.]

**CANAANITE, THE** (Rec. T. δ Καναανίτης, A, Καναανίτης; Lachm. with B C, δ Καναανίτης; D, Χαναανίτης; Chamaeus), the designation of the Apostle SIMON, otherwise known as "Simon Zelotes." It occurs in Matt. vi. 4; Mark iii. 18.

The word does not signify a descendant of Canaan, that being in the Greek both of the LXX. and the N. T. Χαναανίτης = חנאני (comp. Matt. xv. 22 with Mark vii. 26). Nor does it signify, as has been suggested, a native of Kunn, since that would probably be Κανίτης. But it comes from a Chaldee or Syriac word, כנעני, Kanaan, or כנעני, Kamenich, by which the Jewish sect or faction of

"the Zealots"—so prominent in the last days of Jerusalem—was designated (see Buxtorf, *Lex. s. v.*). This Syriac word is the reading of the Peshito version. The Greek equivalent of Kanaan is Ζηλωτής, Zelotes, and this St. Luke (vi. 15; Acts i. 13) has correctly preserved. St. Matthew and St. Mark, on the other hand, have literally transferred the Syriac word, as the LXX. translators did frequently before them. There is no necessity to suppose, as Mr. Cureton does (*Nitrian Rec.* lxxvii.), that they mistook the word for

כנעני = Χαναανίτης, a Canaanite or descendant of Canaan. The Evangelists could hardly commit such an error, whatever subsequent transcribers of their works may have done. But that this meaning was afterwards attached to the word is plain from the readings of the Codex Bezae (D) and the Vulgate, as given above, and from the notice quoted from Coteler in the note to Winer's article (463). The spelling of the A. V. has doubtless led many to the same conclusion: and it would be well if it were altered to "Kananite," or some other form distinguished from the well-known one in which it now stands. [G.]

**CANAANITES, THE** (חנאני, i. e. accurately according to Hebrew usage—Gesen. *Heb. Gram.* §107—"the Canaanite;" but in the A. V. with few exceptions rendered as plural, and therefore indistinguishable from חנאני, which also, but very unfrequently, occurs: Χαναανίτης, Φοινίξ, Ex. vi. 15, comp. Josh. v. 1; Chamaeus), a word used in two senses:—1. a tribe which inhabited a particular locality of the land west of the Jordan before the conquest; and 2. in a wider sense, the people who inhabited generally the whole of that country.

1. For the tribe of "the Canaanites" only—the dwellers in the lowland. The whole of the country west of Jordan was a "lowland" as compared with the loftier and more extended tracts on the east: but there was a part of this western country which was still more emphatically a "lowland."

a. There were the plains lying between the shore of the Mediterranean and the foot of the hills of Benjamin, Judah, and Ephraim—the Shefelah or plain of Philistia on the south—that of Sharon between Jaffa and Carmel—the great plain of Esdraelon in the rear of the bay of Akka; and lastly, the plain of Phoenicia, containing Tyre, Sidon, and all the other cities of that nation. b. But separated entirely from these was the still lower region of the Jordan Valley or Arabah, the modern Ghôr, a region which extended in length from the sea of Cinneroth (Gennesareth) to the south of the Dead Sea about

120 miles, with a width of from 8 to 14. The climate of these sunken regions—especially of the valley of the Jordan—is so peculiar, that it is natural to find them the special possession of one tribe.

"Amalek"—so runs one of the earliest and most precise statements in the ancient records of Scripture—"Amalek dwells in the land of the south; and the Hittite, and the Jebusite, and the Amorite, dwell in the mountains; and the Canaanite dwells by the sea, and by the side of Jordan" (Num. xiii. 29). This describes the division of the country a few years only before the conquest. But there had been little or no variation for centuries. In the notice which purports to be the earliest of all, the seats of the Canaanite tribe—as distinguished from the sister tribes of Zidon, the Hittites, Amorites, and the other descendants of Canaan—are given as on the sea-shore from Zidon to Gaza, and in the Jordan valley to Sodom, Gomorrah, and Lasha (afterwards 'allurhoe), on the shore of the present Dead Sea (Gen. x. 18-20). In Josh. xi. 3—at a time when the Israelites were actually in the western country—this is expressed more broadly. "The Canaanite on the east and the west" is carefully distinguished from the Amorite who held "the mountain" in the centre of the country. In Josh. xiii. 2, 3, we are told with more detail that

"all the 'circles' (גלילות) of the Philistines . . . from Sihor (the *Wady el Arish*) unto Ekron northward, is counted to the Canaanite." Later still, the Canaanites are still dwelling in the upper part of the Jordan Valley—Bethshean; the plain of Esdraelon—Taanach, Ibleam, and Megiddo; the plain of Sharon—Dor; and also on the plain of Phoenicia—Accho and Zidon. Here were collected the chieftains which formed a prominent part of their armies (Judg. i. 19, iv. 3; Josh. xvii. 16), and which could indeed be driven nowhere but in these level lowlands (Stanley, *S. & P.* 134).

The plains which thus appear to have been in possession of the Canaanites specially so called, were not only of great extent; they were also the richest and most important parts of the country, and it is not unlikely that this was one of the reasons for the name of "Canaanite" being

2. applied as a general name for the non-Israelite inhabitants of the land, as we have already seen was the case with "Canaan."

Instances of this are, Gen. xii. 6; Num. xxi. 3—where the name is applied to dwellers in the south, who in xiii. 29 are called Amalekites; Judg. i. 10—with which comp. Gen. xiv. 13 and xiii. 18, and Josh. x. 5, where Hebron, the highest land in Palestine, is stated to be Amorite; and Gen. xiii. 12, where the "land of Canaan" is distinguished from the very Jordan-valley itself. See also Gen. xxiv. 3, 37, comp. xxviii. 2, 6; Ex. xiii. 11, comp. 5. But in many of its occurrences it is difficult to know in which category to place the word. Thus in Gen. i. 11: if the floor of Atad was at Bethhogla, close to the west side of the Jordan, "the Canaanites" must be intended in the narrower and stricter sense; but the expression "inhabitants of the land" appears as if intended to be more general. Again, in Gen. x. 18, 19, where the present writer believes the tribe to be intended, Gesenius takes it to apply to the whole of the Canaanite nations. But in these and other similar instances, allowance must surely be made for the different dates at which the various records thus compared were composed. And besides this, it is difficult to imagine what ac-

curate knowledge the Israelites can have possessed of a set of petty nations, from whom they had been entirely removed for four hundred years, and with whom they were now again brought into contact only that they might exterminate them as soon as possible. And before we can solve such questions we also ought to know more than we do of the usages and circumstances of people who differed not only from ourselves, but also possibly in a material degree from the Orientals of the present day. The tribe who possessed the ancient city of Hebron, besides being, as shown above, called interchangeably Canaanites and Amorites, are in a third passage (Gen. xxiii.) called the children of Heth or Hittites (comp. also xxvii. 46 with xxviii. 1, 6). The Canaanites who were dwelling in the land of the south when the Israelites made their attack on it, may have been driven to these higher and more barren grounds by some other tribes, possibly by the Philistines who displaced the Arvites, also dwellers in the low country (Deut. ii. 23).

Beyond their chariots (see above) we have no clue to any manners or customs of the Canaanites. Like the Phœnicians, they were probably given to commerce; and thus the name became probably in later times an occasional synonym for a merchant (Job xli. 6; Prov. xxxi. 24; comp. Is. xxiii. 8, 11; Hos. xii. 2; Zeph. i. 11. See Kenick, *Phœn.* 232).

Of the language of the Canaanites little can be said. On the one hand, being—if the genealogy of Gen. x. be right—Hamites, there could be no affinity between their language and that of the Israelites who were descendants of Shem. On the other is the fact that Abram and Jacob shortly after their entrance to the country seem able to hold converse with them, and also that the names of Canaanite persons and places which we possess, are translatable into Hebrew. Such are Melchizedek, Hamor, Shechem, Sissera . . . Ephrath, and also a great number of the names of places. But we know that the Egyptian and Assyrian names have been materially altered in their adoption into Hebrew record, either by translation into Hebrew equivalents, or from the impossibility of accurately rendering the sounds of one language by those of another. The modern Arabs have adopted the Hebrew names of places as nearly as would admit of their having a meaning in Arabic, though that meaning may be widely different from that of the Hebrew name. Examples of this are *Beit-ur*, *Beit-lahm*, *Bir es sebu*, which mean respectively, "house of the eye," "house of flesh," "well of the lion," while the Hebrew names which these have superseded meant "house of caves," "house of bread," "well of the oath." May not a similar process have taken place when the Hebrews took possession of the Canaanite towns, and "called the lands after their own names?" (For an examination of this interesting but obscure subject see Gesenius, *Hebr. Spr.* 223-5.)

The "Nethinim" or servants of the temple seem to have originated in the dedication of captives taken in war from the petty states surrounding the Israelites. [*NETHINIM.*] If this was the case, and if they were maintained in number from similar sources, there must be many non-Israelite names in the lists of their families which we possess in Ezr. ii. 43-54; Neh. vii. 46-56. Several of the names in these catalogues—such as Sisera, Mehunim, Nephusim—are the same as those which we know to be foreign, and doubtless others would be found on examination. The subject perhaps would not be beneath the examination of a Hebrew scholar.

This is perhaps the proper place for noticing the various shapes under which the formula for designating the nations to be expelled by the Israelites is given in the various Books.

1. Six nations: the Canaanites, Hittites, Amorites, Perizzites, Hivites, and Jebusites. This is the usual form, and, with some variation in the order of the names, it is found in Exod. iii. 8, 17, xxiii. 23, xxxiii. 2, xxxiv. 11; Deut. xx. 17; Josh. ix. 1, xii. 8; Judg. iii. 5. In Ex. xiii. 5, the same names are given with the omission of the Perizzites.

2. With the addition of the Girgashites: making up the mystic number seven (Deut. vii. 1; Josh. iii. 10, xxiv. 14). The Girgashites are retained and the Hivites omitted in Neh. ix. 8 (comp. Ezr. ix. 1).

3. In Exod. xxiii. 28, we find the Canaanite, the Hittite and the Hivite.

4. The list of ten nations in Gen. xv. 19-21 includes some on the east of Jordan, and probably some on the south of Palestine.

5. In 1 K. ix. 20 the Canaanites are omitted from the list. [G.]

CANDA'CE (*Κανδακη*, Strab. xvii. p. 820), a queen of Ethiopia (*Μειοθ*), mentioned Acts viii. 27. The name was not a proper name of an individual, but that of a dynasty of Ethiopian queens. (See Plin. iv. 35; Dion Cass. liv. 5; Strab. l. c.) The eunuch of this queen, who had charge of all her treasure, is mentioned in Acts as having been met by Philip the Evangelist on the desert road from Jerusalem to Gaza, and converted to Christianity. Ethiopian tradition gives him the name of Indich; and in Iren. iii. 12, and Euseb. *II. E.* ii. 1, he is said to have first propagated the gospel in Arabia Felix and Ethiopia, but Sophronius makes him preach and suffer martyrdom in the island of Ceylon. (See Wolf, *Curae*, ii. 113.) [H. A.]

CANDLESTICK (*נֵרְנִי*; *λυχνία τοῦ φωτός*, 1 Macc. i. 21; *δ ἁγίος—λεγόμενος λύχνος καὶ καίμενος ἀδιαλείπτως ἐν τῷ ναῷ*, Diol. Sic. ap. Schleusn. *Thes. s. v.*), which Moses was commanded to make for the tabernacle, is described Ex. xxv. 31-37, xxxvii. 17-24. It is called in Lev. xxiv. 4, "the pure," and in Ecclus. xxvi. 19, "the holy candlestick." With its various appurtenances (mentioned below) it required a talent of "pure gold," and it was not *moulded*, but "of beaten work" (*τορευτή*). Josephus, however, says (*Ant.* iii. 6, §7) that it was of *cast* gold (*καχωνευμένη*), and hollow. From its golden base (*יָתֵד*, *βῆσις*, Jos.), which, according to the Jews, was 3 feet high (Winer, *Leuchter*), sprang a main shaft or reed (*נֵרְנִי*), "and spread itself into as many branches as there are planets, including the sun. It terminated in 7 heads all in one row, all standing parallel to one another, one by one, in imitation of the number of the planets" (Whiston's *Jos. ubi supra*). As the description given in Ex. is not very clear, we abbreviate Lightfoot's explanation of it. "The foot of it was gold, from which went up a shaft straight, which was the middle light. Near the foot was a golden dish wrought almondwis; and a little above that a golden knob, and above that a golden flower. Then two branches, one on each side, bowed, and coming up as high as the middle shaft. On each of them were three golden cups placed almondwis on sharp, scollop-shell fashion; above which was a golden knob, a golden flower, and the socket.

Above the branches on the middle shaft was a golden boss, above which rose two shafts more; above the coming out of these was another boss, and two more shafts, and then on the shaft upwards were three golden scollop-cups, a knop, and a flower: so that the heads of the branches stood an equal height" (*Works*, ii. 399, ed. Pitman). Calmet remarks that "the number 7 might remind them of the sabbath;" we have seen that Josephus gives it a somewhat Egyptian reference to the number of the planets, but elsewhere (*B. J.* vii. 5, §5) he assigns to the 7 branches a merely general reference, as τῆς παρὰ τοῖς Ἰουδαίοις ἰσθμοῦδος τὴν τιμὴν ἐμφανίζοντες. The whole weight of the candlestick was 100 minae; its height was, according to the Rabbis, 5 feet, and the breadth, or distance between the exterior branches 3½ feet (*Jahn, Arch. Bibl.* §329). It has been calculated to have been worth 5076l. exclusive of workmanship.

According to Josephus the ornaments on the shaft and branches were 70 in number, and this was a notion in which the Jews with their peculiar reverence for that number would readily coincide but it seems difficult from the description in Exodus to confirm the statement. On the main shaft (called "the candlestick" in Ex. xxv. 34) there are said to be "4 almond-shaped bowls, with their knops and their flowers," which would make 12 of these ornaments in all; and as on each of the 6 branches there were apparently (for the expression in verse 33 is obscure) 3 bowls, 3 knops, and 3 flowers, the entire number of such figures on the candlestick would be 66. The word translated "bowl" in the A. V. is כַּוֵּץ, κρατήρ, for which Joseph. (l. c.) has κρατηρία καὶ βότσκοι. It is said to have been almond-shaped (קַוֵּץ עֲקֵטוּרִימָנוּמִי קַרְוִיטְסִקִּים), but whether the fruit or flower of the almond is intended cannot be certain. The word כַּוֵּץ is variously rendered "knop" (A. V.), "pommel" (Geddes), σφαρωτήρ (LXX.), spherula (Vulg.), "apple" (Arabic, and other versions); and to this some apply the βότσκοι, and not (as is more natural) the σφαίρια of Jos. The third term is כַּוֵּץ, "a bud," κρίνα (LXX. and Jos.), which from an old gloss seems to be put for any ἄρθος ἐνὸς δὲ δὲ δὲ, κρίνους ὅμοιον. From the fact that it was expressly made "after the pattern, shown in the mount," many have endeavoured to find a symbolical meaning in these ornaments, especially Meyer and Bähr (*Symbol.* i. 416, sq.). Generally it was "a type of preaching" (Godwyn's *Moses and Aaron*, ii. 1) or of "the light of the law" (Lightfoot, l. c.). Similarly candlesticks are made types of the spirit, of the Church, of witnesses, &c. (*Comp. Zech.* iv.; *Rev.* ii. 5, xi. 4, &c.; Wemyss, *Chav. Symbol.* s. v.)

The candlestick was placed on the south side of the first apartment of the tabernacle, opposite the table of shew-bread, which it was intended to illumine, in an oblique position (Λοξῶς) so that the lamps looked to the east and south (*Jos. Ant.* iii. 6, §7; *Ex.* xxv. 37); hence the central was called "the western" lamp, according to some, though others render it "the evening lamp," and say that it alone burned perpetually (*Ex.* xxvii. 20, 21), the others not being lit during the day, although the Holy Place was dark (*Ex.* xxx. 8; 1 Macc. iv. 50). In 1 Sam. iii. 2 we have the expression "ere the

amp of God went out in the temple of the Lord," and this taken in connexion with 1 Chr. xiii. 11, and *Lev.* xxiv. 2, 3, would seem to imply that "always" and "continually," merely mean "tempore constituto," i. e. by night; especially as Aaron is said to have dressed the lamps every morning and lighted them every evening. Rabbi Kimchi (*ad loc.*) says that the other lamps often went out at night, but "they always found the western lamp burning." They were each supplied with sotton, and half a log of the purest olive-oil (about two wine-glasses), which was sufficient to keep them burning during a long night (Winer).

The priest in the morning trimmed the lamps with golden snuffers (סִנְפִּיטִים; ἐκαυστήρες; forcipes), and carried away the snuff in golden dishes (סִנְפִּיטִים; ἀποθέματα; *acerrae*, *Ex.* xxv. 38). When carried about, the candlestick was covered with a cloth of blue, and put with its appendages in badger-skin bags, which were supported on a bar (*Num.* iv. 9).

In Solomon's temple, instead of this candlestick (or besides it, as the Rabbis say, for what became of it we do not know), there were 10 golden candlesticks similarly embossed, 5 on the right and 5 on the left (1 K. vii. 49; 2 Chr. iv. 7). These are said to have formed a sort of railing before the veil, and to have been connected by golden chains, under which, on the day of atonement, the high priest crept. They were taken to Babylon (*Jer.* lii. 19).

In the temple of Zerubbabel there was again a single candlestick (1 Macc. i. 23, iv. 49). It was taken from the Herodian temple by Titus, and carried in triumph immediately before the conqueror (*Joseph. B. J.* vii. 5, §5). The description given of its κίων and ἄεττοι κανίσκοι by Josephus, agrees only tolerably with the deeply interesting sculpture on the Arch of Titus; but he

Candlestick. (From Arch of Titus.)

drops a hint that it was not identical with the one used in the Temple, saying (possibly in allusion to the fantastic griffins, &c., sculptured on the pediment, which are so much worn that we found it difficult to make them out) τὸ ἔργον ἐξήλλακτο τῆς κατὰ τὴν ἡμετέραν χρῆσιν συνηθείας: where see Whiston's note. Hence Jahn (*Hebr. Com.* §clix.) says that the candlestick carried in the triumph was "somewhat different from the golden candlestick of the temple." These questions, are

examined in Rehdal's treatise *De Spoliis Templi Hierosol. in Arcu Titiano conspiciuntur*. The general accuracy of the sculpture is undoubted (Frideaux, *Con.* i. 166).

After the triumph the candlestick was deposited in the Temple of Peace, and according to one story fell into the Tiber from the Milvian bridge during the flight of Maxentius from Constantine, Oct. 28, 312 A.D.; but it probably was among the spoils transferred, at the end of 400 years, from Rome to Carthage by Genseric, A.D. 455 (Gibbon, iii. 291). It was recovered by Belisarius, once more carried in triumph to Constantinople, "and then respectfully deposited in the Christian church of Jerusalem" (Id. iv. 24), A.D. 533. It has never been heard of since.

When our Lord cried "I am the light of the World" (John viii. 12), the allusion was probably suggested by the two large golden chandeliers, lighted in the court of the women during the feast of tabernacles, which illuminated all Jerusalem (Wetstein, *ad loc.*), or perhaps to the lighting of this colossal candlestick, "the more remarkable in the profound darkness of an Oriental town" (Stanley, *S. & P.* p. 420). [F. W. F.]

CANE. [CALAMUS.]

**CANKERWORM** (כָּנָן; *βροῦχος*). The Heb. term *yelek* probably describes the locust in a certain stage of its growth, viz., just when it emerges from the caterpillar state and obtains the use of its wings; see Nah. iii. 16, "the cankerworm throweth off (כָּנָן, *spoileth*, A. V.) its scales and fleeth away." The term is translated *caterpillar* in Is. cv. 34, and Jer. li. 14, 27; *cankerworm* in Joel i. 4, ii. 25; Nah. iii. 15, 16. [LOCUST.] [W. L. B.]

**CAN'NEH** (כִּנְנֶה, one Codex כִּנְנֶה; *Xavav*; Alex. *Xavav*; *Chene*), Ez. xxvii. 23. [CANNEH.]

**CANON OF SCRIPTURE**, THE, may be generally described as "the collection of books which forms the original and authoritative written rule of the faith and practice of the Christian Church." Starting from this definition it will be the object of the present article to examine shortly, I. The original meaning of the term: II. The Jewish Canon of the Old Testament Scriptures as to (a) its formation, and (b) extent: III. The Christian Canon of the Old; and IV. of the New Testament.

I. *The use of the word Canon*.—The word Canon (*Κανών*, akin to כָּנָן [cf. Gesen. *Thes.* s. v.] *κάνη*, *κάννα*, *canna* [*canalis*, *channel*], *cane*, *cannon*) in classical Greek is (1) properly a *straight rod*, as the rod of a shield, or that used in weaving (*liciatorium*), or a carpenter's rule. (2) The last usage offers an easy transition to the metaphorical use of the word for a *testing rule* in ethics (comp. Arist. *Eth. Nic.* iii. 4, 5), or in art (the *Canon* of Polykletus; Luc. *de Salt.* p. 946 B.), or in language (the *Canons* of Grammar). The varied gift of tongues, according to the ancient interpretation of Acts ii. 7, was regarded as the "canon" or test which determined the direction of the labours of the several Apostles

(Severian, ap. Crain. *Cat. in Act.* ii. 7, *διδοτας ἐκαστῷ γλώσσαις καθάπερ κανόν*). Chronological tables were called *κανόνες χρονικοί* (Plut. *Sol.* 27); and the summary of a book was called *κανών*, as giving the "rule," as it were, of its composition. The Alexandrine grammarians applied the word in this sense to the great "classical" writers, who were styled "the rule" (*ὁ Κανών*), or the perfect model of style and language. (3) But in addition to these active meanings the word was also used passively for a measured space (at Olympia), and, in later times, for a fixed tax (Du Cange, s. v. *Canon*).

The ecclesiastical usage of the word offers a complete parallel to the classical. It occurs in the LXX. in its literal sense (Jud. xiii. 6), and again in Aquila (Job xxxviii. 5). In the N. T. it is found in two places in St. Paul's epistles (Gal. vi. 16; 2 Cor. x. 13-16), and in the second place the transition from an active to a passive sense is worthy of notice. In patristic writings the word is commonly used both as a rule in the widest sense, and especially in the phrases "the rule of the Church," "the rule of faith," "the rule of truth" (*ὁ κανὼν τῆς ἐκκλησίας*, *ὁ κανὼν τῆς ἀληθείας*, *ὁ κανὼν τῆς πίστεως*; and so also *κανὼν ἐκκλησιαστικός*, and *ὁ κανὼν* simply). This rule was regarded either as the abstract, ideal standard, embodied only in the life and action of the Church; or, again, as the concrete, definite creed, which set forth the facts from which that life sprang (*regula*: Tertull. *de virg.* vel. 1). In the fourth century, when the practice of the Church was further systematised, the decisions of synods were styled "Canons" and the discipline by which ministers were bound was technically "the Rule," and those who were thus bound were styled *Canonici* ("Canons"). In the phrase "the canon (i. e. fixed part) of the mass," from which the popular sense of "canonize" is derived, the passive sense again prevailed.

As applied to Scripture the derivatives of *κανὼν* are used long before the simple word. The Latin translation of Origen speaks of *Scripturae Canonicae* (*de Princ.* iv. 33), *libri regulares* (*Comm. in Matt.* §117), and *libri canonizati* (id. §28). In another place the phrase *haberi in Canone* (*Prolog. in Cant.* s. f.) occurs, but probably only as a translation of *κανονίζεσθαι*, which is used in this and cognate senses in Athanasius (*Ep. Fest.*), the Laodicean Canons (*ἀκανόνιστα*, *Can. lix.*), and later writers. This circumstance seems to show that the title "Canonical" was first given to writings in the sense of "admitted by the rule," and not as "forming part of and giving the rule." It is true that an ambiguity thus attaches to the word, which may mean only "publicly used in the Church;" but such an ambiguity may find many parallels, and usage tended to remove it. The spirit of Christendom recognised the books which truly expressed its essence; and in lapse of time, when that spirit was denuded by later overgrowths of superstition, the written "rule" occupied the place and received the name of that vital "Rule" by which it was first stamped with authority

\* Credner accepts the popular interpretation, as if canonical were equivalent to "having the force of law," and supposes that *scripturae legis*, a phrase occurring in the time of the persecution of Diocletian, represents *γραφὰ κανόνος*, which however does not, as far as I know, occur anywhere (*Zur Gesch. d. Kan.* p. 67). The terms *canonical* and *canonize* are probably of Alexandrine origin; but there are not the

slightest evidence for connecting the "canon" of classical authors with the "canon" of Scripture, notwithstanding the tempting analogy. If it could be shown that *ὁ κανὼν* was used at an early period for the list of sacred books, then it would be the simplest interpretation to take *κανονίζεσθαι* in the sense of "being entered on the list."

(ὁ κανὼν τῆς ἀληθείας αἱ θείαι γραφαί, Isid. Pelus. *Ep.* cxiv.; comp. Aug. *de doctr. Chr.* iv. 9 (6); and as a contrast *Anon.* ap. Euseb. *II. E.* v. 28).

The first direct application of the term *κανὼν* to the Scriptures seems to be in the verses of Amphilochius (c. 380 A.C.), who concludes his well-known Catalogue of the Scriptures with the words *οὗτος ἀπευδίστατος κανὼν ἂν εἴη τῶν θεοπνευστῶν γραφῶν*, where the word indicates the rule by which the contents of the Bible must be determined, and thus secondarily an index of the constituent books. Among Latin writers the word is commonly found from the time of Jerome (*Prol. Gal.* . . . Tobias et Judith *non sunt in Canone*) and Augustine (*De Civ.* xvii. 24, . . . *perpauca auctoritatem Canonis obtinuerunt*; id. xviii. 38, . . . *inocuiantur in Canone*), and their usage of the word, which is wider than that of Greek writers, is the source of its modern acceptance.

The uncanonical books were described simply as "those without," or "those uncanonicalized" (*ἀκανόνιστα*, Conc. *Laod.* lix.). The Apocryphal books, which were supposed to occupy an intermediate position, were called "books read" (*ἀναγιγνωσκόμενα*, Athan. *Ep. Fest.*), or "ecclesiastical" (*ecclesiastici*, Rufin. in *Synb. Apust.* §38), though the latter title was also applied to the canonical Scriptures (Leont. *I. c. inf.*). The canonical books (Leont. *de Sect.* ii. τὰ κανονιζόμενα βιβλία) were also called "books of the Testament" (*ἐνδιδόθηκα βιβλία*), and Jerome styled the whole collection by the striking name of "the holy library" (*Bibliotheca sancta*), which happily expresses the unity and variety of the Bible (Crelmer, *Zur Gesch. d. Ktn.* §1; *Hist. of Canon of N. T.* App. D).

II. (a) *The formation of the Jewish Canon.*—The history of the Jewish Canon in the earliest times is beset with the greatest difficulties. Before the period of the exile only faint traces occur of the solemn preservation and use of sacred books. According to the command of Moses the "book of the law" was "put in the side of the ark" (Deut. xxxi. 25 ff.), but not in it (1 K. viii. 9; comp. Joseph. *Ant.* iii. i. 7, v. 1, 17), and thus in the reign of Josiah, Hilkiash is said to have "found the book of the law in the house of the Lord" (2 K. xxii. 8; comp. 2 Chr. xxiv. 14). This "book of the law," which, in addition to the direct precepts (Ex. xxiv. 7), contained general exhortations (Deut. xxviii. 61) and historical narratives (Ex. xvii. 14), was further increased by the records of Joshua (Josh. xxiv. 26), and probably by other writings (1 Sam. x. 25), though it is impossible to determine their contents.<sup>b</sup> At a subsequent time collections of proverbs were made (Prov. xxv. 1), and the later prophets (especially Jeremiah; comp. Kuiper, *Jerem. Libror. ss. interp. et vindex*, Berol. 1837) were familiar with the writings of their predecessors, a circumstance which may naturally be connected with the training of "the prophetic schools." It perhaps marks a further step in the formation of the Canon when "the book of the Lord" is mentioned by Isaiah as a general collection of sacred teaching (xxx. 16; comp. xix. 18), at once familiar and authoritative; but it is unlikely that any definite collection either of "the psalms" or of "the prophets" existed before the captivity. At that time Zechariah speaks of

"the law" and "the former prophets" as in some measure co-ordinate (Zech. vii. 12); and Daniel refers to "the books" (Dan. ix. 2, ספרים) in a manner which seems to mark the prophetic writings as already collected into a whole. Even after the captivity the history of the Canon, like all Jewish history up to the date of the Maccabees, is wrapped in great obscurity. Faint traditions alone remain to interpret results which are found realized when the darkness is first cleared away. Popular belief assigned to Ezra and "the great synagogue" the task of collecting and promulgating the Scriptures as part of their work in organising the Jewish Church. Doubts have been thrown upon this belief (Rau, *De Synag. magna*, 1726; comp. Ewald, *Gesch. d. V. Isr.* iv. 191), and it is difficult to answer them, from the scantiness of the evidence which can be adduced; but the belief is in every way consistent with the history of Judaism and with the internal evidence of the books themselves. The later embellishments of the tradition, which represent Ezra as the second author of all the books [2 Esdras], or define more exactly the nature of his work, can only be accepted as signs of the universal belief in his labours, and ought not to cast discredit upon the simple fact that the foundation of the present Canon is due to him. Nor can it be supposed that the work was completed at once; so that the account (2 Macc. ii. 13) which assigns a collection of books to Nehemiah is in itself a confirmation of the general truth of the gradual formation of the Canon during the Persian period. The work of Nehemiah is not described as initiatory or final. The tradition omits all mention of the law, which may be supposed to have assumed its final shape under Ezra, but says that Nehemiah "gathered together the [writings] concerning the kings and prophets, and the [writings] of David, and letters of kings concerning offerings," while "founding a library" (*καταβαλλόμενος βιβλιοθήκην ἐπισυνήγαγε τὰ περὶ τῶν βασιλέων καὶ προφητῶν καὶ τὰ τοῦ Δαυὶδ καὶ ἐπιστολὰς βασιλέων περὶ ἀναθημάτων*; 2 Macc. i. c.). The various classes of books were thus completed in succession; and this view harmonises with what must have been the natural development of the Jewish faith after the Return. The constitution of the Church and the formation of the Canon were both from their nature gradual and mutually dependent. The construction of an ecclesiastical polity involved the practical determination of the divine rule of truth, though, as in the parallel case of the Christian Scriptures, open persecution first gave a clear and distinct expression to the implicit faith.

The persecution of Antiochus (B.C. 168) was for the Old Testament what the persecution of Diocletian was for the New, the final crisis which stamped the sacred writings with their peculiar character. The king sought out "the books of the law" (τὰ βιβλία τοῦ νόμου, 1 Macc. i. 56) and burnt them; and the possession of a "book of the covenant" (*βιβλίον διαθήκης*) was a capital crime (Joseph. *Ant.* xii. 5, §4, ἡφανίστο εἶπου βιβλος εὐρεθείη ἐπὶ καὶ νόμος . . .). According to the common tradition, this proscription of "the law" led to the public use of the writings of the prophets, and without discussing the accuracy of this belief,

<sup>b</sup> According to some (Fabric. *Cod. Pseudep. V. T.* i. 1113), this collection of sacred books was preserved by Jeremiah at the destruction of the Temple (comp. 2 Macc. ii. 4 f.); according to others it was consumed

together with the ark (Epiph. *de Pond.* civ. ii. 162). In 2 K. xxii. 8 ff., 2 Chr. xxxiv. 14 ff., mention is made only of *the Law*.

it is evident that the general effect of such a persecution would be to direct the attention of the people more closely to the books which they connected with the original foundation of their faith. And this was in fact the result of the great trial. After the Maccabæan persecution the history of the formation of the Canon is merged in the history of its contents.<sup>a</sup> The Bible appears from that time as a whole, though it was natural that the several parts were not yet placed on an equal footing, nor regarded universally and in every respect with equal reverence<sup>d</sup> (comp. Zunz, *D. Gottesd. Vortr. d. Jud.* pp. 14, 25, &c.).

But while the combined evidence of tradition and of the general course of Jewish history leads to the conclusion that the Canon in its present shape was formed gradually during a lengthened interval, beginning with Ezra and extending through a part or even the whole (Neh. xii. 11, 22) of the Persian period (A.C. 458-332), when the cessation of the prophetic gift<sup>e</sup> pointed out the necessity and defined the limits of the collection, it is of the utmost importance to notice that the collection was peculiar in character and circumscribed in contents. All the evidence which can be obtained, though it is confessedly scanty, tends to show that it is false, both in theory and fact, to describe the O. T. as "all the relics of the Hebræo-Chaldaic literature up to a certain epoch" (De Wette, *Eintl.* §8), if the phrase is intended to refer to the time when the Canon was completed. The epilogue of Ecclesiastes (xii. 11 ff.) speaks of an extensive literature, with which the teaching of Wisdom is contrasted, and "weariness of the flesh" is described as the result of the study bestowed upon it. It is impossible that these "many writings" can have perished in the interval between the composition of Ecclesiastes and the Greek invasion, and the Apocrypha includes several fragments which must be referred to the Persian period (Buxtorf, *Tiberias*, 10 f.; Hottinger, *Thes. Phil.*; Hengstenberg, *Beitrag*, i.; Hävernick, *Eintl.* i.; Oehler, art. *Canon d. A. T.* in Herzog's *Encyclop.*).

(B) *The contents of the Jewish Canon.*—The first notice of the O. T. as consisting of distinct and definite parts occurs in the prologue to the Greek translation of the Wisdom of Sirach (Ecclesiasticus). The date of this is disputed [ECCLESIASTICUS; JESUS SON OF SIRACH]; but if we admit the later date (c. B.C. 131), it falls in with what has been said on the effect of the Antiochian persecution. After that "the law, the prophecies, and the remainder of the books" are mentioned as integral sections of a completed whole (*ὁ νόμος, καὶ αἱ προφητεῖαι, καὶ τὰ λοιπὰ τῶν βιβλίων*), and the phrase which designates the last class suggests no reason for supposing that that was still indefinite and open to additions. A like threefold classification is used for describing the entire O. T. in the Gospel of St. Luke (xiv. 44, *ἐν τῷ νόμῳ Μωϋσέως καὶ προφήταις καὶ ψαλμοῖς*; comp. Acts xxviii. 23), and appears again in a passage of Philo, where the

Therapeutæ are said to find their true food in "laws and oracles uttered by prophets, and hymns and (τὰ ἄλλα) the other [books?] by which knowledge and piety are increased and perfected" (Philo, *de vita cont.* 3). [BIBLE.]

The triple division of the O. T. is itself not a mere accidental or arbitrary arrangement, but a reflection of the different stages of religious development through which the Jewish nation passed. The Law is the foundation of the whole revelation, the special discipline by which a chosen race was trained from a savage wilfulness to the accomplishment of its divine work. The Prophets portray the struggles of the same people when they came into closer connexion with the kingdoms of the world, and were led to look for the inward anti-types of the outward precepts. The Hagiographæ carry the divine lesson yet further, and show its working in the various phases of individual life, and in relation to the great problems of thought and feeling, which present themselves by a necessary law in the later stages of civilization (comp. Oehler, art. *Canon*, in Herzog's *Encyclop.* p. 253).

The general contents of these three classes still, however, remain to be determined. JOSEPHUS, the earliest direct witness on the subject, enumerates twenty books "which are justly believed to be divine" (τὰ δίκαιως θεῖα πεπιστευμένα): five books of Moses, thirteen of the prophets, extending to the reign of Artaxerxes (i. e. *Esther*, according to Josephus),<sup>f</sup> and four which contain hymns and directions for life (Joseph. c. *Apion.* i. 8). Still there is some ambiguity in this enumeration, for in order to make up the numbers, it is necessary either to rank Job among the prophets, or to exclude one book, and in that case probably Ecclesiastes, from the Hagiographæ. The former alternative is the more probable, for it is worthy of special notice that Josephus regards primarily the historic character of the prophets (τὰ κατ' αὐτοὺς πραχθέντα συνέγραψαν), a circumstance which explains his deviation from the common arrangement in regard to the later annals (1 and 2 Chr., Ezr., Neh.), and Daniel and Job, though he is silent as to the latter in his narrative (comp. Orig. ap. Euseb. *H. E.* vi. 25). The later history, he adds, has also been written in detail, but the records have not been esteemed worthy of the same credit, "because the accurate succession of the prophets was not preserved in their case" (διὰ τὸ μὴ γενέσθαι τὴν τῶν προφητῶν ἀκριβῆ διαδοχὴν). "But what faith we place in our own Scriptures (γράμματα) is seen in our conduct. They have suffered no addition, diminution, or change. From our infancy we learn to regard them as decrees of God (θεοῦ δόγματα); we observe them, and if need be we gladly die for them" (c. *Apion.* i. 8; comp. Euseb. *H. E.* iii. 10).

In these words Josephus clearly expresses not his own private opinion, nor the opinion of his sect, the Pharisees, but the general opinion of his countrymen. The popular belief that the Sadducees received only the books of Moses (Tertull. *De*

<sup>a</sup> The reference to the work of Judas Macc. in 2 Macc. ix. 14, ὡσαύτως δὲ καὶ Ἰούδας τὰ διακεκρυμμένα διὰ τὸν πόλεμον τὸν γεγονότα ἥμιν ἐπισυνήγαγε πάντα, καὶ ἔστι κατ' ἡμῖν, appears from the connexion to refer in particular to his care with regard to the restitution of the copies of the sacred writings which were "lost" (διακεκρυμμένα). It is of importance to notice that the work was a restoration, and not a new collection.

<sup>d</sup> Yet the distinction between the three degrees of

inspiration which were applied by Abarbanel (Kell, *Eintl.* §158, 6) to the three classes of writings is unknown to the early rabbins.

<sup>e</sup> After Malachi, according to the Jewish tradition (Vitringa, *Obs. Sacr.* vi. 8; ap. Kell, *l. c.*).

<sup>f</sup> The limit fixed by Josephus marks the period to which the prophetic history extended, and not, as is commonly said, the date at which the O. T. canon was itself finally closed.

*præcor. hæret.* 45; Hieron. in *Matth.* xii. 31, p. 181; Origen, c. *Cels.* i. 49), rests on no sufficient authority; and if they had done so, Josephus could not have failed to notice the fact in his account of the different sects [SADDUCEES].<sup>5</sup> In the traditions of the Talmud on the other hand, Gamaliel is represented as using passages from the Prophets and the Hagiographa in his controversies with them, and they reply with quotations from the same sources without scruple or objection. (Comp. Eichhorn, *Eintl.* §35; Lightfoot, *Horæ Hebr. et Talm.* ii. 616; C. F. Schmid, *Enarr. Sent. Fl. Josephi de Libris V. T.* 1777; G. Güldenapfel, *Dissert. Josephi de Sadd. Can. Sent. exhibens*, 1804.)

The casual quotations of Josephus agree with his express Canon. With the exception of Prov., Eccles., and Cant., which furnished no materials for his work, and Job, which, even if historical, offered no point of contact with other history, he uses all the other books either as divinely inspired writings (5 Moses, Is., Jer., Ez., Dan., xii. Proph.), or as authoritative sources of truth.

The writings of the N. T. completely confirm the testimony of Josephus. Coincidences of language show that the Apostles were familiar with several of the Apocryphal books (Bleek, *Ueber d. Stellung d. Apokr. u. s. w.* in *Stud. u. Krit.* 1853, pp. 267 ff.);<sup>6</sup> but they do not contain one authoritative or direct quotation from them, while, with the exception of Judges, Eccl., Cant., Esther, Ezra, and Nehemiah, every other book in the Hebrew Canon is used either for illustration or proof.<sup>7</sup>

Several of the early fathers describe the contents of the Hebrew Canon in terms which generally agree with the results already obtained. MELITO of Sardis (c. 179 A.D.) in a journey to the East made the question of the exact number and order of "the books of the Old Testament" a subject of special inquiry, to satisfy the wishes of a friend (Euseb. *H. E.* iv. 26). He gives the result in the following form: the books are, 5 Moses, Jos., Jud., Ruth, 4 K., 2 Chr. Ps., Prov. (Σαλομῶνος Παροιμίαι ἡ καὶ Σοφία), Eccl., Cant., Job, Is., Jer. xii. Proph., Dan., Ez., Esdr. The arrangement is peculiar, and the books of Nehemiah and Esther are wanting. The former is without doubt included in the general title "Esdras," and it has been conjectured (Eichhorn, *Eintl.* §52; comp. Routh, *Rel. Sacr.* i., 136) that Esther may have formed part of the same collection of records of the history after the exile.<sup>8</sup> The testimony of ORIGEN

labours under a similar difficulty. According to the present Greek text (Euseb. *H. E.* vi. 25; *In Ps.* i. *Philoc.* 3), in enumerating the 22 books "which the Hebrews hand down as included in the Testament (ἐνδιαθήκους)," he omits the book of the 12 minor prophets, and adds "the letter" to the book of Jeremiah and Lamentations (Ἱερεμίας σὺν Θρήνοις καὶ τῇ ἐπιστολῇ ἐν ἐνῷ). The number is thus imperfect, and the Latin version of Rufinus has rightly preserved the book of the xii prophets in the catalogue, placing it after Cant. and before the greater prophets, a strange position which can hardly have been due to an arbitrary insertion (cf. Hil. *Prolog. in Ps.* 15). The addition of "the Letter" to Jer. is inexplicable except on the assumption that it was an error springing naturally from the habitual use of the LXX., in which the books are united, for there is not the slightest trace that this late apocryphal fragment [BARUCH, BOOK OF] ever formed part of the Jewish Canon. The statement of JEROME is clear and complete. After noticing the coincidence of the 22 books of the Hebrew Bible with the number of the Hebrew letters, and of the 5 double letters with the 5 "double books" (Sam., K., Chr., Ez., Jer.), he gives the contents of the Law, the Prophets, and the Hagiographa, in exact accordance with the Hebrew authorities, placing Daniel in the last class; and adding that whatever is without the number of these must be placed among the Apocrypha. ("Hic prologus Script. quasi galeatum principium omnibus libris quos de Hæbraeo vertimus in Latinum, convenire potest, ut scire valeamus, quidquid extra hos est, inter Apocrypha esse ponendum," Hieron. *Prolog. Gal.*) The statement of the *Talmud* is in many respects so remarkable that it must be transcribed entire. "But who wrote [the books of the Bible]? Moses wrote his own book, ? the Pentateuch, the section about Balaam and Job. Joshua wrote his own book and the eight [last] verses of the Pentateuch. Samuel wrote his own book, the book of Judges and Ruth. David wrote the book of Psalms [of which however some were composed] by the ten venerable elders, Adam, the first man, Melchizedek, Abraham, Moses, Haman, Jeduthun, Asaph, and the three sons of Korah. Jeremiah wrote his own book, the books of Kings and Lamentations. Hezekiah and his friends [reduced to writing] the books contained in the Memorial word IamSCHak, i. e. Isaiah, Proverbs, Canticles, Ecclesiastes. The men of the

<sup>5</sup> In *Ant.* xiii. 10, §6, Josephus simply says that the Sadducees rejected the *precepts* which were not contained in the laws of Moses (ἀπερ οὐκ ἀναγράφονται ἐν τοῖς Μωϋσέως νόμοις), but derived only from tradition (τὰ ἐκ παραδόσεως, opposed to τὰ γεγραμμένα). The statement has no connexion whatever with the other writings of the Canon.

The Canon of the SAMARITANS was confined to the Pentateuch, not so much from their hostility to the Jews, as from their undue exaltation of the Law (Keil, *Eintl.* §218).

The chief passages which Bleek quotes, after Stier and Nitzsch, are James i. 19 || Sirac. v. 11; 1 Pet. i. 6, 7 || Wisd. iii. 3-7; Heb. xi. 34, 35 || 2 Macc. vi. 18-17, 42; Heb. i. 3 || Wisd. vii. 26, &c.; Rom. i. 20-32 || Wisd. xiii. xv.; Rom. ix. 31 || Wisd. xv. 7; Eph. vi. 13-17 || Wisd. v. 18-20. But it is obvious that if these passages prove satisfactorily that the Apostolic writers were acquainted with the apocryphal books, they indicate with equal clearness that their silence with regard to them cannot have been purely accidental. An earlier criticism of the alleged coin-

cidences is given in Cosin's *Canon of Scripture*, §§35 ff.

<sup>6</sup> Some passages are quoted in the N. T. which are not found in the canonical books. The most important of these is that from the prophecies of Enoch [Ezech., Book of] (Jude, 17). Others have been found in Luke xi. 49-51; John vii. 38; James iv. 5, 6; 1 Cor. ii. 9; but these are more or less questionable.

<sup>7</sup> Iody (*De Bibl. text.* p. 646) quotes a singular note, falsely attributed to Athanasius, who likewise omits Esther. "Sunt etiam ex antiquis Hebraeis qui Esther admittant, atque ut numerus idem (22) servetur, cum *Judithibus* copulantur." The book is wanting also in the *Synops. S. Script.*, Gregor. Naz., Amphilochius, Nicophorus Callistus, &c.

<sup>8</sup> Origen expressly excludes 1 Macc. from the canon (ἐξ οὗ ἐστὶν τὸν ἐν τῷ 1 Μακκ.), although written in Hebrew. Berthold's statement to the contrary is incorrect (*Eintl.* §31), although Keil (*de Auct. Can. Libb. Macc.* 67) maintains the same opinion.

great Synagogue [reduced to writing] the books contained in the memorial letter KaNDaG, i. e. Ezekiel, the 12 lesser prophets, Daniel, and Esther. Ezra wrote his own book, and brought down the genealogies of the books of Chronicles to his own times . . . Who brought the remainder of the books [of Chronicles] to a close? Nehemiah the son of Hachaliah" (Baba Bathra f. 14 b. *ap.* Oehler, art. *Kanon*, l. c.).

In spite of the comparatively late date (c. A.D. 500), from which this tradition is derived, it is evidently in essence the earliest description of the work of Ezra and the Great Synagogue which has been preserved. The details must be tested by other evidence, but the general description of the growth of the Jewish Canon bears every mark of probability. The early fables as to the work of Ezra [2 ESDRAS; see above] are a natural corruption of this original belief, and after a time entirely supplanted it; but as it stands in the great collection of the teaching of the Hebrew Schools, it bears witness to the authority of the complete Canon, and at the same time recognizes its gradual formation in accordance with the independent results of internal evidence.

The later Jewish Catalogues throw little light upon the Canon. They generally reckon twenty-two books, equal in number to the letters of the Hebrew alphabet, five of the Law, eight of the Prophets (Josh., Jud., and Ruth, 1, 2 Sam., 1, 2 K., Is., Jer., and Lam., Ez., 12 Proph.), and nine of the Hagiographa (Hieron. *Prolog. in Reg.*). The last number was more commonly increased to eleven by the distinct enumeration of the books of Ruth and Lamentation ("the 24 Books" עשרים וארבעה), and in that case it was supposed that the *Yod* was thence repeated in reverence for the sacred name (Hody, *De Bibl. text.* p. 644; Eichhorn, *Eint.* §6). In Hebrew MSS., and in the early editions of the O. T., the arrangement of the later books offers great variations (Hody, *l. c.*, gives a large collection), but they generally agree in reckoning all separately except the books of Ezra and Nehemiah<sup>m</sup> (Buxtorf, Hottinger, Hengstenberg, Hävernick, *l. cc.*; Zuntz, *Gottesd. Vorträge d. Juden*).

So then it has been shown that the Hebrew Canon was uniform and coincident with our own;<sup>n</sup> but while the Palestinian Jews combined to preserve the strict limits of the old prophetic writings, the Alexandrine Jews allowed themselves greater freedom. Their ecclesiastical constitution was less definite, and the same influences which created among them an independent literature disinclined them to regard with marked veneration more than the Law itself. The idea of a Canon was foreign

to their habits; and the fact that they possessed the sacred books not merely in a translation, but in a translation made at different times, without any unity of plan and without any uniformity of execution, necessarily weakened that traditional feeling of their real connexion which existed in Palestine. Translations of later books were made (1 Macc., Ecclesi., Baruch, &c.), and new ones were written (2 Macc. Wisd.), which were reckoned in the sum of their religious literature, and probably placed on an equal footing with the Hagiographa in common esteem. But this was not the result of any express judgment on their worth, but a natural consequence of the popular belief in the doctrine of a living Word which deprived the prophetic writings of part of their distinctive value. So far as an authoritative Canon existed in Egypt, it is probable that it was the same as that of Palestine. In the absence of distinct evidence to the contrary this is most likely, and positive indications of the fact are not wanting. The translator of the Wisdom of Sirach uses the same phrase (ὁ νόμος καὶ οἱ προφῆται καὶ τὰ ἄλλα βιβλία) in speaking of his grandfather's biblical studies in Palestine, and of his own in Egypt (comp. Eichhorn, *Eint.* §22), and he could hardly have done so, had the Bible been different in the two places. The evidence of PHILO, if less direct, is still more conclusive. His language shows that he was acquainted with the Apocryphal books, and yet he does not make a single quotation from them (Hornemann, *Observ. ad illustr. doctr. de Can. V. T. ex Philone*, pp. 28, 29, *ap.* Eichhorn, *Eint.* §26), though they offered much that was favourable to his views. On the other hand, in addition to the Law, he quotes all the books of "the Prophets," and the Psalms and Proverbs, from the Hagiographa, and several of them (Is., Jer., Hos., Zechar., Ps., Prov.), with clear assertions of their "prophetic" or inspired character. Of the remaining Hagiographa (Neh., Ruth, Lam., 1, 2 Chron., Dan., Eccl., Cant.) he makes no mention, but the three first may have been attached, as often in Hebrew usage, to other books (Ez., Jud., Jer.), so that four writings alone are entirely unattested by him (comp. Hornemann, *l. c.*). A further trace of the identity of the Alexandrine Canon with the Palestinian is found in the Apocalypse of Esdras [2 ESDRAS], where "24 open books" are specially distinguished from the mass of esoteric writings which were dictated to Ezra by inspiration (2 Esdr. xiv. 44 ff.).

From the combination of this evidence there can be no reasonable doubt that at the beginning of the Christian era the Jews had only one Canon of the Sacred writings, defined distinctly in Palestine, and

<sup>m</sup> Notwithstanding the unanimous judgment of later writers, there are traces of the existence of doubts among the first Jewish doctors as to some books. Thus in the Mishna (Jad. 3, 5) a discussion is recorded as to Cant. and Eccles. whether they "soil the hands;" and a difference as to the latter book existed between the great schools of Hillel and Shammai. The same doubts as to Eccles. are repeated in another form in the Talmud (Sabb. f. 80, 2), where it is said that the book would have been concealed (נִסְתָּר) but for the quotations at the beginning and the end. Comp. Hieron. *Comm. in Eccles.* s. l.: "Aiant Hebraei cum inter cetera scripta Salomonis quae antiquata sunt nec in memoria draverunt, et hic liber oblitrandus videretur, eo quod vanas dei auereret creaturas . . . ex hoc uno capitulo (xli.

meruisse auctoritatem . . ." Parallel passages are quoted in the notes on the passage, and by Bleek, *Stud. u. Krit.* 1853, pp. 322 ff. The doubts as to Esther have been already noticed.

A series of references to the Apocryphal books from Jewish writers has been made by Hottinger (*Theol. Philol.* 1659), and collected and reprinted by Wordsworth (*On the Canon of the Scriptures*, App. C.). Compare also the valuable notices in Zuntz, *D. Gottesd. Vortr. d. Juden.* pp. 126 ff.

<sup>n</sup> The dream of a second and third revision of the Jewish canon—in the times of Eleazer and Hillel, by which the Apocryphal books were ratified (Genebrard), rests on no basis whatever. The supposition that the Jews rejected the Apocrypha after our Lord's coming (Card. Perron) is equally unfounded. Cosin, *Canon of Scripture*, §§23, 25.

admitted, though with a less definite apprehension of its peculiar characteristics, by the Hellenizing Jews of the Dispersion, and that this Canon was recognized, as far as can be determined, by our Lord and His apostles. But on the other hand, the connexion of other religious books with the Greek translation of the O. T., and their common use in Egypt was already opening the way for an extension of the original Canon, and assigning an authority to later writings which they did not derive from ecclesiastical sanction.

III. a. *The History of the Christian Canon of the Old Testament.*—The history of the Old Testament Canon among Christian writers exhibits the natural issue of the currency of the LXX., enlarged as it had been by apocryphal additions. In proportion as the Fathers were more or less absolutely dependent on that version for their knowledge of the Old Testament Scriptures, they gradually lost in common practice the sense of the difference between the books of the Hebrew Canon and the Apocrypha. The custom of individuals grew into the custom of the Church; and the public use of the Apocryphal books obliterated in popular regard the characteristic marks of their origin and value, which could only be discovered by the scholar. But the custom of the Church was not fixed in an absolute judgment. It might seem as if the great leaders of the Christian Body shrink by a wise forethought from a work for which they were unfitted; for by acquiescences and constitution they were little capable of solving a problem which must at last depend on historical data. And this remark must be applied to the details of patristic evidence on the contents of the Canon. Their habit must be distinguished from their judgment. The want of critical tact which allowed them to use the most obviously pseudonymous works (2 Esdras, Enoch) as genuine prophecies of their supposed authors, or as "divine Scripture," greatly diminishes the value of casual and isolated testimonies to single books. In such cases the form as well as the fact of the attestation requires to be examined, and after this the combined witness of different Churches can alone suffice to stamp a book with ecclesiastical authority.

The confusion which was necessarily introduced by the use of the LXX. was further increased when the Western Church rose in importance. The LXX. itself was the original of the Old Latin, and the recollection of the original distinction between the constituent books of the Bible became more and more difficult in the version of a version; and at the same time the Hebrew Church dwindled down to an obscure sect, and the intercourse between the Churches of the East and West grew less intimate. The impulse which instigated Melito in the second century to seek in "the East" an "accurate" account of "the books of the Old Testament," gradually lost its force as the Jewish nation and literature were further withdrawn from the circle of Christian knowledge. The Old Latin version converted use popularly into belief, and the investigations of Jerome were unable to counteract the feeling which had gained strength silently, without any distinct and authoritative sanction. Yet one important, though obscure, protest was made against the growing error. The Nazarenes, the relics of the Hebrew Church, in addition to the New Testament "made use of the Old Testament, as the Jews" (Epiph. *Hæc.* xxix. 7). They had "the whole Law, and the Prophets, and the Hagiographa so called, that is the poetical books, and

the Kings, and Chronicles and Esther, and all the other books in Hebrew" (Epiph. *l. c.* παρ' αὐτοῖς γὰρ πᾶς ὁ νόμος καὶ οἱ προφῆται καὶ τὰ γραφεῖα λεγόμενα, φησὶ δὲ τὰ στιχῆρη, καὶ αἱ βασιλείαι καὶ παραλειπόμενα, καὶ Αἰσῆθρ καὶ τὰλλα πάντα Ἑβραϊκῶς ἀναγινώσκονται). And in connexion with this fact, it is worthy of remark that JUSTIN MARTYR, who drew his knowledge of Christianity from Palestine, makes no use of the Apocryphal writings in any of his works.

From what has been said, it is evident that the history of the Christian Canon is to be sought in the first instance from definite catalogues and not from isolated quotations. But even this evidence is incomplete and unsatisfactory. A comparison of the subjoined table (No. I.) of the chief extant Catalogues will show how few of them are really independent; and the later transcriptions are commonly of no value, as they do not appear to have been made with any critical appreciation of their distinctive worth.

These Catalogues evidently fall into two great classes, Hebrew and Latin; and the former, again, exhibits three distinct varieties, which are to be traced to the three original sources from which the Catalogues were derived. The first may be called the pure Hebrew Canon, which is that of the Church of England (the *Talmud*, *Jerome*, *Joim. Damasc.*). The second differs from this by the omission of the book of Esther (*Melito* [*Athanas.*] *Syn. S. Script.*, *Greg. Naz.*, *Amphiloch.*, *Leont.*, *Niceph.*, *Cullist.*). The third differs by the addition of Baruch, or "the Letter" (*Origen*, *Athanas.*, *Cyr. Hieros.*, [*Concil. Laod.*], *Hil. Pictav.*). The omission of Esther may mark a real variation in the opinion of the Jewish Church [*ESHER*], but the addition of Baruch is probably due to the place which it occupied in direct connexion with Jeremiah, not only in the Greek and Latin translations, but perhaps also in some copies of the Hebrew text [*BARUCH*, *BOOK OF*]. This is rendered more likely by the converse fact that the Lamentations and Baruch are not distinctly enumerated by many writers, who certainly received both books. During the four first centuries this Hebrew Canon is the only one which is distinctly recognised, and it is supported by the combined authority of those fathers whose critical judgment is entitled to the greatest weight. In the meantime, however, as has been already noticed, the common usage of the early fathers was influenced by the position which the Apocryphal books occupied in the current versions, and they quoted them frequently as Scripture, when they were not led to refer to the judgment of antiquity. The subjoined table (No. II.) will show the extent and character of this partial testimony to the disputed books.

These casual testimonies are, however, of comparatively slight value, and are, in many cases, opposed to the deliberate judgment of the authors from whom they are quoted. The real divergence as to the contents of the Old Testament Canon is to be traced to AUGUSTINE, whose wavering and uncertain language on the point furnishes abundant materials for controversy. By education and character he occupied a position more than usually unfavourable for historical criticism, and yet his overpowering influence, when it fell in with ordinary usage, gave consistency and strength to the opinion which he appeared to advocate, for it may be reasonably doubted whether he differed intentionally from Jerome except in language. In a

## No. I.—CHRISTIAN CATALOGUES OF THE BOOKS OF THE OLD TESTAMENT.

The list extends only to such books as are disputed. Of the signs, \* indicates that the book is expressly reckoned as *Holy Scripture*: † that it is placed expressly in a *second* rank: ? that it is mentioned with *doubt*. A blank marks the silence of the author as to the book in question.

famous passage (*de Doctr. Christ.* ii. 8 (13)) he enumerates the books which are contained in "the whole Canon of Scripture," and includes among them the apocryphal books without any clear mark of distinction. This general statement is further confirmed by two other passages, in which it is argued that he draws a distinction between the Jewish and Christian Canons, and refers the authority of the Apocryphal books to the judgment of the Christian Church. In the first passage he speaks of the Maccabæan history as not "found in the Sacred Scriptures which are called canonical, but in others, among which are also the books of the Maccabees, which the Church, and not the Jews, holds for canonical, on account of the marvellous sufferings of the martyrs [recorded in them] . . ." (*quorum supputatio temporum non in Scripturis Sanctis, quæ Canonice appellantur, sed in aliis invenitur, in quibus sunt et Machabæorum libri, quos non Judæi, sed ecclesia pro Canonicis habet . . . de Civ. xviii. 36*). In the other passage he speaks of the books of the Maccabees as "received (recepta) by the Church, not without profit, if they be read with sobriety" (*c. Gaud. i. 38*). But it will be noticed that

in each case a distinction is drawn between the "Ecclesiastical" and properly "Canonical" books. In the second case he expressly lowers the authority of the books of the Maccabees by remarking that "the Jews have them not like the Law, the Psalms, and the Prophets to which the Lord gives His witness" (*Aug. l. c.*). And the original catalogue is equally qualified by an introduction which distinguishes between the authority of books which are received by all and by some of the Churches; and, again, between those which are received by churches of great or of small weight (*de Doctr. Chr. ii. 8 (12)*) so that the list which immediately follows must be interpreted by this rule. In confirmation of this view of Augustine's special regard for the Hebrew Canon, it may be further urged that he appeals to the Jews, "the librarians of the Christians," as possessing "all the writings in which Christ was prophesied of" (*In Ps. xl., Ps. lvi.*), and to "the Law, the Psalms, and the Prophets," which were supported by the witness of the Jews (*c. Gaud. l. c.*), as including "all the canonical authorities of the Sacred books" (*de unit. Eccles. 16*), which, as he says in another place (*de Civ. xv.*

## NOTES ON TABLE NO. I.

<sup>1</sup> The evidence against the authenticity of this Canon, as an original part of the collection, is decisive, in spite of the defence of Bickell (*Stud. u. Krft.* iii. 611 ff.), as the present writer has shown at length in another place (*Hist. of N. T. Canon*, iv. 498 ff.). The Canon recurs in the *Copibular Aquigran*, c. xx., with the omission of *Baruch* and *Lamentations*.

<sup>2</sup> The same Canon appears in Conc. Hipp. *Can.* xxxvi. The Greek version of the Canon omits the books of Maccabees; and the history of the Council itself is very obscure. Comp. Cosin. §82.

<sup>3</sup> This Canon mentions three books of the Maccabees. *Judith* is not found in some MSS.; and generally it may be observed that the published text of the Conciliar Canons needs a thorough revision. Ecclesiasticus is thus mentioned: *ἔθεν δὲ προσετίθησαν οὗτοι μαθηταὶ ὡς τὸν τοῦ νῦν τὴν σφύραν τοῦ πολυμαθοῦς Σιράχ.* Comp. *Constit. Apost.* ii. 57.

<sup>4</sup> The Canons of Laodicea, Carthage, and the Apostolic Canons, were all ratified in the Quin-Sextine Council, *Can. 2*.

<sup>5</sup> *Ἰερωνὺς σὺν ἑσθίονι καὶ ἰεροτολῇ ἐν ἐν.* Origen expressly says that this catalogue is *ὡς Ἑβραίοι παρορίσσει*, and begins with the words: *εἰς δὲ αἱ εἰκοσι δύο βιβλαὶ καὶ ἑβραίοις αἰδε.* He quotes several of the Apocryphal books as Scripture, as will be seen below; and in his letter to Africanus defends the interpolated Greek text of Daniel and the other O. T. books, on the ground of their public use (*Ep. ad Afric.* § 3, ff.). The whole of this last passage is of the deepest interest, and places in the clearest light the influence which the LXX. exercised on common opinion.

<sup>6</sup> Athanasius closes his whole catalogue with the words: *ταῦτα ἡμεῖς τὸν συντηροῦν . . . ἐν τοῖς μὲν οὖν τὸ τῆς εὐσεβείας διδασκαλῆς ἐνυγκρίσεται. μηδὲς τούτους ἐπιβαλλέτω: μηδὲ τούτων ἀφαιρέστω τ. . . . ὅσιν καὶ ἕτερα βιβλία τούτων ἔθεν, οὐ καὶ κανονίζονται μὲν τοῖσι μὲν δὲ παρὰ τὴν πατρίαν ἀναγιγνωσκέσθαι τὸν ἄρτι προσερχομένους καὶ βουλομένοις κατηχεῖσθαι τὸν τῆς εὐσεβείας λόγον.*

<sup>7</sup> The list of the Apocryphal books is prefaced by a clause nearly identical with that in Athanasius. In a second enumeration (Credner, *a. a. O.* p. 144), three books of the *Maccabees* and *Susanna* are enumerated among the *ἀπὸ τῶν ἁγίων*.

<sup>8</sup> The Apocryphal books are headed: *καὶ δοκεῖ ἀντιλέγονται τῇ παλαιᾷ ἀγρᾷ εἶναι. Σωσάννα (i. e. Add. to Daniel) is reckoned among them.*

<sup>9</sup> The catalogue ends with the words: *πάσαις ἔχεις. εἰ τὴν δὲ τούτων ἀγρᾷ οὐκ ἐν γνήσιος.*

<sup>10</sup> The verses occur under the name of Gregory of Nazianzen, but are generally referred to Amphilocheus. Of Euthy he says: *τούτοις προσερχομένοις τὴν ἑσθίον.* He concludes: *ὅσους ἀφαιρέστας Κανὼν ἐν εἰς τὴν θεοπνευστων γραφῶν.*

<sup>11</sup> Euphranitus adds of Wisdom and Ecclesi. *ἡμεῖς μὲν εἰς καὶ ἀφαιρέτω, ἀλλ' εἰς ἀμφοῖν ἡμεῖς οὐκ ἀναφύρονται, διὰ οὐδὲ . . . ἐν τῇ τῆς διαθήκης κεινῇ* [*ἀντι-*

*θεσῶν*]. The same catalogue is repeated *de Mens.* p. 180. In another place (*adv. haer.* lxxvi. p. 941), he speaks of the teaching contained in "the xxii. books" of the Old Test., in the New Test., and then *ἐν ταῖς Σοφίαις, Σολομῶντος τε θμῶ καὶ νου Σιράχ καὶ πάσαις ἀπλῶς θείας γραφαῖς.* In a third catalogue (*adv. haer.* v. p. 19) he adds the letters of *Baruch* and *Jeremiah* (which he elsewhere specially notices as wanting in the Hebrew, *de Mens.* p. 163), and speaks of Wisdom and Ecclesi. as *ἐν ἀμφιέκτῃ* (among the Jews), *χωρὶς ἄλλων τῶν βιβλίων ἐναποκρύφω.* Comp. *adv. haer.* xxix. p. 122.

<sup>12</sup> *Ἰερον. l. c. ταῦτα ἐστὶ καὶ κανονίζονται βιβλία ἐν τῇ ἐκκλησίᾳ καὶ παλαιὰ καὶ νέα, ἐν ταῖς παλαιαῖς πάντα δεχόμενοι αἱ Ἑβραίοι.*

<sup>13</sup> *Joan. Damasc. l. c. ἡ σοφία τοῦ Σολομῶντος καὶ ἡ Σοφία τοῦ Ἰησοῦ . . . ἐνέμενοι μὲν καὶ καλὰ ἀλλ' οὐκ ἀρμόζοντα, οὐδὲ ἐκτενὲς ἐν τῇ κεινῇ.*

<sup>14</sup> *Onibus nonnulli adficiunt Esther, Judith, et Tobit, iactæ δὲ τούτων τῇ γραφῇ ἐκείνῃ νόθον* (Hody, l. c.).

<sup>15</sup> *Isid. l. c. Quibusdam autem visum est addita Tobia et Judith xxiv. libros secundum numerum graecarum litterarum connumerare . . .*

<sup>16</sup> *Isid. l. c. Quicquid extra hos (the books of the Hebrew canon) est, inter apocrypha ponendum. Igitur Sapientia, quae vulgo Salomonis inscribitur, et Jesu filii Sirach liber, et Judith et Tobias et Pastor non sunt in canone. Machabæorum primum librum Hebraicum reperimus Graecus est. . . . Cf. Prolog. in Libros Salom. ad Chrym. et Heliod. Fertur et Παράφρασις, Jesu filii Sirach liber, et alius ψευδής, quae Sapientia Salomonis inscribitur. . . . Sicut ergo Judith et Tobit, et Machabæorum libros legit quidem ecclesia, sed inter canonicos non recipit, sic et haec duo volumina legit ad edificationem plebis, non et auctoritatem ecclesiasticorum dogmatum confirmandam. Comp. Prologus in Dan. Hierem., Tobit, Judith, Jonam; Ep. ad Antimum, lili. Hence at the close of Euthy one very ancient MS., quoted by Martianus on the place, adds: *ἡμεῖς καὶ completum est Vet. Test. id est, omnes canonicae Scripturae . . . quae transiit Hieronymus . . . de Hebraica veritate . . . caeterae vero Scripturae, quae non sunt canonicae, sed dicuntur ecclesiasticae, istae sunt, id est . . . giving the list contained in Prolog. Galat.**

<sup>17</sup> After giving the Hebrew canon and the received canon of N. T., Rufinus says: *Sciendum tamen est, quod et alii libri sunt, qui non canonici sed ecclesiastici a majoribus appellati sunt, id est, Sapientia, quae dicitur Salomonis, et alia Sapientia quae dicitur filii Sirach . . . ejusdem vero ordinis libellus est Tobias et Judith et Machabæorum libri. . . . Quae omnia legi quidem in ecclesiis voluntur, non tamen proferri ad auctoritatem ex his fidel confirmandam. Caeteras vero Scripturas apocryphas nominantur, quas in ecclesiis legi voluntur.*

<sup>18</sup> See below.

<sup>19</sup> Cassiodorus gives also, however, with marks of high respect, the catalogue of Jerome. Comp. Cosin, § 89.

<sup>20</sup> Isidorus, like Cassiodorus, gives the catalogue of Jerome, as well as that of Augustine. Comp. Cosin, § 103.

23, 4), "were preserved in the temple of the Hebrew people by the care of the successful priests." But on the other hand Augustine frequently uses passages from the apocryphal books as co-ordinate with Scripture, and practically disregards the rules of distinction between the various classes of Sacred writings which he had himself laid down. He stood on the extreme verge of the age of independent learning, and follows at one time the conclusions of criticism, at another the prescriptions of habit, which from his date grew more and more powerful.

The enlarged Canon of Augustine, which was, as it will be seen, wholly unsupported by any Greek authority, was adopted at the Council of CARTHAGE (A.C. 397 ?), though with a reservation (Can. 47, *De confirmando isto Canone transmarina ecclesia consultatur*), and afterwards published in the decretals which bear the name of INNOCENT, DAMASUS, and GELASIUS (cf. Credner, *Zur Gesch. d. Kan.* 151 ff.); and it recurs in many later writers. But nevertheless a continuous succession of the more learned fathers in the West maintained the distinctive authority of the Hebrew Canon up to the period of the Reformation. In the 6th century PRIMARIUS (*Comm. in Apoc. iv.* Cosin, §92 ?), in the 7th GREGORY the Great (*Moral.* xix. 21, p. 622), in the 8th BEDE (*In Apoc. iv. ?*), in the 9th ALCUIN (*ap. Hody*, 654; yet see *Carm.* vi., vii.), in the 10th RADULPHUS PLAV. (*In Levit.* xiv. Hody, 655), in the 12th PETER OF CLUGNI (*Ep. c. Petr.* Hody, l. c.), HUGO DE S. VICTORE (*de Script.* 6), and JOHN OF SALISBURY (Hody, 656; Cosin, §130), in the 13th HUGO CARDINALIS (Hody, 656), in the 14th NICHOLAS LIRANUS (Hody, p. 657; Cosin, §146), WICLIF (? comp. Hody, 658), and OCCAM (Hody, 657; Cosin, §147), in the 15th THOMAS ANGLICUS (Cosin, §150), and THOMAS DE WALDEN (*Id.* §151), in the 16th Card. XIMENES (*Ed. Compl. Pref.*), SIXTUS SEVENSIUS (*Biblioth.* i. 1), and Card. CAJETAN (Hody, p. 662; Cosin, §173), repeat with approval the decision of Jerome, and draw a clear line between the Canonical and Apocryphal books (Cosin, *Scholaistical History of the Canon*; REUSS, *Die Gesch. d. Heiligen Schriften N. T.*, Ed. 2, §328).

Up to the date of the COUNCIL OF TRENT, the Romanists allow that the question of the Canon was open, but one of the first labours of that assembly was to circumscribe a freedom which the growth of literature seemed to render perilous. The decree of the Council "on the Canonical Scriptures," which was made at the 4th Session (April 8th, 1546), at which about 53 representatives were present, pronounced the enlarged Canon, including the apocryphal books, to be deserving in all its parts of "equal veneration" (*pari pietatis affectu*), and added a list of books "to prevent the possibility of doubt" (*ne cui dubitatio suboriri possit*). This hasty and peremptory decree, unlike in its form to any catalogue before published, was closed by a solemn anathema against all who should "not receive the entire books with all their parts as sacred and canonical" (*Si quis autem libros ipsos integros cum omnibus suis partibus, prout in ecclesia catholica legi consueverunt et in veteri vulgata Latine editione habentur, pro*

sacris et canonicis non susceperit . . . anathema esto, *Conc. Trid. Sess. iv.*). This decree was not, however, passed without opposition (Sarpi, 139 ff. ed. 1655, though Pallavacino denies this); and in spite of the absolute terms in which it is expressed, later Romanists have sought to find a method of escaping from the definite equalization of the two classes of Sacred writings by a forced interpretation of the subsidiary clauses. In Pin (*Dissert. prelim.* i. 1), Lamy (*App. Bibl.* ii. 5), and Jahn (*Etol. ind. A. T.*, i. 141 ff. *ap. Reuss, a. a. O.* §337), endeavoured to establish two classes of proto-Canonical, and deuterocanonical books, attributing to the first a dogmatic, and to the second only an ethical authority. But such a classification, however true it may be, is obviously at variance with the terms of the Tridentine decision, and has found comparatively little favour among Romish writers (comp. [Herbst] Welte, *Etol. ii.* ff. 1 f.).

The reformed churches unanimously agreed in confirming the Hebrew Canon of Jerome, and refused to allow any dogmatic authority to the apocryphal books, but the form in which this judgment was expressed varied considerably in the different confessions. The Lutheran formulae contain no definite article on the subject, but the note which Luther placed in the front of his German translation of the Apocrypha (ed. 1534), is an adequate declaration of the later judgment of the Communion: "Apocrypha, that is Books which are not placed on an equal footing (*nicht gleich gehalten*) with Holy Scripture, and yet are profitable and good for reading." This general view was further expanded in the special prefaces to the separate books in which Luther freely criticized their individual worth, and wholly rejected 3 and 4 Esdras, as unworthy of translation. At an earlier period Carlstadt (1520) published a critical essay, *De canonicis scripturis libellus* (reprinted in Credner, *Zur Gesch. d. Kan.* pp. 291 ff.), in which he followed the Hebrew division of the Canonical books into three ranks, and added Wisd., Ecclesi., Judith, Tobit, 1 and 2 Macc., as Hagiographa, though not included in the Hebrew collection, while he rejected the remainder of the Apocrypha with considerable parts of Daniel as "utterly apocryphal" (*plane apocryphi*; Credn. pp. 389, 410 ff.).

The Calvinistic churches generally treated the question with more precision, and introduced into their symbolic documents a distinction between the "Canonical" and "Apocryphal," or "Ecclesiastical" books. The Gallican confession (1561), after an enumeration of the Hieronymian Canon (*Art. 3*), adds (*Art. 4*) "that the other ecclesiastical books are useful, yet not such that any article of faith could be established out of them" (*quo [sc. Spiritu Sancto] suggerente docemur, illos [sc. libros Canonicos] ab aliis libris ecclesiasticis discernere, qui, ut sint utiles, non sunt tamen ejusmodi, ut ex his constitui possit aliquis fidei articulus*). The Belgic Confession (1561?) contains a similar enumeration of the Canonical books (*Art. 4*), and allows their public use by the Church, but denies to them all independent authority in matters of faith (*Art. 6*). The later Helvetic Confession (1562, Bullinger) notices the distinction between the Canonical and Apocryphal books without pronouncing any judgment on the question (Niemeyer, *Libr. Symb. Eccles. Ref.* p. 468). The Westminster Confession (*Art. 3*) places the Apocryphal books on a level with other human writings, and concedes to them no other authority in the Church.

\* The history of the Catalogue published at the Council of Florence (1441) is obscure (Cosin, §§159 f.), and it was probably limited to the determination of books for Ecclesiastical use (Reuss, §325).

The English Church (*Art. 6*) appeals directly to the opinion of St. Jerome, and concedes to the Apocryphal books (including [1571] 4 Esdras and The prayer of Manasses<sup>†</sup>) a use "for example of life and instruction of manners," but not for the establishment of doctrine; and a similar decision is given in the Irish Articles of 1815 (Hardwick, *l. c.*, 341 f.). The original English Articles of 1552 contained no catalogue (*Art. 5*) of the contents of "Holy Scripture," and no mention of the Apocrypha, although the Tridentine decree (1546) might seem to have rendered this necessary. The example of foreign Churches may have led to the addition upon the later revision.

The expressed opinion of the later Greek Church on the Canon of Scripture has been modified in some cases by the circumstances under which the declaration was made. The "Confession" of Cyril Lucar, who was most favourably disposed towards the Protestant churches, confirms the Laodicene Catalogue, and marks the Apocryphal books as not possessing the same divine authority as those whose canonicity is unquestioned (Kimmel, *Mon. Fül. Eccles. Or. i.* p. 42, τὸ κύριον πῶρὰ τοῦ παναγίου πνεύματος οὐκ ἔχουσιν ὡς τὰ κυρία καὶ ἀναμφιβόλως κανονικὰ βιβλία). In this judgment Cyril Lucar was followed by his friend Metrophanes Critopolus, in whose confession a complete list of the books of the Hebrew Canon is given (Kimmel, *ii.* pp. 105 f.), while some value is assigned to the Apocryphal books ἀποβλήτους οὐκ ἡγούμεθα in consideration of their ethical value; and the detailed decision of Metrophanes is quoted with approval in the "Orthodox Teaching" of Platon, Metropolitan of Moscow (ed. Athens, 1836, p. 59). The "Orthodox Confession" simply refers the subject of Scripture to the Church (Kimmel, p. 159, ἡ ἐκκλησία ἔχει τὴν ἐξουσίαν . . . νὰ δοκιμάσῃ τὰς γραφάς; comp. p. 123). On the other hand the Synod at Jerusalem, held in 1672, "against the Calvinists," which is commonly said to have been led by Romish influence (yet comp. Kimmel, p. lxxxviii.), pronounced that the books which Cyril Lucar "ignorantly or maliciously called apocryphal," are "canonical and Holy Scripture," on the authority of the testimony of the ancient Church ([Kimmel,] Weissenborn, *Doct. Confess.* pp. 467 f.). The Constantinopolitan Synod, which was held in the same year, notices the difference existing between the Apostolic, Laodicene, and Carthaginian Catalogues, and appears to distinguish the Apocryphal books as not wholly to be rejected (ὅσα μέντοι τῶν τῆς παλαιᾶς διαθήκης βιβλίων τῇ ἀναριθμῶσει τῶν ἀγιογράφων οὐ συμπεριλαμβάνονται . . . οὐκ ἀπόβλητα τυγχάνουσι διδόναι). The authorised Russian Catechism (*The Doctrine of the Russian Church*, &c., by Rev. W. Blackmore, Aberd., 1845, pp. 37 ff.) distinctly quotes and defends the Hebrew Canon on the authority of the Greek Fathers, and repeats the judgment of Athanasius on the usefulness of the Apocryphal books as a preparatory study in the Bible; and there can be no doubt but that the current of Greek opinion, in accordance with the unanimous agreement of the ancient Greek Catalogues, coincides with this judgment.

The history of the Syrian Canon of the O. T. is involved in great obscurity from the scantiness of the evidence which can be brought to bear upon it.

The Peshito was made, in the first instance, directly from the Hebrew, and consequently adhered to the Hebrew Canon; but as the LXX. was used afterwards in revising the version, so many of the Apocryphal books were translated from the Greek at an early period, and added to the original collection (*Assem. Bibl. Or. i.* 71). Yet this change was only made gradually. In the time of Ephrem (c. A.D. 370) the Apocryphal additions to Daniel were yet wanting, and his commentaries were confined to the books of the Hebrew Canon, though he was acquainted with the Apocrypha (Lardner, *Credibility*, &c., iv. pp. 427 f.; see Lengerke, *Daniel*, exil.). The later Syrian writers do not throw much light upon the question. Gregory Bar Hebraeus, in his short commentary on Scripture, treats of the books in the following order (*Assem. Bibl. Orient. ii.* 282): the Pentateuch, Josh., Judg., 1 & 2 Sam., Ps., 1 & 2 K., Prov., *Ecclos.*, *Ecl.*, Cant., *Wisd.*, Ruth, *Hist. Sus.*, Job, Is., 12 Proph., Jer., Lam., Ez., Dan., *Bel.*, 4 Gosp., Acts . . . 14 Epist. of St. Paul, omitting 1 & 2 Chr., Ezr., Neh., Esther, *Tobit*, 1 & 2 Macc., *Judith*, (*Baruch*?), *Apocalypse*, Epist. James, 1 Pet., 1 John.

In the Scriptural Vocabulary of Jacob of Edessa (*Assem. l. c.* p. 499), the order and number of the books commented upon is somewhat different: Pent., Josh., Jud., Job, 1 & 2 Sam., David (i. e. Ps.), 1 & 2 K., Is., 12 Proph., Jer., Lam., *Baruch*, Ez., Dan., Prov., *Wisd.*, Cant., Ruth, Esth., *Judith*, *Ecclos.*, Acts, Epist. James, 1 Pet., 1 John, 14 Epist. of St. Paul, 4 Gosp., omitting 1 & 2 Chr., Ezr., Neh., *Ecl.*, *Tobit*, 1 & 2 Macc., *Apoc.* (comp. *Assem. Bibl. Orient. iii.* 4 not.).

The Catalogue of Ebed-Jesu (*Assem. Bibl. Orient.*, iii. 5 ff.) is rather a general survey of all the Hebrew and Christian literature with which he was acquainted (Catalogus librorum omnium Ecclesiasticorum) than a Canon of Scripture. After enumerating the books of the Hebrew Canon, together with *Ecclos.*, *Wisd.*, *Judith*, add. to *Dim.*, and *Baruch*, he adds, without any break, "the traditions of the Elders" (Mishnah), the works of Josephus, including the Fables of Aesop which were popularly ascribed to him, and at the end mentions the "book of *Tobias and Tobit*." In the like manner, after enumerating the 4 Gosp., Acts, 3 Cath. Epist. and 14 Epist. of St. Paul, he passes at once to the Diatessaron of Tatian, and the writings of "the disciples of the Apostles." Little dependence, however, can be placed on these lists, as they rest on no critical foundation, and it is known from other sources that varieties of opinion on the subject of the Canon existed in the Syrian Church (*Assem. Bibl. Orient. iii.* 6 not.).

One testimony, however, which derives its origin from the Syrian Church, is specially worthy of notice. Junilius, an African bishop of the 6th century, has preserved a full and interesting account of the teaching of Paulus, a Persian, on Holy Scripture, who was educated at Nisibis where "the Divine Law was regularly explained by public masters," as a branch of common education (*Junil. De part. leg. Praef.*). He divides the books of the Bible into two classes, those of "perfect," and those of "mean" authority. The first class includes all the books of the Hebrew Canon with the exception of 1 & 2 Chr., Job, Canticles, and Esther, and with the addition of *Ecclesiasticus*. The second class consists of Chronicles (2), Job, Esdras (2), *Judith*, Esther, and *Macabees* (2), which are added by "very many" (*plurimi*) to the Canonised

<sup>†</sup> The Latin copy of 1562 includes only 2, 3 Esd., *Wisd.*, *Ecclos.*, *Tobit*, Jud., 1, 2 Macc. (Hardwick, *Hist. of Art.* p. 275).

books. The remaining books are pronounced to be of no authority, and of these Canticles and Wisdom are said to be added by "some" (*quidam*) to the Canon. The classification as it stands is not without difficulties, but it deserves more attention than it has received (comp. Hody, p. 653; Gallandi, *Biblioth.* xii. 79 ff. The reprint in Wordsworth, *On the Canon*, App. A., pp. 42 ff., is very imperfect).

The Armenian Canon, as far as it can be ascertained from editions, follows that of the LXX., but it is of no critical authority; and a similar remark applies to the Aethiopian Canon, though it is more easy in this case to trace the changes through which it has passed (Dillmann, *Ueber d. Aeth. Kan.*, in Ewald's *Jahrbuch*, 1853, pp. 144 ff.).

In addition to the books already quoted under the heads for which they are specially valuable, some still remain to be noticed. C. F. Schmid, *Hist. ant. et vindic. Can. S. Vet. et Nov. Test.*, Lips. 1775. [H. Corrodi], *Versuch einer Beleuchtung . . . d. Bibl. Kanons*, Halle, 1792; Movers, *Loci quidam Hist. Can. V. T. illustrati*, Breslau, 1842. The great work of Hody (*De biblior. text.*, Oxon. 1705) contains a rich store of materials, though even this is not free from minor errors. Stuart's *Critical History and Defence of the Old Test. Canon*, London, 1849, is rather an apology than a history.

IV. *The history of the Canon of the New Testament.*—The history of the Canon of the N. T. presents a remarkable analogy to that of the Canon of the O. T. The beginnings of both Canons are obscure from the circumstances under which they arose: both grew silently under the guidance of an inward instinct rather than by the force of external authority: both were connected with other religious literature by a series of books which claimed a partial and questionable authority: both gained definiteness in times of persecution. The chief difference lies in the general consent with which all the churches of the West have joined in ratifying one Canon of the N. T., while they are divided as to the position of the O. T. Apocrypha.

The history of the N. T. Canon may be conveniently divided into three periods. The first extends to the time of Hegesippus (c. A.D. 170), and includes the era of the separate circulation and gradual collection of the Apostolic writings. The second is closed by the persecution of Diocletian (A.D. 303), and marks the separation of the sacred writings from the remaining Ecclesiastical literature. The third may be defined by the third Council of Carthage (A.D. 397), in which a catalogue of the books of Scripture was formally ratified by conciliar authority. The first is characteristically a period of tradition, the second of speculation, the third of authority; and it is not difficult to trace the features of the successive ages in the course of the history of the Canon.

1. *The history of the Canon of the New Testament to 170 A.D.*—The writings of the N. T. themselves contain little more than faint, and perhaps unconscious intimations of the position which they were destined to occupy. The mission of the Apostles was essentially one of preaching and not of writing; of founding a present church and not of legislating for a future one. The "word" is essentially one of "hearing," "received," and

"handed down," a "message," a "proclamation." Written instruction was in each particular case only occasional and fragmentary; and the completeness of the entire collection of the incidental records thus formed is one of the most striking proofs of the Providential power which guided the natural development of the church. The prevailing method of interpreting the O. T., and the peculiar position which the first Christians occupied, as standing upon the verge of "the coming age" (*aión*), seemed to preclude the necessity and even the idea of a "New Testament." Yet even thus, though there is nothing to indicate that the Apostles regarded their written remains as likely to preserve a perfect exhibition of the sum of Christian truth, coordinate with the Law and the Prophets, they claim for their writings a public use (1 Thess. v. 27; Col. iv. 16; Rev. xxii. 18), and authoritative power (1 Tim. iv. 1 ff.; 2 Thess. iii. 6; Rev. xxii. 19); and, at the time when 2 Peter was written, which on any supposition is an extremely early writing, the Epistles of St. Paul were placed in significant connexion with "the other Scriptures"<sup>4</sup> (*τὰς λοιπὰς γραφάς*, not *τὰς ἄλλας γραφάς*).

The transition from the Apostolic to the sub-Apostolic age is essentially abrupt and striking. An age of conservatism succeeds an age of creation; but in feeling and general character the period which followed the working of the Apostles seems to have been a faithful reflection of that which they moulded. The remains of the literature to which it gave birth, which are wholly Greek, are singularly scanty and limited in range, merely a few Letters and "Apologies." As yet writing among Christians was, as a general rule, the result of a pressing necessity and not of choice; and under such circumstances it is vain to expect either a distinct consciousness of the necessity of a written Canon, or any clear testimony as to its limits.

The writings of the APOSTOLIC FATHERS (c. 70-120 A.D.) are all occasional. They sprang out of peculiar circumstances, and offered little scope for quotation. At the same time, the Apostolic tradition was still fresh in the memories of men, and the need of written Gospels was not yet made evident by the corruption of the oral narrative. As a consequence of this, the testimony of the Apostolic fathers is chiefly important as proving the general currency of such outlines of history and types of doctrine as are preserved in our Canon. They show in this way that the Canonical books offer an adequate explanation of the belief of the next age, and must therefore represent completely the earlier teaching on which that was based. In three places, however, in which it was natural to look for a more distinct reference, Clement (*Ep.* 47), Ignatius (*ad Eph.* 12), and Polycarp (*Ep.* 3) refer to Apostolic Epistles written to those whom they were themselves addressing. The casual coincidences of the writings of the Apostolic fathers with the language of the Epistles are much more extensive. With the exception of the Epistles of *Jude*, *2 Peter*, and *2, 3 John*,<sup>5</sup> with which no coincidences occur, and 1, 2 Thessalonians, Colossians, Titus, and Philemon, with which the coincidences are very questionable, all the other Epistles were clearly known, and used by them; but still they are not quoted with the formulas which preface citations from the O. T.

<sup>4</sup> The late tradition commonly quoted from Photius (*Biblioth.* 254) to show that St. John completed the Canon refers only to the Gospels: τοὺς τόμους οὐ ἀνέγραψαν διαφόροις γλώσσαις τὰ σωτήρια τοῦ

θεοῦ καὶ τῆς ἐκκλησίας καὶ διδάγματα . . . διδάσκειν καὶ συνδιεσφάρονται . . .

<sup>5</sup> The titles of the disputed books of the N. T. are italicized throughout, for convenience of reference.

(ἡ γραφή λέγει, γέγραπται, &c.),<sup>a</sup> nor is the famous phrase of Ignatius (*ad Philad.* 5, *προσφυγὼν τῷ εὐαγγελίῳ ἀπὸ τοῦ Ἰησοῦ καὶ τοῖς ἀποστόλοις ὡς πρεσβυτερίῳ ἐκκλησίας*) sufficient to prove the existence of a collection of Apostolic records as distinct from the sum of Apostolic teaching. The coincidences with the Gospels on the other hand both in fact and substance are numerous and interesting, but such as cannot be referred to the exclusive use of our present written Gospels. Such a use would have been alien from the character of the age and inconsistent with the influence of a historical tradition. The details of the life of Christ were still too fresh to be sought for only in fixed records; and even where memory was less active, long habit interposed a barrier to the recognition of new Scriptures. The sense of the infinite depth and paramount authority of the O. T. was too powerful even among Gentile converts to require or to admit of the immediate addition of supplementary books. But the sense of the peculiar position which the Apostles occupied, as the original inspired teachers of the Christian church, was already making itself felt in the sub-apostolic age; and by a remarkable agreement Clement (*ad Cor.* i. 7, 47), Polycarp (*ad Phil.* iii.), Ignatius (*ad Rom.* iv.), and Barnabas (c. i.) draw a clear line between themselves and their predecessors, from whom they were not separated by any lengthened intervals of time. As the need for a definite standard of Christian truth became more pressing, so was the character of those in whose writings it was to be sought more distinctly apprehended.

The next period (120-170 A.D.), which may be fitly termed the age of the Apologists, carries the history of the formation of the Canon one step further. The facts of the life of Christ acquired a fresh importance in controversy with Jew and Gentile. The oral tradition, which still remained in the former age, was dying away, and a variety of written documents claimed to occupy its place. Then it was that the Canonical Gospels were definitely separated from the mass of similar narratives in virtue of their outward claims, which had remained, as it were, in abeyance during the period of tradition. The need did not create but recognised them. Without doubt and without controversy, they occupied at once the position which they have always retained as the fourfold Apostolic record of the Saviour's ministry. Other narratives remained current for some time, which were either interpolated forms of the Canonical books (*The Gospel according to the Hebrews*, &c.), or independent traditions (*The Gospel according to the Egyptians*, &c.), and exercised more or less influence upon the form of popular quotations, and perhaps in some cases upon the text of the Canonical Gospels; but where the question of authority was raised, the four Gospels were ratified by universal consent. The testimony of JUSTIN MARTYR († c. 246 A. D.) is in this respect most important. An impartial examination of his Evangelic references, if conducted with due reference to his general manner of quotation, to possible variations of reading, and to the nature of his subject, which excluded

express citations from Christian books, shows that they were derived certainly in the main, probably exclusively, from our Synoptic Gospels, and that each Gospel is distinctly recognised by him (*Dial.* c. *Tryph.* §103, p. 331, D. *ἐν γὰρ τοῖς ἀπομνημονεύμασιν ἡ φημι ὑπὸ τῶν ἀποστόλων* (Matthew, John) *αὐτοῦ καὶ τῶν ἐκείνοις παρακολουθεῖσαν δυνάμιν* (Mark, Luke) *συμπεριδεχθαι* . . . . Comp. *Dial.* c. 49 with Matt. xvii. 13; *Dial.* c. 106 with Mark iii. 16, 17; *Dial.* c. 105 with Luke xxiii. 46). The references of Justin to St. John are less decided (comp. *Apol.* i. 61; *Dial.* 63, 123, 56, &c.; Otto, in Illgen's *Zeitschrift*, u. s. v. 1841, pp. 77 ff. 1843, pp. 34 ff.); and of the other books of the N. T. he mentions the *Apocalypse* only by name (*Dial.* c. 81), and offers some coincidences of language with the Pauline Epistles.

The evidence of PAPIAS (c. 140-150 A.D.) is nearly contemporary with that of Justin, but goes back to a still earlier generation (ὁ πρεσβύτερος λέγει). In spite of the various questions which have been raised as to the interpretation of the fragments of his 'Enarrations' preserved by Eusebius (*H. E.* iii. 39) it seems on every account most reasonable to conclude that Papias was acquainted with our present Gospels of St. Matthew and St. Mark, the former of which he connected with an earlier Hebrew original (*ἡμῆμενοι*); and probably also with the Gospel of St. John (*Frag.* xi. Routh; comp. *Iren.* v. s. f.), the former Epistles of St. John and St. Peter (Euseb. *H. E.* iii. 24), and the *Apocalypse* (*Frag.* viii.).<sup>b</sup>

Meanwhile the Apostolic writings were taken by various mystical teachers as the foundation of strange schemes of speculation, which are popularly confounded together under the general title of Gnosticism, whether Gentile or Jewish in their origin. In the earliest fragments of Gnostic writers which remain there are traces of the use of the Gospels of St. Matthew and St. John, and of 1 Corinthians (*Ἀπόφασις μεγάλη* [Simon M.] ap. Hippol. *adv. Haer.* vi. 16; 9; 13); and the *Apocalypse* was attributed by a confusion not difficult of explanation to Cerinthus (Epiph. *Haer.* li. 3). In other Gnostic (Ophite) writings a little later there are references to St. Matthew, St. Luke, St. John, Romans, 1, 2 Corinthians, Galatians, Ephesians, *Hebrews* (*Hist. of N. T. Canon*, pp. 313 ff.); and the Clementine Homilies contain clear coincidences with all the Gospels (*Hom.* xix. 20 St. Mark; *Hom.* xix. 22 St. John). It is, indeed, in the fragments of a Gnostic writer, Basilides (c. 125 A.D.), that the writings of the N. T. are found quoted for the first time in the same manner as those of the O. T. (Basil. ap. Hipp. *adv. Haer.* pp. 238 γέγραπται; 240 ἡ γραφή, &c.). A Gnostic, Heraclion, was the first known commentator on the Christian Scriptures. And the history of another Gnostic, Marcion, furnishes the first distinct evidence of a Canon of the N. T.

The need of a definite Canon must have made itself felt during the course of the Gnostic controversy. The common records of the life of Christ may be supposed to have been first fixed in the discussions with external adversaries. The standard

<sup>a</sup> The exceptions to this statement which occur in the Latin versions of Polycarp (*ad Phil.* c. xlii. "ut his Scripturis dictum est." Ps. iv. 4; Eph. iv. 28), and Barnabas (c. iv. "sicut scriptum est," Matt. xx. 16), cannot be urged against the uniform practice which is observed in the original texts. Some of the most remarkable Evangelic citations are prefaced by

[Κύριος] εἶπεν καὶ λέγει, which seems to show that they were derived from tradition and not from a written narrative (Clem. Ep. 13, 46).

<sup>b</sup> A fragment of Papias' Commentary on the *Apocalypse* is preserved in the Commentary published by Cramer, *Cat. in Apoc.*, p. 360, which is not noticed by Routh.

of Apostolic teaching was determined when the Church itself was rent with internal divisions.<sup>a</sup> The Canon of MARCION (c. 140 A.D.) contained both elements, a Gospel ("The Gospel of Christ") which was a mutilated recension of St. Luke, and an "Apostle" or Apostolikon, which contained ten Epistles of St. Paul—the only true Apostle in Marcion's judgment—excluding the pastoral Epistles, and that to the Hebrews (Trt. *adv. Marc.* v.; Epiph. *adv. Haer.* xlii.). The narrow limits of this Canon were a necessary consequence of Marcion's belief and position, but it offers a clear witness to the fact that Apostolic writings were thus early regarded as a complete original rule of doctrine. Nor is there any evidence to show that he regarded the books which he rejected as unauthentic. The conduct of other heretical teachers who professed to admit the authority of all the Apostles proves the converse; for they generally defended their tenets by forced interpretations, and not by denying the authority of the common records. And while the first traces of the recognition of the divine inspiration and collective unity of the Canon comes from them, it cannot be supposed, without inverting the whole history of Christianity, that they gave a model to the Catholic Church, and did not themselves simply perpetuate the belief and custom which had grown up within it.

The close of this period of the history of the N. T. Canon is marked by the existence of two important testimonies to the N. T. as a whole. Hitherto the evidence has been in the main fragmentary and occasional; but the MURATORIAN CANON in the West, and the PESHITO in the East, deal with the collection of Christian Scriptures as such. The first is a fragment, apparently translated from the Greek, and yet of Roman origin, mutilated both at the beginning and the end, and written, from internal evidence, about 170 A.D. It commences with a clear reference to St. Mark's Gospel, and then passes on to St. Luke as the *third*, St. John, the Acts, thirteen Epistles of St. Paul. The first Epistle of St. John is quoted in the text; and then afterwards it is said that "the Epistle of Jude and two Epistles of the John mentioned above (*superscripti*: or "which bear the name of John" *superscriptae*) are reckoned among the Catholic [Epistles] (*M.S. Catholica, i.e. Ecclesia?*)."<sup>a</sup> "We receive moreover the *Apocalypses* of John and Peter only, which [latter] some of our body will not have read in the Church."<sup>a</sup> Thus the catalogue omits of the books received at present the *Epistle of James*, the *Epistle to the Hebrews*, and 2 Peter, while it notices the partial reception of the *Revelation of Peter*. The Canon of the Peshito forms a remarkable complement to this catalogue. It includes the four Gospels and the Acts, fourteen Epistles of St. Paul, 1 John, 1 Peter, and James, omitting Jude, 2 Peter, 2, 3 John, and the *Apocalypse*; and this Canon was preserved in the Syrian Churches as long as they had an independent literature (Ebed Jesu † 1318 A.D., ap. Assem. *Bibl. Or.* iii. pp. 3 ff.). Up to this point, therefore, 2 Peter is the only book of the N. T. which is not recognised as an Apostolic and authoritative writing; and in this result the evidence from

casual quotations coincides exactly with the enumeration in the two express catalogues.

2. *The history of the Canon of the N. T. from 170 A.D. to 303 A.D.*—The second period of the history of the Canon is marked by an entire change in the literary character of the Church. From the close of the second century Christian writers take the foremost place intellectually as well as morally; and the powerful influence of the Alexandrine Church widened the range of Catholic thought, and checked the spread of speculative heresies. From the first the common elements of the Roman and Syrian Canons, noticed in the last section, form a Canon of acknowledged books, regarded as a whole, authoritative and inspired, and coordinate with the O. T. Each of these points is proved by the testimony of contemporary fathers who represent the Churches of Asia Minor, Alexandria and North Africa. IRENAEUS, who was connected by direct succession with St. John (Euseb. *H. E.* v. 20), speaks of the Scriptures as a whole, without distinction of the Old or New Testaments, as "perfect, inasmuch as they were uttered by the Word of God and His Spirit" (*Adv. Haer.* ii. 28, 2). "These could not be," he elsewhere argues, "more than four Gospels or fewer" (*Adv. Haer.* iii. 11, 8 sq.). CLEMENT of ALEXANDRIA, again, marks "the Apostle" (ὁ ἀπόστολος, *Strom.* vii. 3, §14; sometimes ἀπόστολοι) as a collection definite as "the Gospel," and combines them "as Scriptures of the Lord" with the Law and the Prophets (*Strom.* vi. 11, §88) as "ratified by the authority of one Almighty power" (*Strom.* iv. 1, §2). TERTULLIAN notices particularly the introduction of the word *Testament* for the earlier word *Instrument*, as applied to the dispensation and the record (*adv. Marc.* iv. 1), and appeals to the *New Testament*, as made up of the "Gospels" and "Apostles" (*adv. Prax.* 15). This comprehensive testimony extends to the four Gospels, the Acts, 1 Peter, 1 John, thirteen Epistles of St. Paul, and the *Apocalypse*; and, with the exception of the *Apocalypse*, no one of these books was ever afterwards rejected or questioned till modern times.<sup>a</sup>

But this important agreement as to the principal contents of the Canon left several points still undecided. The East and West, as was seen in the last section, severally received some books which were not universally accepted. So far the error lay in defect; but in other cases apocryphal or unapostolic books obtained a partial sanction or a popular use, before they finally passed into oblivion. Both these phenomena, however, were limited in time and range, and admit of explanation from the internal character of the books in question. The examination of the claims of the separate writings belongs to special introductions; but the subjoined table (No. III.) will give a general idea of the extent and nature of the historic evidence which bears upon them.

This table might be much extended by the insertion of isolated testimonies of less considerable writers. Generally, however, it may be said that of the "disputed" books of the N. T., the *Apocalypse* was universally received, with the single exception of Dionysius of Alexandria, by all the writers of the period; and the *Epistle to the Hebrews*, by the Churches of Alexandria, Asia (?) and Syria, but not by those of Africa and Rome. The

<sup>a</sup> We have given what appears to be the meaning of the corrupt text of the passage. It would be out of place to discuss all the disputed points here; comp. *Hist. of N. T. Canon*, pp. 242 ff., and the references there given.

<sup>a</sup> The Manichees offer no real exception to the truth of this remark. Comp. Beausobre, *Hist. des Manich.*, i. ff. 297 f.

<sup>1</sup> The sign || marks a verbal coincidence: \* a direct quotation: ? an expression of doubt: ( ) an uncertain reference: † a clear rejection: [ ] that the evidence is suspicious, or inconclusive as to the authority assigned to the book.

Epistles of *St. James* and *St. Jude*, on the other hand, were little used, and the *Second Ep. of St. Peter* was barely known.

But while the evidence for the formation of the Canon is much more copious during this period than during that which preceded, it is essentially of the same kind. It is the evidence of use and not of inquiry. The Canon was fixed in ordinary practice, and doubts were resolved by custom and not by criticism. Old feelings and beliefs were perpetuated by a living tradition; and if this habit of mind was unfavourable to the permanent solution of difficulties, it gives fresh force to the claims of the acknowledged books, which are attested by the witness of every division of the Church (ORIGEN, CYPRIAN, METHODIUS), for it is difficult to conceive how such unanimity could have arisen except from the original weight of apostolical authority. For it will be observed that the evidence in favour of the acknowledged books as a whole is at once clear and concordant from all sides as soon as the Christian literature is independent and considerable. The Canon preceded the literature and was not determined by it.

3. *The history of the N. T. Canon from A.D. 303-397.*—The persecution of Diocletian was directed in a great measure against the Christian writings (Lact. *Instit.* v. 2; *de mort. persec.* 16). The influence of the Scriptures was already so great and so notorious, that the surest method of destroying the faith seemed to be the destruction of the records on which it was supported. The plan of the emperor was in part successful. Some were found who obtained protection by the surrender of the Sacred books, and at a later time the question of the readmission of these "traitors" (*traditores*), as they were emphatically called, created a schism in the Church. The Donatists, who maintained the sterner judgment on their crime, may be regarded as maintaining in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture which was the occasion of the dissension; and Augustine allows that they held in common with the Catholics the same "Canonical Scriptures," and were alike "bound by the authority of both Testaments" (August. c. *Cresc.* i. 31, 57; *Ep.* 129, 3). The only doubt which can be raised as to the integrity of the Donatist Canon arise from the uncertain language which Augustine himself uses as to the Epistle to the Hebrews, which the Donatists may also have countenanced. But, however this may have been, the complete Canon of the N. T., as commonly received at present, was ratified at the third COUNCIL OF CARTHAGE (A.D. 397),<sup>7</sup> and from that time was accepted throughout the Latin Church (JEROME, INNOCENT, RUFINUS, PHILASTRIUS), though occasional doubts as to the Epistle to the Hebrews still remained\* (Ibid. *Hisp. Proem.* §§85-109).

Meanwhile the Syrian Churches, faithful to the conservative spirit of the East, still retained the Canon of the Peshito. CHRYSOBOSTOM (†407 A.D.),

THEODORE of MOPUESTIA (†429 A.D.), and THEODORET, who represent the Church of Antioch, furnish no evidence in support of the Epistles of *Jude*, 2 *Peter*, 2, 3 *John*, or the *Apocalypse*. JUNILIUS, in his account of the public teaching at Nisibis, places the Epistles of *James*, *Jude*, 2, 3 *John*, 2 *Peter* in a second class, and mentions the doubts which existed in the East as to the *Apocalypse*. And though EPHREM SYRUS was acquainted with the *Apocalypse* (*Opp. Syr.* ii. p. 332 c.), yet his genuine Syrian works exhibit no habitual use of the books which were not contained in the Syrian Canon, a fact which must throw some discredit upon the frequent quotations from them, which occur in those writings which are only preserved in a Greek translation.

The Churches of Asia Minor seem to have occupied a mean position as to the Canon between the East and West. With the exception of the *Apocalypse*, they received generally all the books of the N. T. as contained in the African Canon, but this is definitely excluded from the Catalogue of GREGORY of NAZIANZUS (†c. 389 A.D.), and pronounced "spurious" (*ψευδὸν*) on the authority of "the majority" (*οἱ πολλοί*), in that of AMPHILOCHIOS (c. 380 A.D.), while it is passed over in silence in the Laodicean Catalogue, which even if it has no right to its canonical position, yet belongs to the period and country with which it is commonly connected. The same Canon, with the same omission of the *Apocalypse* is given by CYRIL of JERUSALEM (†386 A.D.); though EPIPHANIUS, who was his fellow-countryman and contemporary, confirms the Western Canon, while he notices the doubts which were entertained as to the *Apocalypse*. These doubts prevailed in the Church of Constantinople, and the *Apocalypse* does not seem to have been recognised there down to a late period, though in other respects the Constantinopolitan Canon was complete and pure (NICEPHORUS, PHOTIUS, OECUMENIUS, THEOPHYLACT, † c. 1077 A.D.).

The well-known Festal Letter of ATHANASIUS (†373 A.D.) bears witness to the Alexandrine Canon. This contains a clear and positive list of the books of the N. T. as they are received at present; and the judgment of Athanasius is confirmed by the practice of his successor CYRIL.

One important Catalogue yet remains to be mentioned. After noticing in separate places the origin and use of the Gospels and Epistles, EUSEBIUS sums up in a famous passage the results of his inquiry into the evidence on the Apostolic books furnished by the writings of the three first centuries (*H. E.* iii. 25). His testimony is by no means free from difficulties, nor in all points obviously consistent, but his last statement must be used to fix the interpretation of the former and more cursory notices. In the first class of *acknowledged* books (*ἀπολογισμένα*) he places the four Gospels, the Epistles of St. Paul (i.e. fourteen, *H. E.* iii. 3), 1 John, 1 Peter, and (*ἐν γὰρ παλαιῇ*)

\* The enumeration of the Pauline Epistles marks the doubt which had existed as to the Hebrews: *Epistolæ Pauli Apostoli xiii; ejusdem ad Hebræos una*. In the Council of Hippo (*Can.* 36) the phrase is simply "*xiv Epistolæ of St. Paul*." Generally it may be observed that the doubt was in many, if not in most, cases as to the *authenticity*, and not as to the *canonicity* of the letter. Comp. Hieron. *Ep. ad Dard.*, 129, §3.

<sup>7</sup> The MSS. of the Vulgate from the sixth century downwards very frequently contain the apocryphal

Epistle to the Laodiceans among the Pauline Epistles, generally after the Epistle to the Colossians, but also in other places, without any mark of suspicion. The text in *Cod. Harl.* (Brit. Mus.) 2833 (sec. xi.), in which it occurs after the *Apocalypse*, differs in several respects from any of Anger's MSS. Comp. Anger, *Der Laodiceener Brief*, Leips. 1843, pp. 142 ff. The Greek title in G (not F), *ἡ πρὸς Λαοδικαίους ἐπιστολή*, is apparently only a rendering of the Latin title from the form of the name (*g. Laudiceenses*).

## No. IV.—THE CHIEF CATALOGUES OF THE BOOKS OF THE NEW TESTAMENT.

Only "disputed" books are noticed, or such as were in some degree recognized as authoritative. The symbols are used as before.

	Epistle to Hebrews.	Jude.	James.	2 & 3 John.	2 Peter.	Apocalypse.	Epistle of Barnabas.	Shepherd of Hermas.	Epistle of Clement.	Apocalypse of Peter.

<sup>1</sup> The omission of the *Apocalypse* is frequently explained by the expressed object of the Catalogue, as a list of books for public ecclesiastical use: *ὅσα δὲ βιβλία ἀναγινώσκεισθαι*, compared with the former canon: *ὅτι οὐ δὲ ἰδιωτικῶς ψαλμοὺς λέγεσθαι ἐν τῇ ἐκκλησίᾳ, κ. τ. λ.* Yet compare the Catalogue of Cyril.

<sup>2</sup> The Catalogue adds likewise the Apostolical Constitutions (*ἡσυχασταὶ* . . . ἐν ὅκτω βιβλίοις) for esoteric use. When the Catalogue was confirmed in the Quinisextine Council (Can. 2), the Constitutions were excluded on the ground of corruptions; but no notice was taken of the Epistles of Clement, both of which, as is well known, are found at the end of the *Cod. Alex.*, and are mentioned in the index before the general summary of books; which again is followed by the titles of the *Apocryphal Psalms of Solomon*.

<sup>3</sup> He adds also "the Apostolic Canons," and according to one MS. the two Epistles of Clement.

<sup>4</sup> The other chief passages in Eusebius are, *H. E. iii. 3 24; ii. 23*. His object in the passage quoted is ἀνακεφαλαιώσασθαι τὰς δηλωθείσας τῆς κατ' ἐκκλ. διαθήκης γραφάς.

<sup>5</sup> The list concludes with the words, τὰ δὲ λοιπὰ πάντα ἔξω κείσθω ἐν δευτέρῳ· καὶ ὅσα μὲν ἐν ἐκκλησίᾳ μὴ ἀναγινώσκεισθαι, ταῦτα μὴδὲ κατὰ σαυτῶν ἀναγινώσκεισθαι ἔχουσας . . .

<sup>6</sup> At the end of the list Athanasius says (comp. above), μηδεὶς τούτους ἐπιβαλλέτω, μηδὲ τούτων ἀφαιρεῖσθαι τι.

<sup>7</sup> Amphiloch. *l. c.* :—

τινὲς δὲ φασὶ τὴν πρὸς Ἑβραίους νόθον, οὐκ εὖ λεγόντες· γνησία γὰρ ἡ χάρις. εἰεν τί λοιπὸν; καθολικῶν ἐπιστολῶν· τινὲς μὲν ἔπτα φασίν, οἱ δὲ τρεῖς μόνον .

in case its *authenticity* is admitted (such seems to be his meaning), the *Apocalypse*. The second class of *disputed* books (*ἀντιλεγόμενα*) he subdivides into two parts, the first consisting of such as were generally known and recognised (*γνώριμα τοῖς πολλοῖς*), including the Epistles of *James*, *Jude*, *2 Peter*, *2, 3 John*; and the second of those which he pronounces spurious (*ψευδα*), that is which were either unauthentic or unapostolic, as the Acts of Paul, the Shepherd, the Apocalypse of Peter, the *Apocalypse* of John (if not a work of the Apostle), and according to some the Gospel according to the Hebrews. These two great classes contain all the books which had received ecclesiastical sanction, and were in common distinguished from a third class of *heretical forgeries* (e.g. the Gospels of Thomas, Peter, Mathias, &c.).

One point in the testimony of Eusebius is particularly deserving of notice. The evidence in favour of the apostolic authority of *2 Peter* which can be derived from the existing writings of the first three centuries is extremely slender; but Eusebius, who possessed more copious materials, describes it as "generally well known;" and this circumstance alone suggests the necessity of remembering that the early Catalogues rest on evidence no longer available for us. In other respects the classification of Eusebius is a fair summary of the results which follow from the examination of the extant ante-Nicene literature.

The evidence of later writers is little more than the repetition or combination of the testimonies already quoted. An examination of table No. IV., p. 266, which includes the most important *Catalogues* of the writings of the N. T., will convey a clear summary of much that has been said, and supply the most important omissions.

At the era of the Reformation the question of the N. T. Canon became again a subject of great though partial interest. The hasty decree of the Council of Trent, which affirmed the authority of all the books commonly received, called out the opposition of controversialists, who quoted and enforced the early doubts. ERASMUS with characteristic moderation denied the apostolic origin of the *Epistle to the Hebrews*, *2 Peter*, and the *Apocalypse*, but left their canonical authority unquestioned (*Praef. ad Antilegomen.*). LUTHER, on the other hand, with bold self-reliance, created a purely subjective standard for the canonicity of the Scriptures in the character of their "teaching of Christ," and while he placed the Gospel and first Epistle

of St. John, the Epistles of St. Paul to the Romans, Galatians, Ephesians, and the first Epistle of St. Peter, in the first rank as containing the "kernel of Christianity," he set aside the *Epistle to the Hebrews*, *St. Jude*, *St. James*, and the *Apocalypse* at the end of his version, and spoke of them and the remaining Antilegomena with varying degrees of disrespect, though he did not separate *2 Peter* and *2, 3 John* from the other Epistles (comp. Landerer, *Art. Canon* in Herzog's *Encyclop.* pp. 295 ff.). The doubts which Luther rested mainly on internal evidence were variously extended by some of his followers (MELANCTHON, *Centur. Maydob.*, FLACIUS, GERHARD: comp. Reuss, §334); and especially with a polemical aim against the Romish Church by CHEMnitz (*Exam. Conc. Trid.* i. 73). But while the tendency of the Lutheran writers was to place the Antilegomena on a lower stage of authority, their views received no direct sanction in any of the Lutheran symbolic books which admit the "prophetic and apostolic writings of the Old and New Testaments," as a whole, without further classification or detail. The doubts as to the Antilegomena of the N. T. were not confined to the Lutherans. CARLSTADT, who was originally a friend of Luther and afterwards professor at Zurich, endeavoured to bring back the question to a critical discussion of evidence, and placed the Antilegomena in a third class "on account of the controversy as to the books, or rather (ut certius loquar) as to their authors" (*De Can. Script.* pp. 410-12, ed. Credn.). CALVIN, while he denied the Pauline authorship of the *Epistle to the Hebrews*, and at least questioned the authenticity of *2 Peter*, did not set aside their canonicity (*Praef. ad Hebr.*; *ad 2 Petr.*); and he notices the doubts as to *St. James* and *St. Jude* only to dismiss them.

The language of the Articles of the Church of England with regard to the N. T. is remarkable. In the Articles of 1552 no list of the books of Scripture is given; but in the Elizabethan Articles (1562, 1571) a definition of Holy Scripture is given as "the Canonical books of the Old and New Testament, of whose authority was never any doubt in the Church" (Art. vi.). This definition is followed by an enumeration of the books of the O. T. and of the Apocrypha; and then it is said summarily, without a detailed catalogue, "all the books of the N. T., as they are commonly received, we do receive and account them for Canonical (pro Canonici habemus)." A distinction thus remains between the "Canonical" books, and such

#### NOTES ON TABLE NO. IV.—continued.

χρημα δέχασθαι, τὴν Ἰακώβου μίαν  
μίαν δὲ Πέτρον τὴν τ' Ἰωάννου μίαν . . .  
τὴν δ' Ἀποκάλυψιν τὴν Ἰωάννου πάλιν  
τινὲς μὲν ἀρκεῖται, οἱ πλείους δὲ γε  
νόθον λέγουσιν. Οὗτος ἀνευκλότατος  
Καὶὼν ἂν εἴη τῶν θεοσεβούνων γραφῶν . . .

<sup>10</sup> This Canon of Chrysostom, which agrees with that of the Peshito, is fully supported by the casual evidence of the quotations which occur in his works. The quotation from *2 Peter*, which is found in *Hom. in Joann.* 34 (33), tom. viii. p. 230 (ed. Par.), stands alone. Suidas' assertion (s. v. Ἰωάννης) that he received "the *Apocalypse* and three *Epistles* of St. John" is not supported by any other evidence.

<sup>11</sup> Nicophorus adds to the disputed books "the Gospel according to the Hebrews." In one MS. the *Apocalypse* of St. John is placed also among the Apocryphal books (Credner, s. a. O. p. 122).

<sup>12</sup> This catalogue, which excludes the *Epistle to the Hebrews* and the *Apocalypse* (statutum est nihil aliud legi in ecclesia debere catholica nisi . . . et Pauli tractatum

epistolae et septem alias . . .), is followed by a section in which Philastrius speaks of "other [heretics] who assert that the *Epistle to the Hebrews* is not Paul's" (*Haer.* 89). And in another place (*Haer.* 60) he reckons it as heresy to deny the authenticity of the Gospel and *Apocalypse* of St. John. The different statements seem to be the result of careless compilation.

<sup>13</sup> This catalogue is described as "secundum antiquam translationem," and stands parallel with those of Jerome and Augustine. The enumeration of the Catholic epistles is somewhat ambiguous, but I believe that it includes only three epistles. Epistolae Petri ad gentes, *Jacobi*, *Johannis* ad Parthos. The insertion of *Jude* after *gentes*, seems to have been a typographical error, for the present writer has not found the reading in any one of four MSS. which he has examined.

<sup>14</sup> In another place (*De eccles. off.* l. 12) Isidore mentions without condemning the doubts which existed as to the *Epistle to the Hebrews*, *James*, *2, 3 John*, *2 Peter*, but not as to *Jude*.

"Canonical books as have never been doubted in the Church;" and it seems impossible to avoid the conclusion that the framers of the Articles intended to leave a freedom of judgment on a point on which the greatest of the continental reformers, and even of Romish scholars (Sixtus Sen. *Biblioth. S. i.* 1; Caletan, *Præf. ad Epp. ad Hebr., Jac., 2, 3 John, Jud.*) were divided. The omission cannot have arisen solely from the fact that the Article in question was framed with reference to the Church of Rome, with which the Church of England was agreed on the N. T. Canon; for all the other protestant confessions which contain any list of books, give a list of the books of the New as well as of the Old Testament (*Conf. Belg. 4; Conf. Gall. 3; Conf. Fid. 1*). But if this license is rightly concealed by the Anglican Articles, the great writers of the Church of England have not availed themselves of it. The early commentators on the Articles take little (Burnet) or no notice (Beveridge) of the doubts as to the Antilegomena; and the chief controversialists of the Reformation accepted the full Canon with emphatic avowal (Whitaker, *Disp. on Scripture*, xiv. p. 105; Fulke's *Defence of Eng. Trans.* p. 8; Jewel, *Defence of Apol.* ii. 9, 1).

The judgment of the Greek Church in the case of the O. T. was seen to be little more than a reflection of the opinions of the West. The difference between the Roman and Reformed Churches on the N. T. were less marked; and the two conflicting Greek confessions confirm in general terms, without any distinct enumeration of books, the popular Canon of the N. T. (*Cyr. Luc. Conf. i. p. 42; Dosith. Confess. i. p. 487*). The confession of METROPHANES gives a complete list of the books; and compares their number—thirty-three—with the years of the Saviour's life, that "not even the number of the Sacred books might be devoid of a divine mystery." (*Metroph. Critop. Conf. ii. 105*, Ed. Kimm. et Weissenb.). At present, as was already the case at the close of the 17th century (Leo Allatius, ap. Fabric. *Bibl. Græc. v. App. p. 38*), the Antilegomena are reckoned by the Greek Church as equal in Canonical authority in all respects with the remaining books (*Catechism, l. c. supr.*).

The assaults which have been made, especially during the present century, upon the authenticity of the separate books of the Old and New Testaments belong to the special articles. The general course which they have taken is simple and natural. Semler (*Untersuch. d. Kan. 1771-5*) first led the way towards the later subjective criticism, though he rightly connected the formation of the Canon with the formation of the Catholic Church, but without any clear recognition of the providential power which wrought in both. Next followed a series of special essays in which the several books were discussed individually with little regard to the place which they occupy in the whole collection (Schleiermacher, Bretschneider, De Wette, &c.). At last an ideal view of the early history of Christianity was used as the standard by which the books were to be tried, and the books were regarded as results of typical forms of doctrine and not the sources of them (F. C. Baur, Schwieger, Zeller). All true sense of historic evidence was thus lost. The growth of the Church was left without explanation, and the original relations and organic unity of the N. T. were disregarded.

For the later period of the history of the N. T. (Canon, from the close of the second century, the

great work of Lardner (*Credibility of the Gospel History*, Works i.—vi. Ed. Kippis, 1788) furnishes ample and trustworthy materials. For the earlier period his criticism is necessarily imperfect, and requires to be combined with the results of later inquiries. Kirchhofer's collection of the original passages which bear on the history of the Canon (*Quellensammlung, u. s. w.*, Zürich, 1844) is useful and fairly complete, but frequently inaccurate. The writings of F. C. Baur and his followers often contain very valuable hints as to the characteristics of the several books in relation to later teaching, however perverse their conclusions may be. In opposition to them Thiersch has vindicated, perhaps with an excess of zeal, but yet in the main rightly, the position of the Apostolic writings in relation to the first age (*Versuch zur Herstellung, u. s. w.*, Erlangen, 1845; and *Erwiderung, u. s. w.*, Erlang., 1846). The section of Reuss on the subject (*Die Gesch. d. heil. Schriften N. T.*, 2te Aufl. Braunschw. 1853), and the article of Landerer (Herzog's *Encyclop. s. v.*) contain valuable summaries of the evidence. Other references and a fuller discussion of the chief points are given by the author of this article in *The History of the Canon of the N. T.* (Camb. 1855). [B. F. W.]

CANOPY (*κανοπέριον; conopeum*; Jud. x. 21, xiii. 9, xvi. 19). The canopy of Holofernes is the only one mentioned, although, perhaps, from the "pillars" of the litter [BED] described in Cant. iii. 10, it may be argued that its equipage would include a canopy. It probably retained the mosquito nets or curtains in which the name originated, although its description (Jud. x. 21) betrays luxury and display rather than such simple usefulness. Varro (*R. R. ii. 10, 8*) uses *quis in conopis jacent* of languid women very much as *ἀναπαύμενος . . . ἐν τῷ κανοπέῳ* (l. c.) describes the position of a luxurious general. (For further classical illustration, see *Dict. of Ant. art. CONOPEUM*.) It might possibly be asked why Judith, whose business was escape without delay, should have taken the trouble to pull down the canopy on the body of Holofernes? Probably it was an instance of the Hebrew notion that blood should be instantly covered (comp. 2 Sam. xx. 12; Lev. xvii. 13) [BLOOD]; and for this purpose the light bedding of Syria was inadequate. [BED.] Tent furniture also is naturally lighter, even when most luxurious, than that of a palace; and thus a woman's hand might unfix it from the pillars without much difficulty. [H. H.]

CANTICLES (*שִׁיר חַשְׁמִיּוֹן, Song of Songs*, i. c. the most beautiful of songs; *ᾠδα ἀσπασαν;* *Canticum Canticorum*), entitled in the A. V. THE SONG OF SOLOMON. No book of the O. T. has been the subject of more varied criticism, or been more frequently selected for separate translation than the Song of Solomon. It may be convenient to consider it under four points of view:—I. *Author and date*; II. *Form*; III. *Meaning*; IV. *Canonicity*.

I. *Author and date*.—By the Hebrew title it is ascribed to Solomon; and so in all the versions, and by the majority of Jewish and Christian writers, ancient and modern. In fact, if we except a few of the Talmudical writers (Bava Bathra, R. Moses Kimchi; see Gray's Key), who assigned it to the age of Hezekiah, there is scarcely a dissentient voice down to the close of the last century. More recent criticism, however, has called in question this deep-rooted, and well accredited tradition. Among Eng-

lish scholars Kennicott, among German Eichorn and Rosenmüller, regard the poem as belonging to the age of Ezra and Nehemiah (Kennicott, *Diss.* i. pp. 20-22; Eichorn, *Isagogen in V. T.* P. iii. § 647, p. 531, ff. ed. sec.; Rosenm. *Animadv. on Louth. Praelect., Schol. in V. T.*). Kennicott based his opinion upon the uniform insertion of the <sup>1</sup>, in all the copies, in the name of David (דָּוִד). The name, however, occurs only once (iv. 4); and the insertion of the letter in this solitary instance is easily accounted for by a supposed error in transcription. At any rate the insertion of the <sup>1</sup> would not bring the Canticles so far down as the time of Ezra; since we find the same peculiarity in Hos. iii. 5, and Am. vi. 5 (Gesen. *Lex.* s. v.). The charge of Chaldaism has been vigorously pressed by Rosenmüller, and especially by Eichorn. But Gesenius (*Heb. Gr.* §2) assigns the book to the golden age of Hebrew literature, and traces "the few solitary Chaldaisms" which occur in the writings of that age to the hands of Chaldee copyists. Gesenius has moreover suggested an important distinction between Chaldaisms, and *dialectic* variations indigenous to N. Palestine, where he conjectures that Judges and Canticles were composed. The application of this principle is sufficient to eliminate most of the Chaldaisms alleged by Eichorn (e. g. שָׁרָה for שָׁרָה); while the occurrence of similar forms in Phœnician affords an indication of other intrusive forces beside the Aramean acting upon the Biblical Hebrew. Nor is the suggestion of Gesenius that the book was written in N. Palestine, and consequently tinged with a local colouring, inconsistent with the opinion which places it among the "one thousand and five" songs of Solomon (1 K. iv. 32). Comp. 1 K. ix. 19 with 2 Chr. viii. 6, where the buildings of Lebanon are decidedly contrasted with those of Jerusalem, and are not therefore to be confounded with the "house of the forest of Lebanon" (1 K. vii. 2), which was probably in Jerusalem. By a further comparison of these passages with Robinson (*Bibl. Res.* iii. 441), who describes remains of massive buildings as still standing on Lebanon, it will appear probable that Solomon had at least a hunting-seat somewhere on the slopes of that mountain (comp. Cant. iv. 9). In such a retreat, and under the influence of its scenery, and the language of the surrounding peasantry, he may have written Canticles. Artistically this would have been in keeping with the general conditions of pastoral poetry. In our own language such compositions are not unfrequently accommodated to rustic ideas, and sometimes to provincial dialects. If, moreover, it should be urged that Chaldaisms are not provincialisms; it may be replied that Solomon could scarcely be ignorant of the Aramean literature of his own time, and that he may have consciously used it for the purpose of enrichment (Gesen. *Heb. Gr.* §§ 2, 4).

The title, though it is possibly too flattering to have come from the hand of Solomon, must have existed in the copy used by the LXX., and consequently can lay claim to a respectable antiquity. The moral argument put forward by the supporters of the most recent literal interpretation, and based upon the improbability of Solomon's criminating himself (see below), is not very conclusive. His conduct could easily be traced to a spirit of generous self-accusation; and at any rate it need not be exalted above the standard which was likely to flourish in the atmosphere of a court such as his.

On the whole then it seems unnecessary to depart from the plain meaning of the Hebrew title.

Supposing the date fixed to the reign of Solomon, great ingenuity has been employed by the Rabbinical and some Christian writers, in determining at what period of that monarch's life the poem was written (see Pol. *Syn. Pref. ad Cant.*). The point at issue seems to have been whether Solomon ever repented after his fall. If he did, it was contended that the ripeness of wisdom exhibited in the Song seemed the natural growth of such an experience: if he did not, it was urged that no other than a spiritually-minded man could have composed such a poem; and that therefore it must have been written while Solomon was still the cherished of God. Then again it was a moot point whether the composition was the product of Solomon's matured wisdom, or the fresh outburst of his warm and passionate youth; whether in fact the master element of the poem were the *literal* form, or the *allegorical* meaning. The question resolves itself into one of *interpretation*, and must be determined by reference to III. below.

II. *Form*.—This question is not determined by the Hebrew title. The rendering of שִׁיר הַשְּׁמִירִים, mentioned by Simonis (*Lex. Heb.*), "series carminum" (comp. *σειρά*, chain), and adopted by Paulus, Goud, and other commentators, can scarcely compete with Gesen. "Song of Songs, i. e. the most beautiful of songs" (comp. Ps. xlv. 1, יְיָ רֵדָה, שִׁיר, "a delightful song," Gesen.; "carmen jucundum," Rosenm.; comp. also Theoc. *Idyl.* viii. *προσφιλέλις μέλος*). The non-continuity which many critics attribute to the poem is far from being a modern discovery. This is sufficiently attested by the Lat. "Cantica cantiorum," and the Chaldee paraphrase, "the songs and hymns which Solomon, the prophet, the king of Israel, uttered in the spirit of prophecy before the Lord." Ghislerius (16th cent.) considered it a drama in five acts. One of the first separate translations published in England is entitled "The Canticles, or Balades of Solomon, in English metre," 1549; and in 1596 appeared Solomon's Song in 8 eclogues, by J. M. [Jervase Markham]; the number of eclogues in this latter production being the same as that of the *Idylls* into which the book was afterwards divided by Jahn. Down to the 18th cent., however, the Canticles were generally regarded as continuous.

Gregory Nazianzus calls it *νυμφικὸν δράμα τε καὶ ᾄσμα*. According to Patrick, it is a "Pastoral Eclogue," or a "Dramatic poem;" according to Lowth, "an epithalamium, or *δαριστὸς* nuptialis of a pastoral kind." Michaelis and Rosenmüller, while differing as to its interpretation, agree in making it continuous, "carmen amatorium" (Mich.). A modified continuity was suggested by Bossuet, who divided the Song into 7 parts, or scenes of a pastoral drama, corresponding with the 7 days of the Jewish nuptial ceremony (Lowth, *Praelect.* xxx.). Bossuet is followed by Calmet, Percy, Williams, and Lowth; but his division is impugned by Taylor (*Fragm. Calmet*), who proposes one of 6 days; and considers the drama to be *postnuptial*, not *ante-nuptial*, as it is explained by Bossuet. The entire nuptial theory has been severely handled by J. D. Michaelis, and the literal school of interpreters in general. Michaelis attacks the first day of Bossuet, and involves in its destruction the remaining six

(*Not. ad Lowth. Pract.* xxxi.). It should be observed that Lowth does not compromise himself to the perfectly dramatic character of the poem. He makes it a drama, but only of the *minor* kind, i. e. dramatic as a dialogue; and therefore not more dramatic than an Idyll of Theocritus, or a Satire of Horace. The fact is, that he was unable to discover a plot; and evidently meant a good deal more by the term "pastoral" than by the term "drama." Moreover, it seems clear, that if the only dramatic element in Cant. be the dialogue, the rich pastoral character of its scenery, and allusions, renders the term *drama* less applicable than that of *idyll*. Bossuet, however, claims it as a regular drama with all the properties of the classic model. Now the question is not so much whether the Canticles make up a drama, or a series of idylls, as which of these two Greek names the more nearly expresses its form. And if with Lowth we recognize a chorus completely sympathetic and assistant, it is difficult to see how we can avoid calling the poem a drama. But in all the translations of the *allegorical* school which are based upon the dramatic idea, the interference of the chorus is so infrequent, or so indefinite; the absence of anything like a dramatic progress and development sufficient to enlist the sympathy of a chorus is so evident, that the strongly marked *idyllic* scenery could not fail to outweigh the scarcely perceptible elements of dramatic intention. Accordingly the Idyllic theory, propounded by Sig. Melesegenio, confirmed by the use of a similar form among the Arabians, under the name of "Cassides" (Sir W. Jones, *Poes. As. Comment.* iii.), and adopted by Good, became for a time the favourite hypothesis of the *allegorical* school. After Markham's translation, however (see above), and the division of Ghislarius, we cannot consider this theory as originating either with the learned Italian translator, or, as suggested by Mr. Horne, with Sir W. Jones.

The *idyllic* form seems to have recommended itself to the *allegorical* school of translators as getting rid of that dramatic unity and plot which their system of interpretation reduced to a succession of events without any culminating issue. In fact, it became the established method of division both with literal and allegorical translators; e. g. Herder, J. v. Smith, Kleuker, Magnus; and as late as 1846 was maintained by Dr. Noyes of Harvard University, an ultra literalist. But the majority of recent translators belonging to the literal school have adopted the theory of Jacobi, originally proposed in 1776, and since developed by Umbreit, Ewald, Meier, &c. Based as this theory is upon the dramatic evolution of a simple love-story, it supplies that essential movement and interest, the want of which was felt by Lowth; and justifies the application of the term *drama*, to a composition of which it manifests the vital principle and organic structure.

By the reactionary allegorists, of whom Rosenmüller may be considered the representative, the Song of Solomon has either been made absolutely continuous, or has been divided with reference to its spiritual meaning, rather than its external form (e. g. Hengstenberg, and Prof. Burrows).

The supposition that the Cant. supplied a model to Theocritus seems based on merely verbal coincidences, such as could scarcely fail to occur between two writers of *pastoral* poetry (comp. Cant. i. 8, vi. 10, with Theoc. xviii. 30, 38; Cant. iv. 11 with Theoc. xx. 26, 27; Cant. viii. 6, 7, with Theoc.

xxiii. 23-26; see other passages in Pol. Syn.; Lowth, *Præf.*; Gray's *Key*). In the essential matters of form and of ethical teaching, the resemblance does not exist.

III. *Meaning*.—The schools of interpretation may be divided into three:—the *mystical*, or *typical*; the *allegorical*; and the *literal*.

1. The *mystical* interpretation is properly an offshoot of the *allegorical*, and probably owes its origin to the necessity which was felt of supplying a *literal* basis for the speculations of the allegorists. This basis is either the marriage of Solomon with Pharaoh's daughter, or his marriage with an Israelitish woman, the Shulamite. The former (taken together with Harmer's variation) was the favourite opinion of the mystical interpreters to the end of the 18th century: the latter has obtained since its introduction by Good (1803). The mystical interpretation makes its first appearance in Origen, who wrote a voluminous commentary upon the Cant. Its literal basis, minus the mystical application, is condemned by Theodoret (A.D. 420). It reappears in Abulpharagius (1226-1286), and was received by Grotius. As involving a literal basis, it was vehemently objected to by Saucinius; Durham, and Calovius; but approved of, and systematized by Bossuet, endorsed by Lowth, and for the purpose of translation by Percy and Williams. The arguments of Calovius prevented its taking root in Germany; and the substitution by Good of an Israelitish for an Egyptian bride has not saved the general theory from the neglect which was inevitable after the reactionary movement of the 19th century allegorists.

2. *Allegorical*.—Notwithstanding the attempts which have been made to discover this principle of interpretation in the LXX. (Cant. iv. 8); Jesus Sirach (xlvii. 14-17); Wisd. (viii. 2); and Joseph. (c. *Apion.* i. § 8); it is impossible to trace it with any certainty farther back than the Talmud (see Ginsburg, *Introd.*). According to the Talmud the *beloved* is taken to be God, the *loved one*, or bride, is the *congregation of Israel*. This general relation is expanded into more particular detail by the Targum, or Chaldee Paraphrase, which treats the Song of songs as an allegorical history of the Jewish people from the Exodus to the coming of the Messiah, and the building of the third temple. In order to make out the parallel, recourse was had to the most extraordinary devices; e. g. the reduction of words to their numerical value, and the free interchanging of words similar to each other in sound. Elaborate as it was, the interpretation of the Targum was still further developed by the mediæval Jews; but generally constructed upon the same allegorical hypothesis. It was introduced into their liturgical services; and during the persecutions of the middle ages, its consoling appeal to the past and future glories of Israel maintained it as the popular exposition of a national poem. It would be strange if so universal an influence as that of the scholastic philosophy had not obtained an expression in the interpretation of the Canticles. Such an expression we find in the theory of Ibn Caspe (1200-1250), which considers the book as representing the union between the *active intellect* (*intellectus agens*), and the *receptive or material intellect* (*intellectus materialis*). A new school of Jewish interpretation was originated by Mendelssohn (1729-1786); which, without actually denying the existence of an allegorical meaning, determined to keep it in abeyance, and meanwhile to

devote itself to the literal interpretation. At present the most learned Rabbis, following Löwesoohn, have abandoned the allegorical interpretation in toto (Hexheimer, 1848; Philippon, 1854).

In the Christian Church, the Talmudical interpretation, imported by Origen, was all but universally received. It was impugned by Theodore of Mopsuestia (360-429), but continued to hold its ground as the orthodox theory till the revival of letters; when it was called in question by Erasmus and Grotius, and was gradually superseded by the typical theory of Grotius, Bossuet, Lowth, &c. This, however, was not effected without a severe struggle, in which Sanctius, Durham, and Calovius were the champions of the *allegorical* against the *typical* theory. The latter seems to have been mainly identified with Grotius (Pol. *Syn.*), and was stigmatised by Calovius as the heresy of Theodore Mopsuest., condemned at the 2nd council of Constantinople, and revived by the Anabaptists. In the 18th century the allegorical theory was resuscitated, and reconstructed by Puffendorf (1776), and the reactionary allegorists; the majority of whom, however, with Rosenm., return to the system of the Chaldee paraphrase.

Some of the more remarkable variations of the allegorical school are:—(a.) The extension of the Chaldee allegory to the Christian Church, originally projected by Aponius (7th century), and more fully wrought out by De Lyra (1270-1340), Brightman (1600), and Cocceius (1603-1699). According to De Lyra, chaps. ii.-vii. describe the history of the Israelites from the Exodus to the birth of Christ; chap. vii. ad fin. the history of the Christian Church to Constantine. Brightman divides the Cant. into a history of the *Loyal*, and a history of the *Evangelical* Church; his detail is highly elaborate, e. g. in Cant. v. 8, he discovers an allusion to Peter Waldo (1160), and in verse 13 to Robert Trench (1290). (b.) Luther's theory limits the allegorical meaning to the contemporaneous history of the Jewish people under Solomon. (c.) According to Ghislerius, and Corn. a Lapide the Bride is the Virgin Mary. (d.) Puffendorf refers the spiritual sense to the circumstances of our Saviour's death and burial.

3. The *literal* interpretation seems to have been connected with the general movement of Theodore Mopsuest. (360-429) and his followers, in opposition to the extravagances of the early Christian allegorists. Its *scheme* was nuptial, with Pharaoh's daughter as the bride. That it was by many regarded as the only admissible interpretation appears from Theodore, who mentions this opinion only to condemn it. Borne down and overwhelmed by the prolific genius of mediæval allegory, we have a glimpse of it in Abulpharagius (vid. sup.); and in the MS. commentary (Bodl. Oppenh. Coll. No. 625), cited by Mr. Ginsburg, and by him referred conjecturally to a French Jew of the 12th or 13th cent. This Commentary anticipates more recent criticism by interpreting the Song as *celebrating the humble love of a shepherd and shepherdess*. The extreme literal view was propounded by Castellio (1544); who called the Cant. "*Colloquium Salomonis cum amica quâdam Sulamithâ*," and rejected it from the Canon. Following out this idea, Whiston (1723) recognised the book as a composition of Solomon; but denounced it as *foolish, lascivious, and idolatrous*. Meanwhile the *nuptial* theory was adopted by Grotius as the literal basis of a secondary and spiritual interpre-

tation; and, after its dramatical development by Bossuet, long continued to be the standard scheme of the mystical school. In 1803 it was reconstructed by Good, with a Jewish instead of an Egyptian lude. The purely *literal* theory, opposed on the one hand to the allegorical interpretation, and on the other to Castellio and Whiston, owes its origin to Germany. Michaelis (1770) regarded the Song as an exponent of *wedded love, innocent, and happy*. But, while justifying its admission into the Canon, he is betrayed into a levity of remark altogether inconsistent with the supposition that the book is inspired (Not. ad Lowth. *Præf.*). From this time the scholarship of Germany was mainly enlisted on the side of the literalists. The literal basis became thoroughly dissociated from the mystical superstructure; and all that remained to be done was to elucidate the true scheme of the former. The most generally received interpretation of the modern literalists is that which was originally proposed by Jacobi (1771), adopted by Herder, Ammon, Umbreit, Ewald, &c.; and more recently by Prof. Meier of Tübingen (1854), and in England by Mr. Ginsburg, in his very excellent translation (1857). According to the detailed application of this view as given by Mr. Ginsburg, the Song is intended to display the *victory of humble and constant love over the temptations of wealth and royalty*. The tempter is Solomon: the object of his seductive endeavours is a Shulamite shepherdess, who, surrounded by the glories of the court, and the fascinations of unwonted splendour, pines for the shepherd-lover from whom she has been involuntarily separated.

The drama is divided into 5 sections, indicated by the thrice repeated formula of adjuration (ii. 7, iii. 5, viii. 4), and the use of another closing sentence (v. 1).

Section 1 (Ch. i.—ii. 7): scene—a country seat of Solomon. The shepherdess is committed to the charge of the court-ladies ("daughters of Jerusalem"); who have been instructed to prepare the way for the royal approach. Solomon makes an unsuccessful attempt to win her affections.

Sect. 2 (ii. 8—iii. 5): the shepherdess explains to the court-ladies the cruelty of her brothers, which had led to the separation between herself and her beloved.

Sect. 3 (iii. 6—v. 1): entry of the royal train into Jerusalem. The shepherd follows his betrothed into the city, and proposes to rescue her. Some of her court companions are favourably impressed by her constancy.

Sect. 4 (v. 2—viii. 4): the shepherdess tells her dream, and still farther engages the sympathies of her companions. The king's flatteries and promises are unavailing.

Sect. 5 (viii. 5-14): the conflict is over; virtue and truth have won the victory: and the shepherdess and her beloved return to their happy home; visiting on the way the tree beneath whose shade they first plighted their troth (viii. 5). Her brothers repeat the promises which they had once made conditionally upon her virtuous and irreproachable conduct.

Such is a brief outline of the scheme most recently projected by the literalists. It must not be supposed, however, that the supporters of the *allegorical* interpretation have been finally driven from the field. Even in Germany a strong band of reactionary Allegorists have maintained their

ground, including such names as Hug, Kaiser, Rosenmüller, Hahn, and Hengstenberg. On the whole, their tendency is to return to the 'Chaldee Paraphrase; a tendency which is specially marked in Rosenmüller. In England the battle of the Literalists has been fought by Dr. Pye Smith (*Congreg. Mag.* for 1837, 38); in America by Prof. Noyes, who adopts the extreme *erotic* theory, and is unwilling to recognize in Cant. any moral or religious design. It should be observed that such a sentiment as this of Dr. Noyes is utterly alien to the views of Jacobi and his followers; who conceive the recommendation of virtuous love and constancy to be a portion of the very highest moral teaching, and in no way unworthy of an inspired writer.

The allegorical interpretation has been defended in America by Professors Stuart and Burrowes. The internal arguments adduced by the allegorists are substantially the same which were urged by Calovius against the literal basis of the mystical interpretation. The following are specimens:—

(a.) Particulars not applicable to Solomon (v. 2); (b.) particulars not applicable to the wife of Solomon (i. 6, 8; v. 7; vii. 1, cf. i. 6); (c.) Solomon addressed in the second person (viii. 12); (d.) particulars inconsistent with the ordinary conditions of decent love (v. 2); (e.) date 20 years after Solomon's marriage with Pharaoh's daughter (comp. Cant. v. 4, and 1 K. vi. 38). It will readily be observed that these arguments do not in any way affect the literal theory of Jacobi.

For *external* arguments the allegorists depend principally upon *Jewish tradition, and the analogy of Oriental poetry*. The value of the former, as respects a composition of the 10th cent. B.C., is estimated by Mich. (*Not. ad Lowth.*) at a very low rate. For the latter, it is usual to refer to such authors as Chardin, Sir W. Jones, Herbelot, &c. (see Rosenm. *Animad.*). Rosenmüller gives a song of Hafiz, with a paraphrase by a Turkish commentator, which unfolds the spiritual meaning. For other specimens of the same kind see Lane's *Egyptians*. On the other hand the objections taken by Dr. Noyes are very important (*New Transl.*). It would seem that there is one essential difference between the Song of Solomon and the allegorical compositions of the poets in question. In the latter the allegory is more or less avowed; and distinct reference is made to the Supreme Being: in the former there is nothing of the kind. But the most important consideration adduced by the literalists is the fact that the Cant. are the production of a different country, and separated from the songs of the Sufis and the Hindoo mystics by an interval of nearly 2000 years. To which it may be added that the Song of Solomon springs out of a religion which has nothing in common with the Pantheism of Persia and India. In short, the conditions of production in the two cases are utterly dissimilar. But the literalists are not content with destroying this analogy; they proceed farther to maintain that allegories do not generally occur in the sacred writings without some intimation of their secondary meaning, which intimation in the case of the Cant. is not forthcoming. They argue from the total silence of our Lord and His apostles respecting this book, not indeed that it is uninspired; but that it was never intended to bear within its poetic envelope that mystical sense which would have rendered it a perfect treasury of reference for Paul, when unfolding the spiritual relation between Christ and His church (see 2 Cor.

xi. 2; Rom. vii. 4; Eph. v. 23-32). Again, it is urged, that if this poem be allegorically spiritual, then its spiritualism is of the very highest order, and utterly inconsistent with the opinion which assigns it to Solomon. The philosophy of Solomon, as given in Eccl., is a philosophy of indifference, apparently suggested by the exhaustion of all sources of physical enjoyment. The religion of Solomon had but little practical influence on his life; if he wrote the glowing spiritualism of the Cant. when a young man, how can we account for his fearful degeneracy? If the poem was the production of his old age, how can we reconcile it with the last fact recorded of him that "his heart was not perfect with the Lord, his God?" For the same reason it is maintained that no other writer would have selected Solomon as a symbol of the Messiah. The excessively amative character of some passages is designated as almost blasphemous when supposed to be addressed by Christ to His church (vii. 2, 3, 7, 8); and the fact that the *dramatis personae* are three, is regarded as decidedly subversive of the allegorical theory.

The strongest argument on the side of the allegorists is the matrimonial metaphor so frequently employed in the Scriptures to describe the relation between Jehovah and Israel (Ex. xxiv. 15, 16; Num. xv. 39; Ps. lxxiii. 27; Jer. iii. 1-11; Ez. xvi., xxiii., &c.). It is fully stated by Prof. Stuart (*O. T. Canon*). On the other hand the literalists deny so early a use of the metaphor. They contend that the phrase "to go whoring after other gods" describes a literal fact; and that even the metaphor as used by the prophets who lived after Solomon implies a wedded relation, and therefore cannot be compared with the ante-nuptial affection which forms the subject of Cant.

IV. *Canonicity*.—It has already been observed that the book was rejected from the Canon by Castellio and Whiston; but in no case has its rejection been defended on *external* grounds. It is found in the LXX., and in the translations of Aquila, Symmachus, and Theodot. It is contained in the catalogue given in the Talmud, and in the catalogue of Melito; and in short we have the same evidence for its canonicity as that which is commonly adduced for the canonicity of any book of the O. T.

(In addition to the ordinary sources, reference is advised to Lowth, *Praelect.* xxx., xxi., together with the notes of Michaelis, and the animadversions of Rosenmüller, Oxon. 1821; Harmer's *Outlines*, &c., London, 2nd ed. 1775; Transl. with notes by Mason Good, Lond. 1803; *Congreg. Mag.* for 1837 and 1838; *New Transl. of Prov. Eccl. and Cant.* by Prof. Noyes, Boston, 1846; *Commentary on Song*, &c., by Prof. Burrowes, Philadelphia, 1853; *Das Gerüttelte Hohelied*, by J. T. Jacobi, 1771; *Salomon's Lieder der Liebe*, &c., in vol. iii. of Herder's works, Stuttgart, and Tübingen, 1852; *Das Hohelied Salomo's*, &c., by Ewald, Göttingen, 1826; *Das Hohe Lied Salomons ausgelegt von W. Hengstenberg*, Berlin, 1853; *Das Hohe Lied*, &c., by Ernst Meier, Tübingen, 1854; *The Song of Songs*, &c., by C. D. Ginsburg, Lond., 1857; the last mentioned is specially recommended to the English reader.) [T. E. B.]

CAPERNAUM (Rec. T. *Καπερναούμ*; Lachm. with B. *Καφαρναούμ*, as if כפר נחום, "village of Nâchum;" Syriac Nîtr. ܩܦܪܢܐܘܡ, Pesch. ܩܦܪܢܐܘܡ; *Capharnaum*), a name\* with

which all are familiar as that of the scene of many acts and incidents in the life of Christ. There is no mention of Capernaum in the O. T. or Apocrypha, but the passage is. ix. 1 (in Hebrew, viii. 23) is applied to it by St. Matthew. The word *Cephar* in the name perhaps indicates that the place was of late foundation. [CAPIHAR.]

The few notices of its situation in the N. T. are not sufficient to enable us to determine its exact position. It was on the western shore of the Sea of Galilee (τὴν παραθαλάσσιον, Matt. iv. 13; comp. John vi. 24), and, if recent discoveries are to be trusted (Creton's *Nitrian Roc.* John vi. 17), was of sufficient importance to give to that Sea, in whole or in part, the name of the "lake of Capernaum." (This was the case also with Tiberias, at the other extremity of the lake. Comp. John vi. 1, "the sea of Galilee of Tiberias.") It was in the "land of Gennesareth" (Matt. xiv. 34, compared with John vi. 17, 21, 24), that is, the rich, busy plain on the west shore of the lake, which we know from the descriptions of Josephus and from other sources to have been at that time one of the most prosperous and crowded districts in all Palestine. [GENNESARETH.] Being on the shore, Capernaum was lower than Nazareth and Cana of Galilee, from which the road to it was one of descent (John ii. 12; Luke iv. 31), a mode of speech which would apply to the general level of the spot even if our Lord's expression "exalted unto heaven" (ἐξωθῆσθαι, Matt. xi. 23) had any reference to height of position in the town itself. It was of sufficient size to be always called a "city" (πόλις, Matt. ix. 1; Mark i. 33); had its own synagogue, in which our Lord frequently taught (John vi. 59; Mark i. 21; Luke iv. 33, 38)—a synagogue built by the centurion of the detachment of Roman soldiers which appears to have been quartered in the place\* (Luke vii. 1, comp. 8; Matt. viii. 8). But besides the garrison there was also a customs station, where the dues were gathered both by stationary (Matt. ix. 9; Mark i. 14; Luke v. 27) and by itinerant (Matt. xvii. 24) officers. If the "way of the sea" was the great road from Damascus to the south (Ritter, *Jordan*, 271) the duties may have been levied not only on the fish and other commerce of the lake, but on the caravans of merchandise passing to Galilee and Judaea.

The only interest attaching to Capernaum is as the residence of our Lord and his Apostles, the scene of so many miracles and "gracious words." At Nazareth He was "brought up," but Capernaum was emphatically His "own city;" it was when He returned thither that He is said to have been "at home" (Mark ii. 1; such is the force of *ἐν οἴκῳ*—A. V. "in the house"). Here he chose the Evangelist Matthew or Levi (Matt. ix. 9). The brothers Simon-Peter and Andrew belonged to Capernaum (Mark i. 29), and it is perhaps allowable to imagine that it was on the sea-beach below the town (for, doubtless, like true orientals, these two fishermen kept close to home), while Jesus was "walking" there, before "great multitudes" had learned to "gather together unto Him," that they heard the quiet call which was to make them forsake all and follow Him (Mark i. 16, 17, comp. 28). It was here that Christ worked the miracle on the centurion's servant (Matt. viii. 5; Luke vii.

1), on Simon's wife's mother (Matt. viii. 14; Mark i. 30; Luke iv. 38), the paralytic (Matt. ix. 1; Mark ii. 1; Luke v. 18), and the man afflicted with an unclean devil (Mark i. 33; Luke iv. 33). The son of the nobleman (John iv. 46) was, though resident at Capernaum, healed by words which appear to have been spoken in Cana of Galilee. At Capernaum occurred the incident of the child (Mark ix. 33; Matt. xviii. 1; comp. xvii. 24); and in the synagogue there was spoken the wonderful discourse of John vi. (see verse 59).

The doom which our Lord pronounced against Capernaum and the other unbelieving cities of the plain of Gennesareth has been remarkably fulfilled. In the present day no ecclesiastical tradition even ventures to fix its site; and the contest between the rival claims of the two most probable spots is one of the hottest, and at the same time the most hopeless, in sacred topography. Fortunately nothing hangs on the decision. The spots in dispute are 1. *Khan Minyeh*, a mound of ruins which takes its name from an old khan hard by. This mound is situated close upon the sea-shore at the north-western extremity of the plain (now *El Ghawceir*). It is of some extent, but consisting of heaps only with no visible ruins. These are south of the ruined khan; and north of them, close to the water-line of the lake, is a large spring surrounded by vegetation and overshadowed by a fig-tree which gives it its name—*Ain et Tin* (the spring of the fig-tree). Three miles south is another large spring called the "Round Fountain," which is a mile and a half from the lake, to which it sends a considerable stream with fish.

2. Three miles north of *Khan Minyeh* is the other claimant, *Tell Hâm*,—ruins<sup>b</sup> of walls and foundations covering a space of "half a mile long by a quarter wide," on a point of the shore projecting into the lake and backed by a very gently rising ground. Rather more than three miles further is the point at which the Jordan enters the north of the lake.

The arguments in favour of *Khan Minyeh* will be found in Robinson (ii. 403, 4, iii. 344-358). They are chiefly founded on Josephus's account of his visit to Capharnaïm, which Dr. R. would identify with the mounds near the khan, and on the testimonies of successive travellers from Arculfus to Quaresinius, whose notices Dr. R. interprets—often, it must be confessed, not without difficulty—in reference to *Khan Minyeh*. The fountain Capharnaïm, which Josephus elsewhere mentions (*B. J.* iii. 10, §8) in a very emphatic manner as a chief source of the water of the plain of Gennesareth and as abounding with fish, Dr. R. believes to be the *Ain et Tin*. But the "Round Fountain" certainly answers better to Josephus's account than a spring so close to the shore and so near one end of the district as is *Ain et Tin*. The claim of *Khan Minyeh* is also strongly opposed by a later traveller (Bonar, 437-41). Still this makes nothing for *Tell Hâm*.

The arguments in favour of *Tell Hâm* date from about 1875. They are urged by Dr. Wilson. The principal one is the name, which is maintained to be a relic of the Hebrew original—Caphar having given place to *Tell*. Dr. Wilson also ranges Josephus on his side (*Lands of the Bible*, ii. 139-149. See also Ritter, *Jordan*, 335-343, who supports

\* The fact of a Roman having built the synagogue certainly seems some argument against the prosperity of the town.

<sup>b</sup> Vast ruins . . . no ordinary city . . . site of a great town (Bonar, 414, 3).

*Tell Hâm*). *Kham Mungch*, *Et-Tubighah*, and *Tell Hâm*, are all, without doubt, ancient sites, but the conclusion from the whole of the evidence is irresistible:—that it is impossible to say which of them represents Capernaum, which (Chorazin, or which Bethsaida. Those anxious to inquire further into this subject may consult the originals, as given above. For the best general description and reproduction of the district, see Stanley, *S. & P.* ch. x. [4.]

**CAPHAR** (כפר, from a root signifying "to cover," Ges. 707), one of the numerous words employed in the Bible to denote a village or collection of dwellings smaller than a city (*Ir*). Mr. Stanley proposes to render it by "hamlet" (*S. and P.* App. §85), to distinguish its occurrences from those of Chavvah, Chatzer, Beutoteh, and other similar words. As an appellative it is found only three times: 1 Chr. xvii. 25; Cant. vii. 11, and 1 Sam. vi. 18 (in the last the pointing being different, *Copher*, כפר); but in neither is there anything to enable us to fix any special force to the word.

In names of places it occurs in CHEPHAR-AMMONAI, CHEPHIRAI, CAPHAR-SALAMA. But the number of places compounded therewith mentioned in the Talmuds shows that the name became a much commoner one at a time subsequent to the Biblical history. In Arabic *Kefr* is in frequent use (see the lists in the Index to Robinson, ii. and iii.) To us its chief interest arises from its forming a part of the name of CAPERNAUM, i. e. Capharnahum. [G.]

**CAPHAR-SALAMA** (Χαφασαλαμ; Alex. *Χαφασαλαμ*; *Capharsalamai*), a place (κόμη, *Jos. Ant.* xii. 10, §4) at which a battle was fought between Judas Maccabæus and Nicanor (1 Mac. vii. 31). From the fugitives having taken refuge in the "city of David," it would appear to have been near Jerusalem. Is it not possible that it was Siloam, the Arabic name of which is *Kefr-selâm*? Ewald places it north of Ramla on the Samaritan boundary (*Gesch.* iv. 368, note), but no certain traces of it seem to have been yet found. [G.]

**CAPHEN'ATHA** (Χαφενάθα; *Caphetatha*), a place apparently close to and on the east side of Jerusalem, which was repaired by Jonathan Maccabæus (1 Mac. xii. 37). The name is derived by Lightfoot from *Caphniath* the Talmudic word for unripe figs. If this be correct, there is a remarkable correspondence between the name Caphenatha and those of Bethany (house of dates), Bethphage (house of figs), and of the Mount of Olives itself, on which the three were situated—all testifying to the ancient fruitfulness of the place. [G.]

**CAPHIRA** (Καφίρας; *Enocadies*), 1 Esd. v. 19. [CHEPHIRAI.]

**CAPH'TOR** (כפרת; *Καππαδοκία*; *Cappadocia*): **CAPH'TORIM** (כפרתים; *Γαββοριεμ*, *Χαφβοριεμ*, *Καφβοριεμ*; *Caphthorim*, *Cappadoces*), a country thrice mentioned as the primitive seat of the Philistines (Deut. ii. 23; Jer. xlvii. 4; Am. ix. 7), who are once called Caphtorim (Deut. ii. 23), as of the same race as the Mizraite people of that name (*Gen.* x. 14; 1 Chr. i. 12). The position of the country, since it was peopled by Mizraites, must be supposed to be in Egypt or near to it in Africa, for the idea of the south-west of Palestine is excluded by the migra-

tion of the Philistines. In Jer. it is spoken of as **כפרת**, and has therefore been supposed to be an island. **כפרת**, however, has a wider signification; commonly it is any maritime land, whether coast or island, as in the expression **כפרת הים** (*Gen.* x. 5), by which the northern coasts and the islands of the Mediterranean seem to be intended, the former, in part at least, being certainly included. It must be remembered, however, that the Nile is spoken of as a sea (**ים**) by Nahum in the description of No, or Thebes (iii. 8). [No.] It is also possible that the expression in Jer. merely refers to the maritime position of the Philistines (*comp. Ez.* xxv. 16), and that Caphtor is here poetically used for Caphtorim.

The writer (*Encyclopædia Britannica*, 8th ed., *Egypt*, p. 419) has proposed to recognise Caphtor in the ancient Egyptian name of Coptos. This name, if literally transcribed, is written in the hieroglyphics Kehtu, Kehta, and Keht-Hor, probably pronounced Kubb, Kaht, and Keht-Hor (Brugsch, *Geogr. Inschr.* Taf. xxxviii. no. 899, 900), whence **κεφτ**, **κεπτο**, **κεπτω**, **κεβτω**,

**Gr. Κόπτος**, Arab. **كفت**, **Kuft**. The similarity of name is so great that it alone might satisfy us, but the correspondence of **Αἴγυπτος**, as if **Αἴα γυπτος**, to **כפרת**, unless **כפרת** refer to the Philistine coast, seems conclusive. We must not suppose, however, that Caphtor was Coptos: it must rather be compared to the Coptite nome, probably in primitive ages of greater extent than under the Ptolemies, for the number of nomes was in the course of time greatly increased. The Caphtoin stand last in the list of the Mizraite peoples in *Gen.* and *Chr.*, probably as dwellers in Upper Egypt, the names next before them being of Egyptian, and the earliest names of Libyan peoples [**Εἰγυπ**]. It is not necessary to discuss other identifications that have been proposed. The chief are Cappadocia, Cyprus, and Crete, of which the last alone, from the evident connexion of the Philistines with Crete, would have any probability in the absence of more definite evidence. There would, however, be great difficulty in the way of the supposition that in the earliest times a nation or tribe removed from an island to the mainland.

The migration of the Philistines is mentioned or alluded to in all the passages speaking of Caphtor or the Caphtorim. It thus appears to have been an event of great importance, and this supposition receives support from the statement in Amos. In the lists of *Gen.* and *Chr.*, as the text now stands, the Philistines are said to have come forth from the Casluhim—"the Casluhim, whence came forth the Philistines, and the Caphtorim,"—where the Heb. forbids us to suppose that the Philistines and Caphtorim both came from the Casluhim. Here there seems to have been a transposition, for the other passages are as explicit, or more so, and their form does not admit of this explanation. The period of the migration must have been very remote, since the Philistines were already established

\* The conquest of the Avim does not seem to have been complete when the Israelites entered the Promised Land, for they are mentioned after the "Ave lords of the Philistines" in *Josh.* (xiii. 3). The expression therefore in *Deut.* ii. 23, "And the Avim

in Palestine in Abraham's time (Gen. xxi. 32, 34). The evidence of the Egyptian monuments, which is indirect, tends to the same conclusion, but takes us yet further back in time. It leads us to suppose that the Philistines and kindred nations were cognate to the Egyptians, but so different from them in manners that they must have separated before the character and institutions of the latter had attained that development in which they continued throughout the period to which their monuments belong. We find from the sculptures of Rameses III. at Medinet Haboo, that the Egyptians about 1200 B.C. were at war with the Philistines, the Tok-karu, and the Shayratana of the Sea, and that other Shayratana served them as mercenaries. The Philistines and Tok-karu were physically cognate, and had the same distinctive dress; the Tok-karu and Shayratana were also physically cognate, and fought together in the same ships. There is reason to believe that the Tok-karu are the Carians, and the Shayratana cannot be doubted to be the Cherethim of the Bible and the earlier Cretans of the Greeks, inhabiting Crete, and probably the coast of Palestine also (*Enc. Brit. Egypt*, 462). All bear a greater resemblance to the Egyptians than does any other group of foreign peoples represented in their sculptures. This evidence points therefore to the spread of a seafaring race cognate to the Egyptians at a very remote time. Their origin is not alone spoken of in the record of the migration of the Philistines, but in the tradition of the Phœnicians that they came from the Erythraean Sea [ARABIA], and we must look for the primaevial seat of the whole race on the coasts of Arabia and Africa, where all ancient authorities lead us mainly to place the Cushites and the Ethiopians. [CUSH.] The difference of the Philistines from the Egyptians in dress and manners is, as we have seen, evident on the Egyptian monuments. From the Bible we learn that their laws and religion were likewise different from those of Egypt, and we may therefore consider our previous supposition as to the time of the separation of the peoples to which they belong to be positively true in their particular case. It is probable that they left Caphtor not long after the first arrival of the Mizraite tribes, while they had not yet attained that attachment to the soil that afterwards so eminently characterized the descendants of those which formed the Egyptian nation. The words of the prophet Amos seem to indicate a deliverance of the Philistines from bondage. "[Are] ye not as children of Ethiopians (בְּשֵׁיִם) unto me, [O] children of Israel? hath the LORD said. Have not I caused Israel to go up out of the land of Egypt, and the Philistines from Caphtor, and Aram from Kir?" (Am. ix. 7). The mention of the Ethiopians is worthy of note: here they are perhaps spoken of as a degraded people. The intention appears to be to show that Israel was not the only nation which had been providentially led from one country to another where it might settle, and the interposition would seem to imply oppression preceding the migration. It may be remarked that Manetho speaks of a revolt and return to allegiance of the Libyans, probably the Lehabim, or Lubim, from whose name Libya, &c., certainly came, in the reign of the first

who dwelt in villages (בְּחִצְרוֹת, wrongly made a prop. name in the A. V., and in the LXX., where the fem. pl. חִצְרוֹת has become, through the previous

king of the third dynasty, Necherôphês or Necherôchis, in the earliest age of Egyptian history, B.C. cir. 2600 (Cory, *Anc. Frag.* 2nd ed. pp. 100, 101.). [R. S. P.]

**CAPPADO'CIA** (Καππαδοκία). This eastern district of Asia Minor is interesting in reference to New Testament history only from the mention of its Jewish residents among the hearers of St. Peter's first sermon (Acts ii. 9), and its Christian residents among the readers of St. Peter's first Epistle (1 Pet. i. 1). The Jewish community in this region, doubtless, formed the nucleus of the Christian: and the former may probably be traced to the first introduction of Jewish colonists into Asia Minor by Selencus (Joseph. *Ant.* xii. 3 §4). The Roman period, through the growth of large cities and the construction of roads, would afford increased facilities for the spread both of Judaism and Christianity. It should be observed that Cappadocia was easily approached from the direction of Palestine and Syria, by means of the pass called the Cilician Gates, which led up through the Taurus from the low coast of Cilicia, and that it was connected, at least under the later Emperors, by good roads with the district beyond the Euphrates.

The range of Mount Taurus and the upper course of the Euphrates may safely be mentioned, in general terms, as natural boundaries of Cappadocia on the south and east. Its geographical limits on the west and north were variable. In early times the name reached as far northwards as the Euxine Sea. The region of Cappadocia, viewed in this extent, constituted two satrapies under the Persians, and afterwards two independent monarchies. One was Cappadocia on the Pontus, the other Cappadocia near the Taurus. Here we have the germ of the two Roman provinces of Pontus and Cappadocia. [PONTUS.] Several of the monarchs who reigned in Cappadocia Proper bore the name of Ariarathes. One of them is mentioned in 1 Macc. xv. 22. The last of these monarchs was called Archelaus (see Joseph. *Ant.* xvi. 4, §6). He was treacherously treated by the Emperor Tiberius, who reduced his kingdom to a province A.D. 17. This is the position in which the country stood during the time of St. Peter's apostolic work.

Cappadocia is an elevated table-land intersected by mountain-chains. It seems always to have been deficient in wood; but it was a good grain country, and it was particularly famous for grazing. Its Roman metropolis, afterwards both the birthplace and episcopal see of St. Basil, was Caesarea (now *Kaisariyeh*), formerly Mazaca, situated near Mount Argæus, the highest mountain in Asia Minor. Some of its other cities were equally celebrated in ecclesiastical history, especially Nyssa, Nazianzus, Samosata and Tyana. The native Cappadocians seem originally to have belonged to the Syrian stock: and since Ptolemy (v. 6) places the cities of Iconium and Derbe within the limits of this region, we may possibly obtain from this circumstance some light on "the speech of Lycaonia," Acts xiv. 11. [LYCAONIA.] The best description of these parts of Asia Minor will be found in Hamilton's *Researches*, and Texier's *Asie Mineure*. [J. S. H.]

**CAPTAIN.** (1.) As a purely military title, change of קָדֵשׁ to קָדֵשׁ, 'Asaphêd, even to Azazah (Gaza), Caphtorim who came forth from Caphtor destroyed them and dwelt in their stead," may mean that a part of the Avim alone perished.

Captain answers to  $\text{קצין}$  in the Hebrew army, and  $\chi\lambda\alpha\rho\chi\omicron\varsigma$  (*tribunus*) in the Roman. [ARMY.] The "captain of the guard" ( $\sigma\tau\rho\alpha\tau\omicron\upsilon\sigma\epsilon\delta\omicron\rho\chi\eta\varsigma$ ) in Acts xxviii. 16, is also spoken of under ARMY [p. 114]. (2.)  $\text{קצין}$ , which is occasionally rendered *captain*, applies sometimes to a military (Josh. x. 24; Judg. xi. 6, 11; Is. xxii. 3; Dan. xi. 18), sometimes to a civil command (e.g. Is. i. 10, iii. 6): its radical sense is *division*, and hence *decision* without reference to the means employed: the term illustrates the double office of the  $\text{קצין}$ . (3.) The "captain of the temple" ( $\sigma\tau\rho\alpha\tau\omicron\upsilon\sigma\epsilon\delta\omicron\rho\chi\eta\varsigma$   $\tau\omicron\upsilon$   $\text{ιερου}$ ) mentioned by St. Luke (xxii. 4; Acts iv. 1, v. 24) in connexion with the priests, was not a military officer, but superintended the guard of priests and Levites, who kept watch by night in the Temple. The office appears to have existed from an early date; the "priests that kept the door" (2 K. xii. 9, xxv. 18) are described by Josephus (*Ant.* x. 8. §5) as  $\tau\omicron\upsilon\varsigma$   $\phi\upsilon\lambda\acute{\alpha}\sigma\sigma\omicron\upsilon\sigma\tau\alpha\varsigma$   $\tau\omicron$   $\text{ιερον}$   $\eta\gamma\epsilon\mu\acute{\omicron}\nu\alpha\varsigma$ : a notice occurs in 2 Macc. iii. 4 of a  $\pi\rho\omicron\sigma\tau\acute{\alpha}\tau\eta\varsigma$   $\tau\omicron\upsilon$   $\text{ιερου}$ ; this officer is styled  $\sigma\tau\rho\alpha\tau\omicron\upsilon\sigma\epsilon\delta\omicron\rho\chi\eta\varsigma$  by Josephus (*Ant.* xx. 6, §2; B. J., vi. 5, §3); and in the Mishna (*Middoth*, i. §2)  $\text{איש הר הכהן}$ , "the captain of the mountain of the Temple;" his duty, as described in the place last quoted, was to visit the posts during the night, and see that the sentries were doing their duty. (4.) The term  $\sigma\tau\rho\alpha\tau\omicron\upsilon\sigma\epsilon\delta\omicron\rho\chi\eta\varsigma$ , rendered "captain" (Heb. ii. 10), has no reference whatever to a military office. [W. L. B.]

### CAPTIVITIES OF THE JEWS.

The bondage of Israel in Egypt, and their subjugation at different times, by the Philistines and other nations, are sometimes included under the above title; and the Jews themselves, perhaps with reference to Daniel's vision (ch. vii.), reckon their national captivities as four—the Babylonian, Median, Grecian, and Roman (Eisenmenger, *Entdecktes Judenthum*, vol. i. p. 748). But the present article is confined to the forcible deportation of the Jews from their native land, and their forcible detention, under the Assyrian or Babylonian kings.

The kingdom of Israel was invaded by three or four successive kings of Assyria. Pul or Sardanapalus, according to Rawlinson (*Outline of Assyrian History*, p. 14, but compare Rawl. *Herodotus*, vol. i. p. 466), imposed a tribute, B.C. 771 (or 762 Rawl.) upon Menahem (1 Chr. v. 26, and 2 K. xv. 19). Tiglath-Pileser carried away B.C. 740 the trans-Jordanic tribes (1 Chr. v. 26) and the inhabitants of Galilee (2 K. xv. 29, compare Is. ix. 1), to Assyria. Shalmaneser twice invaded (2 K. xvii. 3, 5) the kingdom which remained to Hoshea, took Samaria B.C. 721 after a siege of three years, and carried Israel away into Assyria. In an inscription interpreted by Rawlinson (*Herodotus*, vol. i. p. 472), the capture of Samaria is claimed by King Sargon (Is. xx. 1) as his own achievement. The cities of Samaria were occupied by people sent from Babylon, Cuthah, Ava, Hamath, and Sepharvaim; and Halah, Habor, Hara, and the river of Gozan became the seats of the exiled Israelites.

Sennacherib B.C. 713 is stated (Rawl. *Outline*, p. 24, but compare Demetrius ap. Clem. Alexand. *Stromata*, i. 21, incorrectly quoted as confirming the statement) to have carried into Assyria 200,000 captives from the Jewish cities which he took (2 K. xviii. 18). Nebuchadnezzar, in the first half of his reign, B.C. 606-562, repeatedly invaded Judaea, be-

sieged Jerusalem, carried away the inhabitants to Babylon, and destroyed the city and Temple. Two distinct deportations are mentioned in 2 K. xxiv. 14 (including 10,000 persons) and xxv. 11. One in 2 Chr. xxxvi. 20. Three in Jer. lii. 28, 29, including 4800 persons, and one in Dan. i. 3. The two principal deportations were, (1) that which took place B.C. 598, when Jehoiachin with all the nobles, soldiers, and artificers were carried away; and (2) that which followed the destruction of the Temple and the capture of Zedekiah B.C. 588. The three which Jeremiah mentions may have been the contributions of a particular class or district to the general captivity; or they may have taken place, under the orders of Nebuchadnezzar, before or after the two principal deportations. The captivity of certain selected children B.C. 607, mentioned by Daniel, who was one of them, may have occurred when Nebuchadnezzar was colleague or lieutenant of his father Nabopolassar, a year before he reigned alone. The 70 years of captivity predicted by Jeremiah (xxv. 12) are dated by Prideaux from B.C. 606 (see *Connexion*, anno 606; and comp. Davison, *On Prophecy*, Lect. vi. pt. 1). If a symbolical interpretation were required, it would be more difficult to regard (with Winer and Rosenmüller) these 70 years as an indefinite period designated arbitrarily by a sacred number, than to believe with St. Augustine (*Enarratio in Ps.* cxxvi. 1) that they are a symbol of "all time." The captivity of Ezekiel dates from B.C. 598, when that prophet, like Mordcai the uncle of Esther (ii. 6), accompanied Jehoiachin.

We know nothing, except by inference from the book of Tobit, of the religious or social state of the Israelitish exiles in Assyria. Doubtless the constant policy of 17 successive kings had effectually estranged the people from that religion which centered in the Temple, and had reduced the number of faithful men below the 7000 who were revealed for the consolation of Elijah. Some priests at least were among them (2 K. xvii. 28), though it is not certain that these were of the tribe of Levi (1 K. xii. 31). The people had been nurtured for 250 years in idolatry in their own land, where they departed not (2 K. xvii. 22) from the sins of Jeroboam, notwithstanding the proximity of the Temple, and the succession of inspired prophets (2 K. xvii. 18) among them. Deprived of these checks on their natural inclinations (2 K. xvii. 15), torn from their native soil, destitute of a hereditary king, they probably became more and more closely assimilated to their heathen neighbours in Media. And when, after the lapse of more than a century, they were joined B.C. 598 by the first exiles from Jerusalem, very few families probably retained sufficient faith in the God of their fathers to appreciate and follow the instruction of Ezekiel. But whether they were many or few, their genealogies were probably lost, a fusion of them with the Jews took place, Israel ceasing to envy Judah (Is. xi. 13); and Ezekiel may have seen his own symbolical prophecy (xxxvii. 15-19) partly fulfilled.

The captive Jews were probably prostrated at first by their great calamity, till the glorious vision of Ezekiel in the 5th year of the captivity revived and reunited them. The wishes of their conqueror were satisfied when he had displayed his power by transporting them into another land, and gratified his pride by inscribing on the walls of the royal palace his victorious progress and the number of his captives. He could not have designed to increase

the population of Babylon, for he sent Babylonian colonists into Samaria. One political end certainly was attained—the more easy government of a people separated from local traditions and associations (see Gesenius on Is. xxxvi. 16, and compare Gen. xlvii. 21). It was also a great advantage to the Assyrian king to remove from the Egyptian border of his empire a people who were notoriously well-affected towards Egypt. The captives were treated not as slaves but as colonists. There was nothing to hinder a Jew from rising to the highest eminence in the state (Dan. ii. 48), or holding the most confidential office near the person of the king (Neh. i. 11; Tob. i. 13, 22). The advice of Jeremiah (xxix. 5, &c.) was generally followed. The exiles increased in numbers and in wealth. They observed the Mosaic law (Esth. iii. 8; Tob. xiv. 9). They kept up distinctions of rank among themselves (Ez. xx. 1). And though the assertion in the Talmud be unsupported by proof that they assigned thus early to one of their countrymen the title of Head of the Captivity (or, captain of the people, 2 Esd. v. 16), it is certain that they at least preserved their genealogical tables, and were at no loss to tell who was the rightful heir to David's throne. They had neither place nor time of national gathering, no Temple; and they offered no sacrifice. But the rite of circumcision and their laws respecting food, &c. were observed; their priests were with them (Jer. xxix. 1); and possibly the practice of erecting synagogues in every city (Acts xv. 21) was begun by the Jews in the Babylonian captivity.

The captivity is not without contemporaneous literature. In the apocryphal book of Tobit, which is generally believed to be a mixture of poetical fiction with historical facts recorded by a contemporary, we have a picture of the inner life of a family of the tribe of Naphtali, among the captives whom Shalmaneser brought to Nineveh. The apocryphal book of Baruch seems, in Mr. Layard's opinion, to have been written by one whose eyes, like those of Ezekiel, were familiar with the gigantic forms of Assyrian sculpture. Several of the Psalms appear to express the sentiments of Jews who were either partakers or witnesses of the Assyrian captivity. Ewald assigns to this period Ps. xlii., xliii., lxxxiv., xvii., xli., xlii., xlv., xxxviii., lxxxviii., xl., lxi., cix., li., lxi., xxv., xxxiv., lxxxii., xiv., cxx., cxxi., cxxii., cxxx., cxxxi. And in Ps. lxxx. we seem to have the words of an Israelite, dwelling perhaps in Judaea (2 Chr. xv. 9, xxxi. 6), who had seen the departure of his countrymen to Assyria; and in Ps. cxxvii. an outpouring of the first intense feelings of a Jewish exile in Babylon. But it is from the three great prophets, Jeremiah, Ezekiel, and Daniel, that we learn most of the condition of the children of the captivity. The distant warnings of Jeremiah, advising and cheering them, followed them into Assyria. There, for a few years, they had no prophetic guide; till suddenly the vision of Ezekiel at Chebar (in the immediate vicinity of Nineveh, according to Layard, or, according to others, near Carthage on the Euphrates) assured them that the glory which filled the Temple at Jerusalem was not hopelessly withdrawn from the outcast people of God. As Jeremiah warned them of coming woe, so Ezekiel taught them how to bear that which was come upon them. And when he died, after passing at least 27 years (Ez. xxix. 17) in captivity, Daniel survived even beyond the Return; and though his high station and ascetic life probably secluded him from frequent

familiar intercourse with his people, he filled the place of chief interpreter of God's will to Israel, and gave the most conspicuous example of devotion and obedience to His laws.

The Babylonian captivity was brought to a close by the decree (Ezr. i. 2) of Cyrus B.C. 536, and the return of a portion of the nation under Shebazzar or Zerubbabel B.C. 535, Ezra B.C. 458, and Nehemiah B.C. 445. The number who returned upon the decree of B.C. 536 (which was possibly framed by Daniel, Milman, *Hist. of Jews*, ii. 8) was 42,360, besides servants. Among them about 30,000 are specified (compare Ezr. ii. and Neh. vii.) as belonging to the tribes of Judah, Benjamin, and Levi. It has been inferred (Prideaux, *anno* 536) that the remaining 12,000 belonged to the tribes of Israel (compare Ezr. vi. 17). And from the fact that out of the 24 courses of priests only 4 returned (Ezr. ii. 36), it has been inferred that the whole number of exiles who chose to continue in Assyria was about six times the number of those who returned. Those who remained (Esth. viii. 9, 11), and kept up their national distinctions, were known as The Dispersion (John vii. 35; 1 Pet. i. 1; James i. 1); and, in course of time, they served a great purpose in diffusing a knowledge of the true God, and in affording a point for the commencement of the efforts of the Evangelists of the Christian faith.

Many attempts have been made to discover the ten tribes existing as a distinct community. Josephus (*Ant.* xi. 5, §2) believed that in his day they dwelt in large multitudes, somewhere beyond the Euphrates, in Arsareth, according to the author of 2 Esd. xiii. 45. Rabbinical traditions and fables, committed to writing in the middle ages, assert the same fact (Lightfoot, *Hor. Hebr.* in 1 Cor. xiv. Appendix), with many marvellous amplifications (Kissemenger, *Ent. Jud.* vol. ii., ch. x.; Jahn, *Hebrew Commonwealth*, App. bk. vi.). The imagination of Christian writers has sought them in the neighbourhood of their last recorded habitation: Jewish features have been traced in the Afghan tribes: rumours are heard to this day of a Jewish colony at the foot of the Himalayas: the Black Jews of Malabar claim affinity with them: elaborate attempts have been made to identify them recently with the Nestorians, and in the 17th century with the Indians of North America. But though history bears no witness of their present distinct existence, it enables us to track the footsteps of the departing race in four directions after the time of the Captivity. (1.) Some returned and mixed with the Jews (Luke ii. 36; Phil. iii. 5, &c.). (2.) Some were left in Samaria, mingled with the Samaritans (Ezr. vi. 21; John iv. 12), and became bitter enemies of the Jews. (3.) Many remained in Assyria, and mixing with the Jews formed colonies throughout the East, and were recognised as an integral part of the Dispersion (see Acts ii. 9, xvi. 7; Buchanan's *Christian Researches*, p. 212), for whom, probably ever since the days of Ezra, that plaintive prayer, the tenth of the Shemoneh Esre, has been daily offered, "Sound the great trumpet for our deliverance, lift up a banner for the gathering of our exiles, and unite us all together from the four ends of the earth." (4.) Most, probably, apostatized in Assyria, as Prideaux (*anno* 677) supposes, and adopted the usages and identity of the nations among whom they were planted, and became wholly swallowed up in them. Dissertations on the Ten Tribes have been written by Calmet, *Commentaire Littéral*, vol.

iii. and vi.; by Witsius, *Aegyptiacæ*; and by J. D. Michaelis.

The Captivity was a period of change in the vernacular language of the Jews (see Neh. viii. 8) and in the national character. The Jews who returned were remarkably free from the old sin of idolatry: a great spiritual renovation, in accordance with the divine promise (Ez. xxxvi. 24-28), was wrought in them. A new and deep feeling of reverence for the letter of the law and for the person of Moses was probably a result of the religious service which was performed in the synagogues. A new impulse of commercial enterprise and activity was implanted in them, and developed in the days of the Dispersion (see James iv. 13). [W. T. B.]

**CARABASION** (Ῥαβασίων; Alex. *Karabasíon*; *Marimoth*), a corrupt name to which it is difficult to find anything corresponding in the Hebrew text (1 Esd. ix. 34).

**CARBUNCLE** (בִּרְקָה, אֲבִנֵי בִּרְקָה or בִּרְקָה; *κρύσταλλον, σμαράγδος*; *lapides scutptos, smaragdus, carbunculus* (?)). From the etymology of בִּרְקָה (Ex. xxviii. 17), root בִּרַךְ, to *flush*, we assume that a stone of a bright coruscant colour is meant. Kalisch translates it *smaragd*, and says it is a sort of precious corundum of strong glass lustre, a beautiful green colour with many degrees of shade, pellucid and doubly refractive. Pliny enumerates twelve species of *σμαράγδος*. They are not rare in Egypt. (Rosem. *Alterth.* iv. 1, 34. See Braun, *de Vest. Sacerdot.* p. 517, sq.) The form בִּרְקָה occurs in Ez. xxviii. 13.

In Is. liv. 12, אֲבִנֵי בִּרְקָה (lit. "stones of a sparkling gem") are translated "*carbuncles*," and by the LXX. λίθους κρυστάλλινους. אֲבִנֵי בִּרְקָה comes from the root בִּרַךְ, to *light a fire*. Compare the Arab.

قَدَحَ, to *force fire from the hearth*. The same root in Chald., Syr., and Arab. has the force of *borin*; a meaning which may be traced to the production of fire by rapid boring into wood. [W. D.]

**CAR'CAS** (כִּרְכַּס; *Ἀρκεσαίος*; *Churchas*), the seventh of the seven "chamberlains" (i. e. eunuchs, קַרְיָסִים) of king Ahasuerus (Esth. i. 10). The name has been compared with the Sanscrit *Karaka* = *severe* (see Gesenius, 713).

**CARCHEMISH** (כַּרְכֵּמִישׁ; *Χαρκαμύς*, *Xapmels*; *Charcomis*). The Scriptural Carchemish is not, as has generally been supposed, the classical Circesium. It lay very much higher up the Euphrates, occupying nearly the site of the later *Mabog*, or Hierapolis. The Assyrian inscriptions show it to have been, from about B.C. 1100 to B.C. 850, a chief city of the Hittites, who were masters of the whole of Syria from the borders of Damascus to the Euphrates at *Bir*, or *Bireh-jik*. It seems to have commanded the ordinary passage of the Euphrates in this part of its course, and thus in the contentions between Egypt and Assyria its possession was of primary consequence (comp. 2 Chr. xxxv. 20, with Jer. xli. 2). Carchemish appears to have been taken by Pharaoh-Necho shortly after the battle of Megiddo (ab. B.C. 608), and retaken by Nebuchadnezzar after a battle three years later, B.C. 605 (Jer. xli. 2). The word Carchemish

would mean "the fort of Chemosh," the well-known deity of the Moabites. [G. R.]

**CARE'AH** (קָרְיָה; *Karhā*; Alex. *Karhēs*; *Curec*), father of Johanan (2 K. xxv. 23), elsewhere in the A. V. spelt KAREAH.

**CARIA** (Καρία), the southern part of the region which in the N. T. is called ASIA, and the south-western part of the peninsula of Asia Minor. In the Roman times the name of Caria was probably less used than previously. At an earlier period we find it mentioned as a separate district (1 Mac. xv. 23). At this time (B.C. 139) it was in the enjoyment of the privilege of freedom, granted by the Romans. A little before it had been assigned by them to Rhodes, and a little later it was incorporated in the province of Asia. From the context it appears that many Jews were resident in Cain. The cities where they lived were probably Halicarnassus (Ἥλιος), Cnidus (Ἰβ. also Acts xxvii. 7), and Miletus (Acts xx. 15-38). Off the coast of Caria were the islands PATMOS, COS, RHODES. [J. S. H.]

**CAR'ME** (Χαρμί; Alex. *Χαρμή*; *Curec*), 1 Esd. v. 25. [HARIM.]

**CAR'MEL**. Nearly always with the definite article, הַכַּרְמֶל, i. e. "the park," or "the well-wooded place." 1. (δ *Καρμήλος*; *Carmel*. In Kings, generally "Mount C." הַר הַכַּרְמֶל; ὄρος τὸ *Καρμήλιον*; in the Prophets, "Carmel.") A mountain which forms one of the most striking and characteristic features of the country of Palestine. As if to accentuate more distinctly the bay which forms the one indentation in the coast, this noble ridge, the only headland of lower and central Palestine, forms its southern boundary, running out with a bold bluff promontory all but into the very waves of the Mediterranean. From this point it stretches in a nearly straight line, bearing about S.S.E., for a little more than twelve miles, when it terminates suddenly by a bluff somewhat corresponding to its western end, breaking down abruptly into the hills of *Jenin* and Samaria which form at that part the central mass of the country.

Carmel thus stands as a wall between the maritime plain of Sharon on the south, and the more inland expanse of Esdraelon on the north. Towards the former the slopes or spurs, by which the central ridge descends, are gradual; but on the north side the gradients are more sudden, in many places descending almost by precipices to the Kishon, which runs at the foot of the mountain in a direction generally parallel to the central axis.

The structure of Carmel is in the main the Jura formation (upper oolite), which is prevalent in the centre of Western Palestine—a soft white limestone, with nodules and veins of flint. As usual in limestone formations it abounds in caves ("more than 2000," Mislin, ii. 46), often of great length and extremely tortuous. At the west end are found chalk and tertiary breccia formed of fragments of chalk and flint (Rusegger, in Ritter, *Pal.* 712). On the north-east of the mount, beyond the *Nahr el Mukatta*, plutonic rocks appear, breaking through the deposited strata and forming the beginning of the basalt formation which runs through the Plain of Esdraelon to Tabor and the Sea of Galilee (Ritter, 712, 3). The round stones known by the names of "Lapides Judaici" and "Elijah's melons" are the bodies known to geologists as

"geodes." Their exterior is chert or flint of a lightish brown colour; the interior hollow, and lined with crystals of quartz or chalcedony. They are of the form, and often the size, of the large water melons of the east. Formerly they were easily obtained, but are now very rarely found (Seezen, ii. 131, 4; Parkinson's *Organic Remains*, i. 322, 451). The "olives" are commoner. They are the fossil spines of a kind of echinus (*Cidaris glandifera*) frequent in these strata, and in size and shape are exactly like the fruit (Parkinson, iii. 45). The "apples" are probably the shells of the *Cidaris* itself. For the legend of the origin of these "fruits," and the position of the "field" or "garden" of Elijah in which they are found, see Mislin, ii. 64, 5.<sup>a</sup>

In form Carmel is a tolerably continuous ridge, at the W. end about 600,<sup>b</sup> and the E. about 1600 feet above the sea. The highest part is some four miles from the east end, at the village of *Esfeh*, which, according to the measurements of the English engineers, is 1728 feet above the sea. In appearance Carmel still maintains the character which there is no reason to doubt was the origin of its name. It is still clothed with the same "excellency" of "wood," which supplied the prophets of Israel and Judah alike with one of their most favourite illustrations (Is. xxxiii. 9; Mic. vii. 14). Modern travellers delight to describe its "rocky dells with deep jungles of copse"—its "shrubberies thicker than any others in central Palestine" (Stanley, M.S.)—its "impenetrable brushwood of oaks and other evergreens, tenanted in the wilder parts by a profusion of game and wild animals" (Porter, *Handb.*), but in other places bright with "hollyhocks, jasmine, and various flowering creepers" (Van de Velde). "There is not a flower," says the last-named traveller, "that I have seen in Galilee, or on the plains along the coast, that I do not find here on Carmel . . . still the fragrant, lovely mountain that he was of old" (i. 317, 8). "The whole mountain side was dressed with blossoms and flowering shrubs and fragrant herbs" (Martineau, 559).

Carmel fell within the lot of the tribe of Asher (Josh. xix. 26), which was extended as far south as Dor (*Tantura*), probably to give the Asherites a share of the rich corn-growing plain of Sharon. The king of "Jokneam of Carmel" was one of the Canaanite chiefs who fell before the arms of Joshua (xii. 22). These are the earliest notices which we possess of the name. There is not in them a hint of any sanctity as attaching to the mount. But taking into account the known propensity of the early inhabitants of Palestine to convert "high places" into sanctuaries—the prominence of Carmel—the fact that an altar of Jehovah did exist there before the introduction of Baal worship into the kingdom (1 K. xviii. 30)—Elijah's choice of the place for the assembly of the people, such assemblies being commonly held at holy places—and the custom, which appears to have been prevalent, of resorting thither on new-moon and sabbath (2 K. iv. 23)—taking these into account, there seem to be grounds for believing that from very early times it was considered as a sacred spot. In later times we know that its

reputation was not confined to Palestine. Pythagoras was led to it by that reputation; such is the express statement of his biographer Iamblichus, who himself visited the mountain; Vespasian too came thither to consult—so we are told by Tacitus with that mixture of fact and fable which marks all the heathen notices of Palestine—the oracle of the god, whose name was the same as that of the mountain itself; an oracle without image or temple—"ara tantum et reverentia" (*Dict. of Geogr. Carmelus*).

But that which has made the name of Carmel most familiar to the modern world is its intimate connexion with the history of the two great prophets of Israel—Elijah and Elisha. The fiery zeal of the one, the healing tenderness of the other are both inseparably connected in our minds with this mountain. Here Elijah brought back Israel to allegiance to Jehovah, and slew the prophets of the foreign and false god; here at his entreaty were consumed the successive "fifties" of the royal guard; but here, on the other hand, Elisha received the visit of the bereaved mother whose son he was soon to restore to her arms (2 K. iv. 25, &c.).

The first of these three events, without doubt, took place at the eastern end of the ridge. In fact it is difficult to find another site, the actual name of which has not been preserved, in which every particular is so minutely fulfilled as in this. The tradition preserved in the convent, and among the Druses of the neighbouring villages—the names of the places—the distance from Jezreel—the nature of the locality—the presence of the never-failing spring—all are in its favour. It is, however, remarkable that the identification has been made but lately, and also that it should have been made by two travellers almost at the same time—Lieut. Van de Velde in 1852, and Professor Stanley in 1853. This interesting site cannot be better described than in the words of the latter traveller.

"The tradition is unusually trustworthy: it is perhaps the only case in Palestine in which the recollection of an alleged event has been actually retained in the native Arabic nomenclature. Many names of towns have been so preserved, but here is no town, only a shapeless ruin, yet the spot has a name—*El-Maharrakah*—the burning, or 'the sacrifice.' The Druses come here from a distance to perform a yearly sacrifice; and, though it is possible this practice may have originated the name, it is more probable that the practice itself arose from an earlier tradition. . . . But be the tradition good or bad, the localities adapt themselves to the event in almost every particular. The summit thus marked out is the extreme eastern point of the range, commanding the last view of the sea behind, and the first view of the great plain in front. . . . There on the highest ridge of the mountain may well have stood on its sacred 'high-place' the altar of Jehovah which Jezebel had cast down. Close beneath, on a wide upland sweep, under the shade of ancient olives and round a well of water, said to be perennial, and which may therefore have escaped the general drought, and have been able to furnish water for the trenches round the altar, must have been ranged on one side the king and people with the 850

<sup>a</sup> The legend is sometimes told of Lazarus (Seezen, *Reisen*, 1854, ii. 134).

<sup>b</sup> The cupola of the convent is 560 ft. above the sea (Admiralty Chart, 1858). For the general form of the ridge see the section on Van de Velde's new map.

<sup>c</sup> Josephus distinctly says that the water was obtained from the neighbouring well: ἀπὸ τῆς ἀρπύρας (*Ant.* viii. 13, §5). There is therefore no occasion for the "coincidence" discovered by Prof. Blunt, *Und. Coincidences* (II. xxii.).

prophets of Baal and Astarte, and on the other the solitary and commanding figure of the prophet of Jehovah. Full before them opened the whole plain of Esdraelon: the city of Jezreel, with Ahab's palace and Jezebel's temple, distinctly visible: in the nearer foreground, immediately under the base of the mountain, was clearly seen the winding bed of the Kishon." To this may be added that a knoll is pointed out between the ridge and the plain, bearing the name of *Tell Kasir*,<sup>d</sup> "the hill of the Priests," and that the modern name of the Kishon is *Nahr el Mukatta*, "the river of slaughter." "The closing scene still remains. From the slaughter by the side of the Kishon the king went up to the glades of Carmel to join in the sacrificial feast. And Elijah too ascended to the 'top of the mountain,' and there with his face on the earth remained wrapt in prayer, while his servant mounted to the highest point of all, whence there is a wide view of the blue reach of the Mediterranean, over the western shoulder of the ridge. . . . Seven times the servant climbed and looked, and seven times there was nothing . . . At last out of the far horizon there rose a little cloud,<sup>e</sup> and it grew in the deepening shades of evening till the whole sky was overcast, and the forests of Carmel shook in the welcome sound of the mighty winds, which in eastern regions preceed a coming tempest" (*Sinai & Palestine*, p. 353-6).

There is good reason to believe that a later incident in the life of the same great prophet took place on Carmel. This was when he "caused fire to come down from heaven" and consume the two "fifties" of the guard which Ahaziah had despatched to take him prisoner, for having stopped his messengers to Baalzebub the god of Ekron (2 K. i. 9-15). [See ELIJAH, p. 529.] In this narrative our Version, as is too frequently the case, conceals the force of the original by imperfect translation. "A hill" (v. 9) should be "the mount" (הַר), the word always used for Carmel, and, in connexion with Elijah, for Carmel only, with the exception of Sinai, which of course cannot be intended here. Josephus (*Ant.* ix. 2, §1), with equal force, has ἐπὶ τῆς κορυφῆς τοῦ ὄρους.

The tradition in the present convent is, that Elijah and Elisha both resided on the mountain, and a cave is actually shown under the high-altar of the church as that of Elijah. There is nothing in the Scripture to sanction such a statement with regard to Elijah, but in the case of Elisha, the tradition may rest on better grounds. After the ascent of Elijah, Elisha went to Mount Carmel (2 K. ii. 25), though only for a time; but he was again there at the Shunammite's visit (iv. 25), and that at a time when no festival, no "new moon or sabbath" (v. 23), required his presence. (In iv. 27, there is nearly the same error as was noticed above in reference to i. 9; "the hill" should be rendered "the mount.")

This is the last mention of Carmel as the scene of any event in the sacred history. Its sanctity no doubt remained, but it is its richness and its prominence—"Tabor among the mountains; Carmel by the sea"—which appear to have taken hold of the poets of the nation, both of Israel and Judah,

and their references to it are frequent and characteristic (*Cant.* vii. 5; *Is.* xxxv. 2, xxxvii. 24; *Jer.* xlv. 18, l. 19; *Am.* i. 2, ix. 3; *Mic.* vii. 14; *Nah.* i. 4).

Carmel has derived its modern name from the great prophet; *Mar Elyas* is the common designation, *Karmel* being occasionally, but only seldom, heard. It is also the usual name of the convent, though dedicated "in honorem BB. Virginius Marine."

Professor Stanley has pointed out (*S. and P.* 352) that it is not any connexion with Elijah that gives the convent its interest to the western world, but the celebrated order of the Barefooted Carmelite Friars, that has sprung from it, and carried its name into Europe. The order is said in the traditions of the Latin Church to have originated with Elijah himself (St. John of Jerus. quoted in Mislin, 49), but the convent was founded by St. Louis, and its French origin is still shown by the practice of unfurling the French flag on various occasions. Edward I. of England was a brother of the order, and one of its most famous generals was Simon Stokes of Kent (see the extracts in Wilson's *Lands*, ii. 246. For the convent and the singular legends connecting Mount Carmel with the Virgin Mary and Our Lord see Mislin, ii. 47-50). By Napoleon it was used as a hospital during the siege of Acre, and after his retreat was destroyed by the Arabs. At the time of Irby and Mangley's visit (1817) only one friar remained there (Irby, 60).

2. (Χερμέα in Josh.; τὸ Κάριμλον in Sam.; *Charmel*) a town in the mountainous country of Judah (Josh. xv. 55), familiar to us as the residence of Nabal (1 Sam. xxv. 2, 5, 7, 40), and the native place of David's favourite wife, "Abigail the Carmelitess" (1 Sam. xxvii. 3; 1 Chr. iii. 1). This was doubtless the Carmel at which Saul set up a "place" (מָקוֹם, i. e. literally a "hand;" comp. 2 Sam. xviii. 18, "Absalom's place," where the same word is used) after his victory over Amalek (1 Sam. xv. 12). And this Carmel, and not the northern mount, must have been the spot at which king Uziah had his vineyards (2 Chr. xxvi. 10). In the time of Eusebius and Jerome it was the seat of a Roman garrison (*Onomasticon*, Carmelus). The place appears in the wars of the Crusades, having been held by king Amalrich against Saladin in 1172. The ruins of the town, now *Karmul*, still remain at ten miles below Hebron in a slightly S.E. direction, close to those of *Mitha* (Maon), *Zif* (Ziph), and other places named with Carmel in Josh. xv. 55. They are described both by Robinson (i. 494-8) and by Van de Velde (ii. 77-79), and appear to be of great extent. Conspicuous among them is a castle of great strength, in the walls of which are still to be seen the large bevelled masonry characteristic of Jewish buildings. There is also a very fine and large reservoir. This is mentioned in the account of king Amalrich's occupation of the place, and now gives the castle its name of *Kasr el-Birkeh* (Van de Velde, ii. 78). [G.]

CARMÍ (כַּרְמִי; Καρμί; *Charmi*). 1. A man of the tribe of Judah, father of Achan, the "troubler of Israel" (Josh. vii. 1, 18; 1 Chr. ii. 7), according to the first two passages the son of Zabdi or Zimri. [ZABDI.] In 1 Chr. iv. 1 the name is given as that of a "son of Judah;" but the same

<sup>d</sup> But this knoll appears, from the description of Van de Velde (i. 330), and from his new map (Dec. 1858), the only one in which it is marked, to be too far off.

<sup>e</sup> This cloud is treated in the formularies of the Roman Catholic Church as a type of the Virgin Mary. (See Mislin, ii. p. 45, and *Breviarium Rom.* July 16.)

person is probably intended; because (1) no son of Judah of that name is elsewhere mentioned; and (2) because, out of the five names who in this passage are said to be "sons" of Judah, none but Pharez are strictly in that relation to him. Hezron is the 2nd generation, Hur the 4th, and Shobal the 6th.

2. The 4th son of Reuben, progenitor of the family of THE CARMITES (כַּרְמִיתִים) (Gen. xlii. 9; Ex. vi. 14; Num. xvi. 6; 1 Chr. v. 3). [G.]

CARNA'IM (Καρναῖν; Alex. *Karpvelv*; *Carnilia*), a large and fortified city in the country east of Jordan—"the land of Galaad;" containing a "temple" (τὸ τέμενος ἐν Κ.). It was besieged and taken by Judas Maccabaeus (1 Macc. v. 26, 43, 44). Under the name of CARNION (τὸ Καρνίον) the same occurrence is related in 2 Macc. xii. 21, 26, the temple being called the ATARGATEION (τὸ Ἀταργατεῖον). This enables us to identify it with ASITEKION-KARNAIM. [G.]

CARN'ION. [CARNAIM.]

CARPENTER. [HANDICRAFT.]

CARPUS (Κάρπος; on the accentuation, see Wiener's Grammar, 6th ed. p. 49), a Christian at Troas, with whom St. Paul states that he left a cloak (2 Tim. iv. 13); on which of his journeys it is uncertain, but probably in passing through Asia Minor after his first captivity, for the last time before his martyrdom at Rome. According to Hippolytus, Carpus was bishop of Berytus in Thrace, called *Berrhoea* in the *Synopsis de Vita et Morte Prophetarum*, which passes under the name of Dorotheus of Tyre. [H. A.]

CARRIAGE. This word occurs only six times in the text of the A. V., and it may be useful to remind the reader that in none of these does it bear its modern sense, but signifies what we now call "baggage." The Hebrew words so rendered are three. 1. כְּלִי, *c'le*, generally translated "stuff" or "vessels." It is like the Greek word *σκεῦος*; and in its numerous applications perhaps answers most nearly to the English word "things." This word, rendered "carriage," occurs in 1 Sam. xvii. 22—"David left his 'baggage' in the hands of the keeper of the 'baggage'"; also Is. x. 28—"At Michmash he hath left his 'baggage'."

2. כְּבִידִה, *Cebudih*, "heavy matters," Judg. xviii. 21 only, though perhaps the word may bear a signification of "preciousness," which is sometimes attached to the root, and may allude to the newly acquired treasures of the Danites (LXX. Alex. *τὴν κτήνην τὴν ἐνδοξον*).

3. The word rendered "carriages" in Is. xlii. 1 should, it would appear (Ges. *Thes.* 917 b; *Jesaja*, ii. 101), be "your burdens."

4. In the N. T., Acts xxi. 15, "we took up our carriages" is the rendering of *ἐπισκευασμένοι*, and here also the meaning is simply "baggage" (Jer. *praeparati*).

5. But in the margin of 1 Sam. xvii. 20, and xxvi. 5, 7—and there only—"carriage" is employed in the sense of a wagon or cart; the "place of the carriage" answering to "trench" in the text. The Hebrew word is מַעְגָּל, from עָגְלָה, a wagon, and the allusion is to the circle of wagons which surrounded the encampment (Ges. *Thes.* 989).

For carriages in the modern sense, see CART; CHARIOT. [G.]

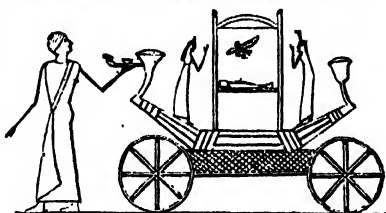

CARSHENA (כַּרְשֵׁנָא; LXX. omits; *Char-sena*), one of the seven princes (שֵׁנִים) of Persia and Media who "saw the king's face, and sat the first in the kingdom" of Ahasuerus (Est. i. 14). A similar name, *Carshen*, is found in modern Persian. For other derivations from the ancient dialects of Persia, see Gesenius, 717.

CART (עֲגָלָה; *ēmaḡa*; *plaustrum*; also rendered "wagon," Gen. xlv. 19, 27; Num. vii. 3, 7, 8; from עָגַל, *roll*, Ges. p. 989), a vehicle drawn by cattle (2 Sam. vi. 6), to be distinguished from the chariot drawn by horses. [CHARIOT.] Carts and wagons were either open or covered (Num. vii. 3), and were used for conveyance of persons (Gen. xlv. 19), burdens (1 Sam. vi. 7, 8), or produce (Am. ii. 13). As there are no roads in Syria and Palestine and the neighbouring countries, wheel-carriages for any purpose except conveyance of agricultural produce are all but unknown; and though modern usage has introduced European carriages drawn by horses into Egypt, they were unknown there also in times comparatively recent. (Stanley, *S. & P.* 135; Porter, *Damascus*, i. 339; Lynch, *Narrative*, 75, 84; Niebuhr, *Voyage*, i. 123; Layard, *Nin.* ii. 75; Mrs. Poole, *Englishwoman in Egypt*, 2nd series, 77.) The only cart used in Western Asia has two wheels of solid wood (Olearius, *Travels*, 418; Sir R. Porter, *Travels*, ii. 533). For the machine used for threshing in Egypt and Syria, see THRESHING. But in the monuments of ancient Egypt representations are found of carts

Egyptian cart with two wheels. (Wilkinson.)

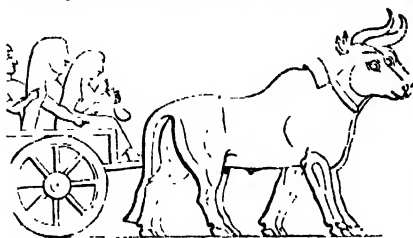

with two wheels, having four or six spokes, used for carrying produce, and of one used for religious purposes having four wheels with eight spokes. A

Egyptian cart with four wheels. (Wilkinson.)

bas-relief at Nineveh represents a cart having two wheels with eight spokes, drawn by oxen, conveying female captives; and others represent carts captured from enemies with captives, and also some used in carrying timber and other articles (Layard, *Nin.* ii. 396, *Nin. & Bab.* 134, 447, 583, *Mon. of Bab.* pt. ii. pls. 12, 17). Four-wheeled carriages

are said by Pliny (*N. H.* vii. 56) to have been invented by the Phrygians (Wilkinson, *Anc. Egypt. Abridgm.* i. 384, 385; ii. 39, 47). The carts

Aegyrian cart drawn by oxen (Layard, ii. 396)

used in India for conveying goods, called Suggur or Huckeri, have two wheels, in the former case of solid wood, in the latter with spokes. They are drawn by oxen harnessed to a pole (Capper, *India*, pp. 346, 352). [H. W. P.]

Modern Indian cart

**CARVING.** 1. **מַקְלָעַת**, *carved work in relief*, **מַקְלָע**, *carve*; in pl. **מַקְלָעוֹת**, *carved figures*. 2. **חֲרָטוֹת**, from **חָרַט**, *carve* = **χαράσσω**. 3. **מַטְקָה**, participle in Pual of **חָקַה** (not used) **חָקַק**, *cut, delineate: engraved, or carved (work)*, 1 K. vi. 35. 4. **פְּתוּחָה**, *carved work*, from **פָּתַח**, *open*, applied to wood, 1 K. vii. 36; to gems, Ex. xxviii. 9, 36; 2 Chr. ii. 6, 13; to stone, Zech. iii. 9; **γλυφά**, **γλύμμα**, **ἐγκολαπτόν**; *cutlature*.

The arts of carving and engraving were much in request in the construction both of the Tabernacle and the Temple (Ex. xxxi. 2, 5, xxxv. 33; 1 K. vi. 18, 35; Ps. lxxiv. 6), as well as in the ornamentation of the priestly dresses (Ex. xxviii. 9-36; Zech. iii. 9; 2 Chr. ii. 6, 14). In Solomon's time Huram the Phœnician had the chief care of this as of the larger architectural works. [H. W. P.]

**CASIPH'IA** (**קַסְיָפְיָה**; *ἐν ἀργυρίῳ τοῦ τόπου*; *Chapri*), a place of uncertain site on the road between Babylon and Jerusalem (Ezr. viii. 17). Neither the Caspiae Pylae nor the city *Kasuin*, with which some writers have attempted to identify it, are situated upon this route. (Gesen. *Thes.* 703.)

**CAS'LEU** (**Κασσαῖ**; *Casleu*), 1 Mac. i. 54; iv. 52, 59; 2 Mac. i. 9, 18; x. 5. [**CUSLEU**; **MONTHIS**.]

**CAS'LUIHIM** (**קַסְלִיחִים**; *Κασσαριῖται*; *Chasulim*), a Mizraite people or tribe (Gen. x. 14; 1 Chr. i. 12). In both passages in which this word occurs, it would appear, as the text now stands, as if the Philistines came forth from the Casulim, and not from the Caphtorim, as is elsewhere expressly stated: here therefore there would seem to be a transposition [**CAPHTOR**]. The only clue we have as yet to the position of the Casulim is their place in the list of the sons of Mizraim between the Pathrusim and the Caphtorim, whence it is probable that they were seated in Upper Egypt [**P'ATHROS**; **CAPHTOIR**]. The LXX. seem to identify them with the **קַסְלִיחִים** of Ps. lxxviii. 31 (A. V. "princes"), which some, though not the LXX. in that place, take to be a proper name, and compare with the native civil name of Hieropolis Magna. This would place the Casulim in the Heptanomis [**HASHIMANNIM**]. Bochart (*Phaleg*, iv. 31) suggests the identity of the Casulim and the Colchians, who are said to have been an Egyptian colony (Herod. ii. 104; Diod. Sic. i. 28), but this story and the similarity of name (Ges. *Thes.* s. v.) do not seem sufficient to render the supposition a probable one. Gesenius, however, gives it his support (*Thes.* i. c.). Forster conjectures the Casulim to be the inhabitants of Cassiotis, the tract in which is the slight elevation called Mount Casius (Epp. ad Michaelis, p. 16 sq.). Bunsen assumes this to be proved (*Bibelwerk*, p. 26). There is, however, a serious difficulty in the way of this supposition—the nature of the ground, a low littoral tract of rock, covered with shifting and even quick sand, like the neighbouring "Serbian bog," and which we cannot suppose ever to have supported much animal or vegetable life, far less a whole people or tribe. [R. S. P.]

**CASPION** (**Κασπών**; Alex. **Κασπώθ**), 1 Mac. v. 36. [**CASPIOR**.]

**CASPIOR** (**Κασπώρ**; *Cuspor*), one of the fortified cities in the "land of Galad" (1 Mac. v. 26), in which the Jews took refuge from the Ammonites under Timotheus (comp. ver. 6), and which with other cities was taken by Judas Maccabaeus (v. 36). In the latter passage the name is given as **CASPIOR**, and in 2 Mac. xii. 13 as **CASPIS**, if indeed the same place is referred to, which is not quite clear (see Ewald iv. 359 note). [G.]

**CASPIS** (**Κάσπις**; *Casphin*), a strong fortified city—whether east or west of Jordan is not plain—having near it a lake (**λίμνη**) two stadia in breadth. It was taken by Judas Maccabaeus with great slaughter (2 Mac. xii. 13, 16). The parallel history of the 1st Book of Maccabees mentions a city named **CASPIOR** or **CASPHON**, with which Caspis may be identical—but the narratives differ materially. [G.]

**CASSIA** (**קַסְיָה**, **קַסְיָהוֹת**; *κασία*; Gen. **קַסְיָה**, *κασία*; *cassia, stacte*). Cassia is mentioned in Ex. xxx. 24, among the ingredients of the holy oil of anointing; and in Ez. xxvii. 19, as one of the articles of merchandize in the markets of Tyre. In Is. xlv. 8, it is mentioned in connexion with myrrh and aloes as being used to scent garments with.

Cassia is the rind of an aromatic plant somewhat like cinnamon, but not of so fine and sweet a flavour. It is mentioned frequently by ancient writers. (Theophrast. *Hist. Pl.* ix. 5; Plin. xii. 19; Dioscor. i. 12.) Dioscorides mentions a kind of cassia called **καττώ**, a Syriac form of **קַסְיָה**. The root of **קַסְיָה**

is קָרַךְ, to cut or split. The name was given to this plant because of the splitting of its stalks. (Schleiss. *Les. V. T. κασάλα*.) The shrub is said to grow in India and Arabia. It is not the *Laurus cassia* of Malabar; for this is only a wild species of the *Cinnamom Ceylonicum*. קָצִיעוֹת, pl. of קָצִיעָה, is from the root קָצַץ, to abrade the bark, and would seem to be the same plant or bark as קָרַךְ; possibly some preparation of it in a form suitable for scenting garments. [W. D.]

### CASTLE. [FORTIFICATIONS.]

**CASTOR AND POLLUX**, the Dioscuri (Διοσκούροι, Acts xviii. 11). For the mythology of these two heroes, the twin-sons of Jupiter and Leda, we must refer to the *Dict. of Biog. and Mythol.* We have here to do with them only so far as they were connected with seafaring life. They were regarded as the tutelary divinities (Θεοὶ σωτῆρες) of sailors. They appeared in heaven as the constellation of *Gemini*. Immediately on ship-board they were recognised in the phosphoric lights, called by modern Italian sailors the fires of *St. Elmo*, which play about the masts and the sails ("In magna tempestate apparent quasi stellae velo insidentes: adjuvari se tunc periclitantes existimant Pollucis et Castoris numine," Senec. *Nat. Quaes.* i. 1; comp. *Plin.* ii. 37). Hence the frequent allusions of Roman poets to these divinities in connexion with navigation (see especially Hor. *Carm.* i. 3. 2, "fratres Helenae, lucida sidera," and iv. 8. 31). As the ship mentioned here by St. Luke was from Alexandria, it may be worth while to notice that Castor and Pollux were specially honoured in the neighbouring district of Cyrenaica (*Schol. Pind. Pyth.* v. 6). In Catull. iv. 27, we have distinct mention of a boat dedicated to them. See also *lxxviii. 65*. In art these divinities were sometimes represented simply as stars hovering over a ship, but more frequently as young men on horseback, with conical caps, and stars above them (see the coins of Rhegium, a city of Bruttii, at which St.

Silver coin of Bruttii. Obv.: Heads of Castor and Pollux to right. Rev.: i. Castor and Pollux mounted, advancing to right. In the exergue BPEITION.

Paul touched on the voyage in question, v. 13). Such figures were probably painted or sculptured at the bow of the ship (hence *παράσημον*; see *Dict. of Antiq.* art. *Insigne*). This custom was very frequent in ancient shipbuilding. Herodotus says (iii. 37) that the Phoenicians used to place the figures of deities at the bow of their vessels. Virgil (*Aen.* x. 209) and Ovid (*Trist.* i. 10, 2) supply us with illustrations of the practice; and Cyril of Alexandria (*Cramer's Catenae*, ad l. c.) says that such was always the Alexandrian method of ornamenting each side of the prow. [SHIP.] [J. S. H.]

**CAT** (αἰλῦρος; *catta*). This animal is mentioned only in Bar. vi. 22, as among those which defile the gods of the heathen with impunity. The

etymology of αἰλῦρος given by P'havorinus, παρὰ τὸ ἀλλεῖν τὴν οὐράν, i. e. from moving the tail, agrees with the habit of the cat. Martial (xiii. 69) says—

"Pannonicas nobis nunquam dedit Umbria cattas;"

this being the only mention of *catta* in classical writers. Bochart thinks that by the word צִיִּים, in Is. xiii. 21, xxxiv. 14, Jer. l. 39, and Ps. lxxiv. 14, some species of cats are meant; but this is very doubtful. [W. D.]

### CATERPILLAR. [LOCUST.]

**CATHUA** (Καθούα; *Canna*), 1 Esd. v. 30. Apparently answers to GIDDEL in Hebrew text.

**CAVE** (קֶוֶר; סֶחָלֶיִם; *spelunca*; in A. V. Is. ii. 19, *hole*; Jer. vii. 11, *den*; Josh. xiii. 4, *literatim*, *Meurah*; *Maura*, Vulg.). I. The chalky lime-stone of which the rocks of Syria and Palestine chiefly consist presents, as is the case in all limestone formations, a vast number of caverns and natural fissures, many of which have also been artificially enlarged and adapted to various purposes both of shelter and defence. (Page, *Text-Book of Geology*, p. 141; Kitzo, *Phys. Geogr. of Pal.* p. 72.) This circumstance has also given occasion to the use of so large a number of words as are employed in the Scriptures to denote caves, holes, and fissures, some of them giving names to the towns and places and their neighbourhood. Out of them, besides No. 1., may be selected the following:—

II. קוֹר or קוֹרָה (Ges. p. 458), a *hole*; usually *τρώγλη*, and *caverna*. From this come (a), קוֹרֵי, *dweller in caves*, the name of the Horites of Mount Seir, *Wady Ghwyer*, expelled by the Edomites, probably alluded to by Job, a Tioglodyte race spoken of by Strabo. (Gen. xiv. 6, xxxvi. 21; Deut. ii. 12; Job xxx. 6; Strab. i. 42, xvi. 775-776; Burckhardt, *Syria*, 410; Robinson, ii. 69, 157; Stanley, *S. & P.* §§68-71.) [HORITES.] (b) קוֹרָה, *land of caverns* (Ez. xlvii. 16, 18; Burckhardt, *Syria*, 110, 286); *Αβανίτις*, LXX.; *Auran*, Vulg. [HAUKAN.] (c) בֵּית־חֹרֶן, *house of caverns*, the two towns of Beth-horon (Josh. xvi. 3, 5). [BETH-HORON.] (d) חֹרְנִים, *two caverns*, the town Horonaim (Is. xv. 5). [HORONAIM.]

III. חֲתָיִים, *places of refuge in rocks* (Ges. 445) for birds, Cant. ii. 14; *σκέπη*; *foramina petrae*, Obad. 3; *δωλ*; *scissurae petrarum*; A. V. *clefts*.

IV. סֶחָלֶיִם; *τρύμαλα*; *antrum*; A. V. *den*; a ravine through which water flows (Ges. 858), Judg. vi. 2.

The caves of Syria and Palestine are still used, either occasionally or permanently, as habitations; as at *Anab*, near *Szalt*, Ramoth-Gilead (Buckingham, *Travels in Syria*, 62). The shepherds near Hebron leave their villages in the summer to dwell in caves and ruins, in order to be nearer to their flocks and fields (Robinson, i. 212). Almost all the habitations at *Om-kais*, Gadara, are caves (Burckhardt, p. 273). An extensive system of caves exists at *Beit Jibrin*, Eleutheropolis, in Judah, which has served for residence or concealment, though now disused (Robinson, ii. 53); and another between Bethlehem and Hebron (Irby and Mangles, 103).

The most remarkable caves noticed in Scripture

are:—1. That in which Lot dwelt after the destruction of Sodom (Gen. xix. 30). 2. The cave of Machpelah (xxiii. 17). 3. Cave of Makkedah (Josh. x. 16). 4. Cave of Adullam (1 Sam. xxii. 1). 5. Cave of Engedi (xxiv. 3). 6. Obadiah's cave (1 K. xviii. 4). 7. Elijah's cave in Horeb (xix. 9). 8, 9. The rock sepulchres of Lazarus, and of our Lord (John xi. 38; Matt. xxvii. 60). Some of these may be identified, and to others approximate, if not absolutely identical, sites may be assigned. Thus the existing caverns near the S.E. end of the Dead Sea serve fully to justify the mention of a cave as the place of Lot's retirement; as those on the W. side agree both in situation and in name with the caves of Engedi (Lynch, *Narrative*, 234; Robinson, i. 500; Stanley, 296). The cave of Machpelah undoubtedly lies beneath the mosque at Hebron (Robinson, ii. 79; Stanley, 149; Benj. of Tudela, *Early Trav.* 86). The cave of Makkedah can hardly be the one to which tradition has assigned the name (Irby and Mangles, p. 93); for though it is not necessary to suppose that the cave was close to the town of Makkedah, yet the situation of the great caverns both at *Beit Jibrin* and at *Deir Dubbân* in neither case agrees with that of Makkedah as given by Eusebius, eight miles from Eleutheropolis (Reland, 885; Robinson, ii. 23, 53; Stanley, 211). The site assigned by the same ancient authority to Adullam, 10 m. E. of Eleutheropolis, agrees as little with that of the cave believed by tradition to have been David's hiding-place, viz. in the *Wady Khireitân* at the S.E. of Bethlehem, which in some respects agrees with the Scripture narrative better than the neighbourhood of *Deir Dubbân*, assigned to it by Mr. Stanley. (See 1 Sam. xx. 6, and particularly xxii. 3, 4; Joseph. *Ant.* vi. 12, §3; Reland, 549; Irby and Mangles, 103; Robinson, i. 482; Stanley, 259.)

The cave in which Obadiah concealed the prophets cannot now be identified, but it was probably in the northern part of the country, in which abundant instances of caves fit for such a purpose might be pointed out.

The sites of the cave of Elijah, as well as of the "cleft" of Moses on Mount Horeb (Ex. xxxiii. 22), are also obviously indeterminate; for though tradition has not only assigned a place for the former on Jebel Mûsa, and consecrated the spot by a chapel, there are caves on the competing summit of Serbâl, to one or other of which it might with equal probability be transferred. (Stanley, 49; Robinson, i. 103; Burckhardt, 608.)

Besides these special caves there is frequent mention in O. T. of caves as places of refuge. Thus the Israelites are said to have taken refuge from the Philistines in "holes" (1 Sam. xiv. 11): to which the name of the scene of Jonathan's conflict, *Mûhmas* (Michmas), sufficiently answers. (Stanley, 204; Rob. i. 440; Irby, 89.) So also in the time of Gideon they had taken refuge from the Midianites in dens and caves and strongholds, such as abound in the mountain region of Manasseh. (Judges vi. 2; Stanley, 341.)

Not only have the caves of Palestine afforded refuge from enemies, but during the earthquakes also, by which the country has been so often visited, the inhabitants have found in them a safe retreat. This was the case in the great convulsion of 1837, when *Safet* was destroyed; and to this mode of retreat the prophet Isaiah probably alludes (Is. ii. 10, 19, 21; Robinson, ii. 422; Stanley, 151).

But Adullam is not the only cave, nor were its

tenants the only instances of banditti making the caves of Palestine their accustomed haunt. Josephus (*Ant.* xiv. 15, §5) relates the manner in which, by order of Herod, a cave occupied by robbers, or rather insurgents, was attacked by soldiers let down from above in chests and baskets, from which they dragged forth the inmates with hooks, and killed or thrust them down the precipices; or, setting fire to their stores of fuel, destroyed them by suffocation. These caves are said to have been in Galilee, not far from Sepphoris; and are probably the same as those which Josephus himself, in providing for the defence of Galilee, fortified near Grennesuret, which elsewhere he calls the caves of Arbela (*B. J.* i. 16, §2-4, ii. 20, §6; *Vit.* §37). Bacchides, the general of Demetrius, in his expedition against Judæa, encamped at Messaloth, near Arbela, and reduced to submission the occupants of the caves (*Ant.* xii. 11, §1; 1 Mac. ix. 2). Messaloth is probably מִסְלֹת, *steps*, or *terraces* (comp. 2 Chr. ix. 11; Ges. 957.) The Messaloth of the book of Maccabees and the robber-caves of Arbela are thus probably identical, and are the same as the fortified cavern near *Madjdel* (Magdala), called *Kalaat Ibn Maam*, or Pigeon's Castle, mentioned by several travellers. They are said by Burckhardt to be capable of containing 600 men. (Reland, 358, 575; Burckhardt, *Syria*, 331; Irby and Mangles, 91; Lightfoot, *Cent. Chorus*. ii. 231; Robinson, ii. 398; Raumer, 108: comp. also Hos. x. 14.) [BETH-ARBEL.]

Josephus also speaks of the robber inhabitants of Trachonitis, who lived in large caverns, presenting no prominence above ground, but widely extended below (*Ant.* xv. 10, §1). These banditti annoyed much the trade with Damascus, but were put down by Herod. Strabo alludes very distinctly to this in his description of Trachonitis, and describes one of the caverns as capable of holding 4000 men (Strabo, xvi. 756; Raumer, 68; Jolliffe, *Travels in Pal.* i. 197).

Lastly, it was the caves which lie beneath and around so many of the Jewish cities that formed the last hiding-places of the Jewish leaders in the war with the Romans. Josephus himself relates the story of his own concealment in the caves of Jotapata; and after the capture of Jerusalem, John of Gischala, Simon, and many other Jews, endeavoured to conceal themselves in the caverns beneath the city; whilst in some of them great spoil and vast numbers of dead bodies were found of those who had perished during the siege by hunger or from wounds (Joseph. *B. J.* iii. 8, §1, vi. 9, §4).

The rock dwellings and temples of Petra are described in a separate article.

Natural cavities in the rock were and are frequently used as cisterns for water, and as places of imprisonment (Is. xxiv. 22; Ez. xxii. 28; Zech. ix. 11) [CISTERN; PRISON]; also as stalls for horses and for granaries (Irby and Mangles, 146). No use, however, of rock caverns more strikingly connects the modern usages of Palestine and the adjacent regions with their ancient history than the employment of them as burial-places. The rocky soil of so large a portion of the Holy Land almost forbids interment, excepting in cavities either natural or hewn from the rock. The dwelling of the demoniac among the tombs is thus explained by the rock caverns abounding near the Sea of Galilee (Jolliffe, i. 36). Accordingly numerous sites are shown in Palestine and adjacent lands of (so-called) sepulchres of saints and heroes of Old and New Test., venerated

both by Christians and Mohammedans (*Early Travels*, p. 36; Stanley, 148). Among these may be mentioned the cave of Machpelah, the tomb of Aaron on Mount Hor, of Joseph, and of Rachel, as those for which every probability of identity in site at least may be claimed (Irby and Mangles, 134; Robinson, i. 218, 219, ii. 275-287). More questionable are the sites of the tombs of Elisha, Obadiah, and John the Baptist, at Samaria; of Habakkuk at *Jebâtha* (Gabaatha), Micah near *Keila*, and of Deborah, Rebekah's nurse, at Bethel (Stanley, 143, 149; Ireland, 772, 698, 981; Rob. ii. 304). The questions so much debated relating to the tombs in and near Jerusalem and Bethany will be found treated under those heads. But whatever value may belong to the connexion of the names of Judges, Kings, or Prophets, with the very remarkable rock-tombs near Jerusalem, there can be no doubt that the caves bearing these names are sepulchral caverns enlarged and embellished by art. The sides of the valley of Jehoshaphat are studded with caves, many of which are inhabited by Arab families. (Sandys, 188; Maundrell, 446; Robinson, i. 241, 349, 364; Bartlett, *Walks about Jerusalem*, 117.) It is no doubt the vast number of caves throughout the country, together with, perhaps, as Maundrell remarks, the taste for hermit life which prevailed in the 5th and 6th centuries of the Christian era, which has placed the sites of so many important events in caves and grottoes; e. g. the birth of the Virgin, the Annunciation, the Salutation, the birth of the Baptist and of our Lord, the scene of the Agony, of St. Peter's denial, the composition of the Apostles' Creed, the Transfiguration (Shaw, pt. ii. c. 1; Maundrell, *E. T.* p. 479): and the like causes have created a traditionary cave-site for the altar of Elijah on Mount Carmel, and peopled its sides, as well as those of Mount Tabor, with hermit inhabitants. (1 K. xviii. 19; Irby and Mangles, 60; Ireland, 329; Winer, s. v. *Carmel*; Am. ix. 3; Sir J. Maundeville, *Travels*, 31; Sandys, 203; Maundrell, *E. T.* 478; Jahn, *Arch. Bibl.* 9; Stanley, 353; Kitto, *Phys. Geogr.* 30, 31; Van Egmont, *Travels*, ii. 5-7.) [H. W. P.]

**CEDAR** (עֵץ; ἄλδος; *cedrus*; from עָצָה, root of עָצָה, *coiled or compressed*, Gesen. p. 148). The term is expressive of a mighty and deeply rooted tree, and is usually understood to apply here to one of the coniferous kind, but not always to that which is commonly known as the Cedar of Lebanon.

The conditions to be fulfilled in order to answer all the descriptions in the Bible of a cedar-tree are that it should be tall (Is. ii. 13), spreading (Ez. xxxi. 3), abundant (1 K. v. 8, 10), fit for beams, pillars, and boards (1 K. vi. 10, 15, vii. 2), masts of ships (Ez. xxvii. 5), and for carved work as images (Is. xlv. 14). To these may be added qualities ascribed to cedar wood by profane writers. Pliny speaks of the cedar of Crete, Africa, and Syria as being most esteemed and imperishable. The same quality is ascribed also to juniper. In Egypt and Syria ships were built of cedar, and in Cyprus a tree was cut down 120 feet long and proportionately thick. The durability of cedar was proved, he says, by the duration of the cedar roof of the temple of Diana at Ephesus which had lasted 400 years. At Utica the beams, made of Numidian cedar, of a temple of Apollo had lasted 1178 years! Vitruvius speaks of the antiseptic properties of the oil of cedar and also of juniper (Plin. H. N. xiii.

5, xvi. 40; Vitruv. ii. 9; Joseph. *Ant.* viii. 5, 2; Sandys, *Travels*, 166, 167).

Not only was cedar timber used by David and Solomon in their buildings (2 Sam. v. 11; 1 K. v. 6, vi. 15, vii. 2), but also in the 2nd Temple rebuilt under Zerubbabel, the timber employed was cedar from Lebanon (Ezr. iii. 7; 1 Esdr. iv. 48, v. 55). Cedar is also said by Josephus to have been used by Herod in the roof of his temple (*E. J.* v. 59 §2). The roof of the Rotunda of the Church of the Holy Sepulchre at Jerusalem is said to have been of cedar, and that of the Church of the Virgin at Bethlehem to have been of cedar or cypress. (Williams, *Holy City*, ii. 202; Quaresmius, *Eluc. Terr. Sanct.* vi. 12; Per. 2; Tobler, *Bethlehem*, 110, 112.)

Now in some important respects no tree but the cedar (*pinus cedrus*), or its almost equivalent, the *pinus Deodara*,<sup>a</sup> can answer the above conditions. The characteristics of these two trees, of which great numbers are found from Mount Taurus to the Himalayas, are so often interchanged that they are scarcely to be distinguished the one from the other. No tree is at once so lofty, spreading, and umbrageous, and the wood of the *Deodara* at least is extremely durable. The difficulties which are found in reconciling the ancient descriptions with the modern specimens of cedar wood lie, 1. in the fitness of cedar trees for masts of ships (Ez. xxvii. 5); 2. still more in the very general agreement as to the inferior quality of the timber which is usually described as less valuable than the worst sorts of deal. Of authorities quoted by Dr. Royle in his article on the subject in Dr. Kitto's *Cyclopaedia* (art. *Trees*), two only ascribe serviceable qualities to the cedar wood whether grown in England or in specimens brought from the ancient cedar grove on Mount Lebanon. Accordingly, Celsius in his *Hierobotanicon*, has endeavoured to prove that by the cedar of Scripture is meant the *pinus sylvestris* or Scotch fir, and that by "fir" is intended the cypress. Others have supposed that the *Sandarac* tree, the citrus of Pliny, *Calitris quadrivalvis*, or *Thuja articulata*, represents the cedar. The timber of this tree is extremely hard and durable; the roof of the mosque of Cordova, built in the 9th century, is constructed of it, which was formerly supposed from the Spanish name *alerce* to have been made of larch (Cook, *Sketches in Spain*, p. 5, and note; Fergusson, *Handb. of Arch.* i. 456). Besides these trees, the Cephalonian pine, the common yew, *taxus baccata*, and the juniper cedar, *cedrus baccifera*, or *oxycedrus*, each of them possesses qualities which answer to some at least of those ascribed to the cedar. The opinion of Celsius is founded in great measure on the use by the Arabs and Arabic writers of the word عَرَس, *arz*, evidently the equivalent of עָצָה, *eres*, to express the cedar of Lebanon, and also at Aleppo the *pinus sylvestris*, which is abundant both near that city and on Lebanon. A similar argument will apply also to the *Thuja articulata* of Mount Atlas, which is called by the Arabs *el-arz*, a name which led to the mistake as to the material of the Cordova roof from its similarity to the Spanish *alerce* (Niebuhr, *Descr. de l'Arabie*, 131, &c., and *Questions*, xc. 169, &c.; Pliny,

<sup>a</sup> The difference between the Lebanon cedar and the *Deodara* consists chiefly in the cones, which in the latter grow in pairs, and upon stalks; the leaves also are longer and more distinctly 3-sided. The wood of both is extremely resinous.

*H. N.*, xiii. 11, 15; Kitto, *Eres, Thnja*; Hay, *West. Barb.* c. iv. 49; Gesen. 148, who rejects the opinion of Celsius; Winer, s. v.).

It may be observed, 1. that unsuccessful experiments on English-grown cedar, or on wood derived from the trees of the ancient cedar grove of Lebanon, do not as yet invalidate all claim of the cedar, whether Lebanon or Deodara cedar, to share in the qualities anciently ascribed to it. Besides the trees which belong to the one grove, known by the name of "the 'cedars,'" groves and green woods of cedar are found in other parts of the range (Buckingham, *Travels among Arabs*, p. 468; *Eng. Cycl.* s. v. *Syria*; Robinson, iii. 593; Burckhardt, *Syria*, p. 19; London, *Arboretum*, vol. iv. pp. 2406, 2407; Celsius, *Hierobotanicon*, i. 89; Belon, *Obs. de Arboresc. confertif.*, ii. pp. 162, 165, 166). 2. That it has been already shown that the Deodara cedar certainly possesses in a remarkable degree the property of durability, said to be wanting in the Lebanon cedar. But 3. The remains of wood used in the Ninveh palaces were supposed by Layard to be cedar, a supposition confirmed by the inscriptions, which show that the Assyrian kings imported cedar from Lebanon. This wood is now proved by microscopic examination to be yew (Layard, *N. and B.* pp. 356, 357; London, *n. s.* p. 2431).

In speaking therefore of cedar of Lebanon used in building for beams, pillars, or ceiling boards, it is probable that the wood of more than one tree was employed, but under the one name of cedar, and that the trees which furnished the material were besides the *pinus cedrus*, the *cedrus Deodara*, the *Law*, *taxus baccata*, and also the Scotch pine (*pinus sylvestris*). The Sandarac tree (*Thnja articulata*) is said by Van Egmont (*Travels*, ii. 280) to have been found on Lebanon, but no hint of importation of foreign timber is anywhere given in Scripture, or by Josephus, whilst each of the above-named trees grows there in greater or less abundance. The *pinus sylvestris* may have furnished the material of the ship-masts mentioned by Ezekiel; and it may be added, that the LXX. render "masts" in that passage by *ιστοὺς ἐλατίνους*, *nude of fir*, or *like fir*.

But there is another use of cedar wood mentioned in Scripture, viz. in purification (Lev. xiv. 4; Num. xix. 6). The term cedar is applied by Pliny to the lesser cedar, *oxycedrus*, a Phœnician juniper, which is still common on the Lebanon, and whose wood is aromatic. The wood or fruit of this tree was anciently burnt by way of perfume, especially at funerals (Plin. *H. N.* xiii. 1, 5; Or. *Fest.* ii. 558; Hom. *Od.* v. 60). The tree is common in Egypt and Nubia, and also in Arabia, in the Wady Mousa, where the greater cedar is not found. It is obviously likely that the use of the more common tree should be enjoined while the people were still in the wilderness, rather than of the uncommon (Shaw, *Travels*, 464; Burckhardt, *Syria*, 430; Russell, *Nubia*, 425).

The grove of trees known as the Cedars of Lebanon consists of about 400 trees, standing quite alone in a depression of the mountain with no trees near, about 6400 feet above the sea, and 3000 below the summit. About 11 or 12 are very large and old, 25 large, 50 of middle size, and more than 300 younger and smaller ones. The older trees have each several trunks and spread themselves widely round, but most of the others are of cone-like form and do not send out wide lateral branches. In 1550 there were 28 old trees, in 1739 Pococke counted 15, but the number of trunks makes the

operation of counting uncertain. They are regarded with much reverence by the native inhabitants as living records of Solomon's power, and the Maronite patriarch was formerly accustomed to celebrate there the festival of the Transfiguration at an altar of rough stones. Within the last 10 years a chapel has been erected (Robinson, iii. 590, 591; Stanley, *S. & P.* p. 140). [H. W. P.]

**CEDRON**, 1. (ἡ Κεδρὼν; Alex. Κεδρώ; *Gedor*), a place fortified by Cenebæus under the orders of king Antiochus (Sidetes), as a station from which to command the roads of Judæa (1 Macc. xv. 39, 41, xvi. 9). It was not far from Jamnia (Jabne), or from Azotus (Ashdod), and had a winter-torrent or wady (χειμάρρους), on the eastward of it, which the army of the Maccabees had to cross before Cenebæus could be attacked (xvi. 5). These conditions are well fulfilled in the modern place *Katra* or *Kâtrah*, which lies on the maritime plain below the river *Rubin*, and three miles south-west of *Akir* (Ekron). Schwarz (119) gives the modern name as *Kudrân*—but this wants confirmation. Ewald (*Gesch.* iv. 390, note) suggests *Tell-Turnus*, five or six miles further south.

2. In this form is given in the N. T. the name of the brook Kidron (כִּדְרֹן נַחַל = "the black torrent") in the ravine below the eastern wall of Jerusalem (John xviii. 1, only). Beyond it was the garden of Gethsemane. Lachmann, with A D, has *χειμάρρους τοῦ Κεδρὼν*; but the Rec. Text with B has *τῶν Κεδρων*, i. e. "the brook of the cedars" (so too the LXX. in 2 Sam. xv. 23). Other MSS. have the name even so far corrupted as *τοῦ κεδροῦ, cedri*, and *τῶν δένδρων*. In English the name is often erroneously read (like Cephas, Cenchreæ, Chuza, &c.) with a soft C; but it is unnecessary to point out that it has no connexion with "Cedar." [KIDRON.] [G.]

**CEIL'AN** (Κεῖλαν; *Cuso*), sons of Ceilan and Azetas, according to 1 Esd. v. 15, returned with Zorobabel from Babylon. There are no names corresponding to these in the lists of Ezra or Nehemiah.

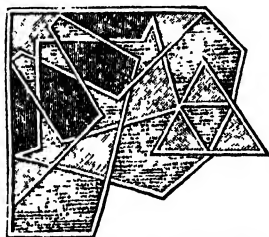

**CEILING** (ἱστῶς, from ἵσθμι; ἐκκοιστδόμησις, 1 K. vi. 9; to cover with rafters, Gesen. 965; Schleusner, *Lec. V. T. κοισστ.*, or ἡ ἱστῶς (Ez. xli. 16), a plank. The descriptions of Scripture (1 K. vi. 9, 15, vii. 3; 2 Chr. iii. 5, 9; Jer. xxii. 14; Hag. i. 4), and of Josephus (*Ant.* viii. 3, §2—9, xv. 11, §5), show that the ceilings of the Temple and the palaces of the Jewish kings were formed of cedar planks applied to the beams or joints crossing from wall to wall, probably with sunk panels (*φανώματα*), edged and ornamented with gold, and carved with incised or other patterns (*βαθυτέλοις γλυφαῖς*, sometimes painted (Jer. xxii. 14).

It is probable that both Egyptian and Assyrian models were in this as in other branches of architectural construction, followed before the Roman period. [ARCHITECTURE.] The construction and designs of Assyrian ceilings in the more important buildings can only be conjectured (Layard, *Ninveh*, ii. 265, 289), but the proportions in the walls themselves answer in a great degree to those mentioned in Scripture (*Nin. and Bab.* 642; Ferguson, *Handbook of Architecture*, i. 201). Examples, however, are extant, of Egyptian ceilings in stucco painted with devices, of a date much earlier than that of Solomon's Temple. Of these

devices the principal are the guilloche, the chevron, and the scroll. Some are painted in blue with stars, and others bear representations of birds and other emblems (Wilkinson, *Anc. Egypt.* ii. 290). The excessive use of vermilion and other glaring colours in Roman house-painting, of which Vitruvius at a later date complains (vii. 5), may have been introduced from Egypt, whence also came in all probability the taste for vermilion painting shown in Jehoiakim's palace (Jer. xxii. 14; Am. iii. 15; Wilkinson, i. 19). See also the descriptions given by Athenæus (v. 196) of the tent of Ptolemy Philadelphus, and the ship of Philopator (ib. 206), and of the so called sepulchres of the kings of Syria near Tyre, Hasselquist, 165.

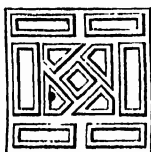

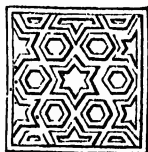

The panel work in ceilings, which has been described, is found in Oriental and North African dwellings of late and modern times. Shaw describes the ceilings of Moorish houses in Barbary as of wainscot, either "very artfully painted, or else thrown into a variety of panels, with gilded mouldings and scrolls of the Koran intermixed" (*Travels*,

Blue   
Green   
Red 

Paneled ceiling from house in Cairo. (Lane, *Modern Egyptians*.)

p. 208). Mr. Porter describes the ceilings of houses at Damascus as delicately painted, and in the more ancient houses with "arabesques encompassing panels of blue, on which are inscribed verses and chapters of the Koran in Arabic. Also a tomb at Palmyra, with a stone ceiling beautifully paneled and painted (*Damascus*, i. 34, 37, 57, 60, 232; cf. Deut. vi. 9; also Lane's *Mod. Egypt.* i. 37, 38). Many of the rooms in the Palace of the Moors at the Alhambra were ceiled and ornamented with the richest geometrical patterns. These still remain, and restorations of them may be seen at the Alhambra Court of the Crystal Palace. The ancient Egyptians used coloured tiles in their build-

Paneled ceiling from house in Cairo. (Lane, *Modern Egyptians*.)

ings (Athen. v. 206; Wilkinson, ii. 287). The like taste is observed by Chardin to have prevailed in

Persia, and he mentions beautiful specimens of mosaic, arabesque, and inlaid wood-work in ceilings at Isfahán, at Koom in the mosque of Fatma, and at Ardevil. These ceilings were constructed on the ground and hoisted to their position by machinery (Chardin, *Voyage*, ii. 434, iv. 126, vii. 387, viii. 40, plate 39; Olearius, p. 241). [H. W. P.]

## CELOSRYIA. [CORLESRYIA.]

**CEN'CHREA** (accurately **CENCHIREAE**, *Κενχρεαί*), the eastern harbour of Corinth (i. e. its harbour on the Saronic Gulf) and the emporium of its trade with the Asiatic shores of the Mediterranean, as Lechaëum (*Λευκαίη*) on the Corinthian Gulf connected it with Italy and the west. A line of walls extended from the citadel of Corinth to Lechaëum, and thus the pass of Cenchreæ was of peculiar military importance in reference to the approach along the Isthmus from Northern Greece to the Moera. [CORINTH.]

St. Paul sailed from Cenchreæ (Acts xviii. 18) on his return to Syria from his second missionary journey; and when he wrote his epistle to the Romans in the course of the third journey, an organised church seems to have been formed here (Rom. xvi. 1. See PHOEBE). The first bishop of this church is said (*Apost. Const.* vii. 46) to have been named Lucius, and to have been appointed by St. Paul.

The distance of Cenchreæ from Corinth was 70 stadia or about nine miles. Pausanias (ii. 3) describes the road as having tombs and a grove of cypresses by the wayside. The modern village of *Kikries* retains the ancient name, which is conjectured by Dr. Sibthorpe to be derived from the millet (*κένγκρι*), which still grows there (Walpole's *Travels*, p. 41). Some traces of the moles of the port are still visible (see Leake's *Moræa*, iii. pp. 233-235). The following coin exhibits the port exactly as it is described by Pausanias, with a temple at the extremity of each mole, and a statue of Neptune on a rock between them. [J. S. H.]

Corinthian Coin of Corinth. On the obverse the head of Antonine; on the reverse the port of Cenchreæ, with a temple at the extremity of each mole, and a statue of Neptune on a rock between them.

**CENDEBE'US** (accurately **CENDEBAEUS**, *Κενδεβαίος*), a general left by Antiochus VII. in command of the sea-board of Palestine (1 Macc. xv. 38 ff.) after the defeat of Tryphon B.C. 138. He fortified Kedron and harassed the Jews for some time, but was afterwards defeated by Judas and John, the sons of Simon Maccabæus, with great loss (1 Macc. xvi. 1-10). [ANTIOCHUS VII.] [B. F. W.]

**CENSER** מְחַטֵּה; מְחַטֵּה; in LXX. mostly *μυστήριον*, but also *ὕλη* and *θυμιαστήριον*; *thuribulum*. The former of the Hebrew words (from *חָמַת*, to seize or lay hold of, especially of fire) seems used generally for any instrument to seize or hold burning coals, or to receive ashes, &c., such as

the appendages of the brazen altar and golden candlestick mentioned in Ex. xxv. 38, xxxvii. 23, in which senses it seems rendered by the LXX. by *θυσιαστήριον*, *θυσιαστήριον*, or perhaps *θυσιαστήριον*. It, however, generally bears the limited meaning which properly belongs to the second word, found only in the later books (e. g. 2 Chr. xvi. 19; Ez. viii. 11), (der. *תבואה*, incense), that, viz. of a small portable vessel of metal fitted to receive burning coals from the altar, and on which the incense for burning was sprinkled by the priest to whose office this exclusively belonged, who bore it in his hand, and with whose personal share in the most solemn ritual duties it was thus in close and vivid connexion (2 Chr. xxvi. 18; Luke i. 9). Thus "Korah and his company" were bidden to take "censers," with which in emulation of Aaron and his sons they had perhaps provided themselves\* (comp. Ez. viii. 11); and Moses tells Aaron to take "the censer" (not *a* as in A. V.), i. e. that of the sanctuary, or that of the High-priest, to stay the plague by atonement. The only distinct precepts regarding the use of the censer are found in Num. iv. 14, where among the vessels of the golden altar, i. e. of incense, "censers" are reckoned; and in Lev. xvi. 12, where we find that the High-priest was to carry it (here also it is "the" not "a censer" that he is ordered to "take") into the most holy place within the veil, where the "incense" was to be "put on the fire," i. e. on the coals in the censer, "before the Lord." This must have been on the Day of Atonement, for then only was that place entered. Solomon prepared "censers of pure gold" as part of the same furniture (1 K. vii. 50; 2 Chr. iv. 22). Possibly their general use may be explained by the imagery of Rev. viii. 3, 4,<sup>b</sup> and may have been to take up coals from the brazen altar, and convey the incense while burning to the "golden altar," or "altar of incense," on which it was to be offered morning and evening (Ex. xxx. 7, 8). So Uziah, when he was intending "to burn incense upon the altar of incense," took "a censer in his hand" (2 Chr. xxvi. 16, 19). The Mishna (Joma, iv. 4) mentions a silver censer which had a handle, and was fetched from some chamber where such utensils were kept (ib. v. 1, and Barthenora's comment); and was used to gather the coals from the altar, which were then transferred to a golden censer. On the great Day of Atonement, however, a golden one of finer standard (Tarnir, v. 5) was used throughout. The word *θυσιαστήριον* rendered "censer" in Hebr. ix. 4 probably means the "altar of incense."<sup>c</sup> [ALTAR.] (In Ugolini, vol. xi. a copious collection of authorities on the subject will be found; Sonneschmid *de Thym. Sanct.* is referred to by Winer, s. v. *Rauchfass.*) [H. H.]

**CENSUS** (*מפקדון*, or *מפקד*, *numbering combined with lustration*, from *מפקד*, *survey in order to purge*, Gesen. 1120; LXX., *ἀριθμός*; N. T.,

*ἀπογραφὴ*; *dimuneratio, descriptio*). I. Moses laid down the law (Ex. xxx. 12, 13) that whenever the people were numbered, an offering of  $\frac{1}{2}$  a shekel should be made by every man above 20 years of age, by way of atonement or propitiation. A previous law had also ordered that the firstborn of man and of beast should be set apart, as well as the first fruits of agricultural produce; the first to be redeemed, and the rest with one exception offered to God (Ex. xiii. 12, 13, xxii. 29). The idea of lustration in connexion with numbering predominated also in the Roman census (*Dict. of Antiq. LUSTRUM*), and among Mohammedan nations at the present day a prejudice exists against numbering their possessions, especially the fruits of the field (Hay, *Western Barbary*, p. 15; Crichton, *Arabia*, ii. 180; see also Lane, *Mod. Egypt*, ii. 72, 73). The instances of numbering recorded in the O. T. are as follows:—

1. Under the express direction of God (Ex. xxxviii. 26), in the 3rd or 4th month after the Exodus during the encampment at Sinai, chiefly for the purpose of raising money for the Tabernacle. The numbers then taken amounted to 603,550 men, which may be presumed to express with greater precision the round numbers of 600,000 who are said to have left Egypt at first (Ex. xii. 37).

2. Again, in the 2nd month of the 2nd year after the Exodus (Num. i. 2, 3). This census was taken for a double purpose (a.) to ascertain the number of fighting men from the age of 20 to 50 (Joseph. *Ant.* iii. 12, §4). The total number on this occasion, exclusive of the Levites, amounted at this time also to 603,550 (Num. ii. 32). Josephus says 603,650; each tribe was numbered, and placed under a special leader, the head of the tribe. (b.) To ascertain the amount of the redemption offering due on account of all the firstborn both of persons and cattle. Accordingly the numbers were taken of all the firstborn male persons of the whole nation above one month old, including all of the tribe of Levi of the same age. The Levites, whose numbers amounted to 22,000, were taken in lieu of the firstborn males of the rest of Israel, whose numbers were 22,273, and for the surplus of 273 a money payment of 1365 shekels, or 5 shekels each, was made to Aaron and his sons (Num. iii. 39, 51). If the numbers in our present copies, from which those given by Josephus do not materially differ, be correct, it seems likely that these two numberings were in fact one, but applied to different purposes. We can hardly otherwise account for the identity of numbers even within the few months of interval (Culmet on Num. i. *Pictorial Bible*, *ibid.*). It may be remarked that the system of appointing head men in each tribe as leaders, as well as the care taken in preserving the pedigrees of the families corresponds with the practice of the Arab tribes at the present day (Crichton, *Arabia*, ii. 185, 186; Niebuhr, *Descr. de l'Arabie*, 14; Buckingham, *Arab Tribes*, 88;

\* Gesenius s. v. *מפקדון* seems to prefer the general meaning of "fire-shovel" in this passage; but, from Num. xvi. 17, it was probably the same fashion of thing as that used by Aaron in the priestly function. Nor, as the rebellion was evidently a deliberately concerted movement, is there any difficulty in supposing the amount of preparation suggested in the text.

<sup>b</sup> The word for censer here is *λαβανον*, from the *λαβαν* of Matt. ii. 11; in Rev. v. 8, *φιάλας* is used apparently to mean the same vessel.

<sup>c</sup> This word undeniably bears this sense in Joseph. *Ant.* iii. 8, 3, who gives it similarly the epithet *χρυσόν*; as also in Philo. *de vit. Mos.* p. 668, ed. Paris. It thus becomes = *θυσιαστήριον θυμιάματος*, the expression for the same thing in LXX., Ex. xxx. 1, but its simpler meaning is merely that of an "instrument for the *θυμίαμα* (incense)," and thus, either censer, or incense altar. See also 1 Mac. i. 21, 22.

Jahn, *Hist.* Book ii. 8, 11; Malcolm, *Sketches of Persia*, xiv. 157, 159).

3. Another numbering took place 38 years afterwards, previous to the entrance into Canaan, when the total number, excepting the Levites, amounted to 601,730 males, showing a decrease of 1870. All tribes presented an increase except the following, Reuben, of 2770; Simeon, 37,100; Gad, 5150; Ephraim and Naphtali 8000 each. The tribe of Levi had increased by 727 (Num. xxvi.). The great diminution which took place in the tribe of Simeon may probably be assigned to the plague consequent on the misconduct of Zimri (Calmet, *on Num.* xxv. 9). On the other hand, the chief instances of increase are found in Manasseh of 20,500; Benjamin, 10,200; Asher, 11,800, and Issachar, 9900. None were numbered at this census who had been above 20 years of age at the previous one in the 2nd year, excepting Caleb and Joshua (Num. xxvi. 63-65).

4. The next formal numbering of the whole people was in the reign of David, who in a moment of presumption, contrary to the advice of Joab, gave orders to number the people without requiring the statutable offering of  $\frac{1}{3}$  a shekel. The men of Israel above 20 years of age were 800,000, and of Judah 500,000, total 1,300,000. The book of Chron. gives the numbers of Israel 1,100,000, and of Judah 470,000, total 1,570,000; but informs us that Levi and Benjamin were not numbered (1 Chr. xxi. 6, xxvii. 24). Josephus gives the numbers of Israel and Judah respectively 900,000 and 400,000 (2 Sam. xxiv. 1, 9; and Calmet, *ad loc.*; 1 Chr. xxi. 1, 5, xxvii. 24; Joseph. *Ant.* vii. 13, §1).

5. The census of David was completed by Solomon, by causing the foreigners and remnants of the conquered nations resident within Palestine to be numbered. Their number amounted to 153,600, and they were employed in forced labour on his great architectural works (Josh. ix. 27; 1 K. v. 15, ix. 20, 21; 1 Chr. xxii. 2; 2 Chr. ii. 17, 18).

Between this time and the Captivity, mention is made of the numbers of armies under successive kings of Israel and Judah, from which may be gathered with more or less probability, and with due consideration of the circumstances of the times as influencing the numbers of the levies, estimates of the population at the various times mentioned.

6. Rehoboam (B.C. 975-958) collected from Judah and Benjamin 180,000 men to fight against Jeroboam (1 K. xii. 21).

7. Abijam (958-955), with 400,000 men, made war on Jeroboam with 800,000, of whom 500,000 were slain (2 Chr. xiii. 3, 17).

8. Asa (955-914) had an army of 300,000 men from Judah, and 280,000 (Josephus says 250,000) from Benjamin, with which he defeated Zerah the Ethiopian, with an army of 1,000,000 (2 Chr. xiv. 8, 9; Joseph. *Ant.* viii. 12, 1).

9. Jehoshaphat (914-891), besides men in garrisons, had under arms 1,160,000 men, including perhaps subject foreigners (2 Chr. xvii. 14-19; Jahn, *Hist.* v. 37).

10. Amaziah (838-811) had from Judah and Benjamin 300,000, besides 100,000 mercenaries from Israel (2 Chr. xxv. 5, 6).

11. Uzziah (811-759) could bring into the field 307,500 men (307,000, Josephus), well armed, under 2600 officers (2 Chr. xxvi. 11-15; Joseph. *Ant.* ix. 10, §3).

Besides these more general statements, we have

other and partial notices of numbers indicating population. Thus, a. Gideon from 4 tribes collected 32,000 men (Judg. vi. 35, vii. 3). b. Jephthah put to death 42,000 Ephraimites (Judg. xii. 6). The numbers of Ephraim 300 years before were 32,500 (Num. xxvi. 37). c. Of Benjamin 25,000 were slain at the battle of Gibeah, by which slaughter, and that of the inhabitants of its cities, the tribe was reduced to 600 men. Its numbers in the wilderness were 45,600 (Num. xxvi. 41; Judg. xx. 35, 46). d. The number of those who joined David after Saul's death, besides the tribe of Issachar, was 340,922 (1 Chr. xii. 23-38). e. At the time when Jehoshaphat could muster 1,160,000 men, Ahab in Israel could only bring 7000 against the Syrians (1 K. xx. 15). f. The numbers carried captive to Babylon B.C. 599 from Judah, are said (2 K. xxiv. 14, 16) to have been from 8000 to 10,000, by Jeremiah 4600 (Jer. hi. 30).

12. The number of those who returned with Zerubbabel in the first caravan is reckoned at 42,360 (Ezr. ii. 64); but of these perhaps 12,542 belonged to other tribes than Judah and Benjamin. It is thus that the difference between the total (v. 64) and the several details is to be accounted for. The purpose of this census, which does not materially differ from the statement in Nehemiah (Neh. vii.), was to settle with reference to the year of Jubilee the inheritances in the Holy Land, which had been disturbed by the Captivity, and also to ascertain the family genealogies, and ensure, as far as possible, the purity of the Jewish race (Ezr. ii. 59, x. 2, 8, 18, 44; Lev. xxv. 10).

In the second caravan, B.C. 458, the number was 1496. Women and children are in neither case included (Ezr. viii. 1-14).

It was probably for kindred objects that the pedigrees and enumerations which occupy the first 9 chapters of the 1st book of Chronicles, were either composed before the Captivity, or compiled afterwards from existing records by Ezra and others (1 Chr. iv. 28, 32, 39, v. 9, vi. 57, 81, vii. 28, ix. 2). In the course of these we meet with notices of the numbers of the tribes, but at what periods is uncertain. Thus Reuben, Gad, and half the tribe of Manasseh are set down at 44,760 (v. 18), Issachar at 87,000 (vii. 5), Benjamin 59,434 (vii. 7, 9, 11), Asher 26,000 (vii. 40). Besides there are to be reckoned priests, Levites, and residents at Jerusalem from the tribes of Benjamin, Ephraim, and Manasseh (ix. 3).

Throughout all these accounts two points are clear. 1. That great pains were taken to ascertain and register the numbers of the Jewish people at various times for the reasons mentioned above. 2. That the numbers given in some cases can with difficulty be reconciled with other numbers of no very distant date, as well as with the presumed capacity of the country for supporting population. Thus the entire male population above 20 years of age, excepting Levi and Benjamin, at David's census, is given as 1,300,000 or 1,570,000 (2 Sam. xxiv. 1; 1 Chr. xxi.), strangers 153,600, total 1,453,600 or 1,723,000. These numbers (the excepted tribes being borne in mind) represent a population of not less than 4 times this amount, or at least, 5,814,000, of whom not less than 2,000,000 belonged to Judah alone (2 Sam. xxiv. 9). About 100 years after Jehoshaphat was able to gather from Judah and Benjamin (including subject foreigners) an army of 1,160,000 besides garrisons, representing a population of 4,640,000. Fifty years later,

Amaziah could only raise 300,000 from the same 2 tribes, and 27 years after this, Uzziah had 307,500 men and 2600 officers. Whether the number of the foreigners subject to Jehoshaphat constitutes the difference at these periods must remain uncertain.

To compare these estimates with the probable capacity of the country, the whole area of Palestine, including the trans-Jordanic tribes, so far as it is possible to ascertain their limits, may be set down as not exceeding 11,000 square miles; Judah and Benjamin at 3135, and Galilee at 930 sq. miles. The population, making allowance for the excepted tribes, would thus be not less than 530 to the square mile. Now the population of Belgium in 1850 was 4,426,202, or at the rate of 388 to the sq. mile, the area being about 11,400 sq. miles. The area of the kingdom of Saxony is 5752 sq. miles, and its population in 1852 was 1,987,832, or an average of 345½, but in some districts 500, to the sq. mile. The counties of Yorkshire, Westmoreland (the least populous county in England), and Lancashire, whose united area is 8642 sq. miles, contained in 1852 a population of 3,850,215, or rather more than 445 to the sq. mile; while the county of Lancashire alone gave 1064 persons, the West Riding of Yorkshire 496, and Warwickshire 539 to the sq. mile. The island of Barbadoes contains about 166 sq. miles, and in 1850 contained a population of 145,000, or 873 to the sq. mile. The population of Malta in 1849 was 115,864, or 1182 to the sq. mile. The two last instances, therefore, alone supply an average superior to that ascribed to Palestine in the time of David, while the average of Judah and Benjamin in the time of Jehoshaphat, would seem, with the exception mentioned above, to give 1480 to the sq. mile, a population exceeded only, in England, by the county of Middlesex (6683), and approached by that of Lancashire (1064).

But while, on the one hand, great doubt rests on the genuineness of numerical expressions in O. T. it must be considered on the other, that the readings on which our version is founded, give with trifling variations the same results as those presented by the LXX. and by Josephus (Jahn, v. 36; Winer, *Zahlen*; Glasse, *Phil. Sac. de causis corruptionis*, i. §23, vol. ii. p. 189).

In the list of cities occupied by the tribe of Judah, including Simeon, are found 123 "with their villages," and by Benjamin 26. Of one city, Ai, situate in Benjamin, which like many, if not all the others, was walled, we know that the population, probably exclusive of children, was 12,000, whilst of Gibeon it is said that it was larger than Ai (Josh. viii. 25, 29, x. 2, xv. 21-62, xviii. 21, 28, xix. 1-9). If these "cities" may be taken as samples of the rest, it is clear that Southern Palestine, at least, was very populous before the entrance of the people of Israel.

But Josephus, in his accounts (1.) of the population of Galilee in his own time, and (2.) of the numbers congregated at Jerusalem at the time of the Passover, shows a large population inhabiting Palestine. He says there were many cities in Galilee, besides villages, of which the least, whether cities or villages is not quite certain, had not less than 15,000 inhabitants (*B. J.* iii. 3, §2, 4; comp. *Tac. Hist.* v. 8). After the defeat of Cestius, A.D. 66, before the formal outbreak of the war, a census taken at Jerusalem by the priests, of the numbers assembled there for the Passover, founded

on the number of lambs sacrificed, compared with the probable number of persons partaking, gave 2,700,000 persons, besides foreigners and those who were excluded by ceremonial defilement (see *Tac. Hist.* v. 12). In the siege itself 1,100,000 perished, and during the war 97,000 were made captives. Besides these many deserted to the Romans, and were dismissed by them (*B. J.* vi. 8, 9, 3). These numbers, on any supposition of foreign influx (*δυσφύλον ἄλλ' οὐκ ἐπιχθόνιον*) imply a large native population; and 63 years later, in the insurrection of Barchochebas, Dion Cassius says that 50 fortified towns and 980 villages were destroyed, and 580,000 persons were slain in war, besides a countless multitude who perished by famine, fire, and disease, so that Palestine became almost depopulated (*Dion Cass.* lix. 14).

Lastly, there are abundant traces throughout the whole of Palestine of a much higher rate of fertility in former as compared with present times, a fertility remarked by profane writers, and of which the present neglected state of cultivation affords no test. This combined with the positive divine promises of populousness, increases the probability of at least approximate correctness in the foregoing estimate of population (*Tac. Hist.* v. 6; *Amm. Marc.* xiv. 8; *Joseph. B. J.* iii. 3; *St. Jerome*, on *Ezek.* xx., and Rabbinical authorities in *Ireland* c. xxvi.; *Shaw, Travels*, ii. pt. 2, c. 1, 336, 340, and 275; *Hasselquist, Travels*, 120, 127, 130; *Stanley, S. & Pal.* 120, 374; *Kitto, Phys. Geogr.* 33; *Ratiner, Palestina*, 8, 80, 83, App. ix. *Comp. Gen.* xiii. 16, xlii. 17; *Num.* xxiii. 10; 1 *K.* iv. 20; *Acts* vii. 20).

II. In N. T., *St. Luke*, in his account of the "taxing," says, a decree went out from Augustus ἀπογραφῆσθαι πᾶσαν τὴν οἰκουμένην αὐτῇ ἡ ἀπογραφὴ πρώτη ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρηνίου, and in the Acts alludes to a disturbance raised by Judas of Galilee in the days of the "taxing" (*Luke* ii. 1; *Acts* v. 37).

The Roman census under the Republic consisted, so far as the present purpose is concerned, in an enrolment of persons and property by tribes and households. Every paterfamilias was required to appear before the Censors, and give his own name and his father's; if married, that of his wife, and the number and ages of his children: after this an account and valuation of his property, on which a tax was then imposed. By the lists thus obtained every man's position in the state was regulated. After these duties had been performed, a *lustrum*, or solemn purification of the people followed, but not always immediately (*Dict. of Antiq.* CENSUS, LUSTRUM; *Dionys.* iv. 15, 22; *Cic. de Legg.* iii. 3; *Dig.* 50, tit. 15; *Cod. ii.* tit. 48; *Clinton, Fast. Holl.* iii. p. 457, c. 10).

The census was taken, more or less regularly, in the provinces, under the republic, by provincial censors, and the tribute regulated at their discretion (*Cic. Verr.* ii. lib. ii. 53, 56), but no complete census was made before the time of Augustus, who carried out 3 general inspections of this kind, *vis.*, (1.) B.C. 28; (2.) B.C. 8; (3.) A.D. 14; and a partial one, A.D. 4. The reason of the partial extent of this last was that he feared disturbances out of Italy, and also that he might not appear as an exactor. Of the returns made, Augustus himself kept an accurate account (*brevarium*), like a private man of his property (*Dion Cass.* liv. 35, lv. 13; *Suet. Aug.* 27, 101; *Tac. Ann.* i. 11; *Tab. Ancyra.* ap. *Tac.* ii. 188, Ernesti).

A special assessment of Gaul under commissioners sent for the purpose is mentioned in the time of Tiberius (Tac. *Ann.* i. 31, ii. 6; Liv. *Ep.* 134, 136).

The difficulties which arise in the passage from St. Luke are discussed under CYRENIUS. [H. W. P.]

CENTURION. [ARMY.]

CEPHAS. [PETER.]

CE'RAS (Κηράς; *Curiae*), 1 Esd. v. 29. [KEROS.]

CE'TAB (Κητάβ; *Cetha*), 1 Esd. v. 30. There is no name corresponding with this in the lists of Ezra and Nehemiah.

CHA'BRIS (Ἀβρίς; Alex. Χαβρίς; Vulg. omits), the son of Githoniel (δ τοῦ Γ.), one of the three "rulers" (ἄρχοντες), or "ancients" (πρεσβύτεροι) of Bethulia, in the time of Judith (Jud. vi. 15, viii. 10, x. 6).

CHA'DIAS. "They of Chadias (of Χαδιασά) and Ammidoi," according to 1 Esd. v. 20, returned from Babylon with Zerobabel. There are no corresponding names in Ezra and Nehemiah.

CHAFF (חֶשֶׁךְ, חֶשֶׁךְ, חֶשֶׁךְ; Chald. עָר; χυός, ἄχυρον; *stipula, pulvis, favilla*). The Heb. words rendered *chaff* in A. V. do not seem to have precisely the same meaning: חֶשֶׁךְ = *dry grass, hay*; and occurs twice only in O. T., viz., Is. v. 24, xxxiii. 11. The root חֶשֶׁךְ is not used. Probably the Sanscrit *kaksh* = *hay* is the same word. (Bopp. *Gloss.* p. 41.)

חֶשֶׁךְ or חֶשֶׁךְ is chaff separated by winnowing from the grain—the husk of the wheat. The carrying away of chaff by the wind is an ordinary scriptural image of the destruction of the wicked, and of their powerlessness to resist God's judgments (Is. xvii. 13; Hos. xiii. 3; Zeph. ii. 2). The root of the word is חֶשֶׁךְ, *to press out, as of milk*; whence its second meaning, *to separate*.

חֶשֶׁךְ is rendered *straw* in Ex. v. 7, 10, 11, &c., and *stubble* in Job xxi. 18. In Ex. v. 12, we read חֶשֶׁךְ לֶחֶם, *stubble for straw*; so that it is not the same as *stubble*. It means *straw cut into short portions*, in which state it was mixed with the mud of which bricks were made to give it consistency. In 1 K. iv. 28, mention is made of a mixed fodder for horses and camels of barley and חֶשֶׁךְ, such as the Arabs call *tīm* to this day. The derivation of the word is doubtful. Gesenius was of opinion that חֶשֶׁךְ was for חֶבֶרֶךְ, from root חֶבֶר, *to build*, in reference to edifices of bricks made with straw. Hoediger prefers to connect it with חֶרֶץ, which properly implies a separation and division of parts, and is thence transferred to the mental power of discernment; so that חֶשֶׁךְ signifies properly anything cut into small parts (Ges. *Thes.* 1492).

The Chaldaic word עָר occurs but once, in Dan.

ii. 35. It is connected with the Syr. حَذَر, and Arab. عوار, i. e. a straw or small bit of chaff flying into and injuring the eye. [W. D.]

CHAIN. Chains were used, 1. as badges of office; 2. for ornament; 3. for confining prisoners.

The gold chain (חֶבֶרֶךְ) placed about Joseph's neck (Gen. xli. 42), and that promised to Daniel (Dan. v. 7, named חֶבֶרֶךְ), are instances of the first use. In Egypt it was one of the *insignia* of a judge, who wore an image of truth attached to it (Wilkinson's *Anc. Egypt.* ii. 26); it was also worn by the prime minister. In Persia it was considered not only as a mark of royal favour (Xen. *Anab.* i. 2, §27), but a token of investiture (Dan. i. c.; Morier's *Second Journey*, p. 93). In Ez. xvi. 11, the chain is mentioned as the symbol of sovereignty. 2. Chains for ornamental purposes were worn by men as well as women in many countries both of Europe and Asia (Wilkinson, *ibid.* 375), and probably this was the case among the Hebrews (Prov. i. 9). The necklace (קֶרֶן) consisted of pearls, corals, &c., threaded on a string; the beads were called חֶבֶרֶךְ, from חֶרֶץ, *to perforate* (Cant. i. 10, A. V. "chains," where "of gold" are interpolated). Besides the necklace, other chains were worn (Jud. x. 4) hanging down as far as the waist, or even lower. Some were adorned with pieces of metal, shaped in the form of the moon, named חֶבֶרֶךְ (μήνισκος, LXX.; *lunulac*, Vulg.; *round tires like the moon*, A. V.; Is. iii. 18); a similar ornament, the *hilāl*, still exists in Egypt (Lane's *Modern Egyptians*, App. A.). The Midianites adorned the necks of their camels with it (Judg. viii. 21, 26); the Arabs still use a similar ornament (Wellsted, i. 301). To other chains were suspended various tinkets—as scent-bottles, חֶבֶרֶךְ (tablets or houses of the souls, A. V., Is. iii. 20), and mirrors, חֶבֶרֶךְ (Is. iii. 23). *Step-chains*, חֶבֶרֶךְ (tinkling ornaments, A. V.), were attached to the ankle-rings, which shortened the step and produced a mincing gait (Is. iii. 16, 18). 3. The means adopted for confining prisoners among the Jews were fetters similar to our handcuffs חֶבֶרֶךְ (lit. *two brasses*, as though made in halves), fastened on the wrists and ankles, and attached to each other by a chain (Judg. xvi. 21; 2 Sam. iii. 34; 2 K. xxv. 7; Jer. xxxix. 7). Among the Romans, the prisoner was handcuffed to one, and occasionally to two guards—the handcuff on the one being attached to that on the other by a chain (Acts xii. 6, 7, xxi. 33; *Dict. of Ant.*, art. CATENA). [W. L. B.]

CHALCEDONY (χαλκηδών; *calcedonius*) occurs only in Rev. xxi. 19, being the precious stone with which the third foundation of the wall of the New Jerusalem is garnished. According to Pliny (*H. N.* xxxvii. 8, §15), chalcedony is a gem resembling the Callais or turquoise, which some have judged to be a kind of carbuncle or ruby. Solmasius differs from those who make the colour of chalcedony to be like that of the carbuncle, and says that they confound τὸν καρχηδόνιον λίθον, which is a species of carbuncle, with τῇ χαλκηδονίῳ; but confesses that it is by no means clear what stone the ancients called *chalcedonius*. Pignelion on Rev. (xxi. 19) says that this stone has the colour of a pallid lamp, shines in the open air, but is dark in a house, cannot be cut, and has powers of attraction. The etymology of the word is not

less doubtful than its meaning. Some derive it from *χαλκός*, from a belief that it rings like brass when struck. Others have derived it from *Χαλκηδών*, as though from a locality where it is found; and others from *Καρχηδών*. See Braun, *de Vesi. Heb.* ii. c. ii. p. 525. [W. D.]

CHALCOL, 1 K. iv. 31. [CALCOL.]

CHALDEA, more correctly CHALDAEA (𐤠𐤏𐤍𐤏𐤍; ἡ Χαλδαία; *Chaldaea*) is properly only the most southern portion of Babylonia. It is used, however, in our version for the Hebrew ethnic appellation *Casdim* (or "Chaldeans"), under which term the inhabitants of the entire country are designated; and it will therefore here be taken in this extended sense. The origin of the term is very doubtful. *Casdim* has been derived by some from Chesed (צֶשֶׁד), the son of Nahor (Gen. xxii. 22); but if Ur was already a city "of the *Casdim*" before Abraham quitted it (Gen. xi. 28), the name of *Casdim* cannot possibly have been derived from his nephew. On the other hand the term *Chaldaea* has been connected with the city *Kiltadha* (Chilmad of Ezekiel, xvii. 23). This is possibly correct. At any rate in searching for an etymology it should be borne in mind that *Kaldi* or *Kaldai*, not *Casdim*, is the native form.

1. *Extent and boundaries*.—The tract of country viewed in Scripture as the land of the Chaldeans is that vast alluvial plain which has been formed by the deposits of the Euphrates and the Tigris—at least so far as it lies to the west of the latter stream. The country to the east is Elam or Susiana; but the entire tract between the rivers, as well as the low country on the Arabian side of the Euphrates, which is cultivable by irrigation from that stream, must be considered as comprised within the Chaldaea of which Nebuchadnezzar was king. This extraordinary flat, unbroken except by the works of man, extends, in a direction nearly N.E. and S.W., a distance of 400 miles along the course of the rivers, and is on the average about 100 miles in width. A line drawn from Hit on the Euphrates to Tekrit on the Tigris, may be considered to mark its northern limits; the eastern boundary is the Tigris itself; the southern the Persian Gulf; on the west its boundary is somewhat ill-defined, and in fact would vary according to the degree of skill and industry devoted to the regulation of the waters and the extension of works for irrigation. In the most flourishing times of the Chaldean empire the water seems to have been brought to the extreme limit of the alluvium, a canal having been cut along the edge of the tertiary formation on the Arabian side throughout its entire extent, running at an average distance from the Euphrates of about 30 miles.

2. *General character of the country*.—The general aspect of the country is thus described by a modern traveller, who well contrasts its condition now with the appearance which it must have presented in ancient times. "In former days," he says, "the vast plains of Babylon were nourished by a complicated system of canals and water-courses, which spread over the surface of the country like a net-work. The wants of a teeming population were supplied by a rich soil, not less bountiful than that on the banks of the Egyptian Nile. Like islands rising from a golden sea of waving corn, stood frequent groves of palm-trees and pleasant gardens, affording to the idler or tin-

veller their grateful and highly-valued shade. Crowds of passengers hurried along the dusty roads to and from the busy city. The land was rich in corn and wine. How changed is the aspect of that region at the present day! Long lines of mounds, it is true, mark the courses of those main arteries which formerly diffused life and vegetation along their banks, but their channels are now bereft of moisture and choked with drifted sand; the smaller offshoots are wholly effaced. 'A drought is upon her waters,' says the prophet, 'and they shall be dried up!' All that remains of that ancient civilisation—that 'glory of kingdoms,'—the praise of the whole earth,—is recognisable in the numerous mouldering heaps of brick and rubbish which overspread the surface of the plain. Instead of the luxuriant fields, the groves and gardens, nothing now meets the eye but an arid waste—the dense population of former times is vanished, and no man dwells there." (Loftus's *Chaldaea*, pp. 14-5.) The cause of the change is to be found in the neglect of man. "There is no physical reason," the same writer observes, "why Babylonia should not be as beautiful and as thickly inhabited as in days of yore; a little care and labour bestowed on the ancient canals would again restore the fertility and population which it originally possessed." The prosperity and fertility of the country depend entirely on the regulation of the waters. Carefully and properly applied and husbanded, they are sufficient to make the entire plain a garden. Left to themselves, they desert the river courses to accumulate in lakes and marshes, leaving large districts waterless, and others most scantily supplied, while they overwhelm tracts formerly under cultivation, which become covered with a forest of reeds, and during the summer heats breed a pestilential miasma. This is the present condition of the greater part of Babylonia under Turkish rule; the evil is said to be advancing; and the whole country threatens to become broken in a short time either marsh or desert.

3. *Divisions*.—In a country so uniform and so devoid of natural features as this, political divisions could be only accidental or arbitrary. Few are found of any importance. The true Chaldaea, as has been already noticed, is always in the geographers a distinct region, being the most southern portion of Babylonia, lying chiefly (if not solely) on the right bank of the Euphrates (Strab. xvi. 1, §6; Ptol. v. 20). Babylonia above this, is separated into two districts, called respectively *Anoradua* and *Awanitis*. The former is the name of the central territory round Babylon itself; the latter is applied to the regions towards the north, where Babylonia borders on Assyria (Ptol. v. 20).

4. *Cities*.—Babylonia was celebrated at all times for the number and antiquity of its cities. "Babel, and Erech, and Accad, and Calneh in the land of Shinar," are the first towns mentioned in Scripture (Gen. x. 10). The "vast number of great cities" which the country possessed, was noted by Herodotus (i. 178), and the whole region is in fact studded with huge mounds, each mound marking beyond a doubt the site of a considerable town. The most important of those which have been identified are Borsippa (*Birs-Nimrud*), Sippara or Sepharvaim (*Mosab*), Cutha (*Ibrahim*), Calneh (*Niffer*), Erech (*Warka*), Ur (*Mugheir*), Chilmad (*Kiltadha*), Larachin (*Senkereh*), Is (*Hit*), Duraba (*Ak-kerkef*); but besides these there were a multitude of others, the sites of which have not been determined, as the Accad of Genesis (x. 10); the Turedon of

Abydenus (Fr. 8); *Asbi*, *Rulesi*, &c., towns mentioned in the inscriptions. Two of these places—Ur and Borsippa—are particularly noticed in the following article [CHALDEANS]. Of the rest Erech, Larnacha, and Calneh, were in early times of the most consequence; while Cutha, Sippawa, and Tereclou attained their celebrity at a comparatively recent epoch.

5. *Canals*.—One of the most remarkable features of ancient Babylonia was, as has been already observed, its network of canals. A more particular account will now be given of the chief of these. Three principal canals carried off the waters of the Euphrates towards the Tigris, above Babylon. These were, 1. The original "Royal River," or *Ar-Mulcha* of Berosus, which left the Euphrates at *Perisabor* or *Anbar*, and followed the line of the modern *Saklawijeh* canal, passing by *Akkerkuf*, and entering the Tigris a little below Baghdad; 2. the *Nahr Malcha* of the Arabs, which branched off at *Ridhwanijeh*, and ran across to the site of Seleucia; and 3. the *Nahr Kutha*, which starting from the Euphrates about 12 miles above *Mosail*, passed through Cutha, and fell into the Tigris 20 miles below the site of Seleucia. On the other side of the stream, a large canal, perhaps the most important of all, leaving the Euphrates at *Hiti*, where the alluvial plain commences, skirted the deposit on the west along its entire extent, and fell into the Persian Gulf at the head of the *Hubian* creek, about 20 miles west of the *Sht-el-Arab*; while a second main artery (the *Pallacopas* of Arrian) branched from the Euphrates nearly at *Mosail*, and ran into a great lake, in the neighbourhood of Borsippa, whence the lands to the south-west of Babylon were irrigated. From these and other similar channels, numerous branches were carried out, from which further cross cuts were made, until at length every field was duly supplied with the precious fluid.

6. *Sea of Nodjef*, *Chaldaean marshes*, &c.—Chaldea contains one natural feature deserving of special description—the "great inland freshwater sea of *Nodjef*" (Loftus, p. 45). This sheet of water, which does not owe its origin to the inundations, but is a permanent lake of considerable depth, surrounded by cliffs of a reddish sandstone in places 40 feet high, extends in a south-easterly direction a distance of 40 miles from about lat.  $31^{\circ} 53'$  long.  $44^{\circ}$  to lat.  $31^{\circ} 26'$ , long.  $44^{\circ} 35'$ . Its greatest width is 35 miles. It lies thus on the right bank of the Euphrates, from which it is distant (at the nearest point) about 20 miles, and receives from it a certain quantity of water at the time of the inundation, which flows through it, and is carried back to the Euphrates at *Samawa*, by a natural river course known as the *Sht-el-Atchan*. Above and below the Sea of *Nodjef*, from the *Birs-Ninnrud* to *Kufa*, and from the south-eastern extremity of the Sea to *Samawa*, extend the famous Chaldaean marshes (Strab. xvi. 1, §12; Arrian, *Exp. Al.* vii. 22), where Alexander was nearly lost, but these are entirely distinct from the sea itself, depending on the state of the *Hindijeh* canal, and disappearing altogether when that is effectually closed.

7. *Productions*.—The extraordinary fertility of the Chaldaean soil has been noticed by various writers. It is said to be the only country in the world where wheat grows wild. Berosus noticed this production (Fr. 1, §2), and also the spontaneous growth of barley, sesame, ochrys, palms,

apples, and many kinds of shelled fruit. Herodotus declared (i. 193) that grain commonly returned 200-fold to the sower, and occasionally 300-fold. Strabo made nearly the same assertion (xvi. 1, §14); and Pliny said (*H. N.* xviii. 17), that the wheat was cut twice, and afterwards was good keep for beasts. The palm was undoubtedly one of the principal objects of cultivation. According to Strabo it furnished the natives with bread, wine, vinegar, honey, porridge, and ropes; with a fuel equal to charcoal, and with a means of fattening cattle and sheep. A Persian poem celebrated its 360 uses (Strab. xvi. 1, 14). Herodotus says (i. 193) that the whole of the flat country was planted with palms, and Ammianus Marcellinus (xxiv. 5) observes that from the point reached by Julian's army to the shores of the Persian Gulf was one continuous forest of verdure. At present palms are almost confined to the vicinity of the rivers, and even there do not grow thickly except about the villages on their banks. The soil is rich, but there is little cultivation, the inhabitants subsisting chiefly upon dates. More than half the country is left dry and waste from the want of a proper system of irrigation; while the remaining half is to a great extent covered with marshes owing to the same neglect. Thus it is at once true that "the sea has come up upon Babylon and she is covered with the waves thereof" (Jer. li. 42); that she is made "a possession for the bitter, and pools of water" (Is. xiv. 23); and also that "a drought is upon her waters, and they are dried up" (Jer. l. 38), that she is "wholly desolate"—"the hindmost of the nations, a wilderness a dry land, and a desert" (Is. 12, 13). (See Loftus's *Chaldaea and Susiana*; Layard's *Ninveh and Bab.* chs. xxi.—xxiv.; Rawlinson's *Herodotus*, vol. i. Essay ix.; and Mr. Taylor's *Paper in the Journal of the Asiatic Society*, vol. xv.) [G. H.]

CHALDEANS, or CHALDEES (כְּשִׁימִי; *Χαλδαῖοι*; *Chaldæi*), appear in Scripture, until the time of the captivity, as the people of the country which has Babylon for its capital, and which is itself termed *Shinar* (שִׁנְאָר); but in the book of Daniel, while this meaning is still found (v. 30, and ix. 1), a new sense shows itself. The Chaldeans are classed with the magicians and astronomers; and evidently form a sort of priest class, who have a peculiar "tongue" and "learning" (i. 4), and are consulted by the king on religious subjects. The same variety appears in profane writers. Berosus, the native historian, himself a Chaldaean in the narrower sense (Athen. *Or. ad. Gr.* 58), uses the term only in the wider; while Herodotus, Diodorus, Strabo, and the later writers almost universally employ it to signify a sect or portion of the people, whom they regard either as priests or as philosophers. With this view, however, is joined another, which but ill harmonises with it; namely, that the Chaldeans are the inhabitants of a particular part of Babylonia, viz., the country bordering on the Persian Gulf and on Arabia (Strab. xvi. 1, §6; Ptol. v. 20). By help of the inscriptions recently discovered in the country, these discrepancies and apparent contradictions are explicable.

It appears that the Chaldeans (*Kaldai* or *Kaldi*) were in the earliest times merely one out of the many Cushite tribes inhabiting the great alluvial plain known afterwards as Chaldea or Babylonia. Their special seat was probably that southern por-

tion of the country which is found to have so late retained the name of Chaldean. Here was Ur "of the Chaldees," the modern *Mughair*, which lies south of the Euphrates, near its junction with the *Shat-el-Hie*. Hence would readily come those "three bands of Chaldeans" who were instruments, simultaneously with the *Sabians*, in the affliction of Job (Job i. 15-17). In process of time, as the *Kaldi* grew in power, their name gradually prevailed over that of the other tribes inhabiting the country; and by the era of the Jewish captivity it had begun to be used generally for all the inhabitants of Babylonia. We may suspect that when the name is applied by Berosus to the dynasties which preceded the Assyrian, it is by way of *prolepsis*. The dynasty of Nabopolassar, however, was (it is probable) really Chaldaean, and this greatly helped to establish the wider use of the appellation. It had thus come by this time to have two senses, both ethnic: in the one it was the special appellation of a particular race to whom it had belonged from the remotest times, in the other it designated the nation at large in which this race was predominant. We have still to trace its transference from an ethnic to a mere class sense—from the name of a people to that of a priest caste or sect of philosophers.

It has been observed above that the *Kaldi* proper were a Cushite race. This is proved by the remains of their language, which closely resembles the *Gulla* or ancient language of Ethiopia. Now it appears by the inscriptions that while both in Assyria and in later Babylonia, the Semitic type of speech prevailed for civil purposes, the ancient Cushite dialect was retained, as a learned language, for scientific and religious literature. This is no doubt the "learning" and the "tongue" to which reference is made in the book of Daniel (i. 4). It became gradually inaccessible to the great mass of the people, who were Semitized, by means (chiefly) of Assyrian influence. But it was the Chaldaean learning, in the old Chaldaean or Cushite language. Hence all who studied it, whatever their origin or race were, on account of their knowledge, termed Chaldeans. In this sense Daniel himself, the "master of the Chaldeans" (Dan. v. 11), would no doubt have been reckoned among them; and so we find Seleucus, a Greek, called a Chaldaean by Strabo (xvi. 1, §6). It may be doubted whether the Chaldeans at any time were all priests, though no doubt priests were required to be Chaldeans. They were really the learned class, who by their acquaintance with the language of science had become its depositaries. They were priests, magicians, or astronomers, as their preference for one or other of those occupations inclined them; and in the last of the three capacities they probably effected discoveries of great importance.

According to Strabo, who well distinguishes (xvi. 1, §6) between the learned Chaldeans and the mere race descended from the ancient *Kaldi*, which continued to predominate in the country bordering upon Arabia and the Gulf, there were two chief seats of Chaldaean learning, Borsippa, and Ur or Orchœ. To these we may add from Pliny (*H. N.* vi. 26) two others, Babylon, and Sippara or Sepharvaim. The Chaldeans (it would appear) congregated into bodies, forming what we may perhaps call universities, and pursuing the studies, in which they engaged, together. They probably mixed up to some extent astrology with their astronomy, even in the earlier times, but they certainly made great advances in astronomical science, to which

their serene sky, transparent atmosphere, and regular horizon specially invited them. The observations, covering a space of 1903 years, which Callisthenes sent to Aristotle from Babylon (*Simplic. ad Arist. de Coel.* ii. p. 123), indicate at once the antiquity of such knowledge in the country, and the care with which it had been preserved by the learned class. In later times they seem certainly to have degenerated into mere fortune-tellers (*Cic. de Div.* i. 1; *Aul. Gell.* i. 9; *Juv.* vi. 552, x. 94, &c.); but this reproach is not justly levelled against the Chaldeans of the empire, and indeed it was but partially deserved so late as the reign of Augustus (see Strab. xvi. 1, §6). [G. R.]

#### CHALDEES. [CHALDEANS.]

**CHALK STONES** (כִּלְכִּיָּם; *lapides cineris*) occurs only in Is. xlvii. 9, and signifies literally *stones of lime*. כִּלְ is from an unused root, כִּל, to *boil up*, in reference to the heating of lime when slaked. [W. D.]

**CHAMELEON** (חָמָל; *χамαιλέον*; *chamaeleon*), probably a species of large lizard, called חָמָל on account of its great strength. (In Lev. xi. 30, it is enumerated among the creeping things that are unclean.) It is said to destroy serpents, and was called by the Greeks *δφίωνικος*, by the Arabians *guaril*. The true chameleon was probably the חֲמָלָה of Lev. xi. 30. [MOLE.] [W. D.]

**CHAMOIS** (חֲמֹשׁ; *καμηλοπάρδαλις*; *camelopardalis*), a species of deer or antelope, called חֲמֹשׁ from its habit of leaping, from root חָמַר, to *leap* (*Ges. Thes.* 420). Bochart (*Hier.* ii. 273-279) has shown that the rendering of the LXX. and Vulg. is an error. Luther has not been more happy in translating it *alcea*, elk, which only inhabits northern countries. There are several species of antelope in Western Asia. The חֲמֹשׁ is classed among beasts that may be eaten in Deut. xiv. 5. [W. D.]

**CHANAAN** (Χαναάν), the manner in which the word CANAAN is spelt in the A. V. of the Apocrypha and N. T. (comp. Charran for Haran, &c.) Jud. v. 3, 9, 10; Bar. iii. 22; Sus. 56; 1 Macc. ix. 37; Acts vii. 11, xiii. 19.

CHANAANITE for CANAANITE, Jud. v. 16.

**CHANNUNE'US** (Χαννονεύς; *Chanmaeus*), 1 Esd. viii. 48. This answers to Menari, if to anything, in the parallel list of Ezra (viii. 19).

**CHAPITER.** 1. כְּתִירָת, in pl. כְּתִירֹת, from כָּתַר, to *surround*; *κεφάλαια*; *capitellum*. 2. צֶפֶס, from צָפַץ, to *draw out* (*Ges.* 912-914); *ἀκεφαλαί*; *capita*. The upper member of a pillar—the same word which is now in use in the slightly different form of "capital"—also possibly a roll moulding at the top of a building or work of art, as in the case (1) of the pillars of the Tabernacle and Temple, and of the two pillars called especially Jachin and Boaz; and (2) of the lavers belonging to the Temple (*Ex.* xxxviii. 17; 1 K. vii. 27, 31, 38). As to the form and dimensions of the former, see TABERNACLE, TEMPLE, BOAZ, and of the latter, LAVER. 3. The word רֹאשׁ, *rosh* = head, is also occasionally rendered "Chapter," as in the description of the tabernacle, *Ex.* xxxvi. 38, xxxviii.

17, 19, 28; but in the account of the temple it is translated "top," as 1 K. vii. 16, &c. [H. W. P.]

**CHARAATHALAR** (Χαρααθάλαν; Alex. Χαρα αθαλάρ; *Carnellum et Careth*), 1 Esd. v. 35. The names "Cherub, Addan, and Immer," in the lists of Ezra and Nehemiah, are here changed to "Charaathalar leading them, and Aalar."

**CHAR'ACA** (εἰς τὸν Χάρακα (? Χάραξ); *Characai*), a place mentioned only in 2 Mac. xii. 17, and there so obscurely that nothing can be certainly inferred as to its position. It was on the east of Jordan, being inhabited by the Jews called "Tubieni," or of "Tobie" [TOB], who were in Gilead (comp. 1 Mac. v. 9, 13); and it was 750 stadia from the city Caspin; but where the latter place was situated, or in which direction Charax was with regard to it, there is no clue. Ewald (iv. 359, note) places it to the extreme east, and identifies it with RAPHON. The only name now known on the east of Jordan which reveals Charax is *Karak*, the ancient Kir-Moab, on the S.E. of the Dead Sea, which in post-biblical times was called *Χαρδμωβα*, and *Μαβουχάραξ* (see the quotations in Reiland, 705). The Syriac Peschito has כרכן, *Carca*, which suggests KARKOR (Judg. vii. 10). [G.]

**CHAR'ASHIM, THE VALLEY OF** (חַרְאֲשִׁים; Alex. ἡ γὰρ ἀσάρι; *Charashim*), a place mentioned twice;—1 Chr. iv. 14, as having been founded or settled by Jash, a man of the tribe of Judah and family of Othniel; and Neh. xi. 35, as being re-inhabited by Benjamites after the Captivity. In this passage it is rendered "valley of craftsmen." Its mention by Nehemiah with Lod (Lydda), Nebailat, &c. fixes its position as in the swelling ground at the back of the plain of Sharon, east of Jaffa. The Talmud (as quoted by Schwarz, p. 135) reports the valley of Charashim to consist of Lod and Ono, which lay therein. Whether Jash the son of Senuiah is the same person as the son of Senuiah will be best examined under the name JOAB. [G.]

**CHAR'CHAMIS** (Χαρκαμύς; Alex. Χαλχαμύς; *Charcamis*), 1 Esd. i. 25. [CARCHAMIS.]

**CHARCH'EMISH** (כַּרְכֶּמִּישׁ; LXX. omits; *Charcamis*), 2 Chr. xxxv. 20. [CARCH'EMISH.]

**CHAR'CUS** (Βαρκούε; *Barcus*), 1 Esd. v. 32 (corrupted from BARKOS, the corresponding name in the parallel lists of Ezra and Nehemiah—possibly by a change of ב into כ. But it does not appear whence the translators of the A. V. got their reading of the name. In the edition of 1611 it is "Chareus.")

**CHA'REA** (Χαρεία; *Carco*), 1 Esd. v. 32; [HARMIA.]

**CHARGER** (1. חָרָץ, from a root signifying hollowness; *τροβαλον, κοτύλη*; *acetabulum* 2. חֲרָצִים; *ψυκτήρ*; *phictis*; only found Ezr. i. 9) a shallow vessel for receiving water or blood, also for presenting offerings of fine flour with oil (Num. vii. 79; *Gen. Thea*. 22). The "chargers" mentioned in Numbers are said to have been of silver, and to have weighed each 130 shekels, or 65 oz. (Hussey, *Anc. Weights*, c. ix. p. 190).

2. The daughter of Herodius brought the head

of St. John Baptist in a charger, ἐν πίνακι (Matt. xiv. 8); probably a trencher or platter, as Hom. *Od.* i. 141.

δαιτρός δὲ κρειών πίνακας παρέθηκεν ἀείρας παντοίων.

Comp. Luke i. 63. *πίνακιδιον*, a writing-tablet. [BASIN.] [H. W. P.]

**CHARIOT**. 1. רֶכֶב, from רָכַב, *to ride*; *ἄρμα*; *currus*: sometimes including the horses (2 Sam. viii. 4, x. 18). 2. רֶכֶב, a chariot or horse (Ps. civ. 3). 3. מֶרֶכַב, m. from same root as (1) a chariot, litter, or seat (Lev. xv. 9, Cant. iii. 10). 4. מֶרֶכְבָּה, f. 5. עֶגְלָה, from עָגַל, *roll* (Ps. xli. 10, *thepeds*; *scutum*). 6. מִפְרִיץ, Cant. iii. 9; *pupeion*; *ferculum*. (Between 1-4 no difference of signification.) A vehicle used either for warlike or peaceful purposes, but most commonly the former. Of the latter use the following only are probable instances as regards the Jews, 1 K. xviii. 44, and as regards other nations, Gen. xli. 43, xli. 29; 2 K. v. 9; Acts viii. 28.

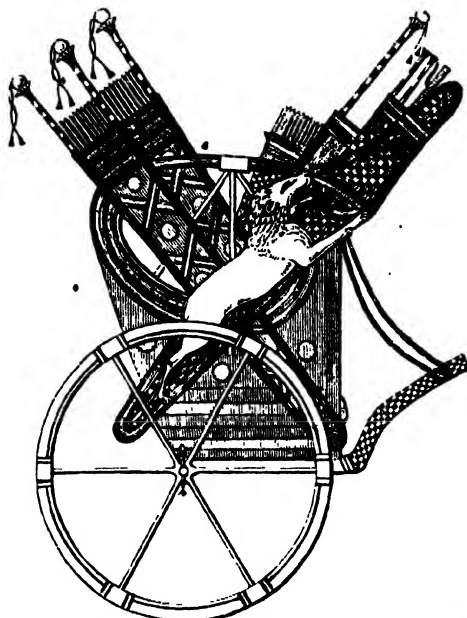

The earliest mention of chariots in Scripture is in Egypt, where Joseph, as a mark of distinction, was placed in Pharaoh's second chariot (Gen. xli. 43), and later when he went in his own chariot to meet his father on his entrance into Egypt from Canaan (xli. 29). In the funeral procession of Jacob chariots also formed a part, possibly by way of escort or as a guard of honour (l. 9). The next mention of Egyptian chariots is for a warlike purpose (Ex. xiv. 7). In this point of view chariots among some nations of antiquity, as elephants among others, may be regarded as filling the place of heavy artillery in modern times, so that the military power of a nation might be estimated by the number of its chariots. Thus Pharaoh in pursuing Israel took with him 600 chariots. The Canaanites of the valleys of Palestine were enabled to resist the Israelites successfully in consequence of the number of their chariots of iron, i. e. perhaps armed with iron scythes (Gen. s. r.; Josh. xvii. 18; Judg. i. 19). Jabin, king of Canaan, had 900 chariots (Judg. iv. 3). The Philistines in Saul's time had 30,000, a number which seems excessive (1 Sam. xiii. 5; but comp. LXX. and Joseph. *Ant.* vi. 6, §1). David took from Hadadezer king of Zobah 1000 chariots (2 Sam. viii. 4), and from the Syrians a little later 700 (x. 18), who in order to recover their ground collected 32,000 chariots (1 Chr. xix. 7). Up to this time the Israelites possessed few or no chariots, partly no doubt in consequence of the theocratic prohibition against multiplying horses, for fear of intercourse with Egypt, and the regal despotism implied in the possession of them (Deut. xvii. 16; 1 Sam. viii. 11, 12). But to some extent David (2 Sam. viii. 4), and in a much greater degree Solomon, broke through the prohibition from seeing the necessity of placing his kingdom, under its altered circumstances, on a footing of military equality or superiority towards other nations. He raised, therefore, and maintained a force of 1400 chariots (1 K. x. 25) by taxation on certain cities agreeably to Eastern custom in such matters (1 K. ix. 19, x. 25; Xen. *Anab.* i. 4, 9). The chariots themselves and also the horses were imported chiefly from Egypt, and the cost of each chariot was 600 shekels of silver, and of each horse 150 (1 K. x. 29). [SHEKEL.] From this time chariots were regarded as among

the most important arms of war, though the supplies of them and of horses appear to have been still mainly drawn from Egypt (1 K. xvii. 34; 2 K.

(2 Sam. viii. and 2 K. vi. 14, 15), Persia (Is. xxii. 6), and lastly Antiochus Eupator is said to have had 300 chariots armed with scythes (2 Mac. xiii. 2).

In the N. T., the only mention made of a chariot except in Rev. ix. 9, is in the case of the Ethiopian or Abyssinian eunuch of Queen Candace, who is described as sitting in his chariot reading (Acts viii. 28, 29, 38).

Jewish chariots were no doubt imitated from Egyptian models, if not actually imported from Egypt. The following description of Egyptian chariots is taken from Sir G. Wilkinson. They appear to have come into use not earlier than the 18th dynasty (B.C. 1530). The war chariot, from which the chariot used in peace did not essentially differ, was extremely simple in its construction. It consisted, as appears both from Egyptian paintings and reliefs, as well as from an actual specimen preserved at Florence, of a nearly semicircular wooden frame with straightened sides, resting posteriorly on the axle-tree of a pair of wheels, and supporting a rail of wood or ivory attached to the frame by leathern thongs and one wooden upright in front. The floor of the car was made of rope network, intended to give a more springy footing to the occupants. The car was mounted from the back, which was open, and the sides were strengthened and ornamented with leather and metal binding. Attached to the off or right-hand side, and crossing each other diagonally were the bow-case, and inclining backwards, the quiver and spear-case. If two persons were in the chariot a second bow-case was added. The wheels, of which there were 2, had 6 spokes: those of peace chariots had sometimes 4, fastened to the axle by a linch-pin secured by a thong. There were no traces; but the horses, which were often of different colours, wore only a breast-band and girths which were attached to the

An Egyptian war-chariot, with bow-cases and complete furniture. (Wilkinson.)

ix. 16, 21, xiii. 7, 14, xviii. 24, xxiii. 30; Is. xxi. 1). The prophets also allude frequently to chariots as typical of power, Ps. xx. 7, civ. 3; Jer. ii. 21; Zech. vi. 1.

Chariots also of other nations are mentioned, as of Assyria (2 K. xix. 23; Ez. xiii. 24), Syria

(2 Sam. viii. and 2 K. vi. 14, 15), Persia (Is. xxii. 6), and lastly Antiochus Eupator is said to have had 300 chariots armed with scythes (2 Mac. xiii. 2).

Egyptian princes in their chariot. (Wilkinson.)

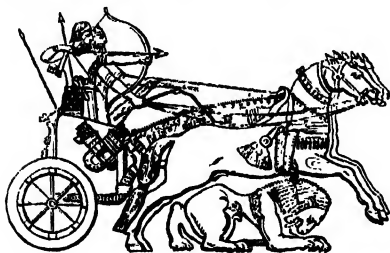

saddle, together with head furniture consisting of cheek pieces, throat-lash, head stall and straps across the forehead and nose. A bearing-rein was fastened to a ring or hook in front of the saddle, and the driving-reins passed through other rings

on each side of both horses. From the central point of the saddle rose a short stem of metal, ending in a knob, whether for use or mere ornament is not certain. The driver stood on the off-side, and in discharging his arrow hung his

whip from the wrist. In some instances the king is represented alone in his chariot with the reins fastened round his body, thus using his weapons with his hands at liberty. Most commonly 2 persons, and sometimes 3 rode in the chariot, of whom the third was employed to carry the state umbrella (2 K. ix. 20, 24; 1 K. xxii. 34; Acts viii. 38). A second chariot usually accompanied the king to battle to be used in case of necessity (2 Chr. xxv. 34).

On peaceable occasions the Egyptian gentleman sometimes drove alone in his chariot attended by servants on foot. The horses wore housings to protect them from heat and insects. For royal personages and women of rank an umbrella was carried by a bearer, or fixed upright in the chariot. Sometimes mules were driven instead of horses, and in travelling sometimes oxen, but for travelling purposes the sides of the chariot appear to have been closed. One instance occurs of a 4-wheeled car, which, like the *τερδικυκλος ἄμαξα* (Herod. ii. 63), was used for religious purposes. [CART.] The processes of manufacture of chariots and harness are fully illustrated by existing sculptures, in which also are represented the chariots used by neighbouring nations (Wilkinson, *Anc. Egypt.* i. p. 368, 386; ii. p. 75, 76, 2nd Ed.).

The earlier Assyrian war chariot and harness did not differ essentially from the Egyptian. Two or three persons stood in the car, but the driver is sometimes represented as standing on the near side, whilst a 3rd warrior in the chariot held a shield to protect the archer in discharging his arrow. The car appears to have had closed sides. The war chariot wheels had 6 spokes; the state or peace chariot 8 or more, and a 3rd person in state-processions carried the royal umbrella. A 3rd horse, like the Greek *παρόρος*, was generally attached (Layard, *Nineveh*, ii. 350).

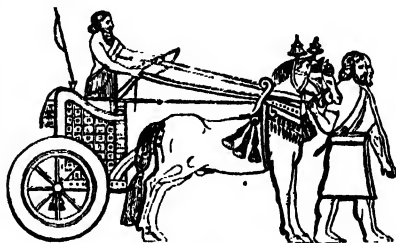

Assyrian chariot.

In later times the 3rd horse was laid aside, the wheels were made higher, and had 8 spokes; and the front of the car, to which the quiver was removed from its former side position, was made square instead of round. The cars were more highly ornamented, panelled, and inlaid with valuable woods and metals, and painted. The embroidered housings in which in earlier times the horses were clothed, were laid aside, and plumes and tassels used to decorate their necks and foreheads. (Layard, *Nineveh*, ii. 353, 356; *Nineveh and Babylon*, 341, 587, 603, 618; *Mon. of Nin.* 2nd series, pl. 24; Ez. xxvii. 30).

The Persian art, as appears from the sculpture at Persepolis, and also at Koyunjik, shows great similarity to the Assyrian; but the procession represented at the former place contains a chariot or car with wheels of 12 spokes, while from the sculptures at the latter, it appears that the Elamites, or

Persians, besides chariots containing 2 persons which were sometimes drawn by 4 horses, used a kind of cart drawn by a single mule or more, consisting of a stage on high wheels capable of holding 5 or 6 persons, of whom the driver sat on a low stool, with his legs hanging on each side of the pole. (Xenoph. *Cyrop.* iv. 3, 1, and 2, §22; Is. xxii. 6; Ez. xxiii. 24; Niebuhr, *Voyage*, ii. 105; Chardin, *Voyage*, viii. 257. Pl. lix.; Layard, *Nin. & Bab.* 447-449; Olearius, *Travels*, p. 302.)

Persian chariot.

Chariots armed with scythes (*ἄμαξα δρεπανόφορα*, Xen. *Anab.* i. 7, §10) may perhaps be intended by the "chariots of iron" of the Canaanites; they are mentioned as part of the equipment of Antiochus (2 Mac. xiii. 2), and of Darius (Diod. Sic. xvii. 53; Appian, *Syr.* 32). Xenophon mentions a Persian chariot with 4 poles and 8 horses (*Cyrop.* vi. 4).

Among the parts of wheeled-carriages mentioned in A. V. are, 1. the Wheels, *אֲרוֹנִים, ἄροες, rotae*; also *גְּלִילִים; τροχοί, rōtae*. 2. Spokes, *רָדִים, radii*. 3. Naves, *בִּיָּים, modiolii*. 4. Felloes, *אֲרָסִים; ψῆτοι; opsiles*. 5. Axles, *רִדּוֹת; χεῖρες; axes*. To put the horses to the carriage, *אָסַף; εὐξῆαι; junxere*; and once (Mic. i. 13), *רָחַם*.

The Persian custom of sacrificing horses to the Sun (Xen. *Cyrop.* viii. 3, 12), seems to have led to offerings of chariots and horses for the same object among the Jewish monarchs who fell into idolatry (Ez. viii. 17; 2 K. xxiii. 11; P. della Valle, xv. ii. p. 255; Winer, *Wagen*). [H. W. P.]

**CHARMIS** (*Χαρμῖς*; Alex. *Χαρμῖς*; *Charmis*), son of Melchiel, one of the three "ancients" (*πρεσβύτεροι*), or "rulers" (*ἄρχοντες*) of Bethulia (Jud. vi. 15, viii. 10, x. 6).

**CHAR'AN** (*Χαρράν*; *Charan*), Acts vii. 2, 4. [HARAN.]

**CHASE.** [HUNTING.]

**CHAS'EBÁ** (*Χασεβά*; *Chasébi*), a name among the list of the "Servants of the Temple" (1 Esd. v. 31), which has nothing corresponding to it in Ezra and Nehemiah, and is probably a mere corruption of that succeeding it—GAZERA.

**CHIEBAR** (*כִּיבָר; Xoḥbār; Chobar*), a river in the "land of the Chaldeans" (Ez. i. 3), on the banks of which some of the Jews were located at the time of the captivity, and where Ezekiel saw his earlier visions (Ez. i. 1, iii. 15, 23, &c.). It is commonly regarded as identical with the Habor (*חֲבֹר*), or river of Gozan, to which some portion of the Israelites were removed by the Assyrians

(2 K. xvii. 6). But this is a mere conjecture, resting wholly upon the similarity of name; which after all is not very close. It is perhaps better to suppose the two streams distinct, more especially if we regard the Habor as the ancient 'Αβόρρας (modern *Khabor*), which fell into the Euphrates at Ciresium; for in the Old Testament the name of Chaldaea is never extended so far northwards. The Chelbar of Ezekiel must be looked for in Babylonia. It is a name which might properly have been given to any great stream (comp. צַבְרָה, *great*). Perhaps the view, which finds some support in Pliny (*H. N.* vi. 26), and is adopted by Bochart (*Phaleg*, i. 8) and Cellarius (*Geograph.* c. 22), that the Chelbar of Ezekiel is the *Nahr Malcha* or Royal Canal of Nebuchadnezzar—the greatest of all the cuttings in Mesopotamia—may be regarded as best deserving acceptance. In that case we may suppose the Jewish captives to have been employed in the excavation of the channel. That Chaldaea, not upper Mesopotamia, was the scene of Ezekiel's preaching, is indicated by the tradition which places his tomb at *Keftil* (Loftus's *Chaldaea*, p. 35). [1. R.]

**CHEBEL** (חֶבֶל), one of the singular topographical terms in which the ancient Hebrew language abounded, and which give so much force and precision to its records. The ordinary meaning of the word *Chebel* is a "rope" or "cord;" and in this sense it frequently occurs both literally (as Josh. ii. 15, "cord;" 1 K. xxx. 31, "ropes;" Is. xxxiii. 23, "tacklings;" Am. vii. 17, "line" and metaphorically (as Eccl. xii. 6; Is. v. 18; Hos. xi. 4). From this it has passed—with a curious correspondence to our own modes of speech—to denote a body of men, a "band" (as in Ps. cxix. 61). In 1 Sam. x. 5, 10, our word "string" would not be inappropriate to the circumstances—"a string of prophets coming down from the high place." Further it is found in other metaphorical senses, arising out of its original meaning (as Job xviii. 10; Ps. xviii. 4; Jer. xiii. 21). From the idea of a measuring-line (Mic. ii. 5), it has come to mean a "portion" or "allotment" (as 1 Chr. xvi. 18; Ps. cv. 11; Ex. xlvii. 13). It is the word used in the familiar passage "the lines" are fallen unto me in pleasant places" (Ps. xvi. 6). But in its topographical sense, as meaning a "tract" or "district," we find it always attached to the region of Argob, which is invariably designated by this, and by no other term (Deut. iii. 4, 13, 14; 1 K. iv. 13). It has been already shown how exactly applicable it is to the circumstances of the case. [Argob.] But in addition to the observations there made, the reader should be referred to the report of the latest traveller in those interesting regions, who abundantly confirms the statements of his predecessors as to the abrupt definiteness of the boundary of the district. (Mr. C. C. Graham, in *Cambridge Essays*, 1858.) No clue is afforded us to the reason of this definite localization of the term *Chebel*; but a comparison of the fact that Argob was taken possession of by Manasseh—a part of the great tribe of Joseph—with the use of this word by that tribe, and by Joshua in his retort, in the very early and characteristic fragment, Josh. xvii. 5, 14 (A. V. "portion"), prompts the suggestion that it may have been a provincialism in use amongst that large

and independent part of Israel. Should this be thought untenable, its application to the "rocky shore" of Argob may be illustrated and justified by its use (Zeph. ii. 5-7; A. V. "coast") for the "coast line" of the Mediterranean along Philistia. In connexion with the sea-shore it is also employed in Josh. xix. 29.

The words used for *Chebel* in the older versions are σχολινισμα, περιμετρον, περιχωρον; *regio*, *funiculus*. [G.]

**CHEDORLAOMER** (כְּדֻרְלָאוֹמֶר; Χεδωρλαομορ; *Chudorlahomor*), a king of Elam, in the time of Abraham, who with three other chiefs made war upon the kings of Sodom, Gomorrah, Admah, Zeboim, and Zoar, and reduced them to servitude. For twelve years he retained his hold over them; in the thirteenth they rebelled; in the next year, however, he and his allies marched upon their country, and after defeating many neighbouring tribes, encountered the five kings of the plain in the vale of Siddim. He completely routed them; slew the kings of Sodom and Gomorrah, and carried away much spoil, together with the family of Lot. Chedorlaomer seems to have perished in the rescue, which was effected by Abraham upon hearing of the captivity of his nephew (Gen. xiv. 17). According to Gesenius, the meaning of the word may be "handful of sheaves, from كَدْر, *handful* and لَوּ, *sheaf*;" but this is unsatisfactory. The name of a king is found upon the bricks recently discovered in Chaldaea, which is read *Kudur-mupula*. This man has been supposed to be identical with Chedorlaomer, and the opinion is confirmed by the fact that he is further distinguished by a title which may be translated "Ravager of the west." "As however one type alone of his legends has been discovered," says Col. Rawlinson, "it is impossible to pronounce at present on the identification. The second element in the name 'Chedorlaomer' is of course distinct from that in 'Kudur-mupula.' Its substitution may be thus accounted for. In the names of Babylonian kings the latter portion is often dropped. Thus *Shalmaneser* becomes *Shalman* in Hosea; *Merodach-baladan* becomes *Merodach*, &c. *Kudur-mupula* might therefore become known as *Kudur* simply. The epithet 'el Ahmar,' الأحمر, which means the

Red, may afterwards have been added to the name, and may have been corrupted into Laomer, which, as the orthography now stands, has no apparent meaning. *Kedar-el-Ahmar*, or 'Kedar the Red,' is in fact a famous hero in Arabian tradition, and his history bears no inconsiderable resemblance to the Scripture narrative of Chedorlaomer. It is also very possible that the second element in the name of Chedorlaomer, whatever be its true form, may be a Semitic translation of the original Hamite term *mupula*." "Chedorlaomer may have been the leader of certain immigrant Chaldean Elamites who founded the great Chaldean empire of Berosus in the early part of the 20th century B.C., while Amraphel and Arioch, the Hamite kings of Shinar and Ellasar, who fought under his banner in the Syrian war as subordinate chiefs, and Tidal, who led a contingent of Median Scythians belonging to the old population, may have been the local governors who

\* The use of the word in this sense in our own idiomatic expression—"hard lines"—will not be forgotten. Other correspondences between *Chebel* as applied to

measurement, and our own words "rod," and "chain," and also "cord," as applied in the provinces and colonies, to solid measure of wood, &c., are obvious

had submitted to his power when he invaded Chaldean" (Rawlinson's *Herod.*, i. 436, 446). [S. L.]

**CHEESE** is mentioned only three times in the Bible, and on each occasion under a different name in the Hebrew: (1.) **בִּינָה**, from **בָּנָה**, to *curdle* (Job x. 10), referred to, not historically, but by way of illustration: (2.) **חֶרֶץ**, from **חָרַץ**, to *cut* (*τροφαλίδες τοῦ γάλακτος*, LXX.; *formellae casei*, Vulg., 1 Sam. xvii. 18); the Chaldee and Syriac give **נִבְנָה**; Hesychius explains *τροφαλίδες* as *τμήματα τοῦ ἀπαλοῦ τυροῦ*: (3.) **שֶׁפֹת בָּקָר**, from **שָׁפַת**, to *scrape* (*Σαφὸς βοῶν*, LXX.; *cheese of kine*, A. V. 2 Sam. xvii. 29: the Vulgate, following Theodotion's rendering, *γαλαθηνὰ μωσχάρια*, gives *pingues vitulos*, guided by the position of the words after "sheep"; the Targum and other Jewish authorities, however, identify the substance with those mentioned above). It is difficult to decide how far these terms correspond with our notion of *cheese*; for they simply express various degrees of coagulation. It may be observed that cheese is not at the present day common among the Bedouin Arabs, butter being decidedly preferred; but there is a substance, closely corresponding to those mentioned in 1 Sam. xvii.; 2 Sam. xvii., consisting of coagulated buttermilk, which is dried until it becomes quite hard, and is then ground: the Arabs eat it mixed with butter (Burckhardt, *Notes on the Bedouins*, i. 60). In reference to this subject, it is noticeable that the ancients seem generally to have used either butter or cheese, but not both: thus the Greeks had in reality but one expression for the two, for *βοῦτυρον* = *βοῦς*, *τυρός*, "cheese of kine:" the Romans used cheese exclusively, while all nomad tribes preferred butter. The distinction between cheese proper, and coagulated milk, seems to be referred to in Pliny, xi. 96. [W. L. B.]

**CHE' LAL** (**כֶּלֶל**; *Χαλήλ*; *Chalul*), Ezr. x. 30.

**CHELO'AS** (*Χελκίας*, i. e. **חֶלְקִיָּה**, the portion of the Lord, HILKIAH; *Helcias*), the father of Susanna (*Hist. of Sus.* 2, 29, 63.). Tradition (Hippol. in *Susann.* i. 689, ed. Migne) represents him as the brother of Jeremiah, and identical with the priest who found the copy of the law in the time of Josiah (2 K. xxii. 8). [B. F. W.]

**CHEL'LIANS, THE** (Jud. ii. 23). [CHELIANS.]

**CHEL'LUH** (**כֶּלְחָה**, Keri, **כֶּלְחוּ**; *Χελκία*; *Chelias*), Ezr. x. 35.

**CHEL'LUS** (*Χελλούς*; Alex. *Χελούς*; Vulg. omits), named amongst the places beyond (i. e. on the west of) Jordan to which Nabuchodonosor sent his summons (Jud. i. 9). Except its mention with "Kades" there is no clue to its situation. Reland (*Pal.* 717) conjectures that it may be *Chalutza*, **חֶלְצָה**, a place which, under the altered form of *Elusai*, was well known to the Roman and Greek geographers. With this agrees the subsequent mention of the "land of the Chellians" (*τῆς Χελλαιῶν, terra Cellon*), "by the wilderness," to the south of whom were the children of Ishmael (Jud. ii. 23). [G.]

**CHEL'LOD** (*Χελεσθός*; Alex. *Χελεσθός*; Vulg. omits). "Many nations of the sons of Chelod" were among those who obeyed the summons of Nabuchodonosor to his war with Arphaxad (Jud. i.

6). The word is apparently corrupt. Simois suggests *Χάλων*, perh. Ctesiphon. Ewald conjectures it to be a nickname for the Syrians, "sons of the moles" **חֶלְר** (*Gesch.* iv. 543).

**CHEL'LUB** (**כֶּלְלֹב**). 1. A man among the descendants of Judah, described as the brother of Shuah and the father of Mechir. (In the LXX. the name is given as Caleb, *Χαλέβ*, the father of Ascha; the daughter of the well-known Caleb was Achsah; Vulg. *Caleb*.)

2. (*δὲ Χελούβ*, *Chelub*). Ezri the son of Chelub was the overseer of those who "did the work of the field for tillage of the ground," one of David's officers (1 Chr. xxvii. 26).

**CHEL'UBAI** (**כֶּלְיָבִי**; *δὲ Χαλέβ*; *Caleb*), the son of Hezron, of one of the chief families of Judah. The name occurs in 1 Chr. ii. 9 only, and from a comparison of this passage with ii. 18 and 42, it would appear to be but another form of the name Caleb. It is worth noting that, while in this passage Jerahmeel is stated to be a brother of Chelubai, it appears from 1 Sam. xxvii. 10 that the Jerahmeelites were placed on the "south of Judah," where also were the possessions of the house of Caleb (Judg. i. 15; 1 Sam. xiv. 3, xxx.

14). In the Syriac Vers. the name is **ܫܠܚܒ**, *Salci*; probably a transcriber's error for **ܫܠܚܒ**, *Celubi* (Burrington, i. 209). [G.]

**CHEMOSH** (**כִּמּוֹשׁ**; *Χαμός*; *Chamos*), the national deity of the Moabites (Num. xxi. 29; Jer. xlviii. 7, 13, 46). In Judg. xi. 24, he also appears as the god of the Ammonites: he must not, however, be identified with Molech. Solomon introduced, and Josiah abolished, the worship of Chemosh at Jerusalem (1 K. xi. 7; 2 K. xxiii. 13). With regard to the meaning of the name, and the position which Chemosh held in mythology, we have nothing to record beyond doubtful and discordant conjectures. Jerome (*Comm.* in Is. xv. 2) identifies him with Baal-Peor; others with Baal-Zebub, on etymological grounds; others, as Gesenius (*Thesaur.* 693), with Mair, or the god of war, on similar grounds; and others (Beyer ad *Schlem*, p. 323) with Saturn, as the star of ill omen, Chemosh having been worshipped, according to a Jewish tradition, under the form of a black star. Jerome (on Is. xv.) notices Dibon as the chief seat of his worship. [W. L. B.]

**CHENA'ANAH** (**כְּנַעְנָה**; *Χανανή*; *Chanannah*; according to Gesen. fem. of CANAAN. 1. Son of Bilhan, son of Jediel, son of Benjamin, head of a Benjamite house (1 Chr. vii. 10), probably of the family of the Belaites. [BELA.]

2. Father, or ancestor, of Zedekiah, the false prophet who made him horns of iron, and encouraged Ahab to go up against Ramoth-Gilead, and smote Micajah on the cheek (1 K. xxii. 11, 24; 2 Chr. xviii. 10, 23). He may be the same as the preceding. [A. C. H.]

**CHEN'ANI** (**כְּנַנִּי**; *Χανανί*; Alex. *Χανανί*; et *Chanani*), one of the Levites who assisted at the solemn purification of the people under Ezra (Neh. ix. 4 only). By the LXX. the word *Bani* (**בְּנֵי**) preceding is read as if meaning "sons"—"sons of Chenani." The Vulgate and A. V. adhering to the Masoretic pointing, insert "and."

**CHENANIAH** (חנניה; *Χωνεβια, Χωνεβιας*; *Chonenias*), chief of the Levites, when David carried the ark to Jerusalem (1 Chr. xv. 22, xvi. 29). In 1 Chr. xv. 27, his name is written חנניה.

**CHE'PHAR-HAAM'MONAI** (כפר העמון; *Καφαρὰ καὶ Κεφὶρὰ καὶ Ἰμαμὼν*; Alex. *Καφηραμουν*; *Villa Emma*), a place mentioned among the towns of Benjamin (Josh. xviii. 24). No trace of it has yet been discovered, but in its name is doubtless preserved the memory of an incursion of the Ammonites up the long ravines which lead from the Jordan valley to the highlands of Benjamin. [G.]

**CHEPHIRAH** (כִּפְרָה), with the definite article, except in the later books,—“the hamlet;” *Χεφειρά, Κεφειρά*; *Caphira, Caphara*, one of the four cities of the Gibeonites (Josh. ix. 17), and named afterwards among the towns of Benjamin, with Ramah, Beeroth, and Mizpeh (xviii. 26). The men of Chephirah returned with Zerubbabel from Babylon (Ezr. ii. 25; Neh. vii. 29). The Samaritan Version, at Gen. xlii. 3, renders Hai (Ai) by *Cephrah*, כִּפְרָה; but this cannot be Chephirah, since both Ai and it are mentioned together in Josh. ix. (comp. 3 with 17), and in the lists of Ezra and Nehemiah already quoted. And indeed Dr. Robinson seems to have discovered it under the scarcely altered name of *Kefir*, in the mountain-country on the western confines of Benjamin, about 2 miles west of *Yalo* (Ajalon) (Rob. iii. 146). [CAPIRA.]

**CHE'ERAN** (כָּרַן; *Χαρῶν*; *Charon*), one of the sons of Dishon (so A. V., but Hebrew is Dishan), the Horite “duke” (Gen. xxvi. 26; 1 Chr. i. 41). No name corresponding with this has yet been discovered amongst the tribes of Arabia.

**CHE'REAS** (Χαρίας; *Chareas*), a brother of Timotheus, the leader of the Ammonites against Judas Macc. (1 Macc. v. 6), who held *Gazara* (Jazar, 1 Macc. v. 8), where he was slain on the capture of the fortress by the Jews (2 Macc. x. 32, 37.). [B. F. W.]

**CHE'RETHIMS** (כִּרְתִּים), Ez. xxv. 16. The plural form of the word elsewhere rendered *CHE-RETHITES*; which see. The Hebrew word occurs again in Zeph. ii. 5; A. V. “Cherethites.” In these passages the LXX. render Cietans, and the Vulgate by Palestinai and Philistines (*Κηρες*; Alex. *κπρας σιδωνος*; *Palaestini, Philistini*).

**CHERETHITES AND PELETHITES** (כִּרְתִּי וּפְלִתִי; *Χερεθι καὶ Φελεθι*; *Σωματοφύλακες*, Joseph. *Ant.* vii. 5, §4; *Cereth et Phelthi*), the life-guards of King David (2 Sam. xviii. 18, xv. 18, xx. 7, 23; 1 K. i. 38, 44; 1 Chr. xviii. 17). These titles are commonly said to signify “executioners and couriers” (*ἑγχεφοροι*) from כִּרְת, *to slay*, and פִּלַת, *to run*. It is plain that these royal guards were employed as executioners (2 K. xi. 4), and as couriers (1 K. xiv. 27). Similarly Potiphar was captain of the guard of Pharaoh, and also chief of the executioners (Gen. xxxvii. 36), as was Arioch, Nebuchadnezzar's officer (Dan. ii. 14). In the latter part of David's reign the Cherethites and Pelethites were commanded by Benaiah (2 Sam. viii. 18, xx. 23, xxiii. 23). But it has been conjectured that

the royal body-guards may have been foreign mercenaries, like the Pope's Swiss guards. They are connected with the Gittites, a foreign tribe (2 Sam. xv. 18); and the Cherethites are mentioned as a nation (1 Sam. xxx. 14), dwelling apparently on the coast, and therefore probably Philistines, of which name Pelethites may be only another form. [R. W. B.]

**CHE'RITH, THE BROOK** (נַחַל כְּרִית; *Χερυθὶς ποταμὸς*; *torrens Carith*), the torrent-bed or wady—to use the modern Arabic word which exactly answers to the Hebrew *Nahal*—in (not “by,” as the translators of the A. V. were driven to say by their use of the word “brook”) which Elijah hid himself during the early part of the three years' drought (1 K. xvii. 3, 5). No further mention of it is found in the Bible, and by Josephus (*Ant.* viii. 13, §2) it is spoken of merely as *Χερυθὸς ῥις*.

The position of the Cherith has been much disputed. The words of the passage unfortunately give no clue to it:—“get thee hence (i. e. apparently from the spot where the interview with Ahab had taken place, and which may or may not be Samaria), and turn thy face eastward (מִזְרָחָה), and hide thee in the torrent Crith, which is facing (עַל פְּנֵי) the Jordan.” The expression “facing the Jordan,” which occurs also in verse 5, seems simply to indicate that the stream in question ran into that river and not into either the Mediterranean or the Dead Sea. Josephus, as we have seen, does not name the torrent, and he says that Elijah went, not “eastward,” but towards the south—*εἰς τὰ πρὸς νότον μέρη*. Eusebius and Jerome on the other hand (*Onomasticon*, Chorath) place the Cherith beyond Jordan, where also Schwarz (51) would identify it in a *Wady Alius*, opposite Beth-Jean. This is the *Wady el-Yabis* (Jabesh), which Benj. Tudela says is a corruption of *וַאֲדַר אֶלְיָא* (ii. 408; Asher). The only tradition on the subject is one mentioned by Mainus Sanutus in 1321; that it ran by Phasaelus, Herod's city in the Jordan valley. This would make it the *Am Fusuil* which falls from the mountains of Ephraim into the *Uhôr*, south of *Kurn Sûrtabeh*, and about 15 miles above Jericho. This view is supported by Bachiene, and in our own time by Van de Velde (ii. 310). The spring of the brook is concealed under high cliffs and under the shade of a dense jungle (V. de Velde, *Memoir*, 339). Dr. Robinson on the other hand would find the name in the *Wady Kelt* (كَلْت), behind Jericho. The two names are however so essentially unlike,—not so much in the change of the *Cuph* to *Kuph*, and *Kesh* to *Lim*, both of which are conceivable, as in the removal of the accent from the end in *Crith* to the beginning in *Kelt*,—that this identification is difficult to receive, especially in the absence of any topographical grounds. (See the same doubt expressed by Winar, *Cherith*.)

The argument from probability is in favour of the Cherith being on the east of Jordan, of which Elijah was a native, and where he would be more out of Ahab's reach than in any of the recesses of the mountains of Ephraim or Benjamin. With increased knowledge of that part of the country, the name may possibly be discovered there. [G.]

**CHERUB** (כְּרֻב; *Χερούβ; Χαρούβ; Cherub*), apparently a place in Babylonia from which some persons of doubtful extraction returned to Judaea

with Zerubbabel (Ezr. ii. 59; Neh. vii. 61). In the parallel list of 1 Esdr. v. this name, with the next, Adnan, seems to be corrupted to CHARAATH-ALAN.

CHER'UB, CHER'UBIM (כְּרֻב, plur.

כְּרֻבִים, or, as mostly in Pentateuch, כְּרָבִים, χερούβ, χερουβίμ). The symbolical figure called was a composite creature-form, which finds

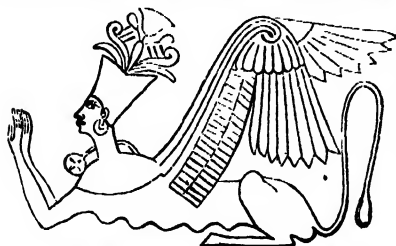

Fig. 1. The winged female sphinx. (Wilkinson.)

parallel in the religious insignia of Assyria, Egypt, and Persia, e. g. the sphinx, the winged bulls and lions of Nineveh, &c., a general prevalence which

Fig. 2. An Egyptian winged animal. (Wilkinson.)

prevents the necessity of our regarding it as a mere adoption from the Egyptian ritual. In such forms (comp. the Chimæra of Greek and the Griffin of north-eastern fables) every imaginative people has sought to embody its notions either of the attributes of Divine essence, or of the vast powers of nature which transcend that of man. In the various legends of Hercules the bull and the lion constantly appear as forms of hostile and evil power; and some of the Persian sculptures apparently represent evil genii under similar quasi-cherubic forms. The Hebrew idea seems to limit the number of the cherubim. A pair (Ex. xxv. 18, &c.) were placed on the mercy-seat of the ark; a pair of colossal size<sup>a</sup> overshadowed it in Solomon's Temple with the canopy of their contiguously extended wings. Ezekiel, i. 4-14, speaks of four,<sup>b</sup> and similarly the apocalyptic *ῥῶα* (Rev. iv. 6) are four. So at the front or east of Eden were posted "the cherubim," as though the whole of some recognised number. They utter no voice, though one is "heard from above them," nor have dealings with men save to awe and repel. A "man clothed in linen" is introduced as a medium of communication between

them and the prophet, whereas for a similar office one of the Seraphim personally officiates; and these latter also "cry one to another." The cherubim are placed beneath the actual presence of Jehovah, whose moving throne they appear to draw (Gen. iii. 24; Ezr. i. 5, 25, 26, x. 1, 2, 6, 7; Is. vi. 2, 3, 6). The expression, however, "the chariot" (מִרְכָּבָה) of the cherubim" (1 Chr. xxviii. 18) does not imply wheels, but the whole apparatus of ark and cherubim is probably so called in reference to its being carried on staves, and the words "chariot" and "cherubim" are in apposition. So a sedan might be called a "carriage," and מִרְכָּב is used for the body of a litter. See, however, Dorjén, *De cherub. Sanct.* (ap. Ugolini, vol. viii.), where the opposite opinion is ably supported. The glory symbolising that presence which eye cannot see rests or rides on them, or one of them, thence dismounts to the temple threshold, and then departs and mounts again (Ezr. x. 4, 18; comp. ix. 3; Ps. xviii. 10). There is in them an entire absence of human sympathy, and even on the mercy-seat they probably appeared not merely as admiring and wondering (1 Pet. i. 12), but as guardians of the covenant and avengers of its breach. A single figure there would have suggested an idol, which two, especially when represented regarding something greater than themselves, could not do. They thus became subordinate, like the supporters to a shield, and are repeated, as it were the distinctive badges of divine heraldry,—the mark, carved or wrought, everywhere on the house and furniture of God (Ex. xxv. 20; 1 K. vi. 29, 35, vii. 29, 36).

Those on the ark were to be placed with wings stretched forth, one at each end of the mercy-seat, and to be made "of the mercy-seat," which Abrahanel (Spencer, *de leg. Heb. ritual.* iii. diss. v.) and others interpret of the same mass of gold with it, viz. wrought by hammering, not cast and then joined on. This seems doubtful, but from the word מִכְשֶׁתֶּת, the solidity of the metal may perhaps be inferred. They are called χερουβίμ θεῶν (Heb. ix. 5), as on them the glory, when visible, rested;

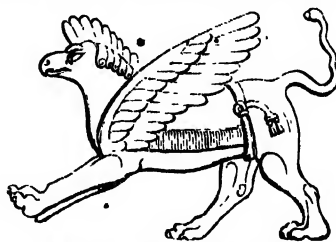

Fig. 3. Assyrian Griffin. (Layard, ii 45b.)

but, whether thus visibly symbolized or not, a perpetual presence of God is attributed to the Holy of Holies. They were anointed with the holy oil, like the ark itself, and the other sacred furniture. Their wings were to be stretched upwards, and their faces

<sup>a</sup> It is perhaps questionable whether the smaller cherubim on the mercy-seat were there in Solomon's temple, as well as the colossal overshadowing ones. That they were on the ark when brought from Shiloh to the battle seems most likely; and it is hardly consistent with the reverential awe shown in the treatment of the ark, even by the enemy, to suppose that

they could have been lost in the course of its wanderings (see ARK OF COVENANT); still, the presence of the two pairs together seems hardly consistent and appropriate.

<sup>b</sup> The number four was one of those which were sacred among the Jews, like seven, and forty (Bähr, *De Symbol.*).

"towards each other and towards the mercy-seat." It is remarkable that with such precise directions as to their position, attitude and material, nothing save that they were winged, is said concerning their shape.

Fig. 4. Assyrian winged bull. (Lagarde, *Nin. and Bab.*, 276.)

Was this shape already familiar, or kept designedly mysterious? From the fact that cherubim were blazoned on the doors, walls, curtains, &c., of the house, and from the detailed description of shapes by Ezekiel, the latter notion might be thought absurd. But if the text of Ezekiel, and the carvings, &c., of the temple had made them popular, Josephus could not possibly have said (*Ant.* viii. 3, §3) *τὰς δὲ χερουβείμ οὐδὲς ὁμοίαν τινος ἔχειν οὐδ' εἰκόσαι δύναται*. It is also remarkable that Ez. i. speaks of them as "living creatures" (*חַיִּים, חַיִּים*), under mere animal forms. Into which description in ch. x. 14, the remarkable expression, "the face of a cherub," is introduced, and the prophet concludes by a reference

\* The "cherubim, lions, and oxen," which ornamented certain utensils in the temple (1 K. vii. 29), are probably all to be viewed as cherubic insignia, the former of composite form, the latter of simple.

† Schoetgen, *Hor. Hebr. ad Apoc.* iv. 3, quotes Pirke, *Rab. Eliezer*, "Ad quatuor pedes (throni) sunt quatuor animalia quorum unum quodque quatuor facies et tot alas habet. Quando Deus loquitur ab oriente tunc id fit inter duos cherubinos facie hominis, quando Deus loquitur a meridie, tunc id fit inter duos cherubinos facie leonis," &c.

\* Bähr, *Symbolik*, vol. i. p. 313-4 (whose entire remarks on this subject are valuable and often profound), inclines to think that the precise form varied within certain limits; e. g. the cherubic figure might have one, two, or four faces, two or four feet, one or two pair of wings, and might have the bovine or leonine type as its basis; the imagery being modified to suit the prominently intended attribute, and the

to his former vision, and an identification of those creatures with the cherubim—(v. 20) "I knew that they were cherubim." On the whole it seems likely that the word "cherub" meant not only the composite creature-form, of which the man, lion, ox, and eagle were the elements, but, further, some peculiar and mystical form, which Ezekiel, being a priest, would know and recognise as "the face of a cherub," *κατ' εἶδος*; but which was kept secret from all others; and such probably were those on the ark, which, when it was moved, was always covered [ARK OF COVENANT], though those on the hangings and panels might be of the popular device.\* What this peculiar cherubic form was is perhaps an impenetrable mystery. It was probably believed popularly to be something of the bovine type (though in Ps. cvi. 20 the notion appears to be marked as degraded): so Spencer (*de leg. Hebr. rit.* iii. diss. 5. 4. 2) thinks that the ox was the *forma principum*, and quotes Grotius on Ex. xxv. 18; Bochart, *Hierozoic.* p. 87, ed. 1690. Hence the "golden calf." The symbolism of the visions of Ezekiel is more complex than that of the earlier Scriptures, and he certainly means that each composite creature-form had four faces so as to look four ways at once, was four-sided<sup>†</sup> and four-winged, so as to move with instant rapidity in every direction without turning, whereas the Mosaic idea was probably single-faced, and with but one pair of wings. Ezekiel adds also the imagery of the wheels—a mechanical to the previous animal forms. This might typify inanimate nature revolving in a fixed course, informed by the spiritual power of God. The additional symbol of being "full of eyes" is one of obvious meaning.

This mysterious form might well be the symbol of Him whom none could behold and live. For as symbols of Divine attributes, e. g. omnipotence and omniscience, not as representations of actual beings (Clem. Alex. *Strom.* v. p. 241), the cherubim should be regarded.<sup>‡</sup> Philo indeed assigns a varied signification to the cherubim: in one place he makes them allegories of the beneficent and avenging energies of God; in another, of the two hemispheres of the then astronomical system, one of which supported the planets and the other the fixed stars; elsewhere, of power and goodness simply. They are symbolical in Gen. iii. 24, just as the serpent is a symbol in iii. 1-14, though functions and actions are attributed to each. When such symbolical forms have become conventional, the next step is to literalise them as concrete shapes of real beings. The *Gen* of Rev. iv. 6-8 are related both to the cherubim and to

highest forms of creature-being expressing best the highest attributes of the Creator. Thus he thinks the human form might indicate spirituality (p. 340). (Comp. Grot. on Exod. xxv. 18, and Heb. ix. 5.) Some useful hints as to the connexion of cherubic with other mythological forms may be found in Kreuzer, *Symbol.* i. 441, 540.

† In Ex. xxviii. 14, 16, the Tyrian king is addressed as the "anointing cherub that covereth." This seems a mistake in the A. V., arising from a confusion of *מְשִׁיחַ*, which means "stretched out" (Vulg. *cherub extensus*), from *מָשַׁח*, Aram. *to extend*, with some word from *מָשַׁח*, *to anoint*. The notion is borrowed no doubt from the "extended" attitude of the cherubim of the sanctuary, "covering" the ark, &c., with their wings. So the king should have been the guardian of the law.

the semphim of prophecy, combining the symbols of both. They are not stern and unsympathising like the former, but invite the seer to "come and see;" nor like the latter do they cover their face (Is. vi. 2) from the presence of deity, or use their wings to speed on his errands, but, in a state of rest and praise, act as the *choregi* of the heavenly host. And here, too, symbolism ever sliding into realism, these have been diversely construed, e. g. as the four evangelists, four archangels, &c.

Many etymological sources for the word כְּרֻב have been proposed. The two best worth noticing, and between which it is difficult to choose are, (1) the Syriac כְּרֻב, *great, strong* (Gesen. s. v.; comp. Philo de profugis, p. 465). The fact that all the symbols embody various forms of strength, the lion among wild, and the ox among tame beasts, the eagle among birds, the man as supreme over all nature, is in favour of this; (2) the Syriac כְּרֻב, *to plough*, i. e. *to cut*

into; hence Arab. كَرْب, *sculpt*; and here a doubt occurs whether in the active or passive sense, "that which ploughs" = the ox (comp. כֶּקֶר, "ox," from same word in Arab. "to plough"), which brings us to the *forma praeicipua* of Spencer; or, that which is carved = an image. In favour of the latter is the fact that כְּרֻב is rabbinical for "image" generically (Simonis, Bouget, and Pagninus, *Lex. s. v.*), perhaps as the only image known to the law, all others being deemed forbidden, but possibly also as containing the true germ of meaning.<sup>8</sup> Besides these two wisdom or intelligence has been given by high authority as the true meaning of the name (Jerome on Is. vi. 2); so Philo de Vit. Mos. 688—ὡς δ' αὖ ἐλ-  
ληνες εἰποῖεν ἐπίγνωσις καὶ ἐπιστήμη πολλή; and Clem. Alex. Strom. v. 240—ἰθὺς δὲ τὸ ὄνομα τῶν χερουβὶμ δηλοῦν αἰσθησιν πολλήν.

Though the exact form of the cherubim is uncertain, they must have borne a general resemblance to the composite religious figures found upon the

monuments of Egypt, Assyria, Babylonia, and Persia. The first two figures are winged creatures from the Egyptian monuments. The next three are taken from Assyrian sculptures. No. 5

Fig. 5. Assyrian sphinx. (Layard, ii. 248.)

represents the griffin of Northern fable, as we see from the griffin found as an ornament in Scythian tombs, but drawn by Grecian artists. In the sacred boats or arks of the Egyptians,

Fig. 6. A Grecian griffin.

there are sometimes found two figures with extended wings, which remind us of the description of the cherubim "covering the mercy-seat with

<sup>8</sup> The griffin of Northern fable watching the gold in the wilderness has (see above) been compared with the cherub, both as regards his composite form, and his function as the guardian of a treasure. The "watchful dragon" of the Hesperides seems perhaps a fabulous reflex of the same, where possibly the "serpent" (δράκων) may, by a change not uncommon in myth, have taken the place of the "cherubim." The dragon and the bull have their place also in the legend of the golden fleece. There is a very near resem-

blance too between the names γρηϋ- (with ε affirmative) and כְּרֻב; and possibly an affinity between γρηϋ- and the Greek forms γρηϋω, γρηϋω, γρηϋα, γλαφύρος (cf. Germ. *graben*), all related to carving, as between כְּרֻב and the Syriac and Arab. words signifying *carved, sculpted*, &c., as above. We have another form of the same root probably in *εἰρηβίς*, the block or tablet on which the laws were engraved.

their wings, and their faces [looking] one to another" (Ex. xxv. 20). [H. H.]

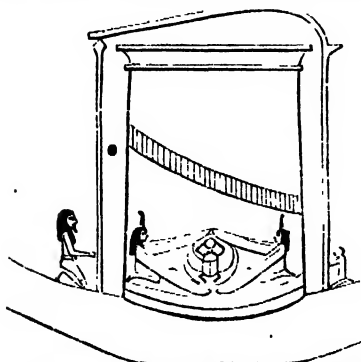

Fig. 7. A sacred Egyptian boat or ark, with two figures perhaps resembling cherubim. (Wilkinson.)

**CHE'SALON** (כֶּסֶלֹן; Χασάλων; *Cheston*), a

place named as one of the landmarks on the west part of the north boundary of Judah, apparently situated on the shoulder (A. V. "side") of Mount Jearim (Josh. xv. 10). The name does not, however, reappear in the list of towns of Judah later in the same chapter. Mount Jearim, the "Mount of Forests," has not necessarily any connexion with Kirjath Jearim, though the two were evidently, from their proximity in this statement of the boundary, not far apart. Chesalon was the next landmark to Bethshemesh, and it is quite in accordance with this that Dr. Robinson has observed a modern village named *Kesla*, about six miles to the N.E. of *Am-shems*, on the western mountains of Judah (Rob. ii. 30 note; iii. 154). Eusebius and Jerome, in the *Onomasticon*, mention a 'Chalon, but they differ as to its situation, the former placing it in Benjamin the latter in Judah: both agree that it was a very large village in the neighbourhood of Jerusalem. The meaning of the name is thought by Professor Stanley, like Chesulloth, to have reference to its situation on the "loins" of the mountain. [G.]

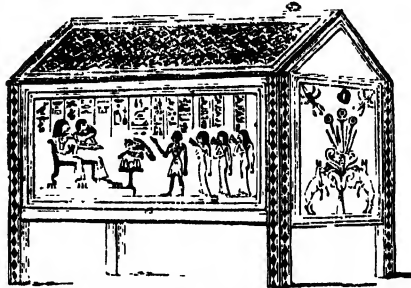

**CHE'SED** (כֶּסֶד; Χαΐδδ; *Cased*), fourth son of Nahor (Gen. xxi. 22). [CHALDEA, p. 292.]

**CHE'SIL** (כֶּסִּיל; Βαιθήλα; Alex. Χασέλ; *Cesil*), a town in the extreme south of Palestine, named with Hormah and Ziklag (Josh. xv. 30). The name does not occur again, but in the list of towns given out of Judah to Simeon, the name **BETHUL** occurs in place of it (ix. 4), as if the one were identical with, or a corruption of, the other. This is confirmed by the reading of 1 Chr. iv. 30, **BETHUEL**—by that of the LXX. as given above, and by the mention in 1 Sam. xxx. 27 of a Bethel among the cities of the extreme south. In this case we can only conclude that כֶּסִּיל was an early variation of כֶּסֶלֹן. [G.]

**CHEST.** By this word are translated in the A. V. two distinct Hebrew terms: 1. אָרֹן or אֲרֹן, from אָרַן to gather; *κισσός*; *guzophylacium*.

\* Possibly referring to the village now *Beit Iksa*, between Jerusalem and *Nebi Samoil*, and therefore in Benjamin.

This is invariably used for the Ark of the Covenant, and, with two exceptions, for that only. It is instructive to be reminded that there is no connexion whatever between this word and that for the "ark" of Noah, and for the "ark" in which Moses was hid among the flags (both אֲרֹכָה, *Tubah*). The two exceptions alluded to are (a) the "coffin" in which the bones of Joseph were carried from Egypt (Gen. l. 26; rendered in the Targ. Ps. Jon. by γλῶσσο-κομος—comp. John xii. 6—in Hebrew letters: the reading of the whole passage is very singular); and (b) the "chest" in which Jehoiada the priest collected the alms for the repairs of the Temple (2 K. xii. 9, 10; 2 Chr. xxiv. 8-11). Of the former the following wood-cut is probably a near representation. 2. צְנִיִּים, "chests," from צָנַן, to hoard (Ex. xxvii. 24 only): A. V. "chests," [G.]

Egyptian chest or box from Thebes (Wilkinson)

**CHESTNUT-TREE** (עֵץ מֶלֶךְ; πλάτανος; *platanus*), a tree mentioned in Gen. xxx. 37, as one of those from which Jacob took rods and pilled them to set before the flocks; and in Ez. xxxi. 8, as one of the trees to which the Assyrian empire in its strength and beauty is likened. These are the only two passages in which the word occurs. The authority for the rendering of the "A. V. is doubtful; and *plane-tree* (*Platanus orientalis* of Linnaeus) would probably be nearer the truth, for the plane is of common growth in Palestine. (See Cels. *Hiarob.* i. 513.) Moreover the etymology of the word connects it with עָרַם, "to be naked," and with

Arab. عرِمَ, "to strip off bark"—the shedding of its bark yearly being characteristic of the plane-tree. (See Hiller in *Hierophyt.* i. 402.) [W. D.]

**CHESUL/LOTH** (with the definite article, הַכֶּסֶלֹת; Χασαλόθ; *Cusaloth*), one of the towns of Issachar, meaning in Hebrew "the loins," and therefore, perhaps, deriving its name from its situation on the slope of some mountain (Josh. xix. 18. See the quotation from Jarchi in Kim's *Joshua*, 338). From its position in the lists it appears to be between Jezreel and Shunem (*Solum*), and, therefore, not far enough north to be the *Iksdi* mentioned by Robinson (ii. 332) or the place noted by Eusebius and Jerome under *Achaseluth*, *Ἀχασέλωθ*, in the *Onomasticon*. [G.]

**CHE'ZIB** (כֶּזִּיב; Sam. Cod. כִּזְבָּה; Sam. Vers. כִּזְבָּה; Χασζι; Vulg. translating, *quo nato parere ultra cessavit*, and comp. a similar translation by Aquila, in *Jer. Qu. Hebr.*), a name which occurs but

once (Gen. xxxviii. 5). Judah was at Chezib when the Canaanitess Bathsheba bore his third son Shelah. The other places named in this remarkable narrative are all in the low country of Judah, and, therefore, in the absence of any specification of the position of Chezib, we may adopt the opinion of the interpreters, ancient and modern, who identify it with ACHZIB (אֲחִזִּיב). It is also probably identical with CHOZEBA.

[G.]

**CHID'ON** (חִידוֹן; LXX. Vat. omits; Alex. *Xeídon*; *Chidon*), the name which in 1 Chr. xlii. 9 is given to the threshing-floor at which the accident to the ark, on its transport from Kirjath-jearim to Jerusalem, took place, and the death of Uzzah. In the parallel account in 2 Sam. vi. the name is given as Nachon. The word Chidon signifies a "javelin;" Nachon, "prepared" or "firm." Whether there were really two distinct names for the same spot, or whether the one is simply a corruption or alteration of the other is quite uncertain (see Gen. Thes. 683; Simonis, *Onom.* 339-40). Josephus (*Ant.* vii. 4, §2) has *Xeídon*. The Jewish tradition (Jerome, *Quaest. Heb.* on 1 Chr. xi. 9) was that Chidon acquired its name from being the spot on which Joshua stood when he stretched out the weapon of that name (A. V. "spear") towards Ai (Josh. viii. 18). But this is irreconcilable with all our ideas of the topography of the locality. [G.]

**CHILDREN** (בָּנִים; *tékna, παῖδα; liberi, filii*. From the root בָּנָה, *to build*, are derived both בֶּן, *son*, as in Ben-hanan, &c., and בַּת, *daughter*, as in Bath-sheba. The Chald. also בַּר, *son*, occurs in O. T., and appears in N. T. in such words as Barnabas, but which in plur. בָּרִים, Ezr. vi. 18, resembles more the Hebr. Cognate words are the Arabic *Bent*, *sons*, in the sense of descendants, and *Benát*, *daughters*, Ges. pp. 215, 236; Shaw, *Travels*, Pr. p. 8). The blessing of offspring, but especially, and sometimes exclusively, of the male sex is highly valued among all Eastern nations, while the absence is regarded as one of the severest punishments (Her. i. 136; Strab. xv. 733; Gen. xvi. 2, xxix. 31, xxx. 1, 14; Deut. vii. 14; 1 Sam. i. 6, ii. 5, iv. 20; 2 Sam. vi. 23, xviii. 18; 2 K. iv. 14; Is. xlvii. 9; Jer. xx. 15; Hos. ix. 14; Esth. v. 11; Ps. cxxvii. 3, 5; Eccl. vi. 3; Drusus, *Prov. Ben-Sivas*, ap. Cr. Sac. viii. 1887; Lane, *Mod. Eg.* i. 208, 240; Mrs. Poole, *Englishw. in Eg.* iii. 163; Niebuhr, *Descr. de l'Ar.* 67; Chardin, *Voy.* vii. 446; Russell, *Nubia*, 343). Childbirth is in the East usually, but not always, attended with little difficulty, and accomplished with little or no assistance (Gen. xxxv. 17, xxxviii. 28; Ex. i. 19; 1 Sam. iv. 19, 20; Burckhardt, *Notes on Bedouins*, i. 96; Harmer, *Obs.* iv. 425; Lady M. W. Montagu, *Letters*, ii. 217, 219, 222). As soon as the child was born, and the umbilical cord cut, it was washed in a bath, rubbed with salt, and wrapped in swaddling clothes. Arab mothers sometimes rub their children with earth or sand (Ex. xvi. 4; Job xxxviii. 9; Luke ii. 7; Burckhardt, *l. c.*). On the 8th day the rite of circumcision in the case of a boy, was performed, and a name given, sometimes, but not usually, the same as that of the father, and generally conveying some special meaning. Among Mohammedans, circumcision is most commonly delayed till the 5th, 6th, or even the 14th year (Gen. xxi. 4, xxix. 32, 33, xxx.

6, 24; Lev. xii. 3; Is. vii. 14, viii. 3. Luke i. 59, ii. 21, and Lightfoot, *ad loc.*; Spencer, *de Legg. Hebr.* v. p. 62; Strab. xvii. p. 824; Her. ii. 36, 104; Burckhardt, *ibid.* i. 96; Lane, *Mod. Eg.* i. 87; Mrs. Poole, *Englishw. in Eg.* iii. 158; Niebuhr, *Descr.* p. 70). [CIRCUMCISION.] After the birth of a male child the mother was considered unclean for 7-33 days; if the child were a female, for double that period 14-66 days. At the end of the time she was to make an offering of purification of a lamb as a burnt-offering, and a pigeon or turtle-dove as a sin-offering, or in case of poverty, two doves or pigeons, one as a burnt-offering, the other as a sin-offering (Lev. xii. 1-3; Luke ii. 22). The period of nursing appears to have been sometimes prolonged to 3 years (Is. xlix. 15; 2 Macc. vii. 27; comp. Livingstone, *Travels*, c. vi. p. 126; but Burckhardt leads to a different conclusion). The Mohammedan law enjoins mothers to suckle their children for 2 full years if possible (Lane, *Mod. Eg.* i. p. 83; Mrs. Poole, *Englishw. in Eg.* iii. p. 161). Nurses were employed in cases of necessity (Ex. ii. 9; Gen. xxiv. 59, xxxv. 8; 2 Sam. iv. 4; 2 K. xi. 2; 2 Chr. xxii. 11). The time of weaning was an occasion of rejoicing (Gen. xxi. 8). Arab children wear little or no clothing for 4 or 5 years: the young of both sexes are usually carried by the mothers on the hip or the shoulder, a custom to which allusion is made by Isaiah (Is. xlii. 22, lxxi. 12; Lane, *Mod. Eg.* i. 83). Both boys and girls in their early years, boys probably till their 5th year, were under the care of the women (Prov. xxxi. 1; Herod. i. 136; Strab. xv. 733; Niebuhr, *Descr.* p. 24). Afterwards the boys were taken by the father under his charge. Those in wealthy families had tutors or governors (בְּרִיָּה, *paidagōgos*) who were sometimes eunuchs (Num. xi. 12; 2 K. x. 1, 5; Is. xlix. 23; Gal. iii. 24; Esth. ii. 7; Joseph. *Vit.* 76; Lane, *M. E. i.* 83). Daughters usually remained in the women's apartments till marriage, or, among the poorer classes, were employed in household work (Lev. xii. 9; Num. xii. 14; 1 Sam. ix. 11; Prov. xxxi. 19, 23; Eccles. vii. 25, xlii. 9; 2 Macc. iii. 19). The example, however, and authority of the mother were carefully upheld to children of both sexes (Deut. xxi. 20; Prov. x. 1, xv. 20; 1 K. ii. 19).

The firstborn male children were regarded as devoted to God, and were to be redeemed by an offering (Ex. xiii. 13; Num. xviii. 15; Luke ii. 22). Children devoted by special vow, as Samuel was, appear to have been brought up from very early years in a school or place of education near the tabernacle or temple (1 Sam. i. 24, 28). [EDUCATION.]

The authority of parents, especially the father, over children was very great, as was also the reverence enjoined by the law to be paid to parents. The disobedient child, the striker or reviler of a parent, was liable to capital punishment, though not at the independent will of the parent. Children were liable to be taken as slaves in case of non-payment of debt, and were expected to perform menial offices for them, such as washing the feet, and to maintain them in poverty and old age. How this last obligation was evaded, see CORBAN. The like obedience is enjoined by the Gospel (Gen. xxxviii. 24; Lev. xxi. 9; Num. xii. 14; Deut. xxiv. 16; 1 K. ii. 19; 2 K. xiv. 6, iv. 1; Is. i. 1; Neh. v. 5; Job xxiv. 9; Prov. x. 1, xv. 20, xxii.

3; Drusus, *Quest. Hebr.* ii. 63, ap. Cr. Sac. viii. 1547; Col. iii. 20; Eph. vi. 1; 1 Tim. i. 9; comp. Virg. *Aen.* vi. 609; and Servius, *ad loc.*; Aristoph. *Ran.* 146; Plato, *Phaedo*, 144; *do Log.* ix.).

The legal age was 12, or even earlier in the case of a female, and 13 for a male (Maimon. *de Pros.* c. v.; Grotius and Calmet on *John* ix. 21).

The inheritance was divided equally between all the sons except the eldest, who received a double portion (Deut. xxi. 17; Gen. xxv. 31, xlix. 3; 1 Ch. v. 1, 2; Judg. xi. 2, 7). Daughters had by right no portion in the inheritance; but if a man had no son, his inheritance passed to his daughters, but they were forbidden to marry out of their father's tribe (Num. xxvii. 1, 8, xxxvi. 2, 8).

The term *sons* was applied also to the disciples and followers of the teachers of the various sects which arose after the Captivity. (Lightfoot, *Hor. Hebr.* on *John* xiii. 33; Luke xi. 45; *John* xvi. 16.) [See SECTS, SCHOOLS, and SCHOOLS OF PROPHETS.] [H. W. P.]

CHIL'EAB. [ARIGAIL; DANIEL.]

CHIL'ON (כִּילִ'ון; Χελών; Alex. Χελών; *Chelion*), the son of Elimelech and Naomi, and husband of Orpah (Ruth i. 2-5, iv. 9). He is described as "an Ephrathite (? Ephraimite) of Bethlehem-judah."

CHIL'MAD (כִּלְמַד; Χαμάν; *Chelmad*), a place or country mentioned in conjunction with Sheba and Asshur (Ez. xxvii. 23). The only name bearing any similarity to it is Charmande, a town near the Euphrates between the Mascas and the Babylonian frontier (Xen. *Anab.* i. 5, §10). As however no other writer notices this place, it is highly improbable that it was of sufficient importance to rank with Sheba and Asshur. Hitzig (*Comment.* on *Ez.* i. c.) proposes to alter the punctuation to כִּלְמַד with the sense "A-shur was as thy pupil in commerce." [W. L. B.]

CHIM'HAM (כִּמְחָם—but see below; Χαμαμ; Alex. Χαραμ; Jos. Ἀχίμαρος; *Chamaam*), a follower, and probably a son (Josh. Ant. vii. 11, §4; and comp. 1 K. ii. 7) of Barzillai the Gileadite, who returned from beyond Jordan with David (2 Sam. xix. 37, 38, 40). David appears to have bestowed on him a possession at Bethlehem, on which, in later times, an inn or *Khan* (כִּנְיָן) was standing, well-known as the starting point for travellers from Jerusalem to Egypt (Jer. xli. 17). There is some uncertainty about the name, possibly from its not being that of a Hebrew. In 2 Sam. xix. 40, it is in the Hebrew text Chimhan, כִּמְחָן; and in the *Chetib* of Jer. xli. 17, Chemôham, כִּמְחָם. [G.]

CHIN'NERETH (accurately Cinnereth, כִּנְרֶת; Κενερέθ; Alex. Κενερέθ; *Cenereth*), a fortified city in the tribe of Naphtali (Josh. xix. 35 only), of which no trace is found in later writers, and no remains by travellers. Whether it gave its name to, or received it from, the lake, which was possibly adjacent, is quite uncertain. By S. Jerome Cinnereth was identified with the later Tiberias. This may have been from some tradition then existing: the only corroboration which we can find for it is the mention in Joshua of Hammath

as near it, which was possibly the *Hammath* or Emmaus, near the shore of the lake a little south of Tiberias. This is denied by Reland (161), on the ground that Capernaum is said by St. Matt. (iv. 13) to have been on the very borders of Zebulun and Naphtali, and that Zebulun was to the south of Naphtali. But St. Matthew's expression will hardly bear this strict interpretation. The town, or the lake, appears to have given its name (slightly altered) to a district—"all Cinneroth" (1 K. xv. 20). [G.]

CHIN'NERETH, SEA OF (כִּנְרֶת; ἡ θάλασσα Κενερέθ; *mare Cenereth*, Num. xxiv. 11; Josh. xiii. 27), the inland sea, which is most familiarly known to us as the "lake of Gennesareth." This is evident from the mode in which it is mentioned in various passages in the Pentateuch and Joshua—as being at the end of Jordan opposite to the "Sea of the Arabah," i. e. the Dead Sea; as having the Arabah or Ghor below it, &c. (Deut. iii. 17; Josh. xi. 2, xii. 3). In the two former of these passages the word "sea" is omitted; in the two latter it is in a plural form—"Chinneroth" (acc. Cinnaroth כִּנְרֹת; and כִּנְרֹת, Cinnroth). The word is by some derived from Cinnor (κινύρα, *cithara*, a "harp"), as if in allusion to the oval shape of the lake. But this, to say the least, is doubtful. It seems more likely that Cinnereth was an ancient Canaanite name existing long prior to the Israelite conquest, and, like other names, adopted by the Israelites into their language. The subsequent name "Gennesar" was derived from "Cinnereth" by a change of letters of a kind frequent enough in the East. [GENNESARETH.] [G.]

CHIOS (Χίος). The position of this island in reference to the neighbouring islands and coasts could hardly be better described than in the detailed account of St. Paul's return voyage from Troas to Caesarea (Acts xx. xxi.). Having come from Assos to Mitylene in Lesbos (xx. 14), he arrived the next day over against Chios (v. 15), the next day at Samos and tarried at Trogyllium (v. 16); and the following day at Miletus (v. 17): thence he went by Cos and Rhodes to Patara (xxi. 1). [MITYLENE, SAMOS.] With this it is worth while to compare the account of Herod's voyage to join Marcus Agrippa in the Black Sea. We are told (Joseph. Ant. xvi. 2, §2) that after passing by Rhodes and Cos, he was detained some time by north winds at Chios, and sailed on to Mitylene, when the winds became more favourable. It appears that during this stay at Chios Herod gave very liberal sums towards the restoration of some public works which had suffered in the Mithridatic war. This island does not appear to have any other association with the Jews: nor is it specially mentioned in connexion with the first spread of Christianity by the Apostles. When St. Paul was there, on the occasion referred to, he did not land, but only passed the night at anchor. At that time Chios enjoyed the privilege of freedom (Plin. v. 38), and it is not certain that it ever was politically a part of the province of Asia, though it is separated from the mainland only by a strait of 5 miles. Its length is about 32 miles, and in breadth it varies from 8 to 18. Its outline is mountainous and bold; and it has always been celebrated for its beauty and fruitfulness. In recent times it has been too well known, under its modern name of

part of Palestine. It is probably the same place as

**CHORA'SHAN** (چوراشان) - 1000000 - 1000000

## CHORA'SHAI

Y 2

\* Hengstenberg (*Hist. of Bal.*) explains this expression as = *from the side of Cyprus, i. e. from that island as a rendezvous.*

his friends in which he sent presents of the plunder taken from the Amalekites (1 Sam. xxx. 30). The towns named in this catalogue are all south of Hebron, and Chorashan may, therefore, be identical with ASHAN of Nimcon. This is, however, quite uncertain, and the name has not been discovered.

[G.]

**CHORAZ'ZIN** (Χοραζιν, Χοραζεῖν, Χοροζαῖν; *Corozain*), one of the cities in which our Lord's mighty works were done, but named only in His denunciation (Matt. xi. 21; Luke x. 13). It was known to St. Jerome, who describes it (*Comm. in Esai.* ix. 1) as on the shore of the lake, two miles from Capernaum. St. Willibald (about A.D. 750) visited the various places along the lake in the following order—Tiberias, Magdalen, Capernaum, Bethsaida, Chorazin. Dr. Robinson's conclusion is that *Khu Minjeh* being Capernaum, *Et-Tubighah* is Bethsaida, and *Tell Ilam* Chorazin, but the question is enveloped in great obscurity. The origin of the name is also very uncertain. Origen writes the name as *χώρα Ζιν*, i. e. the district of Zin; but this appears to be only conjecture, and has no support from MSS. A place of this name is mentioned in the Talmud (see Reland, 722) as famous for wheat, which is still grown in large quantities in this neighbourhood.

[G.]

**CHOZE'BA** (חֲזֵבָה; *Χωζεβδ*; *virī mendacii*).

The "sons of Choze'ba" are named (1 Chr. iv. 22) amongst the descendants of Shelah the son of Judah. The name does not reappear, but it is sufficiently like *CHIZIN* (and especially the reading of the Samaritan Codex of that name) to suggest that the two refer to the same place, that, namely, elsewhere called *ACHZIB*, at which place Shelah was born. (The Vulgate version of this passage is worth notice.)

[G.]

**CHRIST.** [JESUS.]

**CHRONICLES**, First and Second Books of (in Heb. *דְּבָרֵי הַיָּמִים*; *verba dierum*, as Jerome translates it, and *sermones dierum*, as Hilar. Pictav. in Wolf, but rather *acta dierum*; journals, or diaries, i. e. the record of the daily occurrences), the name originally given to the record made by the appointed historiographers in the kingdoms of Israel and Judah. In the LXX. these books are called *Παραλειπομένων πρῶτον* and *δευτέρον*, which is understood, after Jerome's explanation, as meaning that they are supplementary to the books of Kings. The Vulgate retains both the Hebrew and Greek name in Latin characters, *Dabre jammim*, or *hajamim*, and *Paralipomenou*. Jerome tells us (*ad Dominion. et Regatium*), that in his time they formed only one book in the Hebrew MSS., but had been divided by the Christian churches using the LXX. for convenience, on account of their length. In his Ep. to Paulinus, he thus further explains the name *Paralipomenon*, and enlarges the book. "*Paralipomenon liber, id est Instrum. Vet. epitome, tantus ac talis est, ut absque illo si quis scientiam scripturarum sibi voluerit arrogare, seipsum irrideat. Per singula quinque nomina juncturasque verborum, et præter-*

*missæ in Regum libris tanguntur historiæ, et innumerabiles explicuntur Evangelii quaestiones.*" The name *Chronica*, or *Chronicorum liber*, which is given in some copies of the Vulgate, and from whence we derive our English name of "Chronicles," seems to be taken from Jerome's saying in his *prologus Galeatus*, "*Dibre hajamim, i. e. verba dierum: quod significantius Chronicorum totius divinae historiae possumus appellare.*" It was possibly suggested to him by his having translated the *Chronica* of Eusebius into Latin. Later Latin writers have given them the name of *Ephemeridum libri*. The constant tradition of the Jews, in which they have been followed by the great mass of Christian commentators, is that these books were for the most part compiled by Ezra;\* and the one genealogy, that of Zerubbabel, which comes down to a later time,<sup>b</sup> is no objection to this statement, without recurring to the strange notion broached by the old commentators, and even sanctioned by Dr. Davidson (in Kitto's *Biblical Cyclopaedia* "Chronicles"), that the knowledge of these genealogies was communicated to Ezra by inspiration. In fact, the internal evidence as to the time when the book of Chronicles was compiled, seems to tally remarkably with the tradition concerning its authorship. Notwithstanding this agreement however, the authenticity of *Chronicles* has been vehemently impugned by De Wette and other German critics,<sup>c</sup> whose arguments have been successfully refuted by Dahler, Keil, Movers, and others. It has been clearly shown that the attack was grounded not upon any real marks of spuriousness in the books themselves, but solely upon the desire of the critics in question to remove a witness whose evidence was 'atal to their favourite theory as to the post-Babylonian origin of the books of Moses. If the accounts in the books of Chronicles of the courses of priests and Levites, and the ordinances of divine service as arranged by David, and restored by Hezekiah and Josiah, are genuine, it necessarily follows that the Levitical law as set forth in the Pentateuch, was not invented after the return from the captivity. Hence the successful vindication of the authenticity of Chronicles has a very important bearing upon many of the very gravest theological questions. As regards the plan of the book, of which the book of Ezra is a continuation, forming one work, it becomes apparent immediately we consider it as the compilation of Ezra, or some one nearly contemporary with him. One of the greatest difficulties connected with the captivity and the return must have been the maintenance of that genealogical distribution of the lands which yet was a vital point of the Jewish economy. Accordingly it appears to have been one to which both Ezra and Nehemiah gave their earnest attention, as David, Hezekiah, and other kings, had done before them. Another difficulty intimately connected with the former was the maintenance of the temple services at Jerusalem. This could only be effected by the residence of the priests and Levites in Jerusalem in the order of their courses; and this residence was only practicable in case of the payment of the appointed tithes, first-fruits, and other offerings. Immediately these ceased the priests and

\* As far as 1 Chr. xxi. 2, says the *Data Bathra*, as explained by R. Gedaliah, and by Buxtorf. See Wolf, *Bib. Hebr.* vol. ii. p. 32.

<sup>b</sup> For an explanation of Zerubbabel's genealogy in 1 Chr. iii., see *Geneal. of our Lord*, by Lord A. Hervey, p. 97, seq. But even if this explanation is not ac-

cepted, there is no difficulty. The hand which added Neh. xii. 10, 11, 22, 23, might equally have added 1 Chr. iii. 22-24.

<sup>c</sup> Keil says that Spinoza led the way, by suggesting that they were compiled after Judas Maccabeus (p. 9).

Levites were obliged to disperse to their own villages to obtain a livelihood, and the temple services were neglected. But then again the registers of the Levitical genealogies were necessary, in order that it might be known who were entitled to such and such allowances, as porters, as singers, as priests, and so on; because all these offices went by families; and again the payment of the tithes, first-fruits, &c., was dependent upon the different families of Israel being established each in his inheritance. Obviously therefore one of the most pressing wants of the Jewish community after their return from Babylon would be trustworthy genealogical records, and if there were any such in existence, the arrangement and publication of them would be one of the greatest services a person in Ezra's situation could confer. But further, not only had Zerubbabel (Ezr. iii. v. vi.), and after him Ezra and Nehemiah (Ezr. ii. viii.; Neh. vii. viii.) laboured most earnestly in the teeth of immense difficulties, to restore the temple and the public worship of God there to the condition it had been in under the kings of Judah; but it appears clearly from their policy, and from the language of the contemporary prophets, Haggai and Zechariah, that they had it much at heart to re-infuse something of national life and spirit into the heart of the people, and to make them feel that they were still the inheritors of God's covenanted mercies, and that the captivity had only temporarily interrupted, not dried up, the stream of God's favour to their nation. Now nothing could more effectually aid these pious and patriotic designs than setting before the people a compendious history of the kingdom of David, which should embrace a full account of its prosperity, should trace the sins which led to its overthrow, but should carry the thread through the period of the captivity, and continue it as it were unbroken on the other side; and those passages in their former history would be especially important which exhibited their greatest and best kings as engaged in building or restoring the temple, in reforming all corruptions in religion, and zealously regulating the services of the house of God. As regards the kingdom of Israel or Samaria, seeing it had utterly and hopelessly passed away, and that the existing inhabitants were among the bitterest "adversaries of Judah and Benjamin," it would naturally engage very little of the compiler's attention. These considerations explain exactly the plan and scope of that historical work which consists of the two books of Chronicles and the book of Ezra. For after having in the first eight chapters given the genealogical divisions and settlements of the various tribes, the compiler marks distinctly his own age and his own purpose, by informing us in ch. ix. 1 of the disturbance of those settlements by the Babylonish captivity, and, in the following verses, of the partial restoration of them at the return from Babylon (2-24); and that this list refers to the families who had returned from Babylon is clear, not only from the context, but from its insertion, Neh. xi. 3-22,<sup>4</sup> with additional matter evidently extracted from the public archives, and relating to times subsequent to the return from Babylon, extending to Neh. xii. 27, where Nehemiah's narrative is again resumed in continuance with Neh. xi. 2. Having thus shown the re-establishment of the returned families, each in their

own inheritance according to the houses of their fathers, the compiler proceeds to the other part of his plan, which is to give a continuous history of the kingdom of Judah from David to his own times, introduced by the closing scene of Saul's life (ch. x.), which introduction is itself prefaced by a genealogy of the house of Saul (ix. 35-44), extracted from the genealogical tables drawn up in the reign of king Hezekiah, as is at once manifest by counting the 13 or 14 generations, from Jonathan to the sons of Azel inclusive, exactly corresponding to the 14 from David to Hezekiah inclusive. This part of the plan extends from 1 Chr. ix. 35 to the end of the book of Ezra: 1 Chr. xv.-xvii. xxii.-xxix.; 2 Chr. xiii.-xv. xxiv. xxvi. xxix.-xxxi. and xxxv. are among the passages wholly or in part peculiar to the books of Chronicles, which mark the purpose of the compiler, and are especially suited to the age and the work of Ezra. Many Chaldaisms in the language of these books, the resemblance of the style of Chron. to that of Ezra, which is, in parts, avowedly Ezra's composition, the reckoning by Darics (1 Chr. xxix. 7) as most explain אַרְרַכְנִים, as well as the breaking off of the narrative in the lifetime of Ezra, are among other valid arguments by which the authorship, or rather compilation of 1 and 2 Chr. and Ezra is vindicated to Ezra. As regards the materials used by him, and the sources of his information, they are not difficult to discover. The genealogies are obviously transcribed from some register, in which were preserved the genealogies of the tribes and families drawn up at different times. This appears from the very different ages at which different genealogies terminate, indicating of course the particular reign when each was drawn up. Thus e.g. the genealogy of the descendants of Sheshan (1 Chr. ii. 34-41) was drawn up in Hezekiah's reign, since, including Zabad, who lived in David's time, and Azariah in the time of Joash, it ends with a generation contemporary with Hezekiah [AZARIAH, No. 13]. The line of the high-priests (1 Chr. vi. 1-15) must have been drawn up during the captivity; that in 50-53, in the time of David or Solomon; those of Heman and Asaph in the same chapter in the time of David; that of the sons of Azel (1 Chr. viii. 38) in the time of Hezekiah; that of the sons of Zerubbabel (1 Chr. iii. 10-24) in the time of Ezra, and so on.

The same wide divergence in the age of other materials embodied in the books of Chronicles is also apparent. Thus the information in 1 Chr. i. concerning the kings of Edom before the reign of Saul, was obviously compiled from very ancient sources. The same may be said of the incident of the slaughter of the sons of Ephraim by the Gittites, 1 Chr. vii. 21, viii. 13, and of the account of the sons of Shela, and their dominion in Moab, 1 Chr. iv. 21, 22. The curious details concerning the Reubenites and Gadites in 1 Chr. v. must have been drawn from contemporary documents, embodied probably in the genealogical records of Jotham and Jehoash, while other records used by the compiler are as late as after the return from Babylon, such as 1 Chr. ix. 2 sqq.; 2 Chr. xxxvi. 20 sqq.; and others, as Ezr. ii. and iv. 6-23, are as late as the time of Artaxerxes and Nehemiah. Hence it is further manifest that the books of Chronicles and Ezra, though put into their present form by one hand, contain in fact extracts from the writings of many different writers, which were

<sup>4</sup> Compare also 1 Chr. ix. 19, with Ezr. ii. 42, Neh. vii. 45.

*estant at the time the compilation was made.* For the full account of the reign of David, he made copious extracts from the books of Samuel the seer, Nathan the prophet, and Gad the seer (1 Chr. xxix. 29). For the reign of Solomon he copied from "the book of Nathan," from "the prophecy of Ahijah the Shilonite," and from "the visions of Iddo the seer" (2 Chr. ix. 29). Another work of Iddo called "the story (or interpretation, *Midrash*, מִדְרָשׁ) of the prophet Iddo," supplied an account of the acts, and the ways, and sayings of king Abijah (xiii. 22); while yet another book of Iddo concerning genealogies, with the book of the prophet Shemaiah, contained the acts of king Rehoboam (xii. 15). For later times the "Book of the kings of Israel and Judah" is repeatedly cited (2 Chr. xxv. 26, xxvii. 7, xxxii. 32, xxxiii. 18, &c.), and "the sayings of the seers," or rather of Chozai (xxxiii. 19); and for the reigns of Uzziah and Hezekiah "the vision of the prophet Isaiah" (xxvi. 22, xxxii. 32). In other cases where no reference is made to any book as containing further information, it is probable that the whole account of such reigns is transcribed. Besides the above named works, there was also the public national record called סֵפֶר דְּבָרֵי הַיָּמִים, mentioned in Neh. xii. 23, from which doubtless the present books took their name, and from which the genealogies and other matters in them were probably derived, and which are alluded to as having existed as early as the reign of David, 1 Chr. xxvii. 24. These "Chronicles of David," דְּבָרֵי הַיָּמִים לְדָוִד, are probably the same as the דְּבָרֵי הַיָּמִים, above referred to, as written by Samuel, Nathan, and Gad. From this time the affairs of each king's reign were regularly recorded in a book called at first סֵפֶר דְּבָרֵי שְׁלֹמֹה, "the book of the acts of Solomon" (1 K. xi. 41), by the name of the king, as before of David, but afterwards in both kingdoms by the general name of הַיָּמִים ד', as in the constantly recurring formula,—“Now the rest of the acts (דְּבָרֵי) of Rehoboam, Abijah, &c.; Jeroboam, Nadab, &c., are they not written in the book of the Chronicles of the kings of Judah” or “of Israel” (1 K. xiv. 28, xv. 7, &c.)? And this continues to the end of Jehoiakim's reign, as appears by 2 K. xxiv. 5; 2 Chr. xxxvi. 8. And it was doubtless from this common source that the passages in the Books of Samuel and Kings identical with the Books of Chronicles were derived. All these several works have perished, but the most important matters in them have been providentially preserved to us in the Chronicles.

As regards the closing chapter of 2 Chr. subsequent to v. 8, and the 1st ch. of Ezra, a comparison of them with the narrative of 2 K. xxiv. xxv., will lead to the conclusion that while the writer of the narrative in *Kings* lived in Judah, and died under the dynasty of Nebuchadnezzar, the writer of the chapter in *Chronicles* lived at Babylon, and survived till the commencement at least of the Persian dynasty. For this last writer gives no details of the reigns of Jehoiachin, or Zedekiah, or the events in Judah subsequent to the burning of the temple; but, only dwelling on the moral lessons connected with the destruction of Jerusalem, passes on quickly to relate the return from captivity. Moreover, he seems to speak as one who had long been a subject of Nebuchadnezzar, calling him

simply “King Nebuchadnezzar;” and by the repeated use of the expression “*brought him, or these, to Babylon*,” rather encourages the idea that the writer was there himself. The first chapter of Ezra strongly confirms this view, for we have copious details, not likely to be known except to one at Babylon, of the decree, the presents made to the captives, the bringing out of the sacred vessels, the very name of the Chaldee treasurer, the number and weight of the vessels, and the Chaldee name of Zerubbabel, and in this chapter the writer speaks throughout of the captives *going up* to Jerusalem, and Sheshbazzar *taking* them up (הֶעֱלָה, as opposed to הֵבִיא). But with this clue we may advance a little further, and ask, who was there at Babylon, a prophet, as the writer of sacred annals must be, an author, a subject of Nebuchadnezzar and his sons, and yet who survived to see the Persian dynasty, to whom we can with probability assign this narrative? Surely the answer will be Daniel. Who so likely to dwell on the sacred vessels taken by Nebuchadnezzar (Dan. v. 2, 23); who so likely to refer to the prophecy of Jeremiah (Dan. ix. 2); who so likely to bewail the stubbornness of the people, and their rejection of the prophets (Dan. ix. 5-8); who so likely to possess the text of Cyrus's decree to know and record the name of the treasurer (Dan. i. 3, 11); and to name Zerubbabel by his Chaldee name (Dan. i. 7)? Add to this, that Ezra i. exactly supplies the unaccountable gap between Dan. ix. and x. [EZRA], and we may conclude with some confidence that as Jeremiah wrote the closing portion of the Book of Kings, so did Daniel write the corresponding portion in Chronicles, and down to the end of Ezr. i. Ezra perhaps brought this with him from Babylon, and made use of it to carry on the Jewish history from the point where the old Chronicles failed him. As regards the TEXT of the Chronicles it is in parts very corrupt, and has the appearance of having been copied from MSS. which were partly effaced by age or injury. Jerome (*Præf. ad Paral.*) speaks of the Greek text as being hopelessly confused in his days, and assigns this as a reason why he made a new translation from the Hebrew. However, in several of the differences between the text of Chronicles and the parallel passages in the other books,\* the Chronicles preserve the purest and truest reading, as e.g. 2 Chr. ix. 25, compared with 1 K. iv. 26; 1 Chr. xi. 11 compared with 2 Sam. xxiii. 8; xxi. 12 comp. with 2 Sam. xxiv. 13; 2 Chr. xxvi. 1, 3, 8, &c. comp. with 2 K. xv. 1, 6, &c. As regards the LANGUAGE of these books, as of Ezra, Nehemiah, Esther, and the later prophets, it has a marked Chaldee colouring, and Gesenius says of them, that “as literary works, they are decidedly inferior to those of older date” (*Introd. to Heb. Gramm.*). The chief Chaldaisms are the use of certain words not found in old Hebrew, as הֶעֱלָה, זָמַן, סוֹף, &c., or of words in a different sense, as אָמַר, שָׁנָה, &c., or of a different orthography, as דָּוִיד for דָּוִד, רֶב, &c., and the interchange of נ and מ at the end and at the beginning of words, and other peculiarities pointed out by Gesenius and others. For further information see C. F.

\* For a careful comparison of the text of 1 Chr. xi. with 2 Sam. v. and xxiii., see Dr. Kennicott's dissertation.

**CHRONOLOGY.** 1. INTRODUCTION.—The object of this article is to indicate the present state of biblical chronology. By this term we understand the technical and historical chronology of the Jews and their ancestors from the earliest time to the close of the New Testament Canon. The technical division must be discussed in some detail, the historical only as far as the return from Babylon, the disputed matters of the period following that event being separately treated in other articles.

The character of the inquiry may be made clearer by some remarks on the general nature of the subject. Formerly too great an exactness was hoped for in the determination of Hebrew chronology. Where the materials were not definite enough to fix a date within a few years, it was expected that the very day could be ascertained. Hence arose great unsoundness and variety of results, which ultimately produced a general feeling of distrust. At present critics are rather prone to run into this latter extreme and to treat this subject as altogether vague and uncertain. The truth, as might be expected, lies between these two extreme judgments. The character of the records whence we draw our information forbids us to hope for a complete system. The Bible does not give a complete history of the times to which it refers: in its historical portions it deals with special and detached periods. The chronological information is, therefore, not absolutely continuous, although often, with the evident purpose of forming a kind of connexion between these different portions, it has a more continuous character than might have been

with his speaking of the duration of Saul's reign, as to which the Hebrew Scriptures are silent. Of the latter class are such statements as Jephthah's of the 300 years that the Israelites had held the country of the Amorites before his days, and the indications of time afforded by the growth of a tribe or family, and changes in national character and habits, which indications, from their requiring careful study and acute criticism, have been greatly neglected. The evidence of the genealogies without numbers is weakened not so much by designed alteration, of which the presence of the Second Cainan in two lists affords the only positive instances, but by the abundant indications they show of the carelessness of copyists. Their very nature also renders them guides to which we cannot trust since it appears that they may be in any case broken without being technically imperfect. Even were this not the case, it must be proved before they can be made the grounds of chronological calculation, that the length of man's life and the time of manhood were always what they now are, and even then the result could only be approximative, and when the steps were few, very uncertain. This inquiry therefore demands the greatest caution and judgment.

2. TECHNICAL CHRONOLOGY.—The technical part of Hebrew chronology presents great difficulties. The biblical information is almost wholly inferential, although in many cases the inferences to be drawn are of a very positive nature, not always absolutely but in their historical application. For instance, although the particular nature of each year of the common kind—for there appear to have been two years—cannot be fixed, yet the general or average character of all can be determined with a great approach to exactness. In this part we may use with more than ordinary confidence the evidence of the earlier Rabbinical commentators, who, in such matters, could scarcely be ill-informed. They lived near to the times at which all the Jewish observances connected with the calendar were strictly kept in the country for which they were framed, and it has not been shown that they had any motive for misrepresentation. We can, however, make no good use of our materials if we do not ascertain what character to expect in Hebrew technical chronology. There is no reason to look for any great change, either in the way of advance or decline, although it seems probable that the patriarchal division of time was somewhat ruder than that established in connexion with the Law, and that, after the time of Moses until the establishment of the kingdom, but little attention was paid to science. In our endeavour to ascertain how much scientific knowledge the patriarchs and Israelites are likely to have had, we must not expect either the accuracy of modern science or the inaccuracy of modern ignorance. As to scientific knowledge connected with chronology, particularly that of astronomy, the cases of the Egyptians and the Chaldees will assist us to form a judgment with respect to the Hebrews. These last, however, we must remember, had not the same advantage of being wholly settled, nor the same inducements of national religions connected with the heavenly bodies. The Arabs of the desert, from somewhat before the time of Mohammad—that is, as far as our knowledge of them in this respect extends—to the present day, afford the best parallel. We do not find them to have been a mathematical people or one given to chronological computation depending on astronomy, but to have regulated their

part of the subject depends, so far as the Bible is concerned, almost wholly upon inference. It might be supposed that the accuracy of the information would compensate in some degree for its scantiness and occasional want of continuity. This was, doubtless, originally the case, but it has suffered by designed alteration and by the carelessness of copyists. It is, therefore, of the highest moment to ascertain, as far as possible, what are the indications of alterations by design, and the character of the data in which they occur, and also what class of data have been shown to have suffered through the carelessness of copyists. Designed alteration of numbers has only been detected in the two genealogical lists of Abraham's ancestors in Genesis, in which the character of the differences of the Hebrew text, the Septuagint, and the Samaritan Pentateuch, is such as to indicate separate alteration by design of two out of the three records. The object of these alterations must have been either to shorten or to lengthen the chronology. With the same purpose alterations may have been made in the prominent detached large numbers in the Old Testament, and even in the smaller numbers, when forming part of a series, or, in either case, in the accompanying words determining the historical place of these numbers. Hence there is great value in independent evidence in the New Testament and in incidental evidence in the Old. Of the former class are St. Paul's mentions of the period of the Judges, and of that from the promise to Abraham until the Exile, especially considered in connexion

calendars by observation alone. It might have been expected that their observations would, from their constant recurrence, have acquired an extraordinary delicacy and gradually given place to computations; but such we do not find to have been the case, and these observations are not now more accurate than would be the earlier ones of any series of the kind. The same characteristics appear to have been those of the scientific knowledge and practice of the Hebrews. We have no reason for supposing that they had attained, either by discovery or by the instruction of foreigners, even in individual cases, to a high knowledge of mathematics or accuracy of chronological computation at any period of their history. In these particulars it is probable that they were always far below the Egyptians and the Chaldees. But there is sufficient evidence that they were not inattentive observers of the heavens in the allusions to stars and constellations as well-known objects. We may therefore expect, in the case of the Hebrews, that wherever observation could take the place of computation it would be employed, and that its accuracy would not be of more than a moderate degree. If, for instance, a new moon were to be observed at any town, it would be known within two days when it might be first seen, and one of the clearest-sighted men of the place would ascend to an eminence to look for it. This would be done throughout a period of centuries without any close average for computation being obtained, since the observations would not be kept on record. So also of the risings of stars and of the times of the equinoxes. These probable conclusions as to the importance of observation and its degree of accuracy must be kept in view in examining this section.

Before noticing the divisions of time we must speak of genealogies and generations.

It is commonly supposed that the genealogies given in the Bible are mostly continuous. When, however, we come to examine them closely, we find that many are broken without being in consequence technically defective as Hebrew genealogies. A modern pedigree thus broken would be defective, but the principle of these genealogies must have been different. A notable instance is that of the genealogy of our Saviour given by St. Matthew. In this genealogy Joiam is immediately followed by Ozias, as if his son—Ahaziah, Joash, and Amaziah being omitted (Matt. i. 8). That this is not an accidental omission of a copyist is evident from the specification of the number of generations from Abraham to David, from David to the Babylonish Captivity, and from the Babylonish Captivity to Christ, in each case fourteen generations. Probably these missing names were purposely left out to make the number for the interval equal to that of the other intervals, such an omission being obvious and not liable to cause error. In Ezia's genealogy (Ezr. vii. 1-5) there is a similar omission, which in so famous a line can scarcely be attributed to the carelessness of a copyist. There are also examples of a man being called the son of a remote ancestor in a statement of a genealogical form, as the following: "Shebuel the son of Gershon [Gershom], the son of Moses" (1 Chr. xxvi. 24), where a contemporary of David is placed in the same relation to Gershom the son of Moses, as the latter is to Moses himself. That these are not exceptional instances is evident from the occurrence of examples of the same kind in historical narratives. Thus Jehu is called "the

son of Nimshi" (1 K. xix. 16; 2 K. ix. 20; 2 Chr. xxii. 7), as well as "the son of Jehoshaphat the son of Nimshi" (1 K. ix. 2, 14). In the same manner Laban is called "the son of Nahor" (Gen. xxix. 5), whereas he was his grandson, being the son of Bethuel (xxviii. 2, 5, comp. xxii. 20-23). We cannot, therefore, venture to use the Hebrew genealogical lists to compute intervals of time except where we can prove each descent to be immediate. But even if we can do this we have still to be sure that we can determine the average length of each generation. (*Historical Chronology*.) Ideler remarks that Moses, like Herodotus, reckons by generations. (*Handbuch*, i. p. 506.) Certainly in the Pentateuch generations are connected with chronology by the length of each in a series being indicated, but this is not the manner of Herodotus, who reckons by generations, assuming an average of three to a century (ii. 142). There is no use of a generation as a division of time, in the Pentateuch, unless, with some, we suppose that יָדָוּ in Gen. xv. 16 is so used: those, however, who hold this opinion make it an interval of a hundred years, since it would, if a period of time, seem to be the fourth part of the 400 years of verse 13: most probably, however, the meaning is that some of the fourth generation should come forth from Egypt. [GENEALOGY; GENERATION.]

We have now to speak of the divisions of time, commencing with the least. There is no evidence that the ancient Hebrews had any such division smaller than an hour:—

*Hour*.—The hour is supposed to be mentioned in Daniel (iii. 6, 15, iv. 16, 30 A. V. 19, 33, v. 5), but in no one of these cases is a definite period of time clearly intended by שָׁעָה, שְׁעָה, שְׁעִיתָא, Chald., the word employed. The Egyptians divided the day and night into hours like ourselves from at least B.C. cir. 1200. (See Lepsius, *Chronologie der Aeg.* i. p. 130.) It is therefore not improbable that the Israelites were acquainted with the hour from an early period. The "sun-dial of Ahaz" whatever instrument, fixed or movable, it may have been, implies a division of the kind. In the N. T. we find the same system as the modern, the hours being reckoned from the beginning of the Jewish night and day. [HOURS.]
